EXPERTS	Share experts and one potential witness			Estimated \$50,000.00
Consultant Michael Anderson				Estimated \$15,000.00
TOTAL FEES & DISBURSEMENTS				

SCHEDULE A To Intervener Application of MKO

MKO represents more than 65,000 treaty First Nation citizens in northern Manitoba. MKO has been in existence for over 33 years and is a nonprofit advocacy organization governed by the elected Chiefs of the 30 sovereign First Nations in northern Manitoba.

All citizens of the MKO First Nations and the MKO First Nation government facilities receive electrical service solely from Manitoba Hydro. The citizens of MKO First Nations are residential ratepayers and the First Nation governments are general service ratepayers. The three diesel First Nations which pay electricity bills for the schools are also First Nation education rate customers. In the past MKO has been the only intervener which represents both residential and general service customers.

The proposed rate increases will disproportionately affect MKO First Nations as the majority of the citizens are in the low income category and the general service customers have limited ability to absorb any additional costs.

The proposed rate increases will disproportionately affect MKO in a second fashion in that many of the benefits to be generated by the increases will flow to the provincial government to be used for general purposes and MKO First Nations receive little or no benefit from provincial disbursements.

In reviewing the proposed rate increases MKO would be concerned with the following factors:

1. are Manitoba Hydro forecasts reliable;
2. are the actual and projected costs of Hydro necessary;
3. has Manitoba Hydro demonstrated that its revenue requirements are reasonable.

Specifically MKO would be reviewing are the rate increases sustainable for First Nations and for First Nation citizens. In that regard MKO would be focussing on two specific areas:

1. Bill reduction through demand side management
2. Bill reduction through rate mitigation measures.

MKO would examine the application with respect to the recognition and implementation of specific mitigation measures such as:

1. removal of mitigation costs from rates
2. allocation of greater share of net export revenue to First Nations customers
3. establishment of a "equivalent to gas" rate for heat portion of bills
4. allocation of net export revenue to reduce diesel cost of service
5. removal of water rental fees from rates to First Nations.

With regard to the preliminary issues list, MKO would be a supporting intervener for all issues save and except numbers 6 to 10. MKO would have a significant interest as an intervener on issues 12 to 15 and would share primary intervener status on issues 36 to 38 and 47.
