> My name is Amy Tuck and I work for Manitoba Hydro in the Affordable Energy Department. I am the Marketing Specialist for our Lower Income Energy Efficiency Program and Power Smart First Nations Program. I was hoping you could help me as I am trying to get a better understanding of low income programs other jurisdictions are running. In my research I've seen that Massachusetts has an extensive program I was hoping to get a better understanding of how programs work in your state. I am contacting you as I know that Action Inc is one of the Program Administrators for the Low Income Energy Retrofits. I am curious how the interact works between the Program Administrators, the Energy Efficiency Program Administrators, LEAN, the Public Housing Authorities, CDCs, etc. Who is actually the governing body? I understand that LEAN is financed by the utilities, is there shared cost for the upgrades between the utilities, the Department of Energy and the state? Are there any other funding sources?

>

> I was reading that retrofits must be cost effective if not then there is a co-pay, is this for both low income single family and low income multifamily dwellings? How is the co-pay determined? How many people have use the program to date? What is the low income market size that you are serving? How does a customer participate, can home owners participate? How is participation determined, is it a first come first serve basis?
