« **drain** » Drain d'ordre 1, 2, 3, 4, 5 ou 6 sur un plan du ministère de la Gestion des ressources hydriques du Manitoba où est indiquée la désignation des drains. ("drain")

« **laisse des hautes eaux** » Endroit sur un bien-fonds se trouvant à la bordure de l'eau lorsque celle-ci atteint le niveau suivant :

a) niveau maximal admis pour l'exploitation d'un réservoir;

b) niveau de débordement d'un drain;

c) niveau le plus élevé qu'atteint habituellement chaque année un autre plan d'eau et qui demeure inchangé suffisamment longtemps pour entraîner la modification des caractéristiques du sol ou de la végétation s'y trouvant. ("high water mark")

« **Loi** » *La Loi sur la protection des eaux*. ("Act")

"**nutrient management plan**" means a plan that

(a) addresses all sources of nutrients that will be stored or handled on, or applied to, the land to which the plan applies, including livestock manure, synthetic fertilizers, and municipal wastewater sludge and biosolids; and

(b) meets the requirements of section 19. (« plan de gestion des nutriments »)

"**nutrient management zone**" means a water quality management zone designated under section 3 for the management of nutrients. (« zone de gestion des nutriments »)

"**organic soil**" means soil developed mainly from organic deposits and consisting of at least 17% organic carbon (30% organic matter) to a depth of 40 cm (16 in) if formed from mesic and humic peat, or 60 cm (24 in) if formed from fibric peat. (« sol organique »)

"**registered plan**" means a nutrient management plan registered under Part 5. (« plan enregistré »)

"**soil class**" means a class of soil classified using the approach described under the heading "Soil Capability Classification for Agriculture" in *The Canada Land Inventory Report No. 2*, published in 1972 by the Government of Canada, Department of the Environment. (« classe de sol »)

Interpretation of "major wetland, bog, marsh or swamp"

1(2) For the purposes of this regulation, a wetland, bog, marsh or swamp is major if

(a) it has an area greater than 2 ha (4.94 acres);

(b) it is connected to one or more downstream water bodies or groundwater features; and

« **plan de gestion des nutriments** » Plan qui :

a) d'une part, fait état de toutes les sources de nutriments qui seront stockés ou manutentionnés sur le bien-fonds, ou qui y seront épandus, notamment les déjections du bétail, les engrais synthétiques ainsi que les boues et les biosolides d'épuration des municipalités;

b) d'autre part, remplit les exigences énoncées à l'article 19. ("nutrient management plan")

« **plan enregistré** » Plan de gestion des nutriments enregistré en vertu de la partie 5. ("registered plan")

« **sol organique** » Sol provenant essentiellement de dépôts organiques, composé d'au moins 17 % de carbone organique (30 % de matières organiques) et ayant une profondeur de 40 cm (16 po) s'il est constitué de tourbe mésique et humique ou de 60 cm (24 po) s'il est constitué de tourbe fibrique. ("organic soil")

« **source d'eau potable** » Source d'eau potable d'un réseau public ou semi-public d'alimentation en eau au sens de la *Loi sur la qualité de l'eau potable*. ("drinking water source")

« **zone de gestion des nutriments** » Zone de gestion de la qualité de l'eau désignée en vertu de l'article 3 en vue de la gestion des nutriments. ("nutrient management zone")

Sens de « marécage ou marais important »

1(2) Pour l'application du présent règlement, un marécage ou un marais est important :

a) s'il occupe une superficie de plus de 2 ha (4,94 acres);

b) s'il est relié à un ou à plusieurs plans d'eau ou caractéristiques d'eaux souterraines en aval;

(c) it contains standing water or saturated soils for periods of time sufficient to support the development of hydrophytic vegetation.

c) s'il contient de l'eau stagnante ou des sols saturés pendant des périodes suffisantes pour permettre la formation d'hydrophytes.

Interpretation of "application"

1(3) For greater certainty,

(a) the deposit of manure by a grazing animal outside of a confined livestock area, as defined in the *Livestock Manure and Mortalities Management Regulation*, Manitoba Regulation 42/98; or

(b) the operation of an onsite wastewater management system, as defined in the *Onsite Wastewater Management Systems Regulation*, Manitoba Regulation 83/2003;

is not to be considered an application of a substance containing nitrogen or phosphorus to land by a person.

Sens de « épandage »

1(3) Il est entendu que ne peuvent être assimilés à l'épandage de substances contenant de l'azote ou du phosphore par une personne :

a) le dépôt de déjections par des animaux au pâturage, à l'extérieur d'un espace clos au sens du *Règlement sur la gestion des animaux morts et des déjections du bétail*, R.M. 42/98;

b) l'exploitation d'un système de gestion autonome d'eaux résiduaires, au sens du *Règlement sur les systèmes de gestion autonomes d'eaux résiduaires*, R.M. 83/2003.

Purpose

2 The purpose of this regulation is to protect water quality by encouraging responsible nutrient planning and by regulating or prohibiting

(a) the application to land of substances containing nitrogen or phosphorus; and

(b) the development of certain types of nutrient generating facilities in areas where water bodies or groundwater are sensitive to impact.

Objet

2 Le présent règlement a pour objet de protéger la qualité de l'eau en favorisant une bonne planification de l'utilisation des nutriments et en régissant ou en interdisant :

a) l'épandage de substances contenant de l'azote ou du phosphore;

b) l'aménagement de certains types d'installations de production de nutriments dans les zones où les plans d'eau et les eaux souterraines sont vulnérables.

PART 2

PARTIE 2

WATER QUALITY MANAGEMENT ZONES
FOR NUTRIENT MANAGEMENT

DÉSIGNATION DE ZONES
DE GESTION DE LA QUALITÉ DE L'EAU
EN VUE DE LA GESTION DES NUTRIANTS

Water quality management zones

3(1) The following water quality management zones are hereby designated for the management of nutrients in accordance with this regulation:

Zones de gestion de la qualité de l'eau

3(1) En vue de la gestion des nutriments conformément au présent règlement, sont désignées les zones de la gestion de la qualité de l'eau qui suivent :

(a) zone N1, consisting of land belonging to, or having the characteristics of, soil class 1, 2 or 3, other than 3M, 3ME, 3MI, 3MN, 3MP, 3MT, 3MW and any other subclass of soil class 3 having an "M" subclass designation;

(b) zone N2, consisting of

(i) land belonging to, or having the characteristics of, soil subclass 3M, 3ME, 3MI, 3MN, 3MP, 3MT, 3MW or any other subclass of soil class 3 having an "M" subclass designation,

(ii) land belonging to, or having the characteristics of, soil class 4, and

(iii) land belonging to, or having the characteristics of, soil subclass 5M, if it is being irrigated;

(c) zone N3, consisting of land belonging to, or having the characteristics of, soil class 5 that is not included in zone N2;

(d) zone N4, consisting of

(i) land belonging to, or having the characteristics of, soil class 6 or 7, and

(ii) land comprised of unimproved organic soils;

(e) zone N5, consisting of

(i) land in a city, town, village, local urban district, or a community as defined in *The Northern Affairs Act*,

(ii) a lot shown on a plan of subdivision and having an area of 2 ha (4.94 acres) or less, and

(iii) land not described in subclause (i) or (ii) that is in a built-up area,

but not including land used primarily for agricultural purposes;

(f) the Nutrient Buffer Zone, consisting of the lands described in subsection (3).

a) la zone N1, constituée des biens-fonds faisant partie des classes de sol 1, 2 ou 3, ou en ayant les caractéristiques, mais non des sous-classes 3M, 3ME, 3MI, 3MN, 3MP, 3MT et 3MW ni de toute autre sous-classe 3 portant une désignation « M »;

b) la zone N2, constituée des biens-fonds :

(i) faisant partie des sous-classes de sol 3M, 3ME, 3MI, 3MN, 3MP, 3MT et 3MW ou de toute autre sous-classe 3 portant une désignation « M », ou en ayant les caractéristiques,

(ii) faisant partie de la classe de sol 4, ou en ayant les caractéristiques,

(iii) irrigués faisant partie de la sous-classe de sol 5M, ou en ayant les caractéristiques;

c) la zone N3, constituée des biens-fonds faisant partie de la classe de sol 5, ou en ayant les caractéristiques, mais ne se trouvant pas dans la zone N2;

d) la zone N4, constituée des biens-fonds :

(i) faisant partie des classes de sol 6 ou 7, ou en ayant les caractéristiques,

(ii) se trouvant sur des sols organiques non cultivés;

e) la zone N5, qui exclut les biens-fonds utilisés principalement à des fins agricoles, mais qui comprend :

(i) les biens-fonds se trouvant dans des villes, des villages, des districts urbains locaux ou des communautés, au sens de la *Loi sur les affaires du Nord*,

(ii) les lots indiqués sur un plan de lotissement et ayant une superficie d'au plus 2 ha (4,94 acres),

(iii) les biens-fonds qui ne sont pas visés au sous-alinéa (i) ou (ii) et qui se trouvent dans une zone bâtie;

f) la zone-tampon, constituée des biens-fonds visés au paragraphe (3).

Interpretation

3(2) For the purpose of subsection (1),

(a) land that would otherwise be in any of nutrient management zones N1 to N4 is deemed not to be in that zone if it is in zone N5; and

(b) land that would otherwise be in any of nutrient management zones N1 to N5 is deemed not to be in that zone if it is in the Nutrient Buffer Zone.

Nutrient Buffer Zone

3(3) The Nutrient Buffer Zone consists of the following:

(a) land within 15 metres of the edge of a groundwater feature, or within 20 metres of it if that area is not covered by permanent vegetation;

(b) land within a roadside ditch or an Order 1 or 2 drain;

(c) land between the water's edge and the high water mark of a wetland, bog, marsh or swamp other than a major wetland, bog, marsh or swamp;

(d) land adjacent to a water body listed in the following table, having a width from the water's edge to a point that is the distance set out in column A or B, as the case may be, from

(i) the water body's high water mark, or

(ii) the top of the outermost bank on that side of the water body,

whichever is further from the water.

Interprétation

3(2) Pour l'application du paragraphe (1) :

a) un bien-fonds qui se trouverait par ailleurs dans l'une quelconque des zones de gestion des nutriments N1 à N4 est réputé ne pas y être s'il est situé dans la zone N5;

b) un bien-fonds qui se trouverait par ailleurs dans l'une quelconque des zones de gestion des nutriments N1 à N5 est réputé ne pas y être s'il se trouve dans la zone-tampon.

Zone-tampon

3(3) La zone-tampon est composée :

a) des biens-fonds situés à au plus 15 mètres de la bordure d'une caractéristique d'eaux souterraines ou situés à au plus 20 mètres de celle-ci s'il n'y a pas de végétation permanente;

b) des biens-fonds contenus dans un fossé en bordure d'une route ou dans un drain d'ordre 1 ou 2;

c) des biens-fonds situés entre la bordure de l'eau et la laisse des hautes eaux d'un marécage ou d'un marais qui n'est pas important;

d) des biens-fonds contigus à un plan d'eau, indiqué dans le tableau ci-dessous, dont la largeur s'étend de la bordure du plan d'eau jusqu'à un point correspondant à la distance indiquée dans la colonne A ou B et calculée à partir de la laisse des hautes eaux ou du sommet de la rive la plus éloignée, selon ce qui permet d'obtenir le résultat le plus important.

Water Body	A	B
a lake or reservoir designated as vulnerable	30 m	35 m
a lake or reservoir (not including a constructed stormwater retention pond) not designated as vulnerable	15 m	20 m
a river, creek or stream designated as vulnerable		
a river, creek or stream not designated as vulnerable	3 m	8 m
an Order 3, 4, 5 or 6 drain		
a major wetland, bog, marsh or swamp		
a constructed stormwater retention pond		

Plan d'eau	A	B
lac ou réservoir désigné à titre de plan d'eau sensible	30 m	35 m
lac ou réservoir (à l'exclusion d'un bassin d'orage ayant été construit) qui n'est pas désigné à titre de plan d'eau sensible	15 m	20 m
rivière, crique ou ruisseau désigné à titre de plan d'eau sensible		
rivière, crique ou ruisseau qui n'est pas désigné à titre de plan d'eau sensible	3 m	8 m
drain d'ordre 3, 4, 5 ou 6		
marécage ou marais important		
bassin d'orage ayant été construit		

Use Column A if the applicable area is covered with permanent vegetation. Otherwise, use Column B.

Utiliser la colonne A si la région visée est couverte d'une végétation permanente; sinon, utiliser la colonne B.

Vulnerable water bodies

3(4) For the purposes of the table in subsection (3), a water body is designated as vulnerable if it listed in the Schedule.

Plans d'eau sensibles

3(4) Pour l'application du tableau figurant au paragraphe (3), un plan d'eau est sensible s'il est mentionné à l'annexe.

Director may provide zoning information

4(1) The director may at any time inform an owner or occupier of land as to how the nutrient management zones apply to the land. The information is to be provided in writing, and may, with the consent of the owner or occupier, be provided electronically.

Renseignements concernant le zonage

4(1) Le directeur peut, en tout temps, informer le propriétaire ou l'occupant d'un bien-fonds de la zone de gestion des nutriments où se trouve ce bien-fonds. Les renseignements sont communiqués par écrit et peuvent l'être électroniquement avec le consentement du destinataire.

Director must provide zoning information

4(2) The director must provide the zoning information to an owner or occupier who requests it in writing and has not previously been given that information.

Obligation de fournir les renseignements

4(2) Le directeur est tenu de fournir les renseignements au sujet du zonage au propriétaire ou à l'occupant qui ne les a pas déjà reçus et qui les demande par écrit.

Owner or occupier may object to zoning

5(1) An owner or occupier who does not agree with the zoning of any area of land that he or she owns or occupies may,

- (a) within 90 days after receiving the zoning information from the director under section 4; or
- (b) in the case of a new owner or occupier,
 - (i) within 90 days after becoming the owner or occupier, or
 - (ii) within 90 days after receiving the zoning information from the director under section 4;

or within such additional time as the director allows, file a written objection with the director that

- (c) is in a form approved by the minister;
- (d) identifies the area which, in the opinion of the owner or occupier, is incorrectly zoned; and
- (e) is based on written scientific or technical information and includes that information.

Director to review zoning

5(2) After receiving an objection that meets the requirements of subsection (1), the director

- (a) must review the zoning of the area in dispute in light of the scientific or technical information provided with the objection;
- (b) may obtain expert advice to resolve any outstanding scientific or technical issues; and
- (c) as soon as reasonably practicable, must confirm or vary the application of the nutrient management zones to the area for which the zoning is in dispute, and notify the owner or occupier in writing of that decision.

Opposition du propriétaire ou de l'occupant

5(1) Le propriétaire ou l'occupant qui est en désaccord avec le zonage d'une partie d'un bien-fonds qu'il possède ou occupe peut, dans les 90 jours suivant la réception des renseignements provenant du directeur ou, dans le cas d'un nouveau propriétaire ou d'un nouvel occupant, dans les 90 jours suivant la date à laquelle il le devient ou suivant la réception des renseignements provenant du directeur ou encore dans tout délai supplémentaire qu'il lui accorde, déposer une opposition écrite auprès de lui. Cette opposition est présentée au moyen de la formule qu'approuve le ministre, indique la partie du bien-fonds qui, de l'avis son auteur, est mal zonée et est fondée sur des renseignements scientifiques ou techniques écrits et les comprend.

Examen du zonage

5(2) Après avoir reçu une opposition conforme au paragraphe (1), le directeur :

- a) examine le zonage de la partie faisant l'objet du litige en tenant compte des renseignements scientifiques ou techniques accompagnant l'opposition;
- b) peut obtenir une expertise afin de trancher les questions scientifiques ou techniques qui demeurent en litige;
- c) dès que possible, confirme ou modifie le zonage de la partie du bien-fonds faisant l'objet du litige et informe par écrit le propriétaire ou l'occupant de sa décision.

Limited application while zoning in dispute**5(3)** If

(a) a person who was lawfully carrying on an operation or activity in an area within a nutrient management zone files an objection under subsection (1) in respect of the zoning of that area;

(b) the carrying on of that operation or activity is prohibited or restricted under Part 3; and

(c) the prohibition or restriction would not apply to that area if it were in the zone in which the person reasonably believes it to be;

then until the director has made a decision under clause (2)(c) and notified the person of the decision, that area shall be treated for the purposes of Part 3 as being within the zone in which the person reasonably believes it to be.

PART 3

APPLICATION OF NUTRIENTS

Application**6(1)** This Part does not apply

(a) before 2011 to land in nutrient management zone N1, N2 or N3; or

(b) before 2009 to land in nutrient management zone N4 or the Nutrient Buffer Zone;

unless there has been a material change in use of that land after November 8, 2006. For this purpose, a change in use is not material unless it adversely affects water quality or increases the risk of adversely affecting it.

Limited application — s. 7 and 8(2)

6(2) Section 7 and subsection 8(2) do not apply to land to which livestock manure is being applied while the land is the subject of a manure management plan that

Application restreinte

5(3) Dans les cas indiqués ci-dessous, une partie de bien-fonds située dans une zone de gestion des nutriments et dans laquelle une personne exerçait légitimement des activités est réputée, pour l'application de la partie 3, faire partie de la zone où la personne considère, pour des motifs raisonnables, qu'elle se trouve, jusqu'à ce que le directeur ait pris une décision sous le régime de l'alinéa (2)c) et en ait donné avis :

a) la personne dépose une opposition en vertu du paragraphe (1) à l'égard du zonage de cette partie;

b) l'exercice de ces activités est interdit ou restreint sous le régime de la partie 3;

c) l'interdiction ou la restriction ne serait pas imposée à l'égard de cette partie si elle se trouvait dans cette zone.

PARTIE 3

ÉPANDAGE DE NUTRIANTS

Application

6(1) À moins qu'il n'y ait un changement important dans l'utilisation des biens-fonds après le 8 novembre 2006, la présente partie ne s'applique pas :

a) avant 2011, aux biens-fonds situés dans la zone de gestion des nutriments N1, N2 ou N3;

b) avant 2009, aux biens-fonds situés dans la zone de gestion des nutriments N4 ou dans la zone-tampon.

Sont considérés comme des changements importants ceux qui ont ou pourraient avoir une incidence négative sur la qualité de l'eau.

Application restreinte de l'article 7 et du paragraphe 8(2)

6(2) L'article 7 et le paragraphe 8(2) ne s'appliquent pas aux biens-fonds où des déjections du bétail sont épandues si ces biens-fonds sont visés par un plan de gestion des déjections :

(a) is registered under the *Livestock Manure and Mortalities Management Regulation*, Manitoba Regulation 42/98; and

(b) addresses all sources of nutrients that will be stored or handled on the land, or applied to it, including livestock manure, synthetic fertilizers, and municipal wastewater sludge and biosolids.

Nitrogen application limits for zones N1 to N3

7 No person shall apply a substance containing nitrogen to land within nutrient management zone N1, N2 or N3 except

(a) as a fertilizer;

and either

(b) in accordance with a registered plan; or

(c) in the absence of a registered plan, in a manner or at a rate of application that results in a residual concentration of nitrate nitrogen within the top 0.6 m (2 ft.) of soil at the end of the growing season, at any place within the application area, no greater than

(i) 157.1 kg/ha (140 lbs/acre), in the case of land in zone N1,

(ii) 101 kg/ha (90 lbs/acre), in the case of land in zone N2, or

(iii) 33.6 kg/ha (30 lbs/acre), in the case of land in zone N3.

Definitions

8(1) The following definitions apply in this section.

"**phosphorus removal rate**" means the rate at which, during a growing season, phosphorus, expressed as P₂O₅, is removed from an area through plant uptake of phosphorus from the soil and export of the resulting product from the area, taking into account the plants grown or to be grown in that area for that growing season. (« taux d'absorption du phosphore »)

"**ppm**" means parts per million. (« ppm »)

a) enregistré sous le régime du *Règlement sur la gestion des animaux morts et des déjections du bétail*, R.M. 42/98;

b) faisant état de toutes les sources de nutriments qui seront stockés ou manutentionnés sur le bien-fonds, ou qui y seront épandus, notamment les déjections du bétail, les engrais synthétiques ainsi que les boues et les biosolides d'épuration des municipalités.

Épandage d'azote dans les zones N1 à N3

7 Il est interdit d'épandre des substances contenant de l'azote dans les zones N1, N2 ou N3 si ce n'est :

a) à titre d'engrais;

b) conformément à un plan enregistré;

c) en l'absence d'un tel plan, selon un mode ou un taux d'épandage qui entraîne, à la fin de la période de croissance, une concentration résiduelle d'azote des nitrates, à une profondeur maximale de 0,6 m (2 pi) à n'importe quel endroit de la zone d'épandage, n'excédant pas :

(i) 157,1 kg/ha (140 lb/acre), dans la zone N1,

(ii) 101 kg/ha (90 lb/acre), dans la zone N2,

(iii) 33,6 kg/ha (30 lb/acre), dans la zone N3.

Définitions

8(1) Les définitions qui suivent s'appliquent au présent article.

« **niveau de phosphore mesuré à la suite d'une analyse du sol** » Concentration de phosphore dans le sol mesurée à une profondeur maximale de 0,15 m (6 po) au moyen de la méthode communément appelée « Olsen », faisant appel à une solution d'extraction de bicarbonate de soude et décrite dans le document intitulé *Recommended Chemical Soil Test Procedures for the North Central Region* (North Central Region Research Publication No. 221, Revised January 1998; University of Missouri-Columbia). ("soil test phosphorus level")

"soil test phosphorus level" means the concentration of phosphorus within the top 0.15 m (6 in.) of soil as determined using the sodium bicarbonate extractant soil test procedure for determining phosphorus levels as outlined in the *Recommended Chemical Soil Test Procedures for the North Central Region* (North Central Region Research Publication No. 221, Revised January 1998; University of Missouri-Columbia) and commonly known as the Olsen procedure. (« niveau de phosphore mesuré à la suite d'une analyse du sol »)

Phosphorus application limits for zones N1 to N3 8(2)

No person shall apply a substance containing phosphorus to land in nutrient management zone N1, N2 or N3 where the soil test phosphorus level for any place in the application area is 60 ppm or more, except

(a) as a fertilizer;

and either

(b) in accordance with a registered plan; or

(c) in the absence of a registered plan,

(i) at a rate of application that does not exceed

(A) two times the applicable phosphorus removal rate, if the soil test phosphorus levels are less than 120 ppm, or

(B) the applicable phosphorus removal rate, if the soil test phosphorus levels are 120 ppm or more but less than 180 ppm, or

(ii) as otherwise permitted by subsection 12.1(3) of the *Livestock Manure and Mortalities Management Regulation*, Manitoba Regulation 42/98.

« ppm » Parties par million. ("ppm")

« **taux d'absorption du phosphore** » La quantité de phosphore (exprimé sous la forme P_2O_5) qui, au cours d'une période de croissance, est retirée du sol à la suite de son absorption par les plantes et de l'enlèvement de celles-ci, compte tenu des plantes qui sont ou seront cultivées pendant cette période. ("phosphorus removal rate")

Limites applicables à l'épandage de phosphore dans les zones N1 à N3 8(2)

Dans la zone de gestion des nutriments N1, N2 ou N3, il est interdit d'épandre des substances contenant du phosphore si le niveau de phosphore mesuré à la suite d'une analyse du sol est de 60 ppm ou plus à n'importe quel endroit de la zone d'épandage, si ce n'est :

a) à titre d'engrais;

b) conformément à un plan enregistré;

c) en l'absence d'un tel plan :

(i) selon un taux d'épandage n'excédant pas :

(A) le double du taux applicable d'absorption du phosphore, si le niveau de phosphore mesuré à la suite d'une analyse du sol est inférieur à 120 ppm,

(B) le taux applicable d'absorption du phosphore, si le niveau de phosphore mesuré à la suite d'une analyse du sol est de 120 ppm ou plus mais de moins de 180 ppm,

(ii) conformément au paragraphe 12.1(3) du *Règlement sur la gestion des animaux morts et des déjections du bétail*, R.M. 42/98.

Additional restriction

8(3) If livestock manure has been applied to land at a rate as permitted by subsection 12.1(3) of the *Livestock Manure and Mortalities Management Regulation*, Manitoba Regulation 42/98, no person shall apply a substance containing phosphorus to that land before the next time that livestock manure may be applied to that land.

No nutrients to be applied in zone N4

9(1) Subject to subsection (2), no person shall apply a substance containing nitrogen or phosphorus to land within nutrient management zone N4.

Application to existing operations

9(2) If on November 8, 2006 a person was carrying on an operation or activity that involved applying substances containing nitrogen or phosphorus to land in nutrient management zone N4, the person may continue to apply them to that land in the course of carrying on that operation or activity after the day that this regulation comes into force, but only in accordance with a registered plan.

No nutrients to be applied in Nutrient Buffer Zone

10 No person shall apply a substance containing nitrogen or phosphorus to land within the Nutrient Buffer Zone.

Definitions

10.1(1) The following definitions apply in this section.

"**fertilizer**" means a substance or mixture of substances — not including compost or grass clippings generated on the property to which it is later applied — that is manufactured, sold, used or intended for use, in whole or in part, as a plant nutrient. (« engrais »)

"**ppm**" and "**soil test phosphorus level**" have the same meanings as in subsection 8(1). (« niveau de phosphore mesuré à la suite d'une analyse du sol » et « ppm »)

"**turf**" means non-agricultural land planted in closely mowed, managed grasses. (« gazon »)

M.R. 106/2008

Restriction supplémentaire

8(3) Si des déjections du bétail ont été épandues au taux que permet le paragraphe 12.1(3) du *Règlement sur la gestion des animaux morts et des déjections du bétail*, R.M. 42/98, il est interdit de procéder à l'épandage d'une substance contenant du phosphore avant que ne soit permis de nouveau l'épandage de déjections.

Interdiction d'épandre des nutriments dans la zone N4

9(1) Sous réserve du paragraphe (2), il est interdit d'épandre des substances contenant de l'azote ou du phosphore dans la zone de gestion des nutriments N4.

Activités existantes

9(2) Toute personne qui, le 8 novembre 2006, exerce des activités qui supposent l'épandage de substances contenant de l'azote ou du phosphore dans la zone de gestion des nutriments N4 peut continuer l'épandage dans l'exercice de ses activités, après l'entrée en vigueur du présent règlement, si elle se conforme à un plan enregistré.

Interdiction d'épandre des nutriments dans la zone-tampon

10 Il est interdit d'épandre des substances contenant de l'azote ou du phosphore dans la zone-tampon.

Définitions

10.1(1) Les définitions qui suivent s'appliquent au présent article.

« **engrais** » Substance ou mélange de substances fabriqué, vendu, utilisé ou destiné à être utilisé en tout ou en partie comme nutriment pour les végétaux. La présente définition exclut le compost et les tontes de gazon produits sur la propriété où ils seront ultérieurement épandus. ("fertilizer")

« **gazon** » Graminées bien tondues et faisant l'objet d'une gestion intensive qui sont semées sur des biens-fonds non agricoles. ("turf")

« **niveau de phosphore mesuré à la suite d'une analyse du sol** » et « **ppm** » S'entendent au sens du paragraphe 8(1). ("ppm" and "soil test phosphorus level")

R.M. 106/2008

Phosphorus restrictions for zone N5

10.1(2) No person shall apply a fertilizer containing more than 1% phosphorus by weight, expressed as P_2O_5 , to turf within nutrient management zone N5, except

(a) during the year in which the turf is first established, whether by seed or sod, and the following year; or

(b) if the soil test phosphorus level, as determined within the preceding 12 months by a laboratory acceptable to the director from samples collected by a sampling method acceptable to the director,

(i) is less than 60 ppm, on land used to grow grass for sale as sod,

(ii) is less than 30 ppm, on land used as a facility for a sport played on turf, including soccer pitches, football fields and ball parks,

(iii) is less than 18 ppm, on land not described in subclause (i) or (ii).

M.R. 106/2008

Exceptions

10.1(3) Subsection (2) does not apply to the application of fertilizer to land used as a golf course or a driving range.

M.R. 106/2008

Effective date

10.1(4) This section takes effect on January 1, 2009.

M.R. 106/2008

Restrictions applicables à l'épandage de phosphore dans la zone N5

10.1(2) Dans la zone de gestion des nutriments N5, il est interdit d'épandre sur le gazon de l'engrais contenant plus de 1 % de phosphore en poids, exprimé sous la forme P_2O_5 , sauf dans les cas suivants :

a) pendant la première année de l'établissement du gazon et pendant l'année suivante, qu'il s'agisse d'un gazon obtenu au moyen de semences ou de rectangles de gazon;

b) si le niveau de phosphore mesuré à la suite d'une analyse du sol :

(i) est inférieur à 60 ppm, sur un bien-fonds servant à la production de gazon qui sera vendu en rectangles,

(ii) est inférieur à 30 ppm, sur un bien-fonds servant à la pratique d'un sport, y compris les terrains de soccer et de football et les stades de baseball,

(iii) est inférieur à 18 ppm, sur un bien-fonds qui n'est pas visé au sous-alinéa (i) ou (ii).

Le niveau doit avoir été mesuré au cours des 12 mois précédents par un laboratoire et au moyen d'une méthode d'échantillonnage que le directeur juge acceptables.

R.M. 106/2008

Exceptions

10.1(3) Le paragraphe (2) ne s'applique pas à l'épandage d'engrais sur un bien-fonds utilisé à titre de terrain de golf ou d'exercice.

R.M. 106/2008

Prise d'effet

10.1(4) Le présent article prend effet le 1^{er} janvier 2009.

R.M. 106/2008

Escape or other release of nutrients to impervious surfaces in zone N5

10.2(1) No person shall discharge, release, apply or allow the escape of a substance containing nitrogen or phosphorus onto a paved or other impervious surface in nutrient management zone N5.

M.R. 106/2008

Responsibility to remove nutrient

10.2(2) A person who contravenes subsection (1) must immediately take all reasonable steps to remove the substance from the paved or other impervious surface so that it does not drain into a storm or sewage drainage system.

M.R. 106/2008

No discharge, release or application of nutrients to water

11 No person shall discharge, release or apply a substance containing nitrogen or phosphorus directly to a water body or into a groundwater feature, except as authorized by or under *The Environment Act*.

Limited application — section 12

12(1) This section does not apply in relation to the application of livestock manure to land.

Restriction on winter application of nutrients

12(2) Subject to subsection (3), no person shall apply a substance containing nitrogen or phosphorus to land in any nutrient management zone between

(a) November 10 of one year, or any later date specified by the director; and

(b) April 10 of the following year, or any earlier date specified by the director.

Exception — wastewater sludge and biosolids in unusual circumstances

12(3) A municipality may, with the director's approval, apply wastewater sludge or biosolids to land during the period referred to in subsection (2), but only as permitted by the director. The director may approve the application of either or both substances in an emergency or exceptional circumstances.

Interdiction de répandre des nutriments sur les surfaces étanches

10.2(1) Sur les surfaces étanches, notamment les surfaces pavées, se trouvant dans la zone de gestion des nutriments N5, il est interdit de répandre ou d'épandre des substances contenant de l'azote ou du phosphore ou d'en permettre le déversement.

R.M. 106/2008

Obligation d'enlever les nutriments

10.2(2) Toute personne qui contrevient au paragraphe (1) est tenue de prendre immédiatement les mesures nécessaires pour que les substances ne se déversent pas dans le réseau pluvial et les installations d'égout et de drainage.

R.M. 106/2008

Déversement de nutriments dans l'eau

11 Il est interdit de déverser ou de répandre des substances contenant de l'azote ou du phosphore directement dans un plan d'eau ou une caractéristique d'eaux souterraines, si ce n'est en conformité avec ce qui est autorisé sous le régime de la *Loi sur l'environnement*.

Application restreinte — article 12

12(1) Le présent article ne s'applique pas à l'épandage de déjections du bétail.

Épandage en hiver

12(2) Sous réserve du paragraphe (3), il est interdit dans toute zone de gestion des nutriments d'épandre des substances contenant de l'azote ou du phosphore entre le 10 novembre ou une date postérieure que précise le directeur et le 10 avril de l'année suivante ou une date antérieure qu'il précise.

Exception — boues et biosolides d'épuration

12(3) Conformément à l'approbation du directeur, une municipalité peut épandre des boues ou des biosolides d'épuration pendant la période visée au paragraphe (2). Le directeur n'accorde son approbation relativement à l'épandage de ces substances ou de l'une d'elles qu'en cas d'urgence ou de situation exceptionnelle.

Restriction — golf course or driving range

13(1) No person shall apply a substance containing nitrogen or phosphorus to land used as a golf course or driving range in any nutrient management zone except in accordance with a registered plan.

Application

13(2) Subsection (1) does not apply before 2009 to land in zone N5 where the land was being used for a golf course or driving range on November 8, 2006.

Terrains de golf ou d'exercice

13(1) Il est interdit d'épandre des substances contenant de l'azote ou du phosphore sur un bien-fonds utilisé à titre de terrain de golf ou d'exercice et se trouvant dans une zone de gestion des nutriments, sauf en conformité avec un plan enregistré.

Application

13(2) Le paragraphe (1) ne s'applique pas avant 2009 aux biens-fonds qui sont situés dans la zone N5 et qui sont utilisés à titre de terrains de golf ou d'exercice le 8 novembre 2006.

PART 4

ACTIVITIES IN ZONE N4,
ZONE N4 LAND CONVERTED TO ZONE N5,
AND THE NUTRIENT BUFFER ZONE

Prohibition re activities in certain zones

14(1) Subject to subsections (2) and (3), no person shall construct, install, site, locate, replace, expand or modify any of the following on land in nutrient management zone N4, land in nutrient management zone N5 that was in nutrient management zone N4 on the day this regulation came into force, or land in the Nutrient Buffer Zone:

- (a) a manure storage facility as defined in the *Livestock Manure and Mortalities Management Regulation*, Manitoba Regulation 42/98;
- (b) a confined livestock area as defined in the *Livestock Manure and Mortalities Management Regulation*, Manitoba Regulation 42/98;
- (c) a sewage treatment plant as defined in the *Classes of Development Regulation*, Manitoba Regulation 164/88;
- (d) a wastewater treatment lagoon as defined in the *Classes of Development Regulation*, Manitoba Regulation 164/88;

PARTIE 4

ACTIVITÉS DANS LA ZONE N4,
LA ZONE N4 DEVENUE LA ZONE N5
ET LA ZONE-TAMPON

Activités interdites

14(1) Sous réserve des paragraphes (2) et (3), il est interdit de construire, d'installer, de placer, de remplacer, d'agrandir ou de modifier les installations ou les ouvrages suivants sur des biens-fonds qui se trouvent dans la zone-tampon ou la zone de gestion des nutriments N4 ou qui se trouvent dans la zone N5 mais qui étaient dans la zone N4 au moment de l'entrée en vigueur du présent règlement :

- a) une installation de stockage des déjections au sens du *Règlement sur la gestion des animaux morts et des déjections du bétail*, R.M. 42/98;
- b) un espace clos au sens du *Règlement sur la gestion des animaux morts et des déjections du bétail*, R.M. 42/98;
- c) une usine d'épuration des eaux d'égout au sens du *Règlement sur les diverses catégories d'exploitations*, R.M. 164/88;
- d) un étang d'épuration de l'eau usée au sens du *Règlement sur les diverses catégories d'exploitations*, R.M. 164/88;

(e) an aerated wastewater treatment lagoon as defined in the *Classes of Development Regulation*, Manitoba Regulation 164/88;

(f) a pail or pit privy, or an onsite wastewater management system, as defined in the *Onsite Wastewater Management Systems Regulation*, Manitoba Regulation 83/2003, not including a composting toilet system or a holding tank.

M.R. 106/2008

Director may approve expansion or modification 14(2)

Upon the written application of a person wishing to expand or modify any thing listed in subsection (1), the director may, if satisfied that the expansion or modification will

- (a) improve water quality; or
- (b) decrease the risk of adversely affecting water quality;

approve the expansion or modification, subject to any terms and conditions consistent with the purpose of this regulation that the director considers necessary.

Director may approve construction, etc. 14(3)

Upon the written application of a person wishing to construct, install, site, locate or replace any thing listed in subsection (1), the director may approve the proposed activity, subject to any terms or conditions consistent with the purpose of this regulation that the director considers necessary, on being satisfied that

- (a) the applicant will suffer serious economic hardship unless the proposed activity is approved; and
- (b) the proposed activity will not
 - (i) present an unacceptable risk of significant harm to water or an aquatic ecosystem, or
 - (ii) place a drinking water source or public health at risk.

e) un étang aéré d'épuration de l'eau usée au sens du *Règlement sur les diverses catégories d'exploitations*, R.M. 164/88;

f) des toilettes extérieures, y compris celles à fosse mobile, ou un système de gestion autonome d'eaux résiduaires, au sens du *Règlement sur les systèmes de gestion autonomes d'eaux résiduaires*, R.M. 83/2003, à l'exclusion d'un cabinet à compost ou d'un réservoir de rétention.

R.M. 106/2008

Approbation d'un agrandissement ou d'une modification 14(2)

Le directeur peut approuver toute demande écrite visant l'agrandissement ou la modification d'un des ouvrages ou installations indiqués au paragraphe (1) s'il est convaincu que les travaux permettront une amélioration de la qualité de l'eau ou une réduction des risques de détérioration de la qualité de l'eau. L'approbation peut être assortie des conditions que le directeur juge nécessaires et qui sont conformes à l'objet du présent règlement.

Approbation du directeur 14(3)

Le directeur peut approuver, sous réserve des conditions qu'il juge nécessaires et qui sont conformes à l'objet du présent règlement, toute demande écrite visant la construction, la mise en place ou le remplacement d'une installation ou d'un ouvrage indiqué au paragraphe (1) s'il est convaincu :

- a) que l'auteur de la demande subira un préjudice économique grave s'il refuse d'accorder son approbation;
- b) que les travaux, selon le cas :
 - (i) n'entraîneront pas un risque grave et inacceptable pour les eaux ou pour un écosystème aquatique,
 - (ii) ne constitueront pas un danger pour une source d'eau potable ou pour la santé publique.

Regional sustainability assessment

15 If in the director's opinion a region has a net import of nutrients such that water quality may be at risk, the director may carry out an assessment of the region to determine its sustainable nutrient balance, based on its cumulative nutrient inputs and nutrient exports. After such an assessment, the director may take action consistent with the purpose of this regulation, including one or more of the following:

Évaluation de la durabilité régionale

15 S'il est d'avis que l'apport net de nutriments dans une région est tel que la qualité de l'eau peut être compromise, le directeur peut procéder à une évaluation de cette région afin de déterminer ce qui constitue un équilibre durable des nutriments compte tenu de ceux qui y sont cumulativement ajoutés ou enlevés. Après l'évaluation, il peut prendre des mesures conformes à l'objet du présent règlement, y compris les suivantes :

Continues on page 17.

Suite à la page 17.

(a) give guidelines or other recommendations to municipalities and other persons involved in land use planning for the region;

(b) give guidelines or other recommendations to owners and occupiers of land in the region in relation to their use of nutrients;

(c) advise the minister to consider recommending, pursuant to subsection 5(1) of the Act, that this regulation or any other regulation made under that subsection be amended, or that a new a regulation under that subsection be made.

a) donner des lignes directrices ou formuler d'autres recommandations à l'intention des municipalités et d'autres personnes chargées de la planification de l'aménagement du territoire pour la région;

b) donner des lignes directrices ou formuler d'autres recommandations à l'intention des propriétaires et des occupants des biens-fonds de la région en ce qui a trait à l'utilisation de nutriants;

c) conseiller au ministre de recommander, conformément au paragraphe 5(1) de la *Loi*, la modification du présent règlement ou de tout autre règlement pris sous le régime de ce paragraphe ou la prise d'un nouveau règlement en application de ce même paragraphe.

PART 5

NUTRIENT MANAGEMENT PLANS

Submitting a nutrient management plan

16 An owner or occupier of land may submit a nutrient management plan for a growing season, or for a crop rotation cycle or plant production sequence longer than one growing season, to the director for registration. It must be submitted

(a) before February 10, if the plan provides for a fertilization program starting in the following spring; or

(b) before July 10, if the plan provides for a fertilization program starting in the following fall.

Submitting a plan after the deadline

17 Despite section 16, an owner or occupier may submit a nutrient management plan to the director not less than 14 days before starting land application of a nutrient not provided for in a registered plan,

(a) in 2008; or

(b) in any other year, if the owner or operator was reasonably unable to submit it before the deadline set out in section 16.

PARTIE 5

PLAN DE GESTION DES NUTRIANTS

Présentation d'un plan de gestion des nutriments

16 Le propriétaire ou l'occupant d'un bien-fonds peut présenter au directeur, en vue de son enregistrement, un plan de gestion des nutriments pour une période de croissance ou pour un cycle de rotation des récoltes ou une séquence de production de cultures d'une durée plus longue :

a) soit avant le 10 février, si le plan prévoit un programme de fertilisation commençant le printemps suivant;

b) soit avant le 10 juillet, si le plan prévoit un programme de fertilisation commençant l'automne suivant.

Présentation du plan après les dates limites

17 Malgré l'article 16, le propriétaire ou l'occupant peut, en 2008 ou au cours de toute autre année où il n'a pas été en mesure de le faire avant les dates limites visées à cet article, présenter un plan de gestion des nutriments au directeur au moins 14 jours avant le début de l'épandage de nutriments qui ne sont pas visés par un plan enregistré.

Order to submit a nutrient management plan

18 If the director reasonably believes that an owner or occupier of land is contravening this regulation, and there is no registered plan for the land on which the contravention is occurring, the director may issue a written order to the owner or occupier requiring that person to submit, by the date specified in the order, a nutrient management plan for the land to the director for registration.

Registration of a nutrient management plan

19(1) Subject to subsection (2), the director may register a nutrient management plan submitted under section 16 to 18 if it

- (a) is in a form satisfactory to the director;
- (b) is consistent with the purpose of this regulation and any guidelines respecting nutrient management published by the minister;
- (c) addresses all sources of nutrients that will be stored or handled on the land, or applied to it, including livestock manure, synthetic fertilizers, and municipal wastewater sludge and biosolids;
- (d) demonstrates that nitrogen and phosphorus are not being applied in excess of the reasonable nutritive needs of growing plants;
- (e) is signed by the owner or occupier of the land to which it applies; and
- (f) includes or is accompanied by the following information:
 - (i) the name and mailing address of the owner or occupier, and any other business name under which he or she is or will be operating under the plan,
 - (ii) the name of the person who prepared the plan, if other than the owner or occupier,

Ordre visant le dépôt d'un plan de gestion des nutriments

18 S'il a des motifs raisonnables de croire que le propriétaire ou l'occupant d'un bien-fonds, à l'égard duquel il n'existe aucun plan de gestion des nutriments dûment enregistré, contrevient au présent règlement, le directeur peut lui donner un ordre écrit lui enjoignant de déposer un tel plan en vue de son enregistrement. L'ordre précise la date limite de dépôt.

Enregistrement du plan

19(1) Sous réserve du paragraphe (2), le directeur peut enregistrer le plan qui satisfait aux conditions suivantes :

- a) il est présenté sous une forme qu'il juge satisfaisante;
- b) il est conforme à l'objet du présent règlement et aux lignes directrices sur la gestion des nutriments publiées, le cas échéant, par le ministre;
- c) il fait état de toutes les sources de nutriments qui seront stockés ou manutentionnés sur le bien-fonds, ou qui y seront épandus, notamment les déjections du bétail, les engrais synthétiques ainsi que les boues et les biosolides d'épuration des municipalités;
- d) il démontre que les quantités d'azote et de phosphore visent uniquement à suffire aux besoins nutritifs des plantes en croissance;
- e) il est signé par le propriétaire ou l'occupant des biens-fonds;
- f) il comprend les renseignements suivants ou est accompagné de ces renseignements :
 - (i) le nom et l'adresse postale du propriétaire ou de l'occupant ainsi que toute dénomination sous laquelle il exercera ses activités,
 - (ii) le nom de la personne qui l'a dressé, s'il ne s'agit pas du propriétaire ni de l'occupant,

(iii) the location (section, township and range; or municipal street address) of all lands subject to the plan,

(iv) the period to which the plan applies,

(v) any other information specified in the form approved by the director or any guidelines published by the minister respecting nutrient management plans.

(iii) l'emplacement des biens-fonds qu'il vise (section, township et rang ou adresse municipale),

(iv) la période qu'il vise,

(v) tout autre renseignement indiqué dans la formule que le directeur a approuvée ou dans les lignes directrices sur la gestion des nutriments que le ministre a publiées, le cas échéant.

Nutrient management plans for existing activities in zone N4

19(2) If a nutrient management plan submitted for registration deals with the application of substances containing nitrogen or phosphorus to land in the circumstances described in subsection 9(2), the director may register the plan, or the part of the plan dealing with that land, only if the director is satisfied that it

(a) meets the requirements of subsection (1); and

(b) will not, if implemented, adversely affect water quality or increase the risk of adversely affecting water quality;

and the director may register it subject to any terms and conditions that the director considers necessary and consistent with the purpose of this regulation.

Nutrient management plan of small livestock operator

19(3) A nutrient management plan submitted to the director by a small livestock operator is deemed to satisfy the requirements of subsection (1) if it

(a) meets the requirements that would apply to it under the *Livestock Manure and Mortalities Management Regulation*, Manitoba Regulation 42/98, if it were a manure management plan to be submitted under that regulation; and

Plan visant des activités existantes — zone N4

19(2) Si un plan de gestion des nutriments déposé en vue de son enregistrement traite de l'épandage de substances contenant de l'azote ou du phosphore dans les cas visés au paragraphe 9(2), le directeur ne peut l'enregistrer, en totalité ou en partie :

a) que s'il satisfait aux exigences du paragraphe (1);

b) que s'il n'aura aucune incidence négative ni n'accroîtra le risque d'incidence négative sur la qualité de l'eau après sa mise en œuvre.

De plus, le directeur peut assortir l'enregistrement des conditions qu'il juge nécessaires et qui sont conformes à l'objet du présent règlement.

Plan de gestion des nutriments d'un petit exploitant

19(3) Le plan de gestion des nutriments déposé par un petit exploitant de bétail auprès du directeur est réputé satisfaire aux exigences du paragraphe (1) :

a) s'il est conforme aux exigences qui s'y appliqueraient en vertu du *Règlement sur la gestion des animaux morts et des déjections du bétail*, R.M. 42/98, s'il était déposé sous le régime de ce texte;

(b) addresses all sources of nutrients that will be stored or handled on the land, or applied to it, including livestock manure, synthetic fertilizers, and municipal wastewater sludge and biosolids.

"Small livestock operator" defined

19(4) In subsection (3), "small livestock operator" means an operator of an agricultural operation who boards, keeps or raises livestock and has fewer than 300 animal units, as determined under the *Livestock Manure and Mortalities Management Regulation*, Manitoba Regulation 42/98.

Owner or occupier may object

20(1) An owner or occupier of land who does not agree with a director's refusal to register a nutrient management plan, or with any terms or conditions imposed on a registration under subsection 19(2), may, within 90 days after receiving notice of the refusal or of the terms or conditions or such additional time as the director allows, file a written objection with the director that

- (a) is in a form approved by the minister;
- (b) identifies the reasons why, in the opinion of the owner or occupier, the refusal is incorrect or the terms or conditions are inappropriate or unnecessary; and
- (c) is based on written scientific or technical information and includes that information.

Director to review decision

20(2) After receiving an objection that meets the requirements of subsection (1), the director

- (a) must review the refusal to register, or the terms or conditions, in light of the scientific or technical information provided with the objection;
- (b) may obtain expert advice to resolve any outstanding scientific or technical issues; and

b) s'il fait état de toutes les sources de nutriments qui seront stockés ou manutentionnés sur le bien-fonds, ou qui y seront épandus, notamment les déjections du bétail, les engrais synthétiques ainsi que les boues et les biosolides d'épuration des municipalités.

Sens de « petit exploitant de bétail »

19(4) Dans le paragraphe (3), « petit exploitant de bétail » s'entend de l'exploitant d'une exploitation agricole qui prend en pension, garde ou élève du bétail et compte moins de 300 unités animales, au sens du *Règlement sur la gestion des animaux morts et des déjections du bétail*, R.M. 42/98.

Opposition du propriétaire ou de l'occupant

20(1) Le propriétaire ou l'occupant qui est en désaccord avec le refus du directeur d'enregistrer le plan de gestion des nutriments ou avec les conditions imposées en vertu du paragraphe 19(2) peut, dans les 90 jours suivant la réception de l'avis de refus ou des conditions ou dans tout délai supplémentaire que le directeur lui accorde, déposer une opposition écrite auprès de lui. Cette opposition :

- a) est présentée au moyen de la formule qu'approuve le ministre;
- b) indique pourquoi, selon son auteur, le refus n'est pas fondé ou les conditions ne sont pas appropriées ou ne sont pas nécessaires;
- c) est fondée sur des renseignements scientifiques ou techniques écrits et les comprend.

Examen de la décision

20(2) Après avoir reçu une opposition conforme au paragraphe (1), le directeur :

- a) examine le refus d'enregistrement ou les conditions en tenant compte des renseignements scientifiques ou techniques accompagnant l'opposition;
- b) peut obtenir une expertise afin de trancher les questions scientifiques ou techniques qui demeurent en litige;

- (c) must, as soon as reasonably practicable,
- (i) confirm or reverse the refusal to register, or
 - (ii) confirm or vary the terms or conditions,
- and notify the owner or occupier in writing of that decision.

Amending a nutrient management plan

21 A registered plan may be amended by the director at any time upon receipt of a written application from the owner or occupier of the land to which it applies, containing or accompanied by the information required by the director.

Effect of change in owner or occupier

22 A registered plan is deemed not to be registered after a change in the owner or occupier to which it applies, unless the new owner or occupier has given the director a written notice that

- (a) sets out the name and mailing address of the new owner or occupier, and any other business name under which he or she is or will be operating under the plan;
- (b) confirms the new owner's or occupier's adoption of the registered plan; and
- (c) is signed by the new owner or occupier.

Nutrient management plan prepared for an owner or occupier

23 No person shall prepare a nutrient management plan for the benefit of an owner or occupier, whether for a fee or not, unless the person has successfully completed a nutrient management planning course acceptable to the director, or has training or experience that the director considers to be equivalent, and the person

- (a) is a member in good standing of the Manitoba Institute of Agrologists or is exempt from registration with the institute for the purposes of preparing nutrient management plans; or

c) dès que possible, confirme ou annule le refus d'enregistrement ou confirme ou modifie les conditions et informe par écrit le propriétaire ou l'occupant de sa décision.

Modification d'un plan

21 Le directeur peut en tout temps modifier un plan enregistré si le propriétaire ou l'occupant du bien-fonds visé lui présente une demande écrite en ce sens. La demande comprend les renseignements qu'exige le directeur ou est accompagnée de ceux-ci.

Nouveau propriétaire ou nouvel occupant

22 Un plan enregistré est réputé ne plus l'être à la suite du changement du propriétaire ou de l'occupant qu'il vise à moins que le nouveau propriétaire ou le nouvel occupant ne remette au directeur un avis écrit :

- a) indiquant son nom et son adresse postale ainsi que toute dénomination sous laquelle il exercera ses activités;
- b) confirmant qu'il adopte le plan enregistré;
- c) qui est dûment signé.

Plan de gestion des nutriments établi pour un propriétaire ou un occupant

23 Nul ne peut établir un plan de gestion des nutriments à l'intention d'un propriétaire ou d'un occupant, à titre onéreux ou non, à moins d'avoir terminé avec succès un cours de gestion des nutriments que le directeur juge acceptable ou de posséder une formation ou une expérience qu'il juge équivalente et de satisfaire à l'une des exigences suivantes :

- a) être membre en règle de l'Institut des agronomes du Manitoba ou ne pas avoir à y être inscrit en vue de l'établissement de plans de gestion des nutriments;

(b) holds the designation of certified crop adviser under the international certified crop adviser program of the American Society of Agronomy and

(i) is in compliance with the requirements of that program for maintaining his or her certification, and

(ii) carries on business as a crop adviser in Manitoba.

b) porter le titre d'expert-conseil agréé sur les cultures conféré dans le cadre du programme international d'agrément des experts-conseils sur les cultures de la « American Society of Agronomy » et :

(i) satisfaire aux exigences du programme pour demeurer agréé,

(ii) travailler à titre d'expert-conseil sur les cultures au Manitoba.

PART 6

TRANSITIONAL ORDERS RE EXISTING OPERATIONS

Who may apply for a transitional order

24(1) An owner or operator of a commercial or agricultural operation that

(a) was owned or operated by him or her on the day this regulation came into force; and

(b) is affected by subsection 9(1);

may apply to the director for an order under this section.

Content of application

24(2) The application must

(a) be in writing and in a form satisfactory to the director; and

(b) propose a transitional plan by which the applicant will, over a specified period, come into compliance with subsection 9(1).

PARTIE 6

ORDRES TRANSITOIRES CONCERNANT LES EXPLOITATIONS EXISTANTES

Demande d'ordre

24(1) Peut demander au directeur de donner un ordre sous le régime du présent article la personne qui était propriétaire ou exploitante d'une exploitation commerciale ou agricole à la date d'entrée en vigueur du présent règlement et qui est touchée par le paragraphe 9(1).

Contenu de la demande

24(2) La demande :

a) est présentée par écrit au moyen d'une formule que le directeur juge satisfaisante;

b) prévoit un plan transitoire qui permettra à son auteur, sur une période donnée, d'observer graduellement le paragraphe 9(1).

Transitional order

24(3) The director, on being satisfied that

- (a) the applicant will suffer serious economic hardship unless an order is issued; and
- (b) issuing an order will not result in activities that
 - (i) present or may present an unacceptable risk of significant harm to water or an aquatic ecosystem, or
 - (ii) place a drinking water source or public health at risk;

may make an order

- (c) specifying the transitional plan by which the applicant may, over a specified period, come into compliance with subsection 9(1); and
- (d) exempting the applicant from the application of subsection 9(1), for the specified period, subject to any terms or conditions consistent with the purpose of this regulation that the director considers necessary.

Notice of decision or order

24(4) Within 10 days after making the order, or deciding not to make an order, the director must give notice of the order or decision to the applicant.

Variation order

25(1) The director, on being satisfied that there has been a change in circumstances, may make a further order varying any provision, term or condition of an order made under section 24. The director may do so

- (a) on his or her own initiative; or
- (b) on receipt of a written application, in a form satisfactory to the director, by the owner or operator to whom the order was issued, describing the changed circumstances and any proposed change to the transitional plan.

Ordre du directeur

24(3) Le directeur peut donner un ordre faisant état du plan transitoire qui permettra à l'auteur de la demande, sur une période donnée, d'observer graduellement le paragraphe 9(1) et le soustrayant, pendant cette période, à l'application de cette disposition, sous réserve des conditions qu'il juge nécessaires et qui sont conformes à l'objet du présent règlement. Pour ce faire, il doit être convaincu :

- a) d'une part, que l'auteur de la demande subira un préjudice économique grave s'il refuse de le donner;
- b) d'autre part, qu'il n'entraînera pas d'activités qui, selon le cas :

- (i) constituent ou peuvent constituer un risque grave et inacceptable pour les eaux ou pour un écosystème aquatique,
- (ii) constituent un danger pour une source d'eau potable ou pour la santé publique.

Avis

24(4) Dans les 10 jours après qu'il a donné l'ordre ou décidé de ne pas le faire, le directeur communique un avis à cet effet à l'auteur de la demande.

Modification de l'ordre

25(1) S'il est convaincu que les circonstances ont changé, le directeur peut donner un nouvel ordre modifiant les dispositions ou les conditions de celui donné en vertu de l'article 24. Il peut agir ainsi :

- a) de son propre chef;
- b) à la suite d'une demande écrite, présentée au moyen d'une formule qu'il juge satisfaisante par le propriétaire ou l'exploitant concerné et indiquant en quoi les circonstances ont changé ainsi que les modifications envisagées au plan transitoire.

Notice of decision or variation

25(2) Within 10 days after making the variation order or deciding, in response to an application, not to vary the order made under section 24, the director must give notice of the order or decision to the owner or operator.

Avis

25(2) Dans les 10 jours après qu'il a donné le nouvel ordre ou décidé de ne pas le faire, le directeur communique un avis à cet effet au propriétaire ou à l'exploitant.

PART 7

APPEALS TO MINISTER

Appeals to minister

26(1) A decision or order under clause 5(2)(c) or 20(2)(c), or under section 24 or 25, or a provision, term or condition of such a decision or order, may be appealed by written notice to the minister by the owner, occupier or operator to whom it applies.

Notice of appeal

26(2) The notice of appeal must

- (a) set out the facts and reasons for the appeal in a form satisfactory to the minister; and
- (b) be filed with the minister within 60 days after the owner, occupier or operator received notice of the decision or order being appealed, or within such further time as the minister allows.

Stay of decision or order

26(3) An appeal under this section stays the decision or order pending the outcome of the appeal, unless the minister orders that it not be stayed.

Minister's power on appeal

26(4) As soon as is reasonably practicable after receiving a notice of appeal, the minister must, subject to subsection (5), consider the appeal and

- (a) confirm, vary or rescind the decision or order being appealed;
- (b) make any decision or order that the director could have made;

PARTIE 7

APPEL

Appel

26(1) Le propriétaire, l'occupant ou l'exploitant peut interjeter appel par avis écrit adressé au ministre de la décision prise ou de l'ordre donné en vertu de l'alinéa 5(2)c) ou 20(2)c) ou de l'article 24 ou 25 ou d'une des dispositions ou conditions de cette décision ou de cet ordre.

Avis d'appel

26(2) L'avis d'appel :

- a) énonce les faits et les motifs de l'appel au moyen d'une formule que le ministre juge satisfaisante;
- b) est déposé auprès du ministre dans les 60 jours suivant la réception de l'avis par le propriétaire, l'occupant ou l'exploitant ou dans le délai supplémentaire qu'accorde le ministre.

Suspension de l'exécution

26(3) Sauf ordre contraire du ministre, l'appel d'une décision ou d'un ordre interjeté sous le régime du présent article a pour effet d'en suspendre l'exécution.

Pouvoirs du ministre dans le cadre de l'appel

26(4) Sous réserve du paragraphe (5), dès que possible après avoir reçu l'avis d'appel, le ministre examine l'appel et, selon le cas :

- a) confirme, modifie ou annule la décision ou l'ordre porté en appel;
- b) prend toute décision qui aurait pu être prise par le directeur ou donne tout ordre qui aurait pu être donné par lui;

(c) refer the matter back to the director for reconsideration in accordance with directions given by the minister; or

(d) refer the matter to the water council, for a report of its findings and recommendations, before making a decision or order under clause (a), (b) or (c).

Expert panel may provide scientific or technical advice

26(5) If the subject of the appeal is a decision made under clause 5(2)(c) or 20(2)(c) that relates to a scientific or technical issue, the minister may refer the matter to a panel comprised of persons who, in the minister's opinion, have expertise in the issue under appeal, for advice before the minister takes action under subsection (4).

Notice of decision or order

26(6) Within 10 days after making a decision or order under subsection (4), the minister must give notice of it to the appellant.

c) renvoie l'affaire au directeur afin que celui-ci la réexamine conformément à ses directives;

d) avant de prendre une décision ou de donner un ordre en vertu de l'alinéa a), b) ou c), renvoie l'affaire au Conseil des eaux afin que celui-ci lui fasse part de ses conclusions et de ses recommandations.

Questions scientifiques ou techniques

26(5) Si l'appel porte sur une décision rendue sous le régime de l'alinéa 5(2)c) ou 20(2)c) et ayant trait à une question scientifique ou technique, le ministre peut renvoyer l'affaire à un comité composé de personnes qui, selon lui, possèdent l'expertise voulue à l'égard de la question afin d'obtenir son avis avant de prendre les mesures prévues au paragraphe (4).

Avis

26(6) Au plus tard 10 jours après avoir pris une décision ou donné un ordre en vertu du paragraphe (4), le ministre en avise l'appellant.

SCHEDULE
(Subsection 3(4))

ANNEXE
[Paragraphe 3(4)]

VULNERABLE WATER BODIES

PLANS D'EAU SENSIBLES

Vulnerable water bodies

1 The following water bodies are designated as vulnerable water bodies:

Rivers, Creeks and Streams

Assiniboine River

Berens River

Birch River (located at approximate
lat. 49°49'21" N, long. 95°52'33" W)

Boyne River

Burntwood River

Churchill River

La Salle River

Lee River

Manigotogan River

Nelson River

Pikewitonei River

Pinawa Channel

Red River

Saskatchewan River

Squirrel Creek

Valley River

Waterhen River

Winnipeg River

Plans d'eau sensibles

1 Sont des plans d'eau sensibles les plans
d'eau suivants :

Rivières, criques et ruisseaux

rivière Assiniboine

rivière Berens

rivière Birch (emplacement approximatif :
49° 49' 21" de latitude N. et 95° 52' 33" de
longitude O.)

rivière Boyne

rivière Burntwood

rivière Churchill

rivière La Salle

rivière Lee

rivière Manigotogan

rivière Nelson

rivière Pikewitonei

chenal Pinawa

rivière Rouge

rivière Saskatchewan

crique Squirrel

rivière Valley

rivière Waterhen

rivière Winnipeg

Lakes and Reservoirs

Boissevain Reservoir
 Bowden Lake
 Brereton Lake
 Caddy Lake
 Cliff Lake (located at approximate
 lat. 54°48'41" N, long. 101°50'45" W)
 Cross Lake (located at approximate
 lat. 54°44'55" N, long. 97°30'08" W)
 Deloraine Reservoir
 Footprint Lake
 Gods Lake (located at approximate
 lat. 54°40'26" N, long. 94°14'48" W)
 Goudney Reservoir
 Granville Lake
 Hunt Lake
 Island Lake (located at approximate
 lat. 53°47'02" N, long. 94°25'00" W)
 Killarney Lake
 Kississing Lake
 Lac du Bonnet
 Lake Athapapuskow
 Lake Irwin
 Lake Manitoba
 Lake Minnewasta
 Lake Wahtopanah
 Lake Winnipeg
 Lake Winnipegosis

Bill 46

THE SAVE LAKE WINNIPEG ACT

[Explanatory Note](#)

(Assented to _____)

WHEREAS the Government of Manitoba is committed to protecting all waters in Manitoba;

AND WHEREAS, despite significant progress, Lake Winnipeg and its watershed continue to receive excessive amounts of phosphorus and nitrogen that result in algae blooms of increasing intensity and frequency;

AND WHEREAS recent studies demonstrate that without significant reductions of nutrients and, in particular, phosphorus, Lake Winnipeg's ecological health will continue to decline, making restoration efforts increasingly more difficult or impossible;

AND WHEREAS nutrients come into Lake Winnipeg from many urban and rural sources including flooded lands, excess fertilizers, livestock manure, loss of wetlands, substandard septic systems, inadequately treated municipal sewage, and many others;

AND WHEREAS because of the ecological significance of Lake Winnipeg further environmental protection measures need to be taken to protect and restore Lake Winnipeg to an ecologically healthy condition;

AND WHEREAS the Government of Manitoba must continue to demonstrate leadership, setting high standards for those activities contributing nutrients from sources within Manitoba and securing, through cooperation and agreement, similar high standards for nutrients coming from Manitoba's upstream neighbours;

THEREFORE HER MAJESTY, by and with the advice and consent of the Legislative Assembly of Manitoba, enacts as follows:

PART 1

THE CROWN LANDS ACT

C.C.S.M. c. C340 amended

1 *The Crown Lands Act is amended by this Part.*

2 *The following is added after section 7.1:*

WETLANDS

Wetlands

7.1.1(1) On the recommendation of the minister and the minister responsible for *The Water Protection Act*, the Lieutenant Governor in Council may make regulations

- (a) designating any area of Crown land as a provincially significant wetland;
- (b) governing, regulating or prohibiting any use, activity or thing in a designated wetland or in any part of a designated wetland.

Considerations

7.1.1(2) In deciding whether to recommend a regulation that designates Crown land as a provincially significant wetland, the ministers must consider

- (a) whether the wetland is a coastal marsh directly linked to a large Manitoba lake;
- (b) whether the wetland is valuable for the purposes of flood control, drought control, protection of a drinking water source, the recharge or discharge of groundwater or water quality protection;
- (c) whether the wetland contains or could contain significant wetland ecosystems or biodiversity, including habitat for species declared endangered, threatened or extirpated under *The Endangered Species Act*;
- (d) any other matter the ministers consider appropriate.

Limit

7.1.1(3) A regulation made under subsection (1)

- (a) is not to be interpreted so as to abrogate or derogate from the aboriginal and treaty rights of the aboriginal peoples of Canada that are recognized and affirmed by section 35 of the *Constitution Act, 1982*;
- (b) does not affect the powers and duties of the minister responsible for the administration of *The Water Rights Act*; and
- (c) does not affect the rights of a lessee under a lease of Crown lands.

PART 2

THE ENVIRONMENT ACT

C.C.S.M. c. E125 amended

3 *The Environment Act is amended by this Part.*

4 *Subsection 40.1(1) is replaced with the following:*

Prohibition — confined livestock areas and manure storage facilities for pigs

40.1(1) Except as authorized by a permit issued under this section, no person shall construct, expand or modify a confined livestock area for pigs or a pig manure storage facility on land that is within

- (a) an area listed in the Schedule; or
- (b) any other area of Manitoba.

5 *The following is added after section 40.1:*

Prohibition – winter spreading

40.2(1) No person shall apply livestock manure to land between November 10 of one year and April 10 of the following year.

Exception – fewer than 300 units

40.2(2) Until November 10, 2013, subsection (1) does not apply to the operator of, or a person employed in, an agricultural operation with fewer than 300 animal units if the operation was in existence on March 30, 2004, and had fewer than 300 animal units on that date.

Regulations

40.2(3) Subsections (1) and (2) are subject to the regulations.

Definitions

40.2(4) In this section, "**agricultural operation**", "**animal unit**", "**livestock**" and "**manure**" have the meanings prescribed in the regulations.

Prohibition – disposal fields in capital region

40.3(1) No person shall construct, install, site, locate, replace, expand or modify a disposal field on any parcel of land resulting from a subdivision of land approved after this section comes into force, if

(a) the parcel of land is within the City of Winnipeg and is less than 0.8 ha (2 acres); or

(b) the parcel of land is within a municipality named in clauses 3(1)(a) to (o) of *The Capital Region Partnership Act*, and is either

(i) within the Red River corridor, or

(ii) outside the Red River corridor and less than 0.8 ha (2 acres).

Exception – existing disposal fields

40.3(2) Subsection (1) does not apply to the replacement, expansion or modification, as permitted under the regulations, of a disposal field that existed before the subdivision was approved.

Definition of "Red River corridor"

40.3(3) In this section, "**Red River corridor**" means the Red River Corridor Designated Area as described in Plan No. 8303-2009, which is filed at the head office of Environmental Services of the Department of Conservation in Winnipeg.

PART 3

THE MINES AND MINERALS ACT

C.C.S.M. c. M162 amended

6 *The Mines and Minerals Act is amended by this Part.*

7 *Subsection 14(7) is amended by striking out "The director" and substituting "Subject to section 128.1, the director".*

8 *The following is added after section 128:*

Moratorium on permits or leases for peat and peat moss

128.1(1) For two years after this section comes into force, and for any longer period prescribed by regulation,

- (a) no quarry permit for peat or peat moss may be issued under subsection 14(7) or 133(2);
- (b) no quarry lease for peat or peat moss may be granted under subsection 139(2); and
- (c) no application to enlarge the area covered by an existing quarry lease for peat or peat moss may be approved under subsection 139(2.1).

Moratorium applies to pending applications

128.1(2) Subsection (1) applies despite any other provision of this Act and even if an application respecting a quarry permit or quarry lease was made before this section comes into force.

Regulations

128.1(3) The Lieutenant Governor in Council may make regulations

- (a) prescribing a period for the purpose of subsection (1);
- (b) respecting the administration of applications that were made in respect of quarry permits or quarry leases before this section comes into force and for which a permit, lease or approval has not been granted.

9 *Subsection 133(2) is amended by adding "section 128.1 and" before "Part 9".*

10(1) *Subsection 139(2.1) is amended by adding ", subject to section 128.1," after "the minister may".*

10(2) *Subsection 139(3) is amended by adding the following at the end: "For the period of the moratorium under section 128.1, a conversion may not be granted in respect of a permit for peat or peat moss."*

PART 4**THE PLANNING ACT**

C.C.S.M. c. P80 amended

11 *The Planning Act is amended by this Part.*

12 *The following is added after subsection 1(2):*

Interpretation – "capital region"

1(3) For the purposes of this Act, a municipality is considered to be in the capital region only if it is listed in clauses 3(1)(a) to (o) of *The Capital Region Partnership Act*.

13 *The following is added after subsection 51(1):*

When drinking water and wastewater plans required

51(1.1) Before approving a development plan by-law submitted by a board or council that is subject to section 62.2 (drinking water and wastewater management plans), the minister must be satisfied that

- (a) the existing municipal drinking water and wastewater services have sufficient capacity to accommodate any projected development set out in the development plan; or
- (b) if capacity is insufficient, the board or council, in preparing the development plan and the drinking water and wastewater management plans, has identified
 - (i) the infrastructure investments necessary to accommodate the projected development, and
 - (ii) how those infrastructure investments will be made in a sustainable and financially viable manner.

14 *The following is added after section 62.1 and before Division 2:*

WATER AND WASTEWATER INFRASTRUCTURE

Drinking water and wastewater management plans

62.2(1) When preparing a development plan or amending or re-enacting a development plan by-law, the following bodies must also prepare drinking water and wastewater management plans and submit them to the minister:

- (a) the board of a planning district that includes, within its boundaries, a municipality in the capital region;
- (b) the council of a municipality in the capital region, if the municipality is not a member of a planning district;
- (c) a board or council that is required to do so by the minister under subsection (2).

Minister's order for plans to be prepared

62.2(2) The minister may, if in his or her opinion the circumstances warrant, require the council of a municipality that is outside the capital region, or the board of a planning district that includes such a municipality within its boundaries, to prepare drinking water and wastewater management plans and submit them to the minister.

Content

62.2(3) The drinking water and wastewater management plans must

- (a) provide the analysis undertaken to confirm if the existing drinking water and wastewater services have sufficient capacity to accommodate any projected development set out in the development plan; and
- (b) set out the ways in which the planning district or municipality will ensure that, in the provision of drinking water and wastewater services,
 - (i) health and safety will be protected,
 - (ii) the environment will be protected,
 - (iii) the capacity and sustainability of the sources of water on which the services rely will not be exceeded, and
 - (iv) water conservation and water use efficiency will be promoted.

PART 5

THE WATER PROTECTION ACT

C.C.S.M. c. W65 amended

15 **The Water Protection Act** is amended by this Part.

16 The following is added after section 4:

NORTH END WATER POLLUTION CONTROL CENTRE

Definitions

4.1 The following definitions apply in this section and in sections 4.2 to 4.4.

"30-day rolling average" means the arithmetic average of any daily reported data plus the preceding 29 consecutive days of reported data. (« moyenne mobile de 30 jours »)

"environmental licence" means the licence issued under *The Environment Act* to the City of Winnipeg for the alteration and operation of the North End Water Pollution Control Centre, identified as licence number 2684 RRR, and includes any further revised version of that licence or a substituted licence. (« licence environnementale »)

"minister" means the minister responsible for the administration of *The Environment Act*. (« ministre »)

"North End Water Pollution Control Centre" means the City of Winnipeg's wastewater treatment plant located at 2230 Main Street, in the City of Winnipeg, that is commonly referred to as the North End Water Pollution Control Centre. (« usine de traitement »)

City of Winnipeg to replace or modify North End Water Pollution Control Centre

4.2(1) The City of Winnipeg must, by December 31, 2014 — or by any later date specified by regulation or in the environmental licence — replace the North End Water Pollution Control Centre, or make modifications to it, so as to ensure that on and after that date the requirements of subsection (2) are met.

Wastewater treatment requirements

4.2(2) The requirements referred to in subsection (1) are as follows:

1. Wastewater effluent discharged from the North End Water Pollution Control Centre must meet the following:

(a) total phosphorous concentrations must not exceed 1.0 mg/L, as determined by the 30-day rolling average;

(b) total ammonia must not exceed the limits set out in the following table, or any more stringent limits that are specified by regulation:

Month	Ammonia Nitrogen (as N) (kg/any 24-hour period)
January	7580
February	8675
March	13057
April	29021

May	13331
June	7312
July	4507
August	2262
September	2663
October	3415
November	4035
December	5774

(c) any other substance must not exceed the limits specified by regulation for that substance.

2. Nutrient removal must be achieved primarily by biological methods through application of the best available technologies.
3. The use of chemical methods to remove nutrients must be minimized.
4. If the North End Water Pollution Control Centre is not able to fully remove nitrogen by the date required by subsection (1), it must be capable of being modified to do so with minimal additional costs.
5. Nutrients that are removed must be recovered and recycled to the maximum extent possible through application of the best available technologies.
6. Bio-solids and wastewater sludge remaining after the treatment process must be reused.

The requirements in items 2 to 6 must be met to the director's satisfaction.

City to submit plan to minister

4.2(3) Within one year after the day this section comes into force, the City of Winnipeg must submit to the minister, for his or her consideration and approval, a plan that details how the City will comply with subsections (1) and (2).

Licence amended to give effect to statutory requirements

4.2(4) The environmental licence is deemed to be amended to the extent necessary to give effect to subsections (1) to (3) as conditions of the licence. A director appointed under *The Environment Act* may revise the environmental licence accordingly.

Plan to be referred to the Clean Environment Commission

4.3(1) Upon receiving the plan referred to in subsection 4.2(3) from the City of Winnipeg, the minister must refer it, under clause 6(5)(a) of *The Environment Act*, to the Clean Environment Commission for its advice and recommendations.

Approval of plan

4.3(2) After receiving advice and recommendations from the Clean Environment Commission, the minister may

- (a) approve the plan as submitted by the City of Winnipeg; or
- (b) refer the plan back to the City of Winnipeg to be revised in accordance with any directions that the minister considers appropriate.

Action if plan is referred back

4.3(3) If the plan is referred back to the City of Winnipeg, the City must revise it in accordance with the minister's directions. When it is resubmitted, the minister may approve it or refer it back to the City for further revisions until it meets with the minister's approval.

City must implement and comply with plan

4.3(4) The City of Winnipeg must implement and comply with the plan as approved by the minister.

Estimates of capital costs and operating expenses to accompany plan

4.4(1) The plan submitted under subsection 4.2(3) must be accompanied by a report that details the following:

- (a) the estimated capital costs of replacing or modifying the North End Water Pollution Control Centre;
- (b) the estimated annual operating expenses of a replaced or modified North End Water Pollution Control Centre;
- (c) the anticipated effects of those capital costs and annual operating expenses on water and wastewater rates set by the City of Winnipeg.

Report may be referred to Public Utilities Board

4.4(2) Upon receiving the report referred to in subsection (1), the minister may refer it to the Public Utilities Board for an evaluation. In making the referral, the minister may set terms of reference and give directions.

Report to minister and City of Winnipeg

4.4(3) The Public Utilities Board must report its findings to the minister and the City of Winnipeg within the time specified by the minister.

Powers of Public Utilities Board

4.4(4) Part I of *The Public Utilities Board Act* applies to the Public Utilities Board when carrying out its responsibility under this section as if that responsibility were assigned to the Board under that Part, except as otherwise specified by regulation under subsection (5).

Regulations

4.4(5) The minister may make any regulations the minister considers necessary or advisable to carry out the purposes of this section.

17 *The following is added after the centred heading following section 35:*

Agreements

35.1 With the approval of the Lieutenant Governor in Council, the minister may enter into an agreement with the government of Canada or the government of any other province, territory, country or state, or an agency of any of them, or with the council of a band as defined in the *Indian Act* (Canada), or any other person, for the purpose of protecting Manitoba's water resources or aquatic ecosystems.

18 *The following is added after clause 39(1)(b):*

- (b.1) specifying a later date for the purpose of subsection 4.2(1);
- (b.2) for the purpose of item 1(b) of subsection 4.2(2), specifying total ammonia limits;

(b.3) for the purpose of item 1(c) of subsection 4.2(2), specifying limits for other substances in wastewater effluent;

PART 6

COMING INTO FORCE

Coming into force

19 *This Act comes into force on the day it receives royal assent.*

Explanatory Note

This Bill amends the following Acts to reduce the excessive amounts of phosphorus and other nutrients coming into Lake Winnipeg that affect the ecological health of the lake.

PART 1 — *The Crown Lands Act*

Cabinet may make regulations to designate Crown lands as provincially significant wetlands and may regulate uses and activities in designated wetlands.

PART 2 — *The Environment Act*

The existing ban on the construction and expansion of confined livestock areas for pigs and pig manure storage facilities is extended to all of Manitoba. The prohibition on winter spreading of livestock manure is continued.

When land is subdivided within the capital region, septic (disposal) fields are prohibited if the land is in the Red River corridor or if the subdivision will result in parcels smaller than two acres. But a septic field in existence when the subdivision occurred may be replaced, expanded or modified, as permitted by the regulations.

PART 3 — *The Mines and Minerals Act*

A two-year moratorium is placed on new quarry licences and quarry permits for peat and peat moss. The moratorium may be extended by regulation.

PART 4 — *The Planning Act*

Planning authorities within the capital region that are subject to *The Planning Act* must prepare drinking water and wastewater management plans. These plans are to confirm if projected development can be serviced by existing drinking water and wastewater services, and the measures that will be taken to ensure that those services are provided in an appropriate and responsible manner.

The minister may also require a planning district or municipality outside the capital region to prepare drinking water and wastewater management plans.

PART 5 — *The Water Protection Act*

The City of Winnipeg is required to replace or modify the North End Water Pollution Control Centre by December 31, 2014, to meet specified phosphorous and other limits on effluent discharged from the centre. The City must also ensure that its nutrient removal and recycling methods at the centre comply with specified requirements.

The City of Winnipeg must submit a plan to government on how it intends to meet the new requirements, which is to be referred to the Clean Environment Commission. The Public Utilities Board may be asked to evaluate the estimated capital and operating costs of the new or modified centre, as well as any anticipated effects on water and wastewater rates.

CONSOLIDATION UPDATE: DECEMBER 15, 2010

THE CITY OF WINNIPEG

WATER WORKS BY-LAW
NO. 504/73

A By-law of THE CITY OF WINNIPEG to revise and consolidate certain By-laws relating to the Water Works Utility, the Fixing of Water Rates and the Billing and Collection thereof.

THE CITY OF WINNIPEG, in Council assembled, enacts as follows:

SHORT TITLE

1. This By-law may be cited as the "**Water Works By-law.**"

DEFINITIONS

2. Where used herein *amended 6595/95*

"**application**" means a contract, expressed or implied, for any of the customary services provided or supplied by, or in connection with the Water Works Utility.

"**approved**" means approved by the Designated Officer.

"**customary service(s)**" means any work or service provided or supplied by the Water Works Utility in the performance of its normal function of a publicly owned and operated water utility.

"**customer**" means a property owner, tenant, occupant or person in charge or control of a premises, accepting or using any of the customary services provided or supplied by, or in connection with the Water Works Utility.

"**deposit**" means the payment in advance of a work or service to be rendered by the Water Works Utility. As applied to the supply of water, "**deposit**" means the payment required to cover the accrued expense incurred by the Water Works Utility to give service for a quarterly period.

"**designated officer**" means the Director of Water and Waste or such other person as may be authorized in writing by said Director of Water and Waste to exercise some or all of the powers vested in him by this By-law.

amended 139/2010

"**Director**" means the Director of Water and Waste for the City of Winnipeg or designate.

added 139/2010

"**multiple metering**" means more than one water meter installed by the Water Works Utility on a single water service to a premises.

"**person**" includes a firm, partnership or corporation.

"**premises**" means property (land or real estate) conveyed by a deed. Where the context so requires, "**premises**" means the building(s) thereon, or a subdivision thereof.

"**quarter**" or "**quarterly**" as a measure of time may mean three calendar months, or a period of time between two meter reading dates, and may commence on any day of any month.

"**service**" includes not only the supply of water from the City's Water Works Utility but also any hydrant, fire service (sprinkler), stand-by or any other of the customary services provided or supplied by or in connection with the Water Works Utility. Where the context so requires, "**service**" means a water service pipe.

"**utility**" means any system, works, plant, pipe line, equipment, or service as further defined in Section 544 of *The City of Winnipeg Act*.

"**water works system**" means the Water Works Utility.

"**Water Works Utility**" means the Water Works Utility owned and operated by the City consisting of the Operating Division and Water Works and Waste Disposal Division and the Water Works Office shall be the office of the Director of the Water Works and Waste Disposal Division.

DEPOSITS

3. The Water Works Utility may charge a deposit for any of its customary services. No interest shall accrue or be paid on such deposit.

DEPOSIT RATES

(a) For the Supply of Water

The deposit to be charged for a premises may be based on:

- (i) An estimation of the water to be consumed quarterly, or other period at the said premises.
amended 669/74
- (ii) Or from any other information or source available.
amended 669/74

Notwithstanding, the Designated Officer may vary a deposit and from time to time review and revise deposits.

(b) For Work to be Done, or Service to be Provided or Supplied by the Water Works Utility

In all cases where a person is required by this By-law to pay in advance any cost or charge in connection with any work to be done or service provided or supplied by, or in connection with the Water Works Utility, such person, before the work is commenced or the service provided or supplied, shall deposit with the Designated Officer such estimated cost or charge.

APPLICATIONS FOR WATER SERVICE TURN ON

4. A person requiring water service from the Water Works Utility shall make application to the Designated Officer. The Designated Officer may require any request for water service to be made on the basis of the signature of the applicant.

CLASSES OF WATER SERVICES (FOR WATER APPLICATION PURPOSES) AND RESPONSIBILITY FOR APPLICATIONS

- 5. (a) Single unit family dwellings and single unit commercial premises.
- (b) Other than single unit family dwellings and single unit commercial premises having one water service connection and individual water meters.
- (c) Other than single unit family dwellings and single unit commercial premises having one water service connection and one water meter.

In (a) and (b), the owner, tenant, occupant or person in charge or control of the property shall make application for water service. In (c), the owner of the premises shall make application for the water service.

CANCELLATION OF WATER SERVICE CONTRACT

6. The customer shall notify the Designated Officer immediately the water service is no longer required at a premises, and the Water Works Utility shall turn off the supply of water to the said premises as provided for in this By-law unless a prior application for water service is received.

DISPOSITION OF DEPOSIT

7. Upon termination of the water service contract the customer shall be rendered a finalized account showing the disposition of the deposit where applicable.

TRANSFER OF DEPOSIT AND INDEBTEDNESS

8. In cases where a customer has terminated the water service contract at a premises and is reapplying for water service at a different premises within the City, the deposit shall be transferred. Any indebtedness shall also be transferred and shall be subject to the same penalty for non-payment as though there had been no change in premises.

CLASSES OF WATER RATES

9. The classes of water rates are as shown in the attached Schedule A.

FEES AND LICENSES DEFINED

10. The Fees and Licenses are as shown in the attached Schedule B.

INSTALLATION OF WATER METERS

11. Each water service connection supplying a premises shall be metered, except fire service (sprinkler), and normally only one water meter will be supplied for each such water service connection. In certain circumstances the Designated Officer may authorize multiple metering of a water service connection supplying a premises which has been subdivided, and in such cases more than one meter will be supplied.

CONSUMPTION OF WATER AS SHOWN BY METER READINGS

12. *repealed 86/2009*

ESTIMATING CONSUMPTIONS

13. Where a meter is found not in use or out of proper working order or the scheduled reading is not obtained, or where no meter is installed, the Designated Officer shall estimate the consumption of water used for any quarter or other period based on the amount of water consumed during the time the meter was working or from any other information or source available, and such estimate shall be the basis for billing the customer for water used.

DAILY BASIC SERVICE CHARGES – CITY-OWNED METERS

14. (a) Subject to this section, a daily basic service charge set out in Schedule A of this By-law, based on the size of the meter monitoring the property, is payable by the owner of property which is connected to both the water service and wastewater service and which is monitored by a City-owned meter.
- (b) A percentage of the daily basic service charge referred to in clause (a), determined by the Director, is payable by the owner of property which is connected to only the water service and which is monitored by a City-owned meter.
- (c) A percentage of the daily basic service charge referred to in clause (a), determined by the Director, is payable by the owner of property which is connected to only the sewer service and which is monitored by a City-owned meter.
- (d) The percentages of the daily basic service charge determined by the Director under clauses (b) and (c) must not total more than 100%.
amended 86/2009 (entire section 14)

DAILY BASIC SERVICE CHARGES – PRIVATELY-OWNED METERS

- 14.1 (a) Subject to this section, a daily basic service charge set out in Schedule A of this By-law is payable by the owner of property which is connected to both the water service and wastewater service and which is monitored by a privately-owned meter.
- (b) A percentage of the daily basic service charge referred to in clause (a), determined by the Director, is payable by the owner of property which is connected to only the water service and which is monitored by a privately-owned meter.

- (c) A percentage of the daily basic service charge referred to in clause (a), determined by the Director, is payable by the owner of property which is connected to only the sewer service and which is monitored by a privately-owned meter.
- (d) The percentages of the daily basic service charge determined by the Director under clauses (b) and (c) must not total more than 100%.
added 86/2009 (entire section 14.1)

BILLING OF DAILY BASIC SERVICE CHARGES

- 14.2 (a) Basic service charges may be billed quarterly, monthly or in other periods of time determined by a designated officer.
- (b) Where an account has been finalized, a final bill for the basic service charges that have accrued since the previous periodic bill is payable by the owner. The first periodic bill since the initiation of an account, containing the basic service charges that have accrued since the account was initiated, is payable by the owner.
added 86/2009 (entire section 14.2)

PAYMENTS

- 15. All payments of charges and other services may be made at one of the City's designated agents if paid no later than the due date on the bill.
amended 7882/2001
- (1) Overdue Accounts
Overdue payments must be made at the Water Utility's office designated on the bill. Overdue accounts may be subject to interest charges as outlined in Schedule "A" – Interest on Overdue Accounts. The Water Utility may forward overdue accounts to a private collection agency for collection.
added 7882/2001

DIVISION OF CITY INTO DISTRICTS

- 16. For the convenient and economical reading of water meters the Designated Officer after consultation with the appropriate Community Committee may divide the City into districts and from time to time change the boundaries of any district or the dates of commencement of the quarterly periods therein. Notwithstanding that this By-law requires services to be paid for by quarterly periods, such period may be changed and the amount varied accordingly in any instance where the same is necessitated by a change in a district made pursuant hereto.

APPLICATION FOR WATER SERVICE CONNECTION

17. Applications for a water service connection shall be made to the Designated Officer on a form supplied by him. Upon request, the applicant shall supply a set of drawings showing fixtures and whatever information may be necessary.

PERMIT FEE

18. At the time of making application for a water service connection or disconnection when a service is no longer required, the applicant shall pay a permit fee for each application in the amount authorized in Schedule "B" attached to and forming part of this By-law.

amended 947/75

19. (a) **Cost and Installation of Services**

The applicant shall pay the cost of installation of the water service connection from the street watermain to the property line. The service may be installed only by employees of the Water Works Utility or by a person regularly licensed by the City to perform that type of work.

(b) **Equalizing Cost of Connections where Watermain not in Middle of Street**

When an application is made by an owner of any property for a connection to a watermain that is not in the middle of the street, the owner shall have the connection constructed in accordance with subsection (a), and, in the case of a connection on the side of the street nearest to the watermain, the owner shall pay to the City at the time of making application for the required permit an amount equal to the distance in feet that the watermain is off center multiplied by the rate listed in Schedule "B", and in the case of a connection on the other side of the street, the City shall pay to the owner when the connection has been satisfactorily completed, a sum equal to the distance in feet that the watermain is off center multiplied by the rate listed in Schedule B.

LICENSEE TO BE QUALIFIED

20. No license shall be issued to any person who, at the time of his application, fails to furnish a certificate of qualification satisfactory to the Designated Officer.

LICENSE FEE

21. No license shall be issued by the Designated Officer until the applicant has paid the required fee as set forth in the Schedule "B" attached to and forming part of this By-law. The City's copy of the license shall be signed by the applicant and will state that he will replace and restore the street to a condition satisfactory to the City, that he will keep barricades by day and barricades and lights by night at the location of all work in progress and maintain the same in good order to the satisfaction of the City, and that he will conform in all respects to the rules, regulations and by-laws of the City and to any applicable statute of the Province of Manitoba pertaining to streets or works done therein.

EXPIRY AND RENEWAL OF LICENSE

22 (1) Subject to subsection (2), a license issued under this By-law expires on December 31 of the year in which the license has been issued or renewed.

22 (2) Notwithstanding subsection (1), a Designated Employee may renew a license if:

- (a) the license holder otherwise qualifies for a renewal; and
- (b) the license holder pays the license renewal fee plus an administrative fee set out in Schedule "B" to this By-law by March 1 of the year after the year in which the licence has been issued or renewed.

22 (3) If a license has not been renewed by January 31 of the year after the year in which the licence has been issued or renewed, it is automatically suspended until it is renewed. A license that has not been renewed by March 1 of the year after the year in which the licence has been issued or renewed may not be renewed; in order to obtain a license, the former license holder must meet the requirements imposed on an applicant for an initial license and pay the fee set out in Schedule "B" for an initial license.

amended 138/2010

LIABILITY INSURANCE

23. Every person to whom a license is issued under this By-law shall maintain on file with the City's Corporate Risk Manager a certificate of insurance evidencing general liability insurance in an amount of not less than two million (\$2,000,000.00) dollars inclusive; such policy shall add The City of Winnipeg as an additional insured with evidence of cross liability, as well as contractor's equipment and products and completed operations cover; 15 days notice of cancellation to be included and the deductible to be paid by the contractor. All requirements to be expressly stated on the certificate.

amended 201/2007

NUMBER OF SERVICES TO BE INSTALLED

24. Except as provided in Sections 32 and 34 herein, only one service pipe adequate to serve the premises shall be installed in the street.

INSPECTION OF WATER SERVICE INSTALLATION

25. Where a water service is installed by a licensed contractor, the Designated Officer must be notified in advance of backfilling the service at the watermain and at the street line so that an inspection may be made of such installation. The Designated Officer must be notified before 1100 hours for any inspection required in the afternoon of the same day and prior to 1600 hours the day previous for any inspection required in the morning. Inspections will be made only on regular working days unless special arrangements are made by the contractor who shall be liable for all extra expense arising out of such special arrangements.

A service permit fee as set out in section 1 of Schedule "B" is payable in advance for each inspection referred to in that section.

added 174/2008

SIZE OF WATER SERVICES

26. The Designated Officer shall determine the size of water service in the street and in the property necessary to adequately serve the premises and no person shall install a service smaller than the size so determined. The minimum size of service permitted for any premises is three-quarters of one inch (3/4") inside diameter.

DEPTH OF SERVICE PIPE

27 (1) A water service, either in the street or in private property, shall be placed at least seven feet six inches (7'6") below the surface of the ground, but shall not be deeper than nine feet (9') in the ground unless a greater depth is approved.

amended 138/2010

27(2) Before a lot grading deposit may be released under subsection 6(5) of the Lot Grading By-law, a Designated Officer must conduct a final inspection to determine that the water service is operable and is properly located in compliance with subsection (1). The final inspection must be requested by the property owner.

added 138/2010

27(3) If a Designated Officer determines at a second inspection that water service is not operable or is not located in compliance with this By-law, the property owner must, prior to a third or subsequent inspection, pay the Water Services Re-inspection Fee set out in Schedule "B".

added 138/2010

TYPES OF SERVICE PIPES

28. For all permanent construction only approved types of pipe and appurtenances shall be used.

STOP COCKS AT STREET LINE

29. An approved water stop cock (or stop and drain cock or valve) and approved box shall be provided at or near the street line for control of water to the premises served. This stop cock and box shall not be operated except by employees of the Water Works Utility nor shall any person tamper or interfere with the same. The water service pipe on the property shall be connected to the stop cock and where the Water Works Utility installs the street portion, the owner shall provide extra service pipe not less than one foot (1') in length at the street line to facilitate this connection.

Adaptors necessary to connect different types or sizes of property pipe to the Water Works Utility stop cock shall be provided by the owner.

MAINTENANCE OF STREET PORTION

30. The Water Works Utility shall maintain that portion of the water service from the street watermain to the property line at no cost to the owner; however, when such service is no longer required, the owner shall pay the cost of disconnecting it at the watermain. If not paid by the owner, the cost may be added to the taxes against the premises and collected in the same manner as ordinary municipal taxes.

30.1 Before demolishing a building that has a water service or private water service connection, the owner must provide a deposit in an amount set out in section 23 of Schedule "B". The deposit shall be returned to the current owner of the property only when the water service or private water service is reused or disconnected in accordance with this By-law and to the satisfaction of the designated employee. If the water service or private water service is not reused or disconnected in accordance with this By-law and to the satisfaction of the designated employee within 18 months, the Water Utility may use the deposit to pay the costs of disconnecting the water service or private water service. That part of the deposit that is not used to pay these costs must be returned to the person who provided it. Costs in excess of the deposit are a debt due and owing by the current owner of the property.

added 174/2008

OWNER'S STOP AND DRAIN COCK

31. A stop and drain cock connected to the service pipe shall be placed inside the wall of the building as close as practical to the point at which the service pipe enters the building. The owner shall maintain the stop and drain cock in good mechanical condition and ensure that it is operable in cases of emergency.

INTERCONNECTION OF INTERIOR SERVICE

32. Two or more services to the same building shall not be connected to each other except by special permission given by the Designated Officer and in all such cases only after satisfactory valve and piping layout drawings have been received and approved by the Designated Officer. Adequate check valves are required on each water service line to prevent back siphoning in case of shut down. A special interconnection between a Sprinkler and a Domestic service may be permitted by the Designated Officer where it is desirable to ensure a continuous water supply and to avoid the laying of temporary hose lines during interruption of service. Except as provided in Section 38 (1) herein, the interconnection of any other water supply to that of the Water Works Utility is prohibited.

BOOSTING DEVICES

33. No booster pump or other boosting device shall be connected directly to a Water Works Utility watermain or to a service line without the approval of the Designated Officer.

TEMPORARY WATER SUPPLY

34. After giving to any customer notification deemed adequate by the Designated Officer, the Water Works Utility may shut off the water service of a customer in order to make repairs to the water system. In case of emergency such as a watermain break or where in the opinion of the Designated Officer considerable damage may be caused, watermains or services may be shut off without notification. Where a customer requires an uninterrupted water supply he shall make arrangements with the Designated Officer to ensure the same. The Designated Officer will recommend action at the customer's expense as he deems necessary to supply uninterrupted water service.

Fees as set out in sections 20 and 21 of Schedule "B" are payable when a temporary water supply is provided through a hose line rental or a water tank rental.

added 174/2008

CUSTOMERS NOT TO FURNISH WATER TO OTHERS

35. No customer, except with the written consent of the Designated Officer, shall furnish water to or permit any other person to take water from his premises.

WASTE OF WATER PROHIBITED

36. Except by written permission of the Designated Officer, no person shall permit water to run through any outlet to prevent freezing or to run for any other purpose longer than necessary for its proper use, and the Designated Officer may, when he deems necessary, turn off the water or take such other lawful action as he deems proper to restrain and prevent wastage of water.

DRAINING PIPES WHEN WATER TURNED OFF

37. The owner or occupant of any premises who requests the Water Works Utility to turn off the water service to such premises shall, before such turn-off is made, close the stop and drain cock, and drain all water from the system of water pipes and plumbing fixtures in the premises, and the owner shall thereafter cause the said stop and drain cock to be kept closed and the said pipes and plumbing fixtures kept free from water until the Water Works Utility is notified that water is again required for the premises.

CROSS CONNECTIONS AND BACKFLOW PREVENTION

38 (1) In this section

“**air gap**” means the unobstructed vertical distance through air between the lowest point of the water supply outlet and the flood level rim of the fixture or device into which the outlet discharges;

“**backflow**” means the flow of water, whether mixed with another substance or not, back into the City’s water system through a water service pipe that has been connected to premises;

“**backflow prevention device**” means a device or assembly which prevents the backflow of water into the potable water system;

“**CAN/CSA-B64.10**” means the *Selection and installation of backflow preventers/Maintenance and field testing of backflow preventers* manual published by the Canadian Standards Association and any replacement document published by the Canadian Standards Association;

“**cancellation**” means that the licence no longer exists and the person must reapply for a new licence in order to legally test backflow prevention devices;

“**initial training course**” means a training course determined by the Director to provide the knowledge and skills necessary to conduct tests of backflow prevention devices;

“**licence**” means a backflow prevention device tester licence issued under s. 38.1;

"operating condition" in reference to a backflow prevention device, means that it meets the standards for operation set out in CAN/CSA-B64.10;

"re-certification course" means a training course determined by the Director to adequately refresh and update the knowledge and skills of a currently licensed backflow prevention device tester to the point where he or she can continue to competently conduct tests of backflow prevention devices;

"suspension" means that the permit, licence or authorization is temporarily ineffective for a specified period of time;

"test report" means a document in a form acceptable to the Director in which the results of a test of backflow prevention devices on a premises are set out; and

"test tag" means a document issued by the designated officer which can be attached to the backflow prevention device to indicate information such as the location and type of device and the name and employer of the tester.

38 (2) A person must not connect or cause to be connected, and the owner and occupant of premises must not permit to be connected, a pipe, fixture, fitting, container or appliance in a manner which, under any circumstances, permits or facilitates backflow into the City's water system.

38 (3) The owner and occupant of premises

- (a) used for any of the purposes or occupations or containing anything identified as having a severe degree of hazard in the current version of "Guide to Degree of Hazard" contained in CAN/CSA-B64.10; or
- (b) identified by the Director, either by address or by category of use or occupancy, and posted on the City website as being at a high risk of backflow;

must ensure that air gaps or backflow prevention devices are installed which are sufficient, in the opinion of a designated officer, to prevent backflow from the premises and from any fixtures on the premises. Once installed, the owner and occupant must ensure that air gaps and backflow prevention devices are maintained in compliance with the Manitoba Plumbing Code and CAN/CSA B64.10.

38 (4) If a backflow prevention device has been installed on premises, the owner or occupant of premises must ensure that

- (a) the backflow prevention device is tested before the anniversary of the date it has been installed, cleaned, repaired, relocated or tested previously;

- (b) the test required by clause (a) is conducted by an individual licensed under section 38.1 to test backflow prevention devices;
 - (c) the results of the test required by clause (a) are received by the designated officer within 30 days after the test has been conducted; and
 - (d) the backflow prevention device is maintained in an operating condition at all times.
- 38 (5) Even where a backflow prevention device has been installed, the obligation in subsection (4) does not apply if the designated officer
- (a) has determined that the premises are no longer being used in a way that falls into a category set out in subsection (3); and
 - (b) notifies the owner or occupant in writing that it is not necessary to comply with subsection (4).
- 38 (6) If a backflow prevention device is found not to be in an operating condition or if the Director has reason to believe that it may not be in an operating condition, as part of the powers granted to him or her by this By-law and The City of Winnipeg Charter, the Director may shut off the water supply to the premises until the backflow prevention device is repaired or replaced.

LICENSING OF BACKFLOW PREVENTION DEVICE TESTERS

- 38.1 (1) An individual is entitled to be issued an initial backflow prevention device tester licence by a designated officer if he or she meets the following criteria:
- (a) the individual has within 90 days prior to the date of the application successfully completed an initial training course;
 - (b) the individual pays the applicable fee set out in Schedule B; and
 - (c) the individual has not been issued a licence that is currently suspended or has been cancelled for a period that is not expired.
- 38.1 (2) In order to qualify for a renewal of a licence as set out in subsection 22(2) the licence holder must have within the past five years successfully completed an initial training course or a re-certification course.

- 38.1 (3) Notwithstanding subsection 22(3), the Director may vary the requirement of subsection (1)(a) and allow a licence to be issued to a former licence holder on the basis of the licence holder having successfully completed a re-certification course within the previous 90 days, if the Director concludes that the licence holder's skill and knowledge can be adequately assured through successfully completing a re-certification course rather than an initial training course.
- 38.1 (4) A designated employee may suspend or cancel a licence if:
- (a) the licence holder has failed to comply with the requirements of subsection 38.2(1);
 - (b) the past conduct of the licence holder creates a reasonable concern that the he or she will not comply with subsection 38.2(1) in the future; or
 - (c) the applicant provided false or misleading information in the application that had an effect on the decision to grant the licence.
- 38.1 (5) Before suspending or cancelling a licence under subsection (4), the designated employee must:
- (a) notify the licence holder in writing that suspending or cancelling the licence is being considered;
 - (b) provide in writing the reasons why suspending or cancelling the licence is being considered; and
 - (c) give the licence holder a reasonable opportunity to be heard concerning the possible suspension or cancellation of the licence.
- 38.1 (6) If a designated employee decides to cancel a licence, he or she must identify a date before which, or a time frame within which, the licence holder is not permitted to reapply for the licence.
- 38.1 (7) A decision concerning the suspension or cancellation of a licence must be sent to the licence holder in accordance with The City of Winnipeg Charter and is subject to appeal.

BACKFLOW PREVENTION TESTING

- 38.2 (1) A licence holder must:
- (a) provide the owner and occupant of premises with a written test report within 14 days after the test is conducted;

- (b) if a backflow prevention device is not in an operating condition, report this fact to the designated officer and to the owner and occupant of the premises immediately and, in any event, within two working days of the test; and
 - (c) immediately upon completion of a backflow prevention device test, accurately and fully provide the information required on a test tag and affix the test tag to the backflow prevention device or to the building at a point immediately adjacent to the device.
- 38.2 (2) No person other than a licensed backflow prevention device tester who is conducting a test of the device may remove a test tag, alter the information contained on it or write on a test tag.
amended 139/2010 (entire subsection 38)

WATER FOR CONSTRUCTION PURPOSES

39. Charges for water services required for construction purposes shall be determined by the Designated Officer.

PROVISION OF METERS

40. (a) The Water Works Utility shall determine the size of meter to be installed in any premises for measuring all water other than for fire fighting use and shall provide and maintain such meter. The owner shall provide a sufficient space as close as possible to the stop and drain cock in the building or premises to allow the Water Works Utility to place the meter in a horizontal position. The owner or occupant must at all times have the meter accessible so that it may be readily examined and read by employees of the Water Works Utility;
- (b) Where a person requests testing of the City meter, a fee will be charged as shown in Schedule "B" (Meter Test Fee). If the meter test results show that the meter is over registering outside of the current specifications of the American Water Works Association, the meter test fee will be refunded.
amended 201/2007

NO BRANCH EXCEPT ON OUTLET SIDE OF METER

41. Except as provided in Sections 42 and 51 (5), no branch shall be taken off the service pipe other than on the outlet side of the meter, except one that by-passes around the meter shall be provided by and at the expense of the owner on service two inches (2") in diameter and larger and the service shall be so valved that the meter can be removed for repairs or for testing and water supply to the premises maintained. Valves on the by-pass shall be sealed by the Designated Officer and a seal shall not be broken excepting in case of a leak or clog in the meter or connections. Any person who breaks or authorizes the breaking of a seal shall notify the Designated Officer within six hours after such breaking and failure to do so will render such breaking liable to the penalties provided for breach of this By-law.

MULTIPLE METERING

42. Multiple metering of premises may be provided by the Water Works Utility under special agreement. In the case of a building containing a number of stores or other subdivisions, where separate accounting of water use is required, the Water Works Utility will provide an individual meter to each subdivision, read it and submit a separate account provided that the owner

- (a) files with the Designated Officer a plan of the building plumbing;
- (b) provides sufficient space at a single location as close as possible to the stop and waste control in the building for the installation of the required bank of meters in a horizontal position, where they may be easily read and are readily accessible for removal, repair or replacement;
- (c) provides adequate facilities for proper designation of the subdivision supplied by each meter for billing purposes;
- (d) accepts full responsibility for any errors in consumption by individual customers resulting from plumbing connections between subdivisions, damage to meters from freezing, loss of meters, and the illegal use of water where a water service has been discontinued;
- (e) accepts full responsibility for all uncollectible subdivision water accounts; and
- (f) renders the meters readily accessible to Water Works Utility employees at all reasonable times.

The Designated Officer shall provide, upon request, a standard drawing showing the minimum requirements for the installation of multiple meters.

TAMPERING WITH METER FORBIDDEN

43. Should any person alter any meter placed by the Water Works Utility upon any water service pipe or connection therewith, inside or outside any house, building or other place, so as to alter the amount of water registered thereby, unless specially authorized by the Designated Officer for that particular purpose and occasion, such person is liable to the penalties imposed for breach of this By-law. If any meter of the Water Works Utility is lost or removed from the premises, the owner shall pay for replacement of the meter. The cost of the meter, if not paid by the owner, may be added to the taxes against the premises and collected in the same manner as ordinary municipal taxes.

UTILITY TO BE NOTIFIED OF FAILURE OF METER

44. In the case of breakage, stoppage or irregularity in a water meter, the customer shall notify the Designated Officer immediately upon such condition being discovered. All installation, repair and disconnection of any water meter shall be performed only by Water Works Utility employees authorized to do such work.

DAMAGE TO METERS BY HOT WATER

45. Where a hot water system on any property is so constructed that backflow of hot water damages any water meter, the Water Works Utility will, at the expense of the owner, renew or repair such meter, and all charges for removing, renewing or repairing and replacing the meter, if not paid by the owner, may be added to the taxes on the property and collected in the same manner as ordinary municipal rates. If a check valve is or has been installed by the owner to prevent hot water from reaching a water meter, then there shall also be installed on the boiler side of such check valve, a relief valve of a pattern approved by the Designated Officer.

DAMAGE TO METERS BY FROST

46. Every owner of property served by the water works system shall maintain that place where the service pipe enters the premises and where any water meter is situated at a temperature at all times sufficient to prevent the water service and meter or meters of the Water Works Utility from being damaged by frost. Should a water meter be damaged by frost, the Water Works Utility will remove, repair or renew and replace the same at the expense of the owner. The cost of such work if not paid by the owner may be added to the taxes against the premises and collected in the same manner as ordinary municipal taxes.

FIRE SERVICE CONNECTIONS

47. A fire service connection shall include a direct or indirect pipe line connection to the Water Works Utility watermain for the purpose of providing a supply of water to a sprinkler system, either of the wet or dry type, a standpipe with or without attached hose, and a private fire hydrant or any other apparatus or fire protection system, for the purpose of extinguishing fires in a building or other premises. Connections for public fire protection provided by the Water Works Utility are not included.

APPLICATION FOR FIRE SERVICE CONNECTIONS

48. Every owner making application for a fire service connection shall in each case file with the Designated Officer a set of drawings of the premises to be served showing the location and size of any building or buildings; the number, size and location of fire hose outlets, if any; the location and size of private fire hydrants, if any; the number, type and location of sprinkler heads, if any, and the location of all valves, pipes, tanks and other appurtenances, wherever the same are situated upon the premises.

SIZE OF CONNECTIONS

49. The required size of each fire service connection shall be determined by the Designated Officer and shall depend on the size of the street main; the available pressure on the main and the nature and capacity of the fire protection equipment in the premises to be served, provided, however, that the diameter of the fire service connection shall not be larger than the diameter of the watermain in the street to which it is connected.

OWNER TO PAY COST OF INSTALLATION

50. The cost of installing the street portion of a fire service connection, if to be installed by the Water Works Utility, shall be paid to the Water Works Utility in advance by the owner of the premises to be served by the connection.

REGULATIONS GOVERNING USE OF FIRE SERVICES

51. (1) No water shall be drawn from the fire service pipes for any purpose whatsoever except for extinguishing fire or for the testing of the system by the Water Works Utility or by any authorized person, except as provided for in Sections 32 and 34 herein.

- (2) No connection shall be made between the fire protection system and any other water system in the premises served thereby other than any of those approved under Sections 32 and 34 of this By-law.
- (3) A valve on a hose outlet, drain cock or any other appurtenance shall be of such a type that it may be sealed by the Water Works Utility, and whenever any such valve is opened, the customer shall immediately notify the Designated Officer so that the same may be resealed. Any person opening or authorizing the opening of any such valve who fails to notify the Designated Officer within six hours of any such opening shall be guilty of a breach of this By-law.
- (4) A closed sprinkler system, both wet or dry, shall be supplied by a separate line direct from the watermain in the street, or by a single combined Fire Stand Pipe and Sprinkler service line. The Domestic supply must be provided by a separate direct line from the watermain in the street.

Where a sprinkler system containing less than 9 sprinkler heads is installed to protect against special hazard(s) in an otherwise unsprinklered building, such system may be connected to the regular metered water supply, providing that the water supply is adequate to supply the number of sprinklers.

amended 2029/78

- (5) A fire standpipe may be supplied by a separate line direct from the watermain in the street or by a single combined Fire and Domestic service line. In the latter case, the fire standpipe connection shall be made on the watermain side of the water meter. Every fire standpipe service shall be provided at the expense of the owner and shall have an approved detector check valve complete with a detector meter and check valve on the detector meter line.

MAINTENANCE OF FIRE SERVICES

52. The owner of premises served by a fire service connection shall pay to the Water Works Utility from time to time as the work is done, the cost, as certified by the Designated Officer of

- (a) repairing, renewing, supporting and making structural alterations in or removing any such fire service pipe, regardless of the reason for which such work may be deemed by the Designated Officer to be necessary; and
- (b) making good, to the satisfaction of the Designated Officer, any subsidence in or damage to any street resulting from the performing of any work specified in paragraph (a), or from water leakage from such fire service.

NOT RESPONSIBLE FOR FAILURE OF SERVICE

53. The Water Works Utility shall not be liable for loss or damage by reason of low pressure or interruption or failure of service in any fire service connection for any cause, and the Water Works Utility may, at any time, discontinue the supply of water without any notice to the owner of any premises served by any fire service connection or fire protection system.

UNAUTHORIZED USE OF HYDRANTS PROHIBITED

54. The use of fire hydrants other than by the City Fire Department for fire fighting and Water Works Utility employees for testing and maintenance purposes is prohibited except as provided in Section 55.

PERMITS FOR USE OF FIRE HYDRANTS

55. The Designated Officer upon written application by a person may permit water to be used temporarily from a fire hydrant where no other supply can be conveniently obtained.

PROCEDURES FOR USE OF HYDRANTS

56. Every applicant shall, for each individual hydrant, make application to the Designated Officer for the use of water therefrom and obtain a permit for the use of such hydrant. Deposits and charges required for the use of water and a connection to a hydrant are as set forth in the Schedule "B" attached hereto and forming part of this By-law.

Upon the expiry of each thirty-day period and for each individual job or contract, every permittee shall obtain a permit renewed or extended by the Designated Officer and shall pay the required fees.

USE OF HYDRANTS BY PUBLIC AUTHORITIES

57. Subject to supplementary regulations and charges approved by City Council, fire hydrants may be used by other City Departments for furnishing water for street sprinkling or flushing, flushing sewers, street repairs, flooding rinks, watering boulevards or for any other purposes approved by the Designated Officer.

USE OF HYDRANTS IN COLD WEATHER

58. Every person authorized to use fire hydrants between the First day of November of any year and the Thirtieth day of April of the year next following shall notify the Designated Officer immediately of such use so that every hydrant so used may be inspected, pumped dry, repacked and serviced.

RELOCATION OF FIRE HYDRANTS

59. (1) Where an existing hydrant interferes with a property owner's use or proposed use of his property, the hydrant may be relocated by the Water Works Utility at the expense of the property owner making the request.
- (2) Where, at the request of a property owner, the grade of an existing street is altered so that an existing hydrant will not be at the proper elevation with respect to the new grade established, such hydrant shall, upon written application by such owner, be raised or lowered by the Water Works Utility at the expense of the said property owner.

OBSTRUCTION OF HYDRANTS

60. Nothing shall be constructed, erected or planted which interferes or is liable to interfere with the use of a fire hydrant. Sufficient clearance shall be maintained adjacent to every hydrant to permit easy connection of hoses and complete operation of such hydrant from all directions using regular hydrant wrenches and hose spanners.

REMEDIES FOR DEFAULT IN PAYMENT

- 61(1) Where there is a default in payment for any rates, penalties, or services provided under this By-law, the City may enforce payment by shutting off the supply of water or by suit at law before any court of competent jurisdiction or by distress and sale of the goods and chattels of the occupant of the property in which such water or service is consumed or used, or of any goods and chattels in the occupant's possessions wherever they be found within the City, such distress and sale to be levied and made in the same manner, so far as may be, as a distress and sale by law on a tenant for rent, and to provide that all such rates and penalties until paid shall be a lien on such property, and that in the case of rates, penalties and charges for water supplied or services rendered in connection with the Water Works Utility, the same may be added to the taxes on such property and collected in the same manner as ordinary municipal rates.

amended 5811/91; 138/2010

61 (2) Where the supply of water has been turned off to enforce payment as outlined in Clause 61(1), the Water Works Utility may charge a turn-on fee as listed in Schedule "B" when water service is restored to such premises.

added 5811/91; amended 138/2010

61(3) Where City employees attend to premises in order to disconnect the supply of water as permitted in subsection 61(1) and payment of an outstanding sum is made to the City employees at or near the premises, thereby forestalling the disconnection of the water supply, a on-site collection fee set out in Schedule B is payable to recover the costs of collecting the outstanding balance at the site.

added 138/2010

PENALTIES FOR OFFENSES

62. Any person who

- (1) lays or causes to be laid any pipe or main to communicate with any pipe or main of the City's Water Works, or in any way obtains or uses any water thereof, without the consent of the City, shall forfeit and pay to the City the sum of Fifty Dollars (\$50.00), and also a further sum of Ten Dollars (\$10.00) for each day the pipe or main so remains, and the City may recover those sums, together with costs of suit, in addition to the value of the water taken, by civil action in any court of competent jurisdiction.
- (2)
 - (a) wilfully or maliciously hinders or interrupts, or causes or procures to be hindered or interrupted, the City or its servants, agents, contractors, or workmen, or any of them, in the exercise of the powers and authorities granted herein as to water works, plant, or equipment or water supply; or
 - (b) wilfully or maliciously lets off or discharges any water so that it runs waste or useless out of the City's Water Works System; or
 - (c) throws or deposits any injurious, noisome, or offensive matter into the water or the City's Water Works or upon the ice, or in any way fouls them or commits any wilful damage or injury to the City's Water Works or water, or encourages any of those things to be done;

is guilty of an offense and liable, on summary conviction, for each such offence to a fine of Fifty Dollars and costs on conviction, or to imprisonment for a term not exceeding thirty days, or to both such a fine and such an imprisonment; and he is also liable to an action at law, at the suit of the City, to make good any damage done by him.

PENALTY FOR POLLUTION OF WATER SUPPLY

63. Any person who

- (a) bathes or washes, or cleanses any cloth, wool, leather, skin, or animal, or places any nuisance or offensive thing, in any lake, river, pond, source, or fountain from which the water of the City is obtained and within one mile from the source of supply for the Water Works; or
- (b) conveys, casts, throws, or puts, any filth, dirt, dead carcasses, or other noisome or offensive thing in any of the waters mentioned in clause (a) and within the distance therein mentioned from the source of supply; or
- (c) causes, permits, or suffers, the water of any sink, sewer, or drain to run or to be conveyed into any of the waters mentioned in clause (a); or
- (d) causes any other thing to be done whereby the waters mentioned in clause (a) may in anywise be tainted or fouled;

is guilty of an offence and liable, on summary conviction, for each such offence to a fine not exceeding Fifty Dollars and costs on conviction, or to imprisonment for a term not exceeding thirty days, or to both such a fine and such an imprisonment.

64. (a) All by-laws, resolutions and orders passed prior hereto by any area municipality as defined in Section 1 of *The City of Winnipeg Act* and still in force, relating to the Water Works Utility, the Fixing of Water Rates and the Billing and Collection thereof shall hereinafter cease to have effect.

amended 6595/95

(b) Without limiting the generality of subsection (a), the following by-laws and any amendments thereto made from time to time, are hereby repealed;

1. The City of Winnipeg By-law No. 15452;
2. The City of Winnipeg By-law No. 17661;
3. The City of Winnipeg By-law No. 19666;
4. The Rural Municipality of Charleswood By-law No. 755;
5. The City of East Kildonan By-law No. 2650;
6. The City of East Kildonan By-law No. 4737;
7. The Rural Municipality of Fort Garry By-law No. 5196;
8. The Rural Municipality of North Kildonan By-law No. 1806;
9. The Rural Municipality of Old Kildonan By-law No. 763;
10. The City of St. Boniface By-law No. 4463;
11. The City of St. James By-law No. 9456;
12. The City of St. James-Assiniboia By-law No. 607/71;

13. The Town of Tuxedo By-law No. 1043;
14. The City of Transcona By-law No. 788;
15. The City of West Kildonan By-law No. 52/66/A;
16. The City of West Kildonan By-law No. 47/65/A;
17. The City of St. Vital By-law No. 5148

RECORD SEARCH FEE

65. (a) Upon application, in a form provided by the Utility, and payment of the fee listed in Schedule "B", the Utility shall conduct a search of its records and provide advice in respect of specific properties regarding recorded By-law infractions, spills, outstanding inspections, and other details, including account histories, as may be allowed by City by-law;
- (b) Upon application, in a form provided by the Utility, and payment of the fee listed in Schedule "B", the Utility shall provide confirmation of final water and sewer account balances for law firms handling the sale of a property."
amended 59/2008

POWERS OF DESIGNATED OFFICERS

66. Designated officers have the powers of a designated employee under The City of Winnipeg Charter to administer and enforce this By-law, including conducting inspections and remedying a violation of this By-law. When an emergency arises that affects or could affect the health or safety of persons or affects or could affect property, designated officers have the authority to take whatever actions or measures are necessary to meet the emergency and to eliminate or reduce its effects.

added 139/2010

APPEALS

67. (1) A decision made or order issued pursuant to this By-law that is permitted by *The City of Winnipeg Charter* to be appealed may be appealed to the Standing Policy Committee on Infrastructure Renewal and Public Works.
added 139/2010
67. (2) Appeals made under subsection (1) must be in writing and accompanied by the applicable appeal fee set out in Schedule B.
added 139/2010

COMMENCEMENT OF BY-LAW

This By-law shall be deemed to come into force on the first day of October, 1973.

DONE AND PASSED in Council assembled, this 7th day of November, 1973.

SCHEDULE A
CLASSES OF WATER RATES

The following rates shall become effective for water delivered after January 1, 2009, on a pro-rated basis based on the number of days water is delivered at the old and new rates.

amended 174/2008

1. Domestic \$1.34 per cubic metre from 0 to 272 cubic metres per quarter
amended 86/2009; 142/2009; 137/2010 (effective January 1, 2011)

Intermediate \$1.17 per cubic metre from 272.1 to 2,720 cubic metres per quarter
amended 86/2009; 142/2009; 137/2010 (effective January 1, 2011)

Industrial \$1.00 per cubic metre over 2,720 cubic metres per quarter.
amended 86/2009; 142/2009; 137/2010 (effective January 1, 2011)

- 2(1) Daily Basic Service Charges for City-owned meters (clause 14(a))

Meter Size	Daily Basic Charge
5/8"	\$0.15
3/4"	\$0.16
1"	\$0.20
1 1/2"	\$0.24
2"	\$0.35
3"	\$1.22
4"	\$1.55
6"	\$2.31
8"	\$3.17
10"	\$4.04

- 2(2) Daily Basic Service Charges for privately-owned meters (clause 14.1(a))

Both water and sewer service \$0.10
amended 86/2009

3. Interest on Overdue Accounts

Interest Charge 1.5% per month
added 7882/2001

SCHEDULE B

The Fees and Licenses payable under the provisions of the Water Works By-law No. 504/73 are as follows:

1. Service Permit Fee (section 25)

The service permit fee for new, renewed or repaired water services is as follows:

(a)	Single Domestic Service	\$ 90.00
(b)	Combined Domestic Fire Service Industrial, etc.	\$127.00
(c)	Sprinkler Service	\$127.00
(d)	Extra charge for inspections conducted after Regular working hours, including weekends and civic holidays	\$167.00
(e)	Re-inspection during regular working hours <i>amended 7121/97; 7328/98; 201/2007; 174/2008 158/2009; 138/2010</i>	\$ 31.00

2. Contractor's License

The annual license for installation of water services shall be as follows:

(a)	Initial Fee	\$300.00
(b)	Annual Renewal <i>amended 7121/97; 7328/98; 201/2007</i>	\$176.00
(c)	Administration fee for late renewal <i>added 138/2010</i>	\$ 50.00

3. Multiple Metering

The permit fee for Multiple Metering shall be \$ 95.00
amended 7121/97; 7328/98; 201/2007; 174/2008

4. Damaged or Lost Meters (section 45 and 46)

The following fees apply to replace meters that are damaged or lost:

<u>Meter Size (Inches)</u>	<u>Fee</u>
5/8"	\$146.00 + GST
3/4"	\$184.00 + GST
1" – 2"	Actual cost + \$ 89.00 + GST
3" – 10"	Actual cost + \$132.00 + GST"

amended 7121/97; 7328/98; 201/2007; 174/2008

5. Off center watermains

Equalization rate for off center watermains \$ 69.00/meter
amended 7121/97; 7328/98

6. Use of Fire Hydrants

Upon the approval of the use of a Fire Hydrant(s), the following charges must be deposited before the Fire Hydrants are used:

- (a) \$200.00 for each hydrant for 30 days, or part thereof with an additional \$56.00 per month for each additional month.
- (b) A deposit of \$100.00 for use of water. Final billing is based on actual water used.
amended 7121/97; 7328/98; 201/2007

7. Rental of Water Meters

The following rental fees apply to monthly rentals of water meters:

<u>Meter Size (Inches)</u>	<u>Monthly Rental Fee</u>
5/8" – 3/4"	\$ 95.00 + GST
1" – 2"	\$100.00 + GST
3"	\$150.00 + GST

amended 6002/92; 201/2007; 174/2008; 158/2009; 138/2010

8. Thawing Water Services

	<u>Fee</u>
a) property zoned residential	\$ 200.00 (total cost)
b) property zoned other than residential	
(i) first hour or portion thereof	\$ 175.00 per hour
(ii) each additional half-hour or portion thereof	\$ 60.00

amended 7121/97; 7328/98; 138/2010

9. Hydrant Rental

\$169.00/hydrant/year
amended 6543/94; 7328/98

10.	Backflow Prevention Device Tester Licence fee	
	Initial licence fee	\$ 130.00
	Licence renewal fee	\$ 90.00
	Administration fee for late renewal <i>amended 6002/92; 158/2009; 139/2010</i>	\$ 50.00
11.	Water sold at a standpipe	\$ 12.00/1000 gallons
	<i>amended 209/2005; 201/2007; 174/2008 158/2009; 138/2010</i>	
12.	Control of Watermain for Contractor Fee	
	Request by Contractor to turn off a watermain <i>added 7328/98; 138/2010</i>	\$200.00/each
13.	Key Guard Deposit Fee	
	Deposit fee for key access to standpipes (per key) <i>added 209/2005; 246/2006</i>	\$215.00
14.	On –site Collection and Turn Off Fees	
	On-site collection fee	\$ 50.00
	Water turn-on fee (after water service has been shut off) <i>added 246/2006; 201/2007; 138.2010</i>	\$100.00
15.	Appointment Fee	
	Field: First appointment	no charge
	Second and each additional appointment	\$ 90.00
	Inspection: First appointment	no charge
	Second and each additional appointment <i>added 246/2006; 201/2007</i>	\$ 20.00
16.	Backflow Preventer Rental with Lockable Box	
	(a) Per Unit - per week	\$175.00
	(b) Per Unit - per month	\$500.00

17	Meter Test Fee	
	Meter Size (Inches)	
	(i) 5/8 - 3/4	\$79.00 + GST
	(ii) 1 and larger	\$200.00 + GST
18.	Record Search Fee	
	(a) Environmental record search not including account histories (per address)	\$100.00 + GST
	(b) Record search account history only (per account)	
	(i) up to 5 most recent years	\$ 67.00 + GST
	(ii) every additional year	\$100.00 + GST
	<i>added 201/2007 (16, 17 and 18); 174/2008 158/2009; 138/2010</i>	
	(c) Property Account Balance Confirmation for Law Firms	\$ 15.10 + GST
	<i>amended 138/2010</i>	
	(c.1) Online account balance information Subscription service	\$ 10.60
	<i>added 138/2010</i>	
	(d) Cross-connections and backflow prevention record search	\$110.00 + GST
	<i>added 59/2008; 174/2008; 158/2009</i>	
19.	Application for New Water Service Connection or Re-use of Existing Connection (section 18)	
	(a) Single Family Residential	\$ 31.00
	(b) Other than single family residential	\$175.00
	<i>amended 158/2009</i>	
20.	Install and Remove Temporary Water Service	
	<i>amended 138/2010</i>	
	Hose line rental, for each installation and removal	\$410.00
21.	Water Tank Rental - Including Cost of Water	
	(a) Delivery and first day rental	\$235.00

	(b) Each additional day of rental	\$ 20.00
	(c) Additional tank refills (includes pick-up and drop-off) <i>amended 158/2009; 138/2010</i>	\$220.00
22.	Leak Testing (at request of property owner or contractor)	
	(a) Leak testing only	\$545.00 + GST
	(b) Obtaining clearances and leak testing	\$650.00 + GST
23.	Deposit for Abandonment of Water Service or Private Water Service (section 30.1)	\$1,250.00
24.	Voluntary cross-connections and backflow prevention Inspection (at request of or with consent of owner)	
	- includes inspection of entire premises to identify potential cross-connection and backflow situations, inspection of all existing backflow prevention devices, issuance of letter certifying compliance or non-compliance with By-law requirements <i>added 138/2010</i>	\$450.00
25.	Water Services Box	
	First and follow-up inspection	no charge
	Third and subsequent inspections <i>added 138/2010</i>	\$250.00
26.	Appeal Fee <i>added 139/2010</i>	\$250.00

FAXED

CLIENT FILE NO.: 53.10

June 19, 2009

Mr. Barry MacBride
Director
Water and Waste Department
City of Winnipeg
101 - 1155 Pacific Avenue
Winnipeg, Manitoba R3E 3P1

Dear Mr. MacBride:

Enclosed is revised Environment Act Licence No. **2669 E RR** dated June 16, 2009 issued in accordance with The Environment Act to the **City of Winnipeg**. This Licence has been revised with new ammonia limits which incorporate new information from the City of Winnipeg and Manitoba Water Stewardship. This Licence supersedes Licence No. 2669 E R for the alteration and operation of the Development commonly referred to as the West End Water Pollution Control Centre, in the City of Winnipeg.

In addition to the enclosed Licence requirements, please be informed that all other applicable federal, provincial and municipal regulations and by-laws must be complied with.

For further information on the administration and application of the Licence, please feel free to contact Siobhan Burland Ross, P. Eng. at (204) 945-7015.

Yours truly,

Tracey Braun, M. Sc.
Director
Environment Act

Enc.

c: Don Labossiere, Director, Environmental Operations
Public Registries

NOTE: Confirmation of Receipt of this Licence No. 2669 E RR (*by the Licencee only*) is required by the Director of Environmental Assessment and Licensing. Please acknowledge receipt by signing in the space provided below and faxing a copy (letter only) to the Department by July 2, 2009.

On behalf of the City of Winnipeg

Date

****A COPY OF THE LICENCE MUST BE KEPT ON SITE AT THE DEVELOPMENT AT ALL TIMES****

LICENCE

Licence No. / Licence n° 2669 E RR

Issue Date / Date de délivrance September 3, 2004

Revised: April 12, 2005
Revised: August 17, 2005
Revised: June 19, 2009

IN ACCORDANCE WITH THE ENVIRONMENT ACT (C.C.S.M. c. E125)
THIS LICENCE IS ISSUED PURSUANT TO SECTION 27 AND 14(2) TO:

CITY OF WINNIPEG; "the Licencee"

for the alteration and operation of the Development being a wastewater collection system, and a wastewater treatment plant commonly referred to as the West End Water Pollution Control Centre, in the City of Winnipeg, with discharge of treated effluent being directed to the Assiniboine River, in accordance with the Proposal filed under The Environment Act on March 2, 1990, in consideration of the Manitoba Clean Environment Commission August 2003 Report on Public Hearings and in accordance with the Notice of Alteration filed under The Environment Act on July 19, 2005 and July 27, 2005 and subject to the following specifications, limits, terms and conditions:

DEFINITIONS

In this Licence,

"**accredited laboratory**" means an analytical facility accredited by the Standard Council of Canada (SCC), or accredited by another accrediting agency recognized by Manitoba Conservation to be equivalent to the SCC, or be able to demonstrate, upon request, that it has the quality assurance/quality control (QA/QC) procedures in place equivalent to accreditation based on the international standard ISO/IEC 17025, or otherwise approved by the Director;

"**acute lethality**" means a toxic effect resulting in death produced in an organism by a substance or mixture of substances within a short exposure period (usually 96 hours or less);

"**affected area**" means a geographical area, excluding the property of the Development;

"**approved**" means approved by the Director in writing;

****A COPY OF THE LICENCE MUST BE KEPT ON SITE AT THE DEVELOPMENT AT ALL TIMES****

"as constructed drawings" means engineering drawings complete with all dimensions which indicate all features of the Development as it has actually been built;

"calibrate" means to determine, check or rectify the graduation of any instrument giving quantitative measurement;

"combined sewer overflow (CSO)" means the sewage overflow to the river that occurs during high flow conditions from a pipe system that collects both municipal sewage and surface runoff from a service area;

"Director" means an employee so designated pursuant to The Environment Act;

"effluent" means treated or untreated wastewater flowing or pumped out of the wastewater treatment plant or any component of the plant;

"Environmental Management System (EMS)" means the part of the overall management system that includes organizational structure, planning activities, responsibilities, practices, procedures, processes, and resources for developing, implementing, achieving, reviewing and maintaining the environmental policy;

"Environment Officer" means an employee so appointed pursuant to The Environment Act;

"Escherichia coli (E. coli)" means the species of bacteria in the fecal coliform group found in large numbers in the gastrointestinal tract and feces of warm-blooded animals and man, whose presence is considered indicative of fresh fecal contamination, and is used as an indicator organism for the presence of less easily detected pathogenic bacteria;

"fecal coliform" means aerobic and facultative, Gram-negative, nonspore-forming, rod-shaped bacteria capable of growth at 44.5°C, and associated with fecal matter of warm-blooded animals;

"five-day biochemical oxygen demand (BOD₅)" means that part of the oxygen demand usually associated with biochemical oxidation of organic matter within five days at a temperature of 20°C;

"five-day carbonaceous biochemical oxygen demand (CBOD₅)" means that part of the oxygen demand usually associated with biochemical oxidation of carbonaceous organic matter within 5 days at a temperature of 20°C, excluding the oxygen demand usually associated with the biochemical oxidation of nitrogenous organic matter;

“flow proportional composite sample” means a combination of not less than ten individual samples of equal volumes of wastewater taken at equal increments of wastewater flow over a specified period of time;

"grab sample" means a quantity of undiluted effluent collected at any given time;

"influent" means water, wastewater or other liquid flowing into the wastewater treatment facility or any component of the facility;

"leachate" means liquid that has percolated through solid waste, and that contains dissolved and suspended materials from the solid waste;

“mixing zone” means an area adjacent to a discharge where a receiving water may not meet all water quality objectives included in the most recent version of the “Manitoba Water Quality Standards, Objectives, and Guidelines”;

"MPN index" means the most probable number of coliform organisms in a given volume of wastewater which, in accordance with statistical theory, would yield the observed test result with the greatest frequency;

"noise nuisance" means a continuous or repeated noise in an affected area, which is offensive, obnoxious, troublesome, annoying, unpleasant, or disagreeable to a person:

- a) residing in an affected area;
- b) working in an affected area; or
- c) present at a location in an affected area which is normally open to the members of the public;

if the noise:

- d) is the subject of at least 5 written complaints, received by the Director in a form satisfactory to the Director, and within a 90 day period, from 5 different persons falling within clauses a), b), or c), who do not live in the same household; or
- e) is the subject of at least one written complaint, received by the Director in a form satisfactory to the Director, from a person falling within clauses a), b) or c), and the Director is of the opinion that if the noise had occurred in a more densely populated area there would have been at least 5 written complaints received within a 90-day period, from 5 different persons who do not live in the same household;

"odour nuisance" means a continuous or repeated odour, smell or aroma in an affected area which is offensive, obnoxious, troublesome, annoying, unpleasant or disagreeable to a person:

- a) residing in an affected area;
- b) working in an affected area; or

- c) present at a location in an affected area which is normally open to members of the public;
- if the odour, smell or aroma:
- d) is the subject of at least 5 written complaints received by the Director in a form satisfactory to the Director and within a 90 day period, and from 5 different persons falling within clauses a), b) or c) who do not live in the same household; or
 - e) is the subject of at least one written complaint, received by the Director in a form satisfactory to the Director, from a person falling within clauses a), b) or c) and the Director is of the opinion that if the odour, smell or aroma had occurred in a more densely populated area there would have been at least 5 written complaints received within a 90 day period from 5 different persons who do not live in the same household;

“secondary wastewater treatment process” means the process utilizing biological oxidation by activated sludge followed by clarification;

“Standard Methods for the Examination of Water and Wastewater” means the most recent edition of Standard Methods for the Examination of Water and Wastewater published jointly by the American Public Health Association, the American Waterworks Association and the Water Environment Federation;

“thirty-day rolling average” means the arithmetic average of any daily reported data plus the preceding 29 consecutive days of reported data;

“truck dumping station” means a facility used to receive, store and meter wastewater, including septage, which has been hauled to the wastewater treatment plant with a truck;

“wastewater” means the spent or used water of a community or industry that contains dissolved and suspended matter;

“wastewater treatment lagoon” means the component of the development which consists of an impoundment into which wastewater is discharged for storage and treatment by natural oxidation; and

“wastewater treatment plant” means the component of this development that consists of the wastewater pumping station located at 6821 Wilkes Avenue, and a central treatment facility including the wastewater treatment lagoon, located at 7740 Wilkes Avenue.

GENERAL REQUIREMENTS

This Section of the Licence contains requirements intended to provide guidance to the Licencee in implementing practices to ensure that the environment is maintained in such

a manner as to sustain a high quality of life, including social and economic development, recreation and leisure for present and future Manitobans.

1. With the exception of the combined sewer overflow (CSO) wastewater, the Licencee shall direct all wastewater from the wastewater collection system area to the West End Water Pollution Control Centre or other facility approved by the Director.
2. In addition to any of the following specifications, limits, terms and conditions specified in this Licence, the Licencee shall, upon the request of the Director:
 - a) sample, monitor, analyze or investigate specific areas of concern regarding any segment, component or aspect of pollutant storage, containment, treatment, handling, disposal or emission systems, for such pollutants, ambient quality, aquatic toxicity, leachate characteristics and discharge or emission rates, and for such duration and at such frequencies as may be specified;
 - b) determine the environmental impact associated with the release of any pollutant from the Development; or
 - c) provide the Director, within such time as may be specified, with such reports, drawings, specifications, analytical data, descriptions of sampling and analytical procedures being used, bioassay data, flow rate measurements and such other information as may from time to time be requested.
3. The Licencee shall, unless otherwise specified in this Licence:
 - (a) carry out all preservations and analyses on liquid samples in accordance with the methods prescribed in the most current edition of "Standard Methods for the Examination of Water and Wastewater", or in accordance with an equivalent analytical methodology approved by the Director;
 - (b) ensure that all analytical determinations are undertaken by an accredited laboratory or a laboratory approved by the Director; and
 - (c) report the results of all monitoring and testing to the Director, in writing and in an electronic format acceptable to the Director, within 60 days of the samples being taken.
4. The Licencee shall submit all information required to be provided to the Director under this Licence, in writing, and in electronic format, in such form (including number of copies), and such content as may be required by the Director.
5. The Licencee shall, in an event where a physical or mechanical breakdown of the wastewater collection system or the wastewater treatment plant results in or may result in the discharge of raw or partly treated wastewater or in non-compliance with any specification, limit, term or condition of this Licence:

- a) notify the Director by facsimile or any other notification procedure approved by the Director, stating the nature of the event, the time and estimated duration of the event and the reason for the event as follows:
 - i) as soon as possible but no later than within 12 hours of the event; or
 - ii) before noon of the first business day following an event on a weekend or statutory holiday;
 - b) identify the repairs required to the wastewater collection system or the wastewater treatment plant; and
 - c) complete the repairs in accordance with any written instructions of the Director.
6. The Licencee shall carry out, as deemed necessary by the Director, any remedial measures or modifications in respect to matters authorized under this Licence.
7. The Licencee shall actively participate in any future watershed based management study, plan or environmental research or monitoring programs approved by the Director, for the Red River, the Assiniboine River, Lake Winnipeg and associated waterways and watersheds.
8. The Licencee shall:
 - a) develop an Emergency Response Plan (ERP) for the Development, in accordance with the "Manitoba Industrial Accidents Council (MIAC) Industrial Emergency Response Planning Guide";
 - b) submit the ERP for approval of the Director, in written and electronic format, on or before April 1st, 2005; and
 - c) implement the ERP in accordance with the approval of the Director, on or before April 1st, 2008.
9. The Licencee shall:
 - a) develop an Environmental Management System (EMS) for the Development;
 - b) submit the EMS plan for approval of the Director, in written and electronic format, on or before April 1st 2005; and
 - c) implement the EMS plan in accordance with the approval of the Director, on or before April 1st, 2008.
10. The Licencee shall not accept any leachate for treatment at the Development.
11. The Licencee shall operate and maintain the wastewater treatment lagoon in such a manner that:
 - a) the organic loading, as indicated by the five-day biochemical oxygen demand, is not in excess of 56 kilograms per hectare per day;
 - b) the depth of liquid in the cells does not exceed 1.5 metres; and
 - c) a 1.0 metre freeboard is maintained in the cells.

12. The Licencee shall not cause or permit an odour nuisance to be created as a result of the construction, operation or alteration of the wastewater treatment plant and shall take such steps as the Director may require to eliminate or mitigate an odour nuisance.
13. The Licencee shall not cause or permit a noise nuisance to be created as a result of the construction, operation or alteration of the wastewater treatment plant and shall take such steps as the Director may require to eliminate or mitigate a noise nuisance.

DESIGN AND CONSTRUCTION REQUIREMENTS

14. The Licencee shall:
 - a) submit an engineering report detailing the engineering plans for the upgrading of the wastewater treatment plant to meet effluent limits of this Licence, including nutrient removal (both nitrogen and phosphorous) and microbiological parameters as outlined in Clause 27, of this Licence, on or before December 31, 2004;
 - b) indicate to the Director, on or before December 31, 2004:
 - i) the maximum design hydraulic loading capacity of the upgraded wastewater treatment plant and components thereof, in cubic meters over any 24 hour period; and
 - ii) the maximum design organic loading capacity of the upgraded wastewater treatment plant and components thereof, in kilograms over any 24 hour period;
 - c) obtain approval by the Director for the engineering plans submitted pursuant to Clause 14(a) of this Licence; and
 - d) complete the construction and commissioning of the upgraded wastewater treatment plant on or before December 31st, 2006.
15. The Licencee shall notify the assigned Environment Officer prior to beginning construction of the alteration to the wastewater treatment plant. The notification shall include the intended starting date of construction and the name of the Licencee's contact person at the construction site.
16. The Licencee shall ensure that fuel storage and equipment servicing areas established for the construction of the alteration to the wastewater treatment plant are located a minimum distance of 100 metres from any waterbody, and shall comply with the requirements of Manitoba Regulation 188/2001 respecting Storage and Handling of Gasoline and Associated Products.
17. The Licencee shall construct instream works in accordance with the requirements of the May, 1996 publication "Manitoba Stream Crossing Guidelines for the Protection of Fish and Fish Habitat".

18. The Licencee shall, from the date of issuance of this Licence, pressure test the integrity of the connections of any underground piping, which is intended to transport wastewater under pressure, before such pipe connections are backfilled with earth and make repairs as required, in accordance with Clause 5 of this Licence.
19. The Licencee shall:
 - a) install or utilize existing security fencing, acceptable to the Director, to enclose the wastewater treatment plant or components thereof, that are not enclosed in a building with a security system acceptable to the Director; and
 - b) maintain the security system in a manner acceptable to the Director.
20. The Licencee shall:
 - a) submit a proposal for a leak detection program, on or before September 1, 2005, for existing pipes which transport wastewater via river crossings, to the Director, including leak detection technologies and monitoring practices to be implemented;
 - b) implement the leak detection program, as approved by the Director;
 - c) continuously measure and record the data gathered by the leak detection program; and
 - d) repair and replace all portions of the existing piping where leaks are detected in accordance with Clause 5 of this Licence.
21. The Licencee shall, from the date of issuance of this Licence, construct and maintain new pipes which transport wastewater via river crossings by taking the following actions:
 - a) submit a proposal for a leak detection program, for the approval of the Director, including leak detection technologies and monitoring practices to be applied;
 - b) construct and maintain a sleeve encasement around the piping;
 - c) implement the leak detection program, as approved by the Director;
 - d) continuously measure and record the data gathered by the leak detection program; and
 - e) repair and replace all portions of the piping where leaks are detected in accordance with Clause 5 of this Licence.
22. The Licencee shall:
 - a) prepare "as constructed drawings" for the wastewater treatment plant and label the drawings "As Constructed"; and
 - b) provide to the Director, on or before December 31, 2007, two copies of the "as constructed drawings" of the wastewater treatment plant including effluent discharge pipeline.

SPECIFICATIONS, LIMITS, TERMS AND CONDITIONS

23. The Licencee shall, from the date of issuance of this Licence until and including December 31st, 2006:
- a) limit the influent wastewater loading on the secondary wastewater treatment process of the wastewater treatment plant, excluding the wastewater treatment lagoon, as follows:
 - i) the hydraulic loading not to exceed 54,000 cubic meters over any 24 hour period; and
 - ii) the organic loading not to exceed 10,560 kilograms of five-day biochemical oxygen demand (BOD₅) for any 24-hour period;
 - b) limit the influent wastewater loading to the wastewater treatment plant, such that the maximum hydraulic loading does not exceed 112,000 cubic meters over any 24 hour period.
24. The Licencee shall:
- a) construct and make available for use by an Environment Officer, a secured and heated influent monitoring station with direct access to the influent wastewater pipelines;
 - b) construct and make available for use by an Environment Officer, a secured and heated influent monitoring station with direct access to the secondary wastewater treatment process;
 - c) ensure that the monitoring stations are accessible to an Environment Officer at all times;
 - d) install and maintain a flow measuring device at each monitoring station or at a location acceptable to the Director which is capable of measuring the volume of influent with an accuracy of ± 2 percent;
 - e) have the flow measuring devices re-calibrated every two years or on the request of an Environment Officer;
 - f) submit to the Director a certificate of calibration, signed by a person qualified to calibrate the flow measuring device, for each flow measuring device within two weeks of the completion of each calibration, identifying the plus or minus percent error associated with each calibrated flow measuring device; and
 - g) ensure that the monitoring stations are each equipped with a flow-proportional sampling device equipped to function with the flow measuring device and have the sampling device available on request for use by an Environment Officer.
25. The Licencee shall:
- a) construct and make available for use by an Environment Officer, a secured and heated effluent monitoring station, with direct access to the effluent discharge pipeline at a location acceptable to the Director;

- b) ensure that the monitoring station is accessible to an Environment Officer at all times;
 - c) install and maintain a continuous flow measuring device, equipped with an interface compatible with departmentally owned ISCO sampler, at the monitoring station or at a location acceptable to the Director which is capable of measuring the volume of effluent with an accuracy of ± 2 percent;
 - d) have the flow measuring device re-calibrated every two years or on the request of an Environment Officer;
 - e) submit to the Director a certificate of calibration, signed by a person qualified to calibrate the flow measuring device, for each flow measuring device within two weeks of the completion of each calibration, identifying the plus or minus percent error associated with each calibrated flow measuring device; and
 - f) ensure that the monitoring station is equipped with a flow-proportional sampling device equipped to function with the flow measuring device and have the sampling device available on request for use by an Environment Officer.
26. The Licencee shall, from the date of issuance of this Licence until and including December 31st, 2006, not discharge effluent from the wastewater treatment plant, as sampled in the effluent monitoring station located before the effluent discharge pipeline leading to the Assiniboine River where:
- a) the organic content of the effluent, as indicated by the five-day carbonaceous biochemical oxygen demand (CBOD₅), is in excess of 25 milligrams per litre; and
 - b) the total suspended solids content of the effluent is in excess of 45 milligrams per litre.
27. The Licencee shall, on and after January 1st, 2007, not discharge effluent from the wastewater treatment plant, as sampled in the effluent monitoring station located before the effluent discharge pipeline leading to the Assiniboine River where:
- a) the organic content of the effluent, as indicated by the five-day carbonaceous biochemical oxygen demand (CBOD₅), is in excess of 25 milligrams per litre;
 - b) the total suspended solids content of the effluent is in excess of 30 milligrams per litre;
 - c) the fecal coliform content of the effluent, as indicated by the MPN index, is in excess of 200 per 100 millilitres of sample, as determined by the monthly geometric mean of 1 grab sample collected at equal time intervals on each of a minimum of 3 consecutive days per week;
 - d) the E. coli content of the effluent, as indicated by the MPN index, is in excess of 200 per 100 millilitres of sample, as determined by the monthly geometric mean of 1 grab sample collected at equal time intervals on each of a minimum of 3 consecutive days per week;

- e) the concentration of total phosphorus of the effluent is in excess of 1 milligram per litre as determined by the thirty-day rolling average;
- f) the concentration of total nitrogen of the effluent is in excess of 15 milligrams per litre as determined by the thirty-day rolling average; and
- g) the ammonia nitrogen content (as N) of the effluent is in excess of the following limits:

<u>Period</u>	<u>Ammonia Nitrogen (as N)</u> (kilograms/any 24 hour period)
January	2212
February	2628
March	2744
April	2897
May	1673
June	881
July	518
August	308
September	453
October	603
November	1021
December	1636

28. The Licencee shall not release a quality of effluent from the wastewater treatment plant which:
- a) on any day, causes, or contributes to, the mixing zone for the effluent in the Assiniboine River being acutely lethal to aquatic life passing through the mixing zone; or
 - b) on or after December 31st, 2006, can be demonstrated to be acutely lethal to fish within the mixing zone for the effluent in the Assiniboine River by using a 96-hour static acute lethality test which results in mortality to more than 50 percent of the test fish exposed to 100 percent concentration of effluent, with the test carried out in accordance with the protocol outlined in Environment Canada's "Biological Test Method: Reference Method for Determining Acute Lethality of Effluents to Rainbow Trout: EPS 1/RM/13 Second Edition – December 2000" or any future amendment thereof.

MONITORING REQUIREMENTS

29. The Licencee shall:
- a) continuously measure and record the volume of the wastewater discharged from the wastewater treatment plant every day;

- b) take one flow proportional composite sample of effluent over a 24 hour period from the wastewater treatment plant every day;
- c) have the samples analyzed for CBOD₅, total suspended solids, total nitrogen, total phosphorus, ortho phosphorus and ammonia nitrogen content;
- d) calculate the daily ammonia nitrogen load (kilograms per day), and the thirty-day rolling average values for total nitrogen and total phosphorus for the day during which samples were collected;
- e) prepare a monthly report on:
 - i) the daily, average, peak, minimum and total monthly volume of wastewater discharged from the wastewater treatment plant; and
 - ii) the CBOD₅, total suspended solids, ortho phosphorus, thirty-day rolling average total nitrogen, thirty-day rolling average total phosphorus and ammonia nitrogen loads; and
- f) file a copy of the report with the Director within 30 days of the end of each month during which the concentrations and loads were determined.

30. The Licencee shall:

- a) once each day, when flows exceed the 75th percentile of the thirty-day rolling average maximum daily flow, collect a grab sample of effluent from the effluent monitoring station;
- b) have the grab sample analyzed for pH and temperature, fecal coliform content, and E. coli content;
- c) determine and record the monthly geometric mean for each of the fecal coliform and E. coli counts based on all the data collected during each month, from a minimum of 12 grab samples; and
- d) report the results to the Director within 30 days of the end of the month during which the samples were taken.

31. The Licencee shall:

- a) once every 3 months, collect a grab sample of the influent, at each influent monitoring station, and a grab sample of the effluent, at the effluent monitoring station at the wastewater treatment plant;
- b) have both the influent and effluent samples analyzed for the concentration of the parameters identified in Schedule A of this Licence; and
- c) report the results to the Director in an annual report within 60 days of the end of the 12 month sampling period.

32. The Licencee shall:

- a) once every 3 months in accordance with the protocol outlined in Environment Canada's "Biological Test Method: Reference Method for Determining Acute Lethality of Effluents to Rainbow Trout: EPS 1/RM/13 Second Edition – December 2000", or any future amendment thereof, collect a bioassay sample of the effluent from the effluent monitoring station at the wastewater treatment plant, and test the sample at 100 percent concentration

- for acute lethality; and
- b) report the results to the Director in an annual report within 60 days of the end of the 12 month sampling period.
33. The Licencee shall within six months of the date of issuance of this Licence:
- a) maintain a record of all wastewater hauled to the wastewater treatment plant, including the number of loads on a daily and weekly basis, the volume of each load, the name of the hauler, and the source of the contents of each load according to the type of waste and the name and location of each property serviced;
- b) make all records available to an Environment Officer upon request; and
- c) submit an annual report of all the waste hauling information to the Director within 60 days of the end of the 12 month period.
34. The Licencee shall:
- a) submit a plan, on or before December 31, 2006 for a phased sewer upgrade management program to the Director for approval; and
- b) implement the phased sewer upgrade management program in accordance with the approval of the Director, on or before December 31, 2011.

REVIEW OR REVOCATION

- A. This Licence replaces Licence No. 2669 E R which is hereby rescinded.
- B. If, in the opinion of the Director, the Licencee has failed or is failing to comply with any of the specification, limits, terms or conditions set out herein, the Director may, temporarily or permanently, revoke this Licence.
- C. This Licence shall be reviewed, by the Director, within two (2) years of the date of issuance of this Licence and subsequently every three (3) years thereafter.
- D. If, in the opinion of the Director, new evidence warrants a change in the specifications, limits, terms or conditions of this Licence, the Director may require the filing of a new proposal pursuant to Section 11 of The Environment Act.

CONSOLIDATION UPDATE: SEPTEMBER 22, 2010

CITY OF WINNIPEG

SEWER BY-LAW
NO. 92/2010

TABLE OF CONTENTS

Part 1 Introduction

Short title	section 1
Definitions and interpretation	section 2

Part 2 Authority

Inspecting and enforcing the By-law	section 3
Authority to control flooding	section 4
Emergency entries allowed	section 5

Part 3 General

Monitoring requirements	section 6
Sampling and analytical requirements	section 7
Record search	section 8
Permits, licences and authorizations	section 9
Suspending and cancelling a permit, licence or authorization	section 10
Emergency suspensions of a permit, licence or authorization	section 11
Cost of complying with this By-law	section 12
Responsibility for complying with this By-law	section 13
Dilution prohibited	section 14
Restrictions on withdrawing wastewater	section 15
Restrictions on withdrawing land drainage	section 16
Fees, rates, charges, and deposits	section 17
Payment locations	section 18

Part 4 Sewer Contractor's Licence Requirements

Sewer Contractor's Licence required	section 19
Licence requirements	section 20

Part 5 Construction Requirements

Authorization and Service Permit required to install or reuse private sewer service pipe or private land drainage system	section 21
Complying with construction standards required	section 22
Inspection required before backfilling	section 23
Requirements for abandoning or reusing private sewer service pipes when buildings are demolished or moved	section 24
Requirements for blocking unused private sewer service pipes	section 25
Requirements for reusing private sewer service pipes	section 26

Part 6 Connection Requirements

Responsibility for complying with this Part	section 27
All properties to be connected to wastewater sewer	section 28
Requirements for non-conforming private sewer service pipes	section 29
Temporary above-ground wastewater connections permitted	section 30
Property to be connected to land drainage sewer or combined sewer	section 31
Temporary above-ground land drainage connections permitted	section 32
Property previously served by on-site wastewater management system	section 33
Requirement to abandon a non-conforming private sewer service pipe and connect to the wastewater system	section 34
Connection charge	section 35
Owner responsible for private sewer service pipe	section 36
Repair and replacement of pipe under street	section 37
Interconnection of wastewater and land drainage private sewer service pipes prohibited	section 38

Part 7 Discharges of Wastewater

Responsibility for complying with this Part	section 39
Wastewater must be discharged to wastewater system	section 40
Wastewater discharges to wastewater system restricted	section 41
Wastewater Discharge Licence required	section 42
Discharge rate limits	section 43
Overstrength Discharge Licence required	section 44
Surcharges for select overstrength wastewater substances	section 45
Grease interceptors required	section 46
Oil interceptors required	section 47
Sediment interceptors required	section 48
Oil, grease or sediment interceptor design specifications	section 49
Oil, grease and sediment interceptor maintenance specifications	section 50
Dental waste amalgam separator required	section 51
Food waste grinder discharge restrictions	section 52
Swimming pool water discharge restrictions	section 53

Part 8 Discharges of Land Drainage

Responsibility for complying with this Part	section 54
Land drainage must be discharged to land drainage system	section 55
Land drainage discharges to land drainage system restricted	section 56
Land Drainage Discharge Licence required	section 57
Downspout Discharge Licence required	section 58
Sump Pump Discharge Licence required	section 59
Discharge rate limits	section 60
Overland discharge authorization required	section 61
Catch basin maintenance required	section 62

Part 9 Spills

Obligation to notify the City	section 63
Containing and cleaning up the spill	section 64
Preparing and submitting a written report	section 65

Part 10 Hauled Wastewater

No discharge except at designated sites	section 66
Wastewater Hauler's Licence required	section 67
Wastewater Disposal Vehicle Licence required	section 68
Responsibilities of wastewater haulers	section 69
Responsibility of generators of hauled wastewater	section 70
Non-household hauled wastewater disposal fee	section 71

Part 11 Pollution Prevention Planning

Definitions	section 72
Scope of this Part	section 73
Plan required	section 74
Form and content of Plan	section 75
Requirements if Plan is rejected	section 76
Notice of change in information required	section 77
Renewing the Plan	section 78
Spills and other contraventions	section 79
Regular submission of progress updates	section 80
Requirements if progress update does not contain adequate information	section 81
Consequences if business does not achieve progress	section 82
Storage of Plans and progress updates	section 83
Termination of obligation to engage in pollution prevention planning	section 84
Consequences of violating this Part	section 85
Enforcement actions against businesses governed by this Part	section 86

Part 12 Sewer Charges

Sewer charge imposed	section 87
Adjustment of sewer charges	section 88
Large volume sewer credit program	section 89
City meters	section 90
Private meters	section 91
Collection of outstanding sewer charges	section 92

Part 13 Administration, Enforcement and Other Provisions

Compliance orders	section 93
Service address	section 94
Obstructing work prohibited	section 95
Damage to and obstruction of sewer prohibited	section 96
Penalties for violating By-law	section 97
Appeals	section 98
Director's powers – flooding prevention	section 99

Part 14 Repeals and Coming Into Force

Sewer By-law No. 7070/97 repealed	section 100
Schedules	section 101
Coming into force	section 102

Schedule A Substances Prohibited in Discharges to Wastewater System

Schedule B Concentration Limits for Discharges into the Wastewater System

Schedule C Substances Prohibited in Discharges to the Land Drainage System

Schedule D Limits for Discharges to Land Drainage System

Schedule E Business Sectors Required to Prepare Pollution Prevention Plans Under Part 11

This document is an office consolidation of by-law amendments which has been prepared for the convenience of the user. The City of Winnipeg expressly disclaims any responsibility for errors or omissions.

CONSOLIDATION UPDATE: SEPTEMBER 22, 2010

THE CITY OF WINNIPEG

SEWER BY-LAW
NO. 92/2010

A By-law of THE CITY OF WINNIPEG to regulate the use of the City of Winnipeg's wastewater system and land drainage system

THE CITY OF WINNIPEG, in Council assembled, enacts as follows, namely:

PART 1
INTRODUCTION

Short Title

1 This By-law may be cited as the "**Sewer By-law**".

Definitions and interpretation

2(1) In this By-law:

"American Public Health Association" or **"APHA"** means the American Public Health Association founded in 1872, or any successor association.

"American Water Works Association" or **"AWWA"** means the American Water Works Association founded in 1881, or any successor association.

"biochemical oxygen demand" or **"BOD"** means the quantity of oxygen used in the biochemical oxidation of organic matter under standard laboratory conditions for five days at a temperature of 20 degrees Celsius.

"biosolids" means the digested and dewatered residual solid material resulting from the treatment of municipal sewage at a wastewater treatment facility.

"blowdown water" means recirculated water discharged from a cooling or heating water system to:

- (a) control the level of water in the system; or
- (b) discharge materials from the system which might otherwise build up and harm the operation of the system.

"Canadian Standards Association" or **"CSA"** means the Canadian Standards Association founded in 1919, or any successor association.

"catch basin" means an inlet to the land drainage system or the combined sewer system that is designed to capture sediment, debris and associated pollutants from incoming land drainage. A catch basin includes a sump, and may include a grate or curb inlet.

"City" means the municipal corporation of the City of Winnipeg.

"city" means land within the boundaries of the City of Winnipeg.

"combined sewer" means a common sewer that is designed to accept both wastewater and land drainage. It forms part of the wastewater system.

"combustible gas meter" means an instrument capable of determining the percentage of the lower explosive limit for a combustible gas or vapour in air.

"common sewer" means a wastewater sewer or combined sewer that:

- (a) is designed to collect wastewater directly from private sewer service pipes; and
- (b) is not an interceptor sewer.

"connecting" in the context of a property, means installing a private sewer service pipe to discharge wastewater or land drainage from a property into the wastewater sewer or land drainage sewer.

"cooling water" means water that is used to reduce temperature in an enclosed system.

"Department" means the Water and Waste Department.

"designated employee" means the Director of the Water and Waste Department and any employee of the City of Winnipeg who has been authorized by the Director to administer and enforce all or part of this By-law.

"Director" means the Director of the Water and Waste Department.

"Downspout Discharge Licence" means a licence issued under Part 8 of this By-law allowing drainage from a downspout to be discharged to a wastewater sewer.

"explosive" means a substance that is listed under Class 1 of *The Transportation of Dangerous Goods Act* (Canada).

"flammable liquid" has the same meaning as in regulations under *The Dangerous Goods Handling and Transportation Act* (Manitoba).

"flammable solid" has the same meaning as in regulations under *The Dangerous Goods Handling and Transportation Act* (Manitoba).

"food service establishment" means any place, other than a housing unit, where food is manufactured or prepared. Food service establishments include bakeries, restaurants, catering operations, retail food stores, hotels, commissaries, canteens, and temporary food service operations.

"gas (Class 2)" has the same meaning as in regulations under *The Dangerous Goods Handling and Transportation Act* (Manitoba).

"generator" means the person responsible for the generation of land drainage or wastewater and includes the owner and the occupant of property from which land drainage or wastewater enters the wastewater system or land drainage system.

"greywater" means untreated, used household water that does not contain human waste and does not come from a toilet or urinal. It includes water from:

- (a) appliances, such as dishwashers or washing machines; and
- (b) plumbing fixtures such as sinks, bathtubs and showers.

"groundwater" means water beneath the earth's surface that has accumulated through seepage.

"hailed wastewater" means wastewater transported by vehicle.

"hazardous waste" has the same meaning as in *The Dangerous Goods Handling and Transportation Act* (Manitoba).

"heating water" means water used to increase temperature in an enclosed system.

"housing unit" means a residence, with cooking facilities, designed for an individual or a family. It includes single-family homes, duplexes, apartments, condominiums, but not hotels, hostels, or residential care facilities.

"infectious or toxic" has the same meaning as in *The Dangerous Goods Handling and Transportation Act* (Manitoba).

"interceptor" means a receptacle or trap installed to intercept and separate specific material and prevent it from passing into a land drainage system or a wastewater system.

"interceptor sewer" means a sewer:

- (a) designed to carry wastewater from common sewers to a wastewater treatment plant and not to collect wastewater from private sewer service pipes; and
- (b) that has been designated as such by the Director.

"land drainage" means water that has not been mixed with wastewater, including:

- (a) surface water, including rainwater and snowmelt; and
- (b) groundwater, including water from weeping tiles and well water.

"Land Drainage Discharge Licence" means a licence issued under Part 8 of this By-law that allows the discharge of land drainage into a wastewater sewer.

"land drainage sewer" means a sewer that carries only land drainage.

"land drainage system" means all City works and processes for collecting, controlling, carrying and disposing of land drainage, including ditches, swales, land drainage sewers, street gratings, catch basins, manholes, stormwater retention basins, pump stations, control weirs, gates, and associated works and overflow structures. It does not include private sewer service pipes.

"landfill leachate" means the liquid containing dissolved or suspended contaminants produced by solid waste or by water passing through solid waste.

"lower explosive limit" means the lowest concentration of vapour or gas in air that will explode or burn when ignited.

"natural oil and grease" means fats, waxes or oils from animal or vegetable sources.

"non-conforming private sewer service pipe" means a private sewer service pipe not connected to an adjacent common sewer.

"nonylphenols" means the total of nonylphenols and t-octylphenol as analyzed by liquid chromatography-mass spectrometry (LC-MS).

"nonylphenol ethoxylates" means the total of nonylphenol ethoxylates, as analyzed by liquid chromatography-mass spectrometry (LC-MS), including nonylphenol diethoxylates, nonylphenol monoethoxylates, nonylphenol triethoxylate, t-octylphenol diethoxylate, t-octylphenol monoethoxylate, and t-octylphenol triethoxylate.

"on-site wastewater management system" has the same meaning as in the *On-site Wastewater Management System Regulation*, Manitoba Regulation 83/2003.

"overstrength wastewater" means wastewater which contains substances with concentrations that exceed the limits set out in Schedule B.

"Overstrength Discharge Licence" means a licence issued under Part 7 of this By-law that permits the discharge of overstrength wastewater.

"owner", unless otherwise stated, means an owner of real property as defined in *The City of Winnipeg Charter*.

"oxidizing substance and organic peroxide" has the same meaning as in regulations under *The Dangerous Goods Handling and Transportation Act* (Manitoba).

"person" means an individual, firm, partnership, association or other body, whether incorporated or unincorporated.

"pesticide" means a product registered under the *Pest Control Products Act* (Canada).

"phenolics" means the total of all phenolic compounds as determined by the 4-aminoantipyrine method (4AAP method).

"private land drainage system" means works or processes for collecting, controlling, carrying or disposing of land drainage that are not owned or operated by the City.

"private sewer service pipe" means a pipe, or system of pipes, and related components which carries wastewater or land drainage underground from its source on private property to the wastewater system or the land drainage system. It includes a non-conforming private sewer service pipe.

"property" means all or part of real property identified on a street address.

"quarter" means a period of three consecutive months.

"radioactive material" means a substance listed under Class 7 in the *Transportation of Dangerous Goods Act (Canada)*.

"regular working hours" means Monday to Friday, 8:30 a.m. to 4:30 p.m., except holidays that are recognized in the current collective agreement between the City and the Canadian Union of Public Employees.

"residential", in relation to land, means properties on which single-family, two-family and multiple-family dwellings are located, except where otherwise specified.

"Service Permit" means a permit issued under section 21.

"sewage" means liquid wastes from residential, industrial, commercial, or institutional sources.

"sewer" means a pipe that:

- (a) accepts wastewater or land drainage or both; and
- (b) is part of either the wastewater system or the land drainage system.

It does not include a private sewer service pipe.

"Sewer Contractor's Licence" means a licence issued by a designated employee under Part 4 of this By-law that authorizes a contractor to work on a private sewer service pipe, the wastewater system, or the land drainage system.

"sewer rate" means the price per cubic metre established by City Council used to calculate the sewer charge.

"single-family or two-family property" means a property on which a single-family or two-family dwelling is located, but not a property on which a multiple-family dwelling is located.

"spill" means an accidental, abnormal or inadvertent discharge that:

- (a) violates this By-law; and
- (b) has entered or could enter the wastewater or land drainage systems.

"Standard Construction Specifications" means the current edition of the *City of Winnipeg Standard Construction Specifications* posted on the City's web site.

"Standard Methods for the Examination of Water and Wastewater" means the current edition of *Standard Methods for the Examination of Water and Wastewater* as published jointly by the American Public Health Association, the American Water Works Association, and the Water Environment Federation.

"street" has the same meaning as in *The City of Winnipeg Charter* and includes roadways, sidewalks, ditches, and boulevards.

"Sump Pump Discharge Licence" means a licence issued under Part 8 of this By-law allowing the sump pit water to be discharged to a wastewater sewer.

"swimming pool water" means water from swimming pools, wading pools, hot tubs, or spas.

"synthetic or petroleum oil and grease" means fats, waxes or oils that are not natural oil or grease.

"total nitrogen" means the sum of ammonia, nitrite, nitrate, and organic nitrogen.

"total polycyclic aromatic hydrocarbons" means the total of acenaphthene, acenaphthylene, acenaphthylene, acridine, anthracene, benzo(a)anthracene, benzo(a)pyrene, benzo(b)fluoranthene, benzo(b&j)fluoranthene, benzo(ghi)perylene, benzo(k)fluoranthene, chrysene, dibenzo(ah)anthracene, fluoranthene, fluorene, indeno(1,2,3 cd)pyrene, 1-methyl naphthalene, 2- methyl naphthalene, naphthalene, phenanthrene, pyrene and quinoline.

amended 117/2010

"total phosphorus" means the sum of all forms of phosphorus in a substance.

"total polychlorinated biphenyls" means the sum of all chlorobiphenyls that have more than two chlorine atoms. Total polychlorinated biphenyls are reported as Aroclor types.

"total purgeable hydrocarbons" means the sum of all volatile hydrocarbon compounds with carbon numbers up to C10 in a substance, and includes volatile aromatics.

"total semivolatile hydrocarbons" means the sum of all hydrocarbons with a carbon number from C11 to C20 in a substance.

"total suspended solids" or **"TSS"** means the total amount of solids per litre in wastewater retained by a filter.

"wastewater" means a mixture of water and water-carried waste. It includes:

- (a) sewage;
- (b) greywater;
- (c) swimming pool water;
- (d) heating water;
- (e) cooling water;
- (f) land drainage that contains any of the substances set out in Schedule C or contains substances with concentrations that exceed the limits set out in Schedule D; and
- (g) any water that has come into contact with sewage, greywater, swimming pool water, heating water, or cooling water.

"Wastewater Discharge Licence" means a licence issued under Part 7 of this By-law that permits the discharge of wastewater into the land drainage system.

"Wastewater Disposal Vehicle Licence" means a licence issued under Part 10 of this By-law for a vehicle used to discharge hauled wastewater.

"wastewater sewer" means a sewer that carries only wastewater. It includes a common sewer and an interceptor sewer.

"wastewater system" means all City works and processes for collecting, storing, carrying, pumping, treating or disposing of wastewater. It does not include private sewer service pipes.

"Water and Waste Department" means the department of the City responsible for collecting and treating wastewater and managing land drainage.

"Water Environment Federation" or **"WEF"** means the Water Environment Federation headquartered in Alexandria, Virginia, or any successor organization.

"waterway" means a body of water located on public property, and includes:

- (a) a river, stream, creek, canal, ditch, swale, water channel, pond or stormwater retention basin, whether natural, constructed or altered; and
- (b) the frozen surface or bed of a river, stream, creek, canal, ditch, swale, water channel, pond or stormwater retention basin.

"weeping tiles" means a system for collecting or carrying groundwater around a building.

"work" includes the act of:

- (a) installing, abandoning, altering, enlarging, repairing or renewing all or part of a private sewer service pipe, the wastewater system or the land drainage system; or
- (b) connecting a private sewer service pipe to the wastewater system or land drainage system.

2(2) For the purposes of the definitions set out in section 2, quantities of substances are determined in accordance with tests and expressed in units of measurement set out in *Standard Methods for the Examination of Water and Wastewater*.

PART 2 AUTHORITY

Inspecting and enforcing the By-law

3(1) Designated employees may conduct inspections, administer and enforce this By-law, or remedy a violation of this By-law. For these purposes, they have the powers of a designated employee under *The City of Winnipeg Charter*.

3(2) The powers given to designated employees in subsection (1) include the authority, after giving reasonable notice, to:

- (a) enter upon private property at any reasonable time;
- (b) inspect meters provided by the City of Winnipeg or private meters installed under sections 88, 90 and 91; and
- (c) collect and analyze samples of:
 - i) wastewater;
 - ii) land drainage; or
 - iii) matter being discharged, or capable of being discharged, into the wastewater system or land drainage system.

3(3) The powers given to designated employees in subsection (1) include the power to prevent or stop a vehicle from discharging hauled wastewater into a discharge point if there are reasonable grounds to believe that the discharge will violate or is violating the By-law, including conditions placed on a Wastewater Disposal Vehicle Licence.

Authority to control flooding

4 Despite any other provision of this By-law, a designated employee may allow or cause wastewater or land drainage to flow into a waterway in order to control flooding.

Emergency entries allowed

5 In an emergency that affects human health or safety, property, or the environment, a designated employee may enter a property without notice to:

- (a) inspect, block, maintain or remove any sewer, or anything connected to it;
- (b) construct, repair or enlarge dikes;
- (c) take other actions to meet the emergency and to eliminate or reduce its effects.

PART 3 GENERAL

Monitoring requirements

6 Where an access point is necessary to observe, sample or measure wastewater, at the direction of a designated employee, the owner or occupant of a property must:

- (a) construct or install a suitable access point, following plans and specifications approved by the designated employee; and
- (b) maintain the access point in a safe condition and ensure that it is accessible to a designated employee at all reasonable times.

Sampling and analytical requirements

7(1) All measurements, tests and analyses required or authorized under this By-law must follow the *Standard Methods for the Examination of Water and Wastewater*.

7(2) If *Standard Methods for the Examination of Water and Wastewater* does not contain an appropriate test or analysis, a designated employee is authorized to determine one.

7(3) If more than one procedure, test or analysis is set out in *Standard Methods for the Examination of Water and Wastewater*, a designated employee is authorized to determine which one to use.

7(4) Samples must be taken at an access point, or other location determined by a designated employee.

7(5) When making a determination under subsection (2), (3) or (4), the designated employee must take into account:

- (a) cost and practicality; and
- (b) the accuracy of the result.

7(6) In the absence of evidence to the contrary, samples taken from wastewater discharged from a property are presumed to be characteristic of all of the wastewater discharged into the wastewater system from that property.

Record search

8(1) Upon payment of the applicable fee, the property owner or agent is entitled to receive the current account status or account history for the property for the previous five years. If available, additional years of account history may be provided upon payment of the applicable fee.

8(2) Upon payment of any applicable fee, any person is entitled to receive the following information to the extent that it is not prohibited from being released by *The Freedom of Information and Protection of Privacy Act*:

- (a) the results of an environmental record search, including:
 - i) contraventions of this By-law or its predecessor By-laws contained in non-archived records maintained by the Department;
 - ii) outstanding compliance orders under this By-law or its predecessor; and
 - iii) records of spills contained in non-archived records maintained by the Department;
- (b) the location of private sewer service pipes and common sewers, and other similar information known to the Department;

- (c) information about a property's service agreement for water and sewer services.

Permits, licences and authorizations

9(1) When a permit, licence or authorization is required by or under this By-law, a designated employee may issue or renew the permit, licence or authorization if:

- (a) the applicant provides the information required to assess the application;
- (b) the applicant pays the applicable fee for the permit, licence or authorization; and
- (c) the application meets the requirements set out in this By-law.

9(2) A designated employee must not renew a permit, licence or authorization if the applicant's existing permit, licence or authorization:

- (a) is suspended; or
- (b) has been cancelled and the period of time referred to in subsection 10(5) has not expired.

9(3) A designated employee may issue or renew a permit, licence or authorization, with or without conditions, for either an indefinite or a limited period of time.

9(4) If a designated employee imposes conditions on a licence, permit or authorization under subsection (3), the conditions:

- (a) must be related to:
 - i) the criteria for issuing the permit, licence or authorization; or
 - ii) administering or enforcing this By-law; and
- (b) may take into account the previous relevant conduct of the applicant.

9(5) Conditions imposed under clause 9(4)(a) may include the requirement that the holder of the licence, permit or authorization indemnify the City for loss, harm, damage and other consequences that could result from actions taken under the licence, permit or authorization.

9(6) The holder of a permit or authorization must comply with any conditions imposed on the permit, licence or authorization.

9(7) It is a condition of any permit, licence or authorization issued under this By-law that the applicant consent to the entry of a designated employee to the property at any reasonable time, without notice, in order to conduct an inspection or otherwise administer or enforce this By-law.

9(8) Subject to different requirements imposed as a condition of the permit, licence or authorization, the holder of the permit, licence or authorization must, within ten business days, inform a designated employee of any changes to the information submitted in the application, and a failure to do so voids the permit, licence or authorization.

Suspending and cancelling a permit, licence or authorization

10(1) In this section and section 11:

"suspension" means that the permit, licence or authorization is temporarily ineffective for a specified period of time.

"cancellation" means that the permit, licence or authorization no longer exists and the person must reapply for a new permit, licence or authorization in order to legally carry out the activity for which a permit, licence or authorization is required.

10(2) Unless otherwise specified in this By-law or in the licence, permit or authorization, a licence, permit or authorization is automatically:

- (a) suspended if fees associated with the permit, licence or authorization have been outstanding for more than 30 days;
- (b) cancelled if the fees associated with the permit, licence or authorization have been outstanding for more than 60 days.

10(3) A designated employee may suspend or cancel a permit, licence or authorization if:

- (a) the holder of the permit, licence or authorization has failed to comply with this By-law, the Water Works By-law, the Lot Grading By-law, other relevant legislation, or conditions imposed on the licence, permit or authorization;
- (b) the applicant provided false or misleading information in the application that had an effect on the decision to grant the permit, licence or authorization;

- (c) the past conduct of the holder of the permit, licence or authorization creates a reasonable concern that the authorized activity will not comply with this By-law, another by-law, other relevant legislation, or conditions imposed on the licence, permit or authorization; or
- (d) an activity authorized by the permit, licence or authorization poses a risk to human health or safety, property, or the environment.

10(4) Before suspending or cancelling a permit, licence or authorization under subsection (3), the designated employee must:

- (a) notify the holder of the permit, licence or authorization in writing that suspending or cancelling the permit, licence or authorization is being considered;
- (b) provide in writing the reasons why suspending or cancelling the permit, licence or authorization is being considered; and
- (c) give the holder of the permit, licence or authorization a reasonable opportunity to be heard.

10(5) If a designated employee decides to cancel a permit, licence or authorization, he or she must identify a date before which, or a time frame within which, the holder is not permitted to reapply for the permit, licence or authorization.

10(6) A decision concerning the suspension or cancellation of a permit, licence or authorization must be sent to the holder of the permit, licence or authorization in accordance with *The City of Winnipeg Charter* and is subject to appeal to the Standing Policy Committee on Infrastructure Renewal and Public Works.

Emergency suspensions of a permit, licence or authorization

11(1) A designated employee may, without notice and without a hearing, suspend a permit, licence or authorization for up to 30 days if an activity authorized by the permit, licence or authorization poses an immediate and substantial risk to human health or safety, property, or the environment. After imposing an emergency suspension, the designated employee must:

- (a) immediately notify the holder of the permit, licence or authorization:
 - i) of the suspension;
 - ii) of the date the suspension will expire;

- iii) of the reasons why the designated employee has concluded that the activity authorized by the permit, licence or authorization poses an immediate and substantial risk to human health or safety, property, or the environment; and
 - iv) of the actions that must be taken or circumstances that must exist, if any, that will result in the suspension being lifted before the expiration date;
- (b) lift the suspension as soon as the immediate and substantial risk to human health or safety, property, or the environment no longer exists.

11(2) A designated employee may, without notice and without a hearing, suspend a permit, licence or authorization for up to 30 days if the information submitted in the application was incorrect and, had the correct information been known, the permit, licence or authorization would not have been issued. After imposing an emergency suspension, the designated employee must:

- (a) immediately notify the holder of the permit, licence or authorization:
 - i) of the suspension;
 - ii) of the date the suspension will expire; and
 - iii) of the incorrect information submitted in the application;
- (b) lift the suspension if it was imposed in error.

11(3) Unless it is lifted earlier by the designated employee, an emergency suspension imposed under this section expires 30 days after it has been imposed. However, if the designated employee is considering imposing a suspension or cancellation under section 10 and the holder of the licence, permit or authorization requests that his or her opportunity to be heard be deferred to a date beyond the 30 day period, the designated employee may extend the suspension for up to an additional 60 days to accommodate this request.

Cost of complying with this By-law

12 Wherever an obligation is imposed on a person by this By-law, the cost of complying is the responsibility of that person, and not the City.

Responsibility for complying with this By-law

13(1) Unless an obligation or requirement is imposed on a particular person, the obligations and requirements set out in this By-law apply to every person.

13(2) If there is a requirement placed on a person by this By-law:

- (a) an agent may act on behalf of that person to meet the requirement; but
- (b) the person is responsible to meet the requirement even if an agent is acting on his or her behalf.

13(3) A requirement imposed by this By-law on a generator of wastewater or land drainage, including an owner or occupant of property, includes the obligation not to permit the requirement to be violated by another person.

Dilution prohibited

14(1) A person must not dilute wastewater or land drainage with water or any other material in order to comply with the discharge limits set out in this By-law unless a designated employee has given written permission for the dilution.

14(2) A designated employee may not grant written permission for wastewater or land drainage to be diluted if the substance being diluted is subject to a surcharge under this By-law or if the diluted discharge is likely to:

- (a) pose a risk of harm to human health or safety, property, or the environment;
- (b) interfere with the operation or maintenance of the wastewater system or the land drainage system;
- (c) damage the wastewater system or the land drainage system;
- (d) prevent the City from meeting limits imposed by the Province of Manitoba or Government of Canada for disposal of liquid to waterways or of biosolids to land.

14(3) Where wastewater or land drainage has been diluted in violation of subsection (1), the owner or occupant of the property from which the diluted wastewater is being discharged is responsible for the contents of the wastewater as if it had not been diluted.

Restrictions on withdrawing wastewater

15(1) A person must not withdraw or use wastewater from the wastewater system without the written permission of a designated employee.

15(2) A designated employee may grant written permission for wastewater to be withdrawn from the wastewater system for legitimate scientific study, if the samples can be taken and used at minimal risk to human health and safety, property, and the environment.

15(3) A designated employee may impose conditions on a permission issued under subsection (1).

Restrictions on withdrawing land drainage

16(1) A person must not use or withdraw land drainage from the land drainage system without the written permission of a designated employee.

16(2) Permission under subsection (1) must not be provided if, in the opinion of the designated employee, the withdrawal:

- (a) poses a risk of harm to human health or safety, property, or the environment; or
- (b) would adversely affect the water level of the land drainage system.

16(3) A designated employee may impose conditions on a permission issued under subsection (1), including a condition that the applicant restore the land drainage system to its original condition after the withdrawal.

Fees, rates, charges, and deposits

17(1) Fees, rates, charges, surcharges, and deposits referred to in this By-law:

- (a) must be established by City Council or by authority delegated by City Council, or calculated in accordance with this By-law;
- (b) are subject to inflationary increases authorized by the Fees and Charges By-law;
- (c) may be set out in the Fees and Charges Manual referred to in the Fees and Charges By-law.

17(2) The Director may determine when invoices and bills are issued.

17(3) Invoices and bills must be paid within 30 days of being issued.

17(4) A late payment charge in the form of interest payable at a rate determined by City Council is imposed on the outstanding balance of a fee, rate or charge that is not paid as required in subsections (1) and (3). The fee is imposed on the outstanding balance, including the amount of the late payment charge, for every 30-day period that a fee, rate or charge is overdue.

Payment locations

18 The Director is authorized to designate locations at which bill payments may be made.

PART 4 SEWER CONTRACTOR'S LICENCE REQUIREMENTS

Sewer Contractor's Licence required

19 Only a designated employee or a person holding a valid Sewer Contractor's Licence may work on a private sewer service pipe, the wastewater system, or the land drainage system.

Licence requirements

20(1) A designated employee may issue an initial annual Sewer Contractor's Licence only if an applicant:

- (a) meets the requirements of section 9; and
- (b) demonstrates that he or she can satisfactorily perform the work for which the licence is being issued.

20(2) A designated employee must not issue a Sewer Contractor's Licence unless the applicant agrees, in a written form approved by the City Solicitor, to indemnify the City against any lawsuits or other claims for damages resulting from the work done by the applicant or the applicant's employees or agents on the wastewater system, the land drainage system, or a private sewer service pipe.

20(3) A designated employee must not issue a Sewer Contractor's Licence until the applicant files with the Chief Financial Officer of the City a Certificate of Insurance demonstrating that the licence holder has in place a commercial general liability insurance policy in an amount determined by the Director to be sufficient to address the risk to the City and which includes:

- (a) the City as an additional insured;
- (b) evidence of cross liability;
- (c) contractor's equipment cover;

- (d) products and completed operations cover;
- (e) 15 days notice of cancellation; and
- (f) deductible to be paid by the contractor.

20(4) The Sewer Contractor's Licence is immediately void if the insurance policy required by subsection (3) is not maintained.

PART 5 CONSTRUCTION REQUIREMENTS

Authorization and Service Permit required to install or reuse private sewer service pipe or private land drainage system

21(1) A person must not install a new private sewer service pipe or reuse an existing private sewer service pipe unless the owner has applied for, and a designated employee has authorized, the installation in accordance with section 9.

21(2) A licensed contractor must not do any work on the wastewater system, land drainage system, private land drainage system or a private sewer service pipe unless a Service Permit which authorizes the licensed contractor to carry out the work has been issued in accordance with section 9.

21(3) In deciding whether or not to issue an authorization under subsection (1) or a Service Permit under subsection (2), the designated employee must take into account the impact of the work on the wastewater or land drainage system.

21(4) Where the work being authorized in subsections (1) or (2) could have a significant impact on the wastewater system or land drainage system, as a condition of the authorization or Service Permit, a designated employee may require a property owner to submit a record drawing showing the completed work.

Complying with construction standards required

22(1) A Service Permit holder must ensure that work on the wastewater system, land drainage system, private land drainage system or private sewer service pipe meets the standards set out in the *Standard Construction Specifications*.

22(2) Despite subsection (1), a designated employee may authorize in writing a variation to the *Standard Construction Specifications* if the variation meets the intent of the *Standard Construction Specifications*. Where the designated employee has authorized a variation, the Service Permit holder must comply with the variation.

22(3) As well as complying with subsection (1) or (2), a Service Permit holder doing the work must follow directions and requirements imposed by a designated employee to minimize risks to human health and safety, property, and the environment.

Inspection required before backfilling

23(1) A Service Permit holder must not backfill an excavation unless a designated employee has inspected and approved the work.

23(2) Where an excavation is backfilled prior to an inspection, a designated employee may require the work to be exposed so that the inspection can take place.

23(3) Where a designated employee identifies a deficiency during an inspection, the Service Permit holder must not backfill the excavation until he or she has:

- (a) remedied the deficiency;
- (b) paid any applicable inspection fees; and
- (c) received approval from the designated employee following a reinspection of the work.

Requirements for abandoning or reusing private sewer service pipes when buildings are demolished or moved

24(1) In this section and in section 25:

“**demolish**” means to remove or destroy the entire building, including its foundation.

24(2) Before demolishing a building that has a private sewer service pipe, the applicant for a demolition permit under the Winnipeg Building By-law must pay a deposit established by City Council. The deposit must be in the form of cash, a certified cheque, a letter of credit, or any other method of payment acceptable to the Director.

24(3) No interest is payable on a deposit provided under subsection (2).

24(4) Within 18 months after a building has been demolished or moved, the current owner must:

- (a) reuse the private sewer service pipe after complying with section 26; or
- (b) ensure that the private sewer service pipe is abandoned as required by the *Standard Construction Specifications*.

24(5) If the current owner fails to comply with subsection (4), a designated employee may abandon the private sewer service pipe as required by the *Standard Construction Specifications* and may use the deposit, required by subsection (2), to cover the cost of doing so.

24(6) When a private sewer service pipe has been reused or abandoned as required, the designated employee must return the deposit, or the unused part of the deposit, to the applicant at the request of the applicant.

Requirements for blocking unused private sewer service pipes

25 To prevent any flow or material from entering the sewer, the owner must ensure that the private sewer service pipe is blocked and remains blocked in a manner acceptable to a designated employee, or has been abandoned as required by the *Standard Construction Specifications*, if:

- (a) a building has no superstructure; or
- (b) a building that has a private sewer service pipe has been demolished.

Requirements for reusing private sewer service pipes

26(1) Before an owner reuses a private sewer service pipe as allowed by section 24, he or she must obtain authorization from a designated employee.

26(2) A designated employee must not issue an authorization unless he or she is satisfied that the private sewer service pipe is in good working order.

PART 6 CONNECTION REQUIREMENTS

Responsibility for complying with this Part

27 The generator of wastewater or land drainage and any contractor doing work on the property are each responsible for meeting the requirements of this Part.

All properties to be connected to wastewater sewer

28(1) Subject to subsection (2) and section 29, wastewater from a property must be discharged through a private sewer service pipe to the common sewer adjacent to the property.

28(2) If there is no common sewer adjacent to a property, wastewater must be discharged:

- (a) to an on-site wastewater management system in compliance with Provincial statutes and regulations;

- (b) through a non-conforming private sewer service pipe to a wastewater sewer in compliance with subsection 29(2) at a point that is approved by a designated employee; or
- (c) in compliance with an authorization under section 30.

28(3) A meter must be installed in compliance with sections 90 or 91 on any property that discharges wastewater to the wastewater system.

Requirements for non-conforming private sewer service pipes

29(1) Unless authorized by a designated employee, a private sewer service pipe must not be connected to:

- (a) an interceptor sewer; or
- (b) a wastewater sewer that is not fronting or adjacent to the property.

29(2) A designated employee may authorize a private sewer service pipe to be connected to an interceptor sewer or to a wastewater sewer that is not fronting or adjacent to the property only if there is no wastewater sewer adjacent to the property and if the property owner:

- (a) pays in advance the connection charge referred to in section 35;
- (b) agrees to accept full responsibility for, and to indemnify the City against, any damage, loss or expense as a result of the construction, existence or abandonment of the non-conforming private sewer service pipe; and
- (c) agrees to pay the annual sewer maintenance assessment (frontage tax) as approved by City Council, once the non-conforming private sewer service pipe is connected to the wastewater sewer or interceptor sewer.

Temporary above-ground wastewater connections permitted

30 A designated employee may, in writing, authorize wastewater to be discharged to the wastewater system through pipes, hoses or pumps located above ground on a temporary basis where:

- (a) the wastewater system is able to accommodate the discharge; and
- (b) where it will not pose a risk to human health or safety, property, or the environment.

Property to be connected to land drainage sewer or combined sewer

31 Land drainage from all properties must be discharged through a private sewer service pipe connected to a land drainage sewer or combined sewer unless:

- (a) the property is a single-family or two-family property;
- (b) a designated employee has authorized otherwise under sections 32, 57, 58, 59, or 61(2); or
- (c) there is no land drainage sewer or combined sewer adjacent to the property.

Temporary above-ground land drainage connections permitted

32 A designated employee may, in writing, authorize land drainage from other than a single-family or two-family property to be discharged above ground through pipes, hoses, trenches or pumps on a temporary basis where:

- (a) the land drainage system or wastewater system is able to accommodate the discharge; and
- (b) the discharge will not pose a risk to human health or safety, property, or the environment.

Property previously served by on-site wastewater management system

33 Before a property previously served by an on-site wastewater management system is connected to the wastewater system, the owner must ensure that a water meter or wastewater meter is installed and is approved, inspected and sealed by a designated employee.

Requirement to abandon a non-conforming private sewer service pipe and connect to the wastewater system

34(1) The owner of a property served by a non-conforming private sewer service pipe must, immediately upon being notified of this obligation by a designated employee:

- (a) connect the property to the wastewater sewer in compliance with this By-law; and
- (b) abandon the non-conforming private sewer service pipe as required by the *Standard Construction Specifications* and in compliance with directions from a designated employee.

34(2) A designated employee must notify the owner of a property served by a non-conforming private sewer service pipe under subsection (1) when a common sewer is installed adjacent to the property.

34(3) A designated employee must notify the owner of a property served by a non-conforming private sewer service pipe under subsection (1) if the non-conforming private sewer service pipe:

- (a) has collapsed or there is a structural defect or blockage so that it is not functioning;
- (b) is interfering with the operation or maintenance of the wastewater system or the land drainage system; or
- (c) is interfering with activities or development on nearby properties.

34(4) A designated employee who issues an order under section 184 of *The City of Winnipeg Charter* to the owner of property who has failed to comply with subsection (1) must, in the order, specify a time of at least 18 months for compliance with the order.

34(5) An order issued by a designated employee under section 184 of *The City of Winnipeg Charter* may be registered by way of caveat against the property in the land titles office under subsection 184(3) of *The City of Winnipeg Charter*.

Connection charge

35(1) In this section:

"charge" means a fee equivalent to the rate for calculating local improvement taxes under the Local Improvement Regulation By-law that was in force at the time the property was required to be connected to the wastewater sewer, multiplied by the frontage feet of the property on which the charge is being imposed.

35(2) Subject to subsection (3), if no charge has ever been imposed on a property, the owner of the property must, at the time of connecting the property to the wastewater sewer, pay the charge, calculated on the basis of the current rate for calculating local improvement taxes under the Local Improvement Regulation By-law.

35(3) No charge is payable in respect of a property when:

- (a) a wastewater sewer has been installed adjacent to a property as a condition of a subdivision or other agreement; and
- (b) the agreement affects the property.

Owner responsible for private sewer service pipe

36(1) The owner of a property is responsible for installing and maintaining in good working order every private sewer service pipe serving that property.

36(2) Subject to section 37, the owner of a property is responsible for repairing or replacing a private sewer service pipe serving that property.

36(3) Where two or more properties share a private sewer service pipe, the owner of each property is responsible for complying with the obligations of an owner under this By-law.

36(4) In complying with the obligations imposed by subsections (1) and (2) to install, maintain, repair, or replace a private sewer service pipe, the owner must use the services of a sewer contractor licensed under this By-law.

Repair and replacement of pipe under street

37(1) Despite section 36, the Director must arrange and pay for repairing or replacing the part of a private sewer service pipe carrying only wastewater if the property owner can demonstrate to the satisfaction of the designated employee that a blockage in the private sewer service pipe is located under a street and:

- (a) cannot be cleared satisfactorily by auguring from within the property; or
- (b) is due to a structural failure in the private sewer service pipe.

37(2) In determining whether subsection (1) is applicable, the designated employee may take into account:

- (a) evidence that at least two different sewer cleaning contractors have been unsuccessful in clearing a blockage under a street by auguring from within the property;
- (b) evidence that at least four sewer cleanings, two within the previous nine months, have been required to clear a blockage under a street that has been caused by a structural failure in the private sewer service pipe; or
- (c) a video inspection demonstrating that the private sewer service pipe has collapsed or is otherwise blocked so that it is not functioning and an excavation is required.

37(3) In making a determination under subsection (1), an authorized employee may require a City employee to be present at an attempt to clear any blockage in, or during a video inspection of, the private sewer service pipe.

37(4) The obligation of the Director to act under subsection (1) does not apply to:

- (a) cleaning or other maintenance required for a private sewer service pipe;
- (b) a non-conforming private sewer service pipe; or
- (c) any part of a private sewer service pipe that has been installed or replaced within the previous 12 months.

Interconnection of wastewater and land drainage private sewer service pipes prohibited

38 The owner of property and a person doing the work must not allow a private sewer service pipe carrying wastewater to be connected with a private sewer service pipe carrying land drainage.

**PART 7
DISCHARGES OF WASTEWATER**

Responsibility for complying with this Part

39 The generator of wastewater is responsible for ensuring that the wastewater being discharged meets the requirements of this Part.

Wastewater must be discharged to wastewater system

40 Unless otherwise authorized in this Part, wastewater must be discharged only to the wastewater system.

Wastewater discharges to wastewater system restricted

41(1) Except as authorized by an Overstrength Discharge Licence or a Wastewater Discharge Licence, a person must not discharge or allow the discharge of wastewater into the wastewater system, if to do so is likely to:

- (a) pose a risk of harm to human health or safety, property, or the environment;
- (b) interfere with the operation or maintenance of the wastewater system or the land drainage system;
- (c) damage the wastewater system or the land drainage system;
- (d) restrict the flow in the land drainage system or the wastewater system;

- (e) cause an unusual and offensive odour to be given off from the land drainage system or the wastewater system; or
- (f) prevent the City from meeting limits imposed by the Province of Manitoba or Government of Canada for disposal of liquid to waterways or of biosolids to land.

amended 11/7/2010

41(2) Except as authorized by an Overstrength Discharge Licence or a Wastewater Discharge Licence, a person must not discharge or allow the discharge of wastewater into the wastewater system if it contains:

- (a) any of the substances set out in Schedule A; or
- (b) substances with concentrations that exceed the limits set out in Schedule B.

Wastewater Discharge Licence required

42(1) A person must not discharge wastewater into the land drainage system unless a designated employee has, in accordance with section 9, issued a Wastewater Discharge Licence or an authorization permitting the discharge.

42(2) Unless a Wastewater Discharge Licence specifically permits a particular substance or a particular concentration of a substance to be discharged, a person must not discharge wastewater into the land drainage system if it contains:

- (a) any of the substances set out in Schedule C; or
- (b) substances with concentrations that exceed the limits set out in Schedule D.

42(3) A designated employee must not issue a Wastewater Discharge Licence to a person if permitting the discharge would:

- (a) pose a risk of harm to human health or safety, property, or the environment;
- (b) interfere with the operation or maintenance of the wastewater system or the land drainage system;
- (c) damage the wastewater system or the land drainage system; or
- (d) restrict the flow in the land drainage or wastewater system.

42(4) In addition to the reasons set out in Part 3 for suspending or cancelling a licence, a Wastewater Discharge Licence may be suspended or cancelled if the designated employee concludes that the wastewater cannot be accommodated and treated within the wastewater system or the land drainage system.

Discharge rate limits

43(1) In order to prevent the wastewater system from being overloaded, a designated employee may require the generator of wastewater to limit the rate of discharge of wastewater to the wastewater sewer. The generator of wastewater must comply with such a requirement.

43(2) Subsection (1) does not apply to a discharge from a single-family or two-family property, except for the discharge of swimming pool water.

43(3) If a designated employee imposes a limit under subsection (1), the generator must construct and maintain a discharge control device acceptable to the designated employee.

Overstrength Discharge Licence required

44(1) The generator must not allow wastewater to be discharged into the wastewater system if it violates Schedule B, unless he or she holds an Overstrength Discharge Licence issued by a designated employee, in accordance with section 9, authorizing the specific discharge. In this case, the generator must comply with any limits or conditions on specific substances specified in the Overstrength Discharge Licence.

44(2) A designated employee may issue an Overstrength Discharge Licence only if he or she concludes that the overstrength wastewater can be accommodated and treated within the wastewater system.

44(3) In addition to the reasons set out in Part 3 for suspending or cancelling a licence, an Overstrength Discharge Licence may be suspended or cancelled if the designated employee concludes that the overstrength wastewater cannot be accommodated and treated within the wastewater system.

44(4) The designated employee may impose, as a condition on the Overstrength Discharge Licence, the requirement that the licence holder treat the wastewater in a manner specified by the designated employee so that it meets the By-law requirements.

Surcharges for select overstrength wastewater substances

45(1) The generator of wastewater must pay any applicable surcharges on substances that exceed limits set out in Schedule B. The surcharges must be based on a sampling protocol designed to represent discharges over a full day of operation of the generator.

45(2) For the purposes of subsection (1), a full day of operation means all or part of a 24-hour period, beginning at the start of production and ending at the completion of cleanup, during which a continuous or intermittent discharge to the wastewater system can occur.

Grease interceptors required

46(1) Unless an exemption is granted under subsection (2), the operator and owner of a food service establishment must ensure that every kitchen sink and dishwasher waste pipe in a food service establishment is connected to a grease interceptor that complies with this Part and is acceptable to a designated employee.

46(2) A designated employee may grant a written exemption to the requirements of subsection (1) if the food service establishment does not discharge grease or cooking oil to the wastewater system.

46(3) The operator and owner of a food service establishment must ensure that the grease interceptor required by subsection (1) is:

- (a) accessible for maintenance and cleaning;
- (b) the right size for the flow capacity of the connected pipe; and
- (c) installed at the required slope to provide a minimum retention time as required by *Canadian Standards Association* Standard B 481 or successor standard.

46(4) The operator and owner of a food service establishment must ensure that chemical or biological additives are not added to wastewater discharged to a grease interceptor or placed into a grease interceptor, if this increases the quantity of grease discharged to a sewer.

Oil interceptors required

47(1) The operator and owner of a property that discharges or is likely to discharge motor oil to the wastewater system must ensure that an oil interceptor that complies with this Part and is acceptable to the designated employee is installed on the premises.

47(2) The operator and owner of a property must ensure that the oil interceptor required by subsection (1) is:

- (a) installed at the point where the wastewater enters the private sewer service pipe; and
- (b) connected to all floor drains to prevent motor oil and lubricating grease from passing into the private sewer service pipe.

Sediment interceptors required

48(1) The owner and operator of a property must ensure that a sediment interceptor that complies with this Part and that is acceptable to the designated employee is installed at a mechanical service garage and a vehicle wash floor that discharges to the private sewer service pipe.

48(2) The operator and owner of a property must ensure the sediment interceptor required by subsection (1) for mechanical service garages and vehicle wash floors:

- (a) is large enough to retain sand or grit during any 24-hour period at peak flow; and
- (b) has a volume of at least 0.6 cubic metres, measured below the invert of the overflow.

Oil, grease or sediment interceptor design specifications

49 The owner and operator of a property must ensure that an oil, grease or sediment interceptor required by this Part is:

- (a) solid, watertight, and secured in place;
- (b) readily accessible for cleaning;
- (c) large enough to capture, under peak flow conditions, the material it is designed to intercept;
- (d) capable of withstanding abrupt and extreme changes in temperature;
- (e) equipped with easily removable covers which, when bolted in place, are airtight and watertight; and
- (f) able to support occupancy floor load if installed under a floor.

Oil, grease and sediment interceptor maintenance requirements

50(1) The owner and operator of a property must ensure that an oil, grease or sediment interceptor is:

- (a) operated and maintained according to the manufacturer's instructions; and
- (b) cleaned regularly so that it functions properly.

50(2) The owner and operator of a property must ensure that all maintenance activities for an oil, grease or sediment interceptor are recorded and the records kept for 12 months following the date of maintenance. The records must be made available for inspection by a designated employee upon request.

Dental waste amalgam separator required

51 Subject to this section, the owner of a dental practice must ensure that an amalgam separator is installed, operated and properly maintained on all fixtures that receive dental amalgam containing mercury in compliance with the requirements of the Manitoba Dental Association.

Food waste grinder discharge restrictions

52(1) In this section, "food waste grinder" means a device installed in a kitchen sink that is designed to grind food waste to particle sizes for discharge into the wastewater system.

52(2) Wastewater must not be discharged from a food waste grinder into the wastewater system, except as permitted in subsection (3).

52(3) Wastewater may be discharged to the wastewater system from a food waste grinder if the grinder:

- (a) meets the requirements of the current version of the standard performance requirements for plumbing aspects of food waste disposer units, issued by the American Society of Sanitary Engineers (ASSE), and
- (b) is operated by a motor or motors having a combined rating equal to or less than 0.80 kilowatts.

Swimming pool water discharge restrictions

53 Unless a valid Wastewater Discharge Licence under section 42 has been issued authorizing the discharge, a person must not discharge swimming pool water:

- (a) into the land drainage system;
- (b) onto a street;
- (c) onto neighbouring property;
- (d) into a waterway or onto the banks of a waterway; or
- (e) above ground into a wastewater sewer.

PART 8 DISCHARGES OF LAND DRAINAGE

Responsibility for complying with this Part

54 The generator of land drainage is responsible for ensuring that the land drainage being discharged meets the requirements of this Part.

Land drainage must be discharged to land drainage system

55 Unless otherwise authorized in this Part, land drainage must be discharged only to the land drainage system or a combined sewer.

Land drainage discharges to land drainage system restricted

56(1) A person must not discharge or allow the discharge of land drainage into the land drainage system, if to do so is likely to:

- (a) pose a risk of harm to human health or safety, property, or the environment;
- (b) interfere with the operation or maintenance of the land drainage system or the wastewater system;
- (c) damage the land drainage system or the wastewater system;
- (d) restrict the flow in the land drainage system or the wastewater system;
- (e) cause an unusual and offensive odour to be given off from the land drainage system or the wastewater system; or
- (f) prevent the City from meeting limits imposed by the Province of Manitoba or Government of Canada for disposal of liquid to waterways or of biosolids to land.

56(2) A person must not discharge or permit the discharge of land drainage into the land drainage system if it contains any of the substances set out in Schedule C or if it exceeds the limits of the concentrations of substances set out in Schedule D.

Land Drainage Discharge Licence required

57(1) Subject to this section and sections 58 and 59, a person must not discharge land drainage into any wastewater sewer, other than a combined sewer, unless a designated employee has, in accordance with section 9, issued a Land Drainage Discharge Licence authorizing the discharge.

57(2) Subsection (1) does not apply to land drainage being discharged from a single-family or two-family property.

57(3) A designated employee may issue a Land Drainage Discharge Licence only if:

- (a) the rate of discharge of the land drainage will not exceed the capacity of the wastewater system; and
- (b) there is no risk of harm to human health or safety, property, or the environment caused by the licensed discharge.

57(4) In order to determine whether or not to issue a Land Drainage Discharge Licence or authorization, a designated employee may require the person discharging or planning to discharge the land drainage to:

- (a) identify the quality or quantity of the discharge, or provide other information relevant to the discharge;
- (b) develop a best management practices plan; or
- (c) carry out pollution prevention measures.

Downspout Discharge Licence required

58(1) The owner or occupant of a property must not permit rainwater downspouts to connect to a wastewater sewer unless a designated employee has, in accordance with section 9, issued a Downspout Discharge Licence authorizing the discharge.

58(2) The designated employee may issue a Downspout Discharge Licence only if the building is connected to a combined sewer and the downspout water discharged on the property would:

- (a) flow onto adjacent property or onto the street; or
- (b) pose a risk to human health or safety, property, or the environment.

Sump Pump Discharge Licence required

59(1) The owner or occupant of a property must not permit water from a sump pump to be discharged to a wastewater sewer unless a designated employee has, in accordance with section 9, issued a Sump Pump Discharge Licence authorizing the discharge.

59(2) A designated employee may issue a Sump Pump Discharge Licence only if sump pump water discharged on the property would:

- (a) flow onto adjacent property or onto the street; or
- (b) pose a risk to human health or safety, property, or the environment.

Discharge rate limits

60(1) In order to prevent the land drainage system or wastewater system from being overloaded, a designated employee may require the generator of land drainage to limit the discharge rate of land drainage to the land drainage or wastewater system.

60(2) Subsection (1) does not apply to a single-family or two-family property on a lot that is smaller than 1,000 square metres.

60(3) If a designated employee imposes a limit under subsection (1), the owner must construct, use and maintain a discharge control device acceptable to the designated employee.

Overland discharge authorization required

61(1) The owner or occupant of property, other than a single-family or two family property, must not allow land drainage to be discharged overland unless a designated employee has, in accordance with Section 9, authorized the discharge.

61(2) A designated employee may authorize land drainage to be discharged overland where the land drainage system or combined sewer is able to accommodate the discharge and where it will not pose a risk to human health or safety, property, or the environment.

Catch basin maintenance required

62 All catch basins and discharge control devices on private property must be maintained in good working order.

**PART 9
SPILLS**

Obligation to notify the City

63(1) The person who is responsible for a spill or who has custody and control of the substances involved in a spill must immediately notify a designated employee, and must provide all information about the spill, including:

- (a) the date and time of the spill;
- (b) the content and quantity of the spill;

- (c) the location of the spill;
- (d) the cause and nature of the spill;
- (e) the action completed and any work still in progress to mitigate the spill;
and
- (f) the name and contact information of the person reporting the spill.

63(2) If a spill poses an immediate danger to human health or safety, property or the environment, the person responsible for the spill or who has custody and control of the substances involved in a spill must call 911 to report the spill.

Containing and cleaning up the spill

64 The person who is responsible for a spill or who has custody and control of the substances involved in a spill must take all reasonable measures to:

- (a) contain the spill;
- (b) reduce the risk of harm to human health and safety, property, and the environment;
- (c) clean up the spill and contaminated residue and dispose of spill material appropriately; and
- (d) restore the affected area to its condition before the spill.

Preparing and submitting a written report

65 The person who is responsible for a spill or who has custody and control of the substances involved in a spill must submit a written report to the designated employee within five working days of the spill, containing information required to determine:

- (a) information required by section 63(1); and
- (b) actions necessary to reduce the effect of the spill and to prevent future spills.

PART 10 HAULED WASTEWATER

No discharge except at designated sites

66 A person may discharge hauled wastewater only at the discharge points designated by the Director.

Wastewater Hauler's Licence required

67(1) The owner of a vehicle that discharges hauled wastewater at a discharge point designated by the Director must hold a valid Wastewater Hauler's Licence.

67(2) Subsection (1) does not apply to the owner of a recreational vehicle that discharges wastewater directly at a discharge point designated by the Director.

67(3) In addition to the reasons for suspending or cancelling a licence set out in sections 10 and 11, a Wastewater Hauler's Licence may be suspended or cancelled for one or more violations of section 69.

Wastewater Disposal Vehicle Licence required

68(1) Subject to this section, a person must hold a current Wastewater Disposal Vehicle Licence for each vehicle used to discharge hauled wastewater at a discharge point designated by the Director.

68(2) Subsection (1) does not apply to the owner of a recreational vehicle that discharges wastewater directly at a discharge point designated by the Director.

68(3) Before issuing a Wastewater Disposal Vehicle Licence in accordance with section 9, the designated employee must ensure that:

- (a) the owner of the vehicle holds a valid Wastewater Hauler's Licence; and
- (b) the vehicle being licensed has a tank that will not leak and is otherwise suitable for hauling wastewater.

68(4) A person hauling wastewater within the city must present a valid Wastewater Disposal Vehicle Licence for the vehicle when asked to do so by a designated employee.

68(5) In addition to the reasons for suspending or cancelling a licence set out in sections 10 and 11, a Wastewater Disposal Vehicle Licence may be suspended or cancelled if the vehicle is not suitable for hauling wastewater.

68(6) A Wastewater Disposal Vehicle Licence is automatically suspended or cancelled when the owner's Wastewater Hauler's Licence is suspended or cancelled.

Responsibilities of wastewater haulers

69(1) Before discharging hauled wastewater at a designated discharge point, the person hauling the wastewater must provide to the designated employee the following information concerning each generator of the wastewater he or she is hauling:

- (a) the type of property or facility;
- (b) the address of the property or facility;
- (c) the owner or contact person of the property or facility;
- (d) the type of wastewater; and
- (e) the volume of wastewater.

69(2) When discharging hauled wastewater at a designated discharge point, the person hauling the wastewater must:

- (a) ensure that wastewater is not deposited on the ground at the discharge point;
- (b) pay a volumetric disposal fee within 30 days of being billed by the designated employee;
- (c) provide the following information in writing before discharging each load of hauled wastewater:
 - i) the name of the hauler,
 - ii) the name and address of the generator(s), and
 - iii) the contents of the load;
- (d) comply with the rules established for the operation of the discharge point;
- (e) ensure that sand, gravel or other material that has been identified by the designated employee as likely to obstruct the wastewater system is not deposited at the discharge point;

- (f) ensure that the wastewater being discharged does not contain:
 - i) any of the substances set out in Schedule A; or
 - ii) substances with concentrations that exceed the limits set out in Schedule B, with the exception of the select overstrength substances that are subject to a surcharge; and
- (g) comply with all other conditions placed on the Wastewater Hauler's Licence.

Responsibility of generators of hauled wastewater

70 The generator of hauled wastewater must not permit the wastewater to be collected by a wastewater hauler if it contains:

- (a) any of the substances set out in Schedule A; or
- (b) substances in Schedule B, other than those with an applicable surcharge, if the concentrations exceed the limits set out in Schedule B.

Non-household hauled wastewater disposal fee

71(1) In this section:

"household wastewater" means greywater and toilet waste discharged by:

- (a) appliances such as dishwashers and washing machines; and
- (b) plumbing fixtures such as toilets, urinals, bidets, sinks, showers, and bathtubs.

71(2) Subject to subsection (3), in addition to the applicable disposal fee payable by a person hauling wastewater, under subsection 69(2), the generator of hauled wastewater must pay a volumetric fee for wastewater that is not household wastewater or wastewater from a food service establishment.

71(3) For greater certainty, the fee referred to in subsection (2) applies to all wastewater, except household wastewater and wastewater from a food service establishment, that has been kept separate from other wastewater until it enters the wastewater disposal vehicle.

PART 11 POLLUTION PREVENTION PLANNING

Definitions

72 In this Part:

"BMP Guideline" means a Best Management Practices Guideline, a business sector-based plan to control or reduce the discharge of substances listed in Schedules A, B, C, and D into the wastewater or land drainage system.

"Plan" means a Pollution Prevention Plan prepared for a particular business that identifies:

- (a) actions to control or reduce the discharge to the wastewater system or land drainage system of substances listed in Schedules A, B, C, and D; and
- (b) target dates for accomplishing specific actions.

"pollutant" means a substance listed in Schedules A, B, C, or D.

"progress update" means an update on the progress made by the particular business toward the pollution prevention goals set out in its Plan or the best management practices set out in the applicable BMP Guideline.

Scope of this Part

73(1) This Part applies only to businesses within a business sector listed in Schedule E.

73(2) The Director must:

- (a) at least one year prior to the effective date established in Schedule E for this Part to apply to a business sector, post on the City's web site a notice announcing the effective date; and
- (b) make other reasonable efforts to communicate the effective date and the requirements of this Part to businesses within the business sector.

Plan required

74(1) Subject to this section, an owner of a business must submit a Plan for approval by the Director and follow the approved Plan if the Director determines that the business is discharging substances in contravention of Schedules A, B, C or D.

74(2) The obligation in subsection (1) does not apply if the only discharge of a pollutant from the business is a substance that is the subject of an Overstrength Discharge Licence and for which a surcharge is paid under section 45.

74(3) In order to make a determination under subsection (1), the Director may require owners of businesses, in accordance with requirements established by the Director, to collect and provide to the Director data respecting discharges from the business to the wastewater or the land drainage system or both.

74(4) The requirement to collect and provide data under subsection (3) may be imposed on businesses prior to the effective date established in Schedule E for this Part to apply to the business sector.

74(5) If a business has never submitted a Plan, the obligation under subsection (1) takes effect the later of:

- (a) six months after the date the owner was notified by the Director that the business is required to submit a Plan under subsection (1); or
- (b) the effective date established in Schedule E for this Part to apply to a business sector to which the business belongs.

74(6) Where the ownership of a business changes within six months after the owner has been notified by the Director under subsection (5), the obligation to submit a Plan takes effect six months after the new owner has been notified by the Director.

Form and content of Plan

75(1) The Director is authorized to determine the form on which the Plan is submitted.

75(2) In addition to any other matter or requirement determined by the Director, a new Plan or a renewed Plan must include the following:

- (a) a description of the processes at the premises which use or produce pollutants;
- (b) a description of those processes at the premises which are to be adjusted over the life of the Plan;
- (c) a list of any pollutants that are present at the premises at any stage of the operations of the premises;
- (d) the types, quantities and concentrations of any pollutants that are discharged directly to the wastewater or land drainage system;

- (e) a description of current waste reduction, recycling, wastewater treatment, and pollution prevention activities with respect to wastewater or land drainage discharges at the premises;
- (f) a description of pollution prevention options for pollutants that are present in the wastewater or land drainage discharge and an evaluation of those options;
- (g) a schedule to reduce or eliminate the discharge of pollutants to the wastewater or land drainage systems to the point where the discharge is in compliance with Schedules A, B, C, and D; and
- (h) a declaration from an appropriate representative of the business that the content of the Plan is true, accurate and complete.

75(3) Where the Director has approved one or more BMP Guidelines for a business sector to which a business belongs, the Plan submitted for the business may consist of a written undertaking by the owner or operator of the business to follow the BMP Guideline.

Requirements if a Plan is rejected

76(1) The Director must not approve a new or renewed Plan if it:

- (a) would not control or reduce the discharge of pollutants in a manner that will bring the business into compliance with Schedules A, B, C, and D within a reasonable period of time; or
- (b) fails to contain enough information to determine if it would control or reduce the discharge of pollutants.

76(2) If a Plan is not approved by the Director, the owner of the business must amend and resubmit the Plan within 90 days of being notified of the Director's refusal to approve the Plan.

76(3) If the resubmitted Plan is not approved by the Director, the owner of the business is in violation of this By-law.

Notice of change in information required

77 Where there is a change to the facts referred to in clauses 75(2)(a) to (d) or where there is a change of ownership, the owner of the business required to submit a Plan must notify the Director of the change within 30 days.

Renewing the Plan

78(1) Subject to this Part, the owner of a business required to submit a Plan must, at least once every five years, renew the Plan by:

- (a) submitting a new or revised Plan; or
- (b) confirming his or her commitment to the existing Plan.

78(2) In order to take into account changing circumstances, including a change in ownership, the Director may require the owner of a business to renew the Plan more frequently than required in subsection (1). In this case, the owner of the business must provide a renewed Plan within 90 days of being notified by the Director of this requirement.

Spills and other contraventions

79 When a spill takes place or where there is evidence that a business is involved in new contraventions, the Director may require the owner of the business responsible for the spill or the contraventions to submit a new or revised Plan even if the business has not been required to submit a Plan or has had its obligations under this Part terminated. In this case, the owner of business must provide a renewed Plan within 90 days of being notified by the Director of this requirement.

Regular submission of progress updates

80(1) The owner of every business that is required to submit a Plan under section 74 must regularly submit progress updates for the approval of the Director.

80(2) Progress updates must be submitted:

- (a) annually within 30 days of the anniversary of the date when the Plan was approved;
- (b) in a form approved by the Director; and
- (c) with sufficient information to evaluate the progress of the business towards the goals in its Plan and the ability of the business to accomplish those goals.

80(3) If a progress update contains false information concerning the progress of the business towards the goals in its Plan or otherwise fails to accurately disclose the progress of the business towards the goals in its Plan, the owner of the business is in violation of this By-law.

Requirements if progress update does not contain adequate information

81(1) If a submitted progress update does not contain the information referred to in clause 80(2)(c), the Director may refuse to accept the progress update and require the owner of the business to amend and resubmit the progress update within 90 days.

81(2) If a resubmitted progress update does not contain the information required by the Director, the owner of the business is in violation of this By-law.

Consequences if business does not achieve progress

82(1) If the Director determines that a business is not making adequate progress toward the goals set out in a Plan, the Director may require the owner to submit a new Plan for the business and the business to follow that Plan, once it has been approved by the Director.

82(2) If the business fails to achieve the goals established in the new Plan by the target dates set out in the new Plan, the owner of the business is in violation of this By-law.

Storage of Plans and progress updates

83 The owner of a business that is required to have a Plan under this Part must keep copies of the current Plan and the current progress update at the business for which it was prepared, and have them available for inspection by a designated employee.

Termination of obligation to engage in pollution prevention planning

84 Where the Director determines that a business is complying with Schedules A, B, C, and D and is likely to continue to do so in the future, the Director must notify the owner that the business no longer has an obligation to comply with the requirements of this Part. After being so notified, the business is not required to comply with this Part unless it again discharges substances in contravention of Schedules A, B, C or D.

Consequences of violating this Part

85 If a person is in violation of this Part, in addition to any other enforcement measures, the Director may cancel an Overstrength Discharge Licence issued to the business.

Enforcement actions against businesses governed by this Part

86 The fact that the owner of a business is in compliance with this Part does not limit the Director's capacity to enforce this By-law in any way.

PART 12 SEWER CHARGES

Sewer charge imposed

87(1) A sewer charge, calculated according to this Part, is imposed on the owner or occupant of any property from which any wastewater or land drainage is discharged to the wastewater system or land drainage system.

87(2) Subject to this Part, the amount of the sewer charge owing is the sewer rate multiplied by the volume of water supplied to the property from all sources during a billing period. The sewer charge is payable when billed.

87(3) Subject to subsection (4), if water is not supplied to a property by the City, the sewer charge owing is:

- (a) the sewer rate multiplied by the amount of wastewater being discharged to the wastewater system from the property as measured by a private wastewater meter installed in accordance with section 91 or, if the amount of wastewater being discharged is not being measured in accordance with section 91, the amount of water being supplied to the property as measured by a water meter approved by a designated employee in accordance with section 90; plus
- (b) a daily basic service charge.

87(4) If an accurate measurement of the water supplied to, or wastewater discharged from, a property cannot be obtained for any reason, the sewer charge owing is the sewer rate multiplied by an estimate made by a designated employee of the volume of water used by the property or the volume of wastewater discharged from the property during the billing period.

Adjustment of sewer charges

88(1) In this section:

"applied volume" means the volume of water supplied to a particular property that is not discharged into the wastewater system, land drainage system or a waterway, calculated on the basis of data provided by meters.

88(2) Despite any other provision in this section, a property owner must pay sewer charges on the first 1,000 kilolitres of applied volume used annually at each property.

88(3) Subject to this section, upon application by the owner or occupant of a property and payment of any application fee, the Director may adjust the sewer charges by crediting to the account annually the sewer charges on the applied volume in excess of 1,000 kilolitres annually.

88(4) The Director may adjust the sewer charges under subsection (3) only if:

- (a) the property owner or occupant pays an application fee and an annual renewal fee;
- (b) the property owner or occupant installs and maintains meters as required by the designated employee in order to determine the applied volume;
- (c) the property owner or occupant pays for the installation of a water meter or meters in compliance with section 91, and necessary plumbing modifications;
- (d) the property is connected to the wastewater system;
- (e) the property is not in contravention of this By-law or the Water Works By-law; and
- (f) the fees and charges required to be paid under this By-law are not in arrears.

88(5) Subject to this section, the Director must apply the application fee and the annual renewal fee to the credit of the property owner or occupant's account at the time the sewer charges are adjusted under subsection (3), if the property qualifies for an adjustment of sewer charges under this section.

88(6) The Director must stop adjusting the sewer charges under subsection (3) if:

- (a) the property owner or occupant fails to pay the annual renewal fee on the date set by the Director;
- (b) the applied volume supplied to the property falls below 1,000 kilolitres in a year;
- (c) the process that diverts water from the wastewater system has failed or is no longer consistent with the information provided in the application;
- (d) the property is in contravention of this By-law or the Water Works By-law; or
- (e) the fees and charges required to be paid under this By-law or the Water Works By-law are in arrears.

88(7) The Director may stop adjusting the sewer charges and may refuse to apply the renewal fee or application fee to the property owner or occupant's account if:

- (a) a privately owned meter is not accurately measuring for four months or more the amount of water or wastewater supplied to a meter; or
- (b) the property owner or occupant benefitting from an adjustment fails to inform a designated employee, within ten business days, of any changes to the information submitted in the application.

The property owner or occupant must pay sewer charges estimated under this subsection from the date the meter was found to be inaccurate or the obligation to inform was violated.

88(8) Where the Director has stopped adjusting the sewer charges under subsection (7), the Director may reinstitute the adjustment after being satisfied that the property owner or occupant's privately owned meter is accurately measuring the amount of water or wastewater supplied to the meter.

Large volume sewer credit program

89(1) Subject to this section, the Director may apply an annual credit in the amount of 30% of the total sewer charges and overstrength wastewater surcharges which exceed \$100,000 in a calendar year on one or more properties owned or occupied by a business that has:

- (a) earned at least 25% of its gross sales revenue in the previous calendar year from sales to locations outside the city; and
- (b) has been charged more than \$100,000 in sewer charges and overstrength wastewater surcharges on all its properties in the preceding year.

89(2) The Director may approve a credit under subsection (1) only if the owner or occupant of the property:

- (a) applies for the credit each year in the 12 months after the calendar year for which the discount is being requested;
- (b) conducts a business limited to the manufacture, fabrication, assembly or processing of goods and materials at premises within the city;
- (c) provides an attest opinion from an independent accounting professional authorized to provide such opinions in the Province of Manitoba which satisfies the Director that at least 25% of its gross sales revenue in the previous calendar year resulted from sales to locations outside the city;

- (d) is not in violation of this By-law or the Water Works By-law; and
- (e) the fees and charges required to be paid under this By-law and the Water Works By-law are not in arrears.

City meters

90(1) Unless a designated employee authorizes a private meter under section 91, the owner of property must allow a City water meter to be installed by the City in order to determine the volume of wastewater discharged to the wastewater system.

90(2) Where a property owner or occupant requests that a water meter be tested to determine its accuracy and pays a test fee, the Director must conduct a test of the water meter. If the test shows that the water meter was over-registering according to the current specifications of the American Water Works Association, the Director must refund the test fee.

Private meters

91(1) At the request of the property owner, a designated employee may permit a privately owned meter to be installed:

- (a) where water is supplied by a well; or
- (b) in situations where the amount of water supplied to a property may not accurately reflect the wastewater discharged to the wastewater system.

91(2) Where a privately owned meter is installed:

- (a) the meter must be of a type determined by a designated employee to be appropriate for its proposed use;
- (b) the owner must supply, install and maintain the meter in proper working order; and
- (c) if required by the designated employee, the owner must provide certification satisfactory to a designated employee that the meter is accurate.

Collection of outstanding sewer charges

92 Where sewer charges imposed by this By-law have not been paid, the Director may take any action the City is authorized to take in order to collect the outstanding charges. This includes adding the amount of the charges to the real property taxes imposed by the City on the property from which wastewater or land drainage was discharged to the wastewater system or land drainage system.

PART 13
ADMINISTRATION, ENFORCEMENT AND OTHER PROVISIONS

Compliance orders

93 Any order to remedy a violation of this By-law must be issued under *The City of Winnipeg Charter*.¹

Service address

94 Where an address for sending a notice, order, decision, or other document is required, one of the following must be used:

- (a) if the person to be served is the owner of real property, either the address maintained by the tax collector for the purpose of issuing the tax notice for that property or the address maintained by the Director for the purpose of issuing bills for sewer service for that property;
- (b) if the person to be served is the occupant of real property, the street address for that property; or
- (c) if the document relates to a permit, licence or authorization, the address provided to the Director by the applicant for the permit, licence or authorization.

Obstructing work prohibited

95 A person must not obstruct the authorized work of the employees or agents of the City while they are working on the wastewater system or land drainage system.
amended 11/7/2010

Damage to and obstruction of sewer prohibited

96(1) A person must not damage the wastewater system or land drainage system.

96(2) A person must not interfere with the operation of any part of the wastewater system or land drainage system unless authorized by a designated employee in accordance with section 9.

96(3) A person must not interfere with the operation of a private sewer service pipe under a street unless authorized to do so by the property owner and authorized by a designated employee in accordance with section 9.

¹ Charter provisions concerning Orders are found in sections 116, 117 and 184.

Penalties for violating By-law

97 Unless another penalty for an offence is specified in this By-law, a person who is convicted of violating this By-law is subject to the following fines:

- (a) for a first offence a fine of not less than \$1,000 up to \$50,000;
- (b) for a second offence a fine of not less than \$5,000 up to \$100,000; and
- (c) for a third offence a fine of not less than \$10,000 up to \$250,000.

Appeals

98(1) Any appeal permitted by *The City of Winnipeg Charter* may be made to the Standing Policy Committee on Infrastructure Renewal and Public Works.

98(2) Appeals must be in writing and accompanied by the applicable appeal fee.

Director's powers - flooding prevention

99(1) The Director is authorized to maintain and operate permanent flood pumping stations, gates and gate chambers.

99(2) In a period of high water levels in rivers and streams or when overland flooding is possible, the Director is authorized to operate auxiliary pumps and to close openings between the wastewater or land drainage systems and any body of water in order to alleviate the threat or remedy its effects.

99(3) Where the threat of flooding constitutes an emergency, the Director is authorized to take whatever actions or measures are necessary to meet the threat of flooding and to eliminate or reduce its effects.

**PART 14
REPEALS AND COMING INTO FORCE**

Sewer By-law No. 7070/97 repealed

100(1) The Sewer By-law No. 7070/97 is repealed.

100(2) This By-law replaces the Sewer By-law No. 7070/97.

Schedules

101 Schedules A to E attached form part of this By-law.

Coming into force

102(1) Subject to subsection (2), this By-law comes into force on January 1, 2011.

102(2) Part 11 (Pollution Prevention Planning) comes into force on January 1, 2012.

DONE AND PASSED this 21st day of July, 2010.

SCHEDULE A
Substances Prohibited in Discharges to Wastewater System

1. a liquid or gas which:
 - (a) will cause a lower explosive limit reading to exceed 10% of the lower explosive limit on a combustible gas meter at any point in the sewer system;
 - (b) has a total purgeable hydrocarbons concentration greater than 10 mg/L;
or
 - (c) has a total semivolatile hydrocarbons concentration greater than 100 mg/L;
2. any solids which will not pass through a 6.0 millimetre screen;
3. dyes or colouring materials which could pass through the wastewater system and discolour the wastewater;
4. hazardous waste, including:
 - (a) explosives,
 - (b) flammable liquids,
 - (c) flammable solids,
 - (d) gas (Class 2),
 - (e) infectious or toxic,
 - (f) oxidizing substances and organic peroxides,
 - (g) radioactive material except where the person:
 - (i) is discharging radioactive material under a valid licence issued by the Canadian Nuclear Safety Commission or its successor, and
 - (ii) has provided a copy of the licence to a designated employee;
5. ignitable liquids;
6. landfill leachate, except that produced from landfills owned by the City of Winnipeg and other landfills approved by a designated employee;
7. concentrated pesticides;
8. pharmaceutical products, both dispensed and over-the-counter;
9. solid matter, other than properly shredded food waste from a food waste grinding device as set out in section 52;

10. solid or viscous substances that are likely to obstruct the flow in a sewer, including ashes, bones, cinders, sand, mud, soil, straw, shavings, metal, glass, rags, feathers, tar, plastics, grease, oil, wood, unground garbage, animal parts or tissues, and material taken from the belly of slaughtered animals;
11. any substance or matter at a temperature greater than 60 degrees Celsius at point of discharge.

SCHEDULE B
Concentration Limits for Discharges into the Wastewater System

Parameter	Limit (mg/L)
Aldrin / dieldrin	0.0002
Aluminum (total)	50
Antimony (total)	5.0
Arsenic (total)	1.0
Benzene	0.5
Biochemical oxygen demand	300
Cadmium (total)	0.5
Chlordane (cis plus trans isomers)	0.1
Chromium (hexavalent)	2.0
Chromium (total)	4.0
Cobalt (total)	5.0
Copper (total)	2.0
Cyanide (total)	2.0
1,1,2,2 Tetrachloroethane	1.4
1, 2 – dichlorobenzene	0.05
1, 4 – dichlorobenzene	0.08
3, 3 – dichlorobenzidine	0.002
Dichlorodiphenyltrichloroethane (DDT)	0.0001
Cis -1, 2 – dichloroethylene	4.0
Ethyl benzene	0.16
Fluoride	10
Hexachlorobenzene	0.0001
Hexachlorocyclohexane (Lindane)	0.1
Lead (total)	2.0
Manganese (total)	5.0
Mercury (total)	0.01
Methylene chloride	2.0

SCHEDULE B (continued)
Concentration Limits for Discharges into the Wastewater System

Parameter	Limit (mg/L)
Mirex	0.1
Molybdenum (total)	5.0
Nickel (total)	3.0
Nitrogen (total)	60
Nonylphenols	0.02
Nonylphenol ethoxylates	0.2
Oil and grease	
- animal or vegetable	100.0
- mineral or synthetic	15.0
Pentachlorophenol (PCP)	0.01
Phenolics (total by 4AAP method)	1.0
pH	Less than 5.5 or greater than 11.0
Phosphorus (total)	10.0
Polychlorinated biphenyls (PCBs) – total	0.001
Polycyclic aromatic hydrocarbons (PAHs) – total	0.005
Selenium (total)	1.0
Silver (total)	5.0
Sulphate (total)	1500
Sulphide	5.0
Suspended solids (total)	350
Tetrachloroethylene	1.0
Tin (total)	5.0
Titanium (total)	5.0
Toluene	0.016
Trichloroethylene	0.4
Zinc (total)	2.0
Xylenes (total)	1.4

SCHEDULE C
Substances Prohibited in Discharges to the Land Drainage System

1. blowdown water;
2. E. coli colonies in excess of 200 colonies per 100 mL;
3. direct discharge of floating debris such as leaves, grass clippings, branches, plastic bottles, cans, and other garbage;
4. grease and oils - two or more separate layers of fuel or lubricating oil;
5. greywater;
6. hauled wastewater;
7. hazardous waste, including:
 - (a) explosive waste,
 - (b) flammable liquids,
 - (c) flammable solids,
 - (d) gas (Class 2),
 - (e) infectious or toxic waste,
 - (f) oxidizing substances and organic peroxides,
 - (g) radioactive material;
8. landfill leachate;
9. matter that is likely to:
 - (a) interfere with proper operation of the land drainage system,
 - (b) affect the flow into the land drainage system,
 - (c) damage the land drainage system, or
 - (d) harm any person, animal, property, or vegetation;
10. matter that contravenes a licence or provisional licence issued by the Province of Manitoba concerning the land drainage system or its discharge;

11. matter that has any one of the following characteristics:
 - (a) a pH less than 6.0 or greater than 9.5, or
 - (b) a temperature greater than 40 degrees Celsius;
10. concentrated pesticides;
11. pharmaceutical products, both dispensed and over-the-counter;
12. substances used in or produced from an industrial process.

SCHEDULE D
Limits for Discharges to Land Drainage System
amended 117/2010

Parameter	Limit (mg/L)
Aldrin / dieldrin	0.00008
Ammonia (total)	0.18
Arsenic (total)	0.02
Benzene	0.002
Biochemical oxygen demand	15.0
Di-n-butyl phthalate	0.015
Cadmium (total)	0.008
Chlordane (cis plus trans isomers)	0.04
Chromium (hexavalent)	0.01
Chromium (total)	0.08
Chlorine (total residual)	0.01
Copper (total)	0.04
Cyanide (weak acid dissociable)	0.005
1, 2 - dichlorobenzene	0.0056
1, 4 - dichlorobenzene	0.0068
3, 3 - dichlorobenzidine	0.0008
Dichlorodiphenyltrichloroethane (DDT)	0.00004
Cis - 1, 2 - dichloroethylene	0.0056
Trans -1, 3 - dichloropropylene	0.0056
Ethyl benzene	0.002
Bis (2-ethylhexyl) phthalate	0.0088
Hexachlorobenzene	0.00004
Hexachlorocyclohexane (Lindane)	0.04
Lead (total)	0.08
Manganese	0.2
Mercury (total)	0.0004
Methylene chloride	0.0052

SCHEDULE D (continued)
Limits for Discharges to Land Drainage System

Parameter	Limit (mg/L)
Mirex	0.04
Nickel (total)	0.08
Nonylphenols	0.001
Nonylphenol ethoxylates	0.01

SCHEDULE E
Business Sectors Required to Prepare Pollution Prevention Plans under Part 11

Pollution Prevention Plan Tier 1

Effective Date January 2012

Metal Processing Companies	NAICS Code *
Primary production of alumina and aluminum	331313
Steel foundries	331514
Prefabricated metal building and component manufacturing	332311
Fabricated structural metal manufacturing	332312
Sheet metal work manufacturing	332322
Metal Plating	332810
Ornamental and architectural metal work manufacturing	332323
Other ornamental and architectural metal work manufacturing	332329
Metal tank (heavy gauge) manufacturing	332420
Other metal container manufacturing	332439
Metal valve manufacturing	332910
All other miscellaneous fabricated metal product manufacturing	332999

* NAICS Code as used in this schedule refers to North American Industrial Classification System

FAXED

CLIENT FILE NO.: 1071.10

June 19, 2009

Mr. Barry MacBride
Director
Water and Waste Department
City of Winnipeg
101 – 1155 Pacific Avenue
Winnipeg, Manitoba R3E 3P1

Dear Mr. MacBride:

Enclosed is revised Environment Act Licence No. **2684 RRR** dated June 16, 2009 issued in accordance with The Environment Act to the **City of Winnipeg**. This Licence has been revised with new ammonia limits which correct a previous error and incorporate new information from the City of Winnipeg and Manitoba Water Stewardship. This Licence supersedes Licence No. 2684 RR for the alteration and operation of the Development commonly referred to as the North End Water Pollution Control Centre, in the City of Winnipeg.

In addition to the enclosed Licence requirements, please be informed that all other applicable federal, provincial and municipal regulations and by-laws must be complied with.

For further information on the administration and application of the Licence, please feel free to contact Siobhan Burland Ross, P.Eng. at (204) 945-7015.

Yours truly,

Tracey Braun, M. Sc.
Director
Environment Act

Enc.

c: Don Labossiere, Director, Environmental Operations
Public Registries

NOTE: Confirmation of Receipt of this Licence No. 2684 RRR (*by the Licencee only*) is required by the Director of Environmental Assessment and Licensing. Please acknowledge receipt by signing in the space provided below and faxing a copy (letter only) to the Department by July 2, 2009

On behalf of the City of Winnipeg

Date

****A COPY OF THE LICENCE MUST BE KEPT ON SITE AT THE DEVELOPMENT AT ALL TIMES****

LICENCE

Licence No. / Licence n° 2684 RRR

Issue Date / Date de délivrance June 1, 2005

Revised: August 17, 2005

Revised: May 8, 2006

Revised: June 19, 2009

**IN ACCORDANCE WITH THE MANITOBA ENVIRONMENT ACT (C.C.S.M. c. E125)
THIS LICENCE IS ISSUED PURSUANT TO SECTIONS 11(1) AND 14(3) AND 14(2)
TO:**

CITY OF WINNIPEG; "the Licencee";

for the alteration and operation of the Development being a wastewater collection system and a wastewater treatment plant commonly referred to as the North End Water Pollution Control Centre, located at 2230 Main Street in the City of Winnipeg, with discharge of treated effluent being directed to the Red River, in accordance with the Proposal filed under The Environment Act on March 2, 1990, in consideration of the Manitoba Clean Environment Commission August 2003 Report on Public Hearings and in accordance with the Notice of Alteration filed under The Environment Act on June 29, 2005, and July 27, 2005 and subject to the following specifications, limits, terms and conditions:

DEFINITIONS

In this Licence,

"**accredited laboratory**" means an analytical facility accredited by the Standard Council of Canada (SCC), or accredited by another accrediting agency recognized by Manitoba Conservation to be equivalent to the SCC, or be able to demonstrate, upon request, that it has the quality assurance/quality control (QA/QC) procedures in place equivalent to accreditation based on the international standard ISO/IEC 17025, or otherwise approved by the Director;

"**acute lethality**" means a toxic effect resulting in death produced in an organism by a substance or mixture of substances within a short exposure period (usually 96 hours or less);

"**affected area**" means a geographical area, excluding the property of the Development;

"**approved**" means approved by the Director in writing;

****A COPY OF THE LICENCE MUST BE KEPT ON SITE AT THE DEVELOPMENT AT ALL
TIMES****

"as constructed drawings" means engineering drawings complete with all dimensions which indicate all features of the Development as it has actually been built;

"calibrate" means to determine, check or rectify the graduation of any instrument giving quantitative measurement;

"centrate" means the liquid that is separated from sludge solids during the treatment in a centrifuge;

"combined sewer overflow (CSO)" means the sewage overflow to the river that occurs during high flow conditions from a pipe system that collects both municipal sewage and surface runoff from a service area;

"Director" means an employee so designated pursuant to The Environment Act;

"dry weather flow" means the flow of wastewater in a combined sewer during dry weather such that flow consists mainly of wastewater with no storm water included;

"effluent" means treated or untreated wastewater flowing or pumped out of the wastewater treatment facility or any component of the facility;

"Environmental Management System (EMS)" means the part of the overall management system that includes organizational structure, planning activities, responsibilities, practices, procedures, processes, and resources for developing, implementing, achieving, reviewing and maintaining the environmental policy;

"Environment Officer" means an employee so appointed pursuant to The Environment Act;

"Escherichia coli (E. coli)" means the species of bacteria in the fecal coliform group found in large numbers in the gastrointestinal tract and feces of warm-blooded animals and man, whose presence is considered indicative of fresh fecal contamination, and is used as an indicator organism for the presence of less easily detected pathogenic bacteria;

"fecal coliform" means aerobic and facultative, Gram-negative, nonspore-forming, rod-shaped bacteria capable of growth at 44.5°C, and associated with fecal matter of warm-blooded animals;

"five-day biochemical oxygen demand (BOD₅)" means that part of the oxygen demand usually associated with biochemical oxidation of organic matter within five days at a temperature of 20°C;

"five-day carbonaceous biochemical oxygen demand (CBOD₅)" means that part of the oxygen demand usually associated with biochemical oxidation of carbonaceous organic matter within 5 days at a temperature of 20°C, excluding the oxygen demand usually associated with the biochemical oxidation of nitrogenous organic matter;

"flow proportional composite sample" means a combination of not less than ten individual samples of equal volumes of wastewater taken at equal increments of wastewater flow over a specified period of time;

"grab sample" means a quantity of undiluted effluent collected at any given time;

"influent" means water, wastewater or other liquid flowing into the wastewater treatment facility or any component of the facility;

"leachate" means liquid that has percolated through solid waste, and that contains dissolved and suspended materials from the solid waste;

"mixing zone" means an area adjacent to a discharge where a receiving water may not meet all water quality objectives included in the most recent version of the "Manitoba Water Quality Standards, Objectives, and Guidelines";

"MPN index" means the most probable number of coliform organisms in a given volume of wastewater which, in accordance with statistical theory, would yield the observed test result with the greatest frequency;

"noise nuisance" means a continuous or repeated noise in an affected area, which is offensive, obnoxious, troublesome, annoying, unpleasant, or disagreeable to a person:

- a) residing in an affected area;
- b) working in an affected area; or
- c) present at a location in an affected area which is normally open to the members of the public;

if the noise

- d) is the subject of at least 5 written complaints, received by the Director in a form satisfactory to the Director, and within a 90 day period, from 5 different persons falling within clauses a), b), or c), who do not live in the same household; or
- e) is the subject of at least one written complaint, received by the Director in a form satisfactory to the Director, from a person falling within clauses a), b) or c), and the Director is of the opinion that if the noise had occurred in a more densely populated area there would have been at least 5 written complaints received within a 90-day period, from 5 different persons who do not live in the same household;

"odour nuisance" means a continuous or repeated odour, smell or aroma in an affected area which is offensive, obnoxious, troublesome, annoying, unpleasant or disagreeable to a person:

- a) residing in an affected area;
- b) working in an affected area; or
- c) present at a location in an affected area which is normally open to members of the public;

if the odour, smell or aroma

- d) is the subject of at least 5 written complaints received by the Director in a form satisfactory to the Director and within a 90 day period, and from 5 different persons falling within clauses a), b) or c) who do not live in the same household; or
- e) is the subject of at least one written complaint, received by the Director in a form satisfactory to the Director, from a person falling within clauses a), b) or c) and the Director is of the opinion that if the odour, smell or aroma had occurred in a more densely populated area there would have been at least 5 written complaints received within a 90 day period from 5 different persons who do not live in the same household;

"RAS" means returned activated sludge from the main wastewater treatment plant process;

"SBR" means sequencing batch reactor;

"sludge" means accumulated solid material containing large amounts of entrained water which has separated from wastewater during processing;

"Standard Methods for the Examination of Water and Wastewater" means the most recent edition of Standard Methods for the Examination of Water and Wastewater published jointly by the American Public Health Association, the American Waterworks Association and the Water Environment Federation;

"storm water" means surface water from rain, snow, or ice melting and running off from the surface of a drainage area;

"thirty-day rolling average" means the arithmetic average of any daily reported data plus the preceding 29 consecutive days of reported data;

"truck dumping station" means a facility used to receive, store and meter wastewater, including septage, which has been hauled to the wastewater treatment plant with a truck;

"UV disinfection" means a disinfection process for treating wastewater using ultraviolet radiation;

"UV dose" means the units of intensity of ultra violet light that is required to kill bacteria and viruses present in the wastewater effluent;

"WAS" means waste activated sludge from the centrate treatment facility;

"wastewater" means the spent or used water of a community or industry that contains dissolved and suspended matter; and

"wastewater treatment plant" means the central facility of wastewater treatment facilities which contains all treatment processes exclusive of the collection system.

GENERAL REQUIREMENTS

This Section of the Licence contains requirements intended to provide guidance to the Licencee in implementing practices to ensure that the environment is maintained in such a manner as to sustain a high quality of life, including social and economic development, recreation and leisure for present and future Manitobans.

1. With the exception of the combined sewer overflow (CSO) wastewater, the Licencee shall direct all wastewater from the wastewater collection system area to the North End Water Pollution Control Centre or other facility approved by the Director.
2. In addition to any of the following specifications, limits, terms and conditions specified in this Licence, the Licencee shall, upon the request of the Director:
 - a) sample, monitor, analyze or investigate specific areas of concern regarding any segment, component or aspect of pollutant storage, containment, treatment, handling, disposal or emission systems, for such pollutants, ambient quality, aquatic toxicity, leachate characteristics and discharge or emission rates, and for such duration and at such frequencies as may be specified;
 - b) determine the environmental impact associated with the release of any pollutant from the Development; or
 - c) provide the Director, within such time as may be specified, with such reports, drawings, specifications, analytical data, descriptions of sampling and analytical procedures being used, bioassay data, flow rate measurements and such other information as may from time to time be requested.
3. The Licencee shall, unless otherwise specified in this Licence:
 - (a) carry out all preservations and analyses on liquid samples in accordance with the methods prescribed in the most current edition of "Standard Methods for the Examination of Water and Wastewater", or in accordance with an equivalent analytical methodology approved by the Director;
 - (b) ensure that all analytical determinations are undertaken by an accredited laboratory or a laboratory approved by the Director; and

- (c) report the results of all monitoring and testing to the Director, in writing and in an electronic format acceptable to the Director, within 60 days of the samples being taken.
- 4. The Licencee shall submit all information required to be provided to the Director under this Licence, in writing, and in electronic format, in such form (including number of copies), and such content as may be required by the Director.
- 5. The Licencee shall, in an event where a physical or mechanical breakdown of the wastewater collection system or the wastewater treatment plant results in or may result in the discharge of raw or partly treated wastewater or in non-compliance with any specification, limit, term or condition of this Licence:
 - a) notify the Director by facsimile or any other notification procedure approved by the Director, stating the nature of the event, the time and estimated duration of the event and the reason for the event as follows:
 - i) as soon as possible but no later than within 12 hours of the event; or
 - ii) before noon of the first business day following an event on a weekend or statutory holiday;
 - b) identify the repairs required to the wastewater collection system or the wastewater treatment plant; and
 - c) complete the repairs in accordance with any written instructions of the Director.
- 6. The Licencee shall carry out, as deemed necessary by the Director, any remedial measures or modifications in respect to matters authorized under this Licence.
- 7. The Licencee shall actively participate in any future watershed based management study, plan or environmental research or monitoring programs approved by the Director, for the Red River, the Assiniboine River, Lake Winnipeg and associated waterways and watersheds.
- 8. The Licencee shall not cause or permit an odour nuisance to be created as a result of the construction, operation or alteration of the wastewater treatment plant and shall take such steps as the Director may require to eliminate or mitigate an odour nuisance.
- 9. The Licencee shall not cause or permit a noise nuisance to be created as a result of the construction, operation or alteration of the wastewater treatment plant and shall take such steps as the Director may require to eliminate or mitigate a noise nuisance.
- 10. The Licencee shall:
 - a) develop an Emergency Response Plan (ERP) for the Development, in accordance with the "Manitoba Industrial Accidents Council (MIAC) Industrial Emergency Response Planning Guide";

- b) submit the ERP for approval of the Director, in written and electronic format, on or before September 1st, 2006; and
 - c) implement the ERP in accordance with the approval of the Director, on or before September 1st, 2009.
11. The Licencee shall:
- a) develop an Environmental Management System (EMS) for the Development;
 - b) submit the EMS plan for approval of the Director, in written and electronic format, on or before September 1st 2006; and
 - c) implement the EMS plan in accordance with the approval of the Director, on or before September 1st, 2009.
12. The Licencee shall:
- a) develop alternative leachate treatment plans for the Development;
 - b) submit an engineering report detailing the alternative leachate treatment facility plans, for approval of the Director, in written and electronic format, on or before December 31st, 2007; and
 - c) complete the construction and commissioning of the alternative leachate treatment facility in accordance with the approval of the Director.

DESIGN AND CONSTRUCTION REQUIREMENTS

13. The Licencee shall complete the construction and commissioning of:
- a) the UV disinfection treatment facility on or before July 31st, 2006;
 - b) the centrate treatment facility on or before December 31st, 2006; and
 - c) the upgraded wastewater treatment plant on or before December 31st, 2014.
14. The Licencee shall notify the assigned Environment Officer prior to beginning construction of the alteration to the wastewater treatment plant. The notification shall include the intended starting date of construction and the name of the Licencee's contact person at the construction site.
15. The Licencee shall ensure that fuel storage and equipment servicing areas established for the construction of the alteration to the wastewater treatment plant are located a minimum distance of 100 metres from any waterbody, and shall comply with the requirements of Manitoba Regulation 188/2001 respecting Storage and Handling of Gasoline and Associated Products.
16. The Licencee shall, from the date of issuance of this Licence, pressure test the integrity of the connections of any underground piping, which is intended to transport wastewater under pressure, before such pipe connections are backfilled with earth and make repairs as required, in accordance with Clause 5 of this Licence.

17. The Licencee shall:
- a) install or utilize existing security fencing, acceptable to the Director, to enclose the wastewater treatment plant or components thereof, that are not enclosed in a building with a security system acceptable to the Director; and
 - b) maintain the security system in a manner acceptable to the Director.
18. The Licencee shall:
- a) submit a proposal for a leak detection program, on or before June 30, 2006, for existing pipes which transport wastewater via river crossings, to the Director, including leak detection technologies and monitoring practices to be implemented;
 - b) implement the leak detection program, as approved by the Director;
 - c) continuously measure and record the data gathered by the leak detection program; and
 - d) repair and replace all portions of the existing piping where leaks are detected in accordance with Clause 5 of this Licence.
19. The Licencee shall, from the date of issuance of this Licence, construct and maintain new pipes which transport wastewater via river crossings by taking the following actions:
- a) submit a proposal for a leak detection program, for the approval of the Director, including leak detection technologies and monitoring practices to be applied;
 - b) construct and maintain a sleeve encasement around the piping;
 - c) implement the leak detection program, as approved by the Director;
 - d) continuously measure and record the data gathered by the leak detection program; and
 - e) repair and replace all portions of the piping where leaks are detected in accordance with Clause 5 of this Licence.
20. The Licencee shall:
- a) prepare "as constructed drawings" for the centrate treatment facility and UV disinfection treatment facility and shall label the drawings "As Constructed";
 - b) provide to the Director, on or before December 31st, 2007, two copies of the "as constructed drawings" of the centrate treatment and UV disinfection treatment facilities;
 - c) prepare "as constructed drawings" for the upgraded wastewater treatment plant and shall label the drawings "As Constructed"; and
 - d) provide to the Director, on or before December 31st, 2015, two copies of the "as constructed drawings" of the upgraded wastewater treatment plant including effluent discharge pipeline.

SPECIFICATIONS, LIMITS, TERMS AND CONDITIONS

21. The Licencee shall, from the date of issuance of this Licence until and including December 30th, 2014, limit the influent wastewater loading to the wastewater treatment plant, such that:
- a) the hydraulic loading does not exceed 380,000 cubic meters over any 24 hour period during dry weather flow; and
 - b) the organic loading does not exceed 117,800 kilograms over any 24 hour period during dry weather flow.
22. The Licencee shall ensure that adequate instrumentation is installed to provide constant monitoring of the UV disinfection treatment process to ensure compliance with the disinfection requirements. Such instrumentation shall include but not be limited to the following:
- a) a UV sensor to monitor lamp intensity;
 - b) an appropriate alarm and shutdown systems;
 - c) a lamp monitoring system to identify the location of individual lamp failures;
 - d) an hour meter which cannot be reset to display actual hours of UV lamp operation; and
 - e) protective circuits for overcurrent and ground current leakage detection.
23. The Licencee shall:
- a) construct and make available for use by an Environment Officer, a secured and heated influent monitoring station with direct access to the wastewater treatment plant influent wastewater pipelines;
 - b) ensure that the monitoring stations are accessible to an Environment Officer at all times;
 - c) install and maintain a flow measuring device at each monitoring station or at a location acceptable to the Director which is capable of measuring the volume of influent with an accuracy of ± 2 percent;
 - d) have the flow measuring devices re-calibrated every two years or on the request of an Environment Officer;
 - e) submit to the Director a certificate of calibration, signed by a person qualified to calibrate the flow measuring device, for each flow measuring device within two weeks of the completion of each calibration, identifying the plus or minus percent error associated with each calibrated flow measuring device; and
 - f) ensure that the monitoring stations are each equipped with a flow-proportional sampling device equipped to function with the flow measuring device and have the sampling device available on request for use by an Environment Officer.

24. The Licencee shall:

- a) construct and make available for use by an Environment Officer, a secured and heated effluent monitoring station, with direct access to the effluent discharge pipeline at a location acceptable to the Director;
- b) ensure that the monitoring station is accessible to an Environment Officer at all times;
- c) install and maintain a continuous flow measuring device, equipped with an interface compatible with departmentally owned ISCO sampler, at the monitoring station or at a location acceptable to the Director which is capable of measuring the volume of effluent with an accuracy of ± 2 percent;
- d) have the flow measuring device re-calibrated every two years or on the request of an Environment Officer;
- e) submit to the Director a certificate of calibration, signed by a person qualified to calibrate the flow measuring device, for each flow measuring device within two weeks of the completion of each calibration, identifying the plus or minus percent error associated with each calibrated flow measuring device; and
- f) ensure that the monitoring station is equipped with a flow-proportional sampling device equipped to function with the flow measuring device and have the sampling device available on request for use by an Environment Officer.

25. The Licencee shall:

- a) construct and make available for use by an Environment Officer, secured and heated monitoring stations with direct access to the wastewater pipelines located on:
 - i) the main centrate liquid stream, prior to the SBR;
 - ii) the main centrate liquid stream, following the moving bed biofilm reactor and prior to the pumping station;
 - iii) the flushing water stream, prior to the connection to the main centrate liquid stream;
 - iv) the waste activated sludge stream; and
 - v) the return activated sludge stream, prior to the sequencing batch reactor.
- b) install and maintain a continuous flow measuring device, equipped with an interface compatible with departmentally owned ISCO sampler, at each monitoring station which is capable of measuring the volume of effluent with an accuracy of ± 2 percent;
- c) have the flow measuring device re-calibrated every two years or on the request of an Environment Officer;
- d) submit to the Director a certificate of calibration, signed by a person qualified to calibrate the flow measuring device, for each flow measuring device within two weeks of the completion of each calibration, identifying the plus or minus percent error associated with each calibrated flow measuring device; and

- e) ensure that each monitoring station is equipped with a flow-proportional sampling device equipped to function with the flow measuring device and have the sampling device available on request for use by an Environment Officer.
26. The Licencee shall, from the date of issuance of this Licence until and including December 30th, 2014, during periods when the wastewater influent flow is less than 380,000 cubic meters per day, not discharge effluent from the wastewater treatment plant, as sampled at the effluent monitoring station, referred to in Clause 24 of this Licence, located prior to the effluent discharge pipeline leading to the Red River where:
- a) the organic content of the effluent, as indicated by the five-day biochemical oxygen demand (BOD₅), is in excess of 30 milligrams per litre;
 - b) the total suspended solids content of the effluent is in excess of 30 milligrams per litre;
 - c) the fecal coliform content of the effluent, as indicated by the MPN index, is in excess of 200 per 100 millilitres of sample, as determined by the monthly geometric mean of 1 grab sample collected at equal time intervals on each of a minimum of 3 consecutive days per week; and
 - d) the E. coli content of the effluent, as indicated by the MPN index, is in excess of 200 per 100 millilitres of sample, as determined by the monthly geometric mean of 1 grab sample collected at equal time intervals on each of a minimum of 3 consecutive days per week.
27. The Licencee shall, on and after December 31st, 2006, not discharge centrate from the centrate treatment facility, as measured at all related monitoring stations, where:
- a) the total phosphorus load exceeds 119 kilograms per day as determined by the thirty-day rolling average; and
 - b) the total nitrogen load removed is less than 838 kilograms per day as determined by the thirty-day rolling average.
28. The Licencee shall, on and after December 31st, 2014, not discharge effluent from the wastewater treatment plant, as sampled in the effluent monitoring station, referred to in Clause 24 of this Licence, where:
- a) the organic content of the effluent, as indicated by the five-day carbonaceous biochemical oxygen demand (CBOD₅), is in excess of 25 milligrams per litre;
 - b) the total suspended solids content of the effluent is in excess of 30 milligrams per litre;
 - c) the fecal coliform content of the effluent, as indicated by the MPN index, is in excess of 200 per 100 millilitres of sample, as determined by the monthly geometric mean of 1 grab sample collected at equal time intervals on each of a minimum of 3 consecutive days per week;
 - d) the E. coli content of the effluent, as indicated by the MPN index, is in excess of 200 per 100 millilitres of sample, as determined by the monthly geometric

mean of 1 grab sample collected at equal time intervals on each of a minimum of 3 consecutive days per week;

- e) the concentration of total phosphorus of the effluent is in excess of 1 milligram per litre as determined by the thirty-day rolling average;
- f) the concentration of total nitrogen of the effluent is in excess of 15 milligrams per litre as determined by the thirty-day rolling average; and
- g) the ammonia nitrogen content (as N) of the effluent is in excess of the following limits:

<u>Period</u>	<u>Ammonia Nitrogen (as N)</u> (kilograms/any 24 hour period)
January	7580
February	8675
March	13057
April	29021
May	13331
June	7312
July	4507
August	2262
September	2663
October	3415
November	4035
December	5774

29. The Licencee shall not release a quality of effluent from the wastewater treatment plant which:
- a) on any day, causes, or contributes to, the mixing zone for the effluent in the Red River being acutely lethal to aquatic life passing through the mixing zone; or
 - b) on or after December 31st, 2014, can be demonstrated to be acutely lethal to fish within the mixing zone for the effluent in the Red River by using a 96-hour static acute lethality test which results in mortality to more than 50 percent of the test fish exposed to 100 percent concentration of effluent, with the test carried out in accordance with the protocol outlined in Environment Canada's "Biological Test Method: Reference Method for Determining Acute Lethality of Effluents to Rainbow Trout: EPS 1/RM/13 Second Edition – December 2000" or any future amendment thereof.

MONITORING REQUIREMENTS

30. The Licencee shall:
- a) continuously measure and record the volume of the wastewater discharged from the wastewater treatment plant every day;

- b) take one flow proportional composite sample of effluent over a 24 hour period from the wastewater treatment plant every day;
- c) have the samples analyzed for CBOD₅, BOD₅, total suspended solids, total nitrogen, total phosphorus, ortho phosphorus and ammonia nitrogen content;
- d) calculate the daily ammonia nitrogen load (kilograms per day), and the thirty-day rolling average values for total nitrogen and total phosphorus for the day during which samples were collected;
- e) prepare a monthly report on:
 - i) the daily, average, peak, minimum and total monthly volume of wastewater discharged from the wastewater treatment plant; and
 - ii) the CBOD₅, BOD₅, total suspended solids, ortho phosphorus, thirty-day rolling average total nitrogen, thirty-day rolling average total phosphorus and ammonia nitrogen loads; and
- f) file a copy of the report with the Director within 30 days of the end of each month during which the concentrations and loads were determined.

31. The Licencee shall:

- a) once each day, when flows exceed the 75th percentile of the thirty-day rolling average maximum daily flow, collect a grab sample of effluent from the effluent monitoring station referred to in Clause 24 of this Licence;
- b) have the grab sample analyzed for pH and temperature, fecal coliform content, and E. coli content;
- c) determine and record the monthly geometric mean for each of the fecal coliform and E. coli counts based on all the data collected during each month, from a minimum of 12 grab samples; and
- d) report the results to the Director within 30 days of the end of the month during which the samples were taken.

32. The Licencee shall, unless otherwise instructed by the Director:

- a) monitor the influent of the centrate treatment facility, on a daily basis, as follows:
 - i) continuously measure and record the volume of the centrate from the monitoring station referred to in Clause 25(a)i of this Licence;
 - ii) continuously measure and record the volume of RAS from the monitoring station referred to in Clause 25(a)v of this Licence;
 - iii) continuously measure and record the volume of flushing water from the monitoring station referred to in Clause 25(a)iii of this Licence;
 - iv) take one flow proportional composite sample of centrate over a 24 hour period at the monitoring station referred to in Clause 25(a)i of this Licence;
 - v) take one flow proportional composite sample of the RAS over a 24 hour period at the monitoring station referred to in Clause 25(a)v of this Licence;
 - vi) take one flow proportional composite sample of the flushing water from the monitoring station referred to in Clause 25(a)iii of this Licence;

- vii) have the samples analyzed for total nitrogen and total phosphorus;
 - viii) calculate the daily total nitrogen and total phosphorus loads in kilograms per day for the day;
 - ix) prepare a monthly report on the daily volume of centrate and the total phosphorus and total nitrogen loads in kilograms per day as determined by the thirty-day rolling average; and
- b) monitor the effluent of the centrate treatment facility, on a daily basis, as follows:
- i) continuously measure and record the volume of the centrate from the monitoring station referred to in Clause 25(a)ii of this Licence;
 - ii) continuously measure and record the volume of WAS from the monitoring station referred to in Clause 25(a)iv of this Licence;
 - iii) take one flow proportional composite sample of centrate over a 24 hour period at the monitoring station referred to in Clause 25(a)ii of this Licence;
 - iv) take one flow proportional composite sample of WAS over a 24 hour period at the monitoring station referred to in Clause 25(a)iv of this Licence;
 - v) have the samples analyzed for total nitrogen;
 - vi) calculate the daily total nitrogen load in kilograms per day for the day;
- c) calculate the total nitrogen load removed in kilograms per day as determined by the thirty-day rolling average;
- d) prepare a monthly report on the total phosphorus load in kilograms per day as determined by the thirty-day rolling average and the total nitrogen load removed in kilograms per day as determined by the thirty-day rolling average; and
- e) file a copy of the reports with the Director within 30 days of the end of each month during which the concentrations and loads were determined.

33. The Licencee shall:

- a) once every 3 months, collect a grab sample of the influent, at each influent monitoring station, and a grab sample of the effluent, at the effluent monitoring station at the wastewater treatment plant;
- b) have both the influent and effluent samples analyzed for the concentration of the parameters identified in Schedule A of this Licence; and
- c) report the results to the Director in an annual report within 60 days of the end of the 12 month sampling period.

34. The Licencee shall:

- a) maintain a record of all wastewater hauled to the wastewater treatment plant, including the number of loads on a daily and weekly basis, the volume of each load, the name of the hauler, and the source of the contents of each load according to the type of waste and the name and location of each property serviced;
- b) make all records available to an Environment Officer upon request; and
- c) submit an annual report of all the waste hauling information to the Director

within 30 days of the end of the 12 month period.

35. The Licencee shall:

- a) once every 3 months in accordance with the protocol outlined in Environment Canada's "Biological Test Method: Reference Method for Determining Acute Lethality of Effluents to Rainbow Trout: EPS 1/RM/13 Second Edition – December 2000", or any future amendment thereof, collect a bioassay sample of the effluent from the effluent monitoring station at the wastewater treatment plant, and test the sample at 100 percent concentration for acute lethality; and
- b) report the results to the Director in an annual report within 60 days of the end of the 12 month sampling period.

36. The Licencee shall:

- a) submit a plan, on or before December 31, 2007 for a phased sewer upgrade management program to the Director for approval; and
- b) implement the phased sewer upgrade management program in accordance with the approval of the Director, on or before December 31, 2012.

REVIEW OR REVOCATION

- A. This Licence replaces Licence No. 2684 RR which is hereby rescinded.
- B. If, in the opinion of the Director, the Licencee has failed or is failing to comply with any of the specification, limits, terms or conditions set out herein, the Director may, temporarily or permanently, revoke this Licence.
- C. This Licence shall be reviewed and revised by the Director, within two (2) years of the date of issuance of this Licence and subsequently reviewed every three (3) years thereafter or at a time as determined by the Director.
- D. If, in the opinion of the Director, new evidence warrants a change in the specifications, limits, terms or conditions of this Licence, the Director may require the filing of a new proposal pursuant to Section 11 of The Environment Act.

Tracey Braun, M.Sc.

Notes:

- (1) Effluent ammonia load based upon Raw Sewage flows and Final NH3-N concentration
- (2) nr - not recorded or no result; na - not analyzed; ns - no sample
- (3) Where value is expressed as less than (<), the value is halved and used in the calculation
- (4) * = 30 day rolling average
- (5)** Flow, highlighted in bold, in excess of 380 ML/D per clause 26 of Licence 2684RRR.
- (6) Bracketed Coliform results not used in the Geometric Mean calculation.
- (7) Raw wastewater flows in excess of 400 ML/D will by-pass the secondary process and flows in excess of 675 ML/D will cause raw sewage to by-pass the plant.
- (8) Total Nitrogen results are calculated from TKN and nitrate values.
