

ELECTRIC GENERAL RATE APPLICATION 2015**Manitoba Hydro Undertaking #67**

Manitoba Hydro to verify if they currently offer electronic thermostats to participants who have electric furnaces.

Response:

The Affordable Energy Program provides an electronic thermostat to customers who do not have one when replacing a furnace through the program. This applies to participants who upgrade their standard efficiency natural gas furnace to a high efficiency natural gas furnace or convert from propane, oil or coal to either an electric or high efficiency natural gas furnace.
