

Undertaking # 25

MPI to advise which scenarios under 2A [PUB Pre-Ask #3] the Corporation would consider to be extreme outliers and why.

RESPONSE:

The Corporation would consider an outlier to be a scenario that produces undesirable losses or excessive profits in the rating years and/or is based on inappropriate assumptions regarding the Corporation's risk tolerance.

On this basis, the only scenarios we would consider **not outliers** are:

- 3a. CBOC Interest Rates (April) with 1.8% Premium rate increase
- Pre-Ask 2-B (adjusted standard) with 1.8% premium rate increase
