

## Undertaking # 18

MPI to provide information on how the road safety survey was conducted and which individuals participated.

### **RESPONSE:**

This telephone survey was fielded from January 2 to 28, 2014 with a random sample of 800 adult Manitobans. The participants were told that the vendor was conducting the survey on behalf of Manitoba Public Insurance. The survey included questions about the seriousness of up to 25 road safety issues, and asked Manitobans about their views related to whether the Corporation should be involved in efforts to make driving safer in the province.
