**2015/16 COST OF GAS APPLICATION**

**Centra Gas Manitoba Inc. Undertaking #4**

**Centra to advise how long the Gas Supply Division Manager position has been vacant.**

**Response:**

The Gas Supply Division Manager role has been vacant since January 2013. Gas Supply management reported directly to Vince Warden, Vice-President of Finance & Administration and CFO until his retirement in February 2013, at which point responsibility for the Gas Supply Division transitioned to Lloyd Kuczek, in his role as the Vice-President of Customer Care & Energy Conservation (CC&EC). Under this structure, all approval authorities of the past Division Manager position are the responsibility of the respective Vice-President.

The existing management structure has resulted in gas supply issues being given Executive level attention and an effective organizational structure, with the significant and in-depth skills and experience of the current Gas Supply management team (i.e. three positions of Gas Supply, Transportation & Storage Department Manager, Gas Supply Analysis & Administration Department Manager and Project Leader. Due to the importance of the gas supply function, the Corporation intends to continue with the existing management team reporting directly to a Vice-President.
