

**PUB Book of Documents – Tab 3 Page 35**

The following graph is an update to Manitoba Hydro Undertaking #137 which was filed as Exhibit #202 in the NFAT hearing. The incremental savings in the graph below removes savings from one of the self-generation projects that was included as incremental savings each year due to the project only having a savings persistence of one year. This graph better reflects the incremental savings forecast to be achieved by Manitoba Hydro.
