Table of Contents

Summary

This enactment repeals and replaces the *Canadian Environmental Protection Act*. Among the changes are provisions to implement pollution prevention, new procedures for the investigation and assessment of substances and new requirements with respect to substances that the Minister of the Environment and the Minister of Health have determined to be toxic or capable of becoming toxic within the meaning of [Part 5](#), and provisions regarding animate products of biotechnology. The enactment also contains new provisions respecting fuels, international air and water pollution, motor emissions, nutrients whose release into water can cause excessive growth of aquatic vegetation and environmental emergencies, provisions to regulate the environmental effects of government operations and to protect the environment on and in relation to federal land and aboriginal land, disposal of wastes and other matter at sea, and the export and import of wastes.

The enactment provides for the gathering of information for research and the creation of inventories of data, which are designed for publication, and for the development and publishing of objectives, guidelines and codes of practice. The enactment also provides new powers for enforcement officers and analysts appointed by the Minister of the Environment to enforce the law. Environmental protection alternative measures and environmental protection compliance orders provide new mechanisms for the resolution of a contravention. The enactment also specifies criteria for courts to consider on imposing a sentence on an offender.

In addition, the enactment contains new rights for Canadians who, through written comments or notices of objection to the Minister of the Environment, may participate in decisions on environmental matters, may compel the Minister to investigate an alleged contravention of the Act, and may bring a civil action when the federal government is not enforcing the law. Aboriginal governments are provided the right of representation on the National Advisory Committee to be established under the enactment and, like the provinces and territories, may seek to have their laws declared equivalent to regulations under the *Canadian Environmental Protection Act, 1999*.

Introduction

Canadian Environmental Protection Act, 1999

1999, c. 33

[Assented to September 14, 1999]

An Act respecting pollution prevention and the protection of the environment and human health in order to contribute to sustainable development

Declaration

It is hereby declared that the protection of the environment is essential to the well-being of Canadians and that the primary purpose of this Act is to contribute to sustainable development through pollution prevention.

Preamble

Whereas the Government of Canada seeks to achieve sustainable development that is based on an ecologically efficient use of natural, social and economic resources and acknowledges the need to integrate environmental, economic and social factors in the making of all decisions by government and private entities;

Whereas the Government of Canada is committed to implementing pollution prevention as a national goal and as the priority approach to environmental protection;

Whereas the Government of Canada acknowledges the need to virtually eliminate the most persistent and bioaccumulative toxic substances and the need to control and manage pollutants and wastes if their release into the environment cannot be prevented;

Whereas the Government of Canada recognizes the importance of an ecosystem approach;

Whereas the Government of Canada will continue to demonstrate national leadership in establishing environmental standards, ecosystem objectives and environmental quality guidelines and codes of practice;

Whereas the Government of Canada is committed to implementing the precautionary principle that, where there are threats of serious or irreversible damage, lack of full scientific certainty shall not be used as a reason for postponing cost-effective measures to prevent environmental degradation;

Whereas the Government of Canada recognizes that all governments in Canada have authority that enables them to protect the environment and recognizes that all governments face environmental problems that can benefit from cooperative resolution;

Whereas the Government of Canada recognizes the importance of endeavouring, in cooperation with provinces, territories and aboriginal peoples, to achieve the highest level of environmental quality for all Canadians and ultimately contribute to sustainable development;

Whereas the Government of Canada recognizes that the risk of toxic substances in the environment is a matter of national concern and that toxic substances, once introduced into the environment, cannot always be contained within geographic boundaries;

Whereas the Government of Canada recognizes the integral role of science, as well as the role of traditional aboriginal knowledge, in the process of making decisions relating to the protection of the environment and human health and that environmental or health risks and social, economic and technical matters are to be considered in that process;

Whereas the Government of Canada recognizes the responsibility of users and producers in relation to toxic substances and pollutants and wastes, and has adopted the "polluter pays" principle;

Whereas the Government of Canada is committed to ensuring that its operations and activities on federal and aboriginal lands are carried out in a manner that is consistent with the principles of pollution prevention and

the protection of the environment and human health;

Whereas the Government of Canada will endeavour to remove threats to biological diversity through pollution prevention, the control and management of the risk of any adverse effects of the use and release of toxic substances, pollutants and wastes, and the virtual elimination of persistent and bioaccumulative toxic substances;

Whereas the Government of Canada recognizes the need to protect the environment, including its biological diversity, and human health, by ensuring the safe and effective use of biotechnology;

And whereas the Government of Canada must be able to fulfil its international obligations in respect of the environment;

Now, therefore, Her Majesty, by and with the advice and consent of the Senate and House of Commons of Canada, enacts as follows:

Short Title

Short title

1. This Act may be cited as the *Canadian Environmental Protection Act, 1999*.

Administrative Duties

Duties of the Government of Canada

2. (1) In the administration of this Act, the Government of Canada shall, having regard to the Constitution and laws of Canada and subject to subsection (1.1),

(a) exercise its powers in a manner that protects the environment and human health, applies the precautionary principle that, where there are threats of serious or irreversible damage, lack of full scientific certainty shall not be used as a reason for postponing cost-effective measures to prevent environmental degradation, and promotes and reinforces enforceable pollution prevention approaches;

(a.1) take preventive and remedial measures to protect, enhance and restore the environment;

(b) take the necessity of protecting the environment into account in making social and economic decisions;

(c) implement an ecosystem approach that considers the unique and fundamental characteristics of ecosystems;

(d) endeavour to act in cooperation with governments to protect the environment;

(e) encourage the participation of the people of Canada in the making of decisions that affect the environment;

(f) facilitate the protection of the environment by the people of Canada;

(g) establish nationally consistent standards of environmental quality;

(h) provide information to the people of Canada on the state of the Canadian environment;

(i) apply knowledge, including traditional aboriginal knowledge, science and technology, to identify and resolve environmental problems;

(j) protect the environment, including its biological diversity, and human health, from the risk of any adverse effects of the use and release of toxic substances, pollutants and wastes;

(j.1) protect the environment, including its biological diversity, and human health, by ensuring the safe and effective use of biotechnology;

(k) endeavour to act expeditiously and diligently to assess whether existing substances or those new to Canada are toxic or capable of becoming toxic and assess the risk that such substances pose to the environment and human life and health;

(l) endeavour to act with regard to the intent of intergovernmental agreements and arrangements entered into for the purpose of achieving the highest level of environmental quality throughout Canada;

(m) ensure, to the extent that is reasonably possible, that all areas of federal regulation for the protection of the environment and human health are addressed in a complementary manner in order to avoid duplication and to provide effective and comprehensive protection;

(n) endeavour to exercise its powers to require the provision of information in a coordinated manner;

and

(o) apply and enforce this Act in a fair, predictable and consistent manner.

Considerations

(1.1) The Government of Canada shall consider the following before taking any measure under paragraph (1) (a.1):

(a) the short- and long-term human and ecological benefits arising from the environmental protection measure;

(b) the positive economic impacts arising from the measure, including those cost-savings arising from health, environmental and technological advances and innovation, among others; and

(c) any other benefits accruing from the measure.

Action not limited

(2) Nothing in this section shall be construed so as to prevent the taking of any action to protect the environment or human health for the purposes of this Act.

Interpretation

Definitions

3. (1) The definitions in this subsection apply in this Act.

"aboriginal government" « *gouvernement autochtone* »

"aboriginal government" means a governing body that is established by or under or operating under an agreement between Her Majesty in right of Canada and aboriginal people and that is empowered to enact laws respecting

(a) the protection of the environment; or

(b) for the purposes of Division 5 of Part 7, the registration of vehicles or engines.

"aboriginal land" « *terres autochtones* »

"aboriginal land" means

(a) reserves, surrendered lands and any other lands that are set apart for the use and benefit of a band and that are subject to the *Indian Act*;

(b) land, including any water, that is subject to a comprehensive or specific claim agreement, or a self-government agreement, between the Government of Canada and aboriginal people where title remains with Her Majesty in right of Canada; and

(c) air and all layers of the atmosphere above and the subsurface below land mentioned in paragraph (a) or (b).

"air pollution" « *pollution atmosphérique* »

"air pollution" means a condition of the air, arising wholly or partly from the presence in the air of any substance, that directly or indirectly

(a) endangers the health, safety or welfare of humans;

(b) interferes with the normal enjoyment of life or property;

(c) endangers the health of animal life;

(d) causes damage to plant life or to property; or

(e) degrades or alters, or forms part of a process of degradation or alteration of, an ecosystem to an extent that is detrimental to its use by humans, animals or plants.

"analyst" « *analyste* »

"analyst" means a person or a member of a class of persons designated as an analyst under subsection 217 (1).

"biological diversity" « *diversité biologique* »

"biological diversity" means the variability among living organisms from all sources, including, without limiting the generality of the foregoing, terrestrial and marine and other aquatic ecosystems and the ecological complexes of which they form a part and includes the diversity within and between species and of ecosystems.

"biotechnology" « *biotechnologie* »

"biotechnology" means the application of science and engineering in the direct or indirect use of living organisms or parts or products of living organisms in their natural or modified forms.

"class of substances" « *catégorie de substances* »

"class of substances" means any two or more substances that

- (a) contain the same portion of chemical structure;
- (b) have similar physico-chemical or toxicological properties; or
- (c) for the purposes of sections 68, 70 and 71, have similar types of use.

"Committee" « *comité* »

"Committee" means the National Advisory Committee established under section 6.

"ecosystem" « *écosystème* »

"ecosystem" means a dynamic complex of plant, animal and micro-organism communities and their non-living environment interacting as a functional unit.

"enforcement officer" « *agent de l'autorité* »

"enforcement officer" means a person or a member of a class of persons designated as an enforcement officer under section 217.

"environment" « *environnement* »

"environment" means the components of the Earth and includes

- (a) air, land and water;
- (b) all layers of the atmosphere;
- (c) all organic and inorganic matter and living organisms; and
- (d) the interacting natural systems that include components referred to in paragraphs (a) to (c).

"environmental emergency" « *urgence environnementale* »

"environmental emergency" has the meaning given that expression in Part 8.

"environmental quality" « *qualité de l'environnement* »

"environmental quality" includes the health of ecosystems.

"Environmental Registry" « *Registre* »

"Environmental Registry" means the registry established under section 12.

"federal land" « *territoire domanial* »

"federal land" means

- (a) land, including any water, that belongs to Her Majesty in right of Canada, or that Her Majesty in right of Canada has the right to dispose of, and the air and all layers of the atmosphere above and the subsurface below that land; and
- (b) the following land and areas, namely,
 - (i) the internal waters of Canada as determined under the *Oceans Act*, including the seabed and subsoil below and the airspace above those waters, and
 - (ii) the territorial sea of Canada as determined under the *Oceans Act*, including the seabed and subsoil below and the air and all layers of the atmosphere above that sea.

"federal source" « *source d'origine fédérale* »

"federal source" means

- (a) a department of the Government of Canada;
- (b) an agency of the Government of Canada or other body established by or under an Act of Parliament that is ultimately accountable through a minister of the Crown in right of Canada to Parliament for the conduct of its affairs;
- (c) a Crown corporation as defined in subsection 83(1) of the *Financial Administration Act*; or
- (d) a federal work or undertaking.

"federal work or undertaking" « *entreprises fédérales* »

"federal work or undertaking" means any work or undertaking that is within the legislative authority of Parliament, including, but not limited to,

- (a) a work or undertaking operated for or in connection with navigation and shipping, whether inland or maritime, including the operation of ships and transportation by ship;
- (b) a railway, canal, telegraph or other work or undertaking connecting one province with another, or extending beyond the limits of a province;
- (c) a line of ships connecting a province with any other province, or extending beyond the limits of a province;
- (d) a ferry between any province and any other province or between any province and any country other than Canada;
- (e) airports, aircraft and commercial air services;
- (f) a broadcast undertaking;
- (g) a bank;
- (h) a work or undertaking that, although wholly situated within a province, is before or after its completion declared by Parliament to be for the general advantage of Canada or for the advantage of two or more provinces; and
- (i) a work or undertaking outside the exclusive legislative authority of the legislatures of the provinces.

"fuel" « *combustible* »

"fuel" means any form of matter that is combusted or oxidized for the generation of energy.

"government" « *gouvernement* »

"government" means the government of a province or of a territory or an aboriginal government.

"Minister" « *ministre* »

"Minister" means the Minister of the Environment.

"movement within Canada" or "transport within Canada" « *mouvement au Canada* » ou « *transport au Canada* »

"movement within Canada" or "transport within Canada" means movement or transport between provinces.

"pollution prevention" « *prévention de la pollution* »

"pollution prevention" means the use of processes, practices, materials, products, substances or energy that avoid or minimize the creation of pollutants and waste and reduce the overall risk to the environment or human health.

"prescribed" *Version anglaise seulement*

"prescribed" means prescribed by regulations made under this Act.

"province" « *province* »

"province" includes a territory.

"release" « *rejet* »

"release" includes discharge, spray, inject, inoculate, abandon, deposit, spill, leak, seep, pour, emit, empty, throw, dump, place and exhaust.

"sell" « *vente* »

"sell" includes to offer for sale or lease, have in possession for sale or lease or deliver for sale or lease.

"substance" « *substance* »

"substance" means any distinguishable kind of organic or inorganic matter, whether animate or inanimate, and includes

- (a) any matter that is capable of being dispersed in the environment or of being transformed in the environment into matter that is capable of being so dispersed or that is capable of causing such transformations in the environment,
- (b) any element or free radical,
- (c) any combination of elements of a particular molecular identity that occurs in nature or as a result of a chemical reaction, and
- (d) complex combinations of different molecules that originate in nature or are the result of chemical reactions but that could not practicably be formed by simply combining individual constituents, and, except for the purposes of sections 66, 80 to 89 and 104 to 115, includes
- (e) any mixture that is a combination of substances and does not itself produce a substance that is different from the substances that were combined,
- (f) any manufactured item that is formed into a specific physical shape or design during manufacture and has, for its final use, a function or functions dependent in whole or in part on its shape or design, and
- (g) any animate matter that is, or any complex mixtures of different molecules that are, contained in effluents, emissions or wastes that result from any work, undertaking or activity.

"sustainable development" « *développement durable* »

"sustainable development" means development that meets the needs of the present without compromising the ability of future generations to meet their own needs.

"transient reaction intermediate" « *intermédiaire de réaction* »

"transient reaction intermediate" means a substance that is formed and consumed in the course of a chemical reaction.

"transit" « *transit* »

"transit" means, except for the purposes of sections 139 and 155, the portion of an international transboundary movement of waste or material referred to in subsection 185(1) through the territory of a country that is neither the country of origin nor the country of destination of the movement.

"undertaking" *Version anglaise seulement*

"undertaking" includes a business.

Meaning of "Ministers" and "either Minister"

(2) Where the word "Ministers" is used in this Act, it refers to both the Minister and the Minister of Health, and where the expression "either Minister" is used in this Act, it refers to either the Minister or the Minister of Health.

Class of substances

(3) For the purposes of this Act, other than subsection (1), "substance" includes a class of substances.

1999, c. 33, s. 3; 2001, c. 34, s. 27(E).

Aboriginal rights

4. For greater certainty, nothing in this Act shall be construed so as to abrogate or derogate from the protection provided for existing aboriginal or treaty rights of the aboriginal peoples of Canada by the recognition and affirmation of those rights in section 35 of the *Constitution Act, 1982*.

Her Majesty

Binding on Her Majesty

5. This Act is binding on Her Majesty in right of Canada or a province.

Part 1: Administration

- | [Advisory Committees](#)
- | [Agreements Respecting Administration](#)
- | [Agreements Respecting Equivalent Provisions](#)

Advisory Committees

National Advisory Committee

6. (1) For the purpose of enabling national action to be carried out and taking cooperative action in matters affecting the environment and for the purpose of avoiding duplication in regulatory activity among governments, the Minister shall establish a National Advisory Committee

- (a) to advise the Ministers on regulations proposed to be made under subsection 93(1);
- (b) to advise the Minister on a cooperative, coordinated intergovernmental approach for the management of toxic substances; and
- (c) to advise the Minister on other environmental matters that are of mutual interest to the Government of Canada and other governments and to which this Act relates.

Precautionary principle

(1.1) In giving its advice and recommendations, the Committee shall use the precautionary principle.

Composition of Committee

(2) The Committee shall consist of the following members:

- (a) one representative for each of the Ministers;
- (b) one representative of the government of each of the provinces; and
- (c) subject to subsection (3), not more than six representatives of aboriginal governments, to be selected on the following regional basis,
 - (i) one representative for all aboriginal governments, except Inuit, in Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick,
 - (ii) one representative for all aboriginal governments, except Inuit, in Quebec,
 - (iii) one representative for all aboriginal governments, except Inuit, in Ontario,
 - (iv) one representative for all aboriginal governments, except Inuit, in Manitoba, Saskatchewan, Alberta, the Northwest Territories and Nunavut,
 - (v) one representative for all aboriginal governments, except Inuit, in British Columbia and Yukon, and
 - (vi) one representative for all Inuit aboriginal governments.

Provincial representatives

(2.1) The representative of a provincial government shall be selected by that government.

Aboriginal representatives

(2.2) Subject to subsection (3), the representative of aboriginal governments shall be selected by the aboriginal governments he or she represents.

Inuit aboriginal representatives

(2.3) Subject to subsection (3), the representative of Inuit aboriginal governments shall be selected by those governments.

Absence of aboriginal government

(3) Where there is no Inuit aboriginal government or aboriginal government for a region referred to in any of subparagraphs (2)(c)(i) to (v), the representative of the Inuit or of aboriginal people for the region, as the case may be, may be selected in accordance with regulations made under subsection (4).

Regulations

(4) The Minister may make regulations respecting the manner of selecting a representative under subsection (3).

1999, c. 33, s. 6; 2002, c. 7, s. 124.

Ministerial advisory committees

7. (1) For the purpose of carrying out their duties under this Act, the Ministers or either Minister may

- (a) establish advisory committees to report to the Ministers or either Minister; and
- (b) specify the functions that the committees are to perform and the manner in which those functions are to be performed.

Publication of report

(2) The report of a committee established under subsection (1), including its recommendations and reasons, shall be made public.

Report of various committees

8. The Minister shall include in the annual report required by section 342 a report of the activities of the Committee and of any committees established under paragraph 7(1)(a).

Agreements Respecting Administration

Negotiation of agreement

9. (1) The Minister may negotiate an agreement with a government or with an aboriginal people with respect to the administration of this Act.

Publication of negotiated agreements

(2) The Minister shall publish any agreement negotiated under subsection (1) before it is entered into, or give notice of its availability, in the *Canada Gazette* and in any other manner that the Minister considers appropriate.

Comments or objections

(3) Within 60 days after the publication of an agreement or notice of its availability under subsection (2), any person may file with the Minister comments or a notice of objection.

Publication by Minister of results

(4) After the end of the period of 60 days referred to in subsection (3), the Minister shall publish in the *Canada Gazette* and in any other manner that the Minister considers appropriate a report or a notice of the availability of a report that summarizes how any comments or notices of objection were dealt with.

Entering into agreements

(5) The Minister may, after publishing a report or notice under subsection (4),

- (a) with the approval of the Governor in Council, enter into an agreement with a government or an aboriginal people with respect to the administration of this Act; and

(b) subject to any terms and conditions that the Governor in Council may specify in the approval, agree to amendments of the agreement.

Publication of final agreements

(6) The Minister shall publish any agreement under subsection (5), or give notice of its availability, in the *Canada Gazette* and in any other manner that the Minister considers appropriate.

Termination

(7) An agreement made under subsection (5) terminates five years after the date on which it comes into force or may be terminated earlier by either party giving the other at least three months notice.

Annual report

(8) The Minister shall include in the annual report required by section 342 a report on the administration of this Act under agreements made under subsection (5).

Action not limited by Agreement

(9) No agreement made under this section shall limit or restrict the carrying out of any action the Minister deems necessary for the administration and enforcement of this Act, including the conduct of inspections or investigations.

Agreements Respecting Equivalent Provisions

Non-application of regulations

10. (1) Except with respect to Her Majesty in right of Canada, the provisions of a regulation made under subsection 93(1), 200(1) or 209(1) or (2) do not apply within the jurisdiction of a government for which there is in force an order, made under subsection (3), declaring that the provisions do not apply within that jurisdiction.

Non-application of regulations

(2) Except with respect to a federal source, the provisions of a regulation made under section 167 or 177 do not apply within the jurisdiction of a government for which there is in force an order, made under subsection (3), declaring that the provisions do not apply within that jurisdiction.

Declaration of equivalent provisions

(3) Subject to subsections (4), (5) and (6), where the Minister and a government agree in writing that there are in force by or under the laws applicable to the jurisdiction of the government

(a) provisions that are equivalent to a regulation made under a provision referred to in subsection (1) or (2), and

(b) provisions that are similar to sections 17 to 20 for the investigation of alleged offences under environmental legislation of that jurisdiction,

the Governor in Council may, on the recommendation of the Minister, make an order declaring that the provisions of the regulation do not apply in an area under the jurisdiction of the government.

Publication of agreements

(4) The Minister shall publish any agreement referred to in subsection (3) before it is entered into, or give notice of its availability, in the *Canada Gazette* and in any other manner that the Minister considers appropriate.

Comments or objections

(5) Within 60 days after the publication of an agreement or notice of its availability under subsection (4), any person may file with the Minister comments or a notice of objection.

Publication by Minister of results

(6) After the end of the period of 60 days referred to in subsection (5), the Minister shall publish in the *Canada Gazette* and in any other manner that the Minister considers appropriate a report or a notice of the availability of a report that summarizes how any comments or notices of objection were dealt with.

Publication of final agreements

(7) The Minister shall publish any agreement referred to in subsection (3) after it is entered into, or give notice of its availability, in the *Canada Gazette* and in any other manner that the Minister considers appropriate.

Termination

(8) An agreement made under subsection (3) terminates five years after the date on which it comes into force or may be terminated earlier by either party giving the other at least three months notice.

Revocation of order

(9) The Governor in Council may, on the recommendation of the Minister, revoke an order made under subsection (3) if the agreement referred to in that subsection terminates or is terminated.

Report to Parliament

(10) The Minister shall include in the annual report required by section 342 a report on the administration of this section.

Part 2: Public Participation

- | [Interpretation](#)
- | [Environmental Registry](#)
- | [Rights Under Other Parts](#)
- | [Voluntary Reports](#)
- | [Investigation of Offences](#)
- | [Environmental Protection Action](#)
- | [Action to Prevent or Compensate Loss](#)
- | [Other Matters](#)

Definition of "environmental protection action"

11. In this Part, "environmental protection action" means an action under section 22.

Environmental Registry

Establishment of Environmental Registry

12. The Minister shall establish a registry, to be called the Environmental Registry, for the purpose of facilitating access to documents relating to matters under this Act.

Contents of Environmental Registry

13. (1) The Environmental Registry shall contain notices and other documents published or made publicly available by the Minister, and shall also include, subject to the *Access to Information Act* and the *Privacy Act*,

1. (a) notices of objection and of any approval granted under this Act;
2. (b) a copy of every policy and of every proposed regulation or order made under this Act; and
3. (c) copies of documents submitted to a court by the Minister relating to any environmental protection action.

Form and manner of Environmental Registry

(2) The Minister may determine the form of the Environmental Registry, how it is to be kept and how access to it is to be provided.

Protection from civil proceeding or prosecution

14. (1) Despite any other Act of Parliament, no civil or criminal proceedings may be brought against any person mentioned in subsection (2) for the full or partial disclosure in good faith of any notice or other document through the Environmental Registry or any consequences of its disclosure.

Persons protected

(2) The persons against whom the proceedings may not be brought are Her Majesty in right of Canada, the Minister and any person acting on behalf of or under the direction of the Minister.

Rights under Other Parts

Additional rights

15. The rights conferred by this Part are in addition to the right to request the addition of a substance to the Priority Substance List, the right to file a notice of objection under Parts 1, 5, 7 and 11 and the right to request under Parts 5, 7 and 11 that a board of review be established under section 333.

Voluntary reports

Voluntary reports

16. (1) Where a person has knowledge of the commission or reasonable likelihood of the commission of an offence under this Act, but is not required to report the matter under this Act, the person may report any information relating to the offence or likely offence to an enforcement officer or any person to whom a report may be made under this Act.

Request for confidentiality

(2) The person making the report may request that their identity, and any information that could reasonably be expected to reveal their identity, not be disclosed.

Requirement for confidentiality

(3) No person shall disclose or cause to be disclosed the identity of a person who makes a request under subsection (2) or any information that could reasonably be expected to reveal their identity unless the person authorizes the disclosure in writing.

Employee protection

(4) Despite any other Act of Parliament, no employer shall dismiss, suspend, demote, discipline, harass or otherwise disadvantage an employee, or deny an employee a benefit of employment, by reason that

1. (a) the employee has made a report under subsection (1);
2. (b) the employee, acting in good faith and on the basis of reasonable belief, has refused or stated an intention of refusing to do anything that is an offence under this Act; or
3. (c) the employee, acting in good faith and on the basis of reasonable belief, has done or stated an intention of doing anything that is required to be done by or under this Act.

Investigation of Offences

Application for investigation by Minister

17. (1) An individual who is resident in Canada and at least 18 years of age may apply to the Minister for an investigation of any offence under this Act that the individual alleges has occurred.

Statement to accompany application

(2) The application shall include a solemn affirmation or declaration

1. (a) stating the name and address of the applicant;
2. (b) stating that the applicant is at least 18 years old and a resident of Canada;
3. (c) stating the nature of the alleged offence and the name of each person alleged to have contravened, or to have done something in contravention of, this Act or the regulations; and
4. (d) containing a concise statement of the evidence supporting the allegations of the applicant.

Form

(3) The Minister may prescribe the form in which an application under this section is required to be made.

Investigation by Minister

18. The Minister shall acknowledge receipt of the application within 20 days of the receipt and shall investigate all matters that the Minister considers necessary to determine the facts relating to the alleged offence.

Progress reports

19. After acknowledging receipt of the application, the Minister shall report to the applicant every 90 days on the progress of the investigation and the action, if any, that the Minister has taken or proposes to take, and the Minister shall include in the report an estimate of the time required to complete the investigation or to

implement the action, but a report is not required if the investigation is discontinued before the end of the 90 days.

Minister may send evidence to Attorney General of Canada

20. At any stage of an investigation, the Minister may send any documents or other evidence to the Attorney General of Canada for consideration of whether an offence has been or is about to be committed under this Act and for any action that the Attorney General may wish to take.

Discontinuation of investigation

21. (1) The Minister may discontinue the investigation if the Minister is of the opinion that

1. (a) the alleged offence does not require further investigation; or
2. (b) the investigation does not substantiate the alleged offence.

Report

(2) If the investigation is discontinued, the Minister shall

1. (a) prepare a report in writing describing the information obtained during the investigation and stating the reasons for its discontinuation; and
2. (b) send a copy of the report to the applicant and to any person whose conduct was investigated.

A copy of the report sent to a person whose conduct was investigated must not disclose the name or address of the applicant or any other personal information about them.

Environmental Protection Action

Circumstances when an individual may bring an action

22. (1) An individual who has applied for an investigation may bring an environmental protection action if

1. (a) the Minister failed to conduct an investigation and report within a reasonable time; or
2. (b) the Minister's response to the investigation was unreasonable.

Nature of the action

(2) The action may be brought in any court of competent jurisdiction against a person who committed an offence under this Act that

1. (a) was alleged in the application for the investigation; and
2. (b) caused significant harm to the environment.

Relief that may be claimed

(3) In the action, the individual may claim any or all of the following:

1. (a) a declaratory order;
2. (b) an order, including an interlocutory order, requiring the defendant to refrain from doing anything that, in the opinion of the court, may constitute an offence under this Act;
3. (c) an order, including an interlocutory order, requiring the defendant to do anything that, in the opinion of the court, may prevent the continuation of an offence under this Act;
4. (d) an order to the parties to negotiate a plan to correct or mitigate the harm to the environment or to human, animal or plant life or health, and to report to the court on the negotiations within a time set by the court; and
5. (e) any other appropriate relief, including the costs of the action, but not including damages.

Limitation period of two years

23. (1) An environmental protection action may be brought only within a limitation period of two years beginning when the plaintiff becomes aware of the conduct on which the action is based, or should have become aware of it.

Time during investigation not included

(2) The limitation period does not include any time following the plaintiff's application for an investigation, but before the plaintiff receives a report under subsection 21(2).

No action for remedial conduct

24. An environmental protection action may not be brought if the alleged conduct

1. (a) was taken
2.
 1. (i) to correct or mitigate harm or the risk of harm to the environment or to human, animal or plant life or health, or
 2. (ii) to protect national security, support humanitarian relief efforts, participate in multilateral military or peace-keeping activities under the auspices of international organizations or defend a member state of the North Atlantic Treaty Organization; and
3. (b) was reasonable and consistent with public safety.

Exception

25. An environmental protection action may not be brought against a person if the person was convicted of an offence under this Act, or environmental protection alternative measures within the meaning of Part 10 were used to deal with the person, in respect of the alleged conduct on which the action is based.

Notice of the action

26. (1) The plaintiff in an environmental protection action shall give notice of the action to the Minister no later than 10 days after the document originating the action is first served on a defendant, and the Minister shall give notice of the action in the Environmental Registry as soon as possible after receipt of the plaintiff's notice.

Notice of other matters

- (2) In an environmental protection action,
1. (a) the court may order any party to the action to give notice to the Minister of any matter relating to the action, within the time specified by the court; and
 2. (b) the Minister shall give notice of that matter in the Environmental Registry as soon as possible after receipt of the party's notice.

Attorney General to be served

27. (1) A plaintiff shall serve the Attorney General of Canada with a copy of the document originating an environmental protection action within 20 days after first serving the document on a defendant.

Attorney General may participate

(2) The Attorney General of Canada is entitled to participate in the action, either as a party or otherwise. Notice of his or her decision to participate shall be given to the plaintiff and be included in the Environmental Registry within 45 days after the copy of the originating document is served on the Attorney General.

Right of appeal

(3) The Attorney General of Canada is entitled to appeal from a judgment in the action and to make submissions and present evidence in an appeal.

Other participants

28. (1) A court may allow any person to participate in an environmental protection action in order to provide fair and adequate representation of the private and public interests involved.

Manner and terms of participation

(2) The court may determine the manner and terms of the person's participation, including the payment of costs.

Burden of proof

29. The offence alleged in an environmental protection action and the resulting significant harm are to be proved on a balance of probabilities.

Defences

30. (1) The following defences are available in an environmental protection action:

1. (a) the defence of due diligence in complying with this Act and the regulations;
2. (b) the defence that the alleged conduct is authorized by or under an Act of Parliament;
3. (c) except with respect to Her Majesty in right of Canada or a federal source, the defence that the alleged conduct is authorized by or under a law of a government that is the subject of an order made under subsection 10(3); and
4. (d) the defence of officially induced mistake of law.

Other defences not excluded

(2) This section does not limit the availability of any other defences.

Undertakings to pay damages

31. In deciding whether to dispense with an undertaking to pay damages caused by an interlocutory order in an environmental protection action, the court may consider any special circumstances, including whether the action is a test case or raises a novel point of law.

Stay or dismissal

32. (1) A court may stay or dismiss an environmental protection action if it is in the public interest to do so.

Factors to be considered

(2) In deciding whether to stay or dismiss the action, the court may consider

1. (a) environmental, health, safety, economic and social concerns;
2. (b) whether the issues raised in the action would be better resolved in some other way;
3. (c) whether the Minister has an adequate plan to correct or mitigate the harm to the environment or human, animal or plant life or health or otherwise to address the issues raised in the action; and
4. (d) any other relevant matter.

Remedies

33. If a court finds that the plaintiff is entitled to judgment in an environmental protection action, it may grant any relief mentioned in subsection 22(3).

Orders to negotiate plans

34. (1) A court order to negotiate a plan to correct or mitigate the harm to the environment or human, animal or plant life or health may, to the extent that it is reasonable, practicable and ecologically sound, require the plan to provide for

1. (a) the prevention, reduction or elimination of the harm;
2. (b) the restoration of the environment;
3. (c) the restoration of all uses, including enjoyment, of the environment affected by the offence;
4. (d) the payment of money by the defendant as the court may direct to achieve the plan's purposes; and
5. (e) monitoring the implementation of the plan and the progress made in achieving its purposes.

Before making the order, the court must take into account any efforts that the defendant has already made to deal with the harm.

Other orders

(2) The court may also make interlocutory or ancillary orders to ensure that the negotiation of the plan runs smoothly, including orders

1. (a) for the payment of the costs of negotiation;
2. (b) requiring the plaintiff or the defendant to prepare a draft of the plan; and
3. (c) setting a time limit for the negotiations.

Appointment of other person to prepare plan

(3) The court may appoint a person who is not a party to prepare a draft plan if the parties cannot agree on the plan or the court is not satisfied with the plan that they negotiate.

Order to prepare another plan

(4) The court may order the parties to prepare another plan if it is not satisfied with the plan that they negotiate.

Approval and effective date

(5) The court may approve a plan that the parties negotiate or a plan prepared by a person appointed under subsection (3) and the approved plan comes into effect on a day determined by the court.

Restriction on orders to negotiate plans

35. A court may not order the negotiation of a plan to correct or mitigate the harm to the environment or human, animal or plant life or health if it determines that

1. (a) the harm has already been corrected or mitigated; or
2. (b) adequate measures to correct or mitigate the harm have already been ordered under this Act or any other law in force in Canada.

Settlement or discontinuance

36. An environmental protection action may be settled or discontinued only with the approval of the court and on terms that it considers appropriate.

Settlements and orders

37. If an environmental protection action results in an order of a court or a settlement approved by a court,

1. (a) the resolution of any question of fact by the order or settlement is binding on a court in any other environmental protection action in which that question arises; and
2. (b) no other environmental protection action may be brought with respect to the offence or alleged offence dealt with by the order or settlement.

Costs

38. In deciding whether to award costs in an environmental protection action, the court may consider any special circumstances, including whether the action is a test case or raises a novel point of law.

Action to Prevent or Compensate Loss

Injunction

39. Any person who suffers, or is about to suffer, loss or damage as a result of conduct that contravenes any provision of this Act or the regulations may seek an injunction from a court of competent jurisdiction ordering the person engaging in the conduct

1. (a) to refrain from doing anything that it appears to the court causes or will cause the loss or damage;
or
2. (b) to do anything that it appears to the court prevents or will prevent the loss or damage.

Civil cause of action

40. Any person who has suffered loss or damage as a result of conduct that contravenes any provision of this Act or the regulations may, in any court of competent jurisdiction, bring an action to recover from the person who engaged in the conduct

1. (a) an amount equal to the loss or damage proved to have been suffered by the person; and
2. (b) an amount to compensate for the costs that the person incurs in connection with the matter and proceedings under this section.

Other Matters

Evidence of offence

41. (1) In an action under this Part, the record of proceedings in any court in which a defendant was convicted of an offence under this Act is evidence that the defendant committed the offence.

Certificate evidence of conviction

(2) In the action, evidence that a defendant was convicted of an offence under this Act may be given by a certificate stating with reasonable particularity the conviction and sentence of the defendant.

Signature of certificate

(3) The certificate shall be signed by

1. (a) the person who made the conviction; or
2. (b) the clerk of the court in which the conviction was made.

Once it is proved that the defendant is the offender mentioned in the certificate, it is evidence without proof of the signature or the official character of the person appearing to have signed it.

Civil remedies not affected

42. (1) No civil remedy for any conduct is suspended or affected by reason only that the conduct is an offence under this Act.

Remedies not repealed, etc.

(2) Nothing in this Act shall be interpreted so as to repeal, remove or reduce any remedy available to any person under any law in force in Canada.

Damages caused by a ship

(3) No claim for damage caused by a ship may be made under this Act to the extent that a claim for that damage may be made under the *Marine Liability Act* or the *Arctic Waters Pollution Prevention Act*.

1999, c. 33, s. 42; 2001, c. 6, s. 112.

Part 3: Information Gathering, Objectives, Guidelines and Codes of Practice

- | [Interpretation](#)
- | [Environmental Data and Research](#)
- | [Information Gathering](#)
- | [Objectives, Guidelines and Codes of Practice](#)

Interpretation

Definitions

43. The definitions in this section apply in this Part.

"fish" « *poissons* »

"fish" has the meaning assigned by section 2 of the *Fisheries Act*.

"hormone disrupting substance" « *substance hormonoperturbante* »

"hormone disrupting substance" means a substance having the ability to disrupt the synthesis, secretion, transport, binding, action or elimination of natural hormones in an organism, or its progeny, that are responsible for the maintenance of homeostasis, reproduction, development or behaviour of the organism.

Environmental Data and Research

Monitoring, research and publication

44. (1) The Minister shall

- (a) establish, operate and maintain a system for monitoring environmental quality;
- (b) conduct research and studies relating to pollution prevention, the nature, transportation, dispersion, effects, control and abatement of pollution and the effects of pollution on environmental quality, and provide advisory and technical services and information related to that research and those studies;
- (c) conduct research and studies relating to
 - (i) environmental contamination arising from disturbances of ecosystems by human activity,
 - (ii) changes in the normal geochemical cycling of toxic substances that are naturally present in the environment, and
 - (iii) detection and damage to ecosystems;
- (d) collect, process, correlate, interpret, create an inventory of and publish on a periodic basis data on environmental quality in Canada from monitoring systems, research, studies and any other sources;
- (e) formulate plans for pollution prevention and the control and abatement of pollution, including plans respecting the prevention of, preparedness for and response to an environmental emergency and for restoring any part of the environment damaged by or during an emergency, and establish, operate and publicize demonstration projects and make them available for demonstration; and
- (f) publish, arrange for the publication of or distribute through an information clearing-house
 - (i) information respecting pollution prevention,
 - (i) pertinent information in respect of all aspects of environmental quality, and
 - (ii) a periodic report on the state of the Canadian environment.

Cooperation and agreements

(2) The Minister may

- (a) in establishing a system referred to in paragraph (1)(a), cooperate with governments, foreign governments and aboriginal people and with any person who has established or proposes to establish any such system; and
- (b) with the approval of the Governor in Council, enter into agreements for the operation or maintenance of a system referred to in paragraph (1)(a) by the Minister on behalf of any government,

aboriginal people or any person or for the operation or maintenance of any such system by the government or any person on behalf of the Minister.

Cooperation with other bodies

(3) The Minister may, in exercising the powers conferred by paragraphs (1)(b) to (e), act in cooperation with any government, foreign government, government department or agency, institution, aboriginal people or any person and may sponsor or assist in any of their research, studies, planning or activities in relation to environmental quality, pollution prevention, environmental emergencies or the control or abatement of pollution.

Hormone disrupting substances

(4) The Ministers shall conduct research or studies relating to hormone disrupting substances, methods related to their detection, methods to determine their actual or likely short-term or long-term effect on the environment and human health, and preventive, control and abatement measures to deal with those substances to protect the environment and human health.

Role of Minister of Health

45. The Minister of Health shall

- (a) conduct research and studies relating to the role of substances in illnesses or in health problems;
- (b) collect, process, correlate and publish on a periodic basis data from any research or studies done under paragraph (a); and
- (c) distribute available information to inform the public about the effects of substances on human health.

Information Gathering

Notice requiring information

46. (1) The Minister may, for the purpose of conducting research, creating an inventory of data, formulating objectives and codes of practice, issuing guidelines or assessing or reporting on the state of the environment, publish in the *Canada Gazette* and in any other manner that the Minister considers appropriate a notice requiring any person described in the notice to provide the Minister with any information that may be in the possession of that person or to which the person may reasonably be expected to have access, including information regarding the following:

- (a) substances on the Priority Substances List;
- (b) substances that have not been determined to be toxic under Part 5 because of the current extent of the environment's exposure to them, but whose presence in the environment must be monitored if the Minister considers that to be appropriate;
- (c) substances, including nutrients, that can be released into water or are present in products like water conditioners and cleaning products;
- (d) substances released, or disposed of, at or into the sea;
- (e) substances that are toxic under section 64 or that may become toxic;
- (f) substances that may cause or contribute to international or interprovincial pollution of fresh water, salt water or the atmosphere;
- (g) substances or fuels that may contribute significantly to air pollution;
- (h) substances that, if released into Canadian waters, cause or may cause damage to fish or to their habitat;
- (i) substances that, if released into areas of Canada where there are migratory birds, endangered species or other wildlife regulated under any other Act of Parliament, are harmful or capable of causing harm to those birds, species or wildlife;
- (j) substances that are on the list established under regulations made under subsection 200(1);
- (k) the release of substances into the environment at any stage of their life-cycle;
- (l) pollution prevention; and
- (m) use of federal land and of aboriginal land.

Other recipients

(2) The Minister may, in accordance with an agreement signed with a government, require that a person to whom a notice is directed submit the information to the Minister or to that government.

Conditions respecting access to information

(3) An agreement referred to in subsection (2) shall set out conditions respecting access by the Minister or other government to all or part of the information that the person is required to submit and may set out any other conditions respecting the information.

Period of notice and date for compliance

(4) A notice referred to in subsection (1) must indicate the period during which it is in force, which may not exceed three years, and the date or dates within which the person to whom the notice is directed shall comply with the notice.

Compliance with notice

(5) Every person to whom a notice is directed shall comply with the notice.

Extension of time

(6) The Minister may, on request in writing from any person to whom a notice is directed, extend the date or dates within which the person shall comply with the notice.

Manner

(7) The notice must indicate the manner in which the information is to be provided.

Preservation of information

(8) The notice may indicate the period during which, and the location where, the person to whom the notice is directed shall keep copies of the required information, together with any calculations, measurements and other data on which the information is based. The period may not exceed three years from the date the information is required to be submitted to the Minister.

Guidelines

47. (1) The Minister shall issue guidelines respecting the use of the powers provided for by subsection 46(1) and, in issuing those guidelines, the Minister shall take into account any factor that the Minister considers relevant, including, but not limited to,

- (a) the costs and benefits to the Minister and the person to whom the notice under subsection 46(1) is directed;
- (b) the co-ordination of requests for information with other governments, to the extent practicable;
- and
- (c) the manner in which the information collected under subsection 46(1) is to be used.

Consultation

(2) In carrying out the duties under subsection (1), the Minister shall offer to consult with the government of a province and the members of the Committee who are representatives of aboriginal governments and may consult with a government department or agency, aboriginal people, representatives of industry and labour and municipal authorities or with persons interested in the quality of the environment.

Minister may act

(3) At any time after the 60th day following the day on which the Minister offers to consult in accordance

with subsection (2), the Minister may act under subsection (1) if the offer to consult is not accepted by the government of a province or members of the Committee who are representatives of aboriginal governments.

National inventory

48. The Minister shall establish a national inventory of releases of pollutants using the information collected under section 46 and any other information to which the Minister has access, and may use any information to which the Minister has access to establish any other inventory of information.

Publication in whole or in part

49. The notice published under subsection 46(1) must indicate whether or not the Minister intends to publish the information and, if so, whether in whole or in part.

Publication of inventory

50. Subject to subsection 53(4), the Minister shall publish the national inventory of releases of pollutants in any manner that the Minister considers appropriate and may publish or give notice of the availability of any other inventory of information established under section 48, in any manner that the Minister considers appropriate.

Request for confidentiality

51. A person who provides information to the Minister under subsection 46(1) may, if the Minister's intention to publish the information has been indicated under section 49, submit with the information a written request, setting out a reason referred to in section 52, that the information be treated as confidential.

Reasons

52. Despite Part 11, a request under section 51 may only be based on any of the following reasons:

- (a) the information constitutes a trade secret;
- (b) the disclosure of the information would likely cause material financial loss to, or prejudice to the competitive position of, the person providing the information or on whose behalf it is provided; and
- (c) the disclosure of the information would likely interfere with contractual or other negotiations being conducted by the person providing the information or on whose behalf it is provided.

Additional justification

53. (1) The Minister may, after studying the reasons provided under section 52, require the person in question to provide, within 20 days and in writing, additional justification for the request for confidentiality.

Extension of time

(2) The Minister may extend the period mentioned in subsection (1) by up to 10 days if the extension is necessary to permit adequate preparation of the additional justification.

Minister's decision

(3) In determining whether to accept or reject the request, the Minister shall consider whether the reasons are well-founded and, if they are, the Minister may nevertheless reject the request if

- (a) the disclosure is in the interest of the protection of the environment, public health or public safety; and
- (b) the public interest in the disclosure outweighs in importance
 - (i) any material financial loss or prejudice to the competitive position of the person who provided the information or on whose behalf it was provided, and
 - (ii) any damage to the privacy, reputation or human dignity of any individual that may result from the disclosure.

Acceptance of request

(4) If the Minister accepts the request, the information shall not be published.

Publication

(5) If the Minister rejects the request,

(a) the person has the right to ask the Federal Court to review the matter within 30 days after the person is notified that the request has been rejected or within any further time that the Court may, before the expiry of those 30 days, fix or allow; and

(b) the Minister shall advise the person in question of the Minister's intention to publish the information and of the person's right to ask the Federal Court to review the matter.

Applicable provisions

(6) Where a person asks the Federal Court to review the matter under paragraph (5)(a), sections 45, 46 and 47 of the *Access to Information Act* apply, with any modifications that the circumstances require, in respect of a request for a review under that paragraph as if it were an application made under section 44 of that Act.

Objectives, Guidelines and Codes of Practice

Formulation by the Minister

54. (1) For the purpose of carrying out the Minister's mandate related to preserving the quality of the environment, the Minister shall issue

(a) environmental quality objectives specifying goals or purposes for pollution prevention or environmental control, including goals or purposes stated in quantitative or qualitative terms;

(b) environmental quality guidelines specifying recommendations in quantitative or qualitative terms to support and maintain particular uses of the environment;

(c) release guidelines recommending limits, including limits expressed as concentrations or quantities, for the release of substances into the environment from works, undertakings or activities; and

(d) codes of practice respecting pollution prevention or specifying procedures, practices or release limits for environmental control relating to works, undertakings and activities during any phase of their development and operation, including the location, design, construction, start-up, closure, dismantling and clean-up phases and any subsequent monitoring activities.

Scope of objectives, etc.

(2) The objectives, guidelines and codes of practice referred to in subsection (1) shall relate to

(a) the environment;

(b) pollution prevention or the recycling, reusing, treating, storing or disposing of substances or reducing the release of substances into the environment;

(c) works, undertakings or activities that affect or may affect the environment; or

(d) the conservation of natural resources and sustainable development.

Consultation

(3) In carrying out the duties under subsection (1), the Minister shall offer to consult with the government of a province and the members of the Committee who are representatives of aboriginal governments and may consult with a government department or agency, aboriginal people, representatives of industry and labour and municipal authorities or with persons interested in the quality of the environment.

Minister may act

(3.1) At any time after the 60th day following the day on which the Minister offers to consult in accordance with subsection (3), the Minister may act under subsection (1) if the offer to consult is not accepted by the

government of a province or members of the Committee who are representatives of aboriginal governments.

Publication

(4) The Minister shall publish any objectives, guidelines or codes of practice issued under this section, or give notice of them, in the *Canada Gazette* and in any other manner that the Minister considers appropriate.

Formulation by the Minister of Health

55. (1) For the purpose of carrying out the mandate of the Minister of Health related to preserving and improving public health under this Act, the Minister of Health shall issue objectives, guidelines and codes of practice with respect to the elements of the environment that may affect the life and health of the people of Canada.

Consultation

(2) In carrying out the duties under subsection (1), the Minister of Health may consult with a government, a government department or agency, aboriginal people, representatives of industry and labour and municipal authorities or with persons interested in the preservation and improvement of public health.

Publication

(3) The Minister of Health shall publish any objectives, guidelines or codes of practice issued under this section, or give notice of them, in the *Canada Gazette* and in any other manner that the Minister of Health considers appropriate.

Part 4: Pollution Prevention

- | [Pollution Prevention Plans](#)
- | [Model Plans and Guidelines](#)
- | [Other Initiatives](#)

Pollution Prevention Plans

Requirement for pollution prevention plans

56. (1) The Minister may, at any time, publish in the *Canada Gazette* and in any other manner that the Minister considers appropriate a notice requiring any person or class of persons described in the notice to prepare and implement a pollution prevention plan in respect of a substance or group of substances specified on the List of Toxic Substances in Schedule 1, or to which subsection 166(1) or 176(1) applies.

Contents of notice

(2) The notice may specify

- (a) the substance or group of substances in relation to which the plan is to be prepared;
- (b) the commercial, manufacturing, processing or other activity in relation to which the plan is to be prepared;
- (c) the factors to be considered in preparing the plan;
- (d) the period within which the plan is to be prepared;
- (e) the period within which the plan is to be implemented; and
- (f) any administrative matter necessary for the purposes of this Part.

Extension of time

(3) Where the Minister is of the opinion that further time is necessary to prepare or implement the plan, the Minister may extend the period for a person who submits a written request before the expiry of the period referred to in the notice or of any extended period.

Publication of notice of extension

(4) The Minister shall publish in the *Canada Gazette* and in any other manner that the Minister considers appropriate a notice stating the name of any person for whom an extension is granted, whether the extension is for the preparation or implementation of the plan, and the duration of the period of the extension.

Application for waiver

(5) On a written request submitted by any person to whom a notice under subsection (1) is directed, the Minister may waive the requirement for that person to consider a factor specified under paragraph (2)(c) where the Minister is of the opinion that it is not reasonable or practicable to consider the factor on the basis of reasons provided in the request.

Plan prepared or implemented for another purpose

57. (1) Subject to subsection (2), where a person who is required to prepare or implement a pollution prevention plan under a notice published under section 56 has prepared or implemented a plan in respect of pollution prevention on a voluntary basis or for another government or under another Act of Parliament that meets all or some of the requirements of the notice, the person may use that plan for the purposes of meeting the requirements of this Part and, in that case, the plan shall be considered to be a pollution prevention plan that has been prepared or implemented under this Part.

Where partial requirements met

(2) Where a person uses a plan under subsection (1) that does not meet all of the requirements of the

notice, the person shall

- (a) amend the plan so that it meets all of those requirements; or
- (b) prepare an additional pollution prevention plan that meets the remainder of those requirements.

Declaration of preparation

58. (1) Every person who is required to prepare a pollution prevention plan under section 56 or 291 or under an agreement in respect of environmental protection alternative measures shall file, within 30 days after the end of the period for the preparation of the plan specified in the notice referred to in subsection 56(1) or extended under subsection 56(3), or specified by the court under section 291 or in the agreement, as the case may be, a written declaration to the Minister that the plan has been prepared and is being implemented.

Declaration of implementation

(2) Every person who is required to implement a pollution prevention plan under section 56 or 291 or under an agreement in respect of environmental protection alternative measures shall file, within 30 days after the completion of the implementation of the plan, a written declaration to the Minister that the implementation of the plan has been completed.

Filing of amended declaration

(3) Where a person has filed a declaration under subsection (1) or (2) and the declaration contains information that, at any time after the filing, has become false or misleading, that person shall file an amended declaration to the Minister within 30 days after that time.

Form of declaration

(4) A declaration referred to in subsection (1), (2) or (3) shall be filed in the form and manner and contain the information specified by the Minister.

Requirement to keep plan

59. Every person who is required to prepare a pollution prevention plan under section 56 or 291 or under an agreement in respect of environmental protection alternative measures shall keep a copy of the plan at the place in Canada in relation to which the plan is prepared.

Requirement to submit certain plans

60. (1) The Minister may publish in the *Canada Gazette* and in any other manner that the Minister considers appropriate a notice requiring any person or class of persons described in the notice who are required to prepare and implement a pollution prevention plan under section 56 to submit, within the period specified by the Minister, the plan or any part of the plan for the purpose of determining and assessing preventive or control actions in respect of a substance or group of substances.

Submission of plans required by court or agreement

(2) The Minister may publish in the *Canada Gazette* and in any other manner that the Minister considers appropriate a notice requiring any person or class of persons described in the notice who are required to prepare and implement a pollution prevention plan under section 291 or under an agreement in respect of environmental protection alternative measures to submit, within the period specified by the Minister, the plan or any part of the plan.

Model Plans and Guidelines

Model plans

61. For the purpose of providing guidance in the preparation of a pollution prevention plan, the Minister may publish in the *Canada Gazette* or in any other manner that the Minister considers appropriate a model pollution prevention plan or a notice stating where a copy of the plan may be obtained.

Guidelines

62. (1) The Minister shall, with particular consideration of paragraph 2(1)(m), develop guidelines respecting the circumstances in which and the conditions under which pollution prevention planning is appropriate.

Consultation

(2) In carrying out the duties under subsection (1), the Minister shall offer to consult with the government of a province and the members of the Committee who are representatives of aboriginal governments and may consult with a government department or agency, aboriginal people, representatives of industry and labour and municipal authorities or with persons interested in the quality of the environment.

Minister may act

(3) At any time after the 60th day following the day on which the Minister offers to consult in accordance with subsection (2), the Minister may act under subsection (1) if the offer to consult is not accepted by the government of a province or members of the Committee who are representatives of aboriginal governments.

Other Initiatives

Information clearing-house

63. (1) The Minister may, for the purposes of encouraging and facilitating pollution prevention, establish and maintain a national pollution prevention information clearing-house in order to collect, exchange and distribute information relating to pollution prevention.

Recognition program

(2) The Minister may establish a program to publicly recognize significant achievements in the area of pollution prevention.

Cooperation with other bodies

(3) The Minister may, in exercising the powers conferred by subsections (1) and (2), act alone or in cooperation with any government in Canada or government of a foreign state or any of its institutions or any person.

Part 5: Controlling Toxic Substances

- | [Interpretation](#)
- | [General](#)
- | [Information Gathering](#)
- | [Priority Substances and Other Substances](#)
- | [Substances and Activities New to Canada](#)
- | [Regulation of Toxic Substances](#)
- | [Release of Toxic Substances](#)
- | [Export of Substances](#)

Interpretation

Toxic substances

64. For the purposes of this Part and Part 6, except where the expression "inherently toxic" appears, a substance is toxic if it is entering or may enter the environment in a quantity or concentration or under conditions that

1. (a) have or may have an immediate or long-term harmful effect on the environment or its biological diversity;
2. (b) constitute or may constitute a danger to the environment on which life depends; or
3. (c) constitute or may constitute a danger in Canada to human life or health.

Definition of "virtual elimination"

65. (1) In this Part, "virtual elimination" means, in respect of a toxic substance released into the environment as a result of human activity, the ultimate reduction of the quantity or concentration of the substance in the release below the level of quantification specified by the Ministers in the List referred to in subsection (2).

Virtual Elimination List

(2) The Ministers shall compile a list to be known as the Virtual Elimination List, and the List shall specify the level of quantification for each substance on the List.

Implementing virtual elimination

(3) When the level of quantification for a substance has been specified on the List referred to in subsection (2), the Ministers shall prescribe the quantity or concentration of the substance that may be released into the environment either alone or in combination with any other substance from any source or type of source, and, in doing so, shall take into account any factor or information provided for in section 91, including, but not limited to, environmental or health risks and any other relevant social, economic or technical matters.

Definition of "level of quantification"

65.1 In section 65, "level of quantification" means, in respect of a substance, the lowest concentration that can be accurately measured using sensitive but routine sampling and analytical methods.

General

Domestic Substances List

66. (1) The Minister shall, for the purposes of sections 73, 74 and 81, maintain a list to be known as the Domestic Substances List, and the List shall specify all substances that the Minister is satisfied were, between January 1, 1984 and December 31, 1986,

1. (a) manufactured in or imported into Canada by any person in a quantity of not less than 100 kg in any one calendar year; or

2. (b) in Canadian commerce or used for commercial manufacturing purposes in Canada.

Non-domestic Substances List

(2) The Minister shall, for the purpose of section 81, maintain a list to be known as the Non-domestic Substances List, and the List shall specify substances, other than

1. (a) the substances referred to in subsection (1); and
2. (b) living organisms within the meaning of Part 6.

Amendment of Lists

(3) Where a substance was not included on the Domestic Substances List and the Minister subsequently learns that, between January 1, 1984 and December 31, 1986, the requirements set out in paragraph (1)(a) or (b) were met in respect of the substance, the Minister shall add the substance to the List and, where necessary, delete it from the Non-domestic Substances List.

Amendment of Lists

(4) Where the Minister includes a substance on the Domestic Substances List and subsequently learns that, between January 1, 1984 and December 31, 1986, the requirements set out in paragraph (1)(a) or (b) were not met in respect of the substance, the Minister shall delete the substance from the List and may add it to the Non-domestic Substances List.

Publication of Lists

(5) The Minister shall publish in the *Canada Gazette* and in any other manner that the Minister considers appropriate the Domestic Substances List, the Non-domestic Substances List and any amendments to those Lists.

Designation

(6) The Minister may, by order, designate any person or class of persons to exercise the powers and perform the duties and functions set out in this section.

Regulation of criteria

67. (1) The Governor in Council may, on the recommendation of the Ministers, make regulations

1. (a) respecting a property or characteristic of a substance, including, without limiting the generality of the foregoing, persistence and bioaccumulation;
2. (b) prescribing the substances or groups of substances in respect of which the property or characteristic may be applicable;
3. (c) prescribing the conditions under which and the circumstances in which the property or characteristic may be applicable; and
4. (d) respecting the conditions, test procedures and laboratory practices to be followed for analysing, testing or measuring the property or characteristic.

Condition

(2) No regulation that is applicable to a mineral or metal may be made under subsection (1) unless, in the opinion of the Ministers, the natural occurrence, properties and characteristics of that mineral or metal in the environment have been taken into consideration.

1999, c. 33, s. 67; 2001, c. 34, s. 28(F).

Research, investigation and evaluation

68. For the purpose of assessing whether a substance is toxic or is capable of becoming toxic, or for the

purpose of assessing whether to control, or the manner in which to control, a substance, including a substance specified on the List of Toxic Substances in Schedule 1, either Minister may

1. (a) collect or generate data and conduct investigations respecting any matter in relation to a substance, including, without limiting the generality of the foregoing,
 1. (i) whether short-term exposure to the substance causes significant effects,
 2. (ii) the potential of organisms in the environment to be widely exposed to the substance,
 3. (iii) whether organisms are exposed to the substance via multiple pathways,
 4. (iv) the ability of the substance to cause a reduction in metabolic functions of an organism,
 5. (v) the ability of the substance to cause delayed or latent effects over the lifetime of an organism,
 6. (vi) the ability of the substance to cause reproductive or survival impairment of an organism,
 7. (vii) whether exposure to the substance has the potential to contribute to population failure of a species,
 8. (viii) the ability of the substance to cause transgenerational effects,
 9. (ix) quantities, uses and disposal of the substance,
 10. (x) the manner in which the substance is released into the environment,
 11. (xi) the extent to which the substance can be dispersed and will persist in the environment,
 12. (xii) the development and use of alternatives to the substance,
 13. (xiii) methods of controlling the presence of the substance in the environment, and
 14. (xiv) methods of reducing the quantity of the substance used or produced or the quantities or concentration of the substance released into the environment;
2. (b) correlate and evaluate any data collected or generated under paragraph (a) and publish results of any investigations carried out under that paragraph; and
3. (c) provide information and make recommendations respecting any matter in relation to a substance, including, without limiting the generality of the foregoing, measures to control the presence of the substance in the environment.

Formulation of guidelines by the Ministers

69. (1) Either Minister or both Ministers, as the case may be, may issue guidelines for the purposes of the interpretation and application of the provisions of this Part for which they have responsibility.

Consultation

(2) In exercising the powers under subsection (1), either Minister or both Ministers shall offer to consult with the government of a province and the members of the Committee who are representatives of aboriginal governments and may consult with a government department or agency, aboriginal people, representatives of industry and labour and municipal authorities or with persons interested in assessing and controlling toxic substances.

Saving

(2.1) Nothing in subsection (2) shall prevent the Minister from exercising the powers under subsection (1) at any time after the sixtieth day following the day an offer is made under subsection (2).

Guidelines public

(3) Guidelines issued under this section shall be made available to the public, and the Minister who issued the guidelines shall give notice of them in the *Canada Gazette* and in any other manner that the Minister considers appropriate.

Information Gathering

Notice to the Minister

70. Where a person

1. (a) imports, manufactures, transports, processes or distributes a substance for commercial purposes,

or

2. (b) uses a substance in a commercial manufacturing or processing activity,

and obtains information that reasonably supports the conclusion that the substance is toxic or is capable of becoming toxic, the person shall without delay provide the information to the Minister unless the person has actual knowledge that either Minister already has the information.

Notice requiring information, samples or testing

71. (1) The Minister may, for the purpose of assessing whether a substance is toxic or is capable of becoming toxic, or for the purpose of assessing whether to control, or the manner in which to control, a substance, including a substance specified on the List of Toxic Substances in Schedule 1,

1. (a) publish in the *Canada Gazette* and in any other manner that the Minister considers appropriate a notice requiring any person who is described in the notice and who is or was within the period specified in the notice engaged in any activity involving the substance to notify the Minister that the person is or was during that period engaged in that activity;
2. (b) publish in the *Canada Gazette* and in any other manner that the Minister considers appropriate a notice requiring any person who is described in the notice to provide the Minister with any information and samples referred to in subsection (2) that may be in the person's possession or to which the person may reasonably be expected to have access; and
3. (c) subject to section 72, send a written notice to any person who is described in the notice and who is or was within the period specified in the notice engaged in any activity involving the importation or manufacturing of the substance or any product containing the substance requiring the person to conduct toxicological and other tests that the Minister may specify in the notice and submit the results of the tests to the Minister.

Contents of notice

(2) A notice sent under paragraph (1)(b) may require any information and samples, including

1. (a) in respect of a substance, available toxicological information, available monitoring information, samples of the substance and information on the quantities, composition, uses and distribution of the substance and products containing the substance; and
2. (b) in respect of a work, undertaking or activity, plans, specifications, studies and information on procedures.

Compliance with notice

(3) Every person to whom a notice referred to in any of paragraphs (1)(a) to (c) is directed or sent shall comply with the notice within the time specified in the notice.

Extension of time

(4) Despite subsection (3), the Minister may, on request in writing from any person to whom a notice referred to in paragraph (1)(a), (b) or (c) has been sent, extend the time or times within which the person shall comply with the notice.

1999, c. 33, s. 71; 2001, c. 34, s. 29(F).

Exercise of power under paragraph 71(1)(c)

72. The Minister may not exercise the power under paragraph 71(1)(c) in relation to a substance unless the Ministers have reason to suspect that the substance is toxic or capable of becoming toxic or it has been determined under this Act that the substance is toxic or capable of becoming toxic.

Priority Substances and Other Substances

Categorization of substances on Domestic Substances List

73. (1) The Ministers shall, within seven years from the giving of Royal Assent to this Act, categorize the substances that are on the Domestic Substances List by virtue of section 66, for the purpose of identifying the substances on the List that, in their opinion and on the basis of available information,

1. (a) may present, to individuals in Canada, the greatest potential for exposure; or
2. (b) are persistent or bioaccumulative in accordance with the regulations, and inherently toxic to human beings or to non-human organisms, as determined by laboratory or other studies.

Information

(2) Where available information is insufficient to identify substances as referred to in that subsection, the Ministers may, to the extent possible, cooperate with other governments in Canada, governments of foreign states or any interested persons to acquire the information required for the identification.

Application of subsection 81(3)

(3) When categorizing substances under subsection (1), the Ministers shall examine the substances that are on the Domestic Substances List to determine whether an amendment should be made to the List to indicate that subsection 81(3) applies with respect to those substances.

Screening level risk assessment

74. The Ministers shall conduct a screening assessment of a substance in order to determine whether the substance is toxic or capable of becoming toxic and shall propose one of the measures described in subsection 77(2) if

1. (a) the Ministers identify a substance on the Domestic Substances List to be a substance described in paragraph 73(1)(a) or (b); or
2. (b) the substance has been added to the Domestic Substances List under section 105.

Definition of "jurisdiction"

75. (1) In this section, "jurisdiction" means

1. (a) a government in Canada; or
2. (b) the government of a foreign state or of a subdivision of a foreign state that is a member of the Organization for Economic Co-operation and Development.

Procedures for exchange of information with other jurisdictions

(2) The Minister shall, to the extent possible, cooperate and develop procedures with jurisdictions, other than the Government of Canada, to exchange information respecting substances that are specifically prohibited or substantially restricted by or under the legislation of those jurisdictions for environmental or health reasons.

Review of decisions of other jurisdictions

(3) Where the Minister is notified in accordance with procedures developed under subsection (2) of a decision to specifically prohibit or substantially restrict any substance by or under the legislation of another jurisdiction for environmental or health reasons, the Ministers shall review the decision in order to determine whether the substance is toxic or capable of becoming toxic, unless the decision relates to a substance the only use of which in Canada is regulated under another Act of Parliament that provides for environmental and health protection.

Priority Substances List

76. (1) The Ministers shall compile and may amend from time to time in accordance with subsection (5) a list, to be known as the Priority Substances List, and the List shall specify substances in respect of which the Ministers are satisfied priority should be given in assessing whether they are toxic or capable of becoming toxic.

Consultation

(2) For the purposes of subsection (1), the Minister shall offer to consult with the government of a province and the members of the Committee who are representatives of aboriginal governments and may consult with a government department or agency, aboriginal people, representatives of industry and labour and municipal authorities or with persons interested in the quality of the environment or the preservation and improvement of public health.

Minister may act

(2.1) At any time after the 60th day following the day on which the Minister offers to consult in accordance with subsection (2), the Minister may act under subsection (1) if the offer to consult is not accepted by the government of a province or members of the Committee who are representatives of aboriginal governments.

Request for addition to Priority Substances List

(3) Any person may file in writing with the Minister a request that a substance be added to the Priority Substances List and the request shall state the reasons for adding the substance to the List.

Consideration of request

(4) The Ministers shall consider a request filed under subsection (3) and, within 90 days after the request is filed, the Minister shall inform the person who filed the request of how the Minister intends to deal with it and the reasons for dealing with it in that manner.

Amendments to Priority Substances List

(5) The Ministers may amend the Priority Substances List

1. (a) by adding a substance to the List where the Ministers are satisfied on the basis of a determination made as a result of a screening assessment conducted under section 74, the review of a decision of another jurisdiction under subsection 75(3), consultation under subsection (2) or a request made under subsection (3) or for any other reason that priority should be given in assessing whether the substance is toxic or capable of becoming toxic; and
2. (b) by deleting a substance from the List where the Ministers have determined whether the substance is toxic or capable of becoming toxic.

Publication of Priority Substances List

(6) The Minister shall publish in the *Canada Gazette* and in any other manner that the Minister considers appropriate the Priority Substances List and any amendments to the List.

Weight of evidence and precautionary principle

76.1 When the Ministers are conducting and interpreting the results of

1. (a) a screening assessment under section 74,
2. (b) a review of a decision of another jurisdiction under subsection 75(3) that, in their opinion, is based on scientific considerations and is relevant to Canada, or
3. (c) an assessment whether a substance specified on the Priority Substances List is toxic or capable of becoming toxic,

the Ministers shall apply a weight of evidence approach and the precautionary principle.

Publication after assessment

77. (1) Where the Ministers have conducted

1. (a) a screening assessment under section 74,

2. (b) a review of a decision of another jurisdiction under subsection 75(3) that, in their opinion, is based on scientific considerations and is relevant to Canada, or
3. (c) an assessment whether a substance specified on the Priority Substances List is toxic or capable of becoming toxic,

the Ministers shall publish in the *Canada Gazette* and either Minister may publish in any other manner that that Minister considers appropriate a statement indicating one of the measures referred to in subsection (2) that the Ministers propose to take and a summary of the scientific considerations on the basis of which the measure is proposed.

Proposed measures

(2) Subject to subsection (3), for the purposes of subsection (1), the Ministers shall propose one of the following measures:

1. (a) taking no further action in respect of the substance;
2. (b) unless the substance is already on the Priority Substances List, adding the substance to the Priority Substances List; or
3. (c) recommending that the substance be added to the List of Toxic Substances in Schedule 1 and, where applicable under subsection (4), the implementation of virtual elimination under subsection 65(3).

Mandatory proposal

(3) Where, based on a screening assessment conducted under section 74, the substance is determined to be toxic or capable of becoming toxic, and the Ministers are satisfied that

1. (a) the substance may have a long-term harmful effect on the environment and is
2. (i) persistent and bioaccumulative in accordance with the regulations, and
3. (ii) inherently toxic to human beings or non-human organisms, as determined by laboratory or other studies, and
4. (b) the presence of the substance in the environment results primarily from human activity,

the Ministers shall propose to take the measure referred to in paragraph (2)(c).

Proposal for virtual elimination

(4) Where the Ministers propose to take the measure referred to in paragraph (2)(c) in respect of a substance and the Ministers are satisfied that

1. (a) the substance is persistent and bioaccumulative in accordance with the regulations,
2. (b) the presence of the substance in the environment results primarily from human activity, and
3. (c) the substance is not a naturally occurring radionuclide or a naturally occurring inorganic substance,

the Ministers shall propose the implementation of virtual elimination under subsection 65(3) of the substance.

Scientific consultation

(5) Any person may, within 60 days after publication of the statement referred to in subsection (1), file with the Minister written comments on the measure the Ministers propose to take and the scientific considerations on the basis of which the measure is proposed.

Publication of final decision

(6) After taking into consideration in an expeditious manner the comments filed under subsection (5), the Ministers shall publish in the *Canada Gazette*

1. (a) a summary of the screening assessment conducted under section 74, of the review of a decision of another jurisdiction under subsection 75(3) or of a report of the assessment of substances specified on

the Priority Substances List, as the case may be;

2. (b) a statement indicating the measure that the Ministers propose to take; and
3. (c) where the measure is that referred to in paragraph (2)(c), a statement indicating the manner in which the Ministers intend to develop a proposed regulation or instrument respecting preventive or control actions in relation to the substance.

Report of assessment

(7) Where the Ministers publish a statement under subsection (6) in respect of a substance specified on the Priority Substances List, the Ministers shall make a report of the assessment of the substance available to the public.

Notice of objection

(8) Where the Ministers make an assessment whether a substance specified on the Priority Substances List is toxic or is capable of becoming toxic and decide not to recommend that the substance be added to the List of Toxic Substances in Schedule 1, any person may, within 60 days after publication of the decision in the *Canada Gazette*, file a notice of objection with the Minister requesting that a board of review be established under section 333 and stating the reason for the objection.

Recommendation to Governor in Council

(9) The Ministers shall make a recommendation for an order under subsection 90(1) when publishing a statement under paragraph (6)(b) indicating that the measure that they propose to take is a recommendation that the substance be added to the List of Toxic Substances in Schedule 1.

Notice of objection

78. (1) Subject to subsections (2) to (4), where a substance has been specified on the Priority Substances List for a period of five years and the Ministers have not yet determined whether the substance is toxic or capable of becoming toxic, any person may file a notice of objection with the Minister requesting that a board of review be established under section 333.

Notice of suspension of five year period

(2) Where a substance is specified on the Priority Substances List and the Ministers are satisfied that new or additional information is required to assess whether the substance is toxic or capable of becoming toxic, the Minister shall publish a notice in the *Canada Gazette* indicating

1. (a) that the period of five years referred to in subsection (1) is suspended and the duration of the suspension; and
2. (b) the new or additional information that is required to assess whether the substance is toxic or capable of becoming toxic, unless another provision of this Part requires the submission of the new or additional information.

Contents of notice

(3) Where a notice is published under subsection (2), the operation of subsection (1) in relation to the substance is suspended until the earlier of

1. (a) the expiry of the period determined by the Ministers, notice of which is given in the *Canada Gazette*, and
2. (b) the time when the required information becomes available to the Ministers.

Notice of objection after a suspension

(4) Where a notice is published under subsection (2) and the Ministers have not yet determined whether the substance is toxic or capable of becoming toxic within a period of two years after the date on which the suspension referred to in the notice ends, any person may file a notice of objection with the Minister requesting that a board of review be established under section 333.

Plans required for virtual elimination

79. (1) Where the Minister publishes in the *Canada Gazette* under subsection 77(6) a statement indicating that the proposed measure, as confirmed or amended, is the implementation of virtual elimination under subsection 65(3) in respect of a substance, the Minister shall in that statement require any person who is described in it to prepare and submit to the Minister a plan in respect of the substance in relation to the work, undertaking or activity of the person.

Content of plan

(2) Every person who is required to prepare and submit a plan under subsection (1)

1. (a) shall include in it a description of the proposed actions in respect of the implementation of virtual elimination under subsection 65(3) of the substance in relation to the work, undertaking or activity of the person and the period within which the proposed actions are to be completed; and
2. (b) may include in it relevant information respecting measurable quantities or concentrations of the substance, environmental or health risks and social, economic or technical matters.

Compliance with statement

(3) Every person to whom a statement referred to in subsection (1) is directed shall comply with it within the period specified in the statement.

Time delay

(4) The period of time to be specified in the statement shall begin no earlier than the date on which an order is made under subsection 90(1) adding the substance to the List of Toxic Substances in Schedule 1.

Substances and Activities New to Canada

Definitions

80. The definitions in this section apply in sections 81 to 89.

"significant new activity" « *nouvelle activité* »

"significant new activity" includes, in respect of a substance, any activity that results in or may result in

1. (a) the entry or release of the substance into the environment in a quantity or concentration that, in the Ministers' opinion, is significantly greater than the quantity or concentration of the substance that previously entered or was released into the environment; or
2. (b) the entry or release of the substance into the environment or the exposure or potential exposure of the environment to the substance in a manner and circumstances that, in the Ministers' opinion, are significantly different from the manner and circumstances in which the substance previously entered or was released into the environment or of any previous exposure or potential exposure of the environment to the substance.

"substance" « *substance* »

"substance" means a substance other than a living organism within the meaning of Part 6.

Manufacture or import of substances

81. (1) Where a substance is not specified on the Domestic Substances List and subsection (2) does not apply, no person shall manufacture or import the substance unless

1. (a) the prescribed information with respect to the substance has been provided by the person to the Minister accompanied by the prescribed fee, on or before the prescribed date; and
2. (b) the period for assessing the information under section 83 has expired.

Transitional provisions

(2) Where a person has, between January 1, 1987 and June 30, 1994, manufactured or imported a substance that is not specified on the Domestic Substances List, no person shall manufacture or import the substance after June 30, 1994 unless, within 180 days after that date or on or before the prescribed date, the prescribed information has been provided to the Minister with respect to the substance by that person.

Notification of significant new activity in respect of substance on List

(3) Where a substance is specified on the Domestic Substances List with an indication that this subsection applies with respect to the substance, no person shall use, manufacture or import the substance for a significant new activity that is indicated on the List with respect to the substance unless

1. (a) the person has provided the Minister with the prescribed information, on or before the date that is specified by the Minister or prescribed, accompanied by the prescribed fee; and
2. (b) the period for assessing the information specified by the Minister or provided under section 83 has expired.

Notification of significant new activity in respect of substance not on List

(4) Where a substance is not specified on the Domestic Substances List and the Minister publishes a notice in the *Canada Gazette* indicating that this subsection applies with respect to the substance, no person shall use the substance for a significant new activity that is indicated in the notice unless

1. (a) the person has provided the Minister with the prescribed information, on or before the date that is specified by the Minister or prescribed, accompanied by the prescribed fee; and
2. (b) the period for assessing the information specified by the Minister or provided under section 83 has expired.

Transfer of rights in respect of substance

(5) Where prescribed information with respect to a substance has been provided under subsection (1), (2), (3) or (4) by a person who subsequently transfers the right or privilege in relation to the substance for which the information was provided, the information is, subject to any conditions that may be prescribed, deemed to have been provided by the transferee of that right or privilege.

Application

(6) Subsections (1) to (4) do not apply to

1. (a) a substance that is manufactured or imported for a use that is regulated under any other Act of Parliament that provides for notice to be given before the manufacture, import or sale of the substance and for an assessment of whether it is toxic or capable of becoming toxic;
2. (b) transient reaction intermediates that are not isolated and are not likely to be released into the environment;
3. (c) impurities, contaminants and partially unreacted materials the formation of which is related to the preparation of a substance;
4. (d) substances produced when a substance undergoes a chemical reaction that is incidental to the use to which the substance is put or that results from storage or from environmental factors; or
5. (e) a substance that is manufactured, used or imported in a quantity that does not exceed the maximum quantity prescribed as exempt from this section.

Governor in Council may amend Schedule 2

(7) For the purposes of the administration of this section, the Governor in Council has the exclusive responsibility for determining whether or not the requirements referred to in paragraph (6)(a) are met by or under an Act of Parliament referred to in that paragraph, or regulations made under that Act, and

(a) if the Governor in Council determines that the requirements referred to in paragraph (6)(a) are met by or under an Act of Parliament referred to in that paragraph, or regulations made under that Act, the Governor in

Council may by order add to Schedule 2 the name of that Act or those regulations, as the case may be, and the fact that an Act or regulations are listed in Schedule 2 is conclusive proof that the requirements referred to in paragraph (6)(a) are met; and

(b) if the Governor in Council determines that the requirements referred to in paragraph (6)(a) are no longer met by or under an Act of Parliament, or regulations, listed in Schedule 2, the Governor in Council may by order delete from Schedule 2 the name of that Act or those regulations, as the case may be.

Waiver of information requirements

(8) On the request of any person to whom subsection (1), (2), (3) or (4) applies, the Minister may waive any of the requirements to provide information under that subsection if

1. (a) in the opinion of the Ministers, the information is not needed in order to determine whether the substance is toxic or capable of becoming toxic;
2. (b) the substance is to be used for a prescribed purpose or manufactured at a location where, in the opinion of the Ministers, the person requesting the waiver is able to contain the substance so as to satisfactorily protect the environment and human health; or
3. (c) it is not, in the opinion of the Ministers, practicable or feasible to obtain the test data necessary to generate the information.

Publication of notice of waiver

(9) The Minister shall publish in the *Canada Gazette* a notice stating the name of any person to whom a waiver is granted and the type of information to which it relates.

Compliance with waiver

(10) Where the Minister waives any of the requirements for information under paragraph (8)(b), the person to whom the waiver is granted shall not use, manufacture or import the substance unless it is for the purpose prescribed pursuant to regulations made under paragraph 89(1)(f) or at the location specified in the request for the waiver, as the case may be.

Correction of information

(11) A person who has provided information under this section, including for the purposes of a request for a waiver under subsection (8), or under section 82 or 84 shall notify the Minister of any corrections to the information as soon as possible after learning of them.

Request for information previously waived

(12) Where the Minister is notified of any corrections to information that was provided for the purposes of a request for a waiver under subsection (8), the Minister may, after consideration by the Ministers of the corrections, require the person to whom the waiver was granted to provide the Minister with the information to which the waiver related within the time specified by the Minister.

Application of section 84

(13) Where the Ministers suspect, after considering

1. (a) any corrections received under subsection (11), or
2. (b) the information provided under subsection (12),

that a substance is toxic or capable of becoming toxic, the Minister may exercise any of the powers referred to in paragraphs 84(1)(a) to (c).

Notification of excess quantity

(14) Where a person manufactures or imports a substance in accordance with this section in excess of any

quantity referred to in paragraph 87(1)(b), the person shall, within 30 days after the quantity is exceeded, notify the Minister that it has been exceeded.

Prohibition of activity

82. (1) Where the Minister has reasonable grounds to believe that a person has used, manufactured or imported a substance in contravention of subsection 81(1), (3) or (4), the Minister may, in writing, require the person to provide the information referred to in that subsection and prohibit any activity involving the substance until the expiry of the period for assessing the information under section 83.

Prohibition of activity

(2) Where the Minister has reasonable grounds to believe that a person has manufactured or imported a substance in contravention of subsection 81(2), the Minister may, in writing, prohibit any activity involving the substance until the prescribed information is provided to the Minister.

Waiver of information requirements

(3) On the request of any person required under subsection (1) or (2) to provide information, the Minister may waive any of the requirements for prescribed information if one of the conditions specified in paragraphs 81(8)(a) to (c) is met and, in that case, subsections 81(9) to (13) apply with respect to the waiver.

Assessment of information

83. (1) Subject to subsection (4), the Ministers shall, within the prescribed assessment period, assess information provided under subsection 81(1), (3) or (4) or paragraph 84(1)(c) or otherwise available to them in respect of a substance in order to determine whether it is toxic or capable of becoming toxic.

Assessment of information

(2) Subject to subsections (3) and (4), the Ministers shall assess information provided under subsection 82(1) or otherwise available to them in respect of a substance in order to determine whether it is toxic or capable of becoming toxic.

Time for assessment

(3) An assessment of information under subsection (2) shall be made following the date on which the information is provided within a period that does not exceed the number of days in the prescribed assessment period.

Extension of assessment period

(4) Where the Ministers are of the opinion that further time is necessary to assess any information, the Minister may, before the expiry of the assessment period referred to in subsection (1) or (3), extend the period for assessing the information, but the extension shall not exceed the number of days in the prescribed assessment period.

Notification of extension

(5) Where the Minister extends the period for assessing information, the Minister shall, before the expiry of the assessment period referred to in subsection (1) or (3), notify the person who provided the information.

Termination of period

(6) The Minister may, before the expiry of the assessment period referred to in subsection (1) or (3), terminate the period for assessing information and, immediately before doing so, shall notify the person who provided the information.

Action to be taken after assessment

84. (1) Where the Ministers have assessed any information under section 83 and they suspect that a substance is toxic or capable of becoming toxic, the Minister may, before the expiry of the period for assessing the information,

1. (a) permit any person to manufacture or import the substance, subject to any conditions that the Ministers may specify;
2. (b) prohibit any person from manufacturing or importing the substance; or
3. (c) request any person to provide any additional information or submit the results of any testing that the Ministers consider necessary for the purpose of assessing whether the substance is toxic or capable of becoming toxic.

Additional information or testing

(2) Where the Minister requests additional information or test results under paragraph (1)(c), the person to whom the request is directed shall not manufacture or import the substance unless

1. (a) the person provides the additional information or submits the test results; and
2. (b) the period for assessing information under section 83 has expired or a period of 90 days after the additional information or test results were provided has expired, whichever is later.

Variation of conditions and prohibitions

(3) The Minister may vary or rescind a condition or prohibition specified or imposed under paragraph (1)(a) or (b).

Expiry of prohibition

(4) Any prohibition on the manufacture or importation of a substance imposed under paragraph (1)(b) expires two years after it is imposed unless, before the expiry of the two years, the Governor in Council publishes in the *Canada Gazette* a notice of proposed regulations under section 93 in respect of the substance, in which case the prohibition expires on the day the regulations come into force.

Publication of conditions and prohibitions

(5) Where the Minister specifies, imposes, varies or rescinds any condition for or prohibition on the manufacture or importation of a substance, the Minister shall publish in the *Canada Gazette* a notice setting out the condition or prohibition and the substance in respect of which it applies.

Significant new activity

85. (1) Where the Ministers have assessed any information under section 83 in respect of a substance that is not on the Domestic Substances List and they suspect that a significant new activity in relation to the substance may result in the substance becoming toxic, the Minister may, within 90 days after the expiry of the period for assessing the information, publish in the *Canada Gazette*, and in any other manner that the Minister considers appropriate, a notice indicating that subsection 81(4) applies with respect to the substance.

Variation or revocation

(2) The Minister may, by notice published in the *Canada Gazette*, vary the significant new activities in relation to a substance for which a notice has been given under subsection (1) or indicate that subsection 81(4) no longer applies with respect to that substance.

Contents of notice

(3) A notice referred to in subsection (1) or (2) shall indicate, by inclusion or exclusion, the significant new activities in relation to the substance in respect of which subsection 81(4) is to apply, and if regulations in respect of those significant new activities are not made under paragraphs 89(1)(c), (d) and (g), specify the information to be provided to the Minister under that subsection, the date within which it is to be provided and the period within which it is to be assessed under section 83.

Notification of persons required to comply

86. Where a notice is published in the *Canada Gazette* under subsection 85(1) in respect of a substance, every person who transfers the physical possession or control of the substance shall notify all persons to whom the possession or control is transferred of the obligation to comply with subsection 81(4).

Amendment of Lists

87. (1) The Minister shall add a substance to the Domestic Substances List and, if it appears on the Non-domestic Substances List, delete it from that List, within 120 days after the following conditions are met:

1. (a) the Minister has been provided with information in respect of the substance under section 81 or 82 and any additional information or test results required under subsection 84(1);
2. (b) the Ministers are satisfied that the substance has been manufactured in or imported into Canada by the person who provided the information in excess of
 1. (i) 1 000 kg in any calendar year,
 2. (ii) an accumulated total of 5 000 kg, or
 3. (iii) the quantity prescribed for the purposes of this section; and
3. (c) the period for assessing the information under section 83 has expired; and
4. (d) no conditions specified under paragraph 84(1)(a) in respect of the substance remain in effect.

Amendment of Lists

(2) Where the Minister adds a substance to the Domestic Substances List and subsequently learns that the substance was not manufactured or imported as described in subsection (1), the Minister shall delete the substance from the Domestic Substances List, and if it has been deleted from the Non-domestic Substances List, the Minister shall add it to that List.

Significant new activity

(3) Where a substance is on the Domestic Substances List or is to be added to the List under subsection (1), the Minister may amend the List in respect of the substance to indicate that subsection 81(3) applies with respect to the substance or that it no longer applies or by varying the significant new activities in relation to the substance in respect of which subsection 81(3) is to apply.

Contents of amendment

(4) An amendment referred to in subsection (3) shall indicate, by inclusion or exclusion, the significant new activities in relation to the substance in respect of which subsection 81(3) is to apply, and if regulations in respect of those significant new activities are not made under paragraphs 89(1)(c), (d) and (g), specify the information to be provided to the Minister under that subsection, the date within which it is to be provided and the period within which it is to be assessed under section 83.

Amendments of Lists

(5) Despite subsection (1), the Minister shall add a substance to the Domestic Substances List and, if it appears on the Non-Domestic Substances List, delete it from that List, within 120 days after the following conditions are met:

1. (a) the Minister has been provided with any information in respect of the substance under subsections 81(1) to (13) or section 82, any additional information or test results required under subsection 84(1), and any other prescribed information;
2. (b) the period for assessing the information under section 83 has expired; and
3. (c) no conditions specified under paragraph 84(1)(a) in respect of the substance remain in effect.

Publication of masked name

88. Where the publication under this Part of the explicit chemical or biological name of a substance would result in the release of confidential business information in contravention of section 314, the substance shall

be identified by a name determined in the prescribed manner.

Regulations

89. (1) The Governor in Council may, on the recommendation of the Ministers, make regulations

1. (a) respecting substances or establishing groups of substances for the purposes of the provision of information under section 81 or 82, including groups of inanimate biotechnology products, polymers, research and development substances and substances manufactured only for export;
2. (b) prescribing maximum exempt quantities for the purpose of paragraph 81(6)(e);
3. (c) respecting the information to be provided to the Minister under subsection 81(1), (2), (3) or (4) or section 82;
4. (d) prescribing dates on or before which information shall be provided under subsection 81(1), (2), (3) or (4);
5. (e) respecting the maintenance of books and records for the administration of any regulation made under this section;
6. (f) prescribing the purpose for which a substance must be used so as to permit the waiver of information requirements under subsection 81(8);
7. (g) prescribing periods within which the Ministers shall assess information under subsection 83(1);
8. (h) respecting the conditions, test procedures and laboratory practices to be followed in developing test data on a substance in order to comply with the information requirements of section 81 or 82 or requests for information under paragraph 84(1)(c);
9. (i) prescribing quantities for the purpose of section 87;
10. (i.1) prescribing information that shall be provided to the Minister under subsection 87(5);
11. (j) prescribing the manner of determining a name for a substance for the purpose of section 88; and
12. (k) generally for carrying out the purposes and provisions of sections 66 and 80 to 88.

Prescribed assessment period

(2) For the purposes of sections 81 and 83, where no assessment period is prescribed or specified with respect to a substance, the prescribed assessment period is 90 days after the Minister is provided with the prescribed information.

Prescription of quantities

(3) Regulations made under paragraph (1)(b) or (i) may prescribe quantities in respect of a substance in terms of

1. (a) whether or not the substance is on the Non-domestic Substances List or is a member of a group of substances established by regulations made under paragraph (1)(a); or
2. (b) the purposes for which the substance is manufactured or imported.

Prescription of information and assessment periods

(4) Regulations made under paragraph (1)(c), (d) or (g) may prescribe information, dates or periods in respect of a substance in terms of

1. (a) whether or not the substance is on the Non-domestic Substances List or is a member of a group of substances established by regulations made under paragraph (1)(a);
2. (b) the purposes for which the substance is manufactured or imported; or
3. (c) the quantity in which the substance is manufactured or imported.

Regulation of Toxic Substances

Addition to List of Toxic Substances

90. (1) Subject to subsection (3), the Governor in Council may, if satisfied that a substance is toxic, on the recommendation of the Ministers, make an order adding the substance to the List of Toxic Substances in Schedule 1.

Priority

(1.1) In developing proposed regulations or instruments respecting preventive or control actions in relation to substances specified on the List of Toxic Substances in Schedule 1, the Ministers shall give priority to pollution prevention actions.

Deletion from List

(2) Subject to subsection (3), the Governor in Council may, if satisfied that the inclusion of a substance specified on the List of Toxic Substances in Schedule 1 is no longer necessary, on the recommendation of the Ministers, make an order

1. (a) deleting the substance from the List and deleting the type of regulations specified in the List as being applicable with respect to the substance; and
2. (b) repealing the regulations made under section 93 with respect to the substance.

Order subject to conditions

(3) Where a board of review is established under section 333 in relation to a substance, no order may be made under subsection (1) or (2) in relation to the substance until the board's report is received by the Ministers.

Publication of proposed regulation or instrument

91. (1) Subject to subsections (6) and (7), a proposed regulation or instrument respecting preventive or control actions in relation to a substance shall be published by the Minister in the *Canada Gazette* within two years after the publication of the Ministers' statement under paragraph 77(6)(b) indicating that the measure that they propose to take, as confirmed or amended, is a recommendation that the substance be added to the List of Toxic Substances in Schedule 1.

Timeframes in relation to virtual elimination

(2) A proposed regulation or instrument in respect of preventive or control actions in relation to a substance for which a statement has been published under subsection 77(6) indicating that the measure proposed by the Ministers is the implementation of virtual elimination under subsection 65(3) shall specify the dates on which the preventive or control actions are to take effect.

Measurable quantity or concentration

(3) In establishing the quantity or concentration that is measurable in relation to a substance for the purposes of a proposed regulation or instrument referred to in subsection (2), the Ministers shall take into consideration information concerning sensitive and readily available analytical methods and any relevant information contained in plans referred to in subsection 79(2).

Additional measures in relation to virtual elimination

(4) The Minister shall, where applicable, publish in the *Canada Gazette* a statement accompanying the proposed regulation or instrument for a substance referred to in subsection (2) describing any additional measures that the Ministers intend to recommend with respect to the implementation of virtual elimination under subsection 65(3) and summarizing their reasons for so intending.

Considerations in relation to virtual elimination

(5) In determining the preventive or control actions in relation to a substance and the dates on which those actions are to take effect that are to be set out in a proposed regulation or instrument referred to in subsection (2), and in determining any additional measures described in a statement published under subsection (4), the Ministers shall take into consideration any factor or information that, in the opinion of the Ministers, is relevant, including, but not limited to,

1. (a) information contained in plans referred to in section 79; and

2. (b) environmental or health risks identified in the summary published under subsection 77(6) and any other relevant social, economic or technical matters.

Publication of subsequent proposals

(6) Any proposed regulation or instrument respecting preventive or control actions in relation to a substance that is made after the publication of a proposed regulation or instrument published within the period of two years referred to in subsection (1) shall be published in the *Canada Gazette*.

Suspension of time where board of review

(7) Where a board of review is established under section 333, the period of two years referred to in subsection (1) is suspended from the establishment of the board and does not recommence until the board's report is received by the Ministers.

Publication of preventive or control actions

92. (1) Subject to subsection (2), any regulation or instrument respecting preventive or control actions in relation to a substance shall be made and published in the *Canada Gazette* within 18 months after the publication of the proposed regulation or instrument under subsection 91(1) or (6), unless a material substantive change is required to be made to it.

Suspension of time where board of review

(2) Where a board of review is established under section 333 in relation to a substance, the period of 18 months referred to in subsection (1) is suspended from the establishment of the board and does not recommence until the board has submitted its report to the Minister under subsection 340(1).

Regulations

92.1 For the purposes of subsection 65(3), the Ministers may make regulations prescribing the quantity or concentration of a substance that may be released into the environment either alone or in combination with any other substance from any source or type of source.

Regulations

93. (1) Subject to subsections (3) and (4), the Governor in Council may, on the recommendation of the Ministers, make regulations with respect to a substance specified on the List of Toxic Substances in Schedule 1, including regulations providing for, or imposing requirements respecting,

1. (a) the quantity or concentration of the substance that may be released into the environment either alone or in combination with any other substance from any source or type of source;
2. (b) the places or areas where the substance may be released;
3. (c) the commercial, manufacturing or processing activity in the course of which the substance may be released;
4. (d) the manner in which and conditions under which the substance may be released into the environment, either alone or in combination with any other substance;
5. (e) the quantity of the substance that may be manufactured, processed, used, offered for sale or sold in Canada;
6. (f) the purposes for which the substance or a product containing it may be imported, manufactured, processed, used, offered for sale or sold;
7. (g) the manner in which and conditions under which the substance or a product containing it may be imported, manufactured, processed or used;
8. (h) the quantities or concentrations in which the substance may be used;
9. (i) the quantities or concentrations of the substance that may be imported;
10. (j) the countries from or to which the substance may be imported or exported;
11. (k) the conditions under which, the manner in which and the purposes for which the substance may be imported or exported;
12. (l) the total, partial or conditional prohibition of the manufacture, use, processing, sale, offering for

- sale, import or export of the substance or a product containing it;
13. (m) the total, partial or conditional prohibition of the import or export of a product that is intended to contain the substance;
 14. (n) the quantity or concentration of the substance that may be contained in any product manufactured, imported, exported, offered for sale or sold in Canada;
 15. (o) the manner in which, conditions under which and the purposes for which the substance or a product containing it may be advertised or offered for sale;
 16. (p) the manner in which and conditions under which the substance or a product containing it may be stored, displayed, handled, transported or offered for transport;
 17. (q) the packaging and labelling of the substance or a product containing it;
 18. (r) the manner, conditions, places and method of disposal of the substance or a product containing it, including standards for the construction, maintenance and inspection of disposal sites;
 19. (s) the submission to the Minister, on request or at any prescribed times, of information relating to the substance;
 20. (t) the maintenance of books and records for the administration of any regulation made under this section;
 21. (u) the conduct of sampling, analyses, tests, measurements or monitoring of the substance and the submission of the results to the Minister;
 22. (v) the submission of samples of the substance to the Minister;
 23. (w) the conditions, test procedures and laboratory practices to be followed for conducting sampling, analyses, tests, measurements or monitoring of the substance;
 24. (x) the circumstances or conditions under which the Minister may, for the proper administration of this Act, modify
 25. (i) any requirement for sampling, analyses, tests, measurements or monitoring, or
 26. (ii) the conditions, test procedures and laboratory practices for conducting any required sampling, analyses, tests, measurements or monitoring; and
 27. (y) any other matter that by this Part is to be defined or prescribed or that is necessary to carry out the purposes of this Part.

Definition of "sell"

(2) In this section, "sell" includes, in respect of a substance, the transfer of the physical possession or control of the substance.

Advice by Committee

(3) Before a regulation is made under subsection (1), the Minister shall give the Committee an opportunity to advise the Ministers.

Substances regulated under other Acts of Parliament

(4) The Governor in Council shall not make a regulation under subsection (1) in respect of a substance if, in the opinion of the Governor in Council, the regulation regulates an aspect of the substance that is regulated by or under any other Act of Parliament in a manner that provides, in the opinion of the Governor in Council, sufficient protection to the environment and human health.

Amendment to the List of Toxic Substances in Schedule 1

(5) A regulation made under subsection (1) with respect to a substance may amend the List of Toxic Substances in Schedule 1 so as to specify the type of regulation that applies with respect to the substance.

Interim orders

94. (1) Where

1. (a) a substance
2.
 1. (i) is not specified on the List of Toxic Substances in Schedule 1 and the Ministers believe that it is toxic or capable of becoming toxic, or

2. (ii) is specified on that List and the Ministers believe that it is not adequately regulated, and
3. (b) the Ministers believe that immediate action is required to deal with a significant danger to the environment or to human life or health,

the Minister may make an interim order in respect of the substance and the order may contain any provision that may be contained in a regulation made under subsection 93(1).

Effect of order

(2) Subject to subsection (3), an interim order has effect

1. (a) from the time it is made; and
2. (b) as if it were a regulation made under section 93.

Approval of Governor in Council

(3) An interim order ceases to have effect unless it is approved by the Governor in Council within 14 days after it is made.

Consultation

(4) The Governor in Council shall not approve an interim order unless the Minister has

1. (a) within 24 hours after making the order, offered to consult with all affected governments to determine whether they are prepared to take sufficient action to deal with the significant danger; and
2. (b) consulted with other ministers of the Crown in right of Canada to determine whether any action can be taken under any other Act of Parliament to deal with the significant danger.

Recommendation of regulations

(5) Where the Governor in Council approves an interim order, the Ministers shall, within 90 days after the approval, publish in the *Canada Gazette* a statement indicating whether the Ministers intend to recommend to the Governor in Council

1. (a) that a regulation having the same effect as the order be made under section 93; and
2. (b) if the order was made in respect of a substance that was not specified on the List of Toxic Substances in Schedule 1, that the substance be added to that List under section 90.

Contravention of unpublished order

(6) No person shall be convicted of an offence consisting of a contravention of an interim order that, at the time of the alleged contravention, had not been published in the *Canada Gazette* unless it is proved that, at the date of the alleged contravention, that person had been notified of the interim order.

Cessation of effect

(7) Subject to subsection (3), an interim order ceases to have effect on the earliest of

1. (a) the day it is repealed,
2. (b) the day a regulation referred to in subsection (5) is made, and
3. (c) two years after the order is made.

Release of Toxic Substances

Report and remedial measures

95. (1) Where there occurs or is a likelihood of a release into the environment of a substance specified on the List of Toxic Substances in Schedule 1 in contravention of a regulation made under section 92.1 or 93 or an order made under section 94, any person described in subsection (2) shall, as soon as possible in the

circumstances,

1. (a) subject to subsection (4) and any regulations made under paragraph 97(b), notify an enforcement officer or any other person designated pursuant to the regulations and provide a written report on the matter to the enforcement officer or other person;
2. (b) take all reasonable measures consistent with the protection of the environment and public safety to prevent the release or, if it cannot be prevented, to remedy any dangerous condition or reduce or mitigate any danger to the environment or to human life or health that results from the release of the substance or may reasonably be expected to result if the substance is released; and
3. (c) make a reasonable effort to notify any member of the public who may be adversely affected by the release or likely release.

Application

(2) Subsection (1) applies to any person who

1. (a) owns or has the charge, management or control of a substance immediately before its release or its likely release into the environment; or
2. (b) causes or contributes to the release or increases the likelihood of the release.

Report by property owner

(3) Where there occurs a release of a substance as described in subsection (1), any person, other than a person described in subsection (2), whose property is affected by the release and who knows that it is a substance specified on the List of Toxic Substances in Schedule 1 shall, as soon as possible in the circumstances and subject to subsection (4), report the matter to an enforcement officer or to any person that is designated by regulation.

Report to provincial official

(4) Where there are in force, by or under the laws of a province or an aboriginal government, provisions that the Governor in Council, by regulation, declares to be adequate for dealing with a release described in subsection (1), a report required by paragraph (1)(a) or subsection (3) shall be made to a person designated by those provisions.

Intervention by enforcement officer

(5) Where any person fails to take any measures required under subsection (1), an enforcement officer may take those measures, cause them to be taken or direct any person referred to in subsection (2) to take them.

Limitation on power of direction

(6) A direction of an enforcement officer under subsection (5) that is inconsistent with a requirement imposed by or under any other Act of Parliament is void to the extent of the inconsistency.

Access to property

(7) Any enforcement officer or other person authorized or required to take any measures under subsection (1) or (5) may enter and have access to any place or property and may do any reasonable things that may be necessary in the circumstances.

Personal liability

(8) Any person, other than a person described in subsection (2), who provides assistance or advice in taking the measures required by subsection (1) or who takes any measures authorized under subsection (5) is not personally liable either civilly or criminally in respect of any act or omission in the course of providing assistance or advice or taking any measures under those subsections unless it is established that the person acted in bad faith.

Voluntary report

96. (1) Where a person has knowledge of the occurrence or likelihood of a release into the environment of a substance specified on the List of Toxic Substances in Schedule 1, but the person is not required to report the matter under this Act, the person may report any information relating to the release or likely release to an enforcement officer or to any person to whom a report may be made under section 95.

Request for confidentiality

(2) A person making a report under subsection (1) may request that the person's identity and any information that could reasonably reveal the identity not be released.

Requirement for confidentiality

(3) Where a person makes a request under subsection (2), no person shall release or cause to be released the identity of the person making the request or any information that could reasonably be expected to reveal their identity unless the person making the request authorizes the release in writing.

Employee protection

(4) Despite any other Act of Parliament, no employer shall dismiss, suspend, demote, discipline, harass or otherwise disadvantage an employee, or deny an employee a benefit of employment, by reason that

1. (a) the employee has made a report under subsection (1);
2. (b) the employee, acting in good faith and on the basis of reasonable belief, has refused or stated an intention of refusing to do anything that is an offence under this Act; or
3. (c) the employee, acting in good faith and on the basis of reasonable belief, has done or stated an intention of doing anything that is required to be done by or under this Act.

Regulations

97. The Governor in Council may make regulations

1. (a) designating persons for the purposes of paragraph 95(1)(a) and subsection 95(3) and prescribing the form of the report to be made under those provisions and the information to be contained in it;
2. (b) respecting the notification and reporting of a release;
3. (c) declaring provisions to be adequate for the purpose of subsection 95(4); and
4. (d) generally for carrying out the purposes and provisions of sections 95 and 96.

Recovery of reasonable costs and expenses by Her Majesty

98. (1) Her Majesty in right of Canada may recover the costs and expenses of and incidental to taking any measures under subsection 95(5) from

1. (a) any person referred to in paragraph 95(2)(a); and
2. (b) any person referred to in paragraph 95(2)(b) to the extent that that person knowingly or negligently caused or contributed to the release.

Reasonably incurred

(2) The costs and expenses referred to in subsection (1) shall only be recovered to the extent that they can be established to have been reasonably incurred in the circumstances.

Joint and several liability

(3) Subject to subsection (4), the persons referred to in subsection (1) are jointly and severally liable or solidarily liable for the costs and expenses referred to in that subsection.

Limitation

(4) A person referred to in paragraph 95(2)(b) shall not be held liable under subsection (3) to an extent greater than the extent to which the person knowingly or negligently caused or contributed to the release.

Procedure

(5) A claim under this section may be sued for and recovered by Her Majesty in right of Canada with costs in proceedings brought or taken therefor in the name of Her Majesty in right of Canada in any court of competent jurisdiction.

Recourse or indemnity

(6) This section does not limit or restrict any right of recourse or indemnity that a person may have against any other person.

Limitation period

(7) Where events giving rise to a claim under this section occur, no proceedings in respect of the claim may be instituted after five years from the date on which the events occur or become evident to the Minister, whichever is later.

Minister's certificate

(8) A document purporting to have been issued by the Minister certifying the day on which the events giving rise to a claim under this section came to the knowledge of the Minister shall be received in evidence and, in the absence of any evidence to the contrary, the document shall be considered as proof of that fact without proof of the signature or of the official character of the person appearing to have signed the document and without further proof.

Remedial measures

99. Where, in respect of a substance or a product containing a substance, there is a contravention of this Part or any regulation made under this Part, the Minister may, in writing,

1. (a) direct any manufacturer, processor, importer, retailer or distributor of the substance or product to take any or all of the following measures:
 1. (i) give public notice in a manner directed by the Minister of any danger to the environment or to human life or health posed by the substance or product,
 2. (ii) mail a notice as described in subparagraph (i) to every manufacturer, processor, distributor or retailer of the substance or product, or
 3. (iii) mail a notice as described in subparagraph (i) to every person to whom the substance or product is known to have been delivered or sold; and
2. (b) direct any manufacturer, processor, distributor, importer or retailer of the substance or product to take any or all of the following measures:
 1. (i) replace the substance or product with one that does not pose a danger to the environment or to human life or health,
 2. (ii) accept the return of the substance or product from the purchaser and refund the purchase price, or
 3. (iii) any other measures for the protection of the environment or of human life or health.

Export of Substances

Export Control List

100. The Ministers may, by order,

1. (a) add to Part 1 of the Export Control List in Schedule 3 any substance the use of which is prohibited in Canada by or under an Act of Parliament, and delete any substance from that Part;
2. (b) add to Part 2 of the Export Control List in Schedule 3 any substance that is subject to an international agreement that requires notification or requires the consent of the country of destination before the substance is exported from Canada, and delete any substance from that Part; and

3. (c) add to Part 3 of the Export Control List in Schedule 3 any substance the use of which is restricted in Canada by or under an Act of Parliament, and delete any substance from that Part.

Notice to Minister

101. (1) Subject to subsection (4), no person shall export a substance specified in the Export Control List in Schedule 3 unless the person provides prior notice of the proposed export to the Minister in accordance with the regulations made under subsection 102(1).

Restrictions on export

(2) Subject to subsection (4), no person shall export a substance specified in Part 1 of the Export Control List in Schedule 3 unless the export of the substance

1. (a) is for the purpose of destroying the substance or complying with a direction under subparagraph 99 (b)(iii); and
2. (b) is done in accordance with any regulations made under subsection 102(1).

Restrictions on export

(3) Subject to subsection (4), no person shall export a substance specified in Part 2 or 3 of the Export Control List in Schedule 3 unless the export of the substance is done in accordance with any regulations made under subsection 102(1).

Total prohibition on export

(4) No person shall export a substance specified in the Export Control List in Schedule 3 if the export of the substance is prohibited by a regulation made under subsection 102(2).

Regulations respecting exports

102. (1) The Governor in Council may, on the recommendation of the Ministers, make regulations in relation to substances specified in the Export Control List in Schedule 3

1. (a) respecting the information that must be given to the Minister regarding an export of such a substance, the time when or period within which the information must be given, and the manner in which it must be given;
2. (b) respecting the information that must accompany an export of such a substance and the manner in which it must accompany the substance;
3. (c) respecting conditions under which a person may export such a substance;
4. (d) respecting the information that must be kept by a person who exports such a substance and the manner in which, the period for which and the place where the information must be kept; and
5. (e) generally for carrying out the purposes of section 101.

Regulations prohibiting exports

(2) The Governor in Council may, on the recommendation of the Ministers, make regulations prohibiting the export of a substance specified in the Export Control List in Schedule 3.

Publication of exports

103. If a person exports a substance specified in the Export Control List in Schedule 3, the Minister shall publish in the Environmental Registry the name or specifications of the substance, the name of the exporter and the name of the country of destination.

Part 6: Animate Products of Biotechnology

Definitions

104. The definitions in this section apply in this Part.

"living organism" « *organisme vivant* »

"living organism" means a substance that is an animate product of biotechnology.

"significant new activity" « *nouvelle activité* »

"significant new activity" includes, in respect of a living organism, any activity that results or may result in

- (a) the entry or release of the living organism into the environment in a quantity or concentration that, in the Ministers' opinion, is significantly greater than the quantity or concentration of the living organism that previously entered or was released into the environment; or
- (b) the entry or release of the living organism into the environment or the exposure or potential exposure of the environment to the living organism in a manner and circumstances that, in the Ministers' opinion, are significantly different from the manner and circumstances in which the living organism previously entered or was released into the environment or of any previous exposure or potential exposure of the environment to the living organism.

Adding living organisms to Domestic Substances List

105. (1) The Minister shall, for the purposes of sections 74 and 106, add to the Domestic Substances List maintained under section 66 any living organism if the Minister is satisfied that, between January 1, 1984 and December 31, 1986, the living organism

- (a) was manufactured in or imported into Canada by any person; and
- (b) entered or was released into the environment without being subject to conditions under this or any other Act of Parliament or of the legislature of a province.

Amendment of List

(2) Where the Minister includes a living organism on the Domestic Substances List and subsequently learns that, between January 1, 1984 and December 31, 1986, the requirements set out in paragraphs (1)(a) and (b) were not met, the Minister shall delete the substance from the List.

Publication of List

(3) The Minister shall publish in the *Canada Gazette* the Domestic Substances List and any amendment to the List.

Designation

(4) The Minister may, by order, designate any person or class of persons to exercise the powers and perform the duties and functions set out in this section.

Manufacture or import of living organisms

106. (1) Where a living organism is not specified on the Domestic Substances List and subsection (2) does not apply, no person shall manufacture or import the living organism unless

- (a) the prescribed information with respect to the living organism, accompanied by the prescribed fee, has been provided by that person to the Minister on or before the prescribed date; and
- (b) the period for assessing the information under section 108 has expired.

Transitional provision

(2) Where a person has, between January 1, 1987 and June 30, 1994, manufactured or imported a living organism that is not specified on the Domestic Substances List, no person shall manufacture or import the living organism after June 30, 1994 unless, within 180 days after that date or on or before the prescribed date, the prescribed information has been provided to the Minister with respect to the living organism by that person.

Notification of significant new activity in respect of living organism on List

(3) Where a living organism is specified on the Domestic Substances List with an indication that this subsection applies with respect to the living organism, no person shall use, manufacture or import the living organism for a significant new activity that is indicated on the List with respect to the living organism unless

- (a) the person has provided the Minister with the prescribed information, on or before the date that is specified by the Minister or prescribed, accompanied by the prescribed fee; and
- (b) the period for assessing the information specified by the Minister or provided under section 108 has expired.

Notification of significant new activity in respect of living organism not on List

(4) Where a living organism is not specified on the Domestic Substances List and the Minister publishes a notice in the *Canada Gazette* indicating that this subsection applies with respect to the living organism, no person shall use the living organism for a significant new activity that is indicated in the notice unless

- (a) the person has provided the Minister with the prescribed information, on or before the date that is specified by the Minister or prescribed, accompanied by the prescribed fee; and
- (b) the period for assessing the information specified by the Minister or provided under section 108 has expired.

Transfer of rights in respect of substance

(5) Where prescribed information with respect to a substance has been provided under subsection (1), (2), (3) or (4) by a person who subsequently transfers the right or privilege in relation to the substance for which the information was provided, the information is, subject to any conditions that may be prescribed, deemed to have been provided by the transferee of that right or privilege.

Application

(6) Subsections (1) to (4) do not apply to

- (a) a living organism that is manufactured or imported for a use that is regulated under any other Act of Parliament that provides for notice to be given before the manufacture, import or sale of the living organism and for an assessment of whether it is toxic or capable of becoming toxic;
- (b) a living organism that is manufactured, used or imported under the conditions and in the circumstances prescribed as exempt from this section; or
- (c) impurities and contaminants related to the preparation of a living organism.

Governor in Council may amend Schedule 4

(7) For the purposes of the administration of this section, the Governor in Council has the exclusive responsibility for determining whether or not the requirements referred to in paragraph (6)(a) are met by or under an Act of Parliament referred to in that paragraph, or regulations made under that Act, and

- (a) if the Governor in Council determines that the requirements referred to in paragraph (6)(a) are met by or under an Act of Parliament referred to in that paragraph, or regulations made under that Act, the Governor in Council may by order add to Schedule 4 the name of that Act or those regulations, as the case may be, and the fact that an Act or regulations are listed in Schedule 4 is conclusive proof that the requirements referred to in paragraph (6)(a) are met; and
- (b) if the Governor in Council determines that the requirements referred to in paragraph (6)(a) are no longer met by or under an Act of Parliament, or regulations, listed in Schedule 4, the Governor in Council may by order delete from Schedule 4 the name of that Act or those regulations, as the case

may be.

Waiver of information requirements

(8) On the request of any person to whom subsection (1), (2), (3) or (4) applies, the Minister may waive any of the requirements to provide information under that subsection if

- (a) in the opinion of the Ministers, the information is not needed in order to determine whether the living organism is toxic or capable of becoming toxic;
- (b) a living organism is to be used for a prescribed purpose or manufactured at a location where, in the opinion of the Ministers, the person requesting the waiver is able to contain the living organism so as to satisfactorily protect the environment and human health; or
- (c) it is not, in the opinion of the Ministers, practicable or feasible to obtain the test data necessary to generate the information.

Publication of notice of waiver

(9) The Minister shall publish in the *Canada Gazette* a notice stating the name of any person to whom a waiver is granted and the type of information to which it relates.

Compliance with waiver

(10) Where the Minister waives any of the requirements for information under paragraph (8)(b), the person to whom the waiver is granted shall not use, manufacture or import the living organism unless it is for the purpose prescribed by regulations made under paragraph 114(1)(f) or at the location specified in the request for the waiver, as the case may be.

Correction of information

(11) A person who has provided information under this section, including for the purposes of a request for a waiver under subsection (8), or under section 107 or 109 shall notify the Minister of any corrections to the information as soon as possible after learning of them.

Request for information previously waived

(12) Where the Minister is notified of any corrections to information that was provided for the purposes of a request for a waiver under subsection (8), the Minister may, after consideration by the Ministers of those corrections, require the person to whom the waiver was granted to provide the Minister with the information to which the waiver related within the time specified by the Minister.

Application of section 109

(13) Where the Ministers suspect, after considering

- (a) any corrections received under subsection (11), or
- (b) the information provided under subsection (12),

that a living organism is toxic or capable of becoming toxic, the Minister may exercise any of the powers referred to in paragraphs 109(1)(a) to (c).

Prohibition of activity

107. (1) Where the Minister has reasonable grounds to believe that a person has used, manufactured or imported a living organism in contravention of subsection 106(1), (3) or (4), the Minister may, in writing, require the person to provide the information referred to in that subsection and prohibit any activity involving the living organism until the expiry of the period for assessing the information under section 108.

Prohibition of activity

(2) Where the Minister has reasonable grounds to believe that a person has manufactured or imported a living organism in contravention of subsection 106(2), the Minister may, in writing, prohibit any activity involving the living organism until the prescribed information is provided to the Minister.

Waiver of information requirements

(3) On the request of any person required under subsection (1) or (2) to provide information, the Minister may waive any of the requirements for prescribed information if one of the conditions specified in paragraphs 106(8)(a) to (c) is met and, in that case, subsections 106(9) to (13) apply with respect to the waiver.

Assessment of information

108. (1) Subject to subsection (4), the Ministers shall, within the prescribed assessment period, assess information provided under subsection 106(1), (3) or (4) or paragraph 109(1)(c) or otherwise available to them in respect of a living organism in order to determine whether it is toxic or capable of becoming toxic.

Assessment of information

(2) Subject to subsections (3) and (4), the Ministers shall assess information provided under subsection 107(1) or otherwise available to them in respect of a living organism in order to determine whether it is toxic or capable of becoming toxic.

Time for assessment

(3) An assessment of information under subsection (2) shall be made following the date on which the information is provided within a period that does not exceed the number of days in the prescribed assessment period.

Extension of assessment period

(4) Where the Ministers are of the opinion that further time is necessary to assess any information, the Minister may, before the expiry of the assessment period referred to in subsection (1) or (3), extend the period for assessing the information, but the extension shall not exceed the number of days in the prescribed assessment period.

Notification of extension

(5) Where the Minister extends the period for assessing information, the Minister shall, before the expiry of the assessment period referred to in subsection (1) or (3), notify the person who provided the information.

Termination of period

(6) The Minister may, before the expiry of the assessment period referred to in subsection (1) or (3), terminate the period for assessing information and, immediately before doing so, shall notify the person who provided the information.

Action to be taken after assessment

109. (1) Where the Ministers have assessed any information under section 108 and they suspect that a living organism is toxic or capable of becoming toxic, the Minister may, before the expiry of the period for assessing the information,

- (a) permit any person to manufacture or import the living organism, subject to any conditions that the Ministers may specify;
- (b) prohibit any person from manufacturing or importing the living organism; or
- (c) request any person to provide any additional information or submit the results of any testing that the Ministers consider necessary for the purpose of assessing whether the living organism is toxic or capable of becoming toxic.

Additional information or testing

(2) Where the Minister requests additional information or test results under paragraph (1)(c), the person to whom the request is directed shall not manufacture or import the living organism unless

- (a) the person provides the additional information or submits the test results; and
- (b) the period for assessing information under section 108 has expired or a period of 120 days after the additional information or test results were provided has expired, whichever is later.

Variation of conditions and prohibitions

(3) The Minister may vary or rescind a condition or prohibition specified or imposed under paragraph (1)(a) or (b).

Expiry of prohibition

(4) Any prohibition on the manufacture or import of a living organism imposed under paragraph (1)(b) expires two years after it is imposed unless, before the expiry of the two years, the Governor in Council publishes in the *Canada Gazette* a notice of proposed regulations under section 114 in respect of the living organism, in which case the prohibition expires on the day the regulations come into force.

Publication of conditions and prohibitions

(5) Where the Minister specifies, imposes, varies or rescinds any condition for or prohibition on the manufacture or import of a living organism, the Minister shall publish in the *Canada Gazette* a notice setting out the condition or prohibition and the living organism in respect of which it applies.

Significant new activity

110. (1) Where the Ministers have assessed any information under section 108 in respect of a living organism that is not on the Domestic Substances List and they suspect that a significant new activity in relation to that living organism may result in the living organism becoming toxic, the Minister may, within 90 days after the expiry of the period for assessing the information, publish in the *Canada Gazette* and in any other manner that the Minister considers appropriate a notice indicating that subsection 106(4) applies with respect to the living organism.

Variation or revocation

(2) The Minister may, by notice published in the *Canada Gazette*, vary the significant new activities in relation to a living organism in respect of which a notice has been given under subsection (1) or indicate that subsection 106(4) no longer applies with respect to that living organism.

Contents of notice

(3) A notice referred to in subsection (1) or (2) shall indicate, by inclusion or exclusion, the significant new activities in relation to the living organism in respect of which subsection 106(4) is to apply, and where regulations in respect of those significant new activities are not made under paragraphs 114(1)(c), (d) and (g), specify the information to be provided to the Minister under that subsection, the date on or before which it is to be provided and the period within which it is to be assessed under section 108.

Notification of persons required to comply

111. Where a notice is published in the *Canada Gazette* under subsection 110(1) in respect of a living organism, every person who transfers the physical possession or control of the living organism shall notify all persons to whom the possession or control is transferred of the obligation to comply with subsection 106(4).

Amendment of List

112. (1) The Minister shall add a living organism to the Domestic Substances List within 120 days after the

following conditions are met:

- (a) the Minister has been provided with information in respect of the living organism under section 106 or 107 and any additional information or test results required under subsection 109(1);
- (b) the Ministers are satisfied that the living organism has been manufactured in or imported into Canada by the person who provided the information prescribed for the purpose of this paragraph;
- (c) the period for assessing the information under section 108 has expired; and
- (d) no conditions specified under paragraph 109(1)(a) in respect of the living organism remain in effect.

Amendment of List

(2) Where the Minister adds a living organism to the Domestic Substances List and subsequently learns that the living organism was not manufactured or imported as described in subsection (1), the Minister shall delete the living organism from the List.

Significant new activity

(3) Where a living organism is on the Domestic Substances List or is to be added to the List under subsection (1), the Minister may amend the List in respect of the living organism to indicate that subsection 106(3) applies with respect to the living organism or that it no longer applies or by varying the significant new activities in relation to the living organism in respect of which subsection 106(3) is to apply.

Contents of amendment

(4) An amendment referred to in subsection (3) shall indicate, by inclusion or exclusion, the significant new activities in relation to the living organism in respect of which subsection 106(3) is to apply, and where regulations in respect of those significant new activities are not made under paragraphs 114(1)(c), (d) and (g), specify the information to be provided to the Minister under that subsection, the date on or before which it is to be provided and the period within which it is to be assessed under section 108.

Publication of masked name

113. Where the publication under this Part of the explicit biological name of a living organism would result in the release of confidential business information in contravention of section 314, the living organism shall be identified by a name determined in the prescribed manner.

Regulations

114. (1) The Governor in Council may, on the recommendation of the Ministers, make regulations

- (a) respecting living organisms or establishing groups of living organisms for the purposes of the provision of information under section 106 or 107, including those that are exotic or indigenous, research and development living organisms and living organisms manufactured only for export, and designating ecozones or groups of ecozones;
- (b) prescribing conditions and circumstances for the purpose of paragraph 106(6)(b);
- (c) respecting the information that shall be provided to the Minister under subsection 106(1), (2), (3) or (4) or section 107 and the form and manner in which it is to be provided;
- (d) prescribing dates on or before which information shall be provided under subsection 106(1), (2), (3) or (4);
- (e) respecting the maintenance of books and records for the administration of any regulation made under this section;
- (f) prescribing the purpose for which a living organism must be used so as to permit the waiver of information requirements under subsection 106(8);
- (g) prescribing periods within which the Ministers shall assess information under subsection 108(1);
- (h) respecting the conditions, test procedures and laboratory practices to be followed in developing test data on a living organism in order to comply with the information requirements of section 106 or 107 or requests for information under paragraph 109(1)(c);
- (i) prescribing information for the purpose of paragraph 112(1)(b);

- (j) prescribing the manner of determining a name for a living organism for the purpose of section 113; and
- (k) generally for carrying out the purposes and provisions of this Part.

Prescribed assessment period

(2) For the purposes of sections 106 and 108, where no assessment period is prescribed or specified with respect to a living organism, the prescribed assessment period is 120 days after the Minister is provided with the prescribed information.

Prescription of conditions and circumstances

(3) Regulations made under paragraph (1)(b) may prescribe conditions and circumstances in respect of a living organism in terms of

- (a) whether or not the living organism is a member of a group of living organisms established by regulations made under paragraph (1)(a); or
- (b) the purposes for which the living organism is manufactured or imported.

Prescription of information and assessment periods

(4) Regulations made under paragraph (1)(c), (d) or (g) may prescribe information, dates or periods in respect of a living organism in terms of

- (a) whether or not the living organism is a member of a group of living organisms established by regulations made under paragraph (1)(a);
- (b) the purposes for which the living organism is manufactured or imported; or
- (c) the conditions under which and the circumstances in which the living organism is manufactured or imported.

Other regulations

115. (1) Subject to subsection (2), the Governor in Council may, on the recommendation of the Ministers, make regulations

- (a) for the purposes of implementing an international agreement,
 - (i) respecting living organisms, whether or not they are on the Domestic Substances List, and
 - (ii) respecting the safety of the environment or human health, including, but not limited to, the safe transfer, handling and uses of any living organism that is moved across a boundary; and
- (b) respecting the effective and safe use of living organisms in pollution prevention.

Living organisms regulated under other Acts of Parliament

(2) The Governor in Council shall not make a regulation under subsection (1) in respect of any living organism if the regulation regulates an aspect of the living organism that is regulated by or under any other Act of Parliament in a manner that provides, in the opinion of the Governor in Council, sufficient protection to the environment and human health.

Part 7: Controlling Pollution and Managing Wastes

[Division 1](#): Nutrients

[Division 2](#): Protection of the Marine Environment from Land-based Sources of Pollution

[Division 3](#): Disposal at Sea

[Division 4](#): Fuels

[Division 5](#): Vehicle, Engine and Equipment Emissions

[Division 6](#): International Air Pollution

[Division 7](#): International Water Pollution

[Division 8](#): Control of Movement of Hazardous Non-hazardous Waste for Final Disposal

Division 1: Nutrients

Definitions

116. The definitions in this section apply in this Division and in Part 10.

"cleaning product" « *produit de nettoyage* »

"cleaning product" means a phosphate compound or other substance that is intended to be used for cleaning purposes, and includes laundry detergents, dish-washing compounds, metal cleaners, de-greasing compounds and household, commercial and industrial cleaners.

"nutrient" « *substance nutritive* »

"nutrient" means a substance or combination of substances that, if released in any waters, provides nourishment that promotes the growth of aquatic vegetation.

"water conditioner" « *conditionneur d'eau* »

"water conditioner" means a substance that is intended to be used to treat water, and includes water-softening chemicals, anti-scale chemicals and corrosion inhibitors.

Prohibition

117. No person shall manufacture for use or sale in Canada or import a cleaning product or water conditioner that contains a prescribed nutrient in a concentration greater than the permissible concentration prescribed for that product.

Regulations

118. (1) The Governor in Council may, on the recommendation of the Minister, make regulations for the purpose of preventing or reducing the growth of aquatic vegetation that is caused by the release of nutrients in waters and that can interfere with the functioning of an ecosystem or degrade or alter, or form part of a process of degrading or altering, an ecosystem to an extent that is detrimental to its use by humans, animals or plants, including regulations

(a) prescribing nutrients;

(b) prescribing the permissible concentration of a prescribed nutrient in a cleaning product or water conditioner;

(c) respecting the conditions, test procedures and laboratory practices to be followed for analysing, testing, measuring or monitoring a nutrient, cleaning product or water conditioner; and

(d) requiring persons who manufacture for use or sale in Canada or import a cleaning product or water conditioner

(i) to maintain books and records for the proper administration of this Division and the regulations,

(ii) to submit samples of the cleaning product or water conditioner to the Minister, and

(iii) to submit to either Minister information regarding cleaning products, water conditioners and their ingredients.

Nutrients regulated under other Acts of Parliament

(2) The Governor in Council shall not make a regulation under subsection (1) in respect of a nutrient to the extent that the nutrient, or a product in which the nutrient is contained, is, in the opinion of the Governor in Council, regulated by or under any other Act of Parliament in a manner that provides, in the opinion of the Governor in Council, sufficient protection to the environment.

Remedial measures

119. (1) Where there is a contravention of section 117 or the regulations, the Minister may, in writing, direct a manufacturer or importer of a nutrient, cleaning product or water conditioner to take any or all of the following measures in the manner and within the period directed by the Minister:

- (a) give public notice of the contravention and of any danger to the environment or to human life or health posed by the nutrient, cleaning product or water conditioner;
- (b) mail a notice as described in paragraph (a) to manufacturers, processors, distributors or retailers of the nutrient, cleaning product or water conditioner;
- (c) mail a notice as described in paragraph (a) to persons to whom the nutrient, cleaning product or water conditioner is known to have been delivered or sold;
- (d) replace the nutrient, cleaning product or water conditioner with one that meets the applicable requirements;
- (e) accept the return of the nutrient, cleaning product or water conditioner from the purchaser and refund the purchase price;
- (f) take other measures for the protection of the environment or human life or health; and
- (g) report to the Minister on the steps taken in satisfaction of any direction under paragraphs (a) to (f).

Intervention of Minister

(2) If a person fails to take any measures required under paragraph (1)(a), (b), (c) or (f), the Minister may take those measures or cause them to be taken.

Recovery of costs

(3) Her Majesty in right of Canada may recover the costs and expenses of and incidental to taking any measures under subsection (2) from the person referred to in that subsection.

Division 2: Protection of the Marine Environment from Land-based Sources of Pollution

Definitions

120. The definitions in this section apply in this Division.

"land-based sources" « *sources telluriques* »

"land-based sources" means point and diffuse sources on land from which substances or energy reach the sea by water, through the air or directly from the coast. It includes any sources under the sea bed made accessible from land by tunnel, pipeline or other means.

"marine pollution" « *pollution des mers* »

"marine pollution" means the introduction by humans, directly or indirectly, of substances or energy into the sea that results, or is likely to result, in

- (a) hazards to human health;
- (b) harm to living resources or marine ecosystems;
- (c) damage to amenities; or
- (d) interference with other legitimate uses of the sea.

Objectives, guidelines and codes of practice

121. (1) The Minister may, after consultation with any other affected minister, issue environmental objectives, release guidelines and codes of practice to prevent and reduce marine pollution from land-based sources.

Consultation and conferences

(2) To carry out the functions set out in subsection (1), the Minister

(a) shall offer to consult with the government of a province and the members of the Committee who are representatives of aboriginal governments and may consult with any government department or agency or any person interested in the protection of the sea;

(b) may organize conferences relating to the prevention or reduction of marine pollution from land-based sources; and

(c) may meet with the representatives of international organizations and agencies and other countries to examine the rules, standards, practices and procedures recommended under the *United Nations Convention on the Law of the Sea*, signed by Canada on October 7, 1982.

Minister may act

(3) At any time after the 60th day following the day on which the Minister offers to consult in accordance with paragraph (2)(a), the Minister may act under subsection (1) if the offer to consult is not accepted by the government of a province or members of the Committee who are representatives of aboriginal governments.

Division 3: Disposal at Sea

Interpretation

Definitions

122. (1) The definitions in this subsection apply in this Division and in Part 10.

"aircraft" « *aéronef* »

"aircraft" means a machine that is used or designed for navigation in the air, but does not include an air cushion vehicle.

"Canadian aircraft" « *aéronef canadien* »

"Canadian aircraft" means an aircraft that is registered under an Act of Parliament.

"Canadian permit" « *permis canadien* »

"Canadian permit" means a permit that is issued under subsection 127(1) or 128(2).

"Canadian ship" « *navire canadien* »

"Canadian ship" means a ship that is registered under an Act of Parliament.

"condition" *Version anglaise seulement*

"condition" means, in respect of a permit, any term or condition of the permit.

"contracting party" « *partie contractante* »

"contracting party" means a state that is a contracting party to the Convention or the Protocol.

"Convention" « *Convention* »

"Convention" means the Convention on the Prevention of Marine Pollution by Dumping of Wastes and Other

Matter signed by Canada on December 29, 1972, as amended from time to time.

"disposal" « *immersion* »

"disposal" means

- (a) the disposal of a substance at sea from a ship, an aircraft, a platform or another structure,
- (b) the disposal of dredged material into the sea from any source not mentioned in paragraph (a),
- (c) the storage on the seabed, in the subsoil of the seabed or on the ice in any area of the sea of a substance that comes from a ship, an aircraft, a platform or another structure,
- (d) the deposit of a substance on the ice in an area of the sea,
- (e) the disposal at sea of a ship or aircraft,
- (f) the disposal or abandonment at sea of a platform or another structure, and
- (g) any other act or omission that constitutes a disposal under regulations made under paragraph 135(3)(c),

but does not include

- (h) a disposal of a substance that is incidental to or derived from the normal operations of a ship, an aircraft, a platform or another structure or of any equipment on a ship, an aircraft, a platform or another structure, other than the disposal of substances from a ship, an aircraft, a platform or another structure operated for the purpose of disposing of such substances at sea,
- (i) the placement of a substance for a purpose other than its mere disposal if the placement is not contrary to the purposes of this Division and the aims of the Convention or the Protocol,
- (j) the abandonment of any matter, such as a cable, pipeline or research device, placed on the seabed or in the subsoil of the seabed for a purpose other than its mere disposal, or
- (k) a discharge or storage directly arising from, or directly related to, the exploration for, exploitation of and associated off-shore processing of seabed mineral resources.

"incineration" « *incinération* »

"incineration" means the combustion of a substance on board a ship, a platform or another structure at sea for the purpose of its thermal destruction.

"master" « *capitaine* »

"master" means the person in command or charge of a ship, but does not include a licensed pilot, within the meaning of section 2 of the Pilotage Act.

"owner" « *propriétaire* »

"owner", in relation to any ship, aircraft, platform or other structure, includes the person who has the possession or use, by law or contract, of the ship, aircraft, platform or other structure.

"Protocol" « *Protocole* »

"Protocol" means the 1996 Protocol to the Convention on the Prevention of Marine Pollution by Dumping of Wastes and Other Matter, 1972, as amended from time to time.

"ship" « *navire* »

"ship" includes a vessel, boat or craft designed, used or capable of being used solely or partly for marine navigation, without regard to its method or lack of propulsion, and includes an air cushion vehicle.

"structure" *Version anglaise seulement*

"structure" means a structure that is made by a person.

"waste or other matter" « *déchets ou autres matières* »

"waste or other matter" means waste or other matter listed in Schedule 5.

Definition of "sea"

(2) In this Division and in Part 10, "sea" means

- (a) the territorial sea of Canada;
- (b) the internal waters of Canada, excluding all the rivers, lakes and other fresh waters in Canada and the St. Lawrence River as far seaward as the straight lines drawn
 - (i) from Cap-des-Rosiers to the western-most point of Anticosti Island, and
 - (ii) from Anticosti Island to the north shore of the St. Lawrence River along the meridian of longitude sixty-three degrees west;
- (c) any exclusive economic zone that may be created by Canada;
- (d) the arctic waters within the meaning of section 2 of the *Arctic Waters Pollution Prevention Act*;
- (e) an area of the sea adjacent to the areas referred to in paragraphs (a) to (d) that is specified under paragraph 135(1)(g);
- (f) an area of the sea under the jurisdiction of a foreign state, other than its internal waters; and
- (g) an area of the sea, other than the internal waters of a foreign state, not included in the areas of the sea referred to in paragraphs (a) to (f).

1999, c. 33, s. 122; 2005, c. 23, s. 18.

Purpose

Purpose

122.1. The purpose of this Division is to protect the marine environment, particularly by implementing the Convention and the Protocol.

2005, c. 23, s. 19.

Prohibitions

Imports for disposal in waters under Canadian jurisdiction

123. (1) No person or ship shall import a substance for disposal in an area of the sea referred to in any of paragraphs 122(2)(a) to (e).

Export for disposal in waters under foreign jurisdiction

(2) No person or ship shall export a substance for disposal in an area of the sea under the jurisdiction of a foreign state or in its internal waters.

1999, c. 33, s. 123; 2005, c. 23, s. 20.

Loading in Canada for disposal at sea

124. (1) No person shall, in Canada, load a substance onto any ship, aircraft, platform or other structure for the purpose of disposal in an area of the sea referred to in any of paragraphs 122(2)(a) to (e) and (g) unless

- (a) the substance is waste or other matter; and
- (b) the loading is done in accordance with a Canadian permit.

Loading in Canada for disposal at sea

(1.1) No ship shall, in Canada, load a substance onto itself for the purpose of disposal in an area of the sea referred to in any of paragraphs 122(2)(a) to (e) and (g) unless

- (a) the substance is waste or other matter; and
- (b) the loading is done in accordance with a Canadian permit.

Responsibility of master and pilot in Canada

(2) The master of a ship or pilot in command of an aircraft shall not permit a substance to be loaded onto their ship or aircraft in Canada for the purpose of disposal in an area of the sea referred to in any of paragraphs 122(2)(a) to (e) and (g) unless

- (a) the substance is waste or other matter; and
- (b) the loading is done in accordance with a Canadian permit.

Responsibility of master and pilot outside Canada

(3) The master of a Canadian ship or pilot in command of a Canadian aircraft shall not permit a substance to be loaded onto their ship or aircraft outside Canada for the purpose of disposal at sea.

Exception

(4) Subsection (3) does not apply where

- (a) the substance is waste or other matter;
- (b) the disposal occurs in an area of the sea referred to in paragraph 122(2)(g) or in an area of the sea that is under the jurisdiction of the foreign state where the substance is loaded;
- (c) if the disposal occurs in an area of the sea referred to in paragraph 122(2)(g) and the loading occurs in the territory of a foreign state that is a contracting party, the loading and disposal are done in accordance with a permit issued under the Convention or the Protocol by that state;
- (d) if the disposal occurs in an area of the sea referred to in paragraph 122(2)(g) and the loading occurs in the territory of a foreign state that is not a contracting party, the loading and disposal are done in accordance with a Canadian permit;
- (e) if the disposal occurs in an area of the sea under the jurisdiction of a foreign state that is a contracting party, the loading and disposal are done in accordance with a permit issued under the Convention or the Protocol by that state; and
- (f) if the disposal occurs in an area of the sea under the jurisdiction of a foreign state that is not a contracting party, the loading is done in accordance with a Canadian permit and the disposal is authorized by that state.

1999, c. 33, s. 124; 2005, c. 23, s. 21.

Disposal in waters under Canadian jurisdiction

125. (1) No person or ship shall dispose of a substance in an area of the sea referred to in any of paragraphs 122(2)(a) to (e) unless

- (a) the substance is waste or other matter; and
- (b) the disposal is done in accordance with a Canadian permit.

Disposal from Canadian ship, etc., in waters that are not under the jurisdiction of any state

(2) No person shall dispose of a substance from a Canadian ship, a Canadian aircraft or a Canadian platform or other structure in an area of the sea referred to in paragraph 122(2)(g) unless

- (a) the substance is waste or other matter; and
- (b) the disposal is done in accordance with a Canadian permit or, if the substance was loaded in the territory of a state that is a contracting party, a permit issued under the Convention or the Protocol by that state.

Disposal by Canadian ship in waters that are not under the jurisdiction of any state

(2.1) No Canadian ship shall dispose of a substance in an area of the sea referred to in paragraph 122(2)(g) unless

- (a) the substance is waste or other matter; and
- (b) the disposal is done in accordance with a Canadian permit or, if the substance was loaded in the territory of a state that is a contracting party, a permit issued under the Convention or the Protocol by that state.

Disposal from Canadian ship, etc., in waters under foreign jurisdiction

(3) No person shall dispose of a substance from a Canadian ship, a Canadian aircraft or a Canadian platform or other structure in an area of the sea referred to in paragraph 122(2)(f) unless

- (a) the substance is waste or other matter;
- (b) the substance was loaded in the foreign state that has jurisdiction over that area;
- (c) if the foreign state is a contracting party, the disposal is done in accordance with a permit issued under the Convention or the Protocol by that contracting party; and
- (d) if the foreign state is not a contracting party, that state has authorized the disposal and it is done in accordance with a Canadian permit.

Disposal by Canadian ship in waters under foreign jurisdiction

(3.1) No Canadian ship shall dispose of a substance in an area of the sea referred to in paragraph 122(2)(f) unless

- (a) the substance is waste or other matter;
- (b) the substance was loaded in the foreign state that has jurisdiction over that area;
- (c) if the foreign state is a contracting party, the disposal is done in accordance with a permit issued under the Convention or the Protocol by that contracting party; and
- (d) if the foreign state is not a contracting party, that state has authorized the disposal and it is done in accordance with a Canadian permit.

Disposal of Canadian ship, etc., in waters that are not under the jurisdiction of any state

(4) No person shall dispose of a Canadian ship, a Canadian aircraft or a Canadian platform or other structure in an area of the sea referred to in paragraph 122(2)(g) unless the disposal is done in accordance with a Canadian permit.

Disposal of Canadian ship etc., in waters under foreign jurisdiction

(5) No person shall dispose of a Canadian ship, a Canadian aircraft or a Canadian platform or other structure in an area of the sea referred to in paragraph 122(2)(f) unless

- (a) if the foreign state that has jurisdiction over that area is a contracting party, the disposal is done in accordance with a permit issued under the Convention or the Protocol by that contracting party; and
- (b) if the foreign state that has jurisdiction over that area is not a contracting party, that state has authorized the disposal and it is done in accordance with a Canadian permit.

Exception

(6) This section does not apply in respect of any disposal that is authorized under the Canada Shipping Act.

1999, c. 33, s. 125; 2005, c. 23, s. 22.

Incineration

126. (1) No person shall incinerate a substance on board a ship, a platform or another structure in an area of the sea referred to in any of paragraphs 122(2)(a) to (e) unless

- (a) the substance is waste generated on board the ship, platform or other structure during normal operations; or
- (b) the incineration is done in accordance with a permit issued under subsection 128(2).

Incineration by ship

(1.1) No ship shall incinerate a substance on board the ship in an area of the sea referred to in any of paragraphs 122(2)(a) to (e) unless

- (a) the substance is waste generated on board the ship during normal operations; or
- (b) the incineration is done in accordance with a permit issued under subsection 128(2).

Incineration in waters under foreign jurisdiction, etc.

(2) No person shall incinerate a substance on board a Canadian ship or a Canadian platform or other structure in an area of the sea referred to in paragraph 122(2)(f) or (g) unless

- (a) the substance is waste generated on board the Canadian ship or the Canadian platform or other structure during normal operations; or
- (b) the incineration is done in accordance with a permit issued under subsection 128(2).

Incineration by Canadian ship in waters under foreign jurisdiction

(3) No Canadian ship shall, in an area of the sea referred to in paragraph 122(2)(f) or (g), incinerate a substance on board the ship unless

- (a) the substance is waste generated on board the ship during normal operations; or
- (b) the incineration is done in accordance with a permit issued under subsection 128(2).

1999, c. 33, s. 126; 2005, c. 23, s. 23.

Permits

Minister may issue permit

127. (1) The Minister may, on application, issue permits authorizing the loading for disposal and disposal of waste or other matter.

Application

(2) An application for a permit must

- (a) be in the prescribed form;
- (b) contain the information that may be prescribed or that may be required by the Minister for the purpose of complying with Schedule 6;
- (c) be accompanied by the prescribed fees; and
- (d) be accompanied by evidence that notice of the application was published in a newspaper circulating in the vicinity of the loading or disposal described in the application or in any other publication specified by the Minister.

Factors for consideration

(3) Before issuing a permit under subsection (1), the Minister shall comply with Schedule 6 and shall take into account any factors that the Minister considers necessary.

Exception

128. (1) Paragraphs 125(1)(a), (2)(a), (2.1)(a), (3)(a) and (3.1)(a) do not apply if a permit is issued under this section.

Permits for emergency disposal

(2) The Minister may, on application, issue a permit to dispose of or incinerate a substance if the Minister is

of the opinion that

- (a) the disposal or incineration of a certain quantity of the substance is necessary to avert an emergency that poses an unacceptable risk relating to the environment or to human health; and
- (b) there is no other feasible solution.

Application

(3) An application for a permit must

- (a) be in the prescribed form;
- (b) contain the information that may be prescribed or that may be required by the Minister for the purpose of complying with Schedule 6;
- (c) be accompanied by the prescribed fees; and
- (d) subject to subsection (4), be accompanied by evidence that notice of the application was published in a newspaper circulating in the vicinity of the loading, disposal or incineration described in the application or in any other publication specified by the Minister.

Publication

(4) The Minister may permit the publication referred to in paragraph (3)(d) to be made at any time after the application is made.

Consultation

(5) The Minister shall

- (a) offer to consult with any foreign state that is likely to be affected by the disposal or incineration and with the International Maritime Organization; and
- (b) endeavour to follow any recommendations that are received from the International Maritime Organization.

Notice

(6) The Minister shall inform the International Maritime Organization of any action taken under this section.

1999, c. 33, s. 128; 2005, c. 23, s. 24.

Conditions of permit

129. (1) A Canadian permit shall contain any conditions that the Minister considers necessary for the protection of marine life, any legitimate uses of the sea or human life, including conditions relating to the following:

- (a) the nature and quantity of the substance for loading, disposal or incineration;
- (b) the method and frequency of the disposal or incineration authorized including, if necessary, the date or dates on which disposal or incineration is authorized;
- (c) the manner of loading and stowing the substance authorized for disposal or incineration;
- (d) the site at which disposal or incineration may take place;
- (e) the route to be followed by the ship or aircraft transporting the substance to the disposal or incineration site;
- (f) any special precautions to be taken respecting the loading, transporting, disposal or incineration of the substance; and
- (g) the monitoring of the disposal, the incineration and the disposal site to determine the effects of the disposal on the environment and human life.

Duration of permit

(2) A Canadian permit shall specify that it is valid for a particular date or dates or for a particular period that

shall not exceed one year.

Powers to suspend, revoke or vary permit

(3) The Minister may suspend or revoke a Canadian permit or vary its conditions where, having regard to Schedule 6 or the establishment of, or any report of, a board of review under section 333, the Minister considers it advisable to do so.

Exception for Safety Reasons

Exception

130. (1) Despite the other provisions of this Division, a person may dispose of a substance if

- (a) it is necessary to avert a danger to human life or to a ship, an aircraft, a platform or another structure at sea in situations caused by stress of weather or in any other case that constitutes a danger to human life or a threat to a ship, an aircraft, a platform or another structure at sea;
- (b) the disposal appears to be the only way of averting the danger or threat; and
- (c) it is probable that the damage caused by the disposal would be less than would otherwise occur.

Danger to be minimized

(2) Any disposal under subsection (1) shall be carried out in a manner that minimizes, as far as possible, danger to human life and damage to the marine environment.

Negligence not a defence

(3) Subsection (1) does not apply if the danger was caused or contributed to by the person's negligent act or omission.

Duty to report

(4) If disposal takes place under subsection (1), the master of the ship, the pilot in command of the aircraft or the person in charge of the platform or other structure shall report the disposal without delay to an enforcement officer or any other person whom the Governor in Council may, by order, designate, at the location and in the manner that may be prescribed, and the report shall contain any information that may be prescribed.

1999, c. 33, s. 130; 2005, c. 23, s. 25(E).

Fisheries Act not applicable

131. If a person disposes of a substance in accordance with the conditions of a Canadian permit or section 130, subsection 36(3) of the *Fisheries Act* is not applicable.

Site Monitoring

Monitoring of sites

132. The Minister shall monitor sites selected by the Minister that are used for disposal or incineration at sea.

Publication

Publication in the *Canada Gazette*

133. (1) When issuing a Canadian permit or varying its conditions, the Minister shall publish a copy of the permit and its conditions, or the varied conditions, in the *Canada Gazette*.

Publication before disposal or loading

(2) Publication under subsection (1) shall be made

(a) in the case of a permit issued under subsection 128(2), as soon as possible after the permit is issued; and

(b) in every other case, at least 30 days before the first date on which loading, disposal or incineration is authorized by the permit or by the varied conditions.

Notice of Objection

Notice of objection

134. (1) Any person may file with the Minister a notice of objection requesting that a board of review be established under section 333 and stating the reasons for the objection, if the Minister

(a) issues or refuses a Canadian permit; or

(b) suspends or revokes a Canadian permit or varies its conditions, otherwise than in accordance with the recommendations of a report of a board of review established under section 333 in respect of the permit.

Time for filing notice of objection

(2) A notice of objection under subsection (1) shall be filed within 30 days after

(a) the date the Canadian permit is published in the *Canada Gazette*; or

(b) the date the person received a notice from the Minister that the Canadian permit has been refused, suspended or revoked, or that its conditions have been varied.

Regulations

Regulations

135. (1) The Governor in Council may, on the recommendation of the Minister, make regulations for carrying out the purposes and provisions of this Division and Schedule 6, including regulations

(a) for carrying out and giving effect to the provisions of the Convention or the Protocol;

(b) defining the expression "Canadian platform or other structure";

(c) respecting the report referred to in subsection 130(4);

(d) respecting the conduct of sampling, analyses, tests, measurements or monitoring;

(e) respecting the conditions, test procedures and laboratory practices to be followed for sampling, analysing, testing, measuring or monitoring;

(f) respecting the monitoring of disposal sites;

(g) specifying, for the purpose of paragraph 122(2)(e), areas of the sea adjacent to areas referred to in any of paragraphs 122(2)(a) to (d);

(h) limiting the quantity or concentration of a substance contained in waste or other matter for disposal; and

(i) prescribing any other thing that by this Division is to be prescribed.

Amendments to Schedules 5 and 6

(2) The Governor in Council may, on the recommendation of the Minister, by order, amend Schedules 5 and 6.

Regulations

(3) The Minister may make regulations

(a) prescribing the form of an application for a Canadian permit;

(b) specifying the information required to be contained in or to accompany an application for a Canadian permit;

(c) specifying acts or omissions that constitute a disposal for the purposes of paragraph (g) of the definition "disposal" in subsection 122(1);

(d) specifying, for the purposes of paragraph (h) of the definition "disposal" in subsection 122(1), the operations that are deemed to be, or deemed not to be, the normal operations of a ship, an aircraft, a platform or another structure or of any equipment on a ship, an aircraft, a platform or another structure;

(e) specifying, for the purposes of subsections 125(1) to (3.1), disposals that are deemed to be, or deemed not to be, disposals of substances referred to in paragraph (h) of the definition "disposal" in subsection 122(1), which specifications may refer, among other things, to any quantity or concentration of any substance or to any place or area; and

(f) specifying, for the purposes of section 126, the operations that are deemed to be, or deemed not to be, normal operations of ships, including Canadian ships.

1999, c. 33, s. 135; 2005, c. 23, s. 26.

Costs and Expenses of the Crown

Costs and expenses recoverable

136. If the Minister directs an action to be taken by or on behalf of Her Majesty in right of Canada to remedy a condition or mitigate damage resulting from an offence under this Act that arises out of this Division, the costs and expenses of and incidental to taking that action, to the extent that they can be established to have been reasonably incurred in the circumstances, are recoverable by Her Majesty in right of Canada from the person or ship that committed the offence with costs in proceedings brought or taken therefor in the name of Her Majesty in any court of competent jurisdiction.

1999, c. 33, s. 136; 2005, c. 23, s. 27(E).

Service of Documents

Manner of service

137. Except where otherwise provided by any rules of the Federal Court that are applicable to proceedings arising out of this Division, any document that, for the purposes of any such proceedings, is to be served on a person may be served

(a) in any case, by delivering a copy of the document personally to the person to be served or, if the person cannot be found, by leaving a copy at their latest known address;

(b) if the document is to be served on the master of a ship or on any other person employed on a ship and service cannot reasonably be effected in the manner provided in paragraph (a), by leaving a copy of the document for the master or other person on board the ship with the person who is, or appears to be, in command or charge of the ship;

(c) if the document is to be served on the pilot in command of an aircraft and service cannot reasonably be effected in the manner provided in paragraph (a), by leaving a copy of the document with the person who is, or appears to be, in charge of the aircraft; and

(d) if the document is to be served on a person in their capacity as owner or master of a ship or owner or pilot in command of an aircraft and service cannot reasonably be effected in the manner provided in paragraph (a) and the ship or aircraft is within an area of the sea referred to in any of paragraphs 122(2)(a) to (e) or in Canada, by leaving a copy of the document with any agent of the owner residing in Canada or, where no such agent is known or can be found, by affixing a copy of it to a prominent part of the ship or aircraft.

Division 4: Fuels

Interpretation

Definitions

138. The definitions in this section apply in this Division.

"engine" « *moteur* »

"engine" means a device that transforms one form of energy into another.

"national fuels mark" « *marque nationale* »

"national fuels mark" means a mark established by regulation for use in respect of fuels.

General Requirements for Fuels

Prohibition

139. (1) No person shall produce, import or sell a fuel that does not meet the prescribed requirements.

Exceptions

(2) A person does not contravene subsection (1) if

- (a) the fuel is in transit through Canada, from a place outside Canada to another place outside Canada, and there is written evidence establishing that the fuel is in transit;
- (b) the fuel is produced or sold for export and there is written evidence establishing that the fuel will be exported;
- (c) subject to the regulations, the fuel is being imported and there is written evidence establishing that the fuel will meet the requirements of subsection (1) before the fuel is used or sold; or
- (d) subject to the regulations, the fuel is being imported in a fuel tank that supplies the engine of a conveyance that is used for transportation by water, land or air.

Regulations

140. (1) The Governor in Council may, on the recommendation of the Minister, make regulations for carrying out the purposes of section 139, including regulations respecting

- (a) the concentrations or quantities of an element, component or additive in a fuel;
- (b) the physical or chemical properties of a fuel;
- (c) the characteristics of a fuel, based on a formula related to the fuel's properties or conditions of use;
- (d) the transfer and handling of a fuel;
- (e) the keeping of books and records by persons who produce, sell or import fuel;
- (f) the auditing of the books and records and the submission of audit reports and copies of the books and records;
- (g) the submission, by persons who produce, import or sell fuel, of information regarding
 - (i) the fuel and any element, component or additive contained in the fuel,
 - (ii) any physical or chemical property of the fuel or any substance intended for use as an additive to the fuel,
 - (iii) the adverse effects from the use of the fuel on the environment, on human life or health, on combustion technology or on emission control equipment, and
 - (iv) the techniques that may be used to detect and measure elements, components, additives and physical and chemical properties;
- (h) the conduct of sampling, analyses, tests, measurements or monitoring of fuels and additives and the submission of the results;
- (i) the submission of samples of fuels and additives; and
- (j) the conditions, test procedures and laboratory practices to be followed for conducting sampling, analyses, tests, measurements or monitoring.

Significant contribution

(2) The Governor in Council may make a regulation under any of paragraphs (1)(a) to (d) if the Governor in Council is of the opinion that the regulation could make a significant contribution to the prevention of, or reduction in, air pollution resulting from

- (a) directly or indirectly, the fuel or any of its components; or
- (b) the fuel's effect on the operation, performance or introduction of combustion or other engine

technology or emission control equipment.

Variations in fuels

(3) A regulation may distinguish among fuels according to their commercial designation, source, physical or chemical properties, class, conditions of use or place or time of year of use.

Consultation

(4) Before recommending a regulation to the Governor in Council under subsection (1), the Minister shall offer to consult with the government of a province and the members of the Committee who are representatives of aboriginal governments and may consult with a government department or agency, aboriginal people, representatives of industry and labour and municipal authorities or with persons interested in the quality of the environment.

Minister may act

(5) At any time after the 60th day following the day on which the Minister offers to consult in accordance with subsection (4), the Minister may recommend a regulation to the Governor in Council under subsection (1) if the offer to consult is not accepted by the government of a province or members of the Committee who are representatives of aboriginal governments.

National Fuels Marks

Nature of mark

141. (1) The national fuels marks are national trade-marks.

Property rights

(2) The exclusive property in and, except as otherwise provided in this Division, the right to the use of the national fuels marks are hereby vested in Her Majesty in right of Canada.

Prohibition

142. (1) No person shall use a national fuels mark except in accordance with this Division and the regulations.

Confusing marks

(2) No person shall use any other mark in such a manner that it is likely to be mistaken for a national fuels mark.

Requirements for use

143. A person may use a national fuels mark in respect of a prescribed fuel if

- (a) the use is authorized by the Minister;
- (b) the fuel conforms to the requirements for that fuel provided for by regulations made under section 145 and any requirements that are applicable to that fuel and that may be provided for by regulations made under subsection 93(1) or 140(1);
- (c) evidence of such conformity has been obtained and produced in accordance with the regulations; and
- (d) prescribed information relating to the fuel has been submitted to the Minister in the prescribed manner.

Cross-boundary shipments

144. (1) No person shall import, or transport within Canada, a prescribed fuel if the requirements set out in

paragraphs 143(b) to (d) are not met.

Exceptions

(2) Except as otherwise provided by the regulations, subsection (1) does not apply if

- (a) the requirements are met before the fuel is used or sold; or
- (b) the fuel is being used in a fuel tank that supplies the engine of a conveyance that is used for transportation by water, land or air.

Regulations

145. (1) The Governor in Council may, on the recommendation of the Minister, make regulations for carrying out the purposes and provisions of sections 141 to 144 and 147, including regulations

- (a) establishing the national fuels marks;
- (b) determining the fuels for which a national fuels mark may be used;
- (c) respecting any condition or requirement that must be met for a national fuels mark to be used if, in the opinion of the Governor in Council, regulations respecting that condition or requirement may not be made under section 140;
- (d) respecting the conditions and procedures for obtaining authorization to use a national fuels mark;
- (e) respecting the information or other evidence necessary under sections 143 and 144; and
- (f) prescribing or providing for anything that by sections 141 to 144 and 147 is to be prescribed or provided for by the regulations.

Consultation

(2) Before recommending a regulation to the Governor in Council under subsection (1), the Minister shall offer to consult with the government of a province and the members of the Committee who are representatives of aboriginal governments and may consult with a government department or agency, aboriginal people, representatives of industry and labour and municipal authorities or with persons interested in the quality of the environment.

Minister may act

(3) At any time after the 60th day following the day on which the Minister offers to consult in accordance with subsection (2), the Minister may recommend a regulation to the Governor in Council under subsection (1) if the offer to consult is not accepted by the government of a province or members of the Committee who are representatives of aboriginal governments.

Variations in fuels

146. A regulation may distinguish among fuels according to their commercial designation, source, physical or chemical properties, class, conditions of use or place or time of year of use.

Temporary Waivers

Temporary waiver

147. The Minister may, in prescribed circumstances, grant a temporary waiver from any of the requirements of a regulation made under section 140 or 145 on any conditions and for any period that may be determined by the Minister.

Remedial Measures

Remedial measures

148. (1) If, in respect of a fuel, there is a contravention of this Division or a regulation made under this Division, the Minister may, in writing, direct a producer, processor, importer, retailer or distributor of the fuel to take any or all of the following measures in a manner and within the period directed by the Minister:

- (a) give public notice of the relevant characteristics of the fuel and of any danger to the environment or to human life or health that might be posed by the fuel;
- (b) mail a notice as described in paragraph (a) to producers, processors, importers, retailers or distributors of the fuel;
- (c) mail a notice as described in paragraph (a) to persons to whom the fuel is known to have been delivered or sold;
- (d) replace the fuel with fuel that meets the applicable requirements;
- (e) accept the return of the fuel from the purchaser and refund the purchase price;
- (f) take other measures to mitigate the effect of the contravention on the environment or on human life or health; and
- (g) report to the Minister on the steps taken in satisfaction of any direction under paragraphs (a) to (f).

Intervention of Minister

(2) If a person fails to take any measures required under paragraph (1)(a), (b), (c) or (f), the Minister may take those measures or cause them to be taken.

Recovery of costs

(3) Her Majesty in right of Canada may recover the costs and expenses of and incidental to taking any measures under subsection (2) from the person referred to in that subsection.

Division 5: Vehicle, Engine and Equipment Emissions

Interpretation

Definitions

149. The definitions in this section apply in this Division and in Part 10 as it relates to the enforcement of this Division.

"company" « *entreprise* »

"company" means a person who

- (a) is engaged in the business of manufacturing vehicles, engines or equipment in Canada;
- (b) is engaged in the business of selling to other persons, for the purpose of resale by those persons, vehicles, engines or equipment obtained directly from a person described in paragraph (a) or the agent of such a person; or
- (c) imports any vehicle, engine or equipment into Canada for the purpose of sale.

"engine" « *moteur* »

"engine" means any prescribed internal combustion engine, but does not include

- (a) an engine designed to propel an aircraft as defined in subsection 3(1) of the *Aeronautics Act*;
- (b) an engine designed to propel rolling stock as defined in section 6 of the *Canada Transportation Act*; or
- (c) a marine compression-ignition engine that is rated at 37 kW or more and is designed to propel a vessel.

"equipment" « *équipement* »

"equipment" means any prescribed equipment that is designed for use in or on a vehicle or engine.

"manufacture" « *fabrication* » ou « *construction* »

"manufacture" includes any process of assembling or altering any vehicle, engine or equipment before its sale to the first retail purchaser.

"national emissions mark" « *marque nationale* »

"national emissions mark" means a mark established by regulation for use in respect of emissions from vehicles, engines or equipment.

"standard" « *norme* »

"standard" means a standard that governs the design, construction, functioning or marking of vehicles, engines or equipment for the purpose of controlling or monitoring their emissions.

"vehicle" « *véhicule* »

"vehicle" means any prescribed self-propelled vehicle, but does not include

- (a) an aircraft as defined in subsection 3(1) of the *Aeronautics Act*;
- (b) rolling stock as defined in section 6 of the *Canada Transportation Act*; or
- (c) a vessel that is fitted, for the purpose of propulsion, with a marine compression-ignition engine that is rated at 37 kW or more.

"vessel" « *bâtiment* »

"vessel" means a boat, ship or craft designed, used or capable of being used solely or partly for navigation in, on, through or immediately above water.

1999, c. 33, s. 149; 2001, c. 26, s. 331.

National Emissions Marks

Nature of marks

150. (1) The national emissions marks are national trade-marks.

Property rights

(2) The exclusive property in and, except as otherwise provided in this Division, the right to use a national emissions mark are hereby vested in Her Majesty in right of Canada.

Prohibition

(3) No person shall use a national emissions mark except in accordance with this Division and the regulations.

Confusing marks

(4) No person shall use any other mark in such a manner that it is likely to be mistaken for a national emissions mark.

Use of marks

151. A company authorized by the Minister may, subject to this Division and the regulations, apply a national emissions mark to vehicles, engines or equipment.

Transportation within Canada

152. No company shall transport within Canada a prescribed vehicle, engine or equipment that does not have a national emissions mark applied to it.

Vehicle, Engine and Equipment Standards

Compliance by companies

153. (1) No company shall apply a national emissions mark to any vehicle, engine or equipment, sell any vehicle, engine or equipment to which a national emissions mark has been applied or import any vehicle, engine or equipment unless

- (a) the vehicle, engine or equipment conforms to the standards prescribed for vehicles, engines or equipment of its class at the time its main assembly or manufacture was completed;
- (b) evidence of such conformity has been obtained and produced in the prescribed form and manner or, if the regulations so provide, in a form and manner satisfactory to the Minister;
- (c) prescribed information relating to standards for emissions from the vehicle, engine or equipment has been submitted to the Minister in the prescribed manner;
- (d) information is marked on the vehicle, engine or equipment in accordance with the regulations;
- (e) if required by the regulations, prescribed documentation or accessories accompany the vehicle, engine or equipment;
- (f) prescribed information relating to the operation or use of the vehicle, engine or equipment is disseminated in the prescribed form and manner;
- (g) records are maintained and furnished in the prescribed form and manner in relation to the design, manufacture, testing and field performance of the vehicle, engine or equipment, for the purpose of
 - (i) enabling an enforcement officer to determine whether the vehicle, engine or equipment conforms to all prescribed standards applicable to it, and
 - (ii) facilitating the identification and analysis of defects referred to in subsection 157(1); and
- (h) in the case of engines and equipment, the company maintains a registration system in the prescribed form and manner.

Exception

(2) Except as otherwise provided by the regulations, subsection (1) does not apply with respect to the application of a national emissions mark or an importation referred to in that subsection if the requirements under that subsection are met before the vehicle, engine or equipment leaves the possession or control of the company and, in the case of a vehicle, before the vehicle is presented for registration under the laws of a province or an aboriginal government.

Certification by foreign agency

(3) Any vehicle, engine or equipment is deemed to conform to a prescribed standard if

- (a) the regulations provide that an enactment of a foreign government corresponds to that standard; and
- (b) a prescribed agency of that government has certified that the vehicle, engine or equipment conforms to the enactment as applied by the agency, unless the Minister determines otherwise.

Compliance on importation

154. No person shall import any vehicle, engine or equipment of a prescribed class unless the requirements of paragraphs 153(1)(a), (b), (d) and (e) are met in respect of the vehicle, engine or equipment.

Exceptions for certain importations

155. (1) Sections 153 and 154 do not apply in respect of the importation of any vehicle, engine or equipment if

- (a) the person importing the vehicle, engine or equipment makes a declaration in the prescribed form and manner that the vehicle, engine or equipment will be used in Canada solely for purposes of exhibition, demonstration, evaluation or testing and will remain in Canada for not longer than one year or any other period that the Minister specifies;
- (b) the vehicle, engine or equipment is in transit through Canada, from a place outside Canada, to another place outside Canada and is accompanied by written evidence establishing that the vehicle, engine or equipment will not be sold or used in Canada; or

(c) the vehicle, engine or equipment is being imported exclusively for use by a visitor to Canada or by a person passing through Canada to another country.

Vehicles sold in United States

(2) Except as otherwise provided by the regulations, sections 153 and 154 do not apply in respect of the importation of a vehicle that has been sold at the retail level in the United States if the person importing it makes a declaration in the prescribed form and manner that, before the vehicle is presented for registration under the laws of a province or an aboriginal government,

- (a) those requirements will be met; and
- (b) the vehicle will be certified, in accordance with the regulations, as conforming.

Change in standard since manufacture

(3) Sections 153 and 154 do not apply in respect of the importation of any vehicle, engine or equipment that does not conform to a standard prescribed for its class at the time of its main assembly or manufacture if, at the time of its importation, that standard is no longer in effect and

- (a) the vehicle, engine or equipment conforms to the corresponding standard prescribed for its class at that time; or
- (b) there is no corresponding standard at that time.

Imported vehicle or engine

(4) A vehicle or engine that is imported and for which there is no prescribed standard must conform to the standard prescribed for the class of equivalent vehicles or engines before presentation for registration under the laws of a province or an aboriginal government.

Declarations binding

(5) No person who makes a declaration referred to in paragraph (1)(a) or subsection (2), or provides evidence referred to in paragraph (1)(b), in respect of any vehicle, engine or equipment shall use or dispose of the vehicle, engine or equipment in a manner contrary to the terms of that declaration or evidence.

Record keeping

(6) Every person who makes a declaration referred to in paragraph (1)(a) or subsection (2), or provides evidence referred to in paragraph (1)(b), in respect of any vehicle, engine or equipment shall keep a record of the use or disposition of the vehicle, engine or equipment in accordance with the regulations.

Vehicle or Engine Exemptions

Exemption from standards

156. (1) On application by a company in the prescribed form, supported by prescribed technical and financial information, the Governor in Council may, by order, grant an exemption for a specified period, subject to any conditions specified in the order, for any model of vehicle or engine manufactured or imported by the company from conformity with any prescribed standard applicable to that model if conformity with that standard would, in the opinion of the Governor in Council,

- (a) create substantial financial hardship for the company;
- (b) impede the development of new features for safety, emission monitoring or emission control that are equivalent to or superior to those that conform to prescribed standards; or
- (c) impede the development of new kinds of vehicles, engines or vehicle or engine systems or components.

Period and extent of exemption

(2) An exemption for a model may be granted for a period not exceeding

- (a) three years, if paragraph (1)(a) applies; or
- (b) two years, in respect of a stated number of units of that model not exceeding 1,000 units, if paragraph (1)(b) or (c) applies.

Conditions for granting exemption

(3) An exemption may not be granted for a model if the exemption would substantially diminish the control of emissions from it or if the company applying for the exemption has not provided evidence that satisfies the Governor in Council that it has attempted in good faith to bring the model into conformity with all applicable prescribed standards.

Further conditions

(4) An exemption for substantial financial hardship may not be granted under paragraph (1)(a) if

- (a) the world production of vehicles or engines manufactured by the company, or by the manufacturer of the model that is the subject of the application, exceeded 10,000 vehicles or engines in the 12-month period beginning two years before the beginning of the exemption period; or
- (b) the total number of vehicles or engines manufactured for, or imported into, the Canadian market by the company exceeded 1,000 vehicles or engines in that 12-month period.

Renewal of exemption

(5) On the expiry of the exemption period, a new exemption may be granted in accordance with this section.

Notice of Defects

Obligation to give notice

157. (1) A company that manufactures, sells or imports any vehicle, engine or equipment of a class for which standards are prescribed shall, on becoming aware of a defect in the design, construction or functioning of the vehicle, engine or equipment that affects or is likely to affect its compliance with a prescribed standard, cause notice of the defect to be given in the prescribed manner to

- (a) the Minister;
- (b) each person who has obtained such a vehicle, engine or equipment from the company; and
- (c) each current owner of such a vehicle, engine or equipment.

Determining owners

(2) Current owners are to be determined for the purpose of subsection (1)

- (a) from a warranty issued by the company with respect to the functioning of the vehicle, engine or equipment that has, to its knowledge, been given, sold or transferred to the current owner;
- (b) in the case of a vehicle, from registration records of a government; or
- (c) in the case of an engine or equipment, from a registration system referred to in paragraph 153(1)(h).

If notice previously given

(3) A company is not required to cause notice to be given of a defect of which notice has already been given under this section or under section 10 of the *Motor Vehicle Safety Act*.

Publication of notice

(4) If the Minister is satisfied that the name of the current owner of the vehicle, engine or equipment cannot reasonably be determined by a company in accordance with subsection (2), the Minister may

- (a) order the company to give notice of the defect by publication in the prescribed form for a period of

five consecutive days in two major daily newspapers in each of the following six regions, namely, the Atlantic provinces, Quebec, Ontario, the Prairie provinces, British Columbia and the Territories, or by dissemination in an alternative medium for any period that the Minister determines; or

(b) order that the current owner need not be notified.

Contents of notice

(5) A notice required to be given under subsections (1) and (4) shall contain, in the form and to the extent prescribed, a description of the defect, an evaluation of the pollution risk arising from it and directions for correcting it.

Particulars to responsible authorities

(6) On receiving a notice under subsection (1), the Minister shall forward full particulars of the notice to the person responsible for vehicle or engine administration in each government.

Follow-up reports

(7) Every company that causes notice to be given under subsection (1) shall submit an initial report and subsequent regular reports respecting the defect and its correction in accordance with the regulations.

Frequency of reports

(8) Unless the Minister directs otherwise, the reports referred to in subsection (7) shall be submitted for a period of two years after the day on which notice was given under subsection (1).

Research and Testing

Powers of Minister

158. The Minister may

(a) conduct any research, studies and evaluations that the Minister considers necessary for the administration and enforcement of this Division;

(b) undertake research and development programs for the study of the effect of vehicles, engines or equipment or emissions on air pollution, energy conservation and the environment and for the promotion of measures to control that effect;

(c) establish and operate facilities for the testing of vehicles, engines or equipment and components, and acquire test equipment for that purpose;

(d) make the facilities referred to in paragraph (c) and all related material, parts and services available to any person; and

(e) publish or otherwise disseminate information relating to the activities of the Minister under this section.

Emission control tests

159. (1) At the request of the Minister and subject to payment by the Minister of the cost of transportation and of rental at a prescribed rate based on capital value, a company shall make available for testing any vehicle, engine, equipment or component that

(a) was used in tests conducted by or for the company in order to establish information submitted to the Minister under paragraph 153(1)(c); or

(b) for the purpose of that testing, is equivalent to a vehicle, an engine, equipment or a component referred to in paragraph (a).

Testing by Minister

(2) The Minister may examine and dismantle any vehicle, engine, equipment or component made available under subsection (1) and conduct all necessary tests to verify the accuracy of tests referred to in paragraph (1)(a).

Detention of vehicles or engines

(3) The Minister may not detain any vehicle, engine, equipment or component for more than 30 days after completion of the tests conducted under subsection (2) unless, before that time, proceedings have been instituted in respect of an offence related to the vehicle, engine, equipment or component, in which case it may be detained until the proceedings are concluded.

Regulations

Regulations

160. (1) The Governor in Council may, on the recommendation of the Minister, make regulations for carrying out the purposes and provisions of this Division, including regulations

- (a) respecting emissions and prescribing standards in relation to emissions;
- (b) establishing the national emissions marks;
- (c) respecting the conditions that must be met for a national emissions mark to be used in relation to vehicles, engines or equipment or a class of vehicles, engines or equipment;
- (d) respecting the manner of applying national emissions marks;
- (e) prescribing the period for which records referred to in paragraph 153(1)(g) or a registration system referred to in paragraph 153(1)(h) shall be retained;
- (f) respecting exemptions from sections 153 and 154;
- (g) respecting the information to be submitted under section 153; and
- (h) prescribing or providing for anything that by this Division is to be prescribed or provided for by the regulations.

Progressive application

(2) Regulations prescribing a standard may be made applicable in respect of a specified proportion of vehicles, engines or equipment of a class before they are made applicable in respect of all vehicles, engines or equipment of that class.

Definition of "technical standards document"

161. (1) In this section, "technical standards document" means a document, published in the prescribed manner by authority of the Minister, that reproduces in the official languages of Canada an enactment of a foreign government with any adaptations of form and reference that will facilitate the incorporation of the enactment under this section.

Incorporation of document

(2) For greater certainty, regulations made under this Division may incorporate by reference a technical standards document as it reads on a prescribed day or as it is amended from time to time following the incorporation by reference, and may extend, qualify or exclude the application of any provision of the document so incorporated.

Publication

(3) No person is required to comply with a provision of a technical standards document incorporated by the regulations until six months after the publication of the provision in the prescribed manner, if the person continues to comply with the provision for which that provision is substituted.

Document not a regulation

(4) A technical standards document is not a regulation for the purposes of the *Statutory Instruments Act*.

Emission credits

162. (1) Regulations that prescribe standards in relation to emissions may provide for a system of credits based on the following principles:

- (a) a company may establish that vehicles, engines or equipment conform to those standards by applying credits against emissions of the vehicles, engines or equipment in the prescribed manner and within prescribed limits;
- (b) credits may be obtained by a company in the prescribed manner
 - (i) by reference to emissions of the vehicles, engines or equipment that more than meet the requirements of those standards, or
 - (ii) by the payment of an amount to the Receiver General determined at a prescribed rate in relation to emissions of the vehicle, engine or equipment; and
- (c) credits obtained by reference to emissions may be transferred to or from a company in the prescribed manner.

Deemed conformity to standard

(2) Regulations referred to in subsection (1) may provide that any vehicle, engine or equipment is deemed to conform to a standard if the application of those regulations to all vehicles, engines or equipment of its class sold in Canada and the United States would result in that vehicle, engine or equipment so conforming.

Emission report

(3) Every company shall submit to the Minister, in the prescribed form and manner and at the prescribed time, a report setting out, with respect to a prescribed period, an account of any emission credits obtained or applied by the company and a description of each of the following vehicles, engines or pieces of equipment for which credits were obtained or applied:

- (a) vehicles, engines and equipment to which the company applied a national emissions mark during that period, other than those that were exported;
- (b) vehicles, engines and equipment bearing a national emissions mark that were sold by the company in Canada during that period; and
- (c) vehicles, engines and equipment that were imported by the company during that period for the purpose of sale in Canada.

Contents of report

(4) If credits applied under this section were obtained on the basis of emissions from vehicles, engines or equipment not referred to in paragraph (3)(a), (b) or (c), the report submitted in respect of the application of those credits shall include a description of those vehicles, engines or equipment.

Interim order

163. (1) If an enactment of a foreign government corresponds to the regulations made under this Division and that enactment is amended by that government or its operation is affected by a decision of a foreign court, the Minister may issue an interim order suspending or modifying the operation of the regulations to the extent that they are inconsistent with the enactment as amended or given effect.

Effective date of order

(2) An interim order has effect from the time it is made.

Approval of Governor in Council

(3) An interim order ceases to have effect 14 days after it is made unless it is approved by the Governor in Council within that period.

Contravention of regulation modified by an unpublished order

(4) No person shall be convicted of an offence consisting of a contravention of a regulation to the extent that it is modified or suspended by an interim order that, at the time of the alleged contravention, had not been published in the *Canada Gazette* unless it is proved that, at the time of the alleged contravention, the person had been notified of the interim order.

Cessation of effect

(5) Subject to subsection (3), an interim order ceases to have effect on the earliest of

- (a) the day it is repealed,
- (b) the day the regulation is amended or repealed to give effect to the order, and
- (c) one year after the order is made.

Evidence

Evidence

164. In a prosecution under this Act, evidence that any vehicle, engine or equipment bore a name or mark purporting to be the name or mark of a company engaged in the business of manufacturing, importing or selling vehicles, engines or equipment is, in the absence of evidence to the contrary, proof that the vehicle, engine or equipment was manufactured, imported or sold, as the case may be, by the company.

Evidence

165. In a prosecution under this Act, evidence that any vehicle, engine or equipment bearing a national emissions mark was manufactured by a company is, in the absence of evidence to the contrary, proof that the national emissions mark was applied by the company.

Division 6: International Air Pollution

Determination of international air pollution

166. (1) Subject to subsection (4), the Minister shall act under subsections (2) and (3) only if the Ministers have reason to believe that a substance released from a source in Canada into the air creates, or may reasonably be anticipated to contribute to

- (a) air pollution in a country other than Canada; or
- (b) air pollution that violates, or is likely to violate, an international agreement binding on Canada in relation to the prevention, control or correction of pollution.

Consultation with other governments

(2) If the source referred to in subsection (1) is not a federal source, the Minister shall

- (a) consult with the government responsible for the area in which the source is situated to determine whether that government can prevent, control or correct the air pollution under its laws; and
- (b) if the government referred to in paragraph (a) can prevent, control or correct the air pollution, offer it an opportunity to do so.

Ministerial action

(3) If the source referred to in subsection (1) is a federal source or if the government referred to in paragraph (2)(a) cannot prevent, control or correct the air pollution under its laws or does not do so, the Minister shall take at least one of the following courses of action:

- (a) on approval by the Governor in Council, publish a notice under subsection 56(1); or
- (b) recommend regulations to the Governor in Council for the purpose of preventing, controlling or correcting the air pollution.

Reciprocity with other country

(4) If the air pollution referred to in paragraph (1)(a) is in a country where Canada does not have substantially the same rights with respect to the prevention, control or correction of air pollution as that country has under this Division, the Minister shall decide whether to act under subsections (2) and (3) or to take no action at all.

Other factors

(5) When recommending regulations under paragraph (3)(b), the Minister shall take into account comments made under subsection 168(2), notices of objection filed under subsection 332(2) and any report of a board of review submitted under subsection 340(1).

Regulations

167. The Governor in Council may, on the recommendation of the Minister, make regulations with respect to a substance released from a source in Canada into the air that creates, or may reasonably be anticipated to contribute to air pollution referred to in subsection 166(1) for the purpose of preventing, controlling or correcting the air pollution, including regulations respecting

- (a) the quantity or concentration of the substance that may be released into the air;
- (b) the manner in which and conditions under which the substance may be released into the air, either alone or in combination with any other substance;
- (c) the maintenance of books and records for the administration of any regulation made under this section;
- (d) the conduct of sampling, analyses, tests, measurements or monitoring of the substance and the submission of the results to the Minister; and
- (e) the conditions, test procedures and laboratory practices to be followed for conducting sampling, analyses, tests, measurements or monitoring of the substance.

Notice to other country

168. (1) The Minister shall advise the government of any country that would be affected by or benefit from the regulation before it is published under subsection 332(1).

Comments

(2) Within 60 days after the publication of a proposed regulation under subsection 332(1), any person, including a representative of the government of any country that would be affected by or benefit from it, may file with the Minister written comments on the proposed regulation.

Notice to other governments

(3) At the end of the period of 60 days referred to in subsection (2), the Minister

- (a) shall advise each government referred to in paragraph 166(2)(a) of any notice of objection filed under subsection 332(2); and
- (b) shall publish in the *Canada Gazette*, and may publish in any other manner that the Minister considers appropriate, a report or a notice of the availability of a report that summarizes how any written comments filed under subsection (2) or a notice of objection filed under subsection 332(2) were dealt with.

Report and remedial measures

169. (1) Where there occurs or there is a likelihood of a release into the air of a substance in contravention of a regulation made under section 167, any person described in subsection (2) shall, as soon as possible in the circumstances,

- (a) subject to subsection (4) and the regulations, notify an enforcement officer or any other person designated pursuant to the regulations and provide a written report on the matter to the enforcement officer or other person;
- (b) take all reasonable measures consistent with the protection of the environment and public safety to prevent the release or, if it cannot be prevented, to remedy any dangerous condition or reduce or mitigate any danger to the environment or to human life or health that results from the release of the substance or may reasonably be expected to result if the substance is released; and
- (c) make a reasonable effort to notify any member of the public who may be adversely affected by the

release or likely release.

Application

(2) Subsection (1) applies to any person who

- (a) owns or has charge of a substance immediately before its release or its likely release into the air;
or
- (b) causes or contributes to the release or increases the likelihood of the release.

Report by property owner

(3) Where there occurs a release of a substance as described in subsection (1), any person, other than a person described in subsection (2), whose property is affected by the release shall, as soon as possible in the circumstances and subject to subsection (4), report the matter to an enforcement officer or to any person that is designated by regulation.

Report to official

(4) Where there are in force, by or under the laws of a province or an aboriginal government, provisions that the Governor in Council, by regulation, declares to be adequate for dealing with a release described in subsection (1), a report required by paragraph (1)(a) or subsection (3) shall be made to a person designated by those provisions.

Intervention by enforcement officer

(5) Where a person fails to take any measures required under subsection (1), an enforcement officer may take those measures, cause them to be taken or direct any person referred to in subsection (2) to take them.

Limitation on power of direction

(6) Any direction of an enforcement officer under subsection (5) that is inconsistent with a requirement imposed by or under any other Act of Parliament is void to the extent of the inconsistency.

Access to property

(7) Any enforcement officer or other person authorized or required to take any measures under subsection (1) or (5) may enter and have access to any place or property and may do any reasonable things that may be necessary in the circumstances.

Immunity

(8) Any person, other than a person described in subsection (2), who provides assistance or advice in taking the measures required by subsection (1) or who takes any measures authorized under subsection (5) is not personally liable either civilly or criminally in respect of any act or omission in the course of providing assistance or advice or taking any measures under those subsections unless it is established that the person acted in bad faith.

Recovery of reasonable costs and expenses by Her Majesty

170. (1) Her Majesty in right of Canada may recover the costs and expenses of and incidental to taking any measures under subsection 169(5) from

- (a) any person referred to in paragraph 169(2)(a); and
- (b) any person referred to in paragraph 169(2)(b) to the extent of the person's negligence in causing or contributing to the release.

Only if reasonably incurred

(2) The costs and expenses referred to in subsection (1) shall only be recovered to the extent that they can be established to have been reasonably incurred in the circumstances.

Liability

(3) Subject to subsection (4), the persons referred to in subsection (1) are jointly and severally liable or solidarily liable for the costs and expenses referred to in that subsection.

Limitation

(4) A person referred to in paragraph 169(2)(b) shall not be held liable under subsection (3) to an extent greater than the extent of the person's negligence in causing or contributing to the release.

Procedure

(5) A claim under this section may be sued for and recovered by Her Majesty in right of Canada with costs in proceedings brought or taken therefor in the name of Her Majesty in right of Canada in any court of competent jurisdiction.

Recourse or indemnity

(6) This section does not limit or restrict any right of recourse or indemnity that a person may have against any other person.

Limitation period

(7) Where events giving rise to a claim under this section occur, no proceedings in respect of the claim may be instituted after five years from the date on which the events occur or become evident to the Minister, whichever is later.

Minister's certificate

(8) A document purporting to have been issued by the Minister certifying the day on which the events giving rise to a claim under this section came to the knowledge of the Minister shall be received in evidence and, in the absence of any evidence to the contrary, the document shall be considered as proof of that fact without proof of the signature or of the official character of the person appearing to have signed the document and without further proof.

Prohibition

171. No person shall carry on a work, undertaking or activity that results in the release of a substance in contravention of a regulation made under section 167.

Plans and specifications

172. (1) If a person carries on or proposes to carry on a work, undertaking or activity that results or may result in the release of a substance that creates, or may reasonably be anticipated to create, air pollution, the person shall, at the request of the Minister for the purposes of this Division and within the time that the Minister may specify, provide the Minister with plans, specifications, studies, procedures, schedules, analyses, samples or other information relating to the work, undertaking or activity and with analyses, samples, evaluations, studies, mitigation methodologies or other information relating to the substance.

Obtaining information from government

(2) Before making a request to a person under subsection (1), the Minister shall try to obtain, within a reasonable time, the samples or information from the government responsible for the area in which the person is situated.

Interim order

173. (1) The Minister may make an interim order that contains any provision that may be contained in a regulation under section 167 if the Minister believes

- (a) that the substance or source referred to in subsection 166(1) is not adequately regulated; and
- (b) that immediate action is required to deal with a significant danger to the environment or to human life or health.

Effective date of order

(2) An interim order has effect from the time it is made.

Approval of Governor in Council

(3) An interim order ceases to have effect 14 days after it is made unless it is approved by the Governor in Council within that period.

Consultation

(4) The Governor in Council shall not approve an interim order unless the Minister has

- (a) within 24 hours after making the order, offered to consult with all affected governments to determine whether they are prepared to take sufficient action to deal with the significant danger; and
- (b) consulted with other ministers of the Crown in right of Canada to determine whether any action can be taken under any other Act of Parliament to deal with the significant danger.

Ministerial action

(5) Where the Governor in Council approves an interim order, the Minister shall, within 90 days after the approval, take measures to comply with section 166 in order to address the significant danger that gave rise to the interim order.

Contravention of unpublished order

(6) No person shall be convicted of an offence consisting of a contravention of an interim order that, at the time of the alleged contravention, had not been published in the *Canada Gazette* unless it is proved that, at the time of the alleged contravention, the person had been notified of the interim order.

Cessation of effect

(7) Subject to subsection (3), an interim order ceases to have effect on the earliest of

- (a) the day it is repealed,
- (b) the day a regulation is made in accordance with subsection (5), and
- (c) two years after the order is made.

Repeal of interim order

(8) No action is required to be taken under subsection (5) if the interim order is repealed.

Report to Parliament

174. The Minister shall include in the annual report required by section 342 a report on the administration of this Division.

Division 7: International Water Pollution

Definition of "water pollution"

175. In this Division, "water pollution" means a condition of water, arising wholly or partly from the presence in water of any substance, that directly or indirectly

- (a) endangers the health, safety or welfare of humans;
- (b) interferes with the normal enjoyment of life or property;
- (c) endangers the health of animal life;
- (d) causes damage to plant life or to property; or
- (e) degrades or alters, or forms part of a process of degrading or altering, an ecosystem to an extent that is detrimental to its use by humans, animals or plants.

Determination of international water pollution

176. (1) Subject to subsection (4), the Minister shall act under subsections (2) and (3) only if the Ministers have reason to believe that a substance released from a source in Canada into water creates, or may reasonably be anticipated to create,

- (a) water pollution in a country other than Canada; or
- (b) water pollution that violates, or is likely to violate, an international agreement binding on Canada in relation to the prevention, control or correction of pollution.

Consultation with other governments

(2) If the source referred to in subsection (1) is a not a federal source, the Minister shall

- (a) consult with the government responsible for the area in which the source is situated to determine whether that government can prevent, control or correct the water pollution under its laws; and
- (b) if the government referred to in paragraph (a) can prevent, control or correct the water pollution, offer it an opportunity to do so.

Ministerial action

(3) If the source referred to in subsection (1) is a federal source, or if the government referred to in paragraph (2)(a) cannot prevent, control or correct the water pollution under its laws or does not do so, the Minister shall take at least one of the following courses of action:

- (a) on approval by the Governor in Council, publish a notice under subsection 56(1); or
- (b) recommend regulations to the Governor in Council for the purpose of preventing, controlling or correcting the water pollution.

Reciprocity with other country

If the water pollution referred to in paragraph (1)(a) is in a country where Canada does not have substantially the same rights with respect to the prevention, control or correction of water pollution as that country has under this Division, the Minister shall decide whether to act under subsections (2) and (3).

Other factors

(5) When recommending regulations under paragraph (3)(b), the Minister shall take into account comments made under subsection 178(2), notices of objection filed under subsection 332(2) and any report of a board of review submitted under subsection 340(1).

Regulations

177. The Governor in Council may, on the recommendation of the Minister, make regulations with respect to a substance released from a source in Canada into water that creates, or may reasonably be anticipated to create, water pollution referred to in subsection 176(1) for the purpose of preventing, controlling or correcting the water pollution, including regulations respecting

- (a) the quantity or concentration of the substance that may be released into water;

- (b) the manner in which and conditions under which the substance may be released into water, either alone or in combination with any other substance;
- (c) the maintenance of books and records for the administration of any regulation made under this section;
- (d) the conduct of sampling, analyses, tests, measurements or monitoring of the substance and the submission of the results to the Minister; and
- (e) the conditions, test procedures and laboratory practices to be followed for conducting sampling, analyses, tests, measurements or monitoring of the substance.

Notice to other country

178. (1) The Minister shall advise the government of any country that would be affected by or benefit from the regulation before it is published under subsection 332(1).

Comments

(2) Within 60 days after the publication of a proposed regulation under subsection 332(1), any person, including a representative of the government of any country that would be affected by or benefit from it, may file with the Minister written comments on the proposed regulation.

Notice to other governments

(3) At the end of the period of 60 days referred to in subsection (2), the Minister

- (a) shall advise each government referred to in paragraph 176(2)(a) of any notice of objection filed under subsection 332(2); and
- (b) shall publish in the *Canada Gazette*, and may publish in any other manner that the Minister considers appropriate, a report or a notice of the availability of a report that summarizes how any written comments filed under subsection (2) or a notice of objection filed under subsection 332(2) were dealt with.

Report and remedial measures

179. (1) Where there occurs or there is a likelihood of a release into waters of a substance in contravention of a regulation made under section 177, any person described in subsection (2) shall, as soon as possible in the circumstances,

- (a) subject to subsection (4) and the regulations, notify an enforcement officer or any other person designated pursuant to the regulations and provide a written report on the matter to the enforcement officer or other person;
- (b) take all reasonable measures consistent with the protection of the environment and public safety to prevent the release or, if it cannot be prevented, to remedy any dangerous condition or reduce or mitigate any danger to the environment or to human life or health that results from the release of the substance or may reasonably be expected to result if the substance is released; and
- (c) make a reasonable effort to notify any member of the public who may be adversely affected by the release or likely release.

Application

(2) Subsection (1) applies to any person who

- (a) owns or has charge of a substance immediately before its release or its likely release into water; or
- (b) causes or contributes to the release or increases the likelihood of the release.

Report by property owner

(3) Where there occurs a release of a substance as described in subsection (1), any person, other than a person described in subsection (2), whose property is affected by the release shall, as soon as possible in the circumstances and subject to subsection (4), report the matter to an enforcement officer or to any person

that is designated by regulation.

Report to official

(4) Where there are in force, by or under the laws of a province or an aboriginal government, provisions that the Governor in Council, by regulation, declares to be adequate for dealing with a release described in subsection (1), a report required by paragraph (1)(a) or subsection (3) shall be made to a person designated by those provisions.

Intervention by enforcement officer

(5) Where any person fails to take any measures required under subsection (1), an enforcement officer may take those measures, cause them to be taken or direct any person referred to in subsection (2) to take them.

Limitation on power of direction

(6) Any direction of an enforcement officer under subsection (5) that is inconsistent with a requirement imposed by or under any other Act of Parliament is void to the extent of the inconsistency.

Access to property

(7) Any enforcement officer or other person authorized or required to take any measures under subsection (1) or (5) may enter and have access to any place or property and may do any reasonable things that may be necessary in the circumstances.

Immunity

(8) Any person, other than a person described in subsection (2), who provides assistance or advice in taking the measures required by subsection (1) or who takes any measures authorized under subsection (5) is not personally liable either civilly or criminally in respect of any act or omission in the course of providing assistance or advice or taking any measures under those subsections unless it is established that the person acted in bad faith.

Recovery of reasonable costs and expenses by Her Majesty

180. (1) Her Majesty in right of Canada may recover the costs and expenses of and incidental to taking any measures under subsection 179(5) from

(a) any person referred to in paragraph 179(2)(a); and

(b) any person referred to in paragraph 179(2)(b) to the extent of the person's negligence in causing or contributing to the release.

Only if reasonably incurred

(2) The costs and expenses referred to in subsection (1) shall only be recovered to the extent that they can be established to have been reasonably incurred in the circumstances.

Liability

(3) Subject to subsection (4), the persons referred to in subsection (1) are jointly and severally liable or solidarily liable for the costs and expenses referred to in that subsection.

Limitation

(4) A person referred to in paragraph 179(2)(b) shall not be held liable under subsection (3) to an extent greater than the extent of the person's negligence in causing or contributing to the release.

Procedure

(5) A claim under this section may be sued for and recovered by Her Majesty in right of Canada with costs in proceedings brought or taken therefor in the name of Her Majesty in right of Canada in any court of competent jurisdiction.

Recourse or indemnity

(6) This section does not limit or restrict any right of recourse or indemnity that a person may have against any other person.

Limitation period

(7) Where events giving rise to a claim under this section occur, no proceedings in respect of the claim may be instituted after five years from the date on which the events occur or become evident to the Minister, whichever is later.

Minister's certificate

(8) A document purporting to have been issued by the Minister certifying the day on which the events giving rise to a claim under this section came to the knowledge of the Minister shall be received in evidence and, in the absence of any evidence to the contrary, the document shall be considered as proof of that fact without proof of the signature or of the official character of the person appearing to have signed the document and without further proof.

Prohibition

181. No person shall carry on a work, undertaking or activity that results in the release of a substance in contravention of a regulation made under section 177.

Plans and specifications

182. (1) If a person carries on or proposes to carry on a work, undertaking or activity that results or may result in the release of a substance that creates, or may reasonably be anticipated to create, water pollution, the person shall, at the request of the Minister for the purposes of this Division and within the time that the Minister may specify, provide the Minister with plans, specifications, studies, procedures, schedules, analyses, samples or other information relating to the work, undertaking or activity and with analyses, samples, evaluations, studies, mitigation methodologies or other information relating to the substance.

Obtaining information from government

(2) Before making a request to a person under subsection (1), the Minister shall try to obtain, within a reasonable time, the samples or information from the government responsible for the area in which the person is situated.

Interim order

183. (1) The Minister may make an interim order that contains any provision that may be contained in a regulation under section 177 if the Minister believes

- (a) that the substance or source referred to in subsection 176(1) is not adequately regulated; and
- (b) that immediate action is required to deal with a significant danger to the environment or to human life or health.

Effective date of order

(2) An interim order has effect from the time it is made.

Approval of Governor in Council

(3) An interim order ceases to have effect 14 days after it is made unless it is approved by the Governor in

Council within that period.

Consultation

(4) The Governor in Council shall not approve an interim order unless the Minister has

- (a) within 24 hours after making the order, offered to consult with all affected governments to determine whether they are prepared to take sufficient action to deal with the significant danger; and
- (b) consulted with other ministers of the Crown in right of Canada to determine whether any action can be taken under any other Act of Parliament to deal with the significant danger.

Ministerial action

(5) Where the Governor in Council approves an interim order, the Minister shall, within 90 days after the approval, take measures to comply with section 176 in order to address the significant danger that gave rise to the interim order.

Contravention of unpublished order

(6) No person shall be convicted of an offence consisting of a contravention of an interim order that, at the time of the alleged contravention, had not been published in the *Canada Gazette* unless it is proved that, at the time of the alleged contravention, the person had been notified of the interim order.

Cessation of effect

(7) Subject to subsection (3), an interim order ceases to have effect on the earliest of

- (a) the day it is repealed,
- (b) the day a regulation is made in accordance with subsection (5), and
- (c) two years after the order is made.

Revocation of interim order

(8) No action is required to be taken under subsection (5) if the interim order is repealed.

Report to Parliament

184. The Minister shall include in the annual report required by section 342 a report on the administration of this Division.

Division 8: Control of Movement of Hazardous Waste and Hazardous Recyclable Material and of Prescribed Non-hazardous Waste for Final Disposal

Import, export and transit

185. (1) No person shall import, export or convey in transit a hazardous waste or hazardous recyclable material, or prescribed non-hazardous waste for final disposal, except

- (a) after notifying the Minister and paying the prescribed fee;
- (b) after receiving from the Minister whichever one of the following permits is applicable:
 - (i) an import permit or export permit that, except in the case of a permit issued under subsection (4), states that the authorities of the country of destination and, if applicable, of the country of transit have authorized the movement, and that the authorities of the jurisdiction of destination have authorized the final disposal or recycling of the waste or material, or
 - (ii) a transit permit that states that the Minister has authorized the movement; and
- (c) in accordance with the prescribed conditions.

Refusal to issue permit

(2) If the Minister is of the opinion that the waste or material will not be managed in a manner that will protect the environment and human health against the adverse effects that may result from that waste or material, the Minister may refuse, in accordance with the criteria set out in the regulations, to issue a permit even if the relevant authorities have given their authorization.

Consultation with governments

(3) Before refusing under subsection (2) to issue a permit to import, the Minister shall consult with the government of the jurisdiction of destination.

Special circumstances to issue permits

(4) Where the Minister is of the opinion that the waste or material will be managed in a manner that will protect the environment and human health against the adverse effects that may result from that waste or material, the Minister may issue a permit if the relevant authorities inform the Minister that they lack the legal authority to authorize the movement, final disposal or recycling but are not opposed to it.

Prohibitions - import, export and transit

186. (1) For the purpose of implementing international agreements respecting the environment, the Minister may, with the approval of the Governor in Council and taking into account Canada's international obligations, prohibit, completely or partially and under any conditions that may be prescribed, the import, export or transit of waste or material referred to in subsection 185(1).

Prohibition of abandonment

(2) No person shall abandon any waste or material referred to in subsection 185(1) in the course of import, export or transit.

Publication

187. After the Minister receives a notification of the proposed import, export or transit of a waste or material referred to in paragraph 185(1)(a), the Minister shall publish in the *Canada Gazette*, or in any other manner that the Minister considers appropriate, the name or specifications of the waste or material and

(a) in the case of a proposed import, the name of the jurisdiction of origin and the name of the importer;

(b) in the case of a proposed export, the name of the jurisdiction of destination and the name of the exporter; and

(c) in the case of a proposed transit, the names of the jurisdictions of origin and of destination and the name of the conveyer.

Reduction of export for final disposal

188. (1) For the purpose of reducing or phasing out the export of hazardous waste or prescribed non-hazardous waste for final disposal, the Minister may require an exporter, or a class of exporters, of hazardous waste to

(a) submit to the Minister, at the same time as the notification referred to in paragraph 185(1)(a) and at any other prescribed time, a plan in accordance with the regulations; and

(b) implement that plan.

Declaration of implementation

(2) Every person who is required to implement a plan under paragraph (1)(b) shall file with the Minister, within 30 days after the completion of each stage of the plan, a written declaration that the implementation has been completed.

Sanction

(3) The Minister may refuse to issue a permit to an exporter who does not comply with subsection (1) or (2).

Movement within Canada

189. (1) No person shall undertake movement within Canada of hazardous waste or hazardous recyclable material otherwise than in accordance with this Division and the regulations and unless the person pays the prescribed fee.

Publication

(2) The Minister shall publish in the *Canada Gazette*, or in any other manner that the Minister considers appropriate, information derived from documents received under regulations made for the purpose of this section.

Permits based on equivalent environmental safety level

190. (1) The Minister may issue a permit authorizing, subject to conditions fixed by the Minister, any activity to be conducted in a manner that does not comply with this Division if the Minister is satisfied that

(a) the manner in which the activity will be conducted provides a level of environmental safety at least equivalent to that provided by compliance with this Division; and

(b) in the case of the importation, exportation or transit of a waste or material referred to in subsection 185(1), the activity is consistent with international environmental agreements binding on Canada.

Scope of permit

(2) The permit may authorize the activity in terms of the persons who may conduct the activity and in terms of the waste and material that it may involve.

Revocation of permit

(3) The Minister may revoke the permit if

(a) the Minister is of the opinion that paragraph (1)(a) or (b) no longer applies;

(b) the regulations have been amended and address the activity authorized by the permit; or

(c) the permit holder does not comply with the conditions of the permit.

Publication

(4) The Minister shall publish in the *Canada Gazette*, or in any other manner that the Minister considers appropriate, a copy of each permit issued under this section.

Regulations

191. The Governor in Council may, on the recommendation of the Minister, make regulations generally for carrying out the purposes and provisions of this Division, including regulations

(a) defining, for the purposes of this Division and Part 10, words and expressions used in this Division, and providing criteria, testing protocols and standards in relation to those definitions;

(b) respecting the notification referred to in paragraph 185(1)(a) and the procedure for applying for a permit under this Division;

(c) establishing criteria for the purpose of subsection 185(2) that take into account obligations arising from international agreements to which Canada is a party;

(d) for establishing a classification system for waste and material;

(e) respecting information and documents to be provided to the Minister;

(f) respecting conditions governing the import, export, transit and movement within Canada of waste and material;

(g) respecting plans referred to in subsection 188(1), taking into account

- (i) the benefit of using the nearest appropriate disposal facility, and
 - (ii) changes in the quantity of goods the production of which generates hazardous waste to be disposed of by an exporter or class of exporters; and
- (h) prescribing anything that by this Division is to be prescribed.

Forms

192. The Minister may establish forms for the purposes of this Division.

Part 8: Environmental Matters Related to Emergencies

Definitions

193. The definitions in this section apply in this Part.

"environmental emergency" « *urgence environnementale* »

"environmental emergency" means

- (a) an uncontrolled, unplanned or accidental release, or release in contravention of regulations or interim orders made under this Part, of a substance into the environment; or
- (b) the reasonable likelihood of such a release into the environment.

"substance" « *substance* »

"substance" means, except in sections 199 and 200.1, a substance on a list of substances established under regulations or interim orders made under this Part.

1999, c. 33, s. 193; 2004, c. 15, s. 26.

Application

194. For the purposes of this Part, any power, duty or function conferred or imposed under this Part may only be exercised or performed in relation to those aspects of an environmental emergency that

- (a) have or may have an immediate or long-term harmful effect on the environment;
- (b) constitute or may constitute a danger to the environment on which human life depends; or
- (c) constitute or may constitute a danger in Canada to human life or health.

Research

195. Despite subsection 36(3) of the *Fisheries Act*, subsection 123(1) and regulations made under paragraphs 93(1)(a), (b), (c) and (d) and 209(2)(a), (b), (c) and (d), the Minister may

- (a) examine and conduct research, including tests, respecting the causes, circumstances and effects of and remedial measures for an environmental emergency; and
- (b) conduct and publicize demonstration projects.

Guidelines and codes of practice

196. The Minister may issue guidelines and codes of practice respecting the prevention of, preparedness for and response to an environmental emergency and for restoring any part of the environment damaged by or during an emergency.

Consultation

197. (1) In carrying out the responsibilities conferred by section 196, the Minister shall offer to consult with the government of a province and the members of the Committee who are representatives of aboriginal governments and may consult with a government department or agency, aboriginal people, representatives of industry and labour and municipal authorities or with persons interested in the quality of the environment or environmental emergencies.

Minister may act

(2) At any time after the 60th day following the day on which the Minister offers to consult in accordance with subsection (1), the Minister may act under section 196 if the offer to consult is not accepted by the government of a province or members of the Committee who are representatives of aboriginal governments.

Publication of guidelines and codes of practice

198. The Minister shall publish in the *Canada Gazette*, or in any other manner that the Minister considers appropriate, guidelines and codes of practice issued under section 196 or a notice stating where copies of those documents may be obtained.

Requirements for environmental emergency plans

199. (1) The Minister may at any time publish in the *Canada Gazette*, and in any other manner that the Minister considers appropriate, a notice requiring any person or class of persons described in the notice to prepare and implement an environmental emergency plan respecting the prevention of, preparedness for, response to or recovery from an environmental emergency in respect of

- (a) a substance or group of substances on the List of Toxic Substances in Schedule 1; or
- (b) a substance or group of substances in relation to which there has been published in the *Canada Gazette*
 - (i) a statement of the Ministers under paragraph 77(6)(b) indicating that the measure that they propose to take, as confirmed or amended, is a recommendation that the substance be added to the List of Toxic Substances in Schedule 1, or
 - (ii) a copy of an order proposed to be made under subsection 90(1).

Contents of notice

(2) The notice shall specify

- (a) the substance or group of substances in relation to which the plan is to be prepared;
- (b) the period within which the plan is to be prepared;
- (c) the period within which the plan is to be implemented; and
- (d) any other matter that the Minister considers necessary.

Extension of time

(3) Where the Minister is of the opinion that further time is necessary to prepare or implement the plan, the Minister may extend the period for a person who submits a written request before the expiry of the period referred to in the notice or of any extended period.

Plan prepared or implemented for another purpose

(4) Subject to subsection (5), where a person who is required to prepare or implement an environmental emergency plan under a notice published under this section has prepared or implemented a plan in respect of environmental emergencies on a voluntary basis or for another government or under another Act of Parliament that meets all or some of the requirements of the notice, the person may use that plan for the purposes of meeting the requirements of this Part and, in that case, the plan shall be considered to be an environmental emergency plan that has been prepared or implemented under this Part.

Where partial requirements met

(5) Where a person uses a plan under subsection (4) that does not meet all of the requirements of the notice, the person shall

- (a) amend the plan so that it meets all of those requirements; or
- (b) prepare an additional environmental emergency plan that meets the remainder of those requirements.

Application of provisions re declarations and keeping plans

(6) Sections 58 and 59 apply to environmental emergency plans, with any modifications that the circumstances require, as if any reference to a pollution prevention plan were read as a reference to an environmental emergency plan.

Submission of plans

(7) The Minister may publish in the *Canada Gazette*, and in any other manner that the Minister considers appropriate, a notice requiring any person or class of persons described in the notice who are required to prepare or implement an environmental emergency plan under subsection (1) or section 291 or under an agreement in respect of environmental protection alternative measures to submit, within the period specified by the Minister, the plan or any part of the plan.

Regulations

200. (1) The Governor in Council may, on the recommendation of the Minister and after the Committee is given an opportunity to provide its advice to the Minister under section 6, make regulations

- (a) establishing a list of substances that, if they enter the environment as a result of an environmental emergency,
 - (i) have or may have an immediate or long-term harmful effect on the environment or its biological diversity,
 - (ii) constitute or may constitute a danger to the environment on which human life depends, or
 - (iii) constitute or may constitute a danger in Canada to human life or health;
- (b) prescribing, in respect of a substance on the list established under paragraph (a), a minimum quantity;
- (c) respecting the identification of the places in Canada where a substance referred to in paragraph (a), in any quantity or in the quantity prescribed for that substance under paragraph (b), is located and requiring notification to the Minister of those places;
- (d) respecting the prevention of, preparedness for, response to and recovery from an environmental emergency in respect of a substance;
- (e) respecting the notification and reporting of an environmental emergency;
- (f) respecting the notification and reporting of the measures taken
 - (i) to prevent the environmental emergency, or
 - (ii) to repair, reduce or mitigate any negative effects on the environment or human life or health that result from the environmental emergency or that may reasonably be expected to result from it;
- (g) respecting the implementation of international agreements entered into by Canada in relation to environmental emergencies; and
- (h) respecting any other matter necessary for the purposes of this Part.

Environmental emergencies regulated under other Acts of Parliament

(2) The Governor in Council shall not make a regulation under subsection (1) in respect of a matter if, by order, the Governor in Council states that it is of the opinion that

- (a) the matter is regulated by or under any other Act of Parliament that contains provisions that are similar in effect to sections 194 to 205; and
- (b) that Act or any regulation made under that Act provides sufficient protection to human health and the environment or its biological diversity.

Interim orders

200.1 (1) The Minister may make an interim order, in respect of a substance, that contains any provision that may be contained in a regulation made under this Part, if

- (a) the substance
 - (i) is not on the list established under regulations made under this Part and the Ministers believe that, if it enters the environment as a result of an environmental emergency,
 - (A) it would have or may have an immediate or long-term harmful effect on the environment or its biological diversity,
 - (B) it would constitute or may constitute a danger to the environment on which human life depends, or
 - (C) it would constitute or may constitute a danger in Canada to human life or health, or

- (ii) is on that list and the Ministers believe that it is not adequately regulated; and
- (b) the Ministers believe that immediate action is required to deal with a significant danger to the environment or to human life or health.

Effect of order

- (2) Subject to subsection (3), an interim order has effect
 - (a) from the time it is made; and
 - (b) as if it were a regulation made under this Part.

Approval of Governor in Council

- (3) An interim order ceases to have effect unless it is approved by the Governor in Council within 14 days after it is made.

Consultation

- (4) The Governor in Council shall not approve an interim order unless the Minister has
 - (a) within 24 hours after making the order, offered to consult with all affected governments to determine whether they are prepared to take sufficient action to deal with the significant danger; and
 - (b) consulted with other ministers of the Crown in right of Canada to determine whether any action can be taken under any other Act of Parliament to deal with the significant danger.

Recommendation of regulations

- (5) If the Governor in Council approves an interim order, the Minister shall, within 90 days after the approval, publish in the Canada Gazette a statement indicating whether the Minister intends to recommend to the Governor in Council
 - (a) that a regulation having the same effect as the order be made under this Part; and
 - (b) if the order was made in respect of a substance that was not on the list established under regulations made under this Part, that the substance be added to that list.

Contravention of unpublished order

- (6) No person shall be convicted of an offence consisting of a contravention of an interim order that, at the time of the alleged contravention, had not been published in the Canada Gazette unless it is proved that, at the time of the alleged contravention, the person had been notified of the interim order or reasonable steps had been taken to bring the purport of the interim order to the notice of those persons likely to be affected by it.

Cessation of effect

- (7) Subject to subsection (3), an interim order ceases to have effect on the earliest of
 - (a) the day it is repealed,
 - (b) the day a regulation referred to in subsection (5) is made, and
 - (c) two years after the order is made.

Tabling of order

- (8) A copy of each interim order must be tabled in each House of Parliament within 15 days after it is made.

House not sitting

- (9) In order to comply with subsection (8), the interim order may be sent to the Clerk of the House if the

House is not sitting.

2004, c. 15, s. 27.

Remedial measures

201. (1) Subject to any regulations made under subsection 200(1) or any interim orders made under section 200.1, if there occurs an environmental emergency in respect of a substance on a list established under the regulations or interim orders, any person described in subsection (2) shall, as soon as possible in the circumstances,

- (a) notify an enforcement officer or any other person designated by regulation or interim order and provide a written report on the environmental emergency to the enforcement officer or other person;
- (b) take all reasonable emergency measures consistent with the protection of the environment and public safety
 - (i) to prevent the environmental emergency, or
 - (ii) to repair, reduce or mitigate any negative effects on the environment or human life or health that result from the environmental emergency or that may reasonably be expected to result from it; and
- (c) make a reasonable effort to notify any member of the public who may be adversely affected by the environmental emergency.

Application

(2) Subsection (1) applies to any person who

- (a) owns or has the charge, management or control of a substance immediately before the environmental emergency; or
- (b) causes or contributes to the environmental emergency.

Report by other persons

(3) A person, other than a person described in subsection (2), shall, as soon as possible in the circumstances, report an environmental emergency to an enforcement officer or to a person designated by regulation or interim order if their property is affected by the environmental emergency.

Intervention by enforcement officer

(4) Where any person fails to take any measures required under subsection (1), an enforcement officer may take those measures, cause them to be taken or direct any person referred to in subsection (2) to take them.

Limitation on power of direction

(5) Any direction of an enforcement officer under subsection (4) that is inconsistent with a requirement imposed by or under any other Act of Parliament is void to the extent of the inconsistency.

Access to property

(6) Any enforcement officer or other person authorized or required to take any measures under subsection (1) or (4) may enter and have access to any place or property and may do anything reasonable that may be necessary in the circumstances.

Personal liability

(7) Any person, other than a person described in subsection (2), who provides assistance or advice in taking the measures required by subsection (1) or who takes any measures authorized under subsection (4) is not personally liable either civilly or criminally in respect of any act or omission in the course of providing assistance or advice or taking any measures under those subsections unless it is established that the person acted in bad faith.

1999, c. 33, s. 201; 2004, c. 15, s. 28.

Voluntary report

202. (1) If a person knows about an environmental emergency but the person is not required to report the matter under this Act, the person may report any information about the environmental emergency to an enforcement officer or to a person designated by regulation or interim order.

Request for confidentiality

(2) The person making the report may request that their identity and any information that could reasonably reveal their identity not be released.

Requirement of confidentiality

(3) No person shall disclose, or have disclosed, the identity of the person making the request or any information that could reasonably be expected to reveal their identity unless the person making the request authorizes the disclosure in writing.

Employee protection

(4) Despite any other Act of Parliament, no employer shall dismiss, suspend, demote, discipline, harass or otherwise disadvantage an employee, or deny an employee a benefit of employment, by reason that

- (a) the employee has made a report under subsection (1);
- (b) the employee, acting in good faith and on the basis of reasonable belief, has refused or stated an intention of refusing to do anything that is an offence under this Act; or
- (c) the employee, acting in good faith and on the basis of reasonable belief, has done or stated an intention of doing anything that is required to be done by or under this Act.

1999, c. 33, s. 202; 2004, c. 15, s. 29.

Recovery of costs and expenses

203. (1) Her Majesty in right of Canada may recover the costs and expenses of and incidental to taking any measures under subsection 201(4) from

- (a) any person referred to in paragraph 201(2)(a); and
- (b) any person referred to in paragraph 201(2)(b) to the extent of their negligence or wilful conduct in causing or contributing to the environmental emergency.

Reasonably incurred

(2) The costs and expenses referred to in subsection (1) shall only be recovered to the extent that they can be established to have been reasonably incurred in the circumstances.

Liability

(3) Subject to subsection (4), the persons referred to in subsection (1) are jointly and severally liable or solidarily liable for the costs and expenses referred to in that subsection.

Limitation

(4) A person referred to in paragraph 201(2)(b) shall not be held liable under subsection (3) to an extent greater than the extent of their negligence or wilful conduct in causing or contributing to the environmental emergency.

Procedure

(5) A claim under this section may be sued for and recovered by Her Majesty in right of Canada with costs in proceedings brought or taken therefor in the name of Her Majesty in right of Canada in any court of competent jurisdiction.

Recourse or indemnity

(6) This section does not limit or restrict any right of recourse or indemnity that a person may have against any other person.

Limitation period

(7) Where events giving rise to a claim under this section occur, no proceedings in respect of the claim may be instituted after five years from the date on which the events occur or become evident to the Minister, whichever is later.

Minister's certificate

(8) A document purporting to have been issued by the Minister certifying the day on which the events giving rise to a claim under this section came to the knowledge of the Minister shall be received in evidence and, in the absence of any evidence to the contrary, the document shall be considered as proof of that fact without proof of the signature or of the official character of the person appearing to have signed the document and without further proof.

National notification and reporting system

204. (1) The Minister may establish, in cooperation with the governments of the provinces and aboriginal governments and government departments or agencies, a national system for the notification and reporting of environmental emergencies.

Copies

(2) Subject to section 314, any person may have access to and a copy of any information contained in the national system established under subsection (1).

Liability of owner of substance

205. (1) Subject to this Part, the person who owns or has the charge, management or control of a substance immediately before an environmental emergency is liable

- (a) for restoring any part of the environment damaged by or during the emergency;
- (b) for costs and expenses incurred by a public department within the meaning of the *Criminal Code* or other public authority in Canada in respect of measures taken to prevent, repair, remedy or minimize the damage to the environment resulting from the emergency, including measures taken in anticipation of the environmental emergency, to the extent that the measures taken and the costs and expenses are reasonable, and for any loss or damage caused by such measures; and
- (c) for costs and expenses incurred by the Minister in respect of measures taken to prevent, repair, remedy or minimize the environmental emergency to the extent that the measures taken and the costs and expenses are reasonable, and for any loss or damage caused by such measures.

Definition of "public authority in Canada"

(2) In subsection (1), "public authority in Canada" means Her Majesty in right of a province, an aboriginal government or any other body designated by the Governor in Council for the purposes of that subsection as a public authority in Canada.

Strict liability subject to certain defences

(3) The person's liability under subsection (1) does not depend on proof of fault or negligence, but the owner is not liable under that subsection if the owner establishes that the environmental emergency

(a) resulted from an act of war, hostilities or insurrection or from a natural phenomenon of an exceptional, inevitable and irresistible character;

(b) was wholly caused by an act or omission of a third party with intent to cause damage; or

(c) was wholly caused by the negligence or other wrongful act of government, public department or public authority.

Reduced liability

(4) Where the person who is liable under subsection (1) establishes that the environmental emergency resulted wholly or partially from

(a) an act or omission done by the person who suffered the damage with intent to cause damage, or

(b) the negligence or wilful conduct of that person,

the liability of the person referred to in subsection (1) to that other person is reduced or nullified in proportion to the degree to which the environmental emergency resulted from the factors mentioned in paragraphs (a) and (b).

Person's rights against third parties preserved

(5) Nothing in this Part shall be construed as limiting or restricting any right of recourse that the person who is liable under subsection (1) may have against any other person.

Person's own claim for costs and expenses

(6) Costs and expenses incurred by the person referred to in subsection (1) in respect of measures voluntarily taken to prevent, repair, remedy or minimize damage from the environmental emergency, including measures taken in anticipation of an environmental emergency, to the extent that the measures taken and the costs and expenses are reasonable, rank equally with other claims against any security given by that person in respect of that person's liability under this section.

Part 9: Government Operations and Federal and Aboriginal Land

[Interpretation](#)

[Application](#)

[Objectives, Guidelines and Codes of Practice](#)

[Regulations](#)

[Information about Works and Activities](#)

[Release of Substances](#)

Interpretation

Definition of "regulations"

206. In this Part, "regulations" means regulations made under this Part.

Application

Application to Government, etc.

207. (1) This Part applies to

- (a) departments, boards and agencies of the Government of Canada;
- (b) federal works and undertakings;
- (c) aboriginal land, federal land, persons on that land and other persons in so far as their activities involve that land; and
- (d) Crown corporations, as defined in subsection 83(1) of the *Financial Administration Act*.

Yukon

(1.1) This Part does not apply to public real property under the administration and control of the Commissioner of Yukon pursuant to the Yukon Act.

Limitation

(2) This Part does not restrict any of the following powers in so far as they may be exercised in relation to air and all layers of the atmosphere above federal land or aboriginal land:

- (a) powers under the *Aeronautics Act* or a provision of any other Act of Parliament relating to aeronautics or air transportation; or
- (b) powers under the *National Defence Act* or a provision of any other Act of Parliament relating to national defence and security.

1999, c. 33, s. 207; 2002, c. 7, s. 125.

Objectives, Guidelines and Codes of Practice

Minister shall establish

208. (1) The Minister shall establish objectives, guidelines and codes of practice for the purpose of carrying out the Minister's duties and functions under this Part related to the quality of the environment.

Consultation

(2) In establishing an objective, a guideline or a code of practice under subsection (1), the Minister

- (a) shall offer to consult with the government of a territory if the objective, guideline or code of practice applies to that territory, and with the members of the Committee who are representatives of aboriginal governments if it applies to aboriginal land over which an aboriginal government has jurisdiction; and

(b) may consult with a department, board or agency of the Government of Canada, or a Crown corporation as defined in subsection 83(1) of the *Financial Administration Act*.

Minister may act

(3) At any time after the 60th day following the day on which the Minister offers to consult in accordance with paragraph (2)(a), the Minister may act under subsection (1) if the offer to consult is not accepted by the government of a territory or members of the Committee who are representatives of aboriginal governments.

Regulations

Regulations for the protection of the environment

209. (1) The Governor in Council may, on the recommendation of the Minister, make regulations for the protection of the environment, including, but not limited to, regulations respecting

- (a) the establishment of environmental management systems;
- (b) pollution prevention and pollution prevention plans;
- (c) environmental emergencies, releases of substances and likely releases, including their prevention, preparedness for them, reporting them, both as soon as possible in the circumstances and in detail at a later stage, and the measures to be taken to respond to them and to correct damage to the environment;
- (d) the designation of persons for the purposes of paragraph 212(1)(a) and subsections 212(3) and 213(1) and prescribing the form of the report to be made under those provisions and the information to be contained in it;
- (e) the circumstances in which a report is not required under paragraph 212(1)(a);
- (f) any substance; and
- (g) any other matter necessary to carry out the purposes of this Part.

Content of the regulations

(2) Regulations with respect to any substance may provide for, or impose requirements respecting,

- (a) the quantity or concentration of any substance that may be released into the environment either alone or in combination with any other substance from any source or type of source;
- (b) the places or areas where the substance may be released;
- (c) the commercial, manufacturing, processing or other activity in the course of which the substance may be released;
- (d) the manner in which and the conditions under which the substance may be released into the environment, either alone or in combination with any other substance;
- (e) the quantity of the substance that may be manufactured, processed, used, offered for sale or sold in Canada;
- (f) the purposes for which the substance or a product containing it may be imported, manufactured, processed, used, offered for sale or sold;
- (g) the manner in which and the conditions under which the substance or a product containing it may be imported, manufactured, processed or used;
- (h) the quantities or concentrations in which the substance may be used;
- (i) the quantities or concentrations of the substance that may be imported;
- (j) the countries from or to which the substance may be imported or exported;
- (k) the conditions under which, the manner in which and the purposes for which the substance may be imported or exported;
- (l) the total, partial or conditional prohibition of the manufacture, use, processing, sale, offering for sale, import or export of the substance or a product containing the substance and the total, partial or conditional prohibition of the import or export of a product that is intended to contain the substance;
- (m) the quantity or concentration of the substance that may be contained in any product manufactured, imported, exported, sold or offered for sale in Canada;
- (n) the manner in which, the conditions under which and the purposes for which the substance or a product containing it may be advertised or offered for sale;
- (o) the manner in which and the conditions under which the substance or a product containing it may

be stored, displayed, handled, transported or offered for transport;

(p) the packaging and labelling of the substance or a product containing it;

(q) the manner, conditions, places and method of disposal or recycling of the substance or a product containing it, including standards for the construction, maintenance and inspection of disposal or recycling sites;

(r) the submission to the Minister, on request or at any times that are prescribed, of information relating to the substance;

(s) the maintenance of books and records for the administration of any regulation made under this section;

(t) the conduct of sampling, analyses, tests, measurements or monitoring of the substance and the submission of the results to the Minister;

(u) the submission of samples of the substance to the Minister;

(v) the conditions, test procedures and laboratory practices to be followed for conducting sampling, analyses, tests, measurements or monitoring of the substance;

(w) the circumstances or conditions under which the Minister may, for the proper administration of this Act, modify

(i) any requirement for sampling, analyses, tests, measurements or monitoring, or

(ii) conditions, test procedures and laboratory practices for conducting any required sampling, analyses, tests, measurements or monitoring; and

(x) the decommissioning and decontamination of storage, handling, transportation, disposal and recycling sites for the substance.

Consultation

(3) Before recommending to the Governor in Council a regulation under this section, the Minister

(a) shall offer to consult with the government of a territory if the regulation applies to that territory, and with the members of the Committee who are representatives of aboriginal governments if it applies to aboriginal land over which an aboriginal government has jurisdiction; and

(b) may consult with a department, board or agency of the Government of Canada, or a Crown corporation as defined in subsection 83(1) of the *Financial Administration Act*.

Minister may act

(4) At any time after the 60th day following the day on which the Minister offers to consult in accordance with paragraph (3)(a), the Minister may recommend a regulation to the Governor in Council under this section if the offer to consult is not accepted by the government of a territory or members of the Committee who are representatives of aboriginal governments.

Non-application of regulations

210. Where the Governor in Council is of the opinion that provisions of any other Part of this Act or any other Act of Parliament, or regulations made under them,

(a) are in force in respect of an aspect of the protection of the environment,

(b) apply to a federal work or undertaking, federal land or aboriginal land, and

(c) provide sufficient protection to the environment and human health,

the Governor in Council may make an order stating that opinion and, if such an order is made, regulations made under this Part relating to the same aspect do not apply to the federal work or undertaking, the federal land or the aboriginal land.

Information about Works and Activities

Minister may require information

211. (1) For the purpose of making regulations, the Minister may require information from any person who carries on, or proposes to carry on, a federal work or undertaking or an activity on federal land or aboriginal land.

Kind of information

(2) The required information shall be information that will enable the Minister to determine any environmental effects that the work, undertaking or activity may have, and it may include

- (a) plans, specifications, studies, procedures, schedules, analyses, samples or other information relating to the work, undertaking or activity; and
- (b) analyses, samples, evaluations, studies or other information relating to the environment that is or is likely to be affected by the work, undertaking or activity.

Release of Substances

Report and remedial measures

212. (1) If a substance is released into the environment in contravention of a regulation, or if there is a likelihood of such a release, a person described in subsection (2) shall, as soon as possible in the circumstances,

- (a) subject to the regulations, notify an enforcement officer or any other person designated pursuant to the regulations and provide a written report on the matter to the enforcement officer or other person;
- (b) take all reasonable measures consistent with the protection of the environment and public safety to prevent or eliminate any dangerous condition or minimize any danger to the environment or to human life or health that results from the release or may reasonably be expected to result if the substance is released; and
- (c) make a reasonable effort to notify any members of the public who may be adversely affected by the release or likely release.

Application of subsection (1)

(2) Subsection (1) applies to any person who

- (a) owns or has the charge, management or control of the substance immediately before its release or its likely release into the environment; or
- (b) causes or contributes to the release or increases the likelihood of the release.

Report by other persons

(3) A person, other than a person described in subsection (2), shall, as soon as possible in the circumstances, report a release of a substance to an enforcement officer or to a person designated by the regulations if their property is affected by the release and they know that the substance has been released in contravention of a regulation.

Intervention by enforcement officer

(4) Where measures required by subsection (1) are not taken, an enforcement officer may take them, have them taken or direct a person described in subsection (2) to take them.

Limitation on direction

(5) If the direction to the person described in subsection (2) is inconsistent with a requirement imposed by or under any other Act of Parliament, it is void to the extent of the inconsistency.

Access to property

(6) An enforcement officer or other person authorized or required to take measures under subsection (1) or (4) may, for the purpose of taking those measures, enter and have access to any place or property and may do anything reasonable that may be necessary in the circumstances.

Personal liability

(7) A person who provides assistance or advice in taking the measures required by subsection (1), or who takes any measures authorized under subsection (4), is not personally liable either civilly or criminally for any act or omission in the course of providing assistance or advice or taking any measures under those subsections, unless it is established that the person acted in bad faith.

Voluntary report

213. (1) If a person knows about a release or likely release of a substance into the environment in contravention of a regulation but the person is not required to report the matter under this Act, the person may report any information about the release or likely release to an enforcement officer or to a person designated by the regulations.

Request for confidentiality

(2) The person making the report may request that their identity and any information that could reasonably reveal their identity not be released.

Requirement of confidentiality

(3) No person shall disclose, or have disclosed, the identity of the person making the request or any information that could reasonably be expected to reveal their identity unless the person making the request authorizes the disclosure in writing.

Employee protection

(4) Despite any other Act of Parliament, no employer shall dismiss, suspend, demote, discipline, harass or otherwise disadvantage an employee, or deny an employee a benefit of employment, by reason that

- (a) the employee has made a report under subsection (1);
- (b) the employee, acting in good faith and on the basis of reasonable belief, has refused or stated an intention of refusing to do anything that is an offence under this Act; or
- (c) the employee, acting in good faith and on the basis of reasonable belief, has done or stated an intention of doing anything that is required to be done by or under this Act.

Recovery of costs and expenses

214. (1) The costs and expenses related to taking any measures under subsection 212(4) may be recovered by Her Majesty in right of Canada from

- (a) any person referred to in paragraph 212(2)(a); and
- (b) any person referred to in paragraph 212(2)(b) to the extent of their negligence or wilful conduct in causing or contributing to the release.

Reasonably incurred

(2) The costs and expenses may only be recovered to the extent that they have been reasonably incurred in the circumstances.

Liability

(3) Persons from whom the costs and expenses may be recovered are jointly and severally liable or solidarily liable for them. However, a person mentioned in paragraph 212(2)(b) is not liable to an extent greater than the extent of their negligence or wilful conduct in causing or contributing to the release.

Recourse or indemnity

(4) This section does not limit or restrict any right of recourse or indemnity that a person may have against any other person.

Court and costs

215. (1) A claim under section 214 may be recovered with costs in any court of competent jurisdiction.

Limitation period

(2) Where events giving rise to the claim occur, no proceedings in respect of the claim may be instituted more than five years after the date on which the events occur or the Minister becomes aware of them, whichever is later.

Minister's certificate

(3) A document purporting to have been issued by the Minister certifying the day on which the events giving rise to a claim under section 214 came to the knowledge of the Minister shall be received in evidence and, in the absence of any evidence to the contrary, the document shall be considered as proof of that fact without proof of the signature or of the official character of the person appearing to have signed the document and without further proof.

Interpretation

Definitions

216. The definitions in this section apply in this Part.

"conveyance" « *moyen de transport* »

"conveyance" includes any vehicle, ship or aircraft.

"foreign national" « *étranger* »

"foreign national" has the same meaning as in subsection 2(1) of the *Immigration and Refugee Protection Act*.

"place" « *lieu* »

"place" includes any platform anchored at sea, shipping container or conveyance.

"substance" « *substance* »

"substance" includes hazardous wastes, hazardous recyclable material or non-hazardous waste, as those expressions are defined by regulations made under section 191, and waste or other matter listed in Schedule 5.

1999, c. 33, s. 216; 2005, c. 23, s. 28.

Definition of "ship that is not a Canadian ship"

216.1. (1) For the purpose of subsections 217(6), 218(16) and (17) and 220(5.1) and section 275.1, a "ship that is not a Canadian ship" does not include a ship that

(a) is not registered, listed or licensed under the *Canada Shipping Act* or under the laws of another state but is owned by one or more persons each of whom is

(i) a Canadian citizen,

(ii) in the case of a ship that is not required to be registered, listed or licensed under that Act, a

person who is resident and domiciled in Canada, or

(iii) a corporation incorporated under the laws of Canada or a province, that has its principal place of business in Canada: or

(b) is not registered, listed or licensed under the *Canada Shipping Act* but is owned or operated by Her Majesty in right of Canada.

Definition of "committed in the course of enforcement of this Act"

(2) For the purpose of subsections 217(4) and 271.1(2), sections 275.1 and 278.1 and subsections 279(1) and (3), "committed in the course of enforcement of this Act" means committed by or against a person who is engaged in carrying out duties or functions, or exercising a power, under this Act or a person acting under their direction and control.

2005, c. 23, s. 29.

Designation of Enforcement Officers and Analysts

Designation

217. (1) The Minister may designate as enforcement officers or analysts for the purposes of this Act, or any provision of this Act,

- (a) persons or classes of persons who, in the Minister's opinion, are qualified to be so designated; and
- (b) with the approval of a government, persons or classes of persons employed by the government in the administration of a law respecting the protection of the environment.

Production of certificate of designation

(2) Every enforcement officer or analyst shall be furnished with a certificate of designation as an enforcement officer or analyst, as the case may be, and on entering any place under section 218 or 220, as the case may be, shall, if so requested, produce the certificate to the person in charge of the place.

Powers of enforcement officers

(3) For the purposes of this Act and the regulations, enforcement officers have all the powers of a peace officer, but the Minister may specify limits on those powers when designating any person or class of persons.

Powers in exclusive economic zone

(4) Every power -- including arrest, entry, search and seizure -- that may be exercised in Canada in respect of an offence under this Act or the *Criminal Code* may, in respect of an offence arising out of a contravention of Division 3 of Part 7 or of any regulation made under that Division, or in respect of an offence under the *Criminal Code* that is committed in the course of enforcement of this Act, be exercised in an area of the sea referred to in paragraph 122(2)(c) if the offence was committed in that area of the sea.

Exercising powers in cases of hot pursuit

(5) The powers referred to in subsection (4) may be exercised in an area of the sea referred to in paragraph 122(2)(g) if hot pursuit has been commenced in Canada or in an area of the sea referred to in any of paragraphs 122(2)(a) to (e) and (g).

When consent of Attorney General of Canada required

(6) The powers referred to in subsection (4) may not be exercised under that subsection or subsection (5) in relation to a ship that is not a Canadian ship, or to a foreign national who is on board such a ship, without the consent of the Attorney General of Canada.

1999, c. 33, s. 217; 2005, c. 23, s. 30.

Inspection

Inspection

218. (1) Subject to subsection (2), for the purposes of this Act and the regulations, an enforcement officer may, at any reasonable time, enter and inspect any place if the enforcement officer has reasonable grounds to believe that

- (a) there can be found in the place a substance to which this Act applies or a product containing such a substance;
- (b) a fuel to which this Act applies is being or has been produced or can be found in the place;
- (c) a cleaning product or water conditioner, as defined in section 116, is being or has been produced or can be found in the place;
- (d) regulations made under section 209 apply to or in respect of the place;
- (e) the place is a source in respect of which regulations have been made under section 167 or 177 or a place in respect of which regulations have been made under section 200;
- (f) a substance is being loaded for the purpose of disposal at sea or is being disposed of at sea;
- (g) any vehicle, engine or equipment of a class for which standards for emissions have been prescribed that is owned by or is on the premises of a company or a consignee of imported vehicles or engines or imported equipment can be found in the place;
- (h) any component to be used in the manufacture of a vehicle, engine or equipment for which standards for emissions have been prescribed can be found in the place;
- (i) any record in relation to the design, manufacture, testing and field performance of a vehicle, engine or equipment in so far as it relates to emissions can be found in the place; or
- (j) any books, records, electronic data or other documents relevant to the administration of this Act can be found in the place.

Private dwelling-place

(2) An enforcement officer may not enter a private dwelling-place or any part of a place that is designed to be used and is being used as a permanent or temporary private dwelling-place except

- (a) with the consent of the occupant of the place; or
- (b) under the authority of a warrant issued under subsection (3).

Warrant for inspection of dwelling-place

(3) Where on *ex parte* application a justice is satisfied by information on oath that

- (a) the conditions for entry described in subsection (1) exist in relation to a private dwelling-place,
- (b) entry to the dwelling-place is necessary for any purpose relating to the administration of this Act, and
- (c) entry to the dwelling-place has been refused or there are reasonable grounds for believing that entry will be refused,

the justice may issue a warrant authorizing the enforcement officer named in it to conduct an inspection of the dwelling-place subject to any conditions that may be specified in the warrant, and authorizing any other person named therein to accompany the enforcement officer and exercise any power specified in the warrant.

Warrants for inspection of non-dwellings

(4) Where on *ex parte* application a justice is satisfied by information on oath that

- (a) the conditions for entry described in subsection (1) exist in relation to a place other than a private dwelling-place,
- (b) entry to that place is necessary for any purpose relating to the administration of this Act,
- (c) entry to that place has been refused, the enforcement officer was not able to enter without the use of force or the place was abandoned, and
- (d) subject to subsection (5), all reasonable attempts were made to notify the owner, operator or

person in charge of the place,

the justice may issue a warrant authorizing the enforcement officer named in it to conduct an inspection of the place, subject to any conditions that may be specified in the warrant, and authorizing any other person named therein to accompany the enforcement officer and exercise any power specified in the warrant.

Waiving notice

(5) The justice may waive the requirement to give notice referred to in subsection (4) where the justice is satisfied that attempts to give the notice would be unsuccessful because the owner, operator or person in charge is absent from the jurisdiction of the justice or that it is not in the public interest to give the notice.

Use of force

(6) In executing a warrant issued under subsection (3) or (4), an enforcement officer shall not use force unless the use of force has been specifically authorized in the warrant.

Stopping and detaining conveyances

(7) For the purposes of this Act and the regulations, an enforcement officer may, at any reasonable time, direct that any conveyance be stopped or be moved to a place where an inspection can be carried out and may, for a reasonable time, detain any conveyance, platform or other structure.

Powers in relation to ships, etc.

(8) Subject to subsection (2), for the purposes of this Act and the regulations, an enforcement officer may, at any reasonable time,

- (a) board any ship, platform or other structure in an area of the sea referred to in any of paragraphs 122(2)(a) to (e), or any aircraft in Canada, if the enforcement officer believes on reasonable grounds that the ship, platform or other structure or aircraft has on board a substance to be disposed of at sea; and
- (b) travel on any ship, aircraft, platform or other structure that is loaded with a substance to be disposed of at sea.

Enforcement officer to receive accommodation

(9) An enforcement officer who travels on a ship, aircraft, platform or other structure under paragraph (8) (b), and any analyst who accompanies the enforcement officer, shall be carried free of charge to and from the disposal site, and the person in command of the ship or aircraft or in charge of the platform or structure shall provide the enforcement officer and analyst with suitable accommodation and food free of charge.

Powers of enforcement officer

(10) In carrying out an inspection of a place under this section, an enforcement officer may, for the purposes of this Act,

- (a) examine any substance, product, fuel, cleaning product or water conditioner referred to in subsection (1) or any other thing relevant to the administration of this Act that is found in the place;
- (b) open and examine any receptacle or package found that the enforcement officer believes on reasonable grounds contains any substance, product, air contaminant, fuel, cleaning product or water conditioner, engine, equipment or component;
- (c) examine any books, records, electronic data or other documents that the enforcement officer believes on reasonable grounds contain any information relevant to the administration of this Act and make copies of them or take extracts from them;
- (d) take samples of anything relevant to the administration of this Act; and
- (e) conduct any tests or take any measurements.

Disposition of samples

(11) An enforcement officer who takes a sample under paragraph (10)(d) may dispose of it in any manner that the enforcement officer considers appropriate.

Analysts

(12) An analyst may, for the purposes of this Act, accompany an enforcement officer who is carrying out an inspection of a place under this section and the analyst may, when so accompanying an enforcement officer, enter the place and exercise any of the powers described in subsections (8) and (10).

Operation of computer system and copying equipment

(13) In carrying out an inspection of a place under this section, an enforcement officer may

- (a) use or cause to be used any computer system at the place to examine any data contained in or available to the computer system;
- (b) reproduce any record or cause it to be reproduced from the data in the form of a printout or other intelligible output;
- (c) take a printout or other output for examination or copying; and
- (d) use or cause to be used any copying equipment at the place to make copies of the record.

Duty of person in possession or control

(14) Every person who is in possession or control of a place being inspected under this section shall permit the enforcement officer to do anything referred to in subsection (13).

Inspections in exclusive economic zone

(15) For the purpose of verifying compliance with Division 3 of Part 7 and regulations made under that Division, subsections (1) to (14) also apply in respect of a place in an area of the sea referred to in paragraph 122(2)(c).

Consent of Minister required

(16) The consent of the Minister is required for the exercise in an area of the sea referred to in paragraph 122(2)(c) of any power under this section in relation to a ship that is not a Canadian ship.

Consent of Attorney General not required

(17) For greater certainty, the consent of the Attorney General of Canada is not required for the exercise of any power under this section in relation to a ship that is not a Canadian ship.

1999, c. 33, s. 218; 2005, c. 23, s. 31.

Production of documents and samples

219. (1) The Minister may, for the purposes of this Act and the regulations, by registered letter or by a demand served personally, require any person to produce at a place specified by the Minister anything referred to in paragraph 218(10)(c) or any samples referred to in paragraph 218(10)(d) within any reasonable time and in any reasonable manner that may be stipulated therein.

Compliance

(2) Any person who is required to produce anything under subsection (1) shall, despite any other law to the contrary, do so as required.

Search

Authority to issue warrant for search and seizure

220. (1) Where on *ex parte* application a justice is satisfied by information on oath that there are reasonable grounds to believe that there is in any place

- (a) anything by means of or in relation to which any provision of this Act or the regulations has been contravened, or
- (b) anything that there are reasonable grounds to believe will afford evidence with respect to the commission of an offence under this Act,

the justice may issue a warrant authorizing an enforcement officer, or authorizing any other person named in the warrant, to enter and search the place and to seize anything referred to in paragraph (a) or (b) subject to any conditions that may be specified in the warrant.

Warrant for seizure of ships, etc.

(2) Where on *ex parte* application a justice is satisfied by information on oath that there are reasonable grounds to believe that an offence has been committed under section 272 by an owner of any ship, aircraft, platform or other structure, the justice may issue a warrant authorizing an enforcement officer, or authorizing any other person named in the warrant, to seize the ship, aircraft, platform or structure anywhere in Canada and, in the case of a ship, platform or structure, within Canadian waters.

Search and seizure

(3) A person authorized by a warrant issued under subsection (1) or (2) may

- (a) at any reasonable time enter and search a place referred to in the warrant;
- (b) seize and detain anything referred to in the warrant; and
- (c) exercise the powers described in subsection 218(10) or (13).

Where warrant not necessary

(4) An enforcement officer may exercise the powers described in subsection (3) without a warrant if the conditions for obtaining the warrant exist but by reason of exigent circumstances it would not be practical to obtain the warrant.

Exigent circumstances

(5) For greater certainty, exigent circumstances include circumstances in which the delay necessary to obtain a warrant under subsection (1) or (2) would result in danger to human life or the environment or the loss or destruction of evidence.

Exception in relation to ships that are not Canadian ships

(5.1) Despite subsection (4), an enforcement officer may exercise the powers described in subsection (3) without a warrant in relation to a ship that is not a Canadian ship if

- (a) the conditions for obtaining the warrant exist but by reason of exigent circumstances it would not be practical to obtain the warrant; and
- (b) the Attorney General of Canada has consented to the exercise of the powers without a warrant.

Operation of computer system and copying equipment

(6) A person authorized under this section to search a place may

- (a) use or cause to be used any computer system at the place to search any data contained in or available to the computer system;
- (b) reproduce any record or cause it to be reproduced from the data in the form of a printout or other intelligible output;
- (c) seize any printout or other output for examination or copying; and
- (d) use or cause to be used any copying equipment at the place to make copies of the record.

Duty of person in possession or control

(7) Every person who is in possession or control of a place in respect of which a search is carried out under this section shall permit the person carrying out the search to do anything referred to in subsection (6).

Accommodation

(8) A person who is exercising powers described in subsection (3) on a ship, an aircraft, a platform or other structure shall be carried free of charge, and the person in command of the ship or aircraft or in charge of the platform or other structure shall provide the person exercising those powers with suitable accommodation and food free of charge.

1999, c. 33, s. 220; 2005, c. 23, s. 32.

Custody

221. (1) Any thing seized under section 220 shall be delivered into the custody of any person that the Minister directs.

Discharge of cargo

(2) Where a thing seized under section 220 has cargo on board, the cargo may be discharged, under the supervision of

- (a) the enforcement officer or other person by whom the thing was seized, or
- (b) the person into whose custody the thing was delivered in accordance with subsection (1),

at the place in Canada that is capable of receiving the cargo and that is nearest to the place of seizure, or at any other place that is satisfactory to the enforcement officer or other person supervising the discharge of the cargo.

Sale of perishable cargo

(3) Where a thing seized under section 220 has cargo on board that is perishable,

- (a) the enforcement officer or other person by whom the thing was seized, or
- (b) the person into whose custody the thing was delivered in accordance with subsection (1)

may sell the cargo or the portion of it that is perishable, as the case may be, and the proceeds of the sale shall be paid to the Receiver General or shall be deposited in a bank to the credit of the Receiver General.

Order for delivery of cargo

(4) The owner of any cargo of anything seized under section 220 may apply to the Federal Court for an order requiring any person who has custody of the cargo or the proceeds of any sale thereof to deliver the cargo or the proceeds of sale to the owner, and the Court may make such an order where it is satisfied that the applicant is the owner of the cargo to which the application relates.

Redelivery on deposit of security

222. (1) Where a thing has been seized under section 220, the Federal Court may, with the consent of the Minister, order redelivery of the thing or delivery of the proceeds realized from a sale of any perishable cargo under subsection 221(3) to the person from whom the thing was seized if security in the form of a bond in an amount and form satisfactory to the Minister is given to the Minister.

Seized ship, etc., to be returned unless proceedings instituted

(2) Anything referred to in subsection (1) that has been seized under section 220, or any security given to the Minister under subsection (1), shall be returned or paid to the person from whom the thing was seized

within 30 days after the seizure unless, before the expiry of those 30 days, proceedings are instituted in respect of an offence under section 272 alleged to have been committed by the owner of the thing.

Arrest Without Warrant

Arrest without warrant

222.1 An enforcement officer may arrest without warrant a person or ship that the enforcement officer believes, on reasonable grounds, has committed an offence against this Act or the regulations, or that the enforcement officer finds committing or about to commit an offence against this Act or the regulations.

2005, c. 23, s. 33.

Detention

Seizure

223. (1) Whenever, during the course of an inspection or a search, an enforcement officer has reasonable grounds to believe that a provision of this Act or the regulations has been contravened, the enforcement officer may seize and detain anything

- (a) by means of or in relation to which the enforcement officer reasonably believes the contravention occurred; or
- (b) that the enforcement officer reasonably believes will afford evidence of the contravention.

Limitation

(2) An enforcement officer shall not seize anything under subsection (1) unless the thing is required as evidence or for purposes of analysis or the enforcement officer is of the opinion that the seizure is necessary in the public interest.

Notice of contravention

(3) An enforcement officer who has seized and detained a thing under subsection (1) shall, as soon as is practicable, advise the person in whose possession it was at the time of the seizure of the provision of this Act or the regulations that the enforcement officer believes has been contravened.

Detention and release

(4) Anything seized under subsection (1) or section 220, other than a ship, aircraft, platform or other structure, shall not be detained

- (a) after the owner of the thing or the person in whose possession it was at the time of the seizure applies to the enforcement officer or to the Minister for its release and the enforcement officer or the Minister is satisfied that it is not necessary in the public interest to continue to detain the thing or that it is not required as evidence or for purposes of analysis; or
- (b) after the expiry of 90 days after the day of seizure, unless before that time
 - (i) the thing has been forfeited under section 229,
 - (ii) proceedings have been instituted in respect of the contravention in relation to which the thing was seized, in which case it may be detained until the proceedings are finally concluded, or
 - (iii) the Minister has served or made reasonable efforts to serve notice of an application for an order extending the time during which the thing may be detained in accordance with section 224.

Storage of seized thing

(5) A thing seized by an enforcement officer under subsection (1) or section 220, other than a ship, aircraft, platform or other structure, shall be kept or stored in the place where it was seized except if

- (a) in the opinion of the enforcement officer,
 - (i) it is not in the public interest to do so, or

(ii) the thing seized, or a sample of it, is required as evidence and removal and storage of the thing seized is necessary to ensure that the thing or sample will be available as evidence in any related proceedings, or

(b) the person in whose possession it was at the time of the seizure or the person entitled to possession of the place requests the enforcement officer to have it removed to some other place,

in which case it may be removed to and stored in any other place at the direction of or with the concurrence of an enforcement officer and at the expense of the person who requested that it be so removed.

Interference with seized thing

(6) Unless authorized by an enforcement officer, no person shall remove, alter or interfere in any way with anything seized and detained by an enforcement officer under subsection (1) or section 220, but an enforcement officer shall, at the request of the person from whom it was seized, allow that person or any person authorized by that person to examine it and, where practicable, furnish a sample or copy of it to that person.

Application to extend period of detention

224. (1) Where proceedings have not been instituted in respect of the contravention in relation to which a thing was seized under section 220 or subsection 223(1), the Minister may, before the expiry of 90 days after the day of the seizure and on serving prior notice in accordance with subsection (2) on the owner of the thing or on the person who at the time of the seizure was in possession of it, apply to a provincial court judge, as defined in section 2 of the *Criminal Code*, within whose territorial jurisdiction the seizure was made for an order extending the time during which it may be detained.

Notice

(2) A notice shall be served by personal service at least five clear days before the day on which the application is to be made to the provincial court judge or by registered mail at least seven clear days before that day and shall specify

(a) the provincial court in which the application is to be made;

(b) the place where and the time when the application is to be heard;

(c) the thing seized in respect of which the application is to be made; and

(d) the grounds on which the Minister intends to rely to show why there should be an extension of the time during which the thing seized may be detained.

Order of extension granted

(3) Where, on the hearing of an application made under subsection (1), the judge is satisfied that the thing seized should continue to be detained, the judge shall order

(a) that the thing be detained for any additional period and on any conditions relating to the detention for that additional period that the judge considers proper; and

(b) on the expiry of the additional period, that the thing be restored to the person from whom it was seized or to any other person entitled to its possession unless, before the expiry of the additional period, an event referred to in subparagraph 223(4)(b)(i), (ii) or (iii) has occurred.

Order of extension refused

(4) Where, on the hearing of an application made under subsection (1), the judge is not satisfied that the thing seized should continue to be detained, the judge shall order that, on the expiry of 90 days after the day of the seizure, it be restored to the person from whom it was seized or to any other person entitled to its possession unless, before the expiry of the 90 days, an event referred to in subparagraph 223(4)(b)(i) or (ii) has occurred.

Detention of Ships

Detention of ships

225. (1) Where an enforcement officer has reasonable grounds to believe that the owner or master of a ship has committed an offence under section 272 and that a ship was used in connection with the commission of the offence, the enforcement officer may make a detention order in respect of the ship.

Order in writing

(2) A detention order made under subsection (1) shall be in writing and be addressed to all persons at any port in Canada where the ship to which the order relates is or will be who are empowered to give a clearance in respect of the ship.

Service of detention order

(3) A detention order made under subsection (1) in respect of a ship shall be served

- (a) by delivering the order to the master of the ship; or
- (b) if service cannot reasonably be effected in the manner provided for in paragraph (a), by leaving the order with the person being or appearing to be in command or charge of the ship or, if there is no such person, by placing the order on a conspicuous part of the ship.

Foreign state to be notified

(3.1) If a ship in respect of which a detention order is made under subsection (1) is registered in a foreign state, that state is to be notified that the order was made.

Duty of owner or master of ship

(4) Where notice of a detention order made under subsection (1) has been served on the master of the ship, the owner or master of the ship shall not give an order for the ship to go into an area of the sea referred to in paragraph 122(2)(f) or (g) during the term of the detention order.

Duty of persons empowered to give clearance

(5) Subject to subsection (6), no person to whom a detention order made under subsection (1) is addressed shall, after notice of the order is received by the person, give clearance in respect of the ship to which the order relates.

When clearance given

(6) A person to whom a detention order made under subsection (1) is addressed and who has received notice of the order may give clearance in respect of the ship to which the order relates where

- (a) the owner or master of the ship
 - (i) has not, within 30 days after the order was made, been charged with the offence that gave rise to the making of the order, or
 - (ii) has, within 30 days after the order was made, been charged with that offence and appears in Canada to answer to the charge;
- (b) if the alleged offence involves the contravention of Division 3 of Part 7 or of any regulation made under that Division, Her Majesty in right of Canada is given security, in a form determined by the Attorney General of Canada, for payment of the maximum fine that might be imposed as a result of a conviction of the person or ship charged with that offence and of costs related to proceedings in connection with the charge or charges, or payment of any lesser amount that is approved by the Attorney General of Canada;
 - (b.1) if the alleged offence involves the contravention of this Act or the regulations, other than a contravention referred to in paragraph (b), Her Majesty in right of Canada is given security for payment of the maximum fine that might be imposed as a result of a conviction of the person charged with that offence and of costs related to proceedings in connection with the charge, or payment of any lesser amount that is approved by the Minister or a person designated by the Minister for the purpose;
- or
- (c) proceedings in respect of the alleged offence that gave rise to the making of the detention order are

discontinued.

1999, c. 33, s. 225; 2005, c. 23, s. 34.

Direction of Ships

Power to direct ship

225.1 (1) An enforcement officer may direct a ship that is in an area of the sea referred to in any of paragraphs 122(2)(a) to (d) and (g) to proceed, by the route and in the manner that the enforcement officer may specify, to any place specified by the enforcement officer if the enforcement officer has reasonable grounds to believe that

(a) the ship is committing, has committed or is about to commit in an area of the sea referred to in any of paragraphs 122(2)(a) to (d) an offence arising out of a contravention of Division 3 of Part 7 or of any regulation made under that Division; or

(b) a person on board the ship is committing, has committed or is about to commit such an offence in such an area and the ship was, is being or is about to be used in connection with the commission of the offence.

Power to direct ship

(2) If a ship is in an area of the sea referred to in paragraph 122(2)(f), an enforcement officer may, with the consent of the foreign state that has jurisdiction in that area, direct the ship to proceed, by the route and in the manner that the enforcement officer may specify, to any place specified by the enforcement officer if the enforcement officer has reasonable grounds to believe that

(a) the ship is committing, has committed or is about to commit in an area of the sea referred to in any of paragraphs 122(2)(a) to (d) an offence arising out of a contravention of Division 3 of Part 7 or of any regulation made under that Division; or

(b) a person on board the ship is committing, has committed or is about to commit such an offence in such an area and the ship was, is being or is about to be used in connection with the commission of the offence.

2005, c. 23, s. 35.

Assistance to Enforcement Officers and Analysts

Right of passage

226. An enforcement officer or analyst or any other person may, while carrying out powers, duties or functions under this Act, enter on and pass through or over private property without being liable for trespass or without the owner of the property having the right to object to that use of the property.

Assistance

227. The owner or the person in charge of a place entered by an enforcement officer or analyst under section 218 or 220, and every person found in the place, shall

(a) give the enforcement officer or analyst all reasonable assistance to enable them to carry out duties and functions under this Act; and

(b) provide the enforcement officer or analyst with any information with respect to the administration of this Act and the regulations that the enforcement officer or analyst may reasonably require.

Obstruction

228. While an enforcement officer or analyst is exercising powers or carrying out duties and functions under this Act, no person shall

(a) knowingly make any false or misleading statement, either orally or in writing, to them; or

(b) otherwise obstruct or hinder them.

Forfeiture

Forfeiture on consent

229. (1) Where an enforcement officer has seized a thing under section 220 or subsection 223(1) and the owner or person who was in lawful possession of it at the time of the seizure consents in writing at the request of the enforcement officer to its forfeiture, it is thereupon forfeited to Her Majesty in right of Canada.

Disposal or destruction

(2) The Minister may dispose of or destroy anything forfeited under subsection (1) and, if the Minister so directs, the costs of the disposal or destruction shall be paid by the owner or the person who was in lawful possession of it at the time it was seized.

Forfeiture by order of court

230. (1) Subject to sections 231 and 232, where a person is convicted of an offence under this Act and anything seized under section 220 or subsection 223(1) is then being detained,

(a) the thing is, on the conviction and in addition to any punishment imposed for the offence, forfeited to Her Majesty in right of Canada, if the court so directs, in which case

(i) the Minister may dispose of or destroy the thing, and

(ii) the costs of the forfeiture and disposal or destruction shall be paid by the offender; or

(b) the thing shall, on the expiry of the time for taking an appeal from the conviction or on the final conclusion of the proceedings, as the case may be, be restored to the person from whom it was seized or to any other person entitled to its possession on any conditions that may be imposed by order of the court and that, in the opinion of the court, are necessary to avoid the commission of a further offence under this Act.

Things deemed not to have been seized

(2) For the purpose of subsection (1), anything released from detention under paragraph 223(4)(a) or (b) is deemed not to have been seized under section 220 or subsection 223(1).

Court may order forfeiture

231. Where the owner of any ship, aircraft, platform or other structure has been convicted of an offence under section 272, the convicting court may, if the ship, aircraft, platform or structure was seized under section 220 or subsection 223(1), in addition to any other penalty imposed, order that the ship, aircraft, platform or structure, or any security given under subsection 222(1), be forfeited, and on the making of such an order the ship, aircraft, platform, structure or security is forfeited to Her Majesty in right of Canada.

Disposal of forfeited ship, aircraft, etc.

232. (1) Where proceedings referred to in subsection 222(2) are instituted within the time provided in that subsection and, at the final conclusion of those proceedings, any ship, aircraft, platform or other structure or any security given under subsection 222(1) is ordered to be forfeited, it may be disposed of as the Governor in Council directs.

Return of seized ship, etc., where no forfeiture ordered

(2) Where anything has been seized under section 220 and proceedings referred to in subsection 222(2) are instituted, but the thing is not, at the final conclusion of the proceedings, ordered to be forfeited, it shall be returned, the proceeds of any sale of the cargo under subsection 221(3) shall be paid or any security given to the Minister under subsection 222(1) shall be returned to the person from whom the thing was seized.

Exception

(3) Where, at the conclusion of proceedings referred to in subsection (1), the person from whom the thing was seized is convicted of an offence arising out of a contravention of this Part, the thing and any cargo or the proceeds or security may be retained until the fine is paid or the thing and any cargo may be sold under execution in satisfaction of the fine, or the proceeds realized from the sale of the cargo or the security or any part thereof may be applied in payment of the fine.

Application by person claiming interest

233. (1) Where anything has been ordered to be forfeited under this Act, any person, other than a person who was a party to the proceedings that resulted in the order, who claims an interest in the thing as owner, mortgagee, lien holder or holder of any other claim under Canadian law may, within 30 days after the thing is ordered to be forfeited, apply by notice in writing to the Federal Court for an order under subsection (5).

Date of hearing

(2) The Federal Court shall fix a day for the hearing of an application made under subsection (1).

Notice

(3) An applicant for an order under subsection (5) shall, at least 30 days before the day fixed under subsection (2) for the hearing of the application, serve a notice of the application and of the hearing on the Minister and on all other persons claiming an interest in the thing that is the subject-matter of the application as owner, mortgagee, lien holder or holder of any other claim under Canadian law of whom the applicant has knowledge.

Notice of intervention

(4) Each person, other than the Minister, who is served with a notice under subsection (3) and who intends to appear at the hearing of the application to which the notice relates shall, at least 10 days before the day fixed for the hearing, file a notice of intervention in the Registry of the Federal Court and serve a copy of the notice on the Minister and on the applicant.

Order declaring nature and extent of interests

(5) Where, on the hearing of an application under this section, the Federal Court is satisfied that the applicant, or the intervenors, if any, or any of them,

(a) is innocent of any complicity in any conduct that caused the thing to be subject to forfeiture and of any collusion in relation to any such conduct, and

(b) exercised all reasonable care in respect of the persons permitted to obtain possession and use of the thing so as to be satisfied that it was not likely to be used contrary to the provisions of this Act or, in the case of a mortgagee or lien holder, other than the holder of a maritime lien or statutory right *in rem*, that the applicant or intervenor exercised such care with respect to the mortgage or the lien giver,

those of the applicant and the intervenors in respect of whom the Court is so satisfied are entitled to an order declaring that their interests are not affected by the forfeiture and declaring the nature and extent of each of their interests and the priorities among them.

Additional order

(6) Where an order is made under subsection (5), the Court may, in addition, order that the thing to which the interests relate be delivered to one or more of the persons found to have an interest in it or that an amount equal to the value of each of the interests so declared be paid to the persons found to have those interests.

Environmental Protection Compliance Orders

Definition of "order"

234. For the purposes of sections 235 to 271, "order" means an environmental protection compliance order issued under section 235.

Order

235. (1) Whenever, during the course of an inspection or a search, an enforcement officer has reasonable grounds to believe that any provision of this Act or the regulations has been contravened in the circumstances described in subsection (2) by a person who is continuing the commission of the offence, or that any of those provisions will be contravened in the circumstances described in that subsection, the enforcement officer may issue an environmental protection compliance order directing any person described in subsection (3) to take any of the measures referred to in subsection (4) and, where applicable, subsection (5) that are reasonable in the circumstances and consistent with the protection of the environment and public safety, in order to cease or refrain from committing the alleged contravention.

Circumstances

(2) For the purposes of subsection (1), the circumstances in which the alleged contravention has been or will be committed are as follows, namely,

- (a) the exportation, importation, manufacture, transportation, processing or distribution of a substance or product containing a substance;
- (b) the possession, storage, use, sale, offering for sale, advertisement or disposal of a substance or product containing a substance;
- (c) the use of a substance or product containing a substance in a commercial manufacturing or processing activity; or
- (d) an act or omission in relation to or in the absence of a notice, permit, approval, licence, certificate, allowance or other authorization or a term or condition thereof.

Application

(3) Subsection (1) applies to any person who

- (a) owns or has the charge, management or control of the substance or any product containing the substance to which the alleged contravention relates or the property on which the substance or product is located; or
- (b) causes or contributes to the alleged contravention.

Specific measures

(4) For the purposes of subsection (1), an order in relation to an alleged contravention of any provision of this Act or the regulations may specify that the person to whom the order is directed take any of the following measures:

- (a) refrain from doing anything in contravention of this Act or the regulations, or do anything to comply with this Act or the regulations;
- (b) stop or shut down any activity, work, undertaking or thing for a specified period;
- (c) cease the operation of any activity or any part of a work, undertaking or thing until the enforcement officer is satisfied that the activity, work, undertaking or thing will be operated in accordance with this Act and the regulations;
- (d) move any conveyance to another location including, in the case of a ship, move the ship into port or, in the case of an aircraft, land the aircraft;
- (e) unload or re-load the contents of any conveyance; and
- (f) take any other measure that the enforcement officer considers necessary to facilitate compliance with the order or to protect or restore the environment, including, but not limited to,
 - (i) maintaining records on any relevant matter,
 - (ii) reporting periodically to the enforcement officer, and
 - (iii) submitting to the enforcement officer any information, proposal or plan specified by the enforcement officer setting out any action to be taken by the person with respect to the subject-matter of the order.

Additional measures for certain alleged offences

(5) For the purposes of subsection (1), an order in relation to an alleged contravention of section 124 or 125 or any regulations made under section 135 may specify that the person to whom the order is directed, whether that person is not a permit holder or is contravening a condition of a permit, take any of the following measures, in addition to any of the measures referred to in subsection (4):

- (a) cease dumping or cease loading a substance; or
- (b) refrain from disposing of any ship, aircraft, platform or structure.

Contents of order

(6) Subject to section 236, an order must be made in writing and must set out

- (a) the names of the persons to whom the order is directed;
- (b) the provision of this Act or the regulations that is alleged to have been or will be contravened;
- (c) the relevant facts surrounding the alleged contravention;
- (d) the measures to be taken and the manner in which they are to be carried out;
- (e) the period within which a measure is to begin and is to be carried out;
- (f) subject to subsection (7), the duration of the order;
- (g) a statement that a request for a review may be made to the Chief Review Officer; and
- (h) the period within which a request for a review may be made.

Duration of order

(7) An order may not be issued for a period of more than 180 days.

Exigent circumstances

236. (1) In the case of exigent circumstances, an order may be given orally, but within the period of seven days immediately after it is so given, a written order must be issued in accordance with section 235.

Definition of "exigent circumstances"

(2) For greater certainty, "exigent circumstances" includes circumstances in which the delay necessary to issue a written order that meets the requirements of subsection 235(6) would result in danger to human life or the environment.

Notice of intent

237. (1) Except in exigent circumstances, the enforcement officer shall, wherever practicable, before issuing an order,

- (a) provide an oral or a written notice of the intent of the enforcement officer to issue the order to every person who will be subject to the order; and
- (b) allow a reasonable opportunity in the circumstances for the person to make oral representations.

Contents of notice of intent

(2) A notice of intent to issue an order shall include

- (a) a statement of the purpose of the notice;
- (b) a reference to the statutory authority under which the order will be issued; and
- (c) a statement that the party notified may make oral representations to the enforcement officer within the period stated in the notice.

Compliance with the order

238. (1) A person to whom an order is directed shall, immediately on receipt of the order or a copy of it or on being directed by an enforcement officer under an order given orally under section 236, comply with the order.

No bar to proceedings

(2) The issuance of or compliance with an order in respect of a person's alleged contravention of this Act or the regulations is not a bar to any proceedings against the person under this or any other Act in relation to the alleged contravention by that person.

Intervention by enforcement officer

239. (1) Where any person fails to take any measures specified in an order, an enforcement officer may take the measures or cause them to be taken.

Access to property

(2) An enforcement officer or other person authorized or required to take measures under subsection (1) may enter and have access to any place or property and may do any reasonable things that may be necessary in the circumstances.

Personal liability

(3) Any person, other than a person described in subsection 235(3), who provides assistance or advice in taking the measures specified in an order or who takes any measures authorized under subsection (1) is not personally liable either civilly or criminally in respect of any act or omission in the course of providing assistance or advice or taking any measures under that subsection unless it is established that the person acted in bad faith.

Recovery of reasonable costs and expenses by Her Majesty

240. (1) Her Majesty in right of Canada may recover the costs and expenses of and incidental to taking any measures under subsection 239(1) from

- (a) any person referred to in paragraph 235(3)(a); and
- (b) any person referred to in paragraph 235(3)(b) to the extent of the person's negligence in causing or contributing to the alleged contravention.

Reasonably incurred

(2) The costs and expenses referred to in subsection (1) shall only be recovered to the extent that they can be established to have been reasonably incurred in the circumstances.

Liability

(3) Subject to subsection (4), the persons referred to in subsection (1) are jointly and severally liable or solidarily liable for the costs and expenses referred to in that subsection.

Limitation

(4) A person referred to in paragraph 235(3)(b) shall not be held liable under subsection (3) to an extent greater than the extent of their negligence in causing or contributing to the alleged contravention.

Procedure

(5) A claim under this section may be sued for and recovered by Her Majesty in right of Canada with costs in proceedings brought or taken therefor in the name of Her Majesty in right of Canada in any court of competent jurisdiction.

Recourse or indemnity

(6) This section does not limit or restrict any right of recourse or indemnity that a person may have against any other person.

Limitation period

(7) Where events giving rise to a claim under this section occur, no proceedings in respect of the claim may be instituted after five years from the date on which the events occur or become evident to the Minister, whichever is later.

Minister's certificate

(8) A document purporting to have been issued by the Minister certifying the day on which the events giving rise to a claim under this section came to the knowledge of the Minister shall be received in evidence and, in the absence of any evidence to the contrary, the document shall be considered as proof of that fact without proof of the signature or of the official character of the person appearing to have signed the document and without further proof.

Variation or cancellation of order

241. (1) At any time before a notice requesting a review of an order is received by the Chief Review Officer, the enforcement officer may, in accordance with section 236, after giving reasonable notice,

- (a) amend or suspend a term or condition of the order, or add a term or condition to, or delete a term or condition from, the order;
- (b) cancel the order;
- (c) correct a clerical error in the order; or
- (d) extend the duration of the order for a period of not more than 180 days less the number of days that have passed since the day on which the order was received by the person who is subject to the order.

Notice of intent

(2) Except in exigent circumstances, the enforcement officer shall, wherever practicable, before exercising a power under paragraph (1)(a) or (d),

- (a) provide an oral or a written notice of the intent of the enforcement officer to do so to every person who will be subject to the order; and
- (b) allow a reasonable opportunity in the circumstances for the person to make oral representations.

Contents of notice of intent

(3) A notice of intent to exercise a power under paragraph (1)(a) shall include

- (a) a statement of the purpose of the notice;
- (b) a reference to the statutory authority under which the power will be exercised; and
- (c) a statement that the party notified may make oral representations to the enforcement officer within the period stated in the notice.

Limitations on exercise of enforcement officer's powers

(4) An enforcement officer shall not exercise any of the powers referred to in paragraph (1)(a), (b) or (d) if doing so would result in

- (a) impairment or serious risk of impairment of the quality of the environment for any use that can be made of it;
- (b) injury or damage or serious risk of injury or damage to any property or to any plant or animal life; or

(c) danger to the health or safety of any person.

Regulations

242. The Minister may make regulations

- (a) prescribing the form of reporting to enforcement officers under subparagraph 235(4)(f)(ii) and specifying the information required to be contained in or to accompany the report; and
- (b) of either particular or general application, respecting representations made to enforcement officers under subsection 237(1) or 241(2).

Review Officers

Roster of review officers

243. The Minister shall establish and maintain a roster of review officers.

Chief Review Officer

244. (1) The Minister shall appoint one of the review officers as the Chief Review Officer to perform the functions of the Chief Review Officer as and when required.

Functions of Chief Review Officer

(2) The Chief Review Officer shall

- (a) perform administrative functions related to the work of review officers, including assigning review officers to conduct review hearings; and
- (b) in certain cases, conduct review hearings.

Absence, etc., of Chief Review Officer

(3) If the Chief Review Officer is absent or unable to act or if the office is vacant, any other review officer that is designated by the Minister shall perform the functions of the Chief Review Officer.

Term of members

245. (1) Review officers shall be appointed to hold office during good behaviour for a term of not more than three years, but may be removed by the Minister at any time for cause.

Re-appointment

(2) A review officer may be re-appointed.

Publication in *Canada Gazette*

246. The Minister shall publish the roster of review officers in the *Canada Gazette*.

Knowledge

247. A person is not eligible to be appointed as a review officer unless the person is knowledgeable about the Canadian environment, environmental and human health, administrative law or traditional aboriginal ecological knowledge.

Other employment

248. Review officers shall not accept or hold any office or employment inconsistent with their functions under this Act.

Remuneration and fees

249. (1) The Chief Review Officer shall be paid such remuneration as is fixed by the Governor in Council, and each other review officer is entitled to be paid such fees for that other review officer's services as are fixed by the Governor in Council.

Expenses

(2) Review officers are entitled to be paid

(a) reasonable travel and other expenses incurred by them in the course of their duties under this Act while absent from their ordinary place of work; and

(b) any other reasonable expenses incurred by them in the course of their duties under this Act.

Acting after expiry of term

250. If a person who is engaged as a review officer in respect of any matter ceases to be a review officer before rendering a decision in respect of the matter, the person may, with the authorization of the Chief Review Officer, continue, during a period of not more than 180 days, to act as a review officer in respect of the matter.

Secretary and other staff

251. The Minister may, at the request of the Chief Review Officer, make available to review officers any staff and other assistance that are necessary for the proper conduct of the business of review officers.

Government services and facilities

252. In performing their functions a review officer shall, where appropriate, make use of the services and facilities of departments, boards and agencies of the Government of Canada.

Immunity

253. No criminal or civil proceedings lie against a review officer for anything done or omitted to be done in good faith in performing any functions of a review officer under this Act.

Crown not relieved

254. Section 253 does not, by reason of section 10 of the *Crown Liability and Proceedings Act*, relieve the Crown of liability in respect of a tort or extracontractual civil liability to which the Crown would otherwise be subject.

Liability

255. Review officers are servants of Her Majesty in right of Canada for the purposes of the law of tort or of extracontractual civil liability.

Reviews

Request for review

256. (1) Any person to whom an order is directed may, by notice in writing given to the Chief Review Officer within 30 days after receipt by the person of a copy of the written order or after the oral order is given, make a request to the Chief Review Officer for a review of the order.

Extension of period for request

(2) The Chief Review Officer may extend the period within which a request for a review may be made where, in the Chief Review Officer's opinion, it is in the public interest to do so.

Review

257. On receipt of a notice under subsection 256(1), the Chief Review Officer shall conduct a review of the order, including a hearing, or cause a review and hearing of the order to be conducted by a review officer assigned by the Chief Review Officer.

No automatic stay on appeal

258. (1) Subject to subsection (2), the request for a review by a review officer does not suspend the operation of an order.

Suspension on application

(2) A review officer may, on application made by a person subject to the order before the beginning of the hearing, suspend the operation of the order if the review officer considers it appropriate in the circumstances and, in that case, impose on all the persons subject to the order conditions that are reasonable in the circumstances and consistent with the protection of the environment and public safety.

Suspension of 180 day period

(3) Where the operation of an order is suspended under subsection (2), the period for which the order is issued is suspended until the review is completed.

Right to appear

259. All parties to the review, including the Minister, may appear in person or may be represented by counsel or by an agent.

Powers

260. (1) A review officer may summon any person to appear as a witness before the review officer and may order the witness to

- (a) give evidence orally or in writing; and
- (b) produce any documents and things that the review officer considers necessary or desirable for the purpose of performing any of the review officer's functions.

Fees for witnesses

(2) A witness who is served with a summons under subsection (1) is entitled to receive the fees and allowances to which persons who are summoned to appear as witnesses before the Federal Court are entitled.

Enforcement of summonses and orders

261. Any summons to a witness issued or order made under subsection 260(1) by a review officer may be made a summons to a witness or an order of the Federal Court or of the superior court of a province and is enforceable in the same manner as a summons to a witness or an order of that court.

Procedure

262. To make a summons issued or an order made under subsection 260(1) by a review officer a summons or an order of the Federal Court or of the superior court of a province, the usual practice and procedure of the court in such matters may be followed, or a certified copy of the summons or order may be filed with the registrar of the court and the summons or order thereupon becomes a summons or an order of the court.

Powers of review officer

263. The review officer, after reviewing the order and after giving all persons who are subject to the order,

and the Minister, reasonable notice orally or in writing of a hearing and allowing a reasonable opportunity in the circumstances for those persons and the Minister to make oral representations, may

- (a) confirm or cancel the order;
- (b) amend or suspend a term or condition of the order, or add a term or condition to, or delete a term or condition from, the order; or
- (c) extend the duration of the order for a period of not more than 180 days less the number of days that have passed since the day on which the order was received by the person who is subject to the order, not counting the days during which the order was suspended under subsection 258(3).

Variation or cancellation of review officer's decision

264. At any time before a notice of appeal to the Federal Court is filed in relation to an order, the review officer may, on the review officer's own motion, after giving reasonable notice orally or in writing and allowing a reasonable opportunity in the circumstances for the person subject to the order to make oral representations, modify the decision of the review officer in respect of the order and exercise any of the powers of the review officer under section 263 in respect of the order.

Limitations on exercise of review officer's powers

265. A review officer shall not exercise any of the powers referred to in section 263 if doing so would result in

- (a) impairment or serious risk of impairment of the quality of the environment for any use that can be made of it;
- (b) injury or damage or serious risk of injury or damage to any property or to any plant or animal life; or
- (c) danger to the health or safety of any person.

Decision of review officer

266. The review officer shall, within five days after the completion of the review of an order, render a decision and give written reasons for doing so within 10 days after the completion of the review, and provide a copy of the decision and those reasons to all persons to whom the order was directed and to the Minister.

Rules

267. The Chief Review Officer may make rules

- (a) governing the practice and procedure in respect of the review of orders;
- (b) generally, for the work of review officers; and
- (c) for preventing trade secrets and information described in section 20 of the *Access to Information Act* from being disclosed or made public as a result of their being used as evidence before a review officer, including rules providing for hearings or parts of hearings to be held in public or private.

Orders and notices

268. Every order or varied order under section 263 or 264 or a copy of one and every notice under those sections shall be provided to the Minister and every person to whom the original order is directed and, where applicable, all other persons to whom the amended order is directed, in accordance with Part 11.

Federal Court

Appeal to Federal Court

269. The Minister or any person to whom an order, as confirmed or varied by a review officer under section 263, is directed may, by filing a written notice of appeal within 30 days after the written reasons are provided by the review officer under section 266, appeal to the Federal Court -- Trial Division from the decision of the review officer.

Standing on appeal to Federal Court

270. The Minister or the person to whom the order is directed, as the case may be, has the right, on an appeal to the Federal Court made under section 269, to be heard on all questions of fact and law.

Order not suspended

271. The filing of a notice of appeal under section 269 does not suspend the operation of an order, as confirmed or varied by a review officer.

Acts Committed Outside Canada

Offences under this Act deemed committed in Canada

271.1 (1) An act or omission that is an offence arising out of a contravention of Division 3 of Part 7 or of any regulation made under that Division is deemed to have been committed in Canada if it is committed

- (a) in an area of the sea referred to in paragraph 122(2)(c); or
- (b) in an area of the sea referred to in paragraph 122(2)(g) in the course of hot pursuit that commenced while a ship was in an area of the sea referred to in any paragraphs 122(2)(a) to (e).

Offences under the Criminal Code deemed committed in Canada

(2) An act or omission that is committed in the course of enforcement of this Act and that would be an offence under the Criminal Code if it were committed in Canada, is deemed to have been committed in Canada if it is committed

- (a) in an area of the sea referred to in paragraph 122(2)(c); or
- (b) in an area of the sea referred to in paragraph 122(2)(g) in the course of hot pursuit that commenced while a ship was in an area of the sea referred to in any paragraphs 122(2)(a) to (e).

2005, c. 23, s. 36.

Offences and Punishment

Contravention of the Act, the regulations or agreements

272. (1) Every person commits an offence who contravenes

- (a) a provision of this Act or the regulations;
- (b) an obligation or a prohibition arising from this Act or the regulations;
- (c) an order or a direction made under this Act;
- (d) an order, direction or decision of a court made under this Act; or
- (e) an agreement respecting environmental protection alternative measures within the meaning of section 295.

Penalties

(2) Every person who commits an offence under subsection (1) is liable

- (a) on conviction on indictment, to a fine of not more than \$1,000,000 or to imprisonment for a term of not more than three years, or to both; and
- (b) on summary conviction, to a fine of not more than \$300,000 or to imprisonment for a term of not more than six months, or to both.

Application in respect of ships

(3) For the purposes of this section, a ship is deemed to be a person in respect of every provision of this Act or the regulations that expressly applies to ships.

1999, c. 33, s. 272; 2005, c. 23, s. 37.

False or misleading information, etc.

273. (1) Every person commits an offence who, with respect to any matter related to this Act or the regulations,

- (a) provides any person with any false or misleading information, results or samples; or
- (b) files a document that contains false or misleading information.

Penalties

(2) Every person who commits an offence under subsection (1) is liable

- (a) on conviction on indictment, to a fine of not more than \$1,000,000 or to imprisonment for a term of not more than three years, or to both, if the offence is committed knowingly;
- (b) on summary conviction, to a fine of not more than \$300,000 or to imprisonment for a term of not more than six months, or to both, if the offence is committed knowingly;
- (c) on conviction on indictment, to a fine of not more than \$500,000 or to imprisonment for a term of not more than three years, or to both, if the offence is committed negligently; and
- (d) on summary conviction, to a fine of not more than \$200,000 or to imprisonment for a term of not more than six months, or to both, if the offence is committed negligently.

Damage to environment and risk of death or harm to persons

274. (1) Every person is guilty of an offence and liable on conviction on indictment to a fine or to imprisonment for a term of not more than five years, or to both, who, in committing an offence under subsection 272(1) or 273(1),

- (a) intentionally or recklessly causes a disaster that results in a loss of the use of the environment; or
- (b) shows wanton or reckless disregard for the lives or safety of other persons and thereby causes a risk of death or harm to another person.

Criminal negligence

(2) Every person who, in committing an offence under subsection 272(1) or 273(1), shows wanton or reckless disregard for the lives or safety of other persons and thereby causes death or bodily harm to another person is subject to prosecution and punishment under section 220 or 221 of the *Criminal Code*.

Limitation period

275. (1) Proceedings by way of summary conviction in respect of an offence under this Act may be instituted at any time within, but not later than, two years after the time when the Minister became aware of the subject-matter of the proceedings.

Minister's certificate

(2) A document purporting to have been issued by the Minister, certifying the day on which the Minister became aware of the subject-matter of any proceedings, shall be received in evidence and, in the absence of any evidence to the contrary, the document shall be considered as proof of that fact without proof of the signature or of the official character of the person appearing to have signed the document and without further proof.

When consent of Attorney General of Canada required

275.1 A proceeding that is commenced in respect of an offence arising out of a contravention of Division 3 of Part 7 or of any regulation made under that Division, or in respect of an offence under the *Criminal Code* that is committed in the course of enforcement of this Act, shall not be continued if the offence was committed in an area of the sea referred to in paragraph 122(2)(c) and the accused is either a ship that is not a Canadian

ship or a foreign national who was on board such a ship when the offence was committed, unless the Attorney General of Canada consents to the continuation no later than eight days after the proceeding is commenced.

2005, c. 23, s. 38.

Continuing offence

276. Where an offence under this Act is committed or continued on more than one day, the person who committed the offence is liable to be convicted for a separate offence for each day on which it is committed or continued.

Construction of subsection 389(5) of *Canada Shipping Act*

277. Subsection 389(5) of the *Canada Shipping Act* is not to be construed so as to relieve any person from liability under this Act.

Regulations

278. The Governor in Council may make regulations prescribing the manner in which the proceeds or any part of the proceeds resulting from the payment of a fine or the execution of an order in relation to an offence under this Act shall be distributed in order to reimburse any person, government or body that has commenced the proceedings in respect of the offence for costs incurred by that person, government or body in respect of the prosecution of the offence.

Jurisdiction of justices and judges

278.1 A justice or judge in any territorial division in Canada has jurisdiction to authorize, in the same manner as if the offence had been committed in the territorial division, an arrest, an entry, a search or a seizure in relation to

- (a) an offence arising out of a contravention of Division 3 of Part 7 or of any regulation made under that Division that is committed in an area of the sea referred to in any of paragraphs 122(2)(c), (f) and (g); or
- (b) an offence under the Criminal Code that is committed in the course of enforcement of this Act in an area of the sea referred to in paragraph 122(2)(c) or in an area of the sea referred to in paragraph 122(2)(g) in the course of hot pursuit that commenced while a ship was in an area of the sea referred to in any paragraphs 122(2)(a) to (e).

2005, c. 23, s. 39.

Jurisdiction of court

279. (1) If an offence arising out of a contravention of Division 3 of Part 7 or of any regulation made under that Division is committed in an area of the sea referred to in any of paragraphs 122(2)(a) to (e), or if an offence under the Criminal Code is committed in the course of enforcement of this Act in an area of the sea referred to in paragraph 122(2)(c), the offence

- (a) is within the competence of and shall be tried by the court having jurisdiction in respect of similar offences in the territorial division nearest to the place where the offence was committed; and
- (b) shall be tried in the same manner as if it had been committed within that territorial division.

Where offence deemed to have been committed

(2) An offence to which subsection (1) applies is, for the purpose of that subsection, deemed to have been committed either in the place where the offence was actually committed or in the place in which the accused is found.

Jurisdiction of court

(3) If an offence arising out of a contravention of Division 3 of Part 7 or of any regulation made under that Division is committed in an area of the sea referred to in paragraph 122(2)(f) or (g), or if an offence under the Criminal Code is committed in the course of enforcement of this Act in an area of the sea referred to in paragraph 122(2)(g) in the course of hot pursuit that commenced while a ship was in an area of the sea referred to in any paragraphs 122(2)(a) to (e), the offence

(a) is within the competence of and shall be tried by any court having jurisdiction in respect of similar offences committed by persons within the limits of its ordinary jurisdiction; and

(b) shall be tried in the same manner as if it had been committed within the jurisdiction of the court before which it is tried.

1999, c. 33, s. 279; 2005, c. 23, s. 40.

Liability of directors

280. (1) If a corporation commits an offence under this Act or the regulations, any officer, director or agent of the corporation who directed, authorized, assented to, acquiesced in or participated in the commission of the offence is a party to and guilty of the offence, and is liable to the punishment provided for the offence, whether or not the corporation has been prosecuted or convicted.

Liability of master and chief engineer of ship

(2) If a ship commits an offence under this Act or the regulations and the master or the chief engineer of the ship directed, authorized, assented to, acquiesced in or participated in the commission of the offence, the master or chief engineer, as the case may be, is a party to and guilty of the offence, and is liable to the punishment provided for the offence, whether or not the ship has been prosecuted or convicted.

1999, c. 33, s. 280; 2005, c. 23, s. 41.

Duties of directors and officers

280.1 (1) Every director and officer of a corporation shall take all reasonable care to ensure that the corporation complies with

(a) this Act and the regulations, other than Division 3 of Part 7 and regulations made under that Division; and

(b) orders and directions of, and prohibitions and requirements imposed by, the Minister, enforcement officers and review officers, other than those issued or imposed in connection with obligations or prohibitions under that Division or regulations made under that Division.

Duties of directors and officers -- Division 3 of Part 7

(2) Every director and officer of a corporation who is in a position to direct or influence the corporation's policies or activities in respect of its obligation to comply with Division 3 of Part 7, regulations made under that Division, and orders and directions of, and prohibitions and requirements imposed by, the Minister, enforcement officers and review officers in connection with obligations or prohibitions under that Division or those regulations, shall take all reasonable care to ensure that the corporation so complies.

Liability of directors and officers -- Division 3 of Part 7

(3) If a corporation commits an offence arising out of a contravention of Division 3 of Part 7, a regulation made under that Division or an order or direction of, or prohibition or requirement imposed by, the Minister, an enforcement officer or a review officer in connection with an obligation or prohibition under that Division or a regulation made under that Division, every director and officer of the corporation who is in a position to direct or influence the corporation's policies or activities in respect of conduct that is the subject-matter of the offence is a party to and guilty of the offence, and is liable to the punishment provided for the offence, whether or not the corporation has been prosecuted or convicted.

2005, c. 23, s. 41.

Duties of masters and chief engineers

280.2 (1) The master and the chief engineer of a ship shall take all reasonable care to ensure that the ship complies with

- (a) Division 3 of Part 7 and regulations made under that Division; and
- (b) orders and directions of, and prohibitions and requirements imposed by, the Minister, enforcement officers and review officers in connection with obligations or prohibitions under that Division or those regulations.

Liability of master and chief engineer

(2) If a ship commits an offence arising out of a contravention of Division 3 of Part 7, a regulation made under that Division or an order or direction of, or prohibition or requirement imposed by, the Minister, an enforcement officer or a review officer in connection with an obligation or prohibition under that Division or a regulation made under that Division, the master and the chief engineer of the ship are a party to and guilty of the offence, and are liable to the punishment provided for the offence, whether or not the ship has been prosecuted or convicted.

2005, c. 23, s. 41.

Duties of owner

280.3 (1) Every owner of a ship shall take all reasonable care to ensure that the ship complies, and all persons on board the ship comply, with

- (a) Division 3 of Part 7 and regulations made under that Division; and
- (b) orders and directions of, and prohibitions and requirements imposed by, the Minister, enforcement officers and review officers in connection with obligations or prohibitions under that Division or those regulations.

Liability of directors and officers of owners

(2) If a ship commits an offence arising out of a contravention of Division 3 of Part 7, a regulation made under that Division or an order or direction of, or prohibition or requirement imposed by, the Minister, an enforcement officer or a review officer in connection with an obligation or prohibition under that Division or a regulation made under that Division, every director or officer of a corporation that is an owner of the ship who is in a position to direct or influence the corporation's policies or activities in respect of conduct that is the subject-matter of the offence is a party to and guilty of the offence, and is liable to the punishment provided for the offence, whether or not the ship has been prosecuted or convicted.

2005, c. 23, s. 41.

For greater certainty

280.4 For greater certainty, section 283 applies to a person who is a party to an offence under subsection 280.1(3), 280.2(2) or 280.3(2).

2005, c. 23, s. 41.

Directions

280.5 For the purpose of prosecuting a ship for contravening a direction made under section 225.1 or an order made under section 235, a direction or an order, as the case may be, that is given to the master or a crew member of the ship is deemed to have been given to the ship.

2005, c. 23, s. 41.

Proceedings against ships

281.1 (1) Subject to subsection (2), the provisions of this Act or the *Criminal Code* relating to indictable or summary conviction offences that apply to persons apply also to ships, with any modifications that the circumstances require.

Service on ship and appearance at trial

(2) If a ship is charged with having committed an offence under this Act or the regulations, the summons may be served by leaving it with the owner, master or any officer of the ship or by posting the summons on some conspicuous part of the ship, and the ship may appear by counsel or representative. Despite the *Criminal Code*, if the ship does not so appear, a court may, on proof of service of the summons, proceed to hold the trial.

Identifying owner, master, etc.

281. The owner or master of a ship, the owner or pilot in command of an aircraft or the owner or person in charge of any platform or other structure may be charged with an offence arising out of a contravention of Division 3 of Part 7 as owner, master, pilot in command or person in charge, as the case may be, of the ship, aircraft, platform or structure if it is adequately identified, and no such charge is invalid by reason only that it does not name the owner, master, pilot in command or person in charge, as the case may be, of the ship, aircraft, platform or structure.

Proof of offence

282. (1) In any prosecution of an offence under this Act, other than an offence under section 273 if the offence is committed knowingly or under section 228 or 274, it is sufficient proof of the offence to establish that it was committed by an employee or agent of the accused, whether or not the employee or agent is identified or prosecuted for the offence.

Proof of offence

(2) In any prosecution of the master of a ship, the pilot in command of an aircraft or the owner or person in charge of any platform or other structure for an offence arising out of a contravention of Division 3 of Part 7, it is sufficient proof of the offence to establish that it was committed by a crew member or other person on board the ship, aircraft, platform or structure, whether or not the crew member or other person is identified or prosecuted for the offence.

Defence

283. No person shall be found guilty of an offence under this Act, other than an offence under section 273 if the offence is committed knowingly or under section 228 or 274, where the person establishes that the person exercised all due diligence to prevent its commission.

Importing substances by analysts

284. Despite any other provision of this Act or the regulations, the Minister may, subject to any reasonable condition specified by the Minister, authorize in writing an analyst to import, possess and use a substance for the purpose of conducting measurements, tests and research with respect to the substance.

Certificate of analyst

285. (1) Subject to subsections (2) and (3), a certificate of an analyst stating that the analyst has analysed or examined a substance or product and stating the result of the analysis or examination is admissible in evidence in any prosecution for an offence under this Act and, in the absence of evidence to the contrary, is proof of the statements contained in the certificate without proof of the signature or the official character of the person appearing to have signed the certificate.

Attendance of analyst

(2) The party against whom a certificate of an analyst is produced may, with leave of the court, require the attendance of the analyst for the purposes of cross-examination.

Notice

(3) No certificate of an analyst shall be received in evidence unless the party intending to produce it has given to the party against whom it is intended to be produced reasonable notice of that intention together with a copy of the certificate.

Safety marks and prescribed documents

286. In any prosecution for an offence under this Act, evidence that a means of containment or transport bore a safety mark or was accompanied by a prescribed document is, in the absence of evidence to the contrary, proof of the information shown or indicated by the safety mark or contained in the prescribed document.

Sentencing Criteria

Sentencing considerations

287. A court that imposes a sentence shall take into account, in addition to any other principles that it is required to consider, the following factors:

- (a) the harm or risk of harm caused by the commission of the offence;
- (b) an estimate of the total costs to remedy or reduce any damages caused by the commission of the offence;
- (c) whether any remedial or preventive action has been taken or proposed by or on behalf of the offender, including having in place an environmental management system that meets a recognized Canadian or international standard or a pollution prevention plan;
- (d) whether any reporting requirements under this Act or the regulations were complied with by the offender;
- (e) whether the offender was found to have committed the offence intentionally, recklessly or inadvertently;
- (f) whether the offender was found by the court to have been negligent or incompetent or to have shown a lack of concern with respect to the commission of the offence;
- (g) any property, benefit or advantage received or receivable by the offender to which, but for the commission of the offence, the offender would not have been entitled;
- (h) any evidence from which the court may reasonably conclude that the offender has a history of non-compliance with legislation designed to prevent or minimize harm to the environment; and
- (i) all available sanctions that are reasonable in the circumstances, with particular attention to the circumstances of aboriginal offenders.

Discharge

Absolute or conditional discharge

288. (1) Where an offender has pleaded guilty to or been found guilty of an offence, the court may, instead of convicting the offender, by order direct that the offender be discharged absolutely or on conditions having any or all of the effects described in paragraphs 291(1)(a) to (q).

Conditions of order

(2) Where an order is made under subsection (1) and the offender contravenes or fails to comply with it, or is convicted of an offence under this Act, including an offence under paragraph 272(1)(c), the prosecutor may apply to the court to revoke the discharge, convict the offender of the offence to which the discharge relates and impose any sentence that could have been imposed if the offender had been convicted at the time the order was made.

Suspended sentence

289. (1) Where an offender is convicted of an offence under this Act, the court may suspend the passing of sentence and may, having regard to the nature of the offence and the circumstances surrounding its commission, make an order under section 291.

Application by prosecutor

(2) Where the passing of sentence has been suspended under subsection (1) and the offender contravenes or fails to comply with an order made under section 291, or is convicted of an offence under this Act, including an offence under paragraph 272(1)(c), the prosecutor may apply to the court to impose any sentence that could have been imposed if the passing of sentence had not been suspended.

Additional fine

290. Where an offender has been convicted of an offence under this Act, the court may, where it is satisfied that as a result of the commission of the offence the offender acquired any property, benefit or advantage or that any property, benefit or advantage accrued to the offender, order the offender to pay, despite the maximum amount of any fine that may otherwise be imposed under this Act, an additional fine in an amount equal to the court's estimation of the amount of that property, benefit or advantage.

Orders of court

291. (1) Where an offender has been convicted of an offence under this Act, in addition to any other punishment that may be imposed under this Act, the court may, having regard to the nature of the offence and the circumstances surrounding its commission, make an order having any or all of the following effects:

- (a) prohibiting the offender from doing any act or engaging in any activity that may result in the continuation or repetition of the offence;
- (b) directing the offender to take any action that the court considers appropriate to remedy or avoid any harm to the environment that results or may result from the act or omission that constituted the offence;
- (c) directing the offender to prepare and implement a pollution prevention plan or an environmental emergency plan;
- (d) directing the offender to carry out environmental effects monitoring in the manner established by the Minister or directing the offender to pay, in the manner prescribed by the court, an amount for the purposes of environmental effects monitoring;
- (e) directing the offender to implement an environmental management system that meets a recognized Canadian or international standard;
- (f) directing the offender to have an environmental audit conducted by a person of a class and at the times specified by the court and directing the offender to remedy any deficiencies revealed during the audit;
- (g) directing the offender to publish, in the manner directed by the court, the facts relating to the conviction;
- (h) directing the offender to notify, at the offender's own cost and in the manner directed by the court, any person aggrieved or affected by the offender's conduct of the facts relating to the conviction;
- (i) directing the offender to post any bond or pay any amount of money into court that will ensure compliance with any order made under this section;
- (j) directing the offender to submit to the Minister, on application by the Minister made within three years after the date of conviction, any information with respect to the offender's activities that the court considers appropriate and just in the circumstances;
- (k) directing the offender to compensate the Minister, in whole or in part, for the cost of any remedial or preventive action taken by or caused to be taken on behalf of the Minister as a result of the act or omission that constituted the offence;
- (l) directing the offender to perform community service, subject to any reasonable conditions that may be imposed in the order;
- (m) directing that the amount of any fine or other monetary award be allocated, subject to the *Criminal Code* and any regulations that may be made under section 278, in accordance with any directions of the court that are made on the basis of the harm or risk of harm caused by the commission of the offence;
- (n) directing the offender to pay, in the manner prescribed by the court, an amount for the purposes of conducting research into the ecological use and disposal of the substance in respect of which the offence was committed or research relating to the manner of carrying out environmental effects monitoring;
- (o) directing the offender to pay, in the manner prescribed by the court, an amount to environmental, health or other groups to assist in their work in the community where the offence was committed;

(p) directing the offender to pay, in the manner prescribed by the court, an amount to an educational institution for scholarships for students enrolled in environmental studies; and

(q) requiring the offender to comply with any other reasonable conditions that the court considers appropriate and just in the circumstances for securing the offender's good conduct and for preventing the offender from repeating the same offence or committing other offences.

Publication

(2) Where an offender fails to comply with an order made under paragraph (1)(g) directing the publication of the facts relating to the offence, the Minister may publish the facts in compliance with the order and recover the costs of publication from the offender.

Debt due to Her Majesty

(3) Where the court makes an order under paragraph (1)(k) directing an offender to pay costs or the Minister incurs publication costs under subsection (2), the costs constitute a debt due to Her Majesty in right of Canada and may be recovered in any court of competent jurisdiction.

Coming into force and duration of order

(4) An order made under subsection (1) comes into force on the day on which it is made or on any other day that the court may determine and shall not continue in force for more than three years after that day.

Compensation for loss of property

292. (1) Where an offender has been convicted of an offence under this Act, the court may, at the time sentence is imposed and on the application of the person aggrieved, order the offender to pay to that person an amount by way of satisfaction or compensation for loss of or damage to property suffered by that person as a result of the commission of the offence.

Enforcement

(2) Where an amount that is ordered to be paid under subsection (1) is not paid forthwith, the applicant may, by filing the order, enter as a judgment, in the superior court of the province in which the trial was held, the amount ordered to be paid, and that judgment is enforceable against the offender in the same manner as if it were a judgment rendered against the offender in that court in civil proceedings.

Variation of sanctions

293. (1) Subject to subsection (2), where a court has made, in relation to an offender, an order or direction under section 288, 289 or 291, the court may, on application by the offender or the Attorney General, require the offender to appear before it and, after hearing the offender and the Attorney General, vary the order in one or any combination of the following ways that is applicable and, in the opinion of the court, is rendered desirable by a change in the circumstances of the offender since the order was made:

(a) make changes in the order or the conditions specified in it or extend the period for which the order is to remain in force for any period, not exceeding one year, that the court considers desirable; or

(b) decrease the period for which the order is to remain in force or relieve the offender, either absolutely or partially or for any period that the court considers desirable, of compliance with any condition that is specified in the order.

Notice

(2) Before making an order under subsection (1), the court may direct that notice be given to any persons that the court considers to be interested and may hear any such person.

Subsequent applications with leave

294. Where an application made under section 293 in respect of an offender has been heard by a court, no

other application may be made under that section with respect to the offender except with leave of the court.

Environmental Protection Alternative Measures

Definitions

295. The definitions in this section apply in sections 296 to 309.

"agreement" « *accord* »

"agreement" means an agreement respecting environmental protection alternative measures.

"Attorney General" « *procureur général* »

"Attorney General" means the Attorney General of Canada or an agent of the Attorney General of Canada.

"environmental protection alternative measures" « *mesures de rechange* »

"environmental protection alternative measures" means measures, other than judicial proceedings, that are used to deal with a person who is alleged to have committed an offence under this Act.

"person" « *personne* »

"person" includes individuals, Her Majesty in right of Canada or of a province and public bodies, bodies corporate, societies and companies.

When measures may be used

296. (1) Environmental protection alternative measures may be used to deal with a person who is alleged to have committed an offence under this Act only if it is not inconsistent with the purposes of this Act and the following conditions are met:

- (a) the measures are part of a program of environmental protection alternative measures authorized by the Attorney General, after consultation with the Minister;
- (b) the offence alleged to have been committed is an offence under this Act, except an offence under
 - (i) paragraph 272(1)(a) or (b), in respect of subsection 16(4), 81(1), (2), (3) or (4), 82(1) or (2), 84(2) or 96(4), section 99, subsection 106(1), (2), (3) or (4), 107(1) or (2), 109(1) or (2), 119(1), 148(1), 202(4) or 213(4) or section 227 or 228,
 - (ii) paragraph 272(1)(c), (d) or (e),
 - (iii) subsection 273(1), if the offence is committed knowingly, or
 - (iv) subsection 274(1) or (2);
- (c) an information has been laid in respect of the offence;
- (d) the Attorney General, after consulting with the Minister, is satisfied that they would be appropriate, having regard to the nature of the offence, the circumstances surrounding its commission and the following factors, namely,
 - (i) the protection of the environment and of human life and health and other interests of society,
 - (ii) the person's history of compliance with this Act,
 - (iii) whether the offence is a repeated occurrence,
 - (iv) any allegation that information is being or was concealed or other attempts to subvert the purposes and requirements of this Act are being or have been made, and
 - (v) whether any remedial or preventive action has been taken by or on behalf of the person in relation to the offence;
- (e) the person has been advised of the right to be represented by counsel;
- (f) the person accepts responsibility for the act or omission that forms the basis of the offence that the person is alleged to have committed;
- (g) the person applies, in accordance with regulations made under section 309, to participate in the measures;
- (h) the person and the Attorney General have entered into an agreement within the period of 180 days after the Attorney General has provided initial disclosure of the Crown's evidence to the person;

(i) there is, in the opinion of the Attorney General, sufficient evidence to proceed with the prosecution of the offence; and

(j) the prosecution of the offence is not barred at law.

Restriction on use

(2) Environmental protection alternative measures shall not be used to deal with a person who

(a) denies participation or involvement in the commission of the alleged offence; or

(b) expresses the wish to have any charge against the person dealt with by the court.

Admissions not admissible in evidence

(3) No admission, confession or statement accepting responsibility for a given act or omission made by a person as a condition of being dealt with by environmental protection alternative measures is admissible in evidence against the person in any civil or criminal proceedings.

Dismissal of charge

(4) Where environmental protection alternative measures have been used to deal with a person alleged to have committed an offence, the court shall dismiss the charge laid against the person in respect of that offence where the court is satisfied on a balance of probabilities that the person has complied with the agreement.

No bar to proceedings

(5) The use of environmental protection alternative measures in respect of a person who is alleged to have committed an offence is not a bar to any proceedings against the person under this Act.

Laying of information, etc.

(6) This section does not prevent any person from laying an information, obtaining the issue or confirmation of any process, or proceeding with the prosecution of any offence, in accordance with the law.

Sentencing considerations

297. Where an information in respect of an offence of contravening an agreement under section 272 has been laid and proceedings in respect of the alleged offence for which the agreement was entered into have been recommenced, the court imposing a sentence for either offence shall take into account, in addition to the factors referred to in section 287, any sentence that has previously been imposed for the other offence.

Nature of measures contained in agreement

298. (1) An agreement may contain any terms and conditions, including, but not limited to,

(a) terms and conditions having any or all of the effects set out in section 291 or any other terms and conditions having any of the effects prescribed by the regulations that the Attorney General, after consulting with the Minister, considers appropriate; and

(b) terms and conditions relating to the costs of laboratory tests and of field tests, travel and living expenses, costs of scientific analyses and other reasonable costs associated with supervising and verifying compliance with the agreement.

Supervisory bodies

(2) Any governmental or non-governmental body may supervise compliance with an agreement.

Duration of agreement

299. An agreement comes into force on the day on which it is signed or on any later day that is specified in the agreement and continues in force for the period, not exceeding three years, specified in the agreement.

Filing in court for the purpose of public access

300. (1) Subject to subsection (5), the Attorney General shall consult with the Minister before entering into an agreement and shall cause the agreement to be filed, as part of the court record of the proceedings to which the public has access, with the court in which the information was laid, within 30 days after the agreement was entered into.

Reports

(2) A report relating to the administration of or compliance with an agreement shall, immediately after all the terms and conditions of the agreement have been complied with or the charges in respect of which the agreement was entered into have been dismissed, be filed with the court in which the agreement was filed in accordance with subsection (1).

Confidential information or material injury

(3) Subject to subsection (4), the following information that is to be part of an agreement or the report referred to in subsection (2) must be set out in a schedule to the agreement or to the report:

- (a) trade secrets of any person;
- (b) financial, commercial, scientific or technical information that is confidential information and that is treated consistently in a confidential manner by any person;
- (c) information the disclosure of which could reasonably be expected to result in material financial loss or gain to, or could reasonably be expected to prejudice the competitive position of, any person; or
- (d) information the disclosure of which could reasonably be expected to interfere with contractual or other negotiations of any person.

Agreement on information to be in schedule

(4) The parties to an agreement must agree on which information that is to be part of an agreement or a report is information that meets the requirements of paragraphs (3)(a) to (d).

Manner in which schedules to be kept secret

(5) A schedule to an agreement or to the report referred to in subsection (2) is confidential and shall not be filed with the court.

Prohibition of disclosure

(6) The Minister shall not disclose any information set out in a schedule to the agreement or to the report referred to in subsection (2), except under section 307 or under the *Access to Information Act*.

Filing in Environmental Registry

301. A copy of every agreement and report referred to in subsection 300(2) and every agreement that has been varied under subsection 303(1), or a notice that the agreement or report has been filed in court and is available to the public, shall be included in the Environmental Registry.

Stay and recommencement of proceedings

302. Despite section 579 of the *Criminal Code*,

- (a) the Attorney General shall, on filing the agreement, stay the proceedings or apply to the court for an adjournment of the proceedings in respect of the offence alleged to have been committed for a period of not more than one year after the expiry of the agreement; and
- (b) proceedings stayed in accordance with paragraph (a) may be recommenced, without laying a new

information or preferring a new indictment, as the case may be, by the Attorney General giving notice of the recommencement to the clerk of the court in which the stay of the proceedings was entered, but where no such notice is given within one year after the expiry of the agreement, the proceedings are deemed never to have been commenced.

Application to vary agreement

303. (1) Subject to subsection 300(5), the Attorney General may, on application by the person bound by an agreement and after consulting with the Minister, vary the agreement in one or both of the following ways that, in the opinion of the Attorney General, is rendered desirable by a material change in the circumstances since the agreement was entered into or last varied:

- (a) make any changes to the agreement or to its terms and conditions; or
- (b) decrease the period for which the agreement is to remain in force or relieve the person, either absolutely or partially or for any period that the Attorney General considers desirable, of compliance with any condition that is specified in the agreement.

Filing of varied agreement

(2) An agreement that has been varied under subsection (1) shall be filed with the court in which the original agreement was filed in accordance with section 300.

Records of persons

304. Sections 305 to 307 apply only to persons who have entered into an agreement, regardless of the degree of their compliance with its terms and conditions.

Records of police forces and investigative bodies

305. (1) A record that relates to an offence that is alleged to have been committed by a person, including the original or a copy of any fingerprints or photographs of the person, may be kept by any police force or body responsible for, or participating in, the investigation of the offence.

Disclosure by enforcement officer or peace officer

(2) An enforcement officer or other peace officer may disclose to any person any information in a record kept under this section that it is necessary to disclose in the conduct of the investigation of an offence.

Disclosure to insurance company

(3) An enforcement officer or other peace officer may disclose to an insurance company any information in a record kept under this section that it is necessary to disclose for the purpose of investigating a claim arising out of an offence that is committed or alleged to have been committed by the person to whom the record relates.

Government records

306. (1) The Minister, enforcement officers and analysts and any department or agency of a government in Canada with which the Minister has entered into an agreement under section 308 may keep records and use information obtained as a result of the use of environmental protection alternative measures to deal with a person

- (a) for the purposes of an inspection under this Act or an investigation of an offence under this Act that is alleged to have been committed by the person;
 - (b) in proceedings against the person under this Act;
 - (c) for the purpose of the administration of environmental protection alternative measures programs;
- or
- (d) otherwise for the purposes of the administration or enforcement of this Act.

Supervision records

(2) Any person may keep the records and use the information obtained by the person as a result of supervising compliance with an agreement that are necessary for the purpose of supervising compliance with the agreement.

Disclosure of records

307. (1) Any record or information referred to in section 305 or 306 may be made available to

- (a) any judge or court for any purpose that relates to proceedings relating to offences that are committed or alleged to have been committed by the person to whom the record relates;
- (b) any prosecutor, enforcement officer or other peace officer
 - (i) for the purpose of investigating an offence that the person is suspected on reasonable grounds of having committed, or in respect of which the person has been arrested or charged, or
 - (ii) for any purpose that relates to the administration of the case to which the record relates;
- (c) any member of a department or agency of a government in Canada, or any agent of such a department or agency, that is
 - (i) engaged in the administration of environmental protection alternative measures in respect of the person, or
 - (ii) preparing a report in respect of the person under this Act; or
- (d) any other person who is deemed, or any person within a class of persons that is deemed, by a judge of a court to have a valid interest in the record, to the extent directed by the judge, if the judge is satisfied that the disclosure is
 - (i) desirable in the public interest for research or statistical purposes, or
 - (ii) desirable in the interest of the proper administration of justice,

and if that person gives a written undertaking not to subsequently disclose the information except in accordance with subsection (2).

Subsequent disclosure

(2) Where a record is made available to a person under subparagraph (1)(d)(i), the person may subsequently disclose information contained in the record, but shall not disclose it in any form that could reasonably be expected to identify the person to whom it relates and any other person specified by the judge.

Information, copies

(3) Any person to whom a record is authorized to be made available under this section may be given any information that is contained in the record and may be given a copy of any part of the record.

Evidence

(4) Nothing in this section authorizes the introduction into evidence of any part of a record that would not otherwise be admissible in evidence.

Exception for public access to court record

(5) For greater certainty, this section does not apply to an agreement, a varied agreement or report that is filed with the court in accordance with section 300.

Agreements respecting exchange of information

308. The Minister may enter into an agreement with a department or agency of a government in Canada respecting the exchange of information for the purpose of administering environmental protection alternative measures or preparing a report in respect of a person's compliance with an agreement.

Regulations

309. The Minister may make regulations respecting the environmental protection alternative measures that may be used for the purposes of this Act including, but not limited to, regulations

- (a) excluding specified offences under this Act from the application of those measures;
- (b) prescribing the form and manner in which and the period within which an application to participate in the measures is to be made, and the information that must be contained in or accompany the application;
- (c) respecting the manner of preparing and filing reports relating to the administration of and compliance with agreements;
- (d) respecting the types of reasonable costs and the manner of paying the costs associated with supervising and verifying compliance with an agreement; and
- (e) respecting the terms and conditions that may be provided for in an agreement and their effects.

Contraventions

Ticketing

310. (1) Despite anything in this Act, the Governor in Council may, by regulation, on the recommendation of the Minister, designate any offence under this Act as an offence with respect to which, despite the *Criminal Code*, an enforcement officer may lay an information and issue and serve a summons by completing a ticket in the prescribed form, affixing to it the enforcement officer's signature and delivering it to the person who is alleged to have committed the offence specified in it at the time the offence is alleged to have been committed.

Regulations

(2) Any regulations made under this section

- (a) shall establish a procedure for entering a plea and paying a fine in respect of each offence to which the regulations relate;
- (b) shall prescribe the amount of the fine to be paid in respect of each offence; and
- (c) may prescribe any other matter necessary to carry out the purposes of this section.

Failure to respond to ticket

(3) Where a person is served with a ticket and does not enter a plea within the time prescribed by the regulations, a justice shall examine the ticket and

- (a) if the ticket is complete and regular on its face, the justice shall enter a conviction in the person's absence and impose a fine of the prescribed amount; or
- (b) if the ticket is not complete and regular on its face, the justice shall quash the proceedings.

Other Remedies

Injunction

311. (1) Where, on the application of the Minister, it appears to a court of competent jurisdiction that a person has done or is about to do or is likely to do any act or thing constituting or directed toward the commission of an offence under this Act, the court may issue an injunction ordering any person named in the application

- (a) to refrain from doing any act or thing that it appears to the court may constitute or be directed toward the commission of an offence under this Act; or
- (b) to do any act or thing that it appears to the court may prevent the commission of an offence under this Act.

Notice

(2) No injunction shall be issued under subsection (1) unless 48 hours notice is given to the party or parties

named in the application or the urgency of the situation is such that service of notice would not be in the public interest.

Defence

Defence

312. In a prosecution for a contravention of a provision of Division 5 of Part 7 by a company engaged in the business of assembling or altering vehicles, it is a defence for the company to establish that the contravention occurred as a result of work previously done on a vehicle by another company engaged in the manufacture of the vehicle.

Part 11: Miscellaneous Matters

[Disclosure of Information](#)

[Economic Instruments](#)

[Regulations Respecting Fees and Charges](#)

[General Regulation-making Powers and Exemptions](#)

[Prepublication Requirements](#)

[Board of Review Proceedings](#)

[Report to Parliament](#)

Disclosure of Information

Request for confidentiality

313. (1) A person who provides information to the Minister under this Act, or to a board of review in respect of a notice of objection filed under this Act, may submit with the information a request that it be treated as confidential.

Contents of request

(2) A request under subsection (1) shall be submitted in writing and contain any supplementary information that may be prescribed.

Prohibition of disclosure

314. The Minister shall not disclose any information in respect of which a request for confidentiality has been made under section 313, except in accordance with section 315, 316 or 317.

Disclosure by Minister for public interest

315. (1) The Minister may disclose information, other than information in respect of which section 318 applies, where

- (a) the disclosure is in the interest of public health, public safety or the protection of the environment; and
- (b) the public interest in the disclosure clearly outweighs in importance
 - (i) any material financial loss or prejudice to the competitive position of the person who provided the information or on whose behalf it was provided, and
 - (ii) any damage to the privacy, reputation or human dignity of any individual that may result from the disclosure.

Notice of disclosure

(2) Subject to subsection (3), at least 24 hours before disclosing any information under subsection (1), the Minister shall give notice of the proposed disclosure to the person who provided the information or on whose behalf it was provided.

Exception

(3) Notice under subsection (2)

- (a) is not required where the person to whom it is to be given cannot be found after reasonable efforts have been made to do so; or
- (b) may be given later than the time required by that subsection where an emergency exists.

Certain purposes for which information may be disclosed

316. (1) Information may be disclosed

- (a) with the written consent of the person who provided it or on whose behalf it was provided;
- (b) as may be necessary for the purposes of the administration or enforcement of this Act;
- (c) under an agreement or arrangement between the Government of Canada or any of its institutions and any other government in Canada, the government of a foreign state or an international organization or any of its institutions, or between the Minister and any other minister of the Crown in right of Canada, where
 - (i) the purpose of the agreement or arrangement is the administration or enforcement of a law, and
 - (ii) the government, international organization, institution or other minister undertakes to keep the information confidential;
- (d) under an agreement or arrangement between the Government of Canada and the government of a foreign state or an international organization, where the government or organization undertakes to keep the information confidential; or
- (e) to a physician or prescribed medical professional who requests the information for the purpose of making a medical diagnosis of, or rendering medical treatment to, a person in an emergency.

Disclosure by physician, etc.

(2) A physician or prescribed medical professional to whom information is disclosed under paragraph (1)(e) shall not disclose the information except as may be necessary for the purposes referred to in that paragraph.

Disclosure of personal information

(3) Personal information as defined in section 3 of the *Privacy Act* may not be disclosed under paragraph (1) (b) or (c) unless

- (a) the disclosure is in the interest of public health, public safety or the protection of the environment; and
- (b) the public interest in the disclosure clearly outweighs in importance any damage to the privacy, reputation or human dignity of any individual that may result from the disclosure.

Disclosure by Minister

317. (1) The Minister may disclose information in respect of which a request for confidentiality has been made under section 313 where the Minister determines that the disclosure would not be prohibited under section 20 of the *Access to Information Act*.

Application of certain provisions of *Access to Information Act*

(2) Where the Minister intends to disclose information under subsection (1), sections 27, 28 and 44 of the *Access to Information Act* apply, with any modifications that the circumstances require, and, for that purpose, that information is deemed to be contained in a record that the Minister intends to disclose and any reference in those sections to the person who requested access shall be disregarded.

Protection from civil proceeding or prosecution

(3) Despite any other Act of Parliament, no civil or criminal proceedings lie against the Minister, or against any person acting on behalf of or under the direction of the Minister, and no proceedings lie against the Crown for the disclosure in good faith of any information under this Act, for any consequences that flow from that disclosure or for the failure to give any notice required under section 27 or any other provision of the *Access to Information Act* if reasonable care is taken to give the required notice.

Hazardous Materials Information Review Act

318. Except as provided in sections 316 and 317, information in respect of which a request for confidentiality has been made under section 313 shall not be disclosed where

- (a) a claim for exemption has been filed in respect of the information under section 11 of the *Hazardous Materials Information Review Act*;

(b) the information is exempt under section 19 of that Act from the requirement in respect of which the exemption is claimed; and

(c) the person claiming the exemption has disclosed the contents of the claim to the Minister.

Regulations

319. The Governor in Council may make regulations prescribing

(a) information that shall accompany a request made under section 313; and

(b) medical professionals for the purposes of paragraph 316(1)(e).

Non-disclosure by Minister of National Defence

320. Despite any other provision of this Act, the Minister of National Defence may refuse to disclose under this Part any information the disclosure of which could reasonably be expected to be injurious to the defence or security of Canada or of a state allied or associated with Canada.

Security requirements for disclosure

321. Any person, except an enforcement officer or analyst, who receives, obtains or has access to information under this Act shall comply with any security requirements applicable to, and take any oath of secrecy required to be taken by, persons who normally have access to and use of the information.

Economic Instruments

Guidelines, programs and other measures

322. The Minister may establish guidelines, programs and other measures for the development and use of economic instruments and market-based approaches to further the purposes of this Act, respecting systems relating to

(a) deposits and refunds; and

(b) tradeable units.

Consultation

323. (1) In carrying out the responsibilities conferred by section 322, the Minister shall offer to consult with the government of a province and the members of the Committee who are representatives of aboriginal governments and may consult with a government department or agency, aboriginal people, representatives of industry and labour and municipal authorities or with persons interested in quality of the environment or the preservation and improvement of public health.

Minister may act

(2) At any time after the 60th day following the day on which the Minister offers to consult in accordance with subsection (1), the Minister may act under section 322 if the offer to consult is not accepted by the government of a province or members of the Committee who are representatives of aboriginal governments.

Publication of guidelines and programs

324. The Minister shall publish any guidelines, programs and other measures established under section 322, or shall give notice of their availability, in the *Canada Gazette* and in any other manner that the Minister considers appropriate.

Regulations for systems relating to deposits and refunds

325. The Governor in Council may, in the exercise of a regulation-making power under section 93, 118 or 209, make regulations respecting systems relating to deposits and refunds, including, but not limited to, regulations providing for, or imposing requirements respecting,

- (a) deposits, including the amount of any deposit and the substance, product containing a substance or activity in relation to which a deposit is required, the conditions for the use of a deposit and the conditions for and manner of paying a deposit;
- (b) the period during which a deposit may be held;
- (c) refunds, including the amount of any refund and the substance, product containing a substance or activity in relation to which a refund may be granted and the conditions for and manner of paying a refund;
- (d) the establishment of a fund for deposits, and the operation, management and administration of the fund;
- (e) the designation of a person to administer the fund for deposits and the conditions for the designation;
- (f) reports and forms related to deposits, refunds and the fund for deposits;
- (g) the maintenance of books and records for the administration of any regulation made under this section; and
- (h) the forfeiture of deposits, including unclaimed deposits and the conditions under which and the circumstances in which deposits may be forfeited.

Regulations for tradeable units systems

326. The Governor in Council may, in the exercise of a regulation-making power under section 93, 118, 140, 167, 177 or 209, make regulations respecting systems relating to tradeable units, including regulations providing for, or imposing requirements respecting,

- (a) the substance, product containing a substance or quantity or concentration of the substance that is released or activity in relation to which the system is established;
- (b) the methods and procedures for conducting sampling, analyses, tests, measurements or monitoring under the system;
- (c) the description and nature of a tradeable unit, including allowances, credits or coupons;
- (d) the baselines to be used for comparison or control purposes in relation to the system and the maximum limits applicable to the system and the manner of determining those baselines and maximum limits;
- (e) the conditions related to the creation, distribution, exchange, sale, use, variation or cancellation of a tradeable unit;
- (f) the creation, operation and management of a public registry related to the system;
- (g) the conditions for the use of and participation in the system, including environmental or temporal limits;
- (h) reports and forms related to the system; and
- (i) the maintenance of books and records for the administration of any regulation made under this section.

Ministerial orders

327. Despite any regulation made under section 326, the Minister may issue an order setting conditions in respect of the trading or suspend or cancel trading of tradeable units or invalidate any trade of tradeable units where the Ministers are of the opinion that the trade or use of a tradeable unit

- (a) has or may have an immediate or long-term harmful effect on the environment;
- (b) constitutes or may constitute a danger to the environment on which human life depends; or
- (c) constitutes or may constitute a danger in Canada to human life or health.

Regulations Respecting Fees and Charges

Services and facilities

328. (1) Subject to subsection (2), the Minister may make regulations

- (a) prescribing the fees or a scale of fees or the manner of determining the fees to be paid for a service, the use of a facility or any right, privilege, process or approval;
- (b) prescribing the persons or classes of persons by whom or on whose behalf the fees are to be paid

- and requiring the fees to be paid by those persons or classes of persons;
- (c) exempting any person or class of persons from the requirement to pay any of those fees; and
- (d) generally, in respect of any condition or any other matter in relation to the payment of fees for a service, facility, right, privilege, process or approval referred to in paragraph (a).

Appropriate Minister

(2) For the purpose of subsection (1), where the Minister or the Minister of Health or both Ministers have responsibility for a service, facility, right, privilege, process or approval referred to in paragraph (1)(a), that Minister or both Ministers, as the case may be, have the power to make the regulations under subsection (1) in relation to that service, facility, right, privilege, process or approval.

Amount not to exceed cost

(3) Fees for a service or the use of a facility that are prescribed by or under regulations made under subsection (1) may not exceed the cost to Her Majesty in right of Canada of providing the service or the use of the facility.

Amount

(4) Fees for processes or approvals that are prescribed by or under regulations made under subsection (1) shall in the aggregate not exceed an amount sufficient to compensate Her Majesty in right of Canada for any reasonable costs incurred by Her Majesty for the purpose of providing the processes or approvals.

Consultation

329. The Minister making a regulation under section 328 shall do so after consulting with any persons or organizations that the Minister considers to be interested in the matter.

General Regulation-making Powers and Exemptions

Exercise of regulation-making power

330. (1) The Governor in Council may, in the exercise of any regulation-making power under this Act in respect of a substance, prescribe

- (a) the minimum, average or maximum quantity or concentration of the substance; and
- (b) the method of determining such a quantity or concentration.

Incorporation by reference

(2) For greater certainty, a regulation made under this Act incorporating by reference a standard, specification, guideline, method, procedure or practice may incorporate the standard, specification, guideline, method, procedure or practice as amended from time to time.

Application throughout Canada

(3) Except as provided in subsection (3.1), a regulation under this Act applies throughout Canada.

Limited geographical application

(3.1) A regulation made under section 93, 140, 167 or 177 may be made applicable in only a part or parts of Canada in order to protect the environment or its biological diversity or human health.

Manner of service

(4) The Minister may make regulations respecting the manner of providing or serving orders, copies of orders, notices or other documents that are to be provided under this Act.

Exemption from *Statutory Instruments Act*

331. An interim order made under section 94, 163, 173, 183 or 200.1

- (a) is exempt from the application of sections 3, 5 and 11 of the *Statutory Instruments Act*; and
- (b) shall be published in the *Canada Gazette* within 23 days after it is approved by the Governor in Council.

1999, c. 33, s. 331; 2004, c. 15, s. 30.

Prepublication Requirements

Publication of proposed orders and regulations

332. (1) The Minister shall publish in the *Canada Gazette* a copy of every order or regulation proposed to be made by the Minister or the Governor in Council under this Act, except a list, or an amendment to a list, referred to in section 66, 87, 105 or 112 or an interim order made under section 94, 163, 173, 183 or 200.1.

Notice of objection

(2) Within 60 days after the publication of a proposed order or regulation in the *Canada Gazette* under subsection (1) or a proposed instrument respecting preventive or control actions in relation to a substance that is required by section 91 to be published in the *Canada Gazette*, any person may file with the Minister comments with respect to the order, regulation or instrument or a notice of objection requesting that a board of review be established under section 333 and stating the reasons for the objection.

Single publication required

(3) No order, regulation or instrument need be published more than once under subsection (1), whether or not it is altered after publication.

1999, c. 33, s. 332; 2004, c. 15, s. 31.

Board of Review Proceedings

Establishment of board of review

333. (1) Where a person files a notice of objection under subsection 77(8) or 332(2) in respect of

- (a) a decision or a proposed order, regulation or instrument made by the Governor in Council, or
- (b) a decision or a proposed order or instrument made by either or both Ministers,

the Minister or the Ministers may establish a board of review to inquire into the nature and extent of the danger posed by the substance in respect of which the decision is made or the order, regulation or instrument is proposed.

Establishment of board of review

(2) Where a person files a notice of objection under subsection 9(3) or 10(5) in respect of an agreement or a term or condition of the agreement, the Minister may establish a board of review to inquire into the matter.

Mandatory review for international air and water

(3) Where a person or government files with the Minister a notice of objection under subsection 332(2) with respect to regulations proposed to be made under section 167 or 177 within the time specified in that subsection, the Minister shall establish a board of review to inquire into the nature and extent of the danger posed by the release into the air or water of the substance in respect of which the regulations are proposed.

Mandatory reviews for certain regulations

(4) Where a person files with the Minister a notice of objection under subsection 332(2) with respect to regulations proposed to be made under Part 9 or section 118 within the time specified in that subsection, the Minister shall establish a board of review to inquire into the matter raised by the notice.

Review for permits

(5) Where a person files with the Minister a notice of objection under section 134 within the time specified in that section, the Minister may establish a board of review to inquire into the matter raised by the notice.

Mandatory review for toxics

(6) Where a person files with the Minister a notice of objection under section 78 in respect of the failure to make a determination about whether a substance is toxic, the Minister shall establish a board of review to inquire into whether the substance is toxic or capable of becoming toxic.

Number of members of board

334. (1) A board of review shall consist of not fewer than three members.

Knowledge requirement

(2) A person is not eligible to be appointed as a member of a board of review unless the person is knowledgeable about the Canadian environment, environmental and human health or traditional aboriginal ecological knowledge.

Appearance before board

335. A board of review shall give any person or government a reasonable opportunity, consistent with the rules of procedural fairness and natural justice, of appearing before it, presenting evidence and making representations.

Withdrawal of notice of objection

336. Where a notice of objection referred to in section 333 is withdrawn by the person who filed it and no other notice of objection is filed in respect of the same matter, the Minister or Ministers may dissolve a board of review established in respect of the notice of objection.

Powers of board

337. For the purposes of an inquiry under this Act, a board of review has all the powers of a person appointed as a commissioner under Part I of the *Inquiries Act*.

Costs

338. (1) A board of review may award costs of, and incidental to, any proceedings before it on a final or interim basis and those costs may be fixed at a sum certain or may be taxed.

Payment

(2) A board of review may, in accordance with the rules, direct by whom and to whom any costs are to be paid and by whom they are to be taxed and allowed.

Absent member of board

339. Where a member of a board of review is absent or unable to proceed with or complete an inquiry, the remaining members of the board may, if there is still a quorum, proceed with or complete the inquiry.

Report

340. (1) As soon as possible after the conclusion of an inquiry, a board of review shall submit a report to the Minister or the Ministers who established the board, together with its recommendations and the evidence that was presented to it.

Publication of report

(2) The report of the board of review shall be made public immediately after its receipt by the Minister or Ministers, subject to section 314 or the conditions of any other Act of Parliament.

Rules for boards of review

341. The Minister or the Ministers may, with respect to boards of review that the Minister or the Ministers establish, make rules of either particular or general application

- (a) for regulating the proceedings of the boards;
- (b) for regulating the conduct of hearings, including the presentation of evidence, the making of representations, the holding of hearings, the length of hearings and the date on or before which the boards shall report;
- (c) fixing the remuneration of board members and the travel and living expenses to which they are entitled;
- (d) prescribing the criteria to be considered by boards in directing interim or final costs to be paid, taxed and allowed and prescribing a scale under which costs are to be taxed; and
- (e) generally, for regulating the conduct and work of the boards.

Report to Parliament

Annual report

342. (1) The Minister shall, as soon as possible after the end of each fiscal year, prepare and cause to be laid before each House of Parliament a report on the administration and enforcement of this Act for that year.

Research

(2) The Minister shall include in the annual report a report on the research conducted under the authority of this Act during the fiscal year being reported.

Permanent review of Act

343. (1) The administration of this Act shall, every five years after the coming into force of this Act, stand referred to such committee of the House of Commons, of the Senate or of both Houses of Parliament as may be designated or established for that purpose.

Review and report

(2) The committee designated or established for the purpose of subsection (1) shall, as soon as practicable, undertake a comprehensive review of the provisions and operation of this Act and shall, within one year after the review is undertaken or within such further time as the House of Commons, the Senate or both Houses of Parliament, as the case may be, may authorize, submit a report to Parliament thereon, including a statement of any changes to this Act or its administration that the committee would recommend.

Part 12: Consequential Amendments, Repeal and Coming into Force

[Consequential Amendments](#)

[Repeal](#)

[Transitional](#)

[Coming into Force](#)

Consequential Amendments

344. to 354. [Amendments]

Repeal

355. [Repeal]

Transitional

Regulations

355.1 (1) Subject to subsection (2), any regulation that was

- (a) made under the Act mentioned in section 355, and
- (b) in force immediately before the day on which this Act is assented to

is deemed to have been made under this Act, and continues in force, subject to being amended or repealed under this Act.

Where inconsistent with this Act

(2) If a regulation continued in force by subsection (1) is not consistent with this Act at the end of the two-year period that starts on the day on which this Act is assented to, that regulation ceases to be in force at the end of that period.

Coming into Force

Coming into force

* 356. This Act or any of its provisions comes into force on a day or days to be fixed by order of the Governor in Council.

* [Note: Sections 6 and 332 to 341 in force November 15, 1999, see SI/99-131; sections 243 to 255 in force December 1, 1999, see SI/99-132; sections 9 and 54 in force February 2, 2000, see SI/2000-4; sections 1 to 5, 7, 8, 10 to 53 and 55 to 80, subsections 81(1) to (6) and (8) to (14), sections 82 to 105, subsections 106 (1) to (6) and (8) to (13) and sections 107 to 233, 242, 256 to 331 and 342 to 355.1 in force March 31, 2000, see SI/2000-15; sections 234 to 241 in force March 31, 2001, see SI/2000-15 and SI/2000-78; subsections 81(7) and 106(7) in force September 13, 2001, see SI/2000-15.]

Schedules

Schedule 1: Sections 56, 68, 71, 77, 79, 90, 91, 93 to 96 and 199

Schedule 2: Subsection 81(7)

Schedule 3: Sections 100 to 103

Schedule 4: Subsection 106(7)

Schedule 5: Subsections 122(1) and 135(2) and section 216

Schedule 6: Subsections 127(2) and (3), 128(3) and 129(3) and section 135

Schedule 1 (Sections 56, 68, 71, 77, 79, 90, 91, 93 to 96 and 199)

For molecular formulae in this schedule, "n" = number of atoms.

List of Toxic Substances

1. Chlorobiphenyls that have the molecular formula $C_{12}H_{(10-n)}Cl_n$ in which "n" is greater than 2
2. Dodecachloropentacyclo [5.3.0.0^{2,6}.0^{3,9}.0^{4,8}] decane (Mirex)
3. Polybrominated Biphenyls that have the molecular formula $C_{12}H_{(10-n)}Br_n$ in which "n" is greater than 2
4. Chlorofluorocarbon: totally halogenated chlorofluorocarbons that have the molecular formula $C_nC_1_xF_{(2n+2-x)}$
5. Polychlorinated Terphenyls that have a molecular formula $C_{18}H_{(14-n)}Cl_n$ in which "n" is greater than 2
6. Asbestos
7. Lead
8. Mercury
9. Vinyl Chloride
10. Bromochlorodifluoromethane that has the molecular formula CF_2BrCl
11. Bromotrifluoromethane that has the molecular formula CF_3Br
12. Dibromotetrafluoroethane that has the molecular formula $C_2F_4Br_2$
13. Fuel containing toxic substances that are dangerous goods within the meaning of section 2 of the *Transportation of Dangerous Goods Act, 1992* and that
 - a. are neither normal components of the fuel nor additives designed to improve the characteristics or the performance of the fuel; or
 - b. are normal components of the fuel or additives designed to improve the characteristics or performance of the fuels, but are present in quantities or concentrations greater than those generally accepted by industry standards
14. Dibenzo-para-dioxin that has the molecular formula of $C_{12}H_8O_2$
15. Dibenzofuran that has the molecular formula $C_{12}H_8O_2$
16. Polychlorinated dibenzo-para-dioxins that have the molecular formula $C_{12}H_{(8-n)}O_2Cl_n$ in which "n" is greater than 2
17. Polychlorinated dibenzofurans that have the molecular formula $C_{12}H_{(8-n)}OCl_n$ in which "n" is greater than 2
18. Tetrachloromethane (carbon tetrachloride) CCl_4
19. 1,1,1-trichloroethane (methyl chloroform) CCl_3-CH_3
20. Bromofluorocarbons other than those set out in items 10 to 12
21. Hydrobromofluorocarbons that have the molecular formula $C_nH_xF_yBr_{(2n+2-x-y)}$ in which $0 < n \leq 3$
22. Methyl Bromide
23. Bis(Chloromethyl) ether that has the molecular formula $C_2H_4Cl_2O$
24. Chloromethyl methyl ether that has the molecular formula C_2H_5ClO
25. Hydrochlorofluorocarbons that have the molecular formula $C_nH_xF_yCl_{(2n+2-x-y)}$ in which $0 < n \leq 3$
26. Benzene that has the molecular formula C_6H_6
27. (4-Chlorophenyl)cyclopropylmethanone,O-[(4-nitrophenyl)methyl]oxime that has the molecular

formula $C_{17}H_{15}ClN_2O_3$

28. Inorganic arsenic compounds
29. Benzidine and benzidine dihydrochloride, that have the molecular formula $C_{12}H_{12}N_2$ and $C_{12}H_{12}N_2 \cdot 2HCl$, respectively
30. Bis(2-ethylhexyl)phthalate
31. Inorganic cadmium compounds
32. Chlorinated wastewater effluents
33. Hexavalent chromium compounds
34. Creosote-impregnated waste materials from creosote-contaminated sites
35. 3,3'-Dichlorobenzidine
36. 1,2-Dichloroethane
37. Dichloromethane
38. Effluents from pulp mills using bleaching
39. Hexachlorobenzene
40. Inorganic fluorides
41. Refractory ceramic fibre
42. Oxidic, sulphidic and soluble inorganic nickel compounds
43. Polycyclic aromatic hydrocarbons
44. Tetrachloroethylene
45. Trichloroethylene
46. Tributyltetradecylphosphonium chloride that has the molecular formula $C_{26}H_{56}P \cdot Cl$
47. Bromochloromethane, that has the molecular formula CH_2BrCl
48. Acetaldehyde, which has the molecular formula C_2H_4O
49. 1,3-Butadiene, which has the molecular formula C_4H_6
50. Acrylonitrile, which has the molecular formula C_3H_3N
51. Respirable particulate matter less than or equal to 10 microns
52. Acrolein, which has the molecular formula C_3H_4O
53. Ammonia dissolved in water
54. Nonylphenol and its ethoxylates
55. Effluents from textile mills that use wet processing
56. Inorganic Chloramines, which have the molecular formula $NH_nCl_{(3-n)}$, where $n = 0, 1$ or 2
57. Ethylene oxide, which has the molecular formula H_2COCH_2
58. Formaldehyde, which has the molecular formula CH_2O
59. *N*-Nitrosodimethylamine, which has the molecular formula $C_2H_6N_2O$
60. Gaseous Ammonia, which has the molecular formula $NH_3(g)$
61. Ozone, which has the molecular formula O_3
62. Nitric oxide, which has the molecular formula NO
63. Nitrogen dioxide, which has the molecular formula NO_2
64. Sulphur dioxide, which has the molecular formula SO_2
65. Volatile organic compounds that participate in atmospheric photochemical reactions, excluding the following:
 - a. methane;
 - b. ethane;
 - c. methylene chloride (dichloromethane);
 - d. 1,1,1-trichloroethane (methyl chloroform);
 - e. 1,1,2-trichloro-1,2,2-trifluoroethane (CFC-113);
 - f. trichlorofluoromethane (CFC-11);
 - g. dichlorodifluoromethane (CFC-12);
 - h. chlorodifluoromethane (HCFC-22);
 - i. trifluoromethane (HFC-23);
 - j. 1,2-dichloro-1,1,2,2-tetrafluoroethane (CFC-114);
 - k. chloropentafluoroethane (CFC-115);

- l. 1,1,1-trifluoro-2,2-dichloroethane (HCFC-123);
 - m. 1,1,1,2-tetrafluoroethane (HFC-134a);
 - n. 1,1-dichloro-1-fluoroethane (HCFC-141b);
 - o. 1-chloro-1,1-difluoroethane (HCFC-142b);
 - p. 2-chloro-1,1,1,2-tetrafluoroethane (HCFC-124);
 - q. pentafluoroethane (HFC-125);
 - r. 1,1,2,2-tetrafluoroethane (HFC-134);
 - s. 1,1,1-trifluoroethane (HFC-143a);
 - t. 1,1-difluoroethane (HFC-152a);
 - u. parachlorobenzotrifluoride (PCBTF);
 - v. cyclic, branched or linear completely methylated siloxanes;
 - w. acetone;
 - x. perchloroethylene (tetrachloroethylene);
 - y. 3,3-dichloro-1,1,1,2,2-pentafluoropropane (HCFC-225ca);
 - z. 1,3-dichloro-1,1,2,2,3-pentafluoropropane (HCFC-225cb);
 - (z.1) 1,1,1,2,3,4,4,5,5,5-decafluoropentane (HFC 43-10mee);
 - (z.2) difluoromethane (HFC-32);
 - (z.3) ethylfluoride (HFC-161);
 - (z.4) 1,1,1,3,3,3-hexafluoropropane (HFC-236fa);
 - (z.5) 1,1,2,2,3-pentafluoropropane (HFC-245ca);
 - (z.6) 1,1,2,3,3-pentafluoropropane (HFC-245ea);
 - (z.7) 1,1,1,2,3-pentafluoropropane (HFC-245eb);
 - (z.8) 1,1,1,3,3-pentafluoropropane (HFC-245fa);
 - (z.9) 1,1,1,2,3,3-hexafluoropropane (HFC-236ea);
 - (z.10) 1,1,1,3,3-pentafluorobutane (HFC-365mfc);
 - (z.11) chlorofluoromethane (HCFC-31);
 - (z.12) 1-chloro-1-fluoroethane (HCFC-151a);
 - (z.13) 1,2-dichloro-1,1,2-trifluoroethane (HCFC-123a);
 - (z.14) 1,1,1,2,2,3,3,4,4-nonafluoro-4-methoxy-butane ($C_4F_9OCH_3$);
 - (z.15) 2-(difluoromethoxymethyl)-1,1,1,2,3,3,3-heptafluoropropane ($((CF_3)_2CFCH_2OCH_3)$);
 - (z.16) 1-ethoxy-1,1,2,2,3,3,4,4,4-nonafluorobutane ($C_4F_9OC_2H_5$);
 - (z.17) 2-(ethoxydifluoromethyl)-1,1,1,2,3,3,3-heptafluoropropane ($((CF_3)_2CFCH_2OC_2H_5)$); and
 - (z.18) methyl acetate and perfluorocarbon compounds that fall into the following classes, namely,
 - i. cyclic, branched or linear completely fluorinated alkanes,
 - ii. cyclic, branched, or linear completely fluorinated ethers with no unsaturations,
 - iii. cyclic, branched or linear completely fluorinated tertiary amines with no unsaturations, or
 - iv. sulfur containing perfluorocarbons with no unsaturations and with sulfur bonds only to carbon and fluorine.
- 66. Hexachlorobutadiene, which has the molecular formula C_4Cl_6
 - 67. Particulate matter containing metals that is released in emissions from copper smelters or refineries, or from both
 - 68. Particulate matter containing metals that is released in emissions from zinc plants
 - 69. Dichlorodiphenyltrichloroethane (DDT), which has the molecular formula $C_{14}H_9Cl_5$
 - 70. 2-butoxyethanol, which has the molecular formula $C_6H_{14}O_2$
 - 71. 2-methoxyethanol, which has the molecular formula $C_3H_8O_2$
 - 72. Tetrachlorobenzenes, which have the molecular formula $C_6H_2Cl_4$
 - 73. Pentachlorobenzene, which has the molecular formula C_6HCl_5
 - 74. Carbon dioxide, which has the molecular formula CO_2
 - 75. Methane, which has the molecular formula CH_4
 - 76. Nitrous oxide, which has the molecular formula N_2O
 - 77. Hydrofluorocarbons that have the molecular formula $C_nH_xF_{(2n+2-x)}$ in which $0 < n < 6$
 - 78. The following perfluorocarbons:
 - a. those that have the molecular formula C_nF_{2n+2} in which $0 < n < 7$; and

b. octafluorocyclobutane, which has the molecular formula C_4F_8 .

79. Sulphur hexafluoride, which has the molecular formula SF_6

1. 83. Polybrominated diphenyl ethers that have the molecular formula $C_{12}H_{(10-n)}Br_nO$ in which $4 \leq n \leq 10$
2. 84. Perfluorooctane sulfonate and its salts
3. 85. Compounds that contain one of the following groups: $C_8F_{17}SO_2$, $C_8F_{17}SO_3$ or $C_8F_{17}SO_2N$

Part 1

Prohibited Substances

1. Mirex (Dodecachloropentacyclo [5.3.0.0^{2,6}.0^{3,9}.0^{4,8}] decane)
2. Polybrominated biphenyls that have the molecular formula $C_{12}H_{(10-n)}Br_n$ in which "n" is greater than 2
3. Polychlorinated terphenyls that have the molecular formula $C_{18}H_{(14-n)}Cl_n$ in which "n" is greater than 2
4. Alachlor (2-chloro-2', 6'-diethyl-N-methoxymethyl acetanilide)
5. Leptophos (O-(4-bromo-2,5-dichlorophenyl) O-methylphenylphosphonothioate)
6. Phosphamidon (2-chloro-2-diethylcarbamoyl-1-methylvinyl dimethyl phosphate)
7. Cyhexatin (tricyclohexyltin hydroxide)
8. 2,3,4,5-bis(2-butylene)tetrahydro-2-furfural
9. Bis(chloromethyl) ether that has the molecular formula $C_2H_4Cl_2O$
10. Chloromethyl methyl ether that has the molecular formula C_2H_5ClO
11. (4-Chlorophenyl)cyclopropylmethanone, O-[(4-nitrophenyl)methyl]oxime that has the molecular formula $C_{17}H_{15}ClN_2O_3$

Part 2

Substances Subject to Notification or Consent

Note: In this Part, "CAS" denotes Chemical Abstracts Service registry number.

1. 2,4,5-T (CAS 93-76-5)
2. Aldrin (CAS 309-00-2)
3. Captafol (CAS 2425-06-1)
4. Chlordane (CAS 57-74-9)
5. Chlordimeform (CAS 6164-98-3)
6. Chlorobenzilate (CAS 510-15-6)
7. DDT (CAS 50-29-3)
8. Dieldrin (CAS 60-57-1)
9. Dinoseb and dinoseb salts (CAS 88-85-7)

10. 1,2-dibromoethane (EDB) (CAS 106-93-4)
11. Fluoroacetamide (CAS 640-19-7)
12. HCH (mixed isomers) (CAS 608-73-1)
13. Heptachlor (CAS 76-44-8)
14. Hexachlorobenzene (CAS 118-74-1)
15. Lindane (CAS 58-89-9)
16. Mercury compounds, including inorganic mercury compounds, alkyl mercury compounds and alkyloxyalkyl and aryl mercury compounds
17. Pentachlorophenol (CAS 87-86-5)
18. Monocrotophos (Soluble liquid formulations of the substance that exceed 600 g active ingredient/L) (CAS 6923-22-4)
19. Methamidophos (Soluble liquid formulations of the substance that exceed 600 g active ingredient/L) (CAS 10265-92-6)
20. Methyl-parathion (emulsifiable concentrates (EC) with 19.5%, 40%, 50%, 60% active ingredient and dusts containing 1.5%, 2% and 3% active ingredient) (CAS 298-00-0)
21. Parathion (all formulations - aerosols, dustable powder (DP), emulsifiable concentrate (EC), granules (GR) and wettable powders (WP) - of this substance are included, except capsule suspensions (CS)) (CAS 56-38-2)
22. Crocidolite (CAS 12001-28-4)
23. Polychlorinated biphenyls (PCB) (CAS 1336-36-3)
24. Tris (2,3-dibromopropyl) phosphate (CAS 126-72-7)
25. Toxaphene (CAS 8001-35-2)
26. Binapacryl (CAS 485-31-4)
27. Ethylene oxide (CAS 75-21-8)
28. 1,2-Dichloroethane (CAS 107-06-2)

Part 3

Restricted Substances

1. Chlorofluorocarbon: totally halogenated chlorofluorocarbons that have the molecular formula $C_nCl_xF_{(2n+2-x)}$
2. Allyl alcohol (2-propen-1-ol)
3. Carbon tetrachloride (tetrachloromethane)
4. DBCP (1,2-dibromo-3-chloropropane)
5. [Repealed]
6. [Repealed]
7. Endrin (1,2,3,4,10,10-hexachloro-6,7-epoxy-1,4,4a,5,6,7,8, 8a-octahydro-exo-5,8-dimethanonaphthalene)
8. Lead arsenate that has the molecular formula $PbHAsO_4$, and its basic form that has the molecular formula $Pb_4(PbOH)(AsO_4)_3$
9. Strychnine (2,4a,5,5a,7,8,15,15a,15b,15c,decahydro-4, 6-methano-6H,14H indolo[3,2,1-ii]oxepino [2,3,4-de] pyrrolo[2,3-h]quinolin-14-one)
10. Bromochlorodifluoromethane that has the molecular formula CF_2BrCl
11. Bromotrifluoromethane that has the molecular formula CF_3Br
12. Dibromotetrafluoroethane that has the molecular formula $C_2F_4Br_2$
13. Tetraethyl lead
14. Tetramethyl lead
15. Tributyltetradecylphosphonium chloride

Schedule 5 (*Subsections 122(1) and 135(2) and section 216*)

Waste or Other Matter

1. Dredged material.
2. Fish waste and other organic matter resulting from industrial fish processing operations.
3. Ships, aircraft, platforms or other structures from which all material that can create floating debris or other marine pollution has been removed to the maximum extent possible if, in the case of disposal, those substances would not pose a serious obstacle to fishing or navigation after being disposed of.
4. Inert, inorganic geological matter.
5. Uncontaminated organic matter of natural origin.
6. Bulky substances that are primarily composed of iron, steel, concrete or other similar matter that does not have a significant adverse effect, other than a physical effect, on the sea or the seabed, if those substances
 1. (a) are in locations at which the disposal or incineration at sea is the only practicable manner of disposing of or thermally destroying the substances; and
 2. (b) in the case of disposal, would not pose a serious obstacle to fishing or navigation after being disposed of.

Schedule 6 (*Subsections 127(2) and (3), 128(3) and 129(3) and section 135*)

Assessment of Waste or Other Matter

1. This schedule shall be applied with a view that acceptance of disposal at sea under certain circumstances does not remove the obligation to make further attempts to reduce the necessity for disposal.
2. The initial stages in assessing alternatives to disposal at sea shall, as appropriate, include an evaluation of
 1. (a) the types, amounts and relative hazard of waste or other matter generated;
 2. (b) the details of the production process and sources of waste or other matter within that process; and
 3. (c) the feasibility of the following waste reduction or prevention techniques:
 1. (i) product reformulation,
 2. (ii) clean production technologies,
 3. (iii) process modification,
 4. (iv) input substitution, and
 5. (v) on-site, closed-loop recycling.
3. In general terms, if the required audit reveals that opportunities exist for waste prevention at source, an applicant shall formulate and implement a waste prevention strategy, where it has jurisdiction to do so, (in collaboration with relevant local and national agencies) which includes specific waste reduction targets and provision for further waste prevention audits to ensure that these targets are being met. Permit issuance or renewal shall be subject to compliance with this requirement.
4. For dredged material, the goal of waste management shall be to identify and control the sources of contamination. This should be achieved through implementation of waste prevention strategies and requires collaboration between the relevant local and national agencies involved with the control of point and non-point sources of pollution. Until this objective is met, the problems of contaminated

dredged material may be addressed by using disposal management techniques at sea or on land.

5. Applications to dispose of waste or other matter shall demonstrate that appropriate consideration has been given to the following hierarchy of waste management options, which implies an order of increasing environmental impact:
 1. (a) re-use;
 2. (b) off-site recycling;
 3. (c) destruction of hazardous constituents;
 4. (d) treatment to reduce or remove the hazardous constituents; and
 5. (e) disposal on land, into the air and in water.
6. A permit to dispose of waste or other matter shall be refused if opportunities exist to re-use, recycle or treat the waste or other matter without undue risks to human health or the environment or disproportionate costs. The practical availability of other means of disposal shall be considered in the light of a comparative risk assessment involving both disposal and the alternatives.
7. A detailed description and characterization of the waste or other matter is an essential precondition for the consideration of alternatives and the basis for a decision as to whether the waste or other matter may be disposed of at sea. If the waste or other matter is so poorly characterized that proper assessment cannot be made of its potential impacts on human health and the environment, the waste or other matter shall not be disposed of at sea.
8. Characterization of the waste or other matter and their constituents shall take into account
 1. (a) origin, total amount, form and average composition;
 2. (b) properties: physical, chemical, biochemical and biological;
 3. (c) toxicity;
 4. (d) persistence: physical, chemical and biological; and
 5. (e) accumulation and biotransformation in biological materials or sediments.
9. A national Action List shall be developed to provide a mechanism for screening candidate waste or other matter and their constituents on the basis of their potential effects on human health and the marine environment. In selecting substances for consideration in the Action List, priority shall be given to toxic, persistent and bio-accumulative substances from human sources (e.g. cadmium, mercury, organohalogens, petroleum hydrocarbons and, whenever relevant, arsenic, lead, copper, zinc, beryllium, chromium, nickel and vanadium, organosilicon compounds, cyanides, fluorides and pesticides or their by-products other than organohalogens). An Action List can also be used as a trigger mechanism for further waste prevention consideration.
10. The Action List shall specify an upper level and may also specify a lower level. The upper level shall be set so as to avoid, as much as reasonably possible, acute or chronic effects on human health or on sensitive marine organisms representative of the marine ecosystem. Application of the Action List will result in three possible categories of waste or other matter:
 1. (a) waste or other matter that contain specified substances, or which cause biological responses, exceeding the relevant upper levels shall not be disposed of at sea, unless made acceptable for disposal through the use of management techniques or processes;
 2. (b) waste or other matter that contain specified substances, or which cause biological responses, below the relevant lower levels should be considered to be of little environmental concern in relation to disposal at sea; and
 3. (c) waste or other matter that contain specified substances, or which cause biological responses, below the upper levels but above the lower levels require more detailed assessment before their suitability for disposal can be determined.
11. Information required to select a disposal site shall include
 1. (a) physical, chemical and biological characteristics of the water-column and the sea-bed;
 2. (b) location of amenities, values and other uses of the sea in the area under consideration;
 3. (c) assessment of the constituent fluxes associated with disposal in relation to existing fluxes of substances in the marine environment; and
 4. (d) economic and operational feasibility.
12. Assessment of potential effects shall lead to a concise statement of the expected consequences of the sea or land disposal options (i.e., the Impact Hypothesis). It provides a basis for deciding whether to

approve or reject the proposed disposal option and for defining environmental monitoring requirements.

13. The assessment for disposal shall, as appropriate, integrate information on waste characteristics, conditions at the proposed disposal site(s), fluxes and proposed disposal techniques and specify the potential effects on human health, living resources, amenities and other legitimate uses of the sea. It shall, where it is reasonably possible to do so, define the nature, temporal and spatial scales and duration of expected impacts based on reasonably conservative assumptions.
14. An analysis of each disposal option shall be considered in light of a comparative assessment of the following concerns: human health risks, environmental costs, hazards (including accidents), economics and exclusion of future uses. If this assessment reveals that adequate information is not available to determine the likely effects of the proposed disposal option, then this option shall not be considered further. In addition, if the interpretation of the comparative assessment shows the disposal option to be less preferable, a permit for disposal at sea shall not be given.
15. Each assessment shall conclude with a statement supporting a decision to issue or refuse a permit for disposal at sea.
16. Monitoring is used to verify that permit conditions are met (compliance monitoring) and that the assumptions made during the permit review and site selection process were correct and sufficient to protect human health and the environment (field monitoring). It is essential that such monitoring programs have clearly defined objectives.
17. A decision to issue a permit shall only be made if all impact evaluations are completed, and where reasonably possible, the monitoring requirements are determined. The provisions of the permit shall ensure, as far as practicable, that environmental disturbance and detriment are minimized and the benefits maximized. Any permit issued shall contain data and information specifying
 1. (a) the types and sources of materials to be disposed of;
 2. (b) the location of the disposal site;
 3. (c) the method of disposal; and
 4. (d) monitoring and reporting requirements.
18. Disposal sites shall be reviewed at regular intervals, taking into account the results of monitoring and the objectives of monitoring programs. Review of monitoring results will indicate whether field programs need to be continued, revised or terminated, and will contribute to informed decisions regarding the continuance, modification or closure of disposal sites. This provides an important feedback mechanism for the protection of human health and the marine environment.

Table of Provisions

AN ACT RESPECTING POLLUTION PREVENTION AND THE PROTECTION OF THE ENVIRONMENT AND HUMAN HEALTH IN ORDER TO CONTRIBUTE TO SUSTAINABLE DEVELOPMENT.

SHORT TITLE

1. Short title

ADMINISTRATIVE DUTIES

2. Duties of the Government of Canada

INTERPRETATION

3. Definitions
4. Aboriginal rights

HER MAJESTY

5. Binding on Her Majesty

PART 1

ADMINISTRATION

Advisory Committees

6. National Advisory Committee
7. Ministerial advisory committees
8. Report of various committees

Agreements Respecting Administration

9. Negotiation of agreement

Agreements Respecting Equivalent Provisions

10. Non-application of regulations

PART 2

PUBLIC PARTICIPATION

Interpretation

11. Definition of "environmental protection action"

Environmental Registry

12. Establishment of Environmental Registry
13. Contents of Environmental Registry
14. Protection from civil proceeding or prosecution

Rights under Other Parts

15. Additional rights

Voluntary Reports

16. Voluntary reports

Investigation of Offences

17. Application for investigation by Minister
18. Investigation by Minister

19. Progress reports
20. Minister may send evidence to Attorney General of Canada
21. Discontinuation of investigation

Environmental Protection Action

22. Circumstances when an individual may bring an action
23. Limitation period of two years
24. No action for remedial conduct
25. Exception
26. Notice of the action
27. Attorney General to be served
28. Other participants
29. Burden of proof
30. Defences
31. Undertakings to pay damages
32. Stay or dismissal
33. Remedies
34. Orders to negotiate plans
35. Restriction on orders to negotiate plans
36. Settlement or discontinuance
37. Settlements and orders
38. Costs

Action to Prevent or Compensate Loss

39. Injunction
40. Civil cause of action

Other Matters

41. Evidence of offence
42. Civil remedies not affected

PART 3

INFORMATION GATHERING, OBJECTIVES, GUIDELINES AND CODES OF PRACTICE

Interpretation

43. Definitions

Environmental Data and Research

44. Monitoring, research and publication
45. Role of Minister of Health

Information Gathering

46. Notice requiring information
47. Guidelines
48. National inventory
49. Publication in whole or in part
50. Publication of inventory
51. Request for confidentiality
52. Reasons
53. Additional justification

Objectives, Guidelines and Codes of Practice

54. Formulation by the Minister
55. Formulation by the Minister of Health

PART 4

POLLUTION PREVENTION

Pollution Prevention Plans

56. Requirement for pollution prevention plans
57. Plan prepared or implemented for another purpose
58. Declaration of preparation
59. Requirement to keep plan
60. Requirement to submit certain plans

Model Plans and Guidelines

61. Model plans
62. Guidelines

Other Initiatives

63. Information clearing-house

PART 5 CONTROLLING TOXIC SUBSTANCES

Interpretation

64. Toxic substances
65. Definition of "virtual elimination"
 - 65.1 Definition of "level of quantification"

General

66. Domestic Substances List
67. Regulation of criteria
68. Research, investigation and evaluation
69. Formulation of guidelines by the Ministers

Information Gathering

70. Notice to the Minister
71. Notice requiring information, samples or testing
72. Exercise of power under paragraph 71(1)(c)

Priority Substances and Other Substances

73. Categorization of substances on Domestic Substances List
74. Screening level risk assessment
75. Definition of "jurisdiction"
76. Priority Substances List
 - 76.1 Weight of evidence and precautionary principle
77. Publication after assessment
78. Notice of objection
79. Plans required for virtual elimination

Substances and Activities New to Canada

80. Definitions
81. Manufacture or import of substances
82. Prohibition of activity
83. Assessment of information
84. Action to be taken after assessment
85. Significant new activity
86. Notification of persons required to comply
87. Amendment of Lists
88. Publication of masked name
89. Regulations

Regulation of Toxic Substances

90. Addition to List of Toxic Substances

- 91. Publication of proposed regulation or instrument
- 92. Publication of preventive or control actions
 - 92.1 Regulations
- 93. Regulations
- 94. Interim orders

Release of Toxic Substances

- 95. Report and remedial measures
- 96. Voluntary report
- 97. Regulations
- 98. Recovery of reasonable costs and expenses by Her Majesty
- 99. Remedial measures

Export of Substances

- 100. Export Control List
- 101. Notice to Minister
- 102. Regulations respecting exports
- 103. Publication of exports

PART 6

ANIMATE PRODUCTS OF BIOTECHNOLOGY

- 104. Definitions
- 105. Adding living organisms to Domestic Substances List
- 106. Manufacture or import of living organisms
- 107. Prohibition of activity
- 108. Assessment of information
- 109. Action to be taken after assessment
- 110. Significant new activity
- 111. Notification of persons required to comply
- 112. Amendment of List
- 113. Publication of masked name
- 114. Regulations
- 115. Other regulations

PART 7

CONTROLLING POLLUTION AND MANAGING WASTES

Division 1

Nutrients

- 116. Definitions
- 117. Prohibition
- 118. Regulations

Mr. Gilbert Bushati
Drinking Water Officer
Office of Drinking Water
Manitoba Water Stewardship
1007 Century Street
Winnipeg, Manitoba
R3H 0W4

Dear Mr. Bushati:

**RE: LEAD LOOP SYSTEM ANNUAL SUMMARY REPORT
FOR THE CITY OF WINNIPEG WATER SUPPLY SYSTEM FOR 2010**

Please find attached the Lead Loop System Summary Report for 2010 for the Winnipeg water supply system for your review and records.

As per Section 4.13, Table 2. of the operating licence, we are submitting the required annual lead summary report for the City of Winnipeg water supply system. This is in accordance with the reporting requirements established by the Office of Drinking Water provided in writing on March 1, 2010 by your office. We are waiting for additional direction from your office regarding the protocol for the submission therefore to meet the March 1 reporting requirement we are submitting the five minute flushed lead concentration results from the lead loop system. We are requesting approval or further direction in writing from your office.

Please let me know of any concerns or questions respecting this submission. I may be reached at the below address, by telephone at 986-4807 or by e-mail at kkjartanson@winnipeg.ca.

Thanks for your ongoing cooperation and understanding in this matter.

Yours sincerely,

Environment Canada Programs

× NPRI - National Pollutant Release Inventory

Would you like to notify NPRI that the facility does not meet the reporting criteria?

No

Number of Employees:

70

Activities for Which the 20,000-Hour Employee Threshold Does Not Apply

× Discharge of treated or untreated wastewater ($\geq 10,000$ m³/day)

Activities Relevant to Reporting Dioxins, Furans and Hexachlorobenzene

× None of the above

Activities Relevant to Reporting of Polycyclic Aromatic Hydrocarbons (PAHs)

Wood preservation using creosote.

No

Is the facility required to report on disposals of tailings and waste rock for the selected reporting period?

No

Is this the first time the facility is reporting to the NPRI (under current or past ownership)?

No

Is the facility controlled by another Canadian company or companies?

No

Did the facility report under other environmental regulations or permits?

Yes

Is the facility required to report one or more NPRI Part 4 substances (Criteria Air Contaminants)?

Yes

Facility Substance List

Type	Status	CAS Number	Substance Name	Application Programs
Report	Submitted	NA - 16	Ammonia (total)	
Report	Submitted	NA - 02	Arsenic (and its compounds)	
Report	Submitted	NA - 03	Cadmium (and its compounds)	
Report	Submitted	NA - 06	Copper (and its compounds)	
Report	Submitted	NA - 08	Lead (and its compounds)	
Report	Submitted	NA - 10	Mercury (and its compounds)	
Report	Submitted	NA - 17	Nitrate ion in solution at pH \geq 6.0	
Report	Submitted	NA - 22	Phosphorus (total)	
Report	Submitted	NA - M09	PM10 - Particulate Matter \leq 10 Microns	
Report	Submitted	NA - M10	PM2.5 - Particulate Matter \leq 2.5 Microns	
Report	Submitted	NA - 14	Zinc (and its compounds)	

NA - 02 Arsenic (and its compounds)

Select Applicable Programs for Substance

Please select all of the programs that this facility is reporting this substance to.

NPRI

Does this substance meet the criteria specified in the Canada Gazette notice? Selecting "No" indicates voluntary reporting of this substance to the NPRI.

Yes

General Information

On-site Releases to the Environment

The substance was released on-site.

Disposals and Off-site Transfers for Recycling

The substance was disposed of (on-site or off-site), or transferred for treatment prior to final disposal.

Nature of Activities

Manufacture the Substance

Process the Substance

Otherwise Use of the Substance

As a by-product

On-site Releases of the Substance

Releases to Water Bodies

	Basis of Estimate	Detail Code	Quantity (kg)
Direct Discharges	M3 Source Testing		150.6310

Quantity	Water Body Name	Province	Water Shed Id
150.6310	Red River	Manitoba	

Total - Releases to Water Bodies (kg) 150.6310

Total Quantity (All Media) 150.6310

Breakdown of Annual Releases

By Percentage in Each Quarter (must equal 100%)

Jan - Mar 23.00%

Apr - Jun 25.00%

Oct - Dec 23.00%

Reasons for Changes in Quantities Released from Previous Year

Select the applicable reason or reasons.

Other (specify in On-site Releases comment field)

Comments? (On-site Releases)

Although the volume of effluent released increased slightly in 2010 from 2009 (+3.6%), the concentration of arsenic decreased significantly (-22%), leading to a decrease in the total quantity of arsenic released (-19%).

Disposals and Transfers of the Substance

Reasons Why Substance Was Disposed

Pollution abatement residues

Reasons for Changes in Quantities Disposed from Previous Year

Select the applicable reason or reasons.

No significant change (i.e. < 10%) or no change

Comments? (Disposals)

In 2010, 48% of the City's Biosolids production was recycled onto farmland and 52% was sent to landfill.

Disposals (excluding Tailings and Waste Rock)

Off-site Disposal

	Basis of Estimate	Detail Code	Quantity (kg)
Landfill	M3 Source Testing		28.0870

Quantity	Company Name	Province	City	Address Line 1
28.0870	Brady Rd. Landfill Site		Winnipeg	

Land Treatment	M3 Source Testing			26.2630
----------------	-------------------	--	--	---------

Quantity	Company Name	Province	City	Address Line 1
26.2630	Municipality of Rosser		Rosser	

Total - Off-site Disposals (kg) 54.3500

Reasons for Changes in Quantities Disposed from Previous Year

Select the applicable reason or reasons.

No significant change (i.e. < 10%) or no change

Comments? (Disposals)

In 2010, 48% of the City's Biosolids production was recycled onto farmland and 52% was sent to landfill.

Recycling of the Substance

Reasons Why Substance Was Recycled

Environment Canada Programs

× NPRI - National Pollutant Release Inventory

Would you like to notify NPRI that the facility does not meet the reporting criteria?

No

Number of Employees:

20

Activities for Which the 20,000-Hour Employee Threshold Does Not Apply

× Discharge of treated or untreated wastewater ($\geq 10,000$ m³/day)

Activities Relevant to Reporting Dioxins, Furans and Hexachlorobenzene

× None of the above

Activities Relevant to Reporting of Polycyclic Aromatic Hydrocarbons (PAHs)

Wood preservation using creosote.

No

Is the facility required to report on disposals of tailings and waste rock for the selected reporting period?

No

Is this the first time the facility is reporting to the NPRI (under current or past ownership)?

No

Is the facility controlled by another Canadian company or companies?

No

Did the facility report under other environmental regulations or permits?

Yes

Is the facility required to report one or more NPRI Part 4 substances (Criteria Air Contaminants)?

No

Facility Substance List

Type	Status	CAS Number	Substance Name	Application Programs

Reasons for Changes in Quantities Released from Previous Year

Select the applicable reason or reasons.

Other (specify in On-site Releases comment field)

Comments? (On-site Releases)

There was a significant decrease in the quantity of cadmium released in 2010 from 2009. In 2010, contract lab data was used instead of our own data to calculate the quantity of cadmium released because the contract lab has a better detection limit, resulting in a more accurate estimate.

Environment Canada Programs

× NPRI - National Pollutant Release Inventory

Would you like to notify NPRI that the facility does not meet the reporting criteria?

No

Number of Employees:

10

Activities for Which the 20,000-Hour Employee Threshold Does Not Apply

× Discharge of treated or untreated wastewater ($\geq 10,000$ m³/day)

Activities Relevant to Reporting Dioxins, Furans and Hexachlorobenzene

× None of the above

Activities Relevant to Reporting of Polycyclic Aromatic Hydrocarbons (PAHs)

Wood preservation using creosote.

No

Is the facility required to report on disposals of tailings and waste rock for the selected reporting period?

No

Is this the first time the facility is reporting to the NPRI (under current or past ownership)?

No

Is the facility controlled by another Canadian company or companies?

No

Did the facility report under other environmental regulations or permits?

Yes

Is the facility required to report one or more NPRI Part 4 substances (Criteria Air Contaminants)?

No

Facility Substance List

Type	Status	CAS Number	Substance Name	Application Programs
Report	Submitted	NA - 16	Ammonia (total)	
Removed	IP	NA - 03	Cadmium (and its compounds)	
Removed	IP	NA - 08	Lead (and its compounds)	
Report	Submitted	NA - 17	Nitrate ion in solution at pH \geq 6.0	
Report	Submitted	NA - 22	Phosphorus (total)	

NA - 03 Cadmium (and its compounds)

Removal of a Previously Reported Substance

NA - 08 Lead (and its compounds)

Removal of a Previously Reported Substance

NA - 16 Ammonia (total)

Select Applicable Programs for Substance

Please select all of the programs that this facility is reporting this substance to.

NPRI

Does this substance meet the criteria specified in the Canada Gazette notice? Selecting "No" indicates voluntary reporting of this substance to the NPRI.

Yes

General Information

On-site Releases to the Environment

The substance was released on-site.

Disposals and Off-site Transfers for Recycling

The substance was disposed of (on-site or off-site), or transferred for treatment prior to final disposal.

Nature of Activities

Manufacture the Substance

Process the Substance

Otherwise Use of the Substance

As a by-product

On-site Releases of the Substance

Releases to Air

	Basis of Estimate	Detail Code	Quantity (tonnes)
Stack or Point Releases	E2 Published Emission Factors		25.5210
Total - Releases to Air (tonnes)			25.5210
Total Quantity (All Media)			54.3080

On-site Releases of the Substance

Releases to Water Bodies

	Basis of Estimate	Detail Code	Quantity (tonnes)
Direct Discharges	M3 Source Testing		28.7870

Quantity	Water Body Name	Province	Water Shed Id
28.7870	Assiniboine River	Manitoba	

Total - Releases to Water Bodies (tonnes) 28.7870

Total Quantity (All Media) 54.3080

Breakdown of Annual Releases

By Percentage in Each Quarter (must equal 100%)

Jan - Mar	40.00%
Apr - Jun	17.00%
Jul - Sep	4.00%
Oct - Dec	39.00%

Reasons for Changes in Quantities Released from Previous Year

Select the applicable reason or reasons.

Other (specify in On-site Releases comment field)

Comments? (On-site Releases)

The volume of effluent increased by 4.7% in 2010 from 2009, and the concentration of ammonia in the effluent increased by 22%, leading to an increase in the quantity of ammonia released by 16%.

Disposals and Transfers of the Substance

Reasons Why Substance Was Disposed

- x Pollution abatement residues

Reasons for Changes in Quantities Disposed from Previous Year

Select the applicable reason or reasons.

- x No significant change (i.e. < 10%) or no change

Comments? (Disposals)

Disposal of ammonia is included in the NEWPCC results.

Reasons for Changes in Quantities Recycled from Previous Year

Select the applicable reason or reasons.

- x No significant change (i.e. < 10%) or no change

NA - 17 Nitrate ion in solution at pH >= 6.0

Select Applicable Programs for Substance

Please select all of the programs that this facility is reporting this substance to.

NPRI

Environment Canada Programs

NPRI - National Pollutant Release Inventory

Would you like to notify NPRI that the facility does not meet the reporting criteria?

No

Number of Employees:

90

Activities for Which the 20,000-Hour Employee Threshold Does Not Apply

None of the above

Activities Relevant to Reporting Dioxins, Furans and Hexachlorobenzene

None of the above

Activities Relevant to Reporting of Polycyclic Aromatic Hydrocarbons (PAHs)

Wood preservation using creosote.

No

Is the facility required to report on disposals of tailings and waste rock for the selected reporting period?

No

Is this the first time the facility is reporting to the NPRI (under current or past ownership)?

No

Is the facility controlled by another Canadian company or companies?

No

Did the facility report under other environmental regulations or permits?

No

Is the facility required to report one or more NPRI Part 4 substances (Criteria Air Contaminants)?

No

Facility Substance List

Type	Status	CAS Number	Substance Name	Application Programs
Report	Submitted	NA - 16	Ammonia (total)	
Removed	IP	NA - 03	Cadmium (and its compounds)	
Removed	IP	NA - 22	Phosphorus (total)	

NA - 03 Cadmium (and its compounds)

Removal of a Previously Reported Substance

NA - 22 Phosphorus (total)

Removal of a Previously Reported Substance

NA - 16 Ammonia (total)

Select Applicable Programs for Substance

Please select all of the programs that this facility is reporting this substance to.

NPRI

Does this substance meet the criteria specified in the Canada Gazette notice? Selecting "No" indicates voluntary reporting of this substance to the NPRI.

Yes

General Information

On-site Releases to the Environment

The substance was released on-site.

Disposals and Off-site Transfers for Recycling

Nature of Activities

Manufacture the Substance

Process the Substance

Otherwise Use of the Substance

As a by-product

On-site Releases of the Substance

Releases to Air

	Basis of Estimate	Detail Code	Quantity (tonnes)
Spills	E2 Published Emission Factors		3.3810
Total - Releases to Air (tonnes)			3.3810
Total Quantity (All Media)			40.0380

On-site Releases of the Substance

Releases to Water Bodies

	Basis of Estimate	Detail Code	Quantity (tonnes)
Direct Discharges	E2 Published Emission Factors		36.6570

Quantity	Water Body Name	Province	Water Shed Id
9.1640	Assiniboine River	Manitoba	
Quantity	Water Body Name	Province	Water Shed Id
27.4930	Red River	Manitoba	

Total - Releases to Water Bodies (tonnes) 36.6570

Total Quantity (All Media) 40.0380

Breakdown of Annual Releases

By Percentage in Each Quarter (must equal 100%)

Jan - Mar	0%
Apr - Jun	50%
Jul - Sep	50%
Oct - Dec	0%

Reasons for Changes in Quantities Released from Previous Year

Select the applicable reason or reasons.

Other (specify in On-site Releases comment field)

Comments? (On-site Releases)

Although the concentration of ammonia only increased by 1.7% in 2010 from 2009, combined sewer overflows increased to an estimated volume of 1414 megaliters in 2010 from an estimated volume of 1145 megaliters in 2009. This led to an increase in the quantity of ammonia released by 24%.

Reasons for Changes in Quantities Disposed from Previous Year

Select the applicable reason or reasons.

No significant change (i.e. < 10%) or no change

Reasons for Changes in Quantities Recycled from Previous Year

Select the applicable reason or reasons.

No significant change (i.e. < 10%) or no change

Pollution Prevention Report

Pollution Prevention Section

Pollution Prevention Plans

Does the facility have a documented facility-wide pollution prevention plan?

No

a) Please check all that apply:

b) Did the facility update their plan in the current reporting year?

No

c) Does the plan address substances, energy conservation, or water conservation?

If "Yes":

Pollution Prevention Plan Comments:

Pollution Prevention Activities

Did the facility complete any pollution prevention activities in the current NPRI reporting year?

No

Selecting "Yes" will initiate the reporting of the specific pollution prevention activities that were completed in the current reporting year on the following screen.

Dear Mr. Bushati:

**RE: TOTAL TRIHALOMETHANE SUMMARY REPORT
FOR THE CITY OF WINNIPEG WATER SUPPLY SYSTEM FOR QUARTER 4 - 2010**

Please find attached the Total Trihalomethane Summary Report for the fourth quarter of 2010 for the Winnipeg water supply system for your review and records.

Please let me know of any concerns or questions respecting this submission. I may be reached at the below address, by telephone at 986-4807 or by e-mail at kkjartanson@winnipeg.ca.

Thanks for your ongoing cooperation and understanding in this matter.

Yours sincerely,

× GHGRP - Environment Canada's GHG Emissions Reporting Program

If greenhouse gas data was submitted last year to Environment Canada's GHG Emissions Reporting Program, you are required to notify Environment Canada, by June 17th, if the facility does not meet the reporting criteria for the current year. Would you like to notify Environment Canada that the facility does not meet the reporting criteria?

No

If you do not meet the reporting criteria, would you like to submit a voluntary report to GHGRP?

No

Section A - GHG Emissions

Report the direct greenhouse gas emissions for this facility for the period identified above.

This section collects information on carbon dioxide (CO₂), methane (CH₄) and nitrous oxide (N₂O) emissions.

- (1) An entry is required for the total emissions for each gas type and emission category.
 - (a) Enter the appropriate quantity in tonnes (You may enter up to 8 digits in front of the decimal and up to 4 digits after the decimal point).
 - (b) For quantities less than one tonne, you must enter a leading zero before the decimal point.
 - (c) Enter a "0" (zero) if the emissions for the gas type were calculated and the result was zero.
 - (d) Select "N/A" (Not Applicable) if the emissions for the gas type are not present at the facility or the emissions are not estimated due to lack of data.
- (2) Indicate the method(s) used to calculate the emissions reported (Check all that apply).

MDM = Monitoring or Direct Measurement

MB = Mass Balance

EF = Emission Factors

EE = Engineering Estimates

- (3) You must press "Calculate" in order to calculate the quantity in tonnes of carbon dioxide equivalent (CO₂e).

Stationary Fuel Combustion Emissions

CAS Number	Substance Name	N/A	Tonnes	MD M	MB	EF	EE	Tonnes (in CO ₂ e)

--------------	--

Section B - GHG Emissions

Report the direct greenhouse gas emissions for this facility for the period identified above.

This section collects information on carbon dioxide (CO₂) emissions from biomass combustion.

Please note:

- Emissions of CH₄ and N₂O from biomass combustion are to be reported in Section A (under the appropriate category).
- CO₂ emissions from biomass combustion are not included in the totals reported to Environment Canada.

Biomass Combustion Emissions

CAS Number	Substance Name	N/A	Tonnes	MD M	MB	EF	EE	Tonnes (in CO ₂ e)
124-38-9	Carbon dioxide (CO ₂)	x		r	r	r	r	
Total								

Section C - GHG Emissions

Report the direct greenhouse gas emissions for this facility for the period identified above.

This section collects information on hydrofluorocarbon (HFC), perfluorocarbon (PFC) and sulphur hexafluoride (SF6) emissions.

Please note:

- Report HFC, PFC and SF6 emissions from industrial processes and industrial product use only.
- HFC and PFC emissions are reported by species.

Hydrofluorocarbon (HFC) Emissions

CAS Number	Substance Name	N/A	Tonnes	MD M	MB	EF	EE	Tonnes (in CO2e)
75-46-7	HFC-23 (CHF3)	x		r	r	r	r

Hydrofluorocarbons (HFCs)		
Perfluorocarbons (PFCs)		
Sulphur Hexafluoride (SF6)		
Facility Total reported to Environment Canada:		<hr/> 366,738.0000
CO2 emission from biomass combustion		

Section E - Comments

This section is optional.

- Enter any comments you wish to include related to the information you have reported.
- Comments provided are not published.
- You may provide additional comments related to the reported GHG emissions data to better explain your information. (e.g. justification of any large changes in emissions from the previous year.)
- If you are a reporter in Alberta, you must include any additional EPEA approval numbers to which the submitting facility is subject to. You may also use this comment field to provide information referred to in Section 6 of the Specified Gas Reporting Standard - Additional Specified Gas Emissions Information (e.g. emission intensity, indirect emissions, further details of emission calculations methods, etc.)
- Enter your company or facility website if you wish to provide more information. (e.g. contextual information on environmental activities, etc.)

Comments: (max 4000 characters)

Website:

Section F - Confidentiality Request

The 2010 Gazette Notice indicated that the Minister of the Environment intends to publish 2010 GHG emission totals by gas, by facility.

Under the Canadian Environmental Protection Act, 1999 (CEPA 1999) and the Alberta Climate Change and Emissions Management Act, you can request that part or all of the information that you have provided in this report be treated as confidential. You must provide appropriate justification to support this request (see "? Help" for more information).

Are you requesting confidentiality of this report under CEPA 1999?

No

If yes, you must submit a written request to Environment Canada with your report submission that includes:

- identification of the information that you wish to keep confidential
- appropriate justification and supporting documentation

Environment Canada will be in contact with you regarding your request.

Please mail your request to:

Section B - GHG Emissions

Report the direct greenhouse gas emissions for this facility for the period identified above.

This section collects information on carbon dioxide (CO₂) emissions from biomass combustion.

Please note:

- Emissions of CH₄ and N₂O from biomass combustion are to be reported in Section A (under the appropriate category).
- CO₂ emissions from biomass combustion are not included in the totals reported to Environment Canada.

Biomass Combustion Emissions

CAS Number	Substance Name	N/A	Tonnes	MD M	MB	EF	EE	Tonnes (in CO ₂ e)
124-38-9	Carbon dioxide (CO ₂)	x		r	r	r	r	
Total								

Section C - GHG Emissions

Report the direct greenhouse gas emissions for this facility for the period identified above.

This section collects information on hydrofluorocarbon (HFC), perfluorocarbon (PFC) and sulphur hexafluoride (SF6) emissions.

Please note:

- Report HFC, PFC and SF6 emissions from industrial processes and industrial product use only.
- HFC and PFC emissions are reported by species.

Hydrofluorocarbon (HFC) Emissions

CAS Number	Substance Name	N/A	Tonnes	MD M	MB	EF	EE	Tonnes (in CO2e)
75-46-7	HFC-23 (CHF3)	x		r	r	r	r

Perfluorocarbons (PFCs)		
Sulphur Hexafluoride (SF6)		
Facility Total reported to Environment Canada:		<hr/> 63,846.0000
CO2 emission from biomass combustion		

Section E - Comments

This section is optional.

- Enter any comments you wish to include related to the information you have reported.
- Comments provided are not published.
- You may provide additional comments related to the reported GHG emissions data to better explain your information. (e.g. justification of any large changes in emissions from the previous year.)
- If you are a reporter in Alberta, you must include any additional EPEA approval numbers to which the submitting facility is subject to. You may also use this comment field to provide information referred to in Section 6 of the Specified Gas Reporting Standard - Additional Specified Gas Emissions Information (e.g. emission intensity, indirect emissions, further details of emission calculations methods, etc.)
- Enter your company or facility website if you wish to provide more information. (e.g. contextual information on environmental activities, etc.)

Comments: (max 4000 characters)

Section F - Confidentiality Request

The 2010 Gazette Notice indicated that the Minister of the Environment intends to publish 2010 GHG emission totals by gas, by facility.

Under the Canadian Environmental Protection Act, 1999 (CEPA 1999) and the Alberta Climate Change and Emissions Management Act, you can request that part or all of the information that you have provided in this report be treated as confidential. You must provide appropriate justification to support this request (see "? Help" for more information).

Are you requesting confidentiality of this report under CEPA 1999?

No

If yes, you must submit a written request to Environment Canada with your report submission that includes:

- identification of the information that you wish to keep confidential
- appropriate justification and supporting documentation

Environment Canada will be in contact with you regarding your request.

Please mail your request to:

Select Reporting Options

× GHGRP - Environment Canada's GHG Emissions Reporting Program

If greenhouse gas data was submitted last year to Environment Canada's GHG Emissions Reporting Program, you are required to notify Environment Canada, by June 17th, if the facility does not meet the reporting criteria for the current year. Would you like to notify Environment Canada that the facility does not meet the reporting criteria?

No

If you do not meet the reporting criteria, would you like to submit a voluntary report to GHGRP?

No

Section A - GHG Emissions

Report the direct greenhouse gas emissions for this facility for the period identified above.

This section collects information on carbon dioxide (CO₂), methane (CH₄) and nitrous oxide (N₂O) emissions.

- (1) An entry is required for the total emissions for each gas type and emission category.
 - (a) Enter the appropriate quantity in tonnes (You may enter up to 8 digits in front of the decimal and up to 4 digits after the decimal point).
 - (b) For quantities less than one tonne, you must enter a leading zero before the decimal point.
 - (c) Enter a "0" (zero) if the emissions for the gas type were calculated and the result was zero.
 - (d) Select "N/A" (Not Applicable) if the emissions for the gas type are not present at the facility or the emissions are not estimated due to lack of data.
- (2) Indicate the method(s) used to calculate the emissions reported (Check all that apply).

MDM = Monitoring or Direct Measurement

MB = Mass Balance

EF = Emission Factors

EE = Engineering Estimates

- (3) You must press "Calculate" in order to calculate the quantity in tonnes of carbon dioxide equivalent (CO₂e).

ANNUAL REPORT

**CITY OF WINNIPEG
WATER SUPPLY SYSTEM**

Water and Waste Department • Service des eaux et des déchets

March 25, 2011

Our File: 040-18-18-55-00

Ms. Kim Philip, P.Eng.
Office of Drinking Water
Manitoba Water Stewardship
1007 Century Street
Winnipeg, Manitoba
R3H 0W4

Dear Ms. Philip:

RE: 2010 ANNUAL REPORT - CITY OF WINNIPEG WATER SUPPLY SYSTEM

Please find enclosed the 2010 Annual Report for the City of Winnipeg Water Supply System in accordance with Operating Licence PWS-09-412RR Section 5.11 and the Drinking Water Safety Act, Manitoba Regulation 40/2007, Section 32.

This annual report covers the following requirements described in Section 32 of the Drinking Water Safety Act. The content is noted below:

1. Changes to the annual report.

On July 1, 2010 the City of Winnipeg was issued a revised Public Drinking Water System Operating Licence to reflect the commissioning of the Water Treatment Plant in December 2009. Several sample locations and reports have changed to further comply with the requirements of the revised licence.

2. "Section 32(2)(a) a brief description of the drinking water system, including its water supply source."

Provided therein.

3. "Section 32(2)(b) a description of the disinfection methods used."

Provided therein.

4. "Section 32(2)(c) a list of all bacteriological, chemical, physical and microbial drinking water quality standards that apply to the water system."

The test results are provided in Appendix A.

5. "Section 32(2)(d) a summary of any incidents of failure to meet a drinking water quality standard, and a description of corrective action."

Included in this report is a table that summarizes all the occasions where test results did not meet the guideline and a description of the corrective actions taken in 2010.

Embrace the spirit • Vivez l'esprit

Environmental Standards Division • Division des normes environnementales
2230 Main Street • 2230, Rue Main • Winnipeg • Manitoba R2V 4T8
tel/tél. (204) 986-4684 • fax/télec. (204) 339-2147 • www.winnipeg.ca

6. "Section 32(2)(e) a summary of the information contained in the records made under Section 31."

Monthly compliance reports are provided in Appendix B.

7. "Section 32(2)(f) a description of any drinking water safety orders issued."

No drinking water safety orders were issued to the City of Winnipeg in 2010.

8. "Section 32(2)(g) a description of any boil water advisories issued."

No boil water advisories were issued to the City of Winnipeg in 2010.

9. "Section 32(2)(h) a summary of any charges laid, pending or disposed of for an offence."

No charges were laid, pending or disposed of for any offences against the City of Winnipeg in 2010.

10. "Section 32(2)(i) a description of any major expenses incurred to repair, replace or install equipment."

Provided therein.

11. "Section 32(2)(j) any other information or description of any other activities."

The City of Winnipeg does not have any additional information to be submitted.

In accordance with Section 5.13 of the Operating Licence and Section 34 of the Drinking Water Safety Act, a copy of this annual report will be posted on the departmental website as soon as practicable.

As per the monitoring requirements set out in Table 2 of the City of Winnipeg's operating licence, turbidity, free and total chlorine, UV and corrective action compliance reports are being submitted on an ongoing monthly basis. Bacteriological reports and chlorine residual results are sent directly to your office by the analytical laboratory that does the bacteriological testing of samples.

Please let me know of any concerns or questions respecting this submission. I may be reached at the above address, by telephone at 986-4807 or by e-mail at kkjartanson@winnipeg.ca.

Thanks for your ongoing cooperation and understanding in this matter.

Yours sincerely,

Original Signed by K. Kjartanson

LIST OF TABLES

Table 1	Drinking Water Parameters.....	4
Table 2	Occasions of a Result not Meeting a Water Quality Standard and Corrective Action Taken	5

CHANGES TO THE ANNUAL REPORT

On July 1, 2010 the City of Winnipeg was issued a revised Public Drinking Water System Operating Licence to reflect the commissioning of the Water Treatment Plant in December 2009. As of July 1, 2010, results from the Water Treatment Plant Deacon Booster Pumping Station are being used for the monthly online and grab chlorine reports. Turbidity reports have also changed as of July 1, 2010. Results from the Water Treatment Plant raw water and the Water Treatment Plant filters are being used in the monthly online and grab turbidity reports.

DRINKING WATER SYSTEM AND SOURCE

“Section 32(2)(a) a brief description of the drinking water system, including its water supply source.”

The City of Winnipeg gets its water from Shoal Lake, which is on the border between Manitoba and Ontario, and covers 277 square kilometres. The intake for Winnipeg’s water system is on Indian Bay on the western end of Shoal Lake, and is only accessible by rail or boat. Water flows from Shoal Lake to Winnipeg by gravity through a 135 kilometre long aqueduct. The water is stored in Deacon Reservoir, a large reservoir that can hold 8.8 billion litres, enough water to supply Winnipeg for about 20 days. Water passes from Deacon Reservoir to a Drinking Water Treatment Plant, and then on to three smaller reservoirs and pumping stations in different areas of the city. Each day, an average of 206 million litres of water is delivered to approximately 190,000 accounts in Winnipeg.

DISINFECTION METHODS

“Section 32(2)(b) a description of the disinfection methods used.”

The first step in the disinfection process used to involve full time chlorination at the Intake. On March 17, 2010, the process was changed to periodic chlorination of 8 hours per week at the Intake. At the Water Treatment Plant, the water passes through several disinfection treatment steps including ozonation, chlorination and UV light disinfection. Finally, the water is chlorinated again at the pumping stations before being distributed to homes and businesses.

DRINKING WATER PARAMETERS

“Section 32(2)(c) a list of all bacteriological, chemical, physical and microbial drinking water quality standards that apply to the water system.”

Winnipeg water is intensively monitored on a routine basis to ensure that the water is safe and that regulatory requirements are met. Table 1 provides a list of all the parameters analysed. The results of most of these tests are found in Appendix A. We measure how water quality changes from source to tap and the quality of water delivered to customers with these tests. We also respond to customer inquiries and complaints about water quality.

**OCCASIONS OF A RESULT NOT MEETING A WATER QUALITY STANDARD AND
CORRECTIVE ACTION TAKEN**

“Section 32(2)(d) a summary of any incidents of failure to meet a drinking water quality standard, and a description of corrective action.”

Because water quality is so important, our level of monitoring and sampling exceeds regulatory requirements. The City of Winnipeg ensures that a high quality of water is delivered to customers and actions are taken to continuously improve water quality.

Table 2 includes all occasions of a result not meeting a water quality standard and corrective action taken in 2010.

2010 Annual Report
City of Winnipeg Water Supply System

Table 1. Drinking Water Parameters

Analyses Conducted by City of Winnipeg	Analyses Conducted by Contract Labs
Parameter	Parameter
Plankton Count	Giardia
Chlorophyll a	Cryptosporidium
Threshold Odour Number	Total Coliform
pH	Esherichia Coli
Turbidity	Heterotrophic Plate Count
Fluoride	Taste and Odour Compounds
Apparent Colour	- IPMP
Total Solids	- IBMP
Total Dissolved Solids	- MIB
Total Alkalinity	- 246TCA
Total Hardness	- 236TCA
Specific Conductance	- Geosmin
Total Organic Carbon	- 345TCV
Soluble Organic Carbon	Microcystin LR
Free Chlorine	Mercury
Total Chlorine	NDMA
Temperature	MTBE
UV Transmissivity	Total Kjeldahl Nitrogen
Toxicity	Total Phosphorus
Dissolved Oxygen	Dissolved Reactive Phosphorus
Transparency	True Colour
Zebra Mussels	Total Inorganic Carbon
Trihalomethanes (Total)	Ammonia (Dissolved)
Bromodichloromethane	Barium
Haloacetic Acids	Beryllium
Aldehydes	Bismuth
Nitrate Nitrogen	Cesium
Soluble Phosphate	Cobalt
Chloride	Lithium
Sulfate	Molybdenum
Aluminum	Selenium
Antimony	Silicon
Arsenic	Silver
Boron	Strontium
Calcium	Tellurium
Cadmium	Thallium
Chromium	Thorium
Copper	Tin
Iron	Titanium
Lead	Vanadium
Magnesium	Rubidium
Manganese	Tungsten
Nickel	Volatile Organic Carbons
Potassium	Polychlorinated Biphenyls
Sodium	Organochlorine Pesticides
Uranium	Pesticides
Zinc	Herbicides
Zirconium	

2010 Annual Report
City of Winnipeg Water Supply System

Table 2. Occasions of a Result not Meeting a Water Quality Standard and Corrective Action Taken

Date	Location	Type of result not meeting a water quality standard	Initial test result	Description of corrective actions taken
Jan 19, 2010	Church Ave. & Sheppard St.	Total coliform >1 MPNU/100mL	1	All locations were re-sampled until two consecutive negative results were found.
Feb 9, 2010	Church Ave. & Sheppard St.	Total coliform >1 MPNU/100mL	1	
Feb 9, 2010	St. Mary's Rd. & Blenheim Ave.	Total coliform >1 MPNU/100mL	1	
Feb 23, 2010	Edison Ave. & Rothesay St.	Total coliform >1 MPNU/100mL	1	
Feb 23, 2010	Freedman Dr. & Maclean Cres.	Total coliform >1 MPNU/100mL	1	
May 11, 2010	Hamilton Ave. & Buchanan Blvd.	Total coliform >1 MPNU/100mL	1	
Jun 8, 2010	Kenaston Blvd. & Scurfield Ave.	Total coliform >1 MPNU/100mL	1	
Jun 8, 2010	St. Mary's Rd. & Coniston Ave.	Total coliform >1 MPNU/100mL	2	
Jun 22, 2010	Kildare Ave. & McMeans St.	Total coliform >1 MPNU/100mL	1	
Jun 28, 2010	Church Ave. & Sheppard St.	Total coliform >1 MPNU/100mL	1	
Jul 13, 2010	Roblin Blvd. & Harstone Rd.	Total coliform >1 MPNU/100mL	1	
Aug 3, 2010	Nairn Ave. & Stapleton St.	Total coliform >1 MPNU/100mL	1	
Aug 30, 2010	Church Ave. & Sheppard St.	Total coliform >1 MPNU/100mL	1	
Aug 30, 2010	Redwood Ave. & McGregor St.	Total coliform >1 MPNU/100mL	1	
Nov 15, 2010	Pembina Hwy. & Thatcher Dr.	Total coliform >1 MPNU/100mL	1	
Nov 29, 2010	Nairn Ave. & Stapleton St.	Total coliform >1 MPNU/100mL	8	
Jun 11, 2010	Hurst Pumping Station	Free chlorine residual <0.50 mg/L	0.48	Locations were resampled. Chlorine set points were adjusted to ensure that the target level of disinfection was met.
Sep 23, 2010	Deacon Booster Pumping Station Branch 2	Free chlorine residual <0.50 mg/L	0.49	
Jan 25, 2010	Portage Ave. & Mandeville St.	Free chlorine residual <0.10 mg/L	0.04	All locations were re-sampled and/or alternate locations were sampled, and/or other actions were taken (such as adjusting watermain valves).
Jun 29, 2010	Kildare Ave. & McMeans St.	Free chlorine residual <0.10 mg/L	0.06	
Jun 29, 2010	South Dr. - St. John's Ravenscourt	Free chlorine residual <0.10 mg/L	0.05	
Jul 12, 2010	Kildare Ave. & McMeans St.	Free chlorine residual <0.10 mg/L	0.09	
Jul 12, 2010	South Dr. - St. John's Ravenscourt	Free chlorine residual <0.10 mg/L	0.07	
Jul 19, 2010	Kildare Ave. & McMeans St.	Free chlorine residual <0.10 mg/L	0.08	
Jul 19, 2010	South Dr. - St. John's Ravenscourt	Free chlorine residual <0.10 mg/L	0.02	
Jul 19, 2010	Oakwood Ave. & Eccles St.	Free chlorine residual <0.10 mg/L	0.08	
Jul 27, 2010	Kildare Ave. & McMeans St.	Free chlorine residual <0.10 mg/L	0.07	
Jul 27, 2010	South Dr. - St. John's Ravenscourt	Free chlorine residual <0.10 mg/L	0.08	
Jul 27, 2010	Main St. & Hartford Ave.	Free chlorine residual <0.10 mg/L	0.05	Chlorine set points were adjusted to ensure that the target level of disinfection was met.
Aug 3, 2010	Kildare Ave. & McMeans St.	Free chlorine residual <0.10 mg/L	0.05	
Aug 3, 2010	South Dr. - St. John's Ravenscourt	Free chlorine residual <0.10 mg/L	0.07	
Aug 17, 2010	Kildare Ave. & McMeans St.	Free chlorine residual <0.10 mg/L	0.05	
Aug 17, 2010	South Dr. - St. John's Ravenscourt	Free chlorine residual <0.10 mg/L	0.08	
Aug 24, 2010	Kildare Ave. & McMeans St.	Free chlorine residual <0.10 mg/L	0.08	
Aug 24, 2010	South Dr. - St. John's Ravenscourt	Free chlorine residual <0.10 mg/L	0.05	

2010 Annual Report
City of Winnipeg Water Supply System

Table 2. Occasions of a Result not Meeting a Water Quality Standard and Corrective Action Taken

Date	Location	Type of result not meeting a water quality standard	Initial test result	Description of corrective actions taken
Aug 30, 2010	Kildare Ave. & McMeans St.	Free chlorine residual <0.10 mg/L	0.09	City of Winnipeg ERP was enacted and followed.
Aug 30, 2010	South Dr. - St. John's Ravenscourt	Free chlorine residual <0.10 mg/L	0.06	
Sep 7, 2010	South Dr. - St. John's Ravenscourt	Free chlorine residual <0.10 mg/L	0.06	
Sep 13, 2010	South Dr. - St. John's Ravenscourt	Free chlorine residual <0.10 mg/L	0.08	
*Jun 2, 2010	Water Treatment Plant – Ferric Chloride Pipe	Ferric Chloride leak of 130 litres	n/a	
*Jul 27, 2010	McPhillips Pumping Station	Discoloured water delivered to customers	n/a	

*Although corrective action reports were submitted for these incidents, they were not occasions of a result not meeting a water quality standard.

MAJOR EXPENSES

“Section 32(2)(i) a description of any major expenses incurred to repair, replace or install equipment.”

1. The Branch I Aqueduct Valve Chamber at Logan Avenue and Yeomans Street was replaced.
2. A valve chamber super structure was constructed at the Branch II Aqueduct and Interconnector location.
3. The second existing natural gas engine drive for water pumping at the MacLean Pump Station was replaced with a new engine.
4. Water main renewals were completed at 42 locations in the City’s water distribution system.

APPENDIX A
WATER QUALITY SUMMARY REPORTS

City of Winnipeg
Environmental Standards Division
2010 Shoal Lake Water Quality Summary

PARAMETER	UNITS	GUIDELINES FOR CANADIAN DRINKING WATER QUALITY	AVERAGE	MINIMUM	MAXIMUM	COMMENTS
Odour	<i>units</i>	Inoffensive	112	50	200	Raw water - guideline does not apply
Geosmin	<i>parts per trillion</i>	no guideline	4.4	<0.5	9.2	Common taste and odour compound

Drinking Water Quality Summary

PARAMETER	UNITS	GUIDELINES FOR CANADIAN DRINKING WATER QUALITY	AVERAGE	MINIMUM	MAXIMUM	COMMENTS
Odour	<i>units</i>	Inoffensive	41	25	70	Meets the guideline
Geosmin***	<i>parts per trillion</i>	no guideline	<0.7	<0.5	0.8	Common taste and odour compound
IPMP - 2-isopropyl-3-methoxypyrazine***	<i>parts per trillion</i>	no guideline	<0.5	<0.5	<0.5	Common taste and odour compound
IBMP - 2-isobutyl-3-methoxypyrazine***	<i>parts per trillion</i>	no guideline	<0.5	<0.5	<0.5	Common taste and odour compound
MIB - 2-methylisoborneol***	<i>parts per trillion</i>	no guideline	<1.3	<0.5	<2.0	Common taste and odour compound
246 TCA - 2,4,6-trichloroanisole***	<i>parts per trillion</i>	no guideline	<0.8	<0.5	<2.0	Common taste and odour compound
236 TCA - 2,3,6-trichloroanisole***	<i>parts per trillion</i>	no guideline	<0.7	<0.5	<2.0	Common taste and odour compound
345 TCV - 3,4,5-trichloroveratrole***	<i>parts per trillion</i>	no guideline	<0.5	<0.5	<0.5	Common taste and odour compound
MTBE - methyl tertiary-butyl ether***	<i>parts per million</i>	no more than 0.015	<0.0005	<0.0005	<0.0005	Meets the guideline
NDMA - N-nitrosodimethylamine***	<i>parts per billion</i>	under review	0.0031	0.0011	0.0050	Guideline under review by Health Canada
Plankton (algae) count	<i>cells/mL</i>	no guideline	<100	<100	300	Algae contribute to odours and may cause filter clogging
Chlorophyll-a**	<i>parts per billion</i>	no guideline	<1	<1	1	Chlorophyll is found in algae
Microcystin LR***	<i>parts per billion</i>	no more than 1.5	<0.2	<0.2	<0.2	Meets the guideline
Turbidity (clearness)	<i>NTU</i>	no more than 1	0.19	0.08	0.36	Meets the guideline
Colour, Apparent	<i>ACU</i>	no guideline	2.5	2.5	2.5	-
Colour, True	<i>TCU</i>	no more than 15	2.5	2.5	2.5	Meets the guideline
Total Solids	<i>parts per million</i>	no guideline	184	142	264	-
Total Dissolved Solids	<i>parts per million</i>	no more than 500	169	121	211	Meets the guideline
Conductivity	<i>microsiemens per centimetre</i>	no guideline	303	273	321	Another measure of dissolved solids
pH	<i>units</i>	between 6.5 and 8.5	7.90	7.40	8.33	Meets the guideline
Temperature	<i>degrees Celcius</i>	no more than 15	10.0	0.1	22.5	Does not always meet the guideline
Total Alkalinity	<i>parts per million as calcium carbonate</i>	no guideline	69	61	74	-
Total Hardness	<i>parts per million as calcium carbonate</i>	between 80 and 100	77	70	84	80 to 100 parts per million is recommended
Total Organic Carbon	<i>parts per million</i>	no guideline	4	2	20	-
Dissolved Organic Carbon	<i>parts per million</i>	no guideline	4	2	19	-
Total Inorganic Carbon*	<i>parts per million</i>	no guideline	14.1	8.8	16.6	-
Total Phosphorus***	<i>parts per million</i>	no guideline	<0.20	<0.20	<0.20	Phosphorus can contribute to algae growth
Ammonia Dissolved*	<i>parts per million</i>	no guideline	0.020	<0.010	<0.050	-
Nitrate Nitrogen*	<i>parts per million</i>	no more than 10	0.028	0.012	0.052	Meets the guideline
Chloride	<i>parts per million</i>	no more than 250	21	16	27	Meets the guideline
Sulfate	<i>parts per million</i>	no more than 500	44	19	59	Meets the guideline
UV Transmittance (Filtered)	<i>percent transmissivity</i>	no guideline	95.2	79.4	97.1	-
UV Transmittance (Unfiltered)	<i>percent transmissivity</i>	no guideline	94.0	78.0	96.6	-
Chlorine (free)	<i>parts per million</i>	no guideline	1.06	0.58	1.65	-
Chlorine (total)	<i>parts per million</i>	no guideline	1.24	0.70	1.91	-
Trihalomethanes	<i>parts per billion</i>	no more than 100	36	5	81	Meets the guideline
Bromodichloromethane	<i>parts per billion</i>	no more than 16	4	<0.5	8	Meets the guideline
Haloacetic acids	<i>parts per billion</i>	no more than 80	17	<5	43	Meets the guideline
Aldehydes	<i>parts per billion</i>	no guideline	18	9	28	-

Guidelines from 'Summary of Guidelines for Canadian Drinking Water Quality' by Health Canada, revised February 1, 2011

¹Fluoride was added in accordance with the Provincial Fluoridation Program guideline to reach an optimal concentration of 0.85 parts per million.

*Data reported was collected from Maclean, Hurst, and McPhillips Pumping Station Discharge

**Data reported was collected from McPhillips Pumping Station Discharge

***Provincial Monitoring results were reported instead of our own results because our detection limit is higher than the guideline

City of Winnipeg
Environmental Standards Division
2010 Winnipeg Distribution System Water Quality Summary

PARAMETER	GUIDELINE	OUR TEST RESULTS	COMMENTS
Number of total coliform bacteria tests in year	1820 samples	2,962	More testing than required by the guideline/provincial regulation
Number of times that total coliform bacteria show up in a test	no more than 10% of samples with positive total coliform or no consecutive positives from the same site.	0.4% (12 positive tests)	All resamples were negative and met the guideline/provincial regulation
Number of Escherichia coli bacteria tests in year	1820 samples	2,962	More testing than required by the guideline/provincial regulation
Number of times that Escherichia coli bacteria show up in a test	no bacteria present in the sample	0.0% (no positive tests)	All samples were negative and met the guideline/provincial regulation
Number of heterotrophic (bacteria) plate count (HPC) tests done	no guideline	2,962	Heterotrophic plate count is not required under the new provincial regulations.

Guidelines from 'Summary of Guidelines for Canadian Drinking Water Quality' by Health Canada, revised February 1, 2011

APPENDIX B
COMPLIANCE SUBMISSION REPORTS

2010 Monthly Chlorine Reports

From January to June 2010, grab free and total chlorine reports were submitted for Maclean, Hurst and McPhillips Pumping Stations. Online total chlorine reports were submitted for Maclean, Hurst and McPhillips Pumping Stations.

For July and August 2010, grab free and total chlorine reports were submitted for Deacon Booster Pumping Station Branch 2. Online free chlorine reports were submitted for Deacon Booster Pumping Station Branch 1 and Branch 2.

From September to December 2010, grab free and total chlorine reports were submitted for Deacon Booster Pumping Station Branch 1 and Branch 2. Online free chlorine reports were submitted for Deacon Booster Pumping Station Branch 1 and Branch 2.

2010 Monthly Turbidity Reports

For January 2010, a grab turbidity report was submitted for Deacon Outlet Cell 3 and Maclean, Hurst and McPhillips Pumping Stations.

From February to June 2010, grab turbidity reports were submitted for the Water Treatment Plant raw water and Maclean, Hurst and McPhillips Pumping Stations.

Online turbidity reports were submitted for the Water Treatment Plant raw water.

From July to December 2010, grab and online turbidity reports were submitted for the Water Treatment Plant raw water and the Water Treatment Plant filters.

MONTHLY TURBIDITY REPORT

January 2010

Location (Deacon Outlet)	Date	Sple No.	Turbidity (NTU)
Deacon Prechlorination Cell 3	4-Jan-10	247140	0.44
Deacon Prechlorination Cell 3	6-Jan-10	247650	0.59
Deacon Prechlorination Cell 3	8-Jan-10	247709	0.44
Deacon Prechlorination Cell 3	11-Jan-10	247715	0.44
Deacon Prechlorination Cell 3	13-Jan-10	248279	0.39
Deacon Prechlorination Cell 3	15-Jan-10	248355	0.37
Deacon Prechlorination Cell 3	19-Jan-10	248384	0.37
Deacon Prechlorination Cell 3	22-Jan-10	248975	0.43
Deacon Prechlorination Cell 3	25-Jan-10	248981	0.43
Deacon Prechlorination Cell 3	27-Jan-10	249489	0.38
Deacon Prechlorination Cell 3	29-Jan-10	249618	0.37

Deacon Outlet Monthly Statistics	Average	0.42
	Minimum	0.37
	Maximum	0.59

Location (Pumping Station)	Date	Sple No.	Turbidity (NTU)
Maclean Station Discharge	4-Jan-10	247148	0.15
Hurst Station Discharge	4-Jan-10	247149	0.15
McPhillips Station Discharge	4-Jan-10	247150	0.13
Maclean Station Discharge	11-Jan-10	247723	0.16
Hurst Station Discharge	11-Jan-10	247724	0.15
McPhillips Station Discharge	11-Jan-10	247725	0.14
Maclean Station Discharge	19-Jan-10	248392	0.15
Hurst Station Discharge	19-Jan-10	248393	0.16
McPhillips Station Discharge	19-Jan-10	248394	0.16
Maclean Station Discharge	25-Jan-10	248989	0.15
Hurst Station Discharge	25-Jan-10	248990	0.15
McPhillips Station Discharge	25-Jan-10	248991	0.15

Comments: The above results were all obtained from grab samples. There were no continuous flow turbidity meter results because the meter was producing non-representative results.

2010 Monthly UV Monitoring Reports

From January to December 2010, the UV reports contain online data for each of the 6 reactors with the exception of UVT.

From January to August 2010, the UVT results are from grab samples collected from Deacon Booster Pumping Station Branch 2.

For September and October 2010, the UVT results are from grab samples collected from the Clearwell.

For November and December 2010, the UVT results are an average of the grab sample results collected from Deacon Booster Pumping Station Branch 1 and Branch 2.

UV Summary Report - Monthly

Water System Code: **252.00**
License Number: **PWS-09-412**

Report Period: **January 2010**

UV Monitoring Report - Monthly

Water System Code: **252.00**
License Number: **PWS-09-412**

Reactor: **UVR-D600A**
Report Period: **January 2010**

Date	Transmittance	UV Dose			Reactor Flow			Average UV Lamp Intensity									UV Lamp Status									% Volume Treated to Validated Conditions	Daily Totals			
	%	mJ/cm2			MLD			W/m2									Hours										Water Volume [ML]

Report Created: **Monday, April 12, 2010**

Total [ML]: **0.09 0.00 1551.68 1551.77**

Water Volume - Untreated **0.0 %**
Water Volume - Below Dose **0.0 %**
Water Volume - To Dose **100.0 %**

- Notes:
1. UV Comparative Dose: 18.1 mJ/cm2
 2. %UVT values determined via lab sample
 3. NR - No Result
 4. NA - Not Analyzed
 5. OL - Off Line

Report Created: **Monday, April 19, 2010**

Total [ML]: **0.01 0.02 1054.12 1054.15**

Water Volume [%]:

Untreated **0.0 %**
Below Dose **0.0 %**
To Dose **100.0 %**

- Notes:**
1. UV Comparative Dose: 18.1 mJ/cm2
 2. %UVT values determined via lab sample
 3. NR - No Result
 4. NA - Not Analyzed
 5. OL - Off Line

Water System Code: **252.00**
License Number: **PWS-09-412**

Reactor: **UVR-500A**
Report Period: **February 2010**

Report Created: **Wednesday, April 07, 2010**

Total [ML]: **0.00 0.00 316.65 316.65**

Water Volume - Untreated **0.0 %**
Water Volume - Below Dose **0.0 %**
Water Volume - To Dose **100.0 %**

- Notes:
1. UV Comparative Dose: 18.1 mJ/cm2
 2. %UVT values determined via lab sample
 3. NR - No Result
 4. NA - Not Analyzed
 5. OL - Off Line

Water System Code: **252.00**
License Number: **PWS-09-412**

Reactor: **UVR-D600A**
Report Period: **March 2010**

Report Created: **Wednesday, April 07, 2010**

Total [ML]: **0.20 0.00 2228.51 2228.71**

Water Volume - Untreated **0.0 %**
Water Volume - Below Dose **0.0 %**
Water Volume - To Dose **100.0 %**

- Notes:
1. UV Comparative Dose: 18.1 mJ/cm2
 2. %UVT values determined via lab sample
 3. NR - No Result
 4. NA - Not Analyzed
 5. OL - Off Line

UV Summary Report - Monthly

Report Created: **Monday, May 03, 2010**

Total [ML]: **0.00 0.20 848.41 848.61**

Water Volume [%]:
 Untreated **0.0 %**
 Below Dose **0.0 %**
 To Dose **100.0 %**

- Notes:**
- UV Comparative Dose: 18.1 mJ/cm2
 - %UVT values determined via grab sample
 - NR - No Result - (Lamp hours unavailable April 16th through April 30th due to WTP SCADA Historian Upgrade Work)
 - NA - Not Analyzed
 - OL - Off Line

Water System Code: **252.00**
License Number: **PWS-09-412**

Reactor: **UVR-600A**
Report Period: **April 2010**

Report Created: **Tuesday, June 01, 2010**

Total [ML]: **0.00 0.29 854.35 854.64**

Water Volume [%]:

Untreated **0.0 %**
Below Dose **0.0 %**
To Dose **100.0 %**

- Notes:**
- UV Comparative Dose: 18.1 mJ/cm2
 - %UVT values determined via grab sample
 - NR - No Result - (Lamp hours unavailable May 1 through May 3 due to WTP SCADA Historian Upgrade Work)
 - NA - Not Analyzed
 - OL - Off Line

Water System Code: **252.00**
License Number: **PWS-09-412 R**

Report Period: **June 2010**

Report Created: **Friday, July 02, 2010**

Total [ML]: **0.00 0.00 1361.81 1361.81**

Water Volume [%]:

Untreated **0.0 %**
Below Dose **0.0 %**
To Dose **100.0 %**

- Notes:**
1. UV Comparative Dose: 18.1 mJ/cm2
 2. %UVT values determined via grab sample
 3. NR - No Result (%UVT - June 9, 2010 - due to unrepresentative sample)
 4. NA - Not Analyzed
 5. OL - Off Line

UV Monitoring Report - Monthly

Water System Code: **252.00**
License Number: **PWS-09-412 R**

Reactor: **UVR-500A**
Report Period: **June 2010**

Report Created: **Thursday, July 22, 2010**

Water Volume - Untreated **0.0%**
 Water Volume - Below Dose **0.1%**
 Water Volume - To Dose **99.9%**

Notes: 1. UV Comparative Dose: 18.1 mj/cm2

Water System Code: **252.00**
License Number: **PWS-09-412 R**

Reactor: **UVR-100A**
Report Period: **July 2010**

Report Created: **Tuesday, August 03, 2010**

Total [ML]: **0.08 1.01 1552.92 1554.01**

Water Volume [%]:

Untreated **0.0 %**
Below Dose **0.1 %**
To Dose **99.9 %**

- Notes:**
1. UV Comparative Dose: 18.1 mJ/cm2
 2. %UVT values determined via grab sample
 3. NR - No Result
 4. NA - Not Analyzed
 5. OL - Off Line

Water System Code: **252.00**
License Number: **PWS-09-412 R**

Report Period: **August 2010**

Report Created: **Wednesday, September 01, 2010**

Total [ML]: **0.01 0.00 1307.19 1307.20**

Water Volume [%]:

Untreated **0.0 %**
Below Dose **0.0 %**
To Dose **100.0 %**

- Notes:**
1. UV Comparative Dose: 18.1 mJ/cm2
 2. %UVT values determined via grab sample
 3. NR - No Result
 4. NA - Not Analyzed
 5. OL - Off Line

UV Monitoring Report - Monthly

Water System Code: **252.00**
License Number: **PWS-09-412 R**

Reactor: **UVR-400A**
Report Period: **August 2010**

Report Created: **Wednesday, September 01, 2010**

Total [ML]: 0.06 0.27 679.15 679.48

Water Volume [%]:

Untreated **0.0 %**
Below Dose **0.0 %**
To Dose **100.0 %**

- Notes:**
1. UV Comparative Dose: 18.1 mJ/cm2
 2. %UVT values determined via grab sample
 3. NR - No Result
 4. NA - Not Analyzed
 5. OL - Off Line

Report Created: **Friday, October 01, 2010** Total [ML]: **0.00 0.41 1254.40 1254.81**

Water Volume [%]:
Untreated **0.0 %**
Below Dose **0.0 %**
To Dose **100.0 %**

- Notes:**
1. UV Comparative Dose: 18.1 mJ/cm2
 2. %UVT values determined via grab sample
 3. NR - No Result
 4. NA - Not Analyzed
 5. OL - Off Line

Water System Code: **252.00**
License Number: **PWS-09-412 R**

Reactor: **UVR-200A**
Report Period: **September 2010**

Report Created: Monday, November 01, 2010

Total [ML]: 0.13 0.00 987.87 988.00

Water Volume [%]:

Untreated 0.0 %
Below Dose 0.0 %
To Dose 100.0 %

- Notes:**
1. UV Comparative Dose: 18.1 mJ/cm2
 2. %UVT values determined via grab sample
 3. NR - No Result
 4. NA - Not Analyzed
 5. OL - Off Line
 6. UV Transmittance grab samples taken from the Clearwell

Water System Code: 252.00
License Number: PWS-09-412 R

Reactor: UVR-500A
Report Period: October 2010

Report Created: **Tuesday, January 04, 2011**

Total [ML]: 0.07 0.72 380.19 380.97

Water Volume [%]:

Untreated **0.1 %**
Below Dose **0.1 %**
To Dose **99.9 %**

Notes:

1. UV Comparative Dose: 18.1 mJ/cm²
2. %UVT values determined via grab sample
3. NR - No Result
4. NA - Not Analyzed
5. OL - Off Line
6. UV Transmittance values determined via grab samples (average of Branch 1 & 2).

Friday, January 22, 2010

Our Incident/Report Number: 1-2010

Mr. Scott Davies, C.E.T
Drinking Water Officer
Manitoba Water Stewardship, Office of Drinking Water
1007 Century Street
Winnipeg MB R3H 0W4

RE: CORRECTIVE ACTION REPORT

WATER SYSTEM	Winnipeg Public Water System
WATER SYSTEM CODE	252.00
LOCATION OF NON-COMPLIANT INCIDENT	Winnipeg 3-Dist NW07
OPERATOR IN CHARGE	NA
INCIDENT REPORTED BY	Steve Fletcher, Supervisor of Analytical Services Branch
TYPE OF NON-COMPLIANT INCIDENT	Low positive total coliform (<10 CFU/100mL), 3 MR 41/2007
INCIDENT DATE	Tuesday, Jan 19 2010
INITIAL RESULTS	1 MPN/100 mL
TEST RESULTS AFTER CORRECTIVE ACTIONS	0 MPN/100 mL
DESCRIPTION OF CORRECTIVE ACTION TAKEN	Resampled location as soon as possible. Also tested for turbidity, free/total chlorine, and temperature. Contacted the ODW.

EMERGENCY REPORTING IS REQUIRED WHERE A POTENTIAL HEALTH RISK IS INVOLVED. FOLLOW THE INSTRUCTIONS OF YOUR DRINKING WATER OFFICER ON SITUATIONS REQUIRING IMMEDIATE REPORTING

DISTRIBUTION

FORWARD THE ORIGINAL TO THE DRINKING WATER OFFICER WITH THE MONTHLY DISINFECTION OR TURBIDITY MONITORING REPORT.

Contact the Drinking Water Officer for any comments, questions or concern:

RE: CORRECTIVE ACTION REPORT

WATER SYSTEM	Winnipeg Public Water System
WATER SYSTEM CODE	252.00
LOCATION OF NON-COMPLIANT INCIDENT	Winnipeg 3-Dist WC10
OPERATOR IN CHARGE	NA
INCIDENT REPORTED BY	Steve Fletcher, Supervisor of Analytical Services Branch
TYPE OF NON-COMPLIANT INCIDENT	Low disinfection residual in the distribution system, 22(1) MR 40/2007
INCIDENT DATE	Monday, Jan 25 2010
INITIAL RESULTS	Free chlorine=0.04 mg/L, Total chlorine=0.21 mg/L
TEST RESULTS AFTER CORRECTIVE ACTIONS	Free chlorine=0.26 mg/L, Total chlorine=0.41 mg/L
DESCRIPTION OF CORRECTIVE ACTION TAKEN	Immediately re-sampled at an adjacent location, Deer Lodge Centre 2109 Portage Ave. @ Mandeville St. Based on the results of the immediate re-sample, no further action was taken.

EMERGENCY REPORTING IS REQUIRED WHERE A POTENTIAL HEALTH RISK IS INVOLVED. FOLLOW THE INSTRUCTIONS OF YOUR DRINKING WATER OFFICER ON SITUATIONS REQUIRING IMMEDIATE REPORTING

DISTRIBUTION

CORRECTIVE ACTION REPORT

WATER SYSTEM: City of Winnipeg WATER SYSTEM CODE: 252.00

LOCATION OF NON-COMPLIANCE INCIDENT (ex. Water Plant): Train 2 Ferric Chloride Solution Pipe

OPERATOR: Raimo Perhonen Signature: Original signed by: R. Perhonen

TYPE OF NON-COMPLIANCE INCIDENT:

<input type="checkbox"/>	Low disinfectant residual entering the distribution system, 21(1) MR 40/2007
<input type="checkbox"/>	Low disinfectant residual in the distribution system, 22 MR 40/2007
<input type="checkbox"/>	Filtered water turbidity exceeding the turbidity standard, 6(1) MR 41/2007
<input type="checkbox"/>	Low positive total coliform (<10 CFU/100mL), 3 MR 41/2007
<input checked="" type="checkbox"/>	Other

INITIAL TEST RESULTS: DATE: June 2, 2010

DESCRIPTION OF CORRECTIVE ACTIONS TAKEN (attach additional sheets if required):

At approximately 11:40, June 2, 2010; a leak on Train 2 Ferric Chloride solution pipe in the DAF pipe gallery was observed by plant staff and reported. At 12:00 the plant was taken off line and water flow to the City stopped. The source of the leak was a stainless steel plug that had eroded from contact with Ferric Chloride. The plug was replaced and the line pressure tested. Treated water to the City resumed after 4 hours. City of Winnipeg ERPs were enacted and followed- Manitoba Conservation notified; Ferric Chloride neutralized and disposed; area cleaned. The plant was placed back into service at approximately 4:30 pm on June 2. An estimated 130 litres of Ferric Chloride was leaked.

TEST RESULTS AFTER CORRECTIVE ACTIONS: DATE: _____
(attach laboratory results if applicable)

EMERGENCY REPORTING IS REQUIRED WHERE A POTENTIAL HEALTH RISK IS INVOLVED. FOLLOW THE INSTRUCTIONS OF YOUR DRINKING WATER OFFICER ON SITUATIONS REQUIRING IMMEDIATE REPORTING.

DISTRIBUTION:

FORWARD THE ORIGINAL TO YOUR DRINKING WATER OFFICER WITH YOUR MONTHLY DISINFECTION OR TURBIDITY MONITORING REPORT

CORRECTIVE ACTION REPORT

WATER SYSTEM: City of Winnipeg WATER SYSTEM CODE: 252.00

LOCATION OF NON-COMPLIANCE INCIDENT (ex. Water Plant): Hurst Pumping Station

OPERATOR: Jennifer Buckmaster Signature: Original signed by: J. Buckmaster

TYPE OF NON-COMPLIANCE INCIDENT:

- | | |
|-------------------------------------|--|
| <input checked="" type="checkbox"/> | Low disinfectant residual entering the distribution system, 21(1) MR 40/2007 |
| <input type="checkbox"/> | Low disinfectant residual in the distribution system, 22 MR 40/2007 |
| <input type="checkbox"/> | Filtered water turbidity exceeding the turbidity standard, 6(1) MR 41/2007 |
| <input type="checkbox"/> | Low positive total coliform (<10 CFU/100mL), 3 MR 41/2007 |
| <input type="checkbox"/> | Other |

INITIAL TEST RESULTS:

0.48 mg/L

DATE: June 11, 2010

DESCRIPTION OF CORRECTIVE ACTIONS TAKEN (attach additional sheets if required):

Initial free chlorine sample was low at 0.48 mg/L. This number was an initial recording and written down. A re-sample was done with a higher free residual but was not recorded. This was an operator error. Unfortunately, there is no way to track our free chlorine reading on our SCADA system. I contacted the lab to see what their results for that day were, but they did not sample on that day.

TEST RESULTS AFTER CORRECTIVE ACTIONS:

0.57 mg/L

DATE: June 12, 2010

(attach laboratory results if applicable)

EMERGENCY REPORTING IS REQUIRED WHERE A POTENTIAL HEALTH RISK IS INVOLVED. FOLLOW THE INSTRUCTIONS OF YOUR DRINKING WATER OFFICER ON SITUATIONS REQUIRING IMMEDIATE REPORTING.

DISTRIBUTION:

FORWARD THE ORIGINAL TO YOUR DRINKING WATER OFFICER WITH YOUR MONTHLY DISINFECTION OR TURBIDITY MONITORING REPORT

CORRECTIVE ACTION REPORT

WATER SYSTEM City of Winnipeg – Water and Waste Department

WATER SYSTEM CODE: 252.00

LOCATION OF NON-COMPLIANCE INCIDENT (ex. Water Plant): McPhillips Pumping Station

OPERATOR: Operator-In-Charge Doug Sulymka

Signature: _____

TYPE OF NON-COMPLIANCE INCIDENT:

- Low disinfectant residual entering the distribution system, 21(1) MR 40/2007
- Low disinfectant residual in the distribution system, 22 MR 40/2007
- Filtered water turbidity exceeding the turbidity standard, 6(1) MR 41/2007
- Low positive total coliform (<10 CFU/100mL), 3 MR 41/2007
- Other: Particulate in water delivered to some customers

INITIAL TEST RESULTS:

See attachment

DATE: July 27, 2010 from 16:50 - 17:52 shutdown

DESCRIPTION OF CORRECTIVE ACTIONS TAKEN (attach additional sheets if required):

McPhillips Pumping Station was shut down July 27, 2010 from 16:50 to 17:52 due to a chlorine alarm. The non-routine shutdown likely resulted in flow reversals in the local distribution system which may have suspended particulates into water delivered to some customers. Standby Operators responded to the alarm at McPhillips Pumping Station and found only a very small amount of chlorine escaped when switching to another chlorine tonner. Probable root cause of the chlorine release was either a small leak from the chlorinator suction side of the vacuum hose or lead gasket imperfections on the empty chlorine tonner. Immediate corrective actions were as follows.

(1) Take the McPhillips chlorinator out of service. (2) Replace the chlorine injector. (3) Replace the chlorinator suction hose. (4) Inspect and test the chlorine regulator. (5) Thoroughly inspect and service/repair, if required, all chlorine system components. (6) Inspect chlorine systems at MacLean and Hurst Pumping Stations for similar issues. Long-term corrective action is ongoing monitoring of all pumping station chlorine systems. In response to ODW concerns, select monitoring was conducted in the McPhillips service area on July 29. As is noted in the attached table of results, water quality had returned to near normal and bacti results were negative.

TEST RESULTS AFTER CORRECTIVE ACTIONS:

See attachment

DATE: August 5, 2010

(attach laboratory results if applicable)

EMERGENCY REPORTING IS REQUIRED WHERE A POTENTIAL HEALTH RISK IS INVOLVED. FOLLOW THE INSTRUCTIONS OF YOUR DRINKING WATER OFFICER ON SITUATIONS REQUIRING IMMEDIATE REPORTING.

DISTRIBUTION:

Winnipeg MB R3H 0W4

RE: CORRECTIVE ACTION REPORT

WATER SYSTEM	Winnipeg Public Water System
WATER SYSTEM CODE	252.00
LOCATION OF NON-COMPLIANT INCIDENT	Winnipeg 3-Dist SW13/NE09
OPERATOR IN CHARGE	NA
INCIDENT REPORTED BY	Steve Fletcher, Supervisor of Analytical Services Branch
TYPE OF NON-COMPLIANT INCIDENT	Low disinfection residual in the distribution system, 22(1) MR 40/2007
INCIDENT DATE	Tuesday, August 03, 2010
DESCRIPTION OF CORRECTIVE ACTIONS	For NE-09: Resample original location as well as several locations upstream/downstream and in the spatial area. Recommended an inspection of distribution system watermain valves as well as flushing of watermains within the immediate area of NE-09. For SW13: Continued investigating for a more suitable location for chlorine residual monitoring. It is believed that the low residual readings in this area are a result of water age from relatively low water use throughout this area.
TEST RESULTS	See Attached

NOTES/COMMENTS:

1. All microbiological tests performed by contract laboratory.
2. UP/DOWN STREAM testing performed when EC is >0 /100mL, TC is >10 /100mL or when resample/consecutive sample is positive for EC or TC or as directed by the Manager of Environmental Standards Division or the Office of Drinking Water
3. INITIAL chlorine, turbidity and temperature only tested at the required 39 sample locations.
4. NR-No Result due to laboratory/analyst error.

EMERGENCY REPORTING IS REQUIRED WHERE A POTENTIAL HEALTH RISK IS INVOLVED. FOLLOW THE INSTRUCTIONS OF YOUR DRINKING WATER OFFICER ON SITUATIONS REQUIRING IMMEDIATE REPORTING

RE: CORRECTIVE ACTION REPORT

WATER SYSTEM	Winnipeg Public Water System
WATER SYSTEM CODE	252.00
LOCATION OF NON-COMPLIANT INCIDENT	Winnipeg 3-Dist NE06
OPERATOR IN CHARGE	NA
INCIDENT REPORTED BY	Steve Fletcher, Supervisor of Analytical Services Branch
TYPE OF NON-COMPLIANT INCIDENT	Low positive Total Coliform (<10 CFU/100mL), 3 MR 41/2007
INCIDENT DATE	Tuesday, August 3, 2010
DESCRIPTION OF CORRECTIVE ACTIONS	AS SOON AS POSSIBLE: Re-sampled original location, also tested for turbidity, free/total chlorine, temperature and contacted the ODW.
TEST RESULTS	See Attached

NOTES/COMMENTS:

1. All microbiological tests performed by contract laboratory.
2. UP/DOWN STREAM testing performed when EC is >0 /100mL, TC is >10 /100mL or when resample/consecutive sample is positive for EC or TC or as directed by the Manager of Environmental Standards Division or the Office of Drinking Water
3. INITIAL chlorine, turbidity and temperature only tested at the required 39 sample locations.
4. NR-No Result due to laboratory/analyst error.

EMERGENCY REPORTING IS REQUIRED WHERE A POTENTIAL HEALTH RISK IS INVOLVED. FOLLOW THE INSTRUCTIONS OF YOUR DRINKING WATER OFFICER ON SITUATIONS REQUIRING IMMEDIATE REPORTING

DISTRIBUTION

FORWARD THE ORIGINAL TO THE DRINKING WATER OFFICER WITH THE MONTHLY COMPLIANCE SUBMISSIONS.

CORRECTIVE ACTION REPORT

WATER SYSTEM City of Winnipeg WATER SYSTEM CODE: 252.00

LOCATION OF NON-COMPLIANCE INCIDENT (ex. Water Plant): Deacons Booster Pumping Station

OPERATOR: Raimo Perhonen Signature: Original signed by: Raimo Perhonen

TYPE OF NON-COMPLIANCE INCIDENT:

- Low disinfectant residual entering the distribution system, 21(1) MR 40/2007
- Low disinfectant residual in the distribution system, 22 MR 40/2007
- Filtered water turbidity exceeding the turbidity standard, 6(1) MR 41/2007
- Low positive total coliform (<10 CFU/100mL), 3 MR 41/2007
- Other

INITIAL TEST RESULTS:

0.50 mg/L

DATE: September 23/2010 @ 0150

DESCRIPTION OF CORRECTIVE ACTIONS TAKEN (attach additional sheets if required):

Branch 1 and 2 chlorine analyzers dropped below 0.50 mg/L free chlorine residual. At approximately 0130 branch 2 analyzer showed a free chlorine residual of 0.49 mg/L, verification testing using a hand held hach test kit yielded a free chlorine 0.50 mg/L, while analyzer reading showed 0.49 mg/L. Therefore, chlorine set point was increased from 0.85 mg/L to 1.00 mg/L, later increased to a final set point of 1.15 mg/L. Branch 1 and 2 free chlorine residuals returned to above 0.50 mg/L at approximately 0348, with change in chlorine set point, process lag and process volumes required time to witness the increased residual at Deacons pumping station. Trending shows the minimum chlorine residual at anytime was 0.39 mg/L branch 2.

TEST RESULTS AFTER CORRECTIVE ACTIONS:

0.52 mg/L

DATE: September 23/2010 @ 0355

(attach laboratory results if applicable)

Approved By Operator-In-Charge: Original signed by: G. Method

EMERGENCY REPORTING IS REQUIRED WHERE A POTENTIAL HEALTH RISK IS INVOLVED. FOLLOW THE INSTRUCTIONS OF YOUR DRINKING WATER OFFICER ON SITUATIONS REQUIRING IMMEDIATE REPORTING.

RE: CORRECTIVE ACTION REPORT

WATER SYSTEM	Winnipeg Public Water System
WATER SYSTEM CODE	252.00
LOCATION OF NON-COMPLIANT INCIDENT	Winnipeg 3-Dist SW13
OPERATOR IN CHARGE	NA
INCIDENT REPORTED BY	Steve Fletcher, Supervisor of Analytical Services Branch
TYPE OF NON-COMPLIANT INCIDENT	Low disinfection residual in the distribution system, 22(1) MR 40/2007
INCIDENT DATE	Monday, September 13, 2010
DESCRIPTION OF CORRECTIVE ACTIONS	Ongoing initial testing of a suitable alternate location (i.e., NW09_Manila Rd. & Allan Blye Dr.) provided results deemed to be more representative of the distribution system. Based on current and previous monitoring data, a request to change monitoring locations was sent to the ODW. On September 16, 2010, the ODW approved the change in monitoring locations. However, the SW-13 location will continue to be monitored for bacteriological parameters on a monthly basis during the school year in order to ensure that potentially diminished chlorine residuals are not negatively affecting the safety of the water being distributed to the school.
TEST RESULTS	See Attached

NOTES/COMMENTS:

1. All microbiological tests performed by contract laboratory.
2. UP/DOWN STREAM testing performed when EC is >0 /100mL, TC is >10 /100mL or when resample/consecutive sample is positive for EC or TC or as directed by the Manager of Environmental Standards Division or the Office of Drinking Water

2010 Monthly Fluoride Monitoring Reports

Water and Waste Department • Service des eaux et des déchets

February 2, 2010

Our File: 040-18-18-14-00

Khalida Hai-Santiago c/o Helen Browne
300 Carlton Street (Room 4068)
Winnipeg, Manitoba
R3B 3M9

Dear Dr. Hai-Santiago:

RE: CITY OF WINNIPEG FLUORIDE MONITORING DATA

As a participant in the Provincial Water Fluoridation Program, the City of Winnipeg Water and Waste Department hereby submits the following fluoride monitoring data on analyses conducted by the Environmental Standards Division.

<u>LOCATION</u>	<u>SAMPLE NUMBER</u>	<u>DATE</u>	<u>RESULT(mg/L F)</u>
Distribution System (Composite – 19 Locations)	247151	Jan. 5/10	0.86

ANNEXE

CHAPTER F90
THE FISHERIES ACT

HER MAJESTY, by and with the advice and consent of the Legislative Assembly of Manitoba, enacts as follows:

Definitions

1 In this Act

"consumer" means a person who acquires or purchases fish for personal use or consumption by himself or his family and not in commercial quantities; (« consommateur »)

"container" includes any type of receptacle, package, wrapper or confining band, used in packing or marketing fish; (« récipient »)

"corporation" means the Freshwater Fish Marketing Corporation established under the *Freshwater Fish Marketing Act* (Canada); (« Office »)

"department" means the department of government administered by the minister; (« ministère »)

"Director" means the Director of the Fisheries Branch within the department; (« directeur »).

CHAPITRE F90
LOI SUR LA PÊCHE

SA MAJESTÉ, sur l'avis et avec le consentement de l'Assemblée législative du Manitoba, édicte :

Définitions

1 Les définitions qui suivent s'appliquent à la présente loi.

« **agent** » S'entend :

a) de la personne nommée à titre d'agent en vertu du paragraphe 15(1);

b) de l'agent de la paix nommé en vertu d'une autre loi de l'Assemblée législative ou du parlement du Canada. ("officer")

« **commercialisation** » Y sont assimilés le troc, la publicité, l'acquisition, l'emballage, le traitement, l'emménagement, l'expédition et le transport, aux fins ou en prévision de la vente. ("marketing")

« **consommateur** » Personne qui acquière ou achète du poisson en quantités non commerciales pour son usage personnel ou pour sa propre consommation ou celle de sa famille. ("consumer")

« **directeur** » Le directeur de la Direction de la pêche du ministère. ("Director")

"fish", where used as a noun, means

(a) in Parts I and V, round, dressed or filleted fish of any species enumerated in the Schedule, whether fresh or frozen and whether packaged or unpackaged, and includes parts of those fish, and

(b) in all other Parts, any freshwater or saltwater fish, shellfish, crustaceans or aquatic invertebrates, and includes

(i) round, dressed and filleted fish, whether fresh or frozen and whether packaged or unpackaged, and

(ii) parts, products and by-products of those fish, shellfish, crustaceans and aquatic invertebrates; (« poisson »)

"fisher" means a person licensed under this Act or the *Fisheries Act* (Canada), and any regulations made under either Act, to fish for commercial purposes, and includes any other person authorized under the regulations to fish on behalf of a licensed person; (« pêcheur »)

"fur farmer" means a person whose occupation is operating a premises on which fur-bearing animals are kept in captivity for sale or for the purpose of selling their pelts; (« éleveur d'animaux à fourrure »)

"inspector" means an inspector appointed under this Act; (« inspecteur »)

"lending agency" means any incorporated board, commission, association, agency or similar body

(a) all the members of which, or all the members of the board of management, board of directors, or other governing board, of which are appointed by an Act of the Legislature or an Act of Parliament, or by the Lieutenant Governor in Council or the Governor General in Council, and

(b) which is designated by the Lieutenant Governor in Council as the lending agency under this Act; (« organisme de prêt »)

"licence" means a licence or permit issued under this Act or the regulations; (« permis »)

« **éleveur d'animaux à fourrure** » Personne dont la profession consiste à exploiter des lieux sur lesquels cette personne garde des animaux à fourrure en captivité en vue de leur vente ou de la vente de leur fourrure. ("fur farmer")

« **inspecteur** » Inspecteur nommé en vertu de la présente loi. ("inspector")

« **ministère** » Le ministère du gouvernement administré par le ministre. ("department")

« **ministre** » Le membre du Conseil exécutif chargé par le lieutenant-gouverneur en conseil de l'application de la présente loi. ("minister")

« **Office** » L'Office de commercialisation du poisson d'eau douce créé par la *Loi sur la commercialisation du poisson d'eau douce* (Canada). ("corporation")

« **organisme de prêt** » Commission, régie ou association constituée en corporation ou tout autre organisme semblable :

a) dont les membres, ou dont les membres du conseil d'administration ou autre conseil de direction, sont nommés par une loi de la Législature ou une loi du Parlement ou par le lieutenant-gouverneur en conseil ou le gouverneur général en conseil;

b) que le lieutenant-gouverneur en conseil désigne comme organisme de prêt sous le régime de la présente loi. ("lending agency")

« **pêcheur** » Personne titulaire d'un permis qui, d'une part, est visé par la présente loi ou par la *Loi sur les pêches* (Canada) ainsi que par les règlements d'application de l'une ou l'autre de ces lois et, d'autre part, autorise la pêche à des fins commerciales. Est assimilée au pêcheur toute autre personne que les règlements autorisent à pêcher pour le compte d'un titulaire de permis. ("fisher")

« **permis** » Permis ou licence délivré en vertu de la présente loi ou des règlements. ("licence")

« **poisson** » S'entend :

a) dans les parties I et V, du poisson entier, apprêté ou présenté en filet, appartenant à toute espèce énumérée dans l'annexe, qu'il soit frais ou congelé et qu'il soit empaqueté ou non, y compris les parties d'un tel poisson;

"marketing" includes bartering, advertising, acquiring, packing, processing, storing, shipping, and transporting, for the purposes of sale or in anticipation of sale; (« commercialisation »)

"minister" means the member of the Executive Council charged by the Lieutenant Governor in Council with the administration of this Act; (« ministre »)

"officer" means

(a) a person appointed as an officer under subsection 15(1), and

(b) a peace officer appointed under an Act of the Legislature or the Parliament of Canada; (« agent »)

"processing" includes the cleaning, filleting, smoking, salting, icing, packing, freezing, cooking, pickling or drying of fish, or the preparing of fish for market in any other manner; (« traitement »)

"producer" means

(a) a fisher, or

(b) a person authorized in writing by the Director to sell fish to a consumer on behalf of a fisher. (« producteur »)

R.S.M. 1987 Supp., c. 31, s. 9; S.M. 1988-89, c. 11, s. 10; S.M. 1993, c. 34, s. 2; S.M. 1996, c. 46, s. 2; S.M. 2004, c. 32, s. 2 and 3.

b) dans les autres parties, de tout poisson, coquillage, crustacé ou invertébré aquatique d'eau douce ou d'eau salée, y compris :

(i) le poisson entier, apprêté ou présenté en filet, qu'il soit frais ou congelé et qu'il soit emballé ou non,

(ii) les parties, produits et sous-produits du poisson, du coquillage, du crustacé et de l'invertébré aquatique. ("fish")

« **producteur** » Selon le cas :

a) pêcheur;

b) personne que le directeur autorise par écrit à vendre du poisson à un consommateur pour le compte d'un pêcheur. ("producer")

« **réceptacle** » Y est assimilé tout genre de réceptacle, d'emballage, d'enveloppe ou de bande servant à l'emballage ou à la commercialisation du poisson. ("container")

« **traitement** » Est assimilé au traitement le nettoyage, le filetage, le fumage, le salage, le glaçage, l'emballage, la congélation, la cuisson, le marinage, le séchage ou tout autre mode de préparation du poisson pour le marché. ("processing")

Suppl. L.R.M. 1987, c. 31, art. 9; L.M. 1988-89, c. 11, art. 10; L.M. 1993, c. 34, art. 2; L.M. 1996, c. 46, art. 2; L.M. 2004, c. 32, art. 2.

PART I**FRESHWATER
FISH MARKETING**

2 Repealed.

S.M. 2004, c. 32, s. 4.

Powers of corporation

3 The corporation has, in respect of the marketing of fish locally within the province that is within the legislative jurisdiction of the Legislature, all the powers and rights that it has under the *Freshwater Fish Marketing Act* (Canada) in respect of the inter-provincial and export trade in fish.

Power to make regulations

4 The corporation, for the purpose of carrying out the intent of this Act, may make such regulations as are ancillary thereto and are not inconsistent therewith; and every regulation made under this section has the force of law.

Employment of inspectors

5 The corporation may appoint as an inspector for the purposes of enforcing this Part and the regulations made under this Part any person designated as an inspector for the purposes of the *Freshwater Fish Marketing Act* (Canada).

Powers and duties of inspectors

6 An inspector appointed under section 5 has all the powers, rights and duties for the purposes of enforcing this Part and the regulations made under this Part that an inspector under the *Freshwater Fish Marketing Act* has under that Act.

Agreements with Canada

7 The Government of Manitoba may, with the approval of the Lieutenant Governor in Council, enter into agreements with the Government of Canada, or a minister thereof, for the purpose of

- (a) co-operating in the control and regulation of the marketing of fish;
- (b) providing for any of the matters set out in section 24 of the *Freshwater Fish Marketing Act* (Canada); and

PARTIE I**COMMERCIALISATION DU
POISSON D'EAU DOUCE**

2 Abrogé.

L.M. 2004, c. 32, art. 4.

Pouvoirs de l'Office

3 L'Office a, relativement à la commercialisation du poisson à l'intérieur de la province qui relève de l'autorité législative de la Législature, les pouvoirs et les droits que la *Loi sur la commercialisation du poisson d'eau douce* (Canada) lui confère à l'égard du commerce inter-provincial du poisson et de son exportation.

Pouvoir de prendre des règlements

4 L'Office peut prendre des règlements d'application compatibles avec la présente loi et conformes à son esprit, lesquels règlements ont force de loi.

Inspecteurs

5 L'Office peut nommer à titre d'inspecteur aux fins du contrôle de l'application de la présente partie et des règlements pris sous son régime toute personne désignée comme inspecteur dans le cadre de la *Loi sur la commercialisation du poisson d'eau douce* (Canada).

Pouvoirs et fonctions des inspecteurs

6 L'inspecteur nommé en vertu de l'article 5 possède, aux fins du contrôle de l'application de la présente partie et des règlements pris sous son régime, les pouvoirs, droits et fonctions d'un inspecteur nommé en vertu de la *Loi sur la commercialisation du poisson d'eau douce*.

Accords avec le Canada

7 Le gouvernement du Manitoba peut, avec l'approbation du lieutenant-gouverneur en conseil, conclure des accords avec le gouvernement du Canada, ou un de ses ministres, aux fins de :

- a) collaborer au contrôle et à la réglementation de la commercialisation du poisson;
- b) prévoir des dispositions portant sur l'une des questions prévues à l'article 24 de la *Loi sur la commercialisation du poisson d'eau douce* (Canada);

(c) providing for the sharing by the Government of Manitoba, with the Government of Canada of initial operating and establishment expenses of the corporation and of any losses incurred as a result of

- (i) any guarantee of repayment of loans, and interest thereon, made by any bank to the corporation, and
- (ii) loans made by Canada to the corporation,

under subsection 16(1) of the *Freshwater Fish Marketing Act* (Canada).

S.M. 1993, c. 34, s. 3.

Interim injunctions against corporation prohibited

8 Notwithstanding *The Queen's Bench Act*, or any other Act or law in force in Manitoba, no act or operation of the corporation shall be enjoined, suspended, prohibited, or restrained by an interim, or interlocutory, order or judgment of the Court of Queen's Bench, or any judge thereof, or any other court or judge.

Prohibition respecting dealing in fish

9 Subject to section 10, except as permitted by the regulations, or authorized by the corporation,

- (a) no person shall sell or agree to sell fish in the province for delivery within the province, except to the corporation or an agent of the corporation; and
- (b) no person shall purchase or agree to purchase fish in the province for delivery within the province unless the fish is purchased from the corporation or an agent of the corporation.

R.S.M. 1987 Supp., c. 31, s. 9.

Saving clause

10(1) Notwithstanding section 9

- (a) a producer may sell or agree to sell fish caught in the province directly to a consumer in the province;

c) prévoir le partage, entre le gouvernement du Manitoba et le gouvernement du Canada, des dépenses initiales d'exploitation et d'établissement de l'Office et de toutes pertes subies par suite :

- (i) d'une part, de la garantie du remboursement de prêts consentis à l'Office par une banque et du paiement de l'intérêt sur ces prêts,
- (ii) d'autre part, de prêts consentis à l'Office par le Canada,

en vertu du paragraphe 16(1) de la *Loi sur la commercialisation du poisson d'eau douce* (Canada).

L.M. 1993, c. 34, art. 3.

Injonctions provisoires contre l'Office interdites

8 Malgré la *Loi sur la Cour du Banc de la Reine*, ou toute autre loi ou règle de droit en vigueur au Manitoba, l'accomplissement d'un acte ou l'exercice d'une activité par l'Office ne peut être ordonné, suspendu, interdit ou restreint par une ordonnance ou un jugement provisoire ou interlocutoire de la Cour du Banc de la Reine, ou d'un de ses juges, ou de tout autre tribunal ou juge.

Interdiction concernant l'achat ou la vente de poisson

9 Sous réserve de l'article 10 et sauf en conformité avec les règlements ou l'autorisation de l'Office :

- a) nul ne peut vendre ou convenir de vendre du poisson se trouvant dans la province pour le livrer à l'intérieur de la province à une personne autre que l'Office ou un de ses mandataires;
- b) aucune personne ne peut acheter ou convenir d'acheter du poisson se trouvant dans la province pour le livrer à l'intérieur de la province à moins que le poisson ne soit acheté à l'Office ou à un de ses mandataires.

Suppl. L.R.M. 1987, c. 31, art. 9.

Exception

10(1) Malgré l'article 9 :

- a) un producteur peut vendre ou convenir de vendre du poisson pris dans la province directement à un consommateur de la province;

(b) a producer may sell or agree to sell coarse fish caught in the province directly to a fur farmer in the province;

(c) a consumer may purchase or agree to purchase fish directly from a producer for his own use; and

(d) a fur farmer may purchase or agree to purchase coarse fish directly from a producer for food for his animals.

Authorization of Director

10(2) The written authorization referred to in clause (b) of the definition of "producer" in section 1 may be given by the Director.

R.S.M. 1987 Supp., c. 31, s. 9.

Regulations

11 The minister may make regulations

(a) declaring any fish of a species or type named in the Schedule to be a coarse fish;

(b) exempting any fish or any class, variety or grade of fish produced in the province or in any area of the province, or any person or class of persons from any provision of this Act or the regulations;

(c) prescribing the records to be kept respecting all fish caught, taken or marketed in the province;

(d) respecting the transportation of fish in the province;

(e) requiring documentation to accompany fish marketed in the province and respecting the information to be contained in such documentation;

(f) respecting the packing, packaging and labelling of fish marketed in the province;

(g) respecting the marketing of fish in the province by persons other than the corporation, but including agents of the corporation;

b) un producteur peut vendre ou convenir de vendre du poisson commun pris dans la province directement à un éleveur d'animaux à fourrure de la province;

c) un consommateur peut acheter ou convenir d'acheter du poisson directement à un producteur pour son usage personnel;

d) un éleveur d'animaux à fourrure peut acheter ou convenir d'acheter du poisson d'eau commun à un producteur pour nourrir ses animaux.

Autorisation du directeur

10(2) Le directeur peut donner l'autorisation écrite prévue à l'alinéa b) de la définition de "producteur" figurant à l'article 1.

Suppl. L.R.M. 1987, c. 31, art. 9.

Règlements

11 Le ministre peut, par règlement :

a) déclarer que tout poisson appartenant à une espèce ou à un genre que mentionne l'annexe est un poisson commun;

b) soustraire tout poisson ou toute catégorie de poissons produit dans la province ou dans une des régions de celle-ci ou toute personne ou catégorie de personnes à l'application d'une disposition quelconque de la présente loi ou des règlements;

c) prévoir les registres qui doivent être tenus à l'égard du poisson capturé, pris ou commercialisé dans la province;

d) prendre des mesures concernant le transport du poisson dans la province;

e) exiger que des documents soient joints au poisson commercialisé dans la province et prendre des mesures concernant les renseignements que doivent contenir ces documents;

f) prendre des mesures concernant l'emballage, l'emballage et l'étiquetage du poisson commercialisé dans la province;

g) prendre des mesures concernant la commercialisation du poisson dans la province par d'autres personnes que l'Office, notamment par les mandataires de celui-ci;

(h) requiring persons marketing fish, other than the corporation, but including agents of the corporation, to be registered or licensed, and providing for the following:

- (i) the eligibility requirements for registration or a licence,
- (ii) applications for registration or a licence,
- (iii) the term of registrations or licences,
- (iv) the imposition of terms or conditions on registrations or licences,
- (v) the fees for registrations or licences,
- (vi) the suspension, cancellation and reinstatement of registrations or licences,
- (vii) the transfer of registrations or licences,
- (viii) the conduct of appeals respecting registrations or licences,
- (ix) any other matter necessary to establish and enforce a program dealing with the registration or licensing of persons marketing fish.

R.S.M. 1987 Supp., c. 31, s. 9; S.M. 2004, c. 32, s. 5.

Contracts that are void

12 Any contract or agreement for the sale, purchase, or transportation of fish in contravention of any provision of this Part or of any regulation made under this Part is void.

13 Repealed.

S.M. 2004, c. 32, s. 6.

PART II

14 Repealed.

S.M. 2004, c. 32, s. 7.

h) exiger que les autres personnes que l'Office qui commercialisent du poisson, notamment les mandataires de celui-ci, soient inscrites ou titulaires d'un permis, et prévoir :

- (i) les conditions d'inscription ou d'obtention d'un permis,
- (ii) les modalités relatives à la présentation des demandes d'inscription ou de permis,
- (iii) la période de validité des inscriptions ou des permis,
- (iv) l'imposition de conditions à l'égard des inscriptions ou des permis,
- (v) les droits s'appliquant aux inscriptions ou aux permis,
- (vi) la suspension, l'annulation et le rétablissement des inscriptions ou des permis,
- (vii) la cession des inscriptions ou des permis,
- (viii) le déroulement des appels concernant les inscriptions ou les permis,
- (ix) toute autre question nécessaire à l'établissement et à l'application d'un programme ayant trait à l'inscription des personnes qui commercialisent du poisson ou à la délivrance de permis à ces personnes.

Suppl. L.R.M. 1987, c. 31, art. 9; L.M. 2004, c. 32, art. 5.

Nullité de certains contrats

12 Sont nuls les contrats ou les accords portant sur la vente, l'achat ou le transport du poisson et contrevenant à une des dispositions de la présente partie ou d'un règlement pris sous son régime.

13 Abrogé.

L.M. 2004, c. 32, art. 6.

PARTIE II

14 Abrogé.

L.M. 2004, c. 32, art. 7.

PART II.1

LICENSING

INTERPRETATION**Definitions**

14.1(1) In this Part,

"**fish**", where used as a verb, means catch or attempt to catch fish; (« pêcher »)

"**Manitoba waters**" means a wetland, a body of water or a portion of a body of water, the bed of which is owned

(a) by the Crown in right of Manitoba, or

(b) by a person who has entered into an agreement with the minister regarding the maintenance and enhancement of fish populations and the licensing of fishing in those waters; (« eaux manitobaines »)

"**wild fish**" means fish that is wild by nature in Manitoba waters or fish that has been introduced into Manitoba waters. (« poisson sauvage »)

Presumption of Crown ownership

14.1(2) For the purposes of this Part, in the absence of evidence to the contrary, the bed of each wetland, body of water or portion of a body of water within Manitoba is presumed to be owned by the Crown in right of Manitoba unless it forms part of an Indian reserve or a national park.

S.M. 1996, c. 46, s. 3.

PROPERTY IN FISH

Property in fish

14.2(1) The property in all wild fish, including wild fish that have been unlawfully caught, is vested in the Crown, and no person may acquire any right or property in such fish other than in accordance with this Act.

PARTIE II.1

PERMIS

DÉFINITIONS**Définitions**

14.1(1) Les définitions qui suivent s'appliquent à la présente partie.

« **eaux manitobaines** » S'entend des marécages, des masses d'eau ou des parties de masses d'eau dont le lit appartient :

a) à la Couronne du chef du Manitoba;

b) à une personne qui a conclu avec le ministre un accord concernant le maintien et l'accroissement de la population piscicole et l'octroi de permis de pêche dans les eaux en question. ("Manitoba waters")

« **pêcher** » Fait de prendre ou de chercher à prendre du poisson. ("fish")

« **poisson sauvage** » Poisson à l'état sauvage dans les eaux manitobaines ou qui a été introduit dans les eaux manitobaines. ("wild fish")

Présomption

14.1(2) Pour l'application de la présente partie et en l'absence de preuve contraire, le lit de chaque marécage, masse d'eau ou partie de masse d'eau au Manitoba est réputé appartenir à la Couronne du chef du Manitoba, à moins qu'il ne fasse partie d'une réserve indienne ou d'un parc national.

L.M. 1996, c. 46, art. 3.

PROPRIÉTÉ DU POISSON

Propriété du poisson

14.2(1) Le poisson sauvage, y compris le poisson sauvage qui a été pêché illégalement, appartient à la Couronne et nul ne peut obtenir de droits sur ces poissons, ni en devenir propriétaire, si ce n'est conformément à la présente loi.

Property in fish lawfully caught

14.2(2) Any person who has lawful possession of wild fish has, subject to this Act, all property rights in the fish.

Possession

14.2(3) For the purposes of this Act and the regulations,

(a) a person has possession of any thing when it is in the person's actual possession or custody or, with the person's knowledge and consent, it is

(i) in the actual possession or custody of another person, or

(ii) in any place, whether or not that place belongs to or is occupied by the person, for the use or benefit of the person or of another person; and

(b) where one or more persons, with the knowledge and consent of one or more other persons, have custody or possession of any thing, it shall be deemed to be in the custody and possession of each and all of them.

S.M. 1996, c. 46, s. 3.

Propriété du poisson pêché légalement

14.2(2) Les personnes qui possèdent légalement du poisson sauvage ont, sous réserve de la présente loi, tous les droits de propriété à son égard.

Possession

14.2(3) Pour l'application de la présente loi et des règlements :

a) une personne a la possession d'une chose lorsqu'elle en a la possession ou la garde réelle ou, lorsqu'à sa connaissance et avec son assentiment :

(i) une autre personne en a la possession ou la garde réelle,

(ii) la chose est dans un lieu, peu importe que le lieu lui appartienne ou qu'elle l'occupe, pour son propre usage ou pour celui d'une autre personne;

b) si une chose se trouve sous la garde ou en la possession d'une ou de plusieurs personnes, à la connaissance et avec l'assentiment d'une ou de plusieurs autres personnes, cette chose est réputée sous la garde et en la possession de chacune de ces personnes.

L.M. 1996, c. 46, art. 3.

LICENCES**Powers of minister**

14.3(1) Subject to the regulations, the minister may

(a) issue any licence subject to such terms and conditions that the minister considers appropriate;

(b) alter the terms or conditions of any existing licence where the minister considers it appropriate;

(c) establish the number, types or classes of licences that may be issued;

(d) establish how licences are to be allocated;

(e) specify or alter the form of any licence; or

(f) do anything the minister considers necessary to develop, maintain, enhance, manage or use Manitoba's fisheries in a sustainable manner.

PERMIS**Pouvoirs du ministre**

14.3(1) Sous réserve des règlements, le ministre peut :

a) délivrer des permis aux conditions qu'il estime appropriées;

b) modifier les conditions d'un permis existant lorsqu'il l'estime approprié;

c) spécifier le nombre, les types et les catégories de permis qui peuvent être délivrés;

d) établir la méthode d'attribution des permis;

e) spécifier ou modifier la forme des permis;

f) prendre toute autre mesure qu'il estime appropriée afin de développer, de maintenir, de favoriser, de gérer ou d'utiliser d'une manière durable les ressources halieutiques du Manitoba.

Licence conditions

14.3(2) Subject to the regulations, the minister, as a term or condition of any licence, may limit or specify

- (a) the species and quantity of fish permitted to be taken;
- (b) the period during which fishing is permitted;
- (c) the Manitoba waters in which fishing is permitted;
- (d) the type and quantity of fishing gear and equipment that are permitted to be possessed or used and the manner in which they are permitted to be used;
- (e) the person or persons who may conduct fishing operations under the licence;
- (f) the measures to be taken respecting the release into waters of fish or the disposal of fish, to avoid harming existing fish stocks;
- (g) the information to be provided to the Director or an officer with respect to any fish caught, and the manner in which it is to be reported;
- (h) the consequences of contravening or failing to comply with any term or condition of the licence;
- (i) any other terms or conditions that the minister considers appropriate.

Delegation of licensing

14.3(3) The minister may authorize persons not employed by the government to issue licences on behalf of the minister, subject to such terms and conditions as the minister considers appropriate.

Compliance with licence

14.3(4) The holder of a licence shall comply with all of its terms and conditions.

Transferability of licence

14.3(5) A licence is not transferable except in accordance with the regulations.

Term of licence

14.3(6) A licence is valid for the period specified on the licence or in the regulations.

Conditions des permis

14.3(2) Sous réserve des règlements, le ministre peut assortir des permis de limites ou de précisions concernant :

- a) les espèces et la quantité de poissons qui peuvent être pris;
- b) la période pendant laquelle la pêche est permise;
- c) les eaux manitobaines dans lesquelles la pêche est permise;
- d) le type et la quantité d'engins et d'équipement de pêche qu'il est permis de posséder ou d'utiliser et la manière de les utiliser;
- e) les personnes autorisées à pratiquer la pêche en application du permis;
- f) les mesures qui doivent être prises lorsque des poissons sont remis à l'eau ou éliminés afin de ne pas mettre en danger les stocks de poissons;
- g) les renseignements qui doivent être fournis au directeur ou à un agent concernant les prises et la manière d'en faire rapport;
- h) les sanctions imposées pour toute infraction aux conditions du permis ou pour tout défaut de se conformer à ces conditions;
- i) toute autre condition que le ministre estime appropriée.

Délégation

14.3(3) Sous réserve des conditions qu'il estime appropriées, le ministre peut autoriser des personnes qui ne travaillent pas pour le gouvernement à délivrer des permis en son nom.

Observation des conditions du permis

14.3(4) Les titulaires de permis sont tenus d'observer les conditions de leur permis.

Cession des permis

14.3(5) Les permis sont incessibles, sauf en conformité avec les règlements.

Période de validité des permis

14.3(6) Les permis sont valides pour la période indiquée sur le permis ou prévue par règlement.

Application for licence

14.3(7) The minister may require an application for a licence to be in a form approved by the minister.

Licence fee

14.3(8) Every person to whom a licence is issued shall pay the fee, if any, prescribed by regulation for the licence.

Requirement for information

14.3(9) The minister may require the holder of a licence, or an applicant for a licence or renewal of a licence, to provide the minister with information for the purposes of

- (a) evaluating an application for a licence or renewal of a licence; or
- (b) monitoring activities conducted pursuant to a licence.

Obligation to carry and produce licence

14.3(10) Every person to whom a licence has been issued shall at all times while engaged in any activity authorized by the licence

- (a) carry the licence on his or her person; and
- (b) if requested by an officer, immediately produce the licence for examination.

Validity of licence

14.3(11) No licence is valid

- (a) until the person to whom it is issued has
 - (i) signed it in the space provided for that purpose, or
 - (ii) affixed his or her mark in the space provided for that purpose in the presence of a witness who attests to the affixing of the mark;
- (b) if it is issued on the basis of false information or to a person who is not eligible to hold it;
- (c) if the correct date of issue is not entered on the licence.

Demande de permis

14.3(7) Le ministre peut exiger que les demandes de permis soient présentées selon la forme qu'il approuve.

Droits de permis

14.3(8) Chaque personne à qui un permis est délivré acquitte les droits prescrits par règlement pour le permis, le cas échéant.

Renseignements

14.3(9) Le ministre peut exiger du titulaire d'un permis ou de l'auteur d'une demande de permis ou de renouvellement de permis qu'il lui fournisse les renseignements dont il a besoin :

- a) pour évaluer le bien-fondé de la demande de permis ou de renouvellement d'un permis;
- b) pour surveiller les activités autorisées par le permis.

Obligation de produire le permis

14.3(10) Toute personne à qui a été délivré un permis doit en tout temps, lorsqu'elle pratique une activité autorisée :

- a) porter le permis sur elle;
- b) à la demande d'un agent, produire le permis sur-le-champ.

Validité des permis

14.3(11) Aucun permis n'est valide :

- a) si la personne à qui il a été délivré n'a pas :
 - (i) soit signé son nom dans l'espace réservé à cette fin,
 - (ii) soit apposé sa marque dans l'espace réservé à cette fin, en présence d'un témoin qui atteste l'apposition de la marque;
- b) s'il est délivré sur de faux renseignements ou à une personne qui ne peut en être titulaire;
- c) si la date exacte de délivrance n'est pas inscrite sur le permis.

Transitional

14.3(12) A valid and subsisting licence issued under the *Manitoba Fishery Regulations, 1987* under the *Fisheries Act* (Canada) before the coming into force of this section is deemed to be a valid and subsisting licence issued under this Act.

S.M. 1996, c. 46, s. 3.

Disposition transitoire

14.3(12) Tout permis valide et en vigueur qui a été délivré en vertu du *Règlement de pêche du Manitoba de 1987* pris en application de la *Loi sur les pêches* (Canada) avant l'entrée en vigueur du présent article est réputé un permis valide et en vigueur délivré en vertu de la présente loi.

L.M. 1996, c. 46, art. 3.

PROHIBITIONS RESPECTING LICENCES

Prohibition against fishing, etc.

14.4(1) No person shall, except under the authority of a licence,

- (a) fish in Manitoba waters unless permitted by regulation; or
- (b) carry on any activity related to fishing in Manitoba waters that is prohibited by the regulations.

Unlawful possession

14.4(2) No person shall acquire or possess fish caught in contravention of this Act, the regulations or a licence.

False information

14.4(3) No person shall provide false or misleading information to the minister or any official of the department in, or in support of, an application for a licence.

Prohibitions re licence

14.4(4) No person shall

- (a) alter or deface a licence; or
- (b) permit another person to use his or her licence.

Exception

14.4(5) Subsections (1) and (2) do not apply to an officer in the performance of his or her duties under this Act.

S.M. 1996, c. 46, s. 3.

INTERDICTIONS CONCERNANT LES PERMIS

Interdiction de pêcher

14.4(1) Il est interdit, sauf en vertu d'un permis :

- a) de pêcher dans les eaux manitobaines, à moins qu'un règlement ne le permette;
- b) de pratiquer dans les eaux manitobaines une activité liée à la pêche interdite par les règlements.

Possession illicite

14.4(2) Il est interdit d'acquérir ou de posséder des poissons pêchés en violation de la présente loi, des règlements ou d'un permis.

Faux renseignements

14.4(3) Il est interdit de fournir au ministre ou à un fonctionnaire du ministère des renseignements faux ou trompeurs dans une demande de permis ou à l'appui d'une telle demande.

Interdictions visant le permis

14.4(4) Nul ne peut :

- a) falsifier un permis ni le rendre illisible;
- b) permettre à une autre personne d'utiliser son permis.

Exception

14.4(5) Les paragraphes (1) et (2) ne s'appliquent pas aux agents qui exercent leurs fonctions en vertu de la présente loi.

L.M. 1996, c. 46, art. 3.

REGULATIONS

RÈGLEMENTS

Ministerial regulations

14.5(1) The minister may make regulations

- (a) defining, enlarging or restricting the meaning of any word or phrase used in this Act but not defined in this Act;
- (b) requiring the keeping of records, the provision of information to an officer and the submission of returns to the department for activities related to this Act;
- (c) prescribing categories of licences or activities authorized by licences;
- (d) prescribing eligibility requirements and application forms for the issue, renewal or transfer of licences;
- (e) respecting the use of tags associated with a licence;
- (f) respecting the terms and conditions and the transferability of licences;
- (g) respecting the licensing of fishers' helpers or employees;
- (h) respecting the time, the area, and the fish to which a licence relates or is limited;
- (i) respecting fishing quotas or limits on the number, size or weight of fish caught and retained under the authority of a licence;
- (j) respecting the revocation of licences and any process related to those revocations;
- (k) respecting the use of fishing gear and equipment;
- (l) restricting or prohibiting the sale or possession of live bait fish;
- (m) designating any area of Manitoba as an area for managing, controlling and harvesting fish and prohibiting or restricting fishing or any activity related to fishing in the designated area;

Règlements ministériels

14.5(1) Le ministre peut, par règlement :

- a) définir, étendre ou restreindre le sens d'un mot ou d'une phrase utilisé mais non défini dans la présente loi;
- b) exiger la tenue de registres, la communication de renseignements à un agent et la remise de déclarations au ministère concernant les activités visées par la présente loi;
- c) prescrire les catégories de permis et les activités autorisées par les permis;
- d) déterminer les exigences d'admissibilité et la forme des demandes de délivrance, de renouvellement ou de cession des permis;
- e) prendre des mesures concernant l'utilisation des étiquettes qui accompagnent les permis;
- f) prendre des mesures concernant les conditions énoncées sur les permis et la cession des permis;
- g) prendre des mesures concernant l'octroi de permis aux aides ou aux employés des pêcheurs;
- h) prendre des mesures concernant la période de temps, la zone et le poisson auxquels le permis se rapporte ou est limité;
- i) prendre des mesures concernant les contingents et les limites imposées quant au nombre, à la taille et au poids du poisson pris ou gardé en vertu d'un permis;
- j) prendre des mesures concernant la révocation des permis et les formalités connexes;
- k) prendre des mesures concernant les conditions d'utilisation des engins et de l'équipement de pêche;
- l) restreindre ou interdire la vente ou la possession de poisson-appât vivant;
- m) désigner les zones de gestion, de contrôle et de capture du poisson au Manitoba et interdire ou restreindre la pêche ou les activités liées à la pêche dans les zones désignées;

- (n) respecting the terms and conditions under which persons may engage in fishing without a licence;
- (o) governing the operation of fishing events, including performance standards and the keeping of records in respect of the events;
- (p) governing safety practices in fishing and related activities;
- (q) respecting the propagation, rearing, keeping, disposition, marketing, transportation, importation or stocking of live fish, including those acquired and raised for aquaculture purposes;
- (r) respecting the allocation of fish resources in Manitoba waters to persons or classes of persons;
- (s) restricting or prohibiting any activity related to fishing in Manitoba waters;
- (t) respecting any other matter relating to fish, fishing or fisheries within the jurisdiction of Manitoba.

L.G. in C. regulations

14.5(2) The Lieutenant Governor in Council may make regulations

- (a) respecting fees payable for licences;
- (b) respecting the remuneration of persons authorized by the minister to issue licences;
- (c) governing the imposition and collection of royalties for fish caught pursuant to any licence;
- (d) prescribing ticketable offences against this Act or the regulations, the manner in which the offences may be described in tickets and the fines payable in respect of the ticketable offences;
- (e) respecting any matter or thing that the Lieutenant Governor in Council considers necessary to carry out the intent of this Act.

S.M. 1996, c. 46, s. 3; S.M. 2004, c. 32, s. 3 and 8.

- n) prendre des mesures concernant les conditions qu'une personne doit remplir pour être autorisée à pratiquer la pêche sans permis;
- o) régir le déroulement des tournois de pêche, y compris les normes de performance et la tenue de registres sur les tournois;
- p) régir les mesures de sécurité à observer au cours des activités de pêche et des activités connexes;
- q) prendre des mesures concernant la propagation, l'alevinage, la conservation, l'élimination, la commercialisation, le transport, l'importation ou le stockage de poissons vivants, y compris ceux qui ont été acquis et élevés pour l'aquaculture;
- r) prendre des mesures concernant l'attribution des ressources halieutiques des eaux manitobaines à certaines personnes ou à certaines catégories de personnes;
- s) restreindre ou interdire certaines activités liées à la pêche dans les eaux manitobaines;
- t) prendre de mesures concernant toute autre question se rapportant aux poissons, à l'activité de pêche ou à l'industrie de la pêche au Manitoba.

Règlements du lieutenant-gouverneur en conseil

14.5(2) Le lieutenant-gouverneur en conseil peut, par règlement :

- a) prendre des mesures concernant les droits exigibles pour les permis;
- b) prendre des mesures concernant la rémunération des personnes que le ministre autorise à délivrer des permis;
- c) régir l'imposition et la perception de redevances pour les poissons pris en vertu d'un permis;
- d) indiquer quelles infractions à la présente loi ou aux règlements peuvent faire l'objet d'un constat, la manière de les décrire sur le constat et les amendes exigibles pour de telles infractions;
- e) prendre des mesures concernant toute question ou toute chose que le lieutenant-gouverneur en conseil estime nécessaire à l'application de la présente loi.

L.M. 1996, c. 46, art. 3; L.M. 2004, c. 32, art. 8.

PART II.2**ENFORCEMENT****Appointment of inspectors and officers**

15(1) The minister may appoint inspectors and officers for the purposes of administering and enforcing this Act and the regulations.

Authority of inspectors and officers

15(1.1) For the purposes of this Act and the regulations, each inspector or officer is, and has and may exercise the powers and authority of, a police constable or peace officer.

Power of arrest

15(1.2) An inspector or officer, on witnessing the commission of an offence under this Act or the regulations, may without process arrest the person found committing the offence and bring the person before a court of competent jurisdiction to be dealt with according to law.

Inspection

15(2) An inspector or an officer may, at any reasonable time and where reasonably required to determine compliance with this Act or the regulations, without a warrant, enter and inspect any place, including any premises, vehicle, aircraft, boat or railway car, other than a dwelling, and may

- (a) open any container that the inspector or officer has reason to believe contains fish;
- (b) examine any fish that the inspector or officer finds and take samples of it; and
- (c) require any person to produce for examination or copying any licence, records, bills of lading or other documents.

Prohibition or obstruction of inspector or officer

15(3) No person shall obstruct, impede, or refuse to admit, an inspector or officer or other person acting in the execution of this Act or the regulations; and no person shall aid or assist any person in obstructing, impeding, or refusing to admit, an inspector or officer or other person so acting.

S.M. 1994, c. 6, s. 2; S.M. 1996, c. 46, s. 4.

16 Repealed.

S.M. 2004, c. 32, s. 9.

PARTIE II.2**APPLICATION****Nomination d'inspecteurs et d'agents**

15(1) Le ministre peut nommer des inspecteurs et des agents qu'il charge de l'application de la présente loi et des règlements.

Attributions des inspecteurs et des agents

15(1.1) Pour l'application de la présente loi et des règlements, les inspecteurs et les agents sont assimilés à des agents de police ou à des agents de la paix et ils en ont ou peuvent en exercer les attributions.

Pouvoir d'arrestation

15(1.2) L'inspecteur ou l'agent qui est témoin de la perpétration d'une infraction à la présente loi ou aux règlements peut, sans mandat, arrêter la personne qui commet l'infraction et la faire comparaître devant un tribunal compétent afin qu'elle soit traitée conformément à la loi.

Inspection

15(2) Un inspecteur ou un agent peut, sans mandat, procéder à la visite de tout lieu, y compris un local, un véhicule, un aéronef, un bateau ou un wagon de chemin de fer, à l'exclusion d'une habitation, en tout temps raisonnable et lorsqu'il est raisonnablement tenu d'en déterminer la conformité avec la présente loi ou les règlements, et peut :

- a) ouvrir tout contenant qui pourrait, à son avis, renfermer du poisson;
- b) examiner le poisson qu'il y trouve et en prélever des échantillons;
- c) exiger de toute personne la communication, pour examen ou reproduction, de documents, notamment de permis, de livres ou de connaissements.

Interdiction de gêner l'inspecteur ou l'agent

15(3) Il est interdit de gêner, d'entraver ou de refuser d'admettre, ou d'aider une personne à gêner, à entraver ou à refuser d'admettre un inspecteur, un agent ou une autre personne agissant en exécution de la présente loi ou des règlements.

L.M. 1994, c. 6, art. 2; L.M. 1996, c. 46, art. 4.

16 Abrogé.

L.M. 2004, c. 32, art. 9.

Seizure in execution of duties

16.1 An inspector or officer acting in the course or scope of duty who discovers an offence being committed against this Act or the regulations may seize any vehicle, boat, fish, net, fishing equipment or other thing which is being used to commit the offence or which is evidence of the offence. The inspector or officer must bring the seized item before a justice, or report on it to a justice, to be dealt with according to law.

S.M. 2004, c. 32, s. 10.

Search and seizure

17(1) An inspector or an officer who believes on reasonable grounds that

- (a) an offence against this Act or the regulations has occurred or is occurring; and
- (b) there is to be found in any place, including any premises, vehicle, aircraft, boat or railway car, any fish or other thing that will afford evidence of the offence;

may, with a warrant issued under subsection (1.1), enter and search any place for the fish or other thing and may seize it.

Warrant

17(1.1) A justice who is satisfied by information upon oath that there are reasonable grounds to believe that there is in any place referred to in subsection (1) any fish or other thing referred to in that subsection may issue a warrant authorizing an inspector or an officer and such other persons as may be named in the warrant to enter and search the place for the fish or other thing and to seize it.

Where warrant not necessary

17(1.2) Notwithstanding subsection (1), an inspector or an officer may exercise the power of search and seizure referred to in that subsection without a warrant if the conditions for obtaining a warrant exist but it is not practicable in the circumstances to obtain one.

Saisie dans l'exercice des fonctions

16.1 L'inspecteur ou l'agent qui agit dans l'exercice de ses fonctions et qui constate qu'une infraction à la présente loi ou aux règlements est en train d'être commise peut saisir toute chose, y compris un véhicule, un bateau, du poisson, un filet ou du matériel de pêche, utilisée pour la perpétration de l'infraction ou permettant de prouver celle-ci. Il doit l'apporter devant un juge ou en faire rapport à celui-ci, afin qu'il en soit disposé conformément à la loi.

L.M. 2004, c. 32, art. 10.

Perquisition et saisie

17(1) Lorsqu'il a des motifs raisonnables de croire qu'une infraction à la présente loi ou aux règlements est ou a été commise et que du poisson ou des objets prouvant l'infraction se trouvent dans un lieu, y compris un local, un véhicule, un aéronef, un bateau ou un wagon de chemin de fer, l'inspecteur ou l'agent peut, muni du mandat visé au paragraphe (1.1), perquisitionner dans le lieu en question et y saisir le poisson ou les objets.

Mandat

17(1.1) Lorsqu'il est convaincu sur la foi de renseignements donnés sous serment qu'il existe des motifs raisonnables de croire que du poisson ou des objets prouvant une infraction se trouvent dans un des lieux mentionnés au paragraphe (1), un juge de paix peut décerner un mandat autorisant un inspecteur ou un agent ainsi que les autres personnes qui y sont nommées à perquisitionner dans le lieu en question et à y saisir le poisson ou les objets.

Saisie sans mandat

17(1.2) Par dérogation au paragraphe (1), l'inspecteur ou l'agent peut exercer sans mandat le pouvoir de perquisition et de saisie qui y est prévu si les conditions d'obtention d'un mandat sont réunies mais qu'il s'avère peu pratique dans les circonstances d'en obtenir un.

Detention of fish, etc., seized

17(2) All fish and other things seized under this section may be detained for a period of two months following the day of seizure, unless during that period proceedings under this Act in respect of those fish and other things are taken, in which case the fish and other things may be further detained until the proceedings are finally concluded.

Disposal of fish seized

17(3) Where a person is convicted of an offence against this Part or the regulations, in addition to any penalty imposed, any fish or containers by means of, or in relation to, which the offence was committed are forfeited to the government and shall be disposed of as the minister directs.

S.M. 1994, c. 6, s. 3; S.M. 1996, c. 46, s. 5.

Inspector or officer may stop vehicle

17.1 An inspector or an officer, in the execution of his or her duties and responsibilities under this Act or the regulations or under any other enactment, may signal or request any person driving a vehicle or boat to stop, and the person shall immediately bring the vehicle or boat to a stop and shall not proceed until permitted to do so by the inspector or officer.

S.M. 1994, c. 6, s. 4; S.M. 1996, c. 46, s. 6.

Rétention du poisson et des récipients saisis

17(2) Tout le poisson et tous les objets saisis en vertu du présent article peuvent être retenus durant une période de deux mois après la date de la saisie, à moins que, pendant cette période, des procédures prévues par la présente loi quant à ce poisson et à ces objets ne soient engagées, auquel cas le poisson et les objets peuvent être retenus jusqu'à ce que les procédures soient définitivement terminées.

Confiscation

17(3) Lorsqu'une personne est déclarée coupable d'une infraction à la présente partie ou aux règlements, le poisson et les récipients au moyen ou à l'égard desquels l'infraction a été commise sont, en sus de toute peine infligée, confisqués au profit du gouvernement, et il en est disposé selon que l'ordonne le ministre.

L.M. 1994, c. 6, art. 3; L.M. 1996, c. 46, art. 5.

Arrêt d'un véhicule

17.1 Tout inspecteur ou agent qui agit dans l'exercice des attributions qui lui sont confiées en application de la présente loi, des règlements ou de tout autre texte de loi peut demander ou faire signe à une personne conduisant un véhicule ou un bateau de s'arrêter, auquel cas celle-ci est tenue de le faire immédiatement et elle ne peut repartir avant que l'inspecteur ou l'agent ne le lui permette.

L.M. 1994, c. 6, art. 4; L.M. 1996, c. 46, art. 6.

PART III**LOANS****Definition**

18 In this Part "**loan**" means a loan made by the lending agency under this Part.

Advances to lending agency

19(1) With no other authority than this Act, there shall be advanced to the lending agency on the requisition of the minister from and out of the Consolidated Fund, on such terms and conditions, including terms and conditions respecting repayment of the advances, interest to be charged on the advances and the rate of such interest, as the Lieutenant Governor in Council may prescribe, amounts not exceeding an aggregate \$10,000,000. to be used by the lending agency in accordance with this Part.

Acceptance of additional moneys

19(2) The government may receive and accept moneys from any source to be used for the purposes of making loans under this Part; and the minister, for and on behalf of the government, with the approval of the Lieutenant Governor in Council, may make agreements for that purpose.

Advances of moneys received

19(3) Any moneys received under subsection (2) may be paid to the lending agency on the requisition of the minister in addition to any moneys payable under subsection (1).

S.M. 1988-89, c. 13, s. 11

Separate accounts

20 The moneys paid or advanced to the lending agency under this Part shall be dealt with by the lending agency for accounting purposes in the same manner as other moneys of the lending agency but it shall keep in its records a separate account

- (a) to which shall be credited
 - (i) all moneys advanced to it under this Part,

PARTIE III**PRÊTS****Définition**

18 Dans la présente partie, le terme « **prêt** » désigne un prêt consenti par l'organisme de prêt en vertu de la présente partie.

Avances à l'organisme de prêt

19(1) L'organisme de prêt reçoit, à la demande du ministre, des montants qui ne dépassent pas 10 000 000\$ au total et qui doivent être utilisés en conformité avec les dispositions de la présente partie. Les montants avancés sont prélevés sur le Trésor et sont assortis des modalités que le lieutenant-gouverneur en conseil fixe, notamment en ce qui concerne leur remboursement, l'intérêt à payer et le taux d'intérêt.

Sommes additionnelles

19(2) Le gouvernement peut recevoir des sommes provenant de toute source, lesquelles sommes serviront à consentir des prêts en vertu de la présente partie. Le ministre peut, au nom du gouvernement et avec l'approbation du lieutenant-gouverneur en conseil, conclure des accords à cette fin.

Versement des sommes reçues à l'organisme de prêt

19(3) Les sommes reçues en vertu du paragraphe (2) peuvent, à la demande du ministre, être versées à l'organisme de prêt en plus des sommes qui lui sont payables en vertu du paragraphe (1).

L.M. 1988-89, c. 13, art. 11.

Comptes distincts

20 L'organisme de prêt traite, à des fins de comptabilité, les sommes qu'il reçoit en vertu de la présente partie de la même manière qu'il traite les autres sommes qui sont en sa possession. Toutefois, il conserve dans ses livres un compte distinct :

- a) auquel sont créditées :
 - (i) les sommes qu'il reçoit en vertu de la présente partie,

- (ii) all moneys collected on repayment of loans and as interest on loans, and
 - (iii) all moneys collected on the disposal of security taken to secure repayment of loans; and
- (b) from which shall be paid
- (i) all moneys advanced on loans, and
 - (ii) all costs incurred by the lending agency in making loans and administering this Part.

Authority for loans

21 Notwithstanding any provision of any Act of the Legislature establishing or relating specifically to the lending agency, the lending agency may, with the moneys paid and advanced to it under this Part, make loans, subject to and in accordance with the regulations, to fishers and to co-operative corporations composed of fishers.

S.M. 2004, c. 32, s. 3.

Loans in lending agency's name

22 The lending agency shall make and collect all loans, and take all actions and proceedings to collect loans or recover under security taken in respect of loans, in its own name.

Costs of administration

23 The member of the Executive Council who is responsible for the conduct and business of the lending agency under the Act or order establishing the lending agency, or if there is no such member of the Executive Council, the minister shall, from time to time, determine the part of the costs of administration of the lending agency that are incurred in making loans and administering this Part; and that determination is final and binding on the lending agency and all other persons.

Regulations

24 For the purpose of carrying out the provisions of this Part according to their intent, the lending agency, with the approval of the Lieutenant Governor in Council, may make regulations ancillary thereto and not inconsistent therewith; and every regulation made under, and in accordance with the authority granted by, this section has the force of law; and, without restricting the generality of the foregoing, the lending agency, with the approval of the Lieutenant Governor in Council, may make regulations

- (ii) les sommes perçues au moment du remboursement des prêts, y compris l'intérêt sur les prêts,
- (iii) les sommes perçues au moment de l'aliénation de la sûreté prise afin que le remboursement des prêts soit assuré;

b) duquel sont débités :

- (i) les sommes prêtées,
- (ii) les frais qu'il a engagés en consentant des prêts et en appliquant la présente partie.

Pouvoir de consentir des prêts

21 L'organisme de prêt peut, malgré toute disposition d'une loi de la Législature le créant ou s'y rapportant de façon précise, consentir des prêts au moyen des sommes qu'il reçoit en vertu de la présente partie, sous réserve des règlements et conformément à ceux-ci, à des pêcheurs et à des coopératives composées de pêcheurs.

Prêts consentis au nom de l'organisme de prêt

22 L'organisme de prêt consent les prêts, les perçoit et intente les actions et les procédures en vue de les percevoir ou d'en recouvrer le montant en vertu des sûretés prises à leur égard, en son propre nom.

Frais d'administration

23 Le membre du Conseil exécutif qui est chargé de la direction et des affaires de l'organisme de prêt en vertu de la *Loi* ou du décret le créant, ou le ministre, en l'absence d'un tel membre du Conseil exécutif, détermine la part des frais d'administration de l'organisme de prêt qui sont engagés dans les prêts et l'application de la présente partie. La décision du membre du Conseil exécutif ou du ministre est sans appel et lie l'organisme de prêt et toute autre personne.

Règlements

24 Le lieutenant-gouverneur en conseil peut prendre des règlements d'application compatibles avec la présente loi et conformes à son esprit; ces règlements ont force de loi. Il peut notamment, par règlement :

(a) respecting the purposes for which loans may be made;

(b) respecting the security to be taken to secure the repayment of loans;

(c) prescribing the maximum amount that may be loaned on any loan, or on any loan of a class of loans;

(d) prescribing the rate of interest to be charged on loans;

(e) respecting the qualifications of persons to whom loans may be made;

(f) respecting the administration of this Part and the procedures to be followed in the making of loans.

a) prendre des dispositions concernant les fins pour lesquelles des prêts peuvent être accordés;

b) prendre des dispositions concernant la sûreté à prendre pour que le remboursement des prêts soit garanti;

c) fixer le montant maximal de tout prêt ou de tout prêt d'une catégorie de prêts;

d) fixer le taux d'intérêt des prêts;

e) prendre des dispositions concernant les conditions que doivent remplir les personnes à qui des prêts peuvent être accordés;

f) prendre des dispositions concernant l'application de la présente partie et les procédures à suivre pour que des prêts soient accordés.

PART IV**GENERAL****Offence and penalty**

25(1) Every person who contravenes or fails to comply with this Act or the regulations, or any directive or order of the corporation, an inspector or an officer made under this Act or the regulations, for which no penalty is elsewhere provided herein, is guilty of an offence and liable, on summary conviction, to a fine not exceeding \$100,000., or to imprisonment for a term not exceeding six months, or to both.

Offences by corporation

25(2) If a corporation is guilty of an offence under this Act, any officer, director, or agent of the corporation who directed, authorized, assented to, acquiesced in, or participated in, the commission of the offence, is a party to, and guilty of the offence.

Limitation period for prosecution

25(3) Proceedings to prosecute a person for an alleged offence under this Act may be commenced at any time within one year after the time when the subject matter of the proceedings arose.

S.M. 1994, c. 6, s. 5; S.M. 1996, c. 46, s. 7; S.M. 2004, c. 32, s. 12.

Falsification or alteration of documents, etc.

26 No person shall falsify or unlawfully alter, destroy, erase, or obliterate, any declaration, order or directive of the corporation, inspection certificate or other document made or issued under this Act or the regulations or any mark placed on any container under this Act or the regulations.

Sale of unwholesome fish prohibited

27 No person shall sell, offer for sale, or hold in possession for sale, any fish, intended for human consumption that is tainted, decomposed or unwholesome.

Interference prohibited

27.1(1) No person shall remove, damage or in any way interfere with any net or other fishing gear or equipment set out by any other person for the purpose of catching fish.

PARTIE IV**DISPOSITIONS GÉNÉRALES****Infraction et peine**

25(1) Quiconque contrevient ou omet de se conformer à la présente loi ou aux règlements, ou à des directives ou à un ordre que l'Office, un inspecteur ou un agent donne sous le régime de ces textes commet une infraction et se rend passible, sur déclaration sommaire de culpabilité, d'une amende maximale de 100 000 \$ et d'un emprisonnement maximal de six mois, ou de l'une de ces peines, si la *Loi* ne prévoit aucune autre peine pour cette infraction.

Infraction par une corporation

25(2) En cas de perpétration par une corporation d'une infraction à la présente loi, ceux de ses dirigeants, administrateurs ou mandataires qui l'ont ordonnée ou autorisée, ou qui y ont consenti ou participé, sont considérés comme des coauteurs de l'infraction.

Prescription

25(3) Les actions contre une personne, pour infraction à la présente loi, doivent être intentées dans l'année qui suit la date du fait générateur du litige.

L.M. 1994, c. 6, art. 5; L.M. 1996, c. 46, art. 7; L.M. 2004, c. 32, art. 12.

Falsification ou modification de documents

26 Nul ne peut falsifier ni illégalement modifier, détruire, effacer ou oblitérer une déclaration, un ordre ou des directives de l'Office, un certificat d'inspection ou tout autre document fait ou délivré en vertu de la présente loi ou des règlements, ou une marque apposée sur des récipients en application de ces textes.

Interdiction

27 Nul ne peut vendre, ni mettre en vente, ni avoir en sa possession pour la vente, du poisson destiné à l'alimentation humaine qui est gâté, pourri ou malsain.

Interdiction

27.1(1) Il est interdit d'enlever ou d'endommager les engins ou le matériel de pêche, y compris les filets, qu'une personne met à l'eau afin de prendre du poisson ou de faire d'une façon quelconque obstacle à leur utilisation.

Exception for officers

27.1(2) Subsection (1) does not apply to an inspector or officer in the performance of his or her duties under this Act or the *Fisheries Act* (Canada).

S.M. 2004, c. 32, s. 13.

Place of commission of offence

28 Every offence against this Act or the regulations shall, for the purposes of any prosecution, be deemed to have been committed, and every cause of complaint under this Act or the regulations shall be deemed to have arisen,

- (a) in the place where the offence was actually committed; or
- (b) the place where it was first discovered by an inspector or officer; or
- (c) the place where the defendant resides or is found.

S.M. 1996, c. 46, s. 8.

Definition of "property"

29(1) In this section, **property** means any real or personal property purchased by the minister on or before May 1, 1971 for and on behalf of the government which property had been used by the owner thereof in, or in connection with, his business as a fisher, fish dealer or fish processor, as an earning asset in that business and could no longer be used by the owner because of the operations of the corporation.

Disposal of property

29(2) Notwithstanding *The Crown Lands Act*, but subject to subsection (3), the minister

- (a) with the approval of the Lieutenant Governor in Council may sell, exchange, convey, or otherwise dispose of or turn to account, any property or any part thereof, or any estate or interest therein; or
- (b) with like approval, may lease any real property where the annual rental value thereof is, in the opinion of the minister, more than \$500.; or
- (c) without that approval, may lease any property that is real property where the annual rental value thereof is, in the opinion of the minister, less than \$500.; or
- (d) without that approval may lease any property that is personal property.

Exception

27.1(2) Le paragraphe (1) ne s'applique pas aux inspecteurs ni aux agents qui agissent dans l'exercice des fonctions que leur confère la présente loi ou la *Loi sur les pêches* (Canada).

L.M. 2004, c. 32, art. 13.

Lieu où l'infraction a été commise

28 Aux fins de toute poursuite, chaque infraction à la présente loi ou aux règlements est réputée avoir été commise, et chaque cause de plainte aux termes de la présente loi ou des règlements est réputée avoir pris naissance :

- a) soit à l'endroit où l'infraction a réellement été commise;
- b) soit à l'endroit où elle a été en premier lieu découverte par un inspecteur ou un agent;
- c) soit à l'endroit où le défendeur réside ou se trouve.

L.M. 1996, c. 46, art. 8.

Définition de « biens »

29(1) Dans le présent article, le terme « **biens** » désigne les biens réels ou personnels que le ministre a achetés au nom du gouvernement au plus tard le 1^{er} mai 1971 et qu'un propriétaire utilisait dans le cadre de son entreprise relative à la pêche, au commerce ou au traitement du poisson, à titre d'élément d'actif lucratif, mais qu'il ne pouvait plus utiliser en raison des activités de l'Office.

Aliénation des biens achetés

29(2) Malgré la *Loi sur les terres domaniales*, mais sous réserve du paragraphe (3), le ministre peut :

- a) avec l'approbation du lieutenant-gouverneur en conseil, vendre, échanger, transférer tout ou partie d'un bien ou tout domaine ou intérêt à l'égard de ce bien ou l'aliéner ou le faire valoir autrement;
- b) avec la même approbation, louer un bien réel quelconque dont la valeur locative annuelle est, à son avis, supérieure à 500 \$;
- c) sans cette approbation, louer un bien réel quelconque dont la valeur locative annuelle est, à son avis, inférieure à 500 \$;
- d) sans cette approbation, louer un bien personnel quelconque.

Disposal under \$500. value

29(3) Where the value of the property to be sold or disposed of, does not, in the opinion of the minister, exceed \$500., the approval of the Lieutenant Governor in Council to the sale or disposal thereof is not required unless the property consists of two or more parcels or items that form part of, or are sold in, a group, lot, or set, and the aggregate value of all the parcels or items is more than \$500.

S.M. 2004, c. 32, s. 3.

Personal liability of officials limited

30 Neither the members of the corporation, nor the manager, nor any person acting under the instructions of any of them or under the authority of this Act or the regulations is personally liable for any loss or damage suffered by any person by reason of anything in good faith done or omitted to be done by him or them pursuant to, or in the exercise or supposed exercise of, the powers given to him or to them or any of them under this Act or the regulations.

Annual reports by minister

31(1) Within nine months after the close of each fiscal year of the government, the minister shall prepare a report of its administration of this Act, including a review of all fisheries allocations, for that fiscal year and lay the report before the Assembly if the Legislature is then in session or, if the Legislature is not then in session, within 15 days of the beginning of the next following session of the Legislature.

Five year reports by minister

31(2) In addition to the reports required under subsection (1), the minister shall, within nine months after the close of the fiscal year ending on March 31, 1989 and within nine months after the close of the fiscal year of the government ending in every fifth year thereafter, prepare and lay before the Assembly forthwith, if the Legislature is then in session or if it is not then in session within 15 days after the opening of the next following session, a report containing

- (a) a review of the status of the fisheries resources in the province including the status of any species of fish mentioned in the Schedule and such other species of fish as the minister may select for review;
- (b) a review of the fisheries management programs carried on by the government and an assessment of their effectiveness;

Aliénation d'une valeur de moins de 500 \$

29(3) Le ministre peut, sans l'approbation du lieutenant-gouverneur en conseil, vendre ou aliéner un bien dont la valeur ne dépasse pas, selon lui, 500 \$, à moins que le bien ne consiste en deux ou plusieurs parcelles ou articles qui font partie d'un groupe, d'un lot ou d'un ensemble et dont la valeur totale dépasse 500 \$.

Immunité

30 Les membres de l'Office, le directeur et les personnes qui agissent sous leur autorité ou sous celle de la présente loi ou des règlements ne sont pas personnellement responsables des pertes ou des dommages subis par une personne en raison des actes qu'ils ont de bonne foi accomplis ou omis d'accomplir dans l'exercice effectif ou censé tel des pouvoirs qui leur sont conférés en vertu de la présente loi.

Rapports annuels

31(1) Dans les neuf mois suivant la fin de chaque exercice du gouvernement, le ministre établit un rapport sur l'application de la présente loi, y compris un compte rendu indiquant toutes les sommes assignées dans le domaine de la pêche, pendant cet exercice. Le ministre le dépose devant l'Assemblée immédiatement ou, si elle ne siège pas, dans les 15 premiers jours de séance ultérieurs.

Rapports quinquennaux

31(2) En plus des rapports exigés en vertu du paragraphe (1), le ministre doit, dans les neuf mois suivant la fin de l'exercice qui se termine le 31 mars 1989 et dans les neuf mois suivant la fin de l'exercice du gouvernement qui se termine à tous les cinq ans par la suite, établir et déposer devant l'Assemblée immédiatement ou, si la Législature ne siège pas, dans les 15 premiers jours de séance ultérieurs un rapport contenant :

- a) un examen de l'état des ressources de la province en matière de poissons, y compris l'état de toute espèce de poisson mentionnée à l'annexe et de telle autre espèce de poisson que le ministre choisit aux fins de son examen;
- b) un examen des programmes de gestion de la pêche mis sur pied par le gouvernement et une évaluation de leur efficacité;

(c) an analysis of trends in and the forecast of demands for, the use of fisheries resources in the province; and

(d) an evaluation of the capability of the fisheries resources in the province to meet anticipated demands.

Minister may delegate

31.1 The minister may delegate to an employee of the government any duty or power conferred or imposed on the minister under this Act or the regulations, except the power to make regulations.

S.M. 2008, c. 42, s. 40.

c) une analyse des tendances dans l'utilisation des ressources de la province en matière de poissons ainsi que des prévisions en ce qui concerne la demande pour cette utilisation;

d) une évaluation de la capacité des ressources de la province en matière de poissons à répondre à la demande prévue.

Pouvoir de délégation du ministre

31.1 Le ministre peut déléguer à un employé du gouvernement les attributions qui lui sont conférées en application de la présente loi ou des règlements, à l'exclusion du pouvoir réglementaire.

L.M. 2008, c. 42, art. 40.

PART V

QUOTA ENTITLEMENT SYSTEM

Definition

32 In this Part, "**individual quota entitlement**" means a property interest of a fisher in a right to fish a certain quantity of one or more species of fish, in a particular area and for a particular season, for commercial purposes.

S.M. 1993, c. 34, s. 4; S.M. 2004, c. 32, s. 3.

Regulations

33(1) The Lieutenant Governor in Council may, for the purpose of regulating the fish harvesting rights and responsibilities of fishers within the province for commercial purposes and after such consultations with fishers affected as the Lieutenant Governor in Council considers appropriate, make regulations

- (a) respecting the criteria for the creation, allocation and adjustment of individual quota entitlements;
- (b) respecting the requirements for ownership, transfer and disposition of individual quota entitlements;
- (c) respecting the qualifications and obligations of fishers holding individual quota entitlements in terms of quantity, species, area and season;
- (d) respecting the rights and obligations of fishers holding individual quota entitlements upon injury, sickness, retirement, death and change of residence;
- (e) respecting the suspension and revocation of individual quota entitlements;
- (f) respecting the creation, administration and powers, duties and functions of a fishing licence suspension review board;
- (g) respecting the creation, administration and powers, duties and functions of a fishing licence advisory board;
- (h) respecting the creation and administration of fishing community licencing areas;

PARTIE V

SYSTÈME DE CONTINGENTS

Définition

32 Dans la présente partie, « **contingent individuel** » s'entend de l'intérêt de propriété d'un pêcheur dans un droit de pêcher une certaine quantité d'une ou de plusieurs espèces de poissons, dans une zone et au cours d'une saison particulières, à des fins commerciales.

L.M. 1993, c. 34, art. 4.

Règlements

33(1) Après avoir procédé aux consultations qu'il juge indiquées auprès des pêcheurs visés, le lieutenant-gouverneur en conseil peut, afin de régir dans la province les droits et les obligations des pêcheurs relativement à la capture du poisson à des fins commerciales, par règlement :

- a) prendre des mesures concernant les critères applicables à l'établissement de contingents individuels, à leur attribution et à leur rajustement;
- b) prendre des mesures concernant les exigences applicables à la propriété, au transfert et à l'aliénation des contingents individuels;
- c) prendre des mesures concernant les qualités requises et les obligations des pêcheurs titulaires de contingents individuels en fonction des quantités, des espèces, des zones et des saisons;
- d) prendre des mesures concernant les droits et les obligations des pêcheurs qui sont titulaires de contingents individuels et qui subissent des blessures, tombent malades, prennent leur retraite, décèdent ou changent de résidence;
- e) prendre des mesures concernant la suspension et la révocation des contingents individuels;
- f) prendre des mesures concernant la constitution, la gestion et les attributions d'une commission d'examen des suspensions de permis de pêche;
- g) prendre des mesures concernant la constitution, la gestion et les attributions d'un conseil consultatif de la délivrance des permis de pêche;
- h) prendre des mesures concernant la constitution et la gestion de zones communautaires de délivrance de permis de pêche;

(i) respecting the procedures for pledging or lodging individual quota entitlements as security for loans;

(j) respecting such other matters as may be required for the efficient administration of fish harvesting rights and responsibilities under an individual quota entitlement system and for the purposes of this Part.

Area of application of regulations

33(2) A regulation made under subsection (1) may be made to apply to the whole of the province or to any part of the province.

Transfer of individual quota entitlements

33(3) A regulation made under subsection (1) shall provide that a fisher is not entitled to transfer or dispose of his or her individual quota entitlement in respect of an area in Northern Manitoba as defined in *The Northern Affairs Act* unless the fisher has publicly offered the individual quota entitlement to other persons who hold, or who are eligible to hold, an individual quota entitlement in that area.

S.M. 1993, c. 34, s. 4; S.M. 2004, c. 32, s. 3.

Individual quota entitlements

34(1) The allocation of an individual quota entitlement to a fisher pursuant to a regulation made under subsection 33(1) constitutes a property interest of the fisher in a right to fish the specified quota.

Dealing in individual quota entitlements

34(2) Subject to any regulation made under subsection 33(1), a fisher may buy, sell or pledge as security an individual quota entitlement.

S.M. 1993, c. 34, s. 4; S.M. 2004, c. 32, s. 3.

i) prendre des mesures concernant la façon de mettre en gage ou de déposer des contingents individuels à titre de garantie de prêts;

j) prendre toute autre mesure nécessaire à la gestion efficace des droits et obligations relatifs à la capture du poisson dans le cadre d'un système de contingents individuels et à l'application de la présente partie.

Application des règlements

33(2) Les règlements pris en vertu du paragraphe (1) peuvent s'appliquer à l'ensemble de la province ou à une partie de celle-ci seulement.

Transfert des contingents individuels

33(3) Les règlements pris en vertu du paragraphe (1) prévoient que les pêcheurs ne peuvent transférer ou aliéner leur contingent individuel visant une zone du Nord au sens de la *Loi sur les Affaires du Nord* à moins d'avoir offert publiquement le contingent à d'autres personnes titulaires d'un contingent individuel pour cette zone ou qui sont admissibles à un tel contingent.

L.M. 1993, c. 34, art. 4.

Contingents individuels

34(1) L'attribution d'un contingent individuel à un pêcheur aux termes d'un règlement pris en vertu du paragraphe 33(1) constitue un intérêt de propriété dans un droit de prendre le contingent de poissons précisé.

Opérations portant sur les contingents individuels

34(2) Sous réserve de tout règlement pris en vertu du paragraphe 33(1), un pêcheur peut acheter, vendre ou mettre en gage un contingent individuel.

L.M. 1993, c. 34, art. 4.

SCHEDULE

Lake trout (*Cristivomer namaycush*) — trout, grey trout, salmon trout, siscowet

Whitefish (*Coregonus clupeaformis*) — lake whitefish

Yellow pickerel (*Stizostedion vitreum*) — pike (in United States of America), dore, walleye, yellow walleye, yellow pikeperch

Pike (*Esox lucius*) — pickerel (in United States of America), jackfish, northern pike

Sauger (*Stizostedion canadense*) — sauger pickerel, sand pickerel

Cisco (*Leucichthys* spp.) — tullibee, chub

Inconnu (*Stenodus leucichthys*) — cony

Yellow perch (*Perca flavescens*) — perch

Sturgeon (*Acipenser fulvescens*) — lake sturgeon, rock sturgeon

Goldeye (*Hiodon alosoides*)

Arctic char (*Salvelinus alpinus*) — sea trout, ilkalu or ekaluk, Hudson Bay salmon

Sucker (*Catostomus* spp.) — "mullet"

Redhorse (*Moxostoma* spp.) — "mullet"

Burbot (*Lota lota*) — ling, maria, eelpout, lawyer

Sheepshead (*Aplodinotus grunniens*) — drum, sunfish, freshwater drum, silver bass

Buffalofish (*Ictiobus* spp.) — buffalo

Carp (*Cyprinus carpio*)

Quillback (*Carpoides cyprinus*) — white carp

Mooneye (*Hiodon tergisus*)

Channel catfish (*Ictalurus punctatus*) — catfish

Black bullhead (*Ictalurus melas*) — bullhead

Brown bullhead (*Ictalurus nebulosus*) — bullhead

Salmo gairdneri — rainbow trout

The Queen's Printer
for the Province of Manitoba

ANNEXE

- Truite de lac (*Cristivomer namaycush*) — Touladi, omble gris, truite, truite grise, truite saumonée
- Corégone (*Coregonus clupeaformis*) — corégone de lac, poisson blanc
- Doré commun (*Stizostedion vitreum*) — doré
- Brochet (*Esox lucius*) — brochet commun, brochet du Nord, grand brochet du Nord
- Doré noir (*Stizostedion canadense*) — black bonhomme, perche-chien, doré charbonnier
- Cisco (*Leucichthys* spp.) — tullibee, hareng de lac, sucet, poisson d'automne
- Inconnu (*Stenodus leucichthys*) — saumon du Mackenzie
- Perche (*Perca flavescens*) — perchaude
- Esturgeon jaune (*Acipenser fulvescens*) — esturgeon de lac, camus, maillé, escargot, esturgeon
- Laquaiche aux yeux d'or (*Hiodon alosoides*) — goldeye
- Ombre arctique (*Salvelinus alpinus*) — salveline arctique, ombre chevalier, truite de mer, ilkalu ou ekaluk, saumon de la Baie d'Hudson, ombre de fontaine, truite de ruisseau, truite rouge, truite saumonée, truite mouchetée
- Catostome noir commun (*Catostomus* spp.) — mulot, carpe, carpe ronde, carpe noire
- Moxostome (*Moxostoma* spp.) — moxostome doré, mulot, carpe, carpe noire, carpe bleue, carpe ronde
- Lote (*Lota lota*) — loche, urophycis, langue, morue longue, loquette d'Amérique, anguille de roche, loquette arctique, amie, lutjan, lutjanus
- Malachigan (*Aplodinotus grunniens*) — malachigan d'eau douce, môle, lune de mer, lune d'argent, poisson-lune, rouet
- Cyprin-carpe (*Ictiobus* spp.) — poisson à couette, buffalo
- Carpe (*Cyprinus carpio*)
- Brème (*Carpiodes cyprinus*)
- Laquaiche argentée (*Hiodon tergisus*)
- Barbue (*Ictalurus punctatus*)
- Barbotte noire (*Ictalurus melas*)
- Barbotte (*Ictalurus nebulosus*)
- Salmo gairdneri* — Truite arc-en-ciel

Mayor and Council
City Hall
510 Main St.
Winnipeg MB R3B 1B9

Dear Mayor and Council Members:

RE: Annual Audit Report for the Winnipeg Public Water System for Year 2010

Please find enclosed the 2010 Annual Audit Report for the Winnipeg Public Water System. As the audit reflects, your public water system fulfilled the obligations in year 2010 with regard to complying with the terms and conditions set forth in your water system's operating licence (PWS-09-412 RR).

The attached report provides details of your licensing requirements and your water systems' performance.

This Audit Report is based on information submitted to this office by various sources. If your records conflict with the audit information, or if you have any questions concerning this report, you may call me at 945-8913 or contact me by email.

Sincerely,

Gilbert Bushati
Senior Regional Drinking Water Officer

Wastewater Systems Effluent Regulations

Statutory authority

Fisheries Act

Sponsoring department

Department of the Environment

REGULATORY IMPACT ANALYSIS STATEMENT

(This statement is not part of the Regulations.)

Executive summary

Issue: Effluent from wastewater systems represents one of the largest sources of pollution, by volume, in Canadian waters. Negative impacts to aquatic ecosystems and to Canadians from harmful substances found in wastewater effluent have been documented domestically and internationally for over 20 years. In Canada, the management of wastewater is subject to shared jurisdiction, which has led to inconsistent regulatory regimes and varying levels of treatment across the country. Treatment levels range from very good in many areas to poor or no treatment, mostly on the coasts. Through various consultation processes, interested parties have consistently indicated the need for all levels of government to develop a harmonized approach to managing the wastewater sector in Canada.

To meet this need, there has been a strong history of consultation and cooperation on the management of wastewater in Canada over the past decade. These consultations culminated in 2009, when the Canadian Council of Ministers of the Environment (CCME) endorsed the Canada-wide Strategy for the Management of Municipal Wastewater Effluent (CCME Strategy). This strategy facilitates the development of a harmonized approach for the management of wastewater effluent in Canada. To help implement the CCME Strategy, the federal government committed to develop regulations under the *Fisheries Act* using the national effluent quality standards established in the CCME Strategy.

Description: The proposed *Wastewater Systems Effluent Regulations* (the proposed Regulations) have been developed under the *Fisheries Act* and would fulfill a commitment under the CCME Strategy for the establishment of national effluent quality standards. These standards represent a secondary level of wastewater treatment or equivalent. The objective of the proposed Regulations is to reduce the risks to ecosystem health, fisheries resources and human health by decreasing the level of harmful substances deposited to Canadian surface water from wastewater effluent.

In addition to the national effluent quality standards, the proposed Regulations also specify the conditions to be met in order to deposit effluent containing deleterious substances, such as requirements concerning toxicity, effluent monitoring, monitoring of the receiving environment and record-keeping and reporting. The deleterious substances specified under the proposed Regulations include biochemical oxygen demanding (BOD) matter, suspended solids (SS), total residual chlorine and un-ionized ammonia.

The proposed Regulations would apply to any wastewater system that has a capacity to deposit a daily effluent volume of 10 m³ or more from its final discharge point and that deposits a deleterious substance to surface water. ([see footnote 1](#)) The proposed Regulations would not apply to any wastewater system located in the Northwest Territories, Nunavut, and north of the 54th parallel in

the provinces of Quebec and Newfoundland and Labrador, as further research is required to set appropriate standards for the extreme climatic conditions found in those areas.

An owner or operator of a wastewater system depositing effluent not meeting the national effluent quality standards would be able to apply for a transitional authorization. It would establish the conditions under which such a system may continue to operate and would set the risk-based timeline to meet the national effluent quality standards. Wastewater systems posing a high risk would be required to meet the effluent quality standards within 10 years; those posing a medium risk, within 20 years; and those posing low risk, within 30 years.

The proposed Regulations would come into force through a phased approach. Effluent monitoring requirements, record-keeping and reporting requirements, and the provisions allowing for temporary or transitional authorizations to be applied for and issued would come into force on the day on which the proposed Regulations are registered. The requirement to meet the effluent quality standards would come into force 24 months following the registration of the proposed Regulations, with the exception of the standard for total residual chlorine, which would come fully into force over three years.

Cost-benefit statement: A cost-benefit analysis reveals that the proposed Regulations would likely result in significant net benefits nationally, even with only a partial quantification of benefits. While the estimated costs of the proposal are significant (in the order of \$5.9 billion in discounted 2010 dollars), the overall quantified benefits are almost three times this amount, totalling \$17.6 billion. This results in a benefit to cost ratio of almost 3:1 for the country as a whole.

The majority of the costs of the proposed Regulations would be borne by municipalities, as they own and operate the vast majority of wastewater systems in Canada. These include capital and operating costs for systems that need upgrading to meet the required standards. Non-capital costs would also be incurred, including monitoring and reporting costs, and in some cases environmental monitoring costs. Combined, all of the costs total \$5.9 billion in present value terms.

There are numerous benefits to improved wastewater effluent quality. These include healthier fish and aquatic ecosystems, increased recreational use, higher property values, reduced health risks from recreational contact with and consumption of fish, reduced water supply costs for municipalities and industry, increased commercial fisheries use, and increased value placed on ecosystem and water quality by individuals and house-holds for the benefit of both current and future generations.

It is difficult to quantify these benefits, so two measures that could be applied broadly to communities across Canada were selected. These include the willingness to pay for improved water quality and the property value increases linked to improved water quality. The total willingness to pay for communities that would need to upgrade their wastewater systems across Canada is estimated to be \$3.2 billion in present value terms. The total property value increases that would likely result are estimated to be worth \$14.4 billion in present value terms. Note that these two methods only provide a partial measure of the full benefits of the proposed Regulations. There are many benefits that cannot be quantified with the available information, such as the impact of increased access to shellfish harvesting areas or the impacts of local tourism. Thus, the total benefits are expected to be even higher than those presented here.

Business and consumer impacts: Businesses and consumers may face higher taxes or utility rates to help pay for the costs associated with the required capital upgrades in a number of communities. There is insufficient information available to the federal government to predict the potential magnitude of such increases. However, as public infrastructure is funded through a variety of sources, impacts on businesses and consumers in particular communities are expected to be relatively small. Governments have also agreed to explore alternatives for very small communities to address the proposed regulatory requirements in an efficient manner.

To limit the administrative burden of the proposed Regulations, Environment Canada would develop an electronic reporting tool for use by all regulators and regulatees. This tool would enable reports to be submitted and tracked electronically.

In terms of competitiveness impacts, improved water quality from the proposed Regulations would result in a number of benefits: improvements in water quality would be expected to have a positive impact on the fishing and seafood industry, valued at \$5 billion in 2005; it would serve to reduce

contaminant-related harvest closures in the shellfish industry, valued at \$1.5 billion in 2008; and it could help remove barriers to markets for seafood, e.g. mussel exports from Eastern Canada. Benefits would also likely include fewer beach closures and an increased ability of Canadians and visitors to enjoy water-based recreation throughout Canada. This would positively impact the tourism industry, which represents approximately 2% of Canada's GDP.

Domestic and international coordination and cooperation: The proposed Regulations include national baseline standards for effluent deposited from wastewater systems across the country. These effluent standards would bring Canada generally in line with standards adopted in both the United States and the European Union.

The proposed Regulations could enhance coordination between Canada and the United States with respect to transboundary water quality. This would be especially true in the Great Lakes, where Canada and the United States are party to the Great Lakes Water Quality Agreement, which includes commitments for both countries to cooperate on the clean up of industrial effluent and wastewater effluent.

The proposed Regulations could also enhance cooperation and coordination with the global community. Wastewater effluent is one of the key issues under the Global Programme of Action for the Protection of the Marine Environment from Land-Based Activities (GPA), which Canada adopted in 1995 and responded to with its own National Programme of Action (NPA). The proposed Regulations would help respond to the NPA on this issue.

Performance measurement and evaluation plan: A performance measurement and evaluation plan has been prepared for the proposed Regulations. It outlines the outcomes that would be measured and evaluated to assess the performance of the proposed Regulations. A key outcome is the regulated community being in compliance with the proposed requirements. Another would be that national effluent quality standards are achieved within prescribed timelines and are maintained. The overall outcome would be that risks to ecosystem health, fisheries resources and human health are reduced.

These outcomes would be evaluated in phases to capture the effectiveness of the development and implementation of the proposed Regulations. Proposed effectiveness indicators include the percentage of the regulated community that is in compliance with the limits for effluent quality. The reduction in loadings of deleterious substances, as defined under the proposed Regulations, would also be used to evaluate these outcomes and would be determined annually.

Reporting on the progress and performance of the proposed Regulations would occur through Departmental Performance Reports. Annual reports, based on the routine reporting required by the proposed Regulations, would also be produced and made publicly available. With respect to the assessment of the overall effectiveness of the implementation of the proposed Regulations, Environment Canada would work with the departmental Head of Evaluation to determine the scope of the evaluation, as well as the appropriate timing. Environment Canada would also report on the overall outcomes of environmental effects monitoring studies.

Issue

Effluent from wastewater systems represents one of the largest sources of pollution, by volume, in Canadian waters. Negative impacts to aquatic ecosystems and to Canadians from harmful substances found in wastewater effluent have been documented domestically and internationally for over 20 years. In Canada, the management of wastewater is subject to shared jurisdiction, which has led to inconsistent regulatory regimes and varying levels of treatment across the country. Treatment levels range from very good in many areas to poor or no treatment, mostly on the coasts. Through various consultation processes, interested parties have consistently indicated the need for all levels of government to develop a harmonized approach to managing the wastewater sector in Canada.

Wastewater effluent has been shown to have a variety of harmful impacts on ecosystem health, fisheries resources and human health in Canada. ([see footnote 2](#)) Ecosystem impacts can include fish kills; algal blooms; the destruction of habitat from sedimentation, debris, and increased water flow; and short- and long-term toxicity from chemical contaminants; along with the accumulation and magnification of chemicals at higher levels of the food chain. Human health risks can also stem from the release of untreated or inadequately treated wastewater effluent. In some circumstances, it could contaminate drinking water sources with bacteria, protozoans, ([see](#)

[footnote 3](#)) and several other toxic substances. Canadians may also be put at risk from consuming contaminated fish and shellfish and engaging in recreational activities in contaminated waters. In terms of fisheries resources, wastewater effluent can, for instance, limit the full potential of the Canadian shellfish industry, an industry with sales of \$1.5 billion per year, by contributing to the closure of harvesting areas. It can also impact tourism by contributing to lost recreational opportunities resulting from beach closures and restrictions on other beneficial water uses. ([see footnote 4](#))

The impacts of wastewater effluent largely depend on several site-specific factors. These include the volume of effluent discharged; the level of treatment and resulting effluent quality; the characteristics of the receiving environment; and climatic conditions. However, the sheer volume of wastewater effluent being discharged to Canadian surface water from over 3 700 wastewater systems, conservatively estimated at 6 trillion litres per year, also raises concern. ([see footnote 5](#)) For instance, over 150 billion litres of this is likely untreated. Thus, improving wastewater effluent quality would help ensure that Canada's precious fisheries and water resources are preserved and protected now and in the future.

Towards this goal, there has been a strong history of consultation and cooperation on the management of wastewater in Canada over the past decade. This culminated in 2009, when the Canadian Council of Ministers of the Environment (CCME) endorsed the Canada-wide Strategy for the Management of Municipal Wastewater Effluent (CCME Strategy). This strategy facilitates the development of a harmonized approach for the management of wastewater effluent in Canada. To help implement the CCME Strategy, the federal government committed to developing regulations under the *Fisheries Act* using the national wastewater effluent quality standards established in the CCME Strategy. The proposed *Wastewater System Effluent Regulations* (the proposed Regulations) would respond to that commitment.

Objectives

The objective of the proposed Regulations is to reduce the risks to ecosystem health, fisheries resources and human health by decreasing the level of harmful substances deposited to Canadian surface water from wastewater effluent. To achieve the objective, the proposed Regulations would set national effluent quality standards that would require secondary wastewater treatment, or equivalent, in wastewater systems ([see footnote 6](#)) across Canada.

This objective is expected to be fully achieved through risk-based implementation timelines that extend over 30 years. However, a significant proportion of wastewater systems not currently meeting the standards are anticipated to be high risk. These would be required to meet the standards within 10 years. This approach provides time for owners and operators of systems requiring infrastructure upgrades to plan, finance, and implement cost-effective measures to meet the required standards.

Description

The proposed Regulations have been developed under the *Fisheries Act* and would set national effluent quality standards for specified deleterious substances in effluent deposited from wastewater systems. They also specify the conditions to be met in order to deposit effluent containing deleterious substances, such as requirements concerning toxicity, effluent monitoring requirements, receiving environment monitoring requirements, and record-keeping and reporting requirements.

Application

The proposed Regulations would apply to any wastewater system that has a capacity to deposit a daily volume of effluent of 10 m³ or more from its final discharge point and that deposits a deleterious substance to surface water. The proposed Regulations would not apply to any wastewater system located in the Northwest Territories, Nunavut and north of the 54th parallel in the provinces of Quebec and Newfoundland and Labrador. A window of up to five years was provided in the CCME Strategy to undertake research to set appropriate standards for the extreme climatic conditions found in those areas. Discharges from separate storm sewer systems would not be covered under the proposed Regulations given these are not wastewater systems.

Deleterious substances

Deleterious substance is defined in subsection 36(3) of the *Fisheries Act*. ([see footnote 7](#)) In summary, a deleterious substance is something that would degrade or alter the quality of water so that it is rendered deleterious to fish or fish habitat or to the use of fish by people. The deleterious substances specified under the

proposed Regulations include biochemical oxygen demanding (BOD) matter, suspended solids (SS), total residual chlorine and un-ionized ammonia. The proposed effluent quality standards for these substances are as follows:

- | average carbonaceous biochemical oxygen demand (CBOD) due to the quantity of BOD matter in the effluent of less than or equal to 25 mg/L;
- | average concentration of suspended solids in the effluent of less than or equal to 25 mg/L;
- | average concentration of total residual chlorine in the effluent of less than or equal to 0.02 mg/L; and
- | maximum concentration of un-ionized ammonia in the effluent of less than 1.25 mg/L, expressed as nitrogen (N), at 15°C ± 1°C.

The average CBOD and average concentrations of suspended solids and total residual chlorine are based on quarterly or monthly averages depending on the annual average daily volume of effluent deposited from the final discharge point of the wastewater system.

These effluent quality standards are indicative of a secondary level of treatment, or equivalent. Such a level of treatment removes over 95% of the total mass of conventional pollutants in wastewater (i.e. BOD matter, suspended solids and nutrients). Significant amounts of non-conventional pollutants and bacteria that may be present are also removed through such treatment.

Transitional and temporary authorizations

An owner or operator of a wastewater system depositing effluent not meeting the national effluent quality standards for CBOD and/or suspended solids upon registration of the proposed Regulations may apply for a transitional authorization within 18 months. Transitional authorizations would establish the conditions under which such a system may continue to operate and would set the risk-based timeline to meet the national effluent quality standards. This approach considers the characteristics of the system's effluent, the receiving environment and, if applicable, characteristics of overflow locations from combined sewers. [\(see footnote 8\)](#) Wastewater systems posing a high risk would be required to meet the effluent quality standards within 10 years, those posing medium risk within 20 years, and those posing low risk within 30 years.

The proposed Regulations also provide a mechanism to apply for temporary authorizations. One type of temporary authorization would authorize the deposit of un-ionized ammonia at a concentration in excess of the proposed standard under specific circumstances, including receiving environment considerations. The other temporary authorization would be to authorize the bypassing of effluent under certain circumstances, such as planned maintenance or construction activities.

Effluent monitoring

Effluent monitoring and reporting requirements are also specified under the proposed Regulations. Owners or operators of wastewater systems would be required to install, maintain and calibrate monitoring equipment and to monitor the volume and the composition of the effluent. The proposed Regulations prescribe minimum sampling frequencies and the type of sample to be collected based on the annual average daily volume of effluent deposited. Systems that deposit larger annual average daily volumes of effluent would be required to monitor more frequently than those with smaller volumes.

Receiving environment monitoring

Environmental effects monitoring (EEM) requirements are also included under the proposed Regulations. These requirements are intended to help evaluate the effectiveness of the effluent quality standards in protecting fish and fish habitat. The requirements include water quality and biological monitoring studies that would be required to be conducted by approximately 200 wastewater systems that meet the effluent quality standards and the criterion of a risk-based test. The EEM requirements would last for a period of up to 13 years or four cycles of monitoring, depending on the results of the initial cycles. Wastewater systems demonstrating no impacts in two consecutive cycles would no longer be required to conduct monitoring.

Reporting and record keeping

The proposed Regulations would require that monitoring reports be sent on a quarterly basis to the federal Minister of the Environment. Records, copies of reports and any supporting documents, as prescribed in the proposed Regulations, would be required to be kept for at least five years at the wastewater system or at any

other place in Canada where they could be inspected. Information pertaining to monitoring equipment would need to be kept for at least five years after the useful life of the monitoring equipment, and the identification report, as it may be updated, would need to be kept for at least five years after the wastewater system is decommissioned.

Deposits out of the normal course of events

Notification and reporting of deposits out of the normal course of events are addressed in the proposed Regulations. Requirements for notifying and reporting on such deposits are specified. The owners and operators of all wastewater systems would be required to prepare a response plan to prevent any deposit of a deleterious substance out of the normal course of events from the wastewater system into surface water.

Coming into force

Elements of the proposed Regulations would come into force at different times. Effluent monitoring requirements, record keeping, and reporting requirements, as well as the provisions allowing for temporary or transitional authorizations to be applied for and issued would come into force on the day on which the Regulations would be registered. The requirement to meet either the national effluent quality standards for BOD matter, suspended solids, and un-ionized ammonia, or the limits for those substances as authorized through transitional authorizations, would come into force 24 months after the day on which the Regulations would be registered. The requirement to meet the effluent quality standard for total residual chlorine would come into force 24 months after the day on which the Regulations would be registered for wastewater systems that deposited 5 000 m³/day or more in the previous year and would come into force on January 1, 2014, for all other wastewater systems.

Implementation

Under the CCME Strategy, administrative agreements between the federal government and individual jurisdictions (i.e. the provinces and the Yukon) are expected to be put in place to ensure the efficient implementation of the proposed Regulations. These would clarify roles and responsibilities with respect to administrative functions such as compliance promotion and enforcement activities. Further details on the implementation of the proposed Regulations are provided under the *Costs to governments* and the *Implementation, enforcement and service standards* sections below.

Background

Wastewater systems vary in terms of design, depending on such things as the specific needs of communities, the quantity and quality of wastewater to be treated, and financial considerations. The treatment from such systems can be generally categorized into three levels — primary, secondary, or tertiary (advanced) treatment. All of these levels of treatment typically begin with a preliminary screening to remove large solid objects, debris, and grit. Primary treatment is the most basic form of treatment that relies on a mechanical process to physically separate suspended solids from the water. Secondary treatment utilizes biological processes to remove additional solids from the water. Tertiary treatment is more advanced and generally is used to target specific substances of concern or to achieve a particular level of desired effluent quality. It can be accomplished using a number of physical, chemical or biological processes (e.g. carbon filters, reverse osmosis).

Municipalities own and operate the majority of wastewater systems in Canada. ([see footnote 9](#)) Wastewater systems are also owned and operated by provinces, territories, federal departments, agencies and other entities. Public-private management arrangements also exist in Canada, and they usually involve private sector operation and public sector ownership of wastewater systems. In addition, relatively few small wastewater systems serve private sector interests.

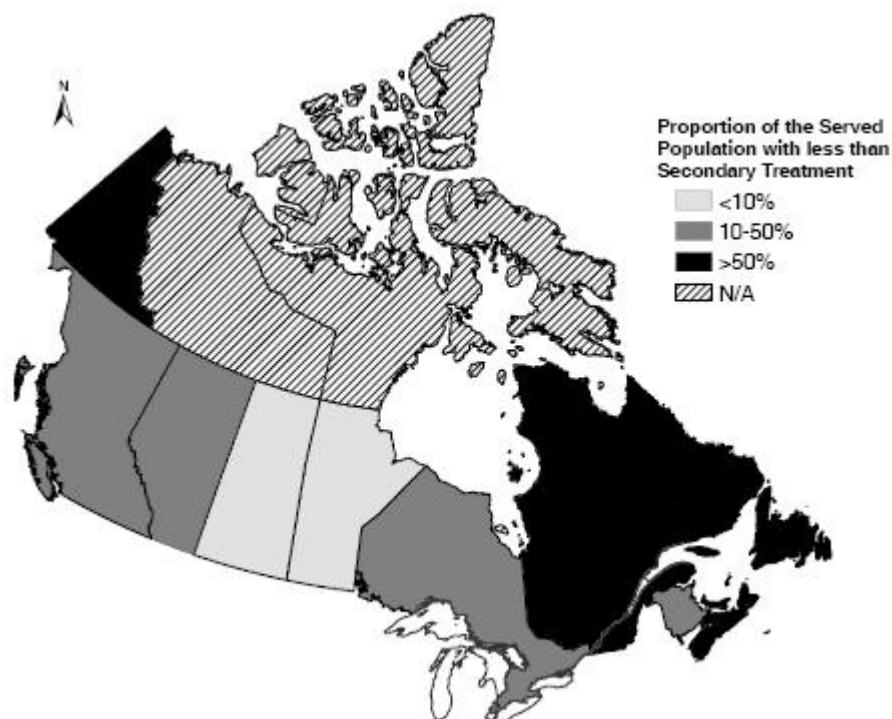

Despite the increase in public infrastructure investment over the past decades, Canada's wastewater systems are aging. A large percentage of these were constructed in the 1960s and, as of 2007, it was estimated that many facilities had passed over 60% of their useful life nationally. ([see footnote 10](#)) Thus, significant new investment will be required for this sector in the near future.

The number of Canadians receiving wastewater treatment has increased substantially since 1983, when approximately 70% of the population on sewers was served by some form of treatment. ([see footnote 11](#)) There are now over 3 700 wastewater systems in Canada and, according to Environment Canada's *2007 Municipal Water Use Report*, more than 28 million people living in 1 294 municipalities were being served by wastewater

collection and treatment in 2004. ([see footnote 12](#)) Of these, 68% were receiving at least secondary treatment (47% secondary mechanical and 20.9% advanced treatment), 23% were receiving primary treatment and 6% were served by stabilization ponds. In spite of this progress, many parts of the country continue to discharge untreated wastewater into Canadian waters. Nationally, 3.2% of the population served by sewer systems had no treatment for their wastewater effluent.

Additionally, the degree of wastewater treatment varies greatly across Canada. For instance, there are much lower treatment levels for releases to coastal waters than inland fresh waters. As reflected in Figure 1, three of the Atlantic provinces and Quebec have less than 50% of their population served by sanitary sewer systems with secondary treatment or better. Additionally, British Columbia has approximately 36% of its served population receiving less than secondary treatment. Conversely, inland provinces such as Saskatchewan, Manitoba and Ontario have 99%, 98% and 89% of their served population discharging to systems with secondary wastewater treatment, respectively. ([see footnote 13](#))

Figure 1 — Canadian wastewater performance, 2004 ([see footnote 14](#))

Wastewater management in Canada

The management of wastewater involves all levels of government in Canada. Effluent from wastewater systems in Canada must comply with applicable federal legislation including the *Canadian Environmental Protection Act, 1999* (CEPA 1999) and the *Fisheries Act*, as well as applicable provincial, territorial or water board legislation, permits or licenses. Due to this shared jurisdiction, the existing regulatory regimes have varying requirements that in many cases are not consistent.

Requirements in other jurisdictions

United States

In the United States, the *Clean Water Act* requires a minimum of secondary treatment at municipal wastewater treatment plants. In addition, permits are allocated to wastewater treatment facilities, placing limits on discharge and requiring monitoring and reporting.

European Union

The European Union has set similar standards to those that are in place in the United States. However, in the European Union, specifications apply depending on the size of the community. All communities having more than 15 000 people are required to use a minimum of secondary treatment of wastewater, or the equivalent thereof.

Current policy context

The proposed Regulations have been developed through a process that builds on a history of consultation over the past decade on the management of wastewater effluent in Canada. For instance, Environment Canada presented a risk management strategy for wastewater effluent during consultation sessions held in the fall of 2002. Stakeholder feedback indicated strong support for a harmonized approach to wastewater management, which included implementing preventive or control actions for pollutants and contaminants in wastewater and a federal-provincial-territorial agreement on the management of wastewater effluent. Many interested parties stated their desire for regulations under the *Fisheries Act* to clarify the current requirement of the prohibition on the deposit of deleterious substances. Subsection 36(3) general prohibition prohibits anyone from depositing or permitting the deposit of a deleterious substance of any type in water frequented by fish, or in any place under any conditions where the deleterious substance, or any other deleterious substance that results from the deposit of the deleterious substance, may enter any such water.

Environment Canada subsequently developed preventive actions for chlorine and ammonia. On December 4, 2004, the Minister of the Environment published in the *Canada Gazette*, Part I, a *Notice requiring the preparation and implementation of pollution prevention plans for inorganic chloramines and chlorinated wastewater effluents* (the Notice) and a *Guideline for the release of ammonia dissolved in water found in wastewater effluents* (the Guideline) under CEPA 1999. The Notice and the Guideline outlined performance objectives for chlorine and ammonia, respectively, applicable to wastewater effluent. These instruments were selected to respond to the requirements of CEPA 1999, for substances added to Schedule 1, with the recognition that these substances would be further addressed as part of a harmonized approach to wastewater management.

In 2003, the CCME agreed to begin the development of a harmonized approach for the management of wastewater. The CCME Strategy addresses issues related to wastewater system effluent quality and quantity and its associated risk. Governance as well as cost and funding issues were also considered. This work culminated in the endorsement of the CCME Strategy by the Council of Ministers on February 17, 2009.

To outline the actions the Government of Canada proposed to take to implement the CCME Strategy, Environment Canada developed the October 2007 consultation document titled Proposed Regulatory Framework for Wastewater. ([see footnote 15](#)) A key element of the proposed framework was the development of wastewater effluent regulations under the *Fisheries Act*.

Regulatory and non-regulatory options considered

Several regulatory and non-regulatory measures were considered. These are discussed below.

Status quo

Under the status quo, subsection 36(3) of the *Fisheries Act* prohibits anyone from depositing or permitting the deposit of a deleterious substance of any type in water frequented by fish, or in any place under any conditions where the deleterious substance, or any other deleterious substance that results from the deposit of the deleterious substance, may enter any such water. This current prohibition is not always aligned with the regulatory regimes of the provinces and territories. It has resulted in various levels of wastewater treatment across Canada which means that Canadians do not necessarily enjoy similar levels of benefits. These benefits, for both current and future generations, include increased recreational use, higher property values, reduced health risk from recreational contact and consumption of fish, reduced water supply costs for municipalities and industry, increased commercial fisheries use, and an increased value placed on ecosystem and water quality by individuals and households. A harmonized approach to the risk management of wastewater, including a baseline for effluent quality, is needed to manage the risks to ecosystem health, fisheries resources and human health posed by harmful substances being deposited in Canadian surface water from wastewater effluent. The status quo has not achieved this objective and therefore was not considered appropriate.

Voluntary measures

Voluntary measures were considered for the management of wastewater effluent. Along with the pollution prevention provisions of the *Fisheries Act*, voluntary tools such as guidelines or codes of practice could be structured under government authority. The main concern with these tools is their effectiveness in achieving the risk management objective. A voluntary measure is unlikely to result in a consistent effluent quality equivalent to that achieved by secondary level wastewater treatment as set out in the proposed Regulations. For example, the *Guidelines for Effluent Quality and Wastewater Treatment at Federal Establishments* have been in place for federal facilities since 1976; however, the results have varied. Therefore, voluntary measures were not

considered appropriate.

Market-based instruments

Market-based instruments were considered, but not adopted due to a lack of suitability. For instance, permit trading is most effective when covering deposits to a single receiving environment (e.g. a specific water body or watershed). This avoids cases where excessive releases are allowed in one region over another. Since the proposed Regulations are intended to help address the current lack of consistency in wastewater treatment levels across Canada and provide improved clarity for the sector through the establishment of common national performance standards, such a market-based system was not considered to be appropriate in this case.

Regulatory measures

Regulations were considered to be the best option for achieving the objective of reducing the risks to ecosystem health, fisheries resources and human health posed by wastewater effluent. Regulations that set limits resulting in effluent quality equivalent to that of secondary level wastewater treatment would achieve this objective. The *Fisheries Act* allows for the establishment of such regulations that permit the deposit of deleterious substances to specified levels. Regulations would also implement the Government of Canada's commitment in the CCME Strategy to establish national standards for wastewater effluent in federal regulations. The limits on the deleterious substances would be nationally consistent and enforceable. Adherence to these limits would result in reduced levels of harmful substances being discharged to surface water from wastewater systems in Canada. Without a nationally consistent regulatory approach, it would be much more difficult to ensure that all Canadians enjoyed a similar level of protection for their water resources. As such, the proposed Regulations have been developed to achieve the desired objective.

Benefits and costs

The development of the proposed Regulations included an analysis of the likely significant impacts of the initiative. The assessment included a cost-benefit analysis (CBA) that quantified, to the extent practical, the potential costs and benefits of the regulatory proposal. It also highlighted potential distributional impacts. Risk analysis was also conducted to assess how sensitive the results were to changes in key variables. The results of the overall impact analysis are presented below.

Impact analysis approach

The cost-benefit analysis methodology used to assess the proposed Regulations was based on a framework established in a study conducted for the CCME as part of the background work undertaken for the development of the CCME Strategy. ([see footnote 16](#)) This framework was then adjusted and applied on a national scale in order to assess the specific scope and requirements of the proposed Regulations.

The basic approach involved first identifying the wastewater systems that would need to be upgraded to meet the proposed national effluent quality standards and estimating the cost of the upgrades. The likely environmental benefits resulting from the upgrades were then identified and put in dollar terms (i.e. monetized) to the extent practical given the available information. Two measures were used to quantify the benefits — willingness to pay (WTP) and property value increases. Other costs associated with the proposed Regulations were also assessed, such as administrative costs to wastewater system operators and costs to governments. All of the monetized costs and benefits were discounted to 2010 dollars using an 8% discount rate, and the net benefits were calculated. Various distributional impacts were also assessed.

Information for the analysis was provided by the CCME's Economics and Funding Task Group (EFTG). ([see footnote 17](#)) In 2006, it collected data from all of the jurisdictions involved in developing the CCME Strategy (i.e. provinces, territories, and the federal government). Part of the information collected included data on the individual facilities that would need upgrading in each jurisdiction, as well as a preliminary risk-ranking score indicating whether each facility likely represents a high, medium or low risk to the receiving environment. The total number of facilities identified as needing upgrading to meet the proposed national effluent quality standards and their associated risk rankings are summarized in Table 1 below.

Table 1 — National ranking of wastewater facilities in Canada

	Number of Facilities Requiring Upgrades Based on National Ranking System

Jurisdiction	Low Risk 2040	Medium Risk 2030	High Risk 2020	Total
Alberta	6	40	2	48
British Columbia	0	5	8	13
Manitoba	0	81	0	81
New Brunswick	13	44	0	57
Newfoundland and Labrador	0	1	185	186
Nova Scotia	9	37	16	62
Ontario	102	4	3	109
Prince Edward Island	17	7	0	24
Quebec	0	154	33	187
Saskatchewan	0	29	1	30
Yukon	0	1	1	2
Federal	0	0	150	150
Total	147	403	399	949

As can be seen in the above table, high-risk facilities represent almost half of the total number of wastewater facilities expected to need upgrading. Under the proposed risk-based timelines, these would need to meet the national effluent quality standards included in the proposed Regulations by 2020.

Main results

Monetizing all values in the quantified analysis and discounting to 2010 dollars enables an assessment of whether the quantified benefits of the proposed Regulations are likely to exceed the costs. The results of this are presented in Table 2 below.

As the table shows, the quantified benefits of the proposed Regulations exceed the costs by a considerable margin on a national level. They result in a net benefit of approximately \$11.7 billion for the country as a whole. This represents a benefit to cost ratio of 3:1, which means that the quantified benefits of the proposed Regulations are almost three times that of the costs on a national basis.

Table 2 — Benefits to costs ratio

Total benefit	\$17,636,388,040
Total cost	\$5,937,803
Benefit/Cost	3:1

Further details on the costs, benefits, and net benefits are provided in the following sections.

Costs

The costs associated with the proposed Regulations generally fall under two categories. The first would be costs incurred by owners and operators of wastewater systems, while the second would be costs incurred by governments charged with implementing the proposed Regulations. Each is described below.

Wastewater system costs

The majority of the wastewater system costs would be borne by municipalities, as they own and operate the vast majority of the wastewater systems in Canada. Costs would include capital costs for wastewater systems needing upgrades to meet the national effluent quality standards. These were provided by the jurisdictions to the CCME's EFTG in 2006. In addition, estimates of operating and maintenance (O&M) costs, as well as other non-capital costs for monitoring and reporting requirements, were generated or taken from the CCME development work, as appropriate for the proposed Regulations.

The total costs to wastewater system owners and operators are estimated to be \$5.9 billion discounted to 2010

dollars. Capital costs would be expected to be approximately \$3.2 billion, O&M around \$1.9 billion, and other non-capital costs \$777 million.

Other non-capital costs include monitoring and reporting costs, as well as environmental effects monitoring costs for the sub-set of systems that would be required to undertake environmental monitoring. The majority of the other non-capital costs would be for monitoring and reporting, with EEM costs amounting to only about \$80,000 per system. Monitoring equipment costs would also be incurred where such equipment is not already in use, which would be primarily in the case of small systems. However, these costs (estimated at \$2,500 for each small system) do not have a significant impact on the total.

Cost to governments

The other main costs that would likely be directly incurred as a result of the proposed Regulations would be borne by governments responsible for their implementation. These administrative costs are characterized into three main categories including compliance promotion, enforcement, and EEM.

The total cost to governments to implement the proposed Regulations would be \$28.1 million. This is the present discounted value of the stream of costs in 2010 dollars. Approximately 75% of these costs would be borne by the provinces and the Yukon, with the remainder by the federal government. The total includes \$17.7 million for compliance promotion activities, which would include workshops, outreach, responding to enquiries, performance measurement management and other administrative costs. Enforcement costs would total \$6.7 million.

Enforcement activities would include inspections for all systems in Canada over the period and re-inspections of those that initially are found to be not in compliance. Other costs include lab analysis, travel and other administrative costs. The remaining \$3.6 million represents costs that would be incurred by the federal government for EEM administration and the cost to develop and operate an electronic reporting system to be used by governments and wastewater system operators for the input and tracking of information required under the proposed Regulations.

Note that for the purposes of the analysis, the expected implementation costs of the proposed Regulations are captured to give a sense of what the proposed Regulations would require administratively. However, it is anticipated that implementation of the proposed Regulations would fit in with ongoing regulatory activities within all of the jurisdictions. These activities ebb and flow as regulations pass from periods of high activity to lower activity over time. Thus, it is anticipated that existing resources should be sufficient to implement the proposed Regulations over the time period considered, and no additional funding would be sought.

Benefits

Improving wastewater treatment levels in Canada would have significant and wide-ranging benefits throughout the country. The national effluent quality standards included in the proposed Regulations would require the over 3 700 wastewater systems in Canada to provide at least a secondary treatment level or equivalent. Over a quarter of these are expected to need upgrading in order to meet this standard. As a result, pollution in Canada's waterways would be reduced, leading to a number of important benefits for ecosystems, aquatic organisms and for the health of Canadians. The quantified benefits are described and then monetized to the extent practical below.

Non-monetized benefits

Upgrading wastewater systems in Canada currently not meeting the national effluent quality standards included in the proposed Regulations would lead directly to a reduction in the mass of pollutants being deposited to surface water. It is estimated that biochemical oxygen demanding matter, which depletes available oxygen in water, would be reduced by 55 156 metric tonnes. The resulting increase in dissolved oxygen would improve biodiversity in the aquatic environment. Suspended solids, which cloud water, limit the effectiveness of disinfectants and can lead to the blanketing of spawning grounds, would be reduced by a total of 66 651 metric tonnes. Total phosphorous would be reduced by 5 041 metric tonnes. This and other nutrients can lead to excessive plant growth and algae blooms in water, which can foul beaches and suffocate aquatic life, including fish. Total ammonia would be reduced by 16 930 metric tonnes. Reduced total ammonia levels improve dissolved oxygen levels in water, and the accompanying reductions in un-ionized ammonia reduce the toxic effects of wastewater deposits on fish and shellfish.

Limits for total residual chlorine (TRC) are also part of the national effluent quality standards in the proposed

Regulations. However, insufficient information is available to estimate the TRC loading reductions that would result from the wastewater system upgrades. Nevertheless, benefits would be expected as the TRC that remains in wastewater effluent has the potential to cause toxic or harmful effects to aquatic life, even at very low concentrations. For instance, TRC in wastewater effluent can be lethal to fish and can cause changes in the structure of benthic invertebrate communities. ([see footnote 18](#)) Other effects on fish include damage to the gills and nervous system. ([see footnote 19](#)) Some forms of TRC have the potential to also impact public health (e.g. trihalomethanes), but human exposure to TRC in wastewater effluent should be rare.

Reduced pollutant loadings in wastewater can lead to a significant improvement in ecosystem health, as well as to important benefits to fisheries resources. The negative impacts of untreated sewage and its components are well understood and while impacts to shellfish are quickly recognized by most people, sewage has impacts on many species at many food chain levels, and contributes to overall habitat and water quality degradation. Reduced pollutants would bring related economic benefits that are recognized but difficult to measure.

In addition to those described above, higher quality wastewater effluent would lead to other benefits. These include increased recreational use of water; higher property values; reduced health risk from recreational contact and consumption of fish; reduced water supply costs for municipalities and industry; increased commercial fisheries use, and an increased value placed on ecosystem and water quality by individuals/households for the benefit of both current and future generations. The above benefits are considerable but are difficult to quantify.

Monetized benefits

As discussed above, the environmental and societal benefits of the proposed Regulations are many and varied. However, in practice it is difficult to monetize the full range of benefits. Therefore, the cost-benefit analysis of the proposed Regulations focused on a subset of benefits, based on the approach taken in the CBA study done for the CCME. ([see footnote 20](#)) Two benefit measures were identified that can be applied broadly to the communities affected by the proposed Regulations. These are households' willingness to pay for surface water quality improvements and property value increases. Each of these benefits and the approach to monetize them are discussed below.

In terms of willingness to pay, a large number of studies from Canada and other countries show that members of households value improved surface water quality. The willingness of households to pay originates from changes in health risk, recreational opportunity, aesthetics and intrinsic values associated with ecosystem improvements. In practice, it is difficult to disentangle all of these benefits, and thus studies generally develop one overall aggregate value estimate. This is usually referred to as willingness-to-pay (WTP) for improved surface water quality.

As was done in the CBA study for CCME, three different methods were used to come up with an overall average WTP for the benefits of the proposed Regulations. These three measures were averaged and used to estimate the benefits to households of improved surface water quality attributable to the proposed Regulations. This resulted in an average WTP of \$3.2 billion for the country. This is in present value terms and expressed in 2010 dollars (PV-2010).

With respect to property value increases, studies dating back to the 1970s have shown a positive relationship between surface water quality and housing prices. As per the approach taken for the CCME CBA, ([see footnote 21](#)) a range of values between 5% and 10% were used in the assessment of the proposed Regulations. As well, the number of properties that would experience an increase in property value was determined by estimating the number of dwellings within one kilometre of an improved water body, and the 2006 Census subdivision data provided average housing price information for all of the affected communities.

Total property value increases resulting from the proposed Regulations are estimated to be \$14.2 billion nationally (PV-2010).

Net benefits

The results of the quantified analysis are presented in Table 3 below. It illustrates the benefits and costs of the proposed Regulations by jurisdiction, along with the net benefits. All figures are in thousands of 2010 dollars, discounted at 8%.

Table 3 — Present value net benefits of proposed Regulations

--	--	--

Jurisdiction	Benefits		Costs	
	WTP PV (000s)	Property Value PV (000s)	Capital Costs PV (000s)	O&M Costs PV (000s)
AB	\$19,030	\$51,925	\$102,931	\$30,910
BC	\$434,779	\$5,574,747	\$254,862	\$83,243

NB	\$35,093	\$58,202	\$83,232	\$23,881
NL	\$37,792	\$404,945	\$410,141	\$263,441
NS	\$1,544,985	\$404,774	\$216,512	\$126,411
ON	\$126,239	\$223,297	\$95,380	\$57,450
PE	\$7,251	\$16,264	\$6,875	\$3,534
QC	\$812,760	\$7,166,333	\$1,554,721	\$1,120,715
SK	\$51,739	\$157,163	\$23,349	\$12,314
YT	\$466	\$4,006	\$11,146	\$6,329
FED	\$49,259	\$63,140	\$120,028	\$49,876
TOTAL	\$3,212,850	\$14,423,538	\$3,228,256	\$1,904,327

* Values in 000s discounted to 2010 dollars at 8%.

Jurisdiction	Costs		NET Benefit PV (000s)
	Other Non-Capital Costs PV (000s)	Cost to Government PV (000s)	
AB	\$65,653	\$2,246	-\$130,785
BC	\$56,767	\$1,894	\$5,612,761
MB	\$38,934	\$1,375	-\$123,412
NB	\$51,393	\$1,628	-\$66,840
NL	\$40,223	\$1,236	-\$272,305
NS	\$74,614	\$2,213	\$1,530,010
ON	\$112,155	\$3,163	\$81,388
PE	\$11,235	\$319	\$1,552
QC	\$165,597	\$4,824	\$5,133,237
SK	\$60,975	\$2,073	\$110,192
YT	\$2,206	\$80	-\$15,288
FED	\$97,389	\$7,031	-\$161,926
TOTAL	\$777,140	\$28,080	\$11,698,585

* Values in 000s discounted to 2010 dollars at 8%.

As previously discussed, the overall result is a 3:1 benefit to cost ratio. As evidenced by the total values in the above table, the majority of the benefits accrue from the property value assessment, while the majority of the costs are derived from the capital costs of the upgraded wastewater systems and the associated O&M costs. Note that not all of the quantified net benefits are positive in each jurisdiction. These impacts are discussed later in the distributional impacts section.

Sensitivity analysis

Given the long timeframe of the analysis and the uncertainty around a number of the key parameters of the CBA model, sensitivity analysis is an important part of the overall assessment of the proposed Regulations.

Monte Carlo analysis was the main tool used to assess sensitivity. Monte Carlo analysis uses computer-based simulation to perform repeated random sampling of key variables that are identified as being subject to

uncertainty. This process generates expected values and statistical probabilities. Thus, one can see the likelihood of the outcome occurring when all variables of interest are allowed to vary simultaneously. Using this approach, it is estimated that the proposed Regulations would result in an expected net benefit to Canadians of \$11.9 billion, with a 90% probability that the net benefit would be between \$800 million and \$23.9 billion. There would only be a 4% chance that the proposed Regulations would not result in a positive net benefit under this analysis.

For the various jurisdictions, the results generally confirm the main findings as well. Those showing net benefits have high probabilities of achieving them in the results, while those with net costs have high probabilities of achieving those. Only the Prince Edward Island results have a significant probability of having a different overall result (i.e. there is a 43% chance of a net cost vs. a 47% chance of a net benefit).

However, it is important to keep in mind that these sensitivity results only apply to what was included in the quantitative analysis. As discussed, only a subset of the likely benefits could be quantified. Many, such as impacts on shellfish harvesting, tourism, human health, or locally sensitive environments, are not accounted for or only partially accounted for in the analysis. If such benefits could be fully incorporated into the above analysis, jurisdictions currently showing a net cost would have a considerably greater chance of achieving net benefits as a result of the proposed Regulations.

To address the particular concern that costs could turn out to be higher than estimated, an additional simulation was conducted. In this analysis, costs were increased by 20% over and above the adjusted 2006 estimates provided by the EFTG. This change did not alter the overall result. Benefits still considerably outweighed the costs, with the overall benefit-to-cost ratio reduced only to 2.7 to 1. The jurisdictional results were also consistent, although the magnitudes were different, with net benefits reduced and net costs increased.

The sensitivity analysis carried out on the analysis of the proposed Regulations provides additional confidence that the overall conclusions from the analysis are sound, even though the specific magnitudes of the results are subject to uncertainty.

Distributional impacts

Given the varying levels of treatment and number of wastewater systems needing upgrades across the country, as well as the large costs involved, the proposed Regulations would likely have some significant distributional impacts. The main impacts are anticipated to be across regions and communities, while individual households and business would also likely be indirectly impacted.

Regional impacts

In terms of regional impacts, Table 3 reveals that the impacts of the proposed Regulations would not be the same across the country. In general, the majority of the benefits and costs would be expected in jurisdictions with the highest percentage of the population on sewer systems with less than secondary treatment. As is illustrated in Figure 1, these are the coastal regions and Quebec. This is generally reflected in Table 3, where relatively higher costs and benefits are evident in British Columbia (BC), Newfoundland and Labrador (NL), Nova Scotia (NS), and Quebec (QC).

Some jurisdictions have negative net benefits in Table 3. When considering these results, it is important to consider that not all of the benefits of the proposed Regulations could be quantified. Thus, these results likely do not truly reflect the overall impact in these areas. For instance, water availability and watershed sensitivities in the Prairie Provinces would likely add to the net benefits in those areas, while fisheries and shellfish impacts would increase net benefits in the coastal regions, in particular the Atlantic Provinces. Tourism impacts would be felt across the country. Therefore, while important, the net benefits presented in Table 3 do not provide a complete picture of the likely impacts.

Community impacts

The proposed Regulations are expected to be affordable for communities. In its work assessing the affordability of the CCME Strategy, the EFTG identified a number of funding mechanisms available to communities, such as full cost recovery, government service partnerships, strategic budget allocations, debt financing (bonds, loans, revolving loan funds, securitization funds), public-private partnerships, etc. The EFTG found that municipalities have relied upon their own resources for water and wastewater investments, spending \$9 billion between 1999 and 2006. Additional funding has been made available through infrastructure investments from higher levels of government, including a number of federal infrastructure programs that have wastewater projects as an eligible

investment category.

However, the CCME did raise concern with respect to small (less than 250 people) and declining communities in the assessment of the CCME Strategy, which could also be applicable to the proposed Regulations. Through the CCME Strategy, governments have agreed to examine alternative approaches, including how to incorporate alternatives to large infrastructure investments in order to give very small and declining communities some flexibility to meet the new standards. In addition, the risk-based timelines provide communities time to plan, finance, and implement approaches to meet the required standards.

Household and business impacts

Households and businesses in communities requiring significant capital upgrades to meet the requirements in the proposed Regulations would likely be indirectly impacted through increased user fees or utility rates levied to pay for the upgrades. It is not practical with the information available at the federal level to accurately assess these impacts, as each community has different financial circumstances (e.g. tax base, reserves, utility rates). However, as wastewater infrastructure is funded from a variety of sources, the cost burden would not be expected to fall disproportionately on any one rate payer.

Competitiveness impacts

Potential competitiveness impacts are an important consideration of any regulatory proposal. In the case of the proposed Regulations, no significant adverse competitiveness impacts are expected. The cost burden of the proposed Regulations would not be expected to fall disproportionately on any one rate payer, including businesses.

There would likely be positive impacts on Canada's competitiveness in the areas of fisheries resources and tourism, in particular. For example, higher wastewater effluent quality could help reduce contaminant-related shellfish harvest closures in that \$1.5 billion industry, and remove barriers to the export of seafood products (e.g. mussel exports from Eastern Canada). Tourism could also be impacted, as improved wastewater quality would likely help reduce the number of beach closures and increase access to water-based recreation.

Summary

The costs and benefits of the proposed Regulations are summarized in Table 4 below, along with other qualitative and non-monetized impacts. The time periods reflect the beginning and end of the analysis period (2011–2065), with the start of each risk-based compliance period in between. The total net present value over the period of analysis is also provided, as are average annual figures. All figures are expressed in millions of 2010 dollars.

Table 4 — Cost-benefit summary statement

Incremental costs and benefits	2011 Base Year	2020	2030	2040	2065	Total NPV 2011–2065	Annual Average
(Millions of 2010 dollars)							
A. Quantified costs							
Costs to wastewater owners and operators							
Capital costs*	0	4,450	3,722	142	0	3,228	262
Operation and maintenance costs	0	280	443	448	84	1,904	155
Administrative costs	68	88	62	62	38	777	63
<i>Sub-total</i>	68	4,818	4,227	652	122	5,909	480
Costs to government							
Enforcement	0.33	1.26	0.63	0.38	0.22	6.7	0.5
Compliance promotion	3.8	1.67	1.67	1.67	0	17.7	1.4

Environmental effects monitoring	0.07	0.43	0.0	0.0	0	3.1	0.25
Electronic reporting system	0.003	0.003	0.003	0.003	0.003	0.5	0.04
<i>Sub-total</i>	4.2	3.36	2.31	2.05	0.22	28	2.19
<i>Total costs</i>	72.2	4,821	4,229	654	122	5,937	482
B. Monetized benefits							
Willingness to pay	0	335	844	956	92	3,213	261
Property value increase	0	9,708	5,644	4,138	226	14,424	1,172
<i>Total monetized benefits</i>	0	10,043	6,488	5,094	318	17,637	1,433
C. Net benefit	-72.2	5,222	2,219	4,440	196	11,700	951
D. Qualitative and non-monetized impacts							
Owners and operators of wastewater systems	<ul style="list-style-type: none"> There could be additional costs related to wastewater collection systems (pipe or truck), if those are deemed necessary, for example, to connect more than one community to a wastewater treatment system. However, in such a case, there could also be costs savings associated with single wastewater systems serving more than one community. Cleaner source water may reduce the cost to municipalities (i.e. the majority of owner/operators of wastewater treatment systems) for treating drinking water. 						
Governments	<ul style="list-style-type: none"> Provincial and territorial administrative costs could be higher than an estimate based on the proportion of systems in the jurisdiction. However, they could also be less if federal costs are higher than those in a specific jurisdiction. The common electronic reporting system to be developed by the federal government for the management of information collected through the proposed Regulations should improve overall efficiency as well as communication between the various jurisdictions. Regulatees may also face lower administrative costs (in terms of both time and money) due to the availability of a common electronic reporting system. 						
Environment	<ul style="list-style-type: none"> Non-monetized environmental benefits (in the form of reduced damages) would result from lower pollutant loadings. These would total 86 478 metric tonnes of BOD matter, SS, total phosphorous and total ammonia. Other pollutants would also be reduced, such as total residual chlorine, but insufficient information is available to estimate the potential reductions. Healthier aquatic ecosystems are another significant unquantified benefit of these proposed regulations. 						
Health	<ul style="list-style-type: none"> Risks to human health from the release of untreated or inadequately treated wastewater effluent would be reduced. Cleaner source water would reduce the chance of wastewater contaminating drinking water sources or fish and shellfish. Risks from exposure to pollutants during recreational activities in surface water would also likely be smaller. 						
Income, GDP and employment	<ul style="list-style-type: none"> Spending on the required upgrades to comply with the proposed Regulations would lead to economic spin-off or "ripple" effects as the spending flows through the economy. An estimated \$2.3 billion in labour income would be expected during the construction phases, and Canada's GDP would increase in the order of \$5.4 billion. Over 48 000 direct and indirect jobs would also result from these direct and indirect effects. 						
Regions	<ul style="list-style-type: none"> The impacts of the proposed Regulations would not be the same across the country. In general, the majority of the benefits and costs would be expected in jurisdictions with the highest percentage of the population on sewer systems with less than secondary treatment. 						
Communities	<ul style="list-style-type: none"> Overall, the proposed Regulations are expected to be affordable for communities. However, there is potential concern with respect to small (less 						

	<p>than 250 people) and declining communities. Flexibility mechanisms have been incorporated into the proposed Regulations or are under consideration. For example, risk-based timelines provide time for communities to plan, finance and implement cost-effective solutions. As well, governments have agreed to examine alternative approaches, including how to incorporate alternatives to large infrastructure investments, in order to give very small and declining communities some flexibility to meet the new standards.</p>
Households and businesses	<p>Households and businesses in communities requiring significant capital upgrades to meet the requirements in the proposed Regulations would likely be indirectly impacted through increased user fees or utility rates levied to pay for the upgrades. However, as wastewater infrastructure is funded from a variety of sources, the cost burden would not be expected to fall disproportionately on any one rate payer.</p>

* Note that for the purposes of this table, all of the capital costs were combined into 2020, 2030, and 2040 to illustrate the total capital costs per compliance period. In the actual analysis, these costs were spread out over the two years prior to the compliance period to allow for construction.

As can be seen from the above summary, the benefits of the proposed Regulations significantly outweigh the costs on a national basis over every time period considered (with the exception of the base year) and whether the dollars are discounted or not. Looking at the costs in the years 2020, 2030, and 2040, it is clear that almost 50% of the costs would be incurred in the first 10 years of the proposed Regulations, with the vast majority being the capital costs of the upgraded wastewater systems. In terms of annualized figures, costs total about \$480 million per year, while benefits are approximately \$1.4 billion per year, which is consistent with the almost 3:1 benefits-to-cost ratio presented above. The table also presents a number of important qualitative and distributional impacts that would likely result.

Rationale

The proposed Regulations would achieve the Government of Canada's objective of reducing the risks to ecosystem health, fisheries resources and human health posed by wastewater effluent. The levels of harmful substances being deposited to surface water from wastewater systems in Canada would be reduced as system owners and operators respond to the national effluent quality standards. These standards represent a secondary level of wastewater treatment, or equivalent, which removes over 95% of the total mass of conventional pollutants in wastewater (i.e. BOD matter, suspended solids and nutrients). Significant amounts of non-conventional pollutants and bacteria that may be present are also removed through such treatment.

The proposed Regulations would also be the federal government's principal instrument for implementing the CCME Canada-wide Strategy for the Management of Municipal Wastewater Effluent. As part of the CCME Strategy, the federal government committed to developing regulations, under the authority of the *Fisheries Act*, that would include the agreed upon national effluent quality standards. Additionally, jurisdictions agreed that the regulations would be implemented through bilateral administrative agreements between the federal government and the provinces, and the Yukon. These agreements would clarify roles and responsibilities of jurisdictions on elements such as regulatory reporting, data exchange, compliance promotion, and inspection and enforcement activities. The implementation of the proposed Regulations would set a major precedent in the area of cooperative wastewater management in Canada.

In terms of the benefits of the proposed Regulations, a cost-benefit analysis using conservative assumptions and only partial quantification of benefits reveals significant net benefits would be realized nationally. While the likely costs of the proposal are significant, in the order of \$5.9 billion discounted to 2010 dollars, the overall quantified benefits are almost three times this amount, totalling \$17.6 billion.

The results of the cost-benefit analysis on a regional and jurisdictional basis vary considerably. This is to be expected given the number of wastewater systems to be upgraded and their differing levels of treatment across the country. Regions with a low proportion of the population currently receiving secondary treatment (coastal regions and Quebec) would be expected to incur the largest costs but also generally receive relatively larger benefits. This is not always the case, as some jurisdictions do not generate net benefits under the analysis. This may be due in large part to the limits of the analysis. For instance, many important benefits could not be quantified or were only partially quantified. These include human and ecosystem health, fisheries resources and tourism benefits. On the other hand, the costs are fairly comprehensive. In addition, high costs were identified for small and very small communities. These communities could face challenges funding the identified upgrades on their own.

Despite some of the regional results, the proposed Regulations should be affordable. This conclusion is supported by the work of the EFTG in its examination of the overall CCME Strategy, whereby numerous funding options were identified. The EFTG concluded that the CCME Strategy, which includes the national effluent quality standards in the proposed Regulations, would be affordable if governments made wastewater infrastructure funding a priority. With respect to the federal government, a number of infrastructure programs already have wastewater as an eligible project category, with several identifying wastewater infrastructure as a national priority.

Overall, the results of the analysis demonstrate clear benefits to Canadians from bringing all wastewater systems in the country up to a secondary level of treatment or equivalent. This would bring Canada in line with standards already in place in the United States and Europe, and it would put Canadian wastewater systems in a better position to deal with emerging threats to ecosystem health, human health and fisheries resources in the future.

Consultation

Environment Canada has been consulting on the management of wastewater for many years. Most recently, Environment Canada held 26 one-day consultation sessions across the country between November 2007 and January 2008. The objective of these sessions was to provide stakeholders and interested parties with detailed information and solicit input on the Proposed Regulatory Framework for Wastewater and the draft CCME Strategy. These consultation sessions involved more than 500 participants from Aboriginal communities and organizations, municipalities and associated organizations, environmental non-government organizations (ENGOS), and federal departments and agencies.

The comments received at the various consultation sessions and through written submissions covered a broad range of issues and perspectives. Feedback revealed a consensus that there is a need to improve wastewater management in Canada. A document providing Environment Canada's response to comments received on the Proposed Regulatory Framework for Wastewater is posted on Environment Canada's Web site (www.ec.gc.ca/eu-ww). The comments and concerns related to technical aspects of the proposed Regulations are summarized below, along with Environment Canada's responses.

Timelines

The compliance timelines for low- and medium-risk wastewater systems were identified by several participants and submissions as being too long. In particular, participants from federal departments and agencies were of the view that the proposed timelines of 20 to 30 years would be too long to get "buy-in" from their management to plan for any capital investment.

Environment Canada is proposing compliance timelines for high-, medium- and low-risk wastewater systems (2020, 2030 and 2040, respectively). These are intended for situations where building new infrastructure would be necessary in order to be able to meet the effluent quality standards. Nevertheless, regardless of the maximum timelines allowed, owners and operators of wastewater systems are encouraged to achieve compliance with the mandatory effluent quality standards when possible, especially as it relates to normal infrastructure renewal timelines.

Limits for deleterious substances

Participants from all stakeholder groups and interested parties expressed the view that there should be additional parameters defined as deleterious substances within the proposed Regulations, including phosphorus, nitrogen, and fecal coliforms.

Environment Canada considers pollutants, such as phosphorous, nitrogen and fecal coliforms, to be best managed site-specifically, beyond the reductions achieved through the proposed Regulations. The CCME Strategy provides an agreed-to framework for jurisdictions to manage site-specific pollutants, either through concentration- or loading-based approaches.

Several stakeholders and interested parties suggested that it would be more appropriate to describe the deleterious substances in terms of loading rather than concentration.

Environment Canada has adopted a concentration-based approach for the deleterious substances, as the proposed limits for BOD matter and suspended solids are indicative of conventional secondary wastewater

treatment.

Monitoring requirements

It was suggested by some participants representing municipalities that the proposed monitoring frequencies for large facilities may be set too high. Across the country, support for monitoring by small systems was demonstrated. However, concern was expressed by some representatives for municipalities as well as participants from Aboriginal communities and organizations that small facilities may experience difficulty meeting the proposed monitoring requirements because of resource constraints. Clarity was also sought by municipalities on receiving environment monitoring requirements.

In response to the concern about the proposed frequency of monitoring being too high, Environment Canada has decreased the frequency for very large facilities. The monitoring frequency for small systems has not been decreased in the proposed Regulations as a minimum amount of data is required in order to obtain an accurate representation of effluent quality. Environment Canada has included specific requirements for receiving environment monitoring in the proposed Regulations to evaluate the effectiveness of the national effluent quality standards in protecting fish and fish habitat. Approximately 200 wastewater systems that meet the effluent quality standards and the criterion of a risk-based test would be required to conduct environmental effects monitoring.

Reporting requirements

Concern was expressed by some participants from Aboriginal communities and organizations, as well as by federal departments and agencies over proposed reporting frequencies.

In response to the above concerns, Environment Canada has harmonized the previously different reporting frequencies. Under the proposed Regulations, reporting for all wastewater systems would be required on a quarterly basis.

Concern was also expressed by municipalities that there might be a lack of information available for reporting on combined sewer overflows.

While recognizing that information may be scarce in certain circumstances, overflows from combined sewers would be subject to the requirements for deposits out of the normal course of events under the proposed Regulations.

Acute toxicity requirements

There were differing opinions on the timeframe for meeting the requirements related to acute toxicity in cases where there is an acute toxicity test failure. In particular, Aboriginal participants from the west coast felt the proposed two-year timeframe for meeting the requirement to deposit a non-acutely toxic effluent would not allow for the proper protection of fish that they rely upon.

Environment Canada is proposing that wastewater systems with effluent meeting the proposed national effluent quality standards for biochemical oxygen demanding matter and suspended solids would also be required to produce an effluent that is not acutely toxic as a condition to deposit effluent. For acute toxicity test failures, the proposed Regulations do not include requirements for the identification and implementation of corrective actions within a two-year timeframe.

Addressing additional chemicals

Participants from all groups of stakeholders and interested parties expressed concern about chemicals that are not removed by secondary treatment. They signalled support for actions relating to pollution prevention and source control. In addition, Environment Canada was advised that federal action should be taken to eliminate such chemicals from wastewater discharges.

Environment Canada recognizes that there may be a need to address substances in wastewater effluent beyond those covered under the proposed Regulations. As per the CCME Strategy, the need for national risk management actions to manage pollutants at their source would be determined based on the result of the site-specific environmental risk assessments, and appropriate action would be taken by the relevant regulators. The Government of Canada's Chemicals Management Plan is also a key element of Environment Canada's

commitment to reduce pollutants at their source. The Chemicals Management Plan includes risk assessment and risk management actions under CEPA 1999, the *Pest Control Products Act* and the *Food and Drugs Act*.

Funding

Participants from all groups of stakeholders and interested parties were vocal in their concerns regarding the funding of wastewater management. The general message from all sessions was that the introduction of more stringent regulatory standards would place greater pressure on the already limited technical, financial and human resources of communities. The overwhelming response from participants was a call for funding that is proportional to the new federal demands, as well as for appropriate resources and support for current requirements.

Environment Canada is of the view that the requirements of the proposed Regulations are affordable if all jurisdictions make wastewater funding a priority. The federal government has already identified wastewater as a priority for many of its infrastructure programs. For instance, the Building Canada Plan, first announced in Budget 2007, provides \$33 billion for infrastructure needs across the country, including water and wastewater. The cornerstone of the Plan, the Building Canada Fund, has wastewater infrastructure designated as one of five national priority categories among other eligible project categories. Also under the Plan, the Gas Tax Fund accounts for \$11.8 billion of funding which can be allocated to infrastructure, including water and wastewater projects. Budget 2007 committed to making the Gas Tax Fund permanent after 2014. In Budget 2009, the federal government accelerated and expanded its infrastructure spending with almost \$12 billion in new stimulus funding over two years to help Canada emerge from the global economic downturn. These funds will support priority infrastructure projects across all eligible categories, including water and wastewater. In addition, the risk-based implementation timelines included in the proposed Regulations have been established so that sufficient time would be available to plan, finance and complete the necessary upgrades.

Implementation, enforcement and service standards

As part of the CCME Strategy, jurisdictions agreed that the proposed Regulations would be implemented through bilateral administrative agreements between the federal government and the provinces and the Yukon. These agreements would clarify roles and responsibilities of jurisdictions on elements such as regulatory reporting, data exchange, compliance promotion, as well as inspection and enforcement activities. The agreements have yet to be negotiated, thus, the following subsections on implementation, enforcement and service standards focus on those systems under federal government operation or on federal or aboriginal land which will be delivered by Environment Canada.

Implementation

To meet the objectives of the proposed Regulations, compliance promotion activities targeting owners and operators of wastewater systems would be delivered in order to make them aware of the regulatory requirements and to encourage them to achieve a high level of overall compliance as early as possible during the regulatory implementation process.

Compliance promotion activities, such as developing and distributing promotional materials, advertising in trade and association magazines, attending trade association conferences, presenting at workshops and information sessions and meeting with regulatees, would be undertaken.

Enforcement

Enforcement officers would, when verifying compliance with the proposed Regulations, apply the "Compliance and Enforcement Policy for the Habitat Protection and Pollution Prevention Provisions of the *Fisheries Act*." The policy sets out the range of possible responses to violations, including warnings, directions, environmental protection compliance orders, ticketing, ministerial orders, injunctions, prosecution, and environmental protection alternative measures. In addition, the policy explains when Environment Canada will resort to civil suits by the Crown for costs recovery.

When, following an inspection or an investigation, an enforcement officer discovers an alleged violation, the officer will choose the appropriate enforcement action based on the following factors:

- i Nature of the alleged violation: This includes consideration of the damage, the intent of the alleged violator, whether it is a repeat violation, and whether an attempt has been made to conceal information or

otherwise subvert the objectives and requirements of the Act;

- 1 Effectiveness in achieving the desired result with the alleged violator: The desired result is compliance within the shortest possible time and with no further repetition of the violation. Factors to be considered include the violator's history of compliance with the Act, willingness to cooperate with enforcement officers, and evidence of corrective action already taken;
- 1 Consistency: Enforcement officers will consider how similar situations have been handled in determining the measures to be taken to enforce the Act.

Service standards

Service standards would be proposed for the issuance of transitional and temporary authorizations.

Under the proposed Regulations, an owner or operator of an eligible wastewater system would be required to submit an application for a transitional authorization or a temporary authorization to deposit un-ionized ammonia by 18 months after the registration of the proposed Regulations. The application for the authorization would be reviewed by the authorization officer and, if accepted, the authorization would be issued to align with the coming into force of the regulatory provisions that set limits for deleterious substances deposited in effluent (i.e. 24 months after the registration of the proposed Regulations).

An application for a temporary bypass authorization would be required to be submitted at least 45 days before the day on which the bypass is scheduled to begin. The application for the bypass authorization would be reviewed by the authorization officer and, if accepted, the authorization would be issued no later than 21 days from the date of receipt of the application.

Performance measurement and evaluation

The performance of the proposed Regulations would be measured and evaluated in terms of immediate, intermediate and final outcomes.

The immediate outcome of the proposed Regulations would be that the regulated community is in compliance with the regulatory requirements. This would be evaluated by determining the percentage of the regulated community reporting on time and the percentage of the regulated community that is in compliance with the limits for effluent quality.

The intermediate outcome of the proposed Regulations would be that national effluent quality standards are achieved within prescribed timelines and maintained. The final outcome would be that risks are reduced to ecosystem health, fisheries resources and human health.

These intermediate and final outcomes would be evaluated using as an indicator the percentage of wastewater systems achieving the national effluent quality standards. The reduction in loadings of BOD matter and suspended solids would also be used to evaluate these outcomes and would be determined annually. Results of environmental effects monitoring studies would be used to evaluate the effectiveness of the national effluent quality standards in protecting fish and fish habitat.

The proposed Regulations would require regulatees to submit reports through an electronic reporting system developed by Environment Canada. Reporting on the progress and performance of the proposed Regulations would occur through departmental performance reports. With respect to the assessment of the overall effectiveness of the implementation of the proposed Regulations, Environment Canada would work with the departmental head of evaluation to determine the scope of the evaluation, as well as the appropriate timing. Annual reports based on the routine reporting required by the proposed Regulations would also be produced and made publicly available. In addition, the effectiveness of the national effluent quality standards in protecting fish and fish habitat would be evaluated through environmental effects monitoring studies and reported on by Environment Canada.

PROPOSED REGULATORY TEXT

Notice is hereby given that the Governor in Council, pursuant to subsections 36(5), 37(3) and 38(9) of the *Fisheries Act* ([see footnote a](#)), proposes to make the annexed *Wastewater Systems Effluent Regulations*.

Interested persons may make representations with respect to the proposed Regulations within 60 days after the date of publication of this notice. All such representations must cite the *Canada Gazette*, Part I, and the date of publication of this notice, and be sent by mail to Randall Meades, Director General, Public and Resources Sectors, Department of the Environment, Gatineau, Quebec K1A 0H3, by fax to 819-953-7253 or by email to ww-eu@ec.gc.ca.

Ottawa, March 11, 2010

JURICA ČAPKUN
Assistant Clerk of the Privy Council

WASTEWATER SYSTEMS EFFLUENT REGULATIONS

INTERPRETATION

Definitions

1. The following definitions apply in these Regulations.

“Act”
 « *Loi* »

“Act” means the *Fisheries Act*.

“acutely lethal”
 « *léthalité aiguë* »

“acutely lethal”, in relation to effluent, means that the effluent at 100% concentration kills more than 50% of the rainbow trout subjected to it during a 96-hour period.

“authorization officer”
 « *agent d’autorisation* »

“authorization officer”, in respect of a province set out in column 1 of Schedule 1, means the holder of the position set out in column 2.

“biochemical oxygen demanding matter”
 « *matières exerçant une demande biochimique en oxygène* »

“biochemical oxygen demanding matter” means any matter that consumes oxygen dissolved in water.

“blackwater”

« *eaux noires* »

“blackwater” includes greywater when it is mixed with blackwater.

“composite sample”

« *échantillon composite* »

“composite sample” means

(a) for a wastewater system that continuously deposits effluent during a 24-hour period,

(i) a volume of effluent that consists of not less than three equal volumes, or three volumes proportionate to the rate of flow of the effluent, that have been collected at approximately equal time intervals that, combined, span at least seven hours and at most 24 hours, or

(ii) a volume of effluent collected continuously over a 24-hour period at a constant rate, or at a rate proportionate to the rate of flow of the effluent; and

(b) for any other wastewater system, grab samples of equal volumes taken every hour during a 24-hour period in which the wastewater system deposits effluent.

“effluent”

« *effluent* »

“effluent” means wastewater that is deposited from a wastewater system.

“environmental effects monitoring studies”

« *études de suivi des effets sur l'environnement* »

“environmental effects monitoring studies” means water quality monitoring studies described in Part 1 of Schedule 2, and biological monitoring studies set out in Part 2 of that Schedule.

“final discharge point”

« *point de rejet final* »

“final discharge point” means the point, other than an overflow point, of a wastewater system beyond which its owner or operator no longer exercises control over the quality of the wastewater before its deposit as effluent in water or a place.

“grab sample”

« *échantillon instantané* »

“grab sample” means a volume of effluent collected at any given time.

“overflow point”

« *point de débordement* »

“overflow point” means a point of a wastewater system via which excess wastewater may be deposited in water or a place and beyond which its owner or operator no longer exercises control over the quality of wastewater before its deposit as effluent.

“Minister”

« *ministre* »

“Minister” means the Minister of the Environment.

“point of entry”
« *point d'entrée* »

“point of entry”, in relation to the final discharge point or an overflow point of a wastewater system, means

(a) the point where effluent is deposited in water frequented by fish via the final discharge point or the overflow point, as the case may be; or

(b) any point where the effluent enters that water from the place where it was deposited via the final discharge point or the overflow point, as the case may be.

“Procedure for pH Stabilization EPS 1/RM/50”
« *Procédure de stabilisation du pH SPE 1/RM/50* »

“Procedure for pH Stabilization EPS 1/RM/50” means the *Procedure for pH Stabilization During the Testing of Acute Lethality of Wastewater Effluent to Rainbow Trout* (EPS 1/RM/50), March 2008, published by the Department of the Environment, as amended from time to time.

“quarter”
« *trimestre* »

“quarter”, in respect of a year, means any of the four periods of three months that begin on the first day of January, April, July and October.

“Reference Method EPS 1/RM/13”
« *Méthode de Référence SPE 1/RM/13* »

“Reference Method EPS 1/RM/13” means the *Biological Test Method: Reference Method for Determining Acute Lethality of Effluents to Rainbow Trout* (EPS 1/RM/13 Second Edition), December 2000, published by the Department of the Environment, as amended from time to time.

“Standard Methods”
« *Standard Methods* »

“Standard Methods” means the *Standard Methods for the Examination of Water and Wastewater*, 21st Edition, 2005, published jointly by the American Public Health Association, the American Water Works Association and the Water Environment Federation, as amended from time to time.

“suspended solids”
« *matières en suspension* »

“suspended solids” means any solid matter that is present in effluent.

“total residual chlorine”
« *chlore résiduel total* »

“total residual chlorine” means the sum of free chlorine and combined chlorine, including inorganic chloramines.

“wastewater”
« *eaux usées* »

“wastewater” means

(a) blackwater;

(b) drainage water including waterborne wastes — other than blackwater — from an industrial, commercial or institutional facility; and

(c) other drainage water, including waterborne wastes and surface runoff, if mixed with blackwater.

“wastewater system”
« *système d’assainissement* »

“wastewater system” means any work or site used for the collection and deposit of wastewater, whether or not the wastewater is treated.

“watercourse”
« *Version anglaise seulement* »

“watercourse” includes a river, a stream and a creek.

APPLICATION

Application

2. (1) These Regulations apply in respect of a wastewater system that

(a) has a capacity to deposit 10 m³ or more, per day, of effluent via its final discharge point based on its design specifications; and

(b) deposits a deleterious substance prescribed in section 3 in any water or place referred to in subsection 36 (3) of the Act.

Non-application — areas

(2) These Regulations do not apply in respect of a wastewater system located in the Northwest Territories, Nunavut and north of the 54th parallel in the provinces of Quebec and Newfoundland and Labrador.

Non-application — industrial, commercial or institutional effluent

(3) These Regulations do not apply in respect of an on-site wastewater system for an industrial, commercial or institutional facility if 25% or less of the volume of its effluent is blackwater.

PART 1

AUTHORIZATION TO DEPOSIT

EFFLUENT CONTAINING DELETERIOUS SUBSTANCES

Prescribed deleterious substances

3. For the purpose of the definition “deleterious substance” in subsection 34(1) of the Act, the following substances or classes of substances are prescribed as deleterious substances:

(a) biochemical oxygen demanding matter;

(b) suspended solids;

(c) total residual chlorine; and

(d) un-ionized ammonia.

Authorization to deposit

4. (1) For the purpose of paragraph 36(4)(b) of the Act, the owner or operator of a wastewater system may, during a given quarter or month referred to in subsection (2), deposit or permit the deposit of an effluent that contains any of the deleterious substances prescribed in section 3 via its final discharge point in any water or place referred to in subsection 36(3) of the Act if the effluent is not acutely lethal as determined in accordance with section 8 and if, during the previous quarter or month, as the case may be, the effluent met the following

conditions:

- (a) the average carbonaceous biochemical oxygen demand due to the quantity of biochemical oxygen demanding matter in the effluent did not exceed 25 mg/L;
- (b) the average concentration of suspended solids in the effluent did not exceed 25 mg/L;
- (c) the average concentration of total residual chlorine in the effluent did not exceed 0.02 mg/L; and
- (d) the maximum concentration of un-ionized ammonia in the effluent was less than 1.25 mg/L, expressed as nitrogen (N), at $15^{\circ}\text{C} \pm 1^{\circ}\text{C}$.

Quarterly or monthly average

(2) The averages referred to in paragraphs (1)(a) to (c) and the maximum referred to in paragraph (1)(d) must be determined on a quarterly or monthly basis, as follows:

- (a) quarterly, if the annual average daily volume of effluent deposited via the final discharge point during the previous year — namely, the year that ends at the beginning of the quarter — was less than or equal to 17 500 m³; and
- (b) monthly, if the annual average daily volume of effluent deposited via the final discharge point during the previous year — namely, the year that ends at the beginning of the month — was more than 17 500 m³.

Determination of averages and maximum

(3) The averages referred to in paragraphs (1)(a) to (c) and the maximum referred to in paragraph (1)(d) must be determined based on samples of effluent referred to in subsections 7(1) and (3) in accordance with subsection 7(2).

Conditions

(4) The authorization under subsection (1) granted to an owner or operator is conditional on the owner or operator

- (a) installing, maintaining and calibrating monitoring equipment in accordance with section 6;
- (b) monitoring effluent in accordance with sections 7 and 8 and sending the monitoring report referred to in section 17 in accordance with that section;
- (c) if applicable, conducting environmental effects monitoring studies in accordance with section 14;
- (d) keeping records in accordance with section 15;
- (e) sending the identification report referred to in section 16 in accordance with that section; and
- (f) preparing, making available, updating and testing a response plan in accordance with section 42.

VOLUME OF EFFLUENT

Annual average daily volume

5. (1) The owner or operator of a wastewater system must determine the annual average daily volume of effluent deposited via the final discharge point for a given year by

- (a) for each day during that year when effluent was deposited via that point, determining the volume, expressed in m³, of effluent deposited during that day; and

(b) calculating the sum of those daily volumes of effluent deposited and dividing that sum by the number of days in that year.

Daily volumes

(2) The daily volume of effluent, expressed in m^3 , deposited for a given day must be determined by

(a) a continuous measure that yields the actual volume of effluent deposited during that day, if the annual average daily volume of effluent deposited during the previous calendar year — namely, the calendar year that ended before the beginning of the quarter or the month in which that day occurs — was more than $2\,500\,m^3$; and

(b) a continuous measure that yields the actual volume of effluent deposited during that day or an estimate of the daily volume of effluent deposited, in any other case.

Estimate of daily volume

(3) The estimate of the daily volume, expressed in m^3 , of effluent deposited must be determined by

(a) measuring the rate of flow of effluent at the final discharge point in any chosen unit of volume for any chosen unit of time; and

(b) calculating that daily volume based on that rate of flow over a 24-hour period.

Default measurement

(4) If the annual average daily volume, expressed in m^3 , of effluent deposited via the final discharge point of a wastewater system for a previous calendar year cannot be determined under subsections (1) to (3), that annual average daily volume must be determined on the basis of the maximum rate of flow of effluent at the final discharge point based on the wastewater system's design specifications on the day on which it began or begins operations.

MONITORING

Monitoring Equipment

Requirements

6. (1) The owner or operator of a wastewater system must, for the quarter or month in question, have installed monitoring equipment and maintain and calibrate it such that the equipment may be used to determine the volume of effluent deposited via the final discharge point in accordance with the following:

(a) for an annual average daily volume deposited of more than $2\,500\,m^3$ in the previous calendar year — namely, the calendar year that ended before the beginning of that quarter or month — the monitoring equipment must yield a continuous measure of the volume of effluent deposited; and

(b) for any other annual average daily volume deposited in the previous calendar year, the monitoring equipment must either yield a continuous measure of the volume of effluent deposited or be capable of measuring the rate of flow of effluent deposited.

Accuracy

(2) The monitoring equipment must accurately determine the volume or rate of flow with a margin of error of 15%.

Calibration

(3) The owner or operator must calibrate the monitoring equipment at least once in every calendar year and at least five months after a previous calibration.

Composition of the Effluent

Collection of samples

7. (1) The owner or operator of a wastewater system that, during the previous calendar year — namely, the calendar year that ended before the quarter or month in question — deposited an annual average daily volume set out in column 1 of the table to this subsection must, for that quarter or month, collect at the final discharge point a sample of effluent of the type set out in column 2 at the minimum frequency set out in column 3.

TABLE

Column 1		Column 3	
Item	Annual Average Daily Volume (m ³)	Column 2 Type of Sample to be Collected	Minimum Sampling Frequency
1.	≤ 2 500	Grab or composite	Monthly but at least 10 days after any other sample
2.	> 2 500 and ≤ 17 500	Composite	Every two weeks but at least seven days after any other sample
3.	> 17 500 and ≤ 50 000	Composite	Weekly but at least five days after any other sample
4.	> 50 000	Composite	Three days per week but at least one day after any other sample

Deleterious substances — quantities

(2) The owner or operator must, for each sample collected, determine, or cause the determination of, the following:

- (a) the carbonaceous biochemical oxygen demand due to the quantity of biochemical oxygen demanding matter in the effluent, determined in accordance with a test method referred to in section 9;
- (b) the concentration of suspended solids in the effluent, determined in accordance with a test method referred to in section 10; and
- (c) the concentration of un-ionized ammonia in the effluent, determined in accordance with the formula and a test method referred to in section 11.

Additional samples

(3) For greater certainty, the owner or operator who collects more samples than the minimum required under column 3 of the table to subsection (1) must make the determination referred to in subsection (2) for each sample collected, including those additional samples.

Non-application — item 1

(4) Subsection (1) does not apply, for a given month, to an owner or operator of a wastewater system to which item 1 of the table to that subsection applies if no effluent was deposited from the system during that month.

Acute Lethality Testing

Collection of samples

8. (1) The owner or operator of a wastewater system that, during the previous calendar year — namely, the calendar year that ended before the quarter or month in question — deposited an annual average daily volume of effluent set out in column 1 of the table to this subsection must, for that quarter or month, collect a grab sample at the final discharge point at the minimum frequency set out in column 2.

TABLE

Column 1	Column 2
Item Annual Average Daily Volume (m ³)	Minimum Sampling Frequency
1. > 2 500 and ≤ 50 000	Quarterly but at least 60 days after any other sample
2. > 50 000	Monthly but at least 21 days after any other sample

Acute lethality

(2) The owner or operator must test each sample collected in accordance with a method referred to in section 12 in order to determine, or cause the determination of, whether it is acutely lethal.

Additional test

(3) If a sample is determined to be acutely lethal when tested in accordance with subsection (2), the owner or operator must collect a grab sample twice a month, but at least seven days after any previous sample, and conduct a test for acute lethality referred to in section 12 but in accordance with section 6 of the Reference Method EPS 1/RM/13.

Subsequent samples

(4) If three consecutive samples are, under subsection (3), determined not to be acutely lethal, subsections (1) and (2) apply to subsequent samples. For greater certainty, subsection (3) applies to any of those subsequent samples that is determined to be acutely lethal when tested in accordance with subsection (2).

Test Methods

Carbonaceous biochemical oxygen demand

9. The carbonaceous biochemical oxygen demand due to the quantity of biochemical oxygen demanding matter in the effluent must be determined in accordance with one of the following methods:

- (a) the method described in subsections 5210 A and 5210 B, with the inhibition of nitrification, of the Standard Methods; or
- (b) any other equivalent test method that is authorized under the laws of the province where the wastewater system is located.

Suspended solids

10. The concentration of suspended solids in the effluent must be determined in accordance with one of the following methods:

- (a) the method described in subsection 2540 D of the Standard Methods; or
- (b) any other equivalent test method that is authorized under the laws of the province where the wastewater system is located.

Un-ionized ammonia

11. (1) The concentration of un-ionized ammonia in the effluent must be determined in accordance with the following formula:

$$\text{total ammonia} \times \frac{1}{1 + 10^{9.56 - \text{pH}}}$$

where

total ammonia is the concentration of total ammonia — namely, un-ionized ammonia (NH₃) plus ionized ammonia (NH₄⁺) — determined in accordance with subsection (2), expressed in mg/L as nitrogen (N); and

pH is the initial pH of the effluent at 15°C ± 1°C, determined in accordance with subsection (3).

Concentration of total ammonia

(2) The concentration of total ammonia in the effluent must be determined by using an aliquot of the same sample of effluent from which the pH of the effluent was determined and in accordance with one of the following methods:

(a) one of the methods described in subsections 4500-NH₃ B to 4500-NH₃ H of the Standard Methods; or

(b) any other equivalent test method that is authorized under the laws of the province where the wastewater system is located.

pH

(3) The pH of the effluent must be determined by using an aliquot of the same sample of effluent from which the concentration of total ammonia of the effluent was determined and in accordance with one of the following methods:

(a) the method described in subsection 4500-H⁺ B of the Standard Methods; or

(b) any other equivalent test method that is authorized under the laws of the province where the wastewater system is located.

Acute lethality

12. The acute lethality of the effluent must be determined in accordance with

(a) the Reference Method EPS 1/RM/13; or

(b) the method referred to in paragraph (a) and the Procedure for pH Stabilization EPS 1/RM/50.

Accredited Laboratory

Accredited laboratory

13. The determinations referred to in subsections 7(2) and 8(2) must be made

(a) by a laboratory

(i) that is accredited under the International Organization for Standardization standard ISO/IEC 17025:2005 entitled *General requirements for the competence of testing and calibration laboratories*, as amended from time to time, by an accrediting body recognized in accordance with that organization's standard ISO/IEC 17011:2004 entitled *Conformity assessment — General requirements for accreditation bodies accrediting conformity assessment bodies*, as amended from time to time, and

(ii) the scope of whose accreditation includes the analytical method used to make the determinations; or

(b) by a laboratory

(i) that is accredited under the *Environment Quality Act*, R.S.Q., c. Q-2, as amended from time to time, by an accreditation body that is recognized in accordance with that Act, and

(ii) the scope of whose accreditation includes the analytical method used to make the determinations.

Environmental Effects Monitoring

Percentage of effluent in water

14. (1) The owner or operator of a wastewater system must conduct the environmental effects monitoring studies referred to in paragraph 4(4)(c) in respect of its effluent if the water at any point that is 100 m from the point of entry for the final discharge point is comprised of 10% or more of that effluent.

Determination

(2) An owner or operator must — on any given day in August, or September, 2013 — determine the percentage referred to in subsection (1) if there has been no precipitation on that day and on the two days before that day. But, if there is no such day, the determination must be made on the third consecutive day on which there has been no precipitation.

Notification

(3) The owner or operator must, by December 31, 2013, notify the authorization officer of the results of each determination made under subsection (2) and provide information to support that determination.

Schedule 2

(4) The provisions of Schedule 2 apply in respect of environmental effects monitoring studies.

Generally accepted standards

(5) The determination referred to in subsection (2), and the environmental effects monitoring studies referred to in subsection (4), must be made and conducted and their results recorded, interpreted and reported in accordance with generally accepted standards of good scientific practice at the time that the studies are conducted.

Electronic report

(6) The owner or operator must, electronically in the format specified by the Minister, send the report on the water quality monitoring studies referred to in section 3 of Schedule 2, and the interpretive reports referred to in sections 11 and 14 of that Schedule, within the period set out in section 3, 11 or 14 of that Schedule, as the case may be. The report must bear the electronic signature of the owner or operator, or their duly authorized representative.

Paper report

(7) If the Minister has not specified an electronic format or if it is not feasible to send all or any part of the report electronically in accordance with subsection (6) because of circumstances beyond the owner's or operator's control, the report or that part must be sent on paper, signed by the owner or operator, or their duly authorized representative, and in the format specified by the Minister. However, if no format has been so specified, it may be in any format.

End of monitoring

(8) No environmental effects monitoring studies under these Regulations may begin after December 31, 2025.

RECORD KEEPING

Information to be recorded

15. The owner or operator of a wastewater system must keep any report on a determination made by an accredited laboratory referred to in section 13 and a record that contains the following information:

(a) for the final discharge point

(i) each date on which effluent was deposited via the final discharge point, and

(ii) for each of those dates

(A) the actual daily volume of the effluent deposited, if that volume is yielded by a continuous measure, and

(B) the estimated daily volume as determined in accordance with subsection 5(3) and the results of the measurement and the calculation referred to in paragraphs 5(3)(a) and (b), in any other case;

(b) for all monitoring equipment

(i) a description,

(ii) if applicable, the manufacturer's specifications, the year of manufacture and the model number, and

(iii) the date on which the equipment was calibrated and its degree of accuracy after the calibration;

(c) for each sample referred to in subsection 7(1)

(i) the results of the determination referred to in each of paragraphs 7(2)(a) to (c),

(ii) the results of the determination of the concentration of total ammonia in the effluent and of the pH of the effluent that were used to make the determination referred to in paragraph 7(2)(c),

(iii) a statement as to whether the sample is a grab sample or a composite sample and the date on which the sample was taken, and

(iv) if applicable, a statement to the effect that, for a particular month, no effluent was deposited from the wastewater system during that particular month; and

(d) for each sample referred to in subsection 8(1) or (3), the information referred to in section 8.1 of the Reference Method EPS 1/RM/13 and, if the acute lethality of the effluent was determined in accordance with that method and the Procedure for pH Stabilization EPS 1/RM/50, section 3 of that procedure.

REPORTING

Identification Report

Required information

16. (1) The owner or operator of a wastewater system must send to the authorization officer the identification report referred to in paragraph 4(4)(e) containing the following information:

(a) the owner's name, civic and postal addresses, telephone number and, if any, email address and fax number;

(b) the operator's name, civic and postal addresses, telephone number and, if any, email address and fax number;

(c) the name, title, civic and postal addresses, telephone number and, if any, email address and fax number, of a contact person;

(d) if applicable, the wastewater system's name and civic address;

(e) for the final discharge point,

(i) its latitude and longitude, in degrees, minutes and seconds, and

(ii) an indication of the geophysical characteristics, and any use that is made, of the water or place where effluent is deposited via the final discharge point and the name, if any, of that water or place; and

(f) the number of overflow points, for each of the combined sewers and sanitary sewers of the wastewater system, and for each of those overflow points,

(i) its latitude and longitude, in degrees, minutes and seconds, and

(ii) an indication of the geophysical characteristics, and any use that is made, of the water or place where effluent is deposited via the overflow point and the name, if any, of that water or place.

Electronic report

(2) The identification report must be sent electronically in the format specified by the Minister and must bear the electronic signature of the owner or operator, or their duly authorized representative. The identification report must be so sent

(a) by February 15, 2011, if the wastewater system is in operation on January 1, 2011; and

(b) within 45 days after the wastewater system comes into operation, in any other case.

Paper report

(3) If the Minister has not specified an electronic format or if it is not feasible to send the report electronically in accordance with subsection (2) because of circumstances beyond the owner's or operator's control, the report must be sent on paper, signed by the owner or operator, or their duly authorized representative, and in the format specified by the Minister. However, if no format has been so specified, it may be in any format.

Change of information

(4) If the information provided in the identification report changes, the owner or operator must send a notice to the authorization officer that provides the updated information no later than 45 days after the change.

Decommissioning

(5) An owner or operator of a wastewater system must, at least 45 days before the planned decommissioning of the wastewater system, send a notice to the authorization officer setting out the planned date of the decommissioning and the place where the identification report is to be kept.

Monitoring Report

Information

17. (1) The owner or operator of a wastewater system must send, for each quarter, to the authorization officer a monitoring report that contains the following information as determined for each month during that quarter or for that quarter, as the case may be:

(a) the average carbonaceous biochemical oxygen demand due to the quantity of biochemical oxygen demanding matter in the effluent;

(b) the average concentration of suspended solids in the effluent;

(c) the maximum concentration of un-ionized ammonia in the effluent;

(d) the information recorded under paragraph 15(d);

(e) a statement as to whether a composite or grab sample collection method, or both, was used;

(f) the volume of effluent that was deposited;

(g) the number of days during which effluent was deposited; and

(h) if applicable, a statement that effluent was not deposited during the month or any of those months, as the case may be.

Electronic report

(2) The monitoring report must be sent, within 45 days after the end of the quarter for which the report was made, electronically in the format specified by the Minister and must bear the electronic signature of the owner or operator, or their duly authorized representative.

Paper report

(3) If the Minister has not specified an electronic format or if it is not feasible to send the report electronically in accordance with subsection (2) because of circumstances beyond the owner's or operator's control, the report must be sent on paper, signed by the owner or operator, or their duly authorized representative, and in the format specified by the Minister. However, if no format has been so specified, it may be in any format.

RECORD MAKING AND RETENTION OF DOCUMENTS

When records made

18. Records must be made without delay after the information to be recorded becomes available.

Retention of records

19. (1) An owner or operator of a wastewater system must keep a report referred to in section 15, and a record and a copy of a report required to be made under these Regulations, — along with any supporting documents — for at least five years after the day on which the record or report, as the case may be, was made.

Place of retention

(2) The report referred to in section 15, the record or the copy must be kept at the wastewater system or at any other place in Canada where it can be inspected. If that report, record or copy is kept at one of those other places, the owner or operator must provide the Minister with the civic address of that other place.

Information on monitoring equipment and identification report

(3) Despite subsection (1), the information referred to in paragraph 15(b) must be kept for at least five years after the useful life of the monitoring equipment and the identification report, as it may be updated, referred to in section 16 must be kept for at least five years after the wastewater system is decommissioned.

PART 2

TRANSITIONAL AND TEMPORARY AUTHORIZATIONS TO DEPOSIT

PURPOSE

Paragraph 36(4)(b) of the Act

20. (1) For the purpose of paragraph 36(4)(b) of the Act, an owner or operator of a wastewater system may deposit, or permit the deposit of, an effluent that contains any of the deleterious substances prescribed in section 3 via the final discharge point in any water or place referred to in subsection 36(3) of the Act, if the deposit is

made in accordance with an authorization issued under this Part.

Definition of “deposit”

(2) For the purpose of sections 21 to 41, “deposit”, in relation to an effluent, includes to permit the deposit of the effluent.

TRANSITIONAL AUTHORIZATION TO DEPOSIT BIOCHEMICAL OXYGEN DEMANDING MATTER, SUSPENDED SOLIDS AND UN-IONIZED AMMONIA

Requirements and Duration

BOD and SS transitional authorization

21. (1) The owner or operator of a wastewater system may apply to an authorization officer for a transitional authorization to deposit via the final discharge point effluent that contains biochemical oxygen demanding matter or suspended solids, or both — referred to in these Regulations as a “BOD and SS transitional authorization” — if the average referred to in paragraph 4(1)(a) or (b) as determined in accordance with subsection 4(3) but expressed on an annual basis — over the year that ended before the month in which the application was made — exceeded 25 mg/L.

NH₃, BOD and SS transitional authorization

(2) The owner or operator of a wastewater system may apply to an authorization officer for a transitional authorization to deposit via the final discharge point effluent that contains any combination of un-ionized ammonia, biochemical oxygen demanding matter and suspended solids — referred to in these Regulations as an “NH₃, BOD and SS transitional authorization” — if subsection (1) applies and the concentration of un-ionized ammonia as determined in accordance with subsection 4(3) — for the year that ended before the month in which the application was made — was, on average, greater than or equal to 1.25 mg/L, expressed as nitrogen (N) at 15°C ± 1°C.

Acute lethality test

(3) The owner or operator who applies for a transitional authorization must determine, or cause the determination of, by an accredited laboratory referred to in section 13, the acute lethality of the effluent deposited via the final discharge point in accordance with a method referred to in section 12 that is applied to two grab samples that were collected at the final discharge point on two days that were at least 21 days apart during the most recent four months before the application is made during which the wastewater system deposited effluent. However, if it is not possible to collect two grab samples at least 21 days apart, that method must be applied to one grab sample collected at the final discharge point.

Period of application

(4) The application for a transitional authorization must be made in accordance with section 22 and within 18 months after the day on which these Regulations are registered.

Period of authorization — point system in Schedules 3 and 4

(5) The duration, set out in subsection 23(2), of a transitional authorization is based on the system for the allocation of points related to the final discharge point set out in the table to Schedule 3 and, if applicable, related to its overflow points for its combined sewers set out in Schedule 4.

Application

Required information

22. An application for a transitional authorization must contain the following information:

(a) the owner's name, civic and postal addresses, telephone number and, if any, email address and fax

number;

(b) the operator's name, civic and postal addresses, telephone number and, if any, email address and fax number;

(c) the name, title, civic and postal addresses, telephone number and, if any, email address and fax number of a contact person;

(d) if applicable, the wastewater system's name and civic address;

(e) information that establishes that at the time of the application

(i) the conditions for the authorization referred to in subsection 4(1) are not met, and

(ii) it was not technically or economically feasible before the time of the application to have modified the wastewater system, including its processes, in order to meet those conditions;

(f) a plan for modifications to the wastewater system, including a description of modifications to its processes, that are envisaged in order to meet the conditions for the authorization referred to in subsection 4(1) and a proposed schedule for implementation of the plan;

(g) the information set out in paragraph 16(1)(e) for the final discharge point;

(h) the number of points allocated under the table to Schedule 3;

(i) a statement as to which of the waters set out in paragraphs 5(a) to (h), column 2, of the table to Schedule 3 describes the water where the effluent is deposited, or may enter from the place where the effluent is deposited, via the final discharge point and, among the points set out in column 3 for those waters, the highest number of points;

(j) the annual average daily volume of effluent deposited via the final discharge point, determined in accordance with section 5, for the year that ended before the month in which the application was made, and the number of points set out in item 1, column 3, of the table to Schedule 3 that applies to that volume based on the ranges of volume set out in column 2;

(k) the averages referred to in paragraphs 4(1)(a) and (b) as determined in accordance with subsection 4(3) for each quarter or month determined in accordance with subsection 4(2) of the year that ended before the month in which the application was made;

(l) the averages referred to in paragraph (k) but expressed on an annual basis under subsection 21(1) and the number of points determined in accordance with the formula, set out in item 2, column 2, of the table to Schedule 3 that applies to those averages;

(m) if the annual average concentration of total residual chlorine in the effluent deposited via the final discharge point — for the year that ended before the month in which the application was made — exceeded 0.02 mg/L, the number of points set out in item 3, column 3, of the table to Schedule 3;

(n) the maximum concentration referred to in paragraph 4(1)(d) as determined in accordance with subsection 4(3) for each quarter or month determined in accordance with subsection 4(2) of the year that ended before the month in which the application was made;

(o) the annual average concentration, expressed in mg/L as nitrogen (N) at $15^{\circ}\text{C} \pm 1^{\circ}\text{C}$, of un-ionized ammonia in the effluent deposited via the final discharge point as determined in accordance with subsection 4(3) for the year that ended before the month in which the application was made;

(p) if the annual average concentration referred to in paragraph (o) was greater than or equal to 1.25 mg/L, expressed as nitrogen (N) at $15^{\circ}\text{C} \pm 1^{\circ}\text{C}$, the number of points set out in item 4, column 3, of the table to Schedule 3;

(q) the results of the determination of acute lethality for each sample referred to in subsection 21(3), including,

for each of those samples, the information referred to in section 8.1 of the Reference Method EPS 1/RM/13 and, if the acute lethality of the effluent was determined in accordance with that method and the Procedure for pH Stabilization EPS 1/RM/50, section 3 of that procedure;

(r) if the duration of the transitional authorization sought in the application relies on, in addition to points allocated under the table to Schedule 3, an allocation of points under Schedule 4, for each combined sewer overflow point of the wastewater system

(i) the percentage referred to in item 1, column 1, of Schedule 4 that is described in whichever of paragraphs 1(a) to (d) of that Schedule that applies,

(ii) the number of deposits referred to in item 2, column 1, of that Schedule that are described in whichever of paragraphs 2(a) to (d), column 2, of that Schedule that applies, for the year that ended before the month in which the application was made,

(iii) a statement as to which of the waters set out in paragraphs 3(a) to (c), column 2, of that Schedule describes the water where the effluent is deposited, or may enter from the place where the effluent is deposited, via that overflow point, and

(iv) the number of points set out in column 3 for the applicable paragraph set out in column 2 of that Schedule as determined for the purposes of subparagraph (i) and (ii) and the number of those points that applies for each statement referred to in subparagraph (iii);

(s) the information set out in paragraph 16(1)(f) for each of the overflow points referred to in paragraph (r);

(t) for an application referred to in paragraph (r), a plan for the modifications to the wastewater system that are envisaged to eliminate, after the period of authorization for which the application is sought, the deposit of effluent that contains deleterious substances prescribed in section 3 via any overflow point of a combined sewer and a proposed schedule for implementation of the plan; and

(u) a statement signed and dated by the owner or operator, or their duly authorized representative, that certifies that

(i) the information provided in the application was prepared by persons with the knowledge required to determine the truthfulness, accuracy and completeness of the information, and

(ii) to the best of their information and belief, based on representations made to them by those persons in response to queries concerning that determination, the information provided is true, accurate and complete.

Conditions of Issuance

Required information

23. (1) Subject to subsection (3), the authorization officer must issue a transitional authorization if

(a) the application contains the information required by section 22;

(b) the information referred to in paragraph 22(e) can reasonably be regarded as establishing that at the time of the application

(i) the conditions for the authorization referred to in subsection 4(1) are not met, and

(ii) it was not technically or economically feasible before the time of the application to have modified the wastewater system, including its processes, in order to meet those conditions; and

(c) the proposed schedule to implement the plans referred in paragraphs 22(f) and, if applicable, (t) can reasonably be regarded as feasible.

Duration of transitional authorization

(2) The transitional authorization must be issued for the following period of authorization:

(a) from the date of issuance to December 31, 2019, if the final discharge point is, under the table to Schedule 3, allocated 70 or more points and, if the wastewater system has combined sewer overflow points for which points are allocated under Schedule 4, each combined sewer overflow point of the wastewater system is allocated less points than the number of points allocated under the table to Schedule 3 to the final discharge point;

(b) from the date of issuance to December 31, 2029, if the final discharge point is, under the table to Schedule 3, allocated 50 or more points but less than 70 points and, if the wastewater system has combined sewer overflow points for which points are allocated under Schedule 4, each combined sewer overflow point of the wastewater system is allocated less points than the number of points allocated under the table to Schedule 3 to the final discharge point; and

(c) from the date of issuance to December 31, 2039,

(i) if the final discharge point is, under the table to Schedule 3, allocated less than 50 points, or

(ii) if the final discharge point is, under the table to Schedule 3, allocated 50 or more points and, if the wastewater system has combined sewer overflow points for which points are allocated under Schedule 4, there is at least one combined sewer overflow point that is, under Schedule 4, allocated a number of points that is greater than or equal to the number of points allocated under the table to Schedule 3 to the final discharge point.

Refusal

(3) The authorization officer must refuse to issue the transitional authorization if the authorization officer has reasonable grounds to believe that the information contained in, or provided in support of, the application is false or misleading.

Conditions on Transitional Authorizations

Authorized deposits — BOD and SS transitional authorization

24. (1) The holder of a BOD and SS transitional authorization is authorized, during the period of authorization, to deposit via the final discharge point effluent that contains biochemical oxygen demanding matter and suspended solids if the effluent, during that period, meets the following conditions:

(a) the average carbonaceous biochemical oxygen demand due to the quantity of biochemical oxygen demanding matter in the effluent, determined in accordance with subsections 4(2) and (3), does not exceed

(i) the greatest of the averages for that carbonaceous biochemical oxygen demand referred to in paragraph 22(k), if the average for that carbonaceous biochemical oxygen demand expressed on an annual basis referred to in paragraph 22(l) is greater than 25 mg/L, and

(ii) 25 mg/L, in any other case; and

(b) the average concentration of suspended solids in the effluent, determined in accordance with subsections 4(2) and (3), does not exceed

(i) the greatest of the average concentrations for those suspended solids referred to in paragraph 22(k), if the average concentration for suspended solids expressed on an annual basis referred to in paragraph 22(l) is greater than 25 mg/L, and

(ii) 25 mg/L, in any other case.

Authorized deposits — NH₃, BOD and SS transitional authorization

(2) The holder of an NH₃, BOD and SS transitional authorization is authorized, during the period of

authorization, to deposit via the final discharge point effluent that contains biochemical oxygen demanding matter, suspended solids and un-ionized ammonia if the effluent, during that period, meets the following conditions:

(a) for biochemical oxygen demanding matter and suspended solids, the conditions referred to in paragraphs (1)(a) and (b), respectively; and

(b) for un-ionized ammonia, the maximum concentration of un-ionized ammonia in the effluent, determined in accordance with subsections 4(2) and (3), does not exceed the greatest of the maximum concentrations referred to in paragraph 22(n).

Acute lethality

(3) The holder of a transitional authorization is, during the period of authorization,

(a) authorized to deposit effluent that is acutely lethal via the final discharge point, if a sample referred to in subsection 21(3) has been determined to be acutely lethal; and

(b) not authorized to deposit effluent that is acutely lethal via the final discharge point, if no sample referred to in subsection 21(3) has been determined to be acutely lethal.

Compliance Obligations

General

25. (1) A holder of a transitional authorization, other than the holder referred to in paragraph 24(3)(a), must, during the period of authorization, comply with sections 5 to 13, 15 to 19 and 40 to 43.

Owner or operator referred to in paragraph 24(3)(a)

(2) A holder of a transitional authorization referred to in paragraph 24(3)(a) must, during the period of authorization, comply with sections 5 to 7, 9 to 11, 13, 15 to 19 and 40 to 43.

Progress reports

(3) The holder of a transitional authorization must, every five years after the date of issuance of the transitional authorization, send to the authorization officer a progress report on the steps taken to implement the plan referred to in paragraphs 22(f) and, if applicable, (t).

Scope of Transitional Authorization and Revocation

Content of transitional authorization

26. A transitional authorization must contain the following information in the form set out in Schedule 5:

(a) the information referred to in paragraphs 22(a) to (d);

(b) for the final discharge point, the information referred to in paragraph 16(1)(e);

(c) the date of issuance;

(d) the period of authorization;

(e) the average carbonaceous biochemical oxygen demand due to the quantity of biochemical oxygen demanding matter in the effluent that is authorized to be deposited under subsection 24(1) or (2), as the case may be;

(f) the average concentration of suspended solids in the effluent that is authorized to be deposited under subsection 24(1) or (2), as the case may be;

(g) for an NH₃, BOD and SS transitional authorization, the concentration of un-ionized ammonia in the effluent that is authorized to be deposited under paragraph 24(2)(b); and

(h) a statement as to whether the holder is authorized to deposit effluent that is acutely lethal via the final discharge point under paragraph 24(3)(a).

Correction of information

27. (1) If the information provided in an application for a transitional authorization contains errors, the owner or operator must, without delay, send a notice to the authorization officer that indicates the reason for the errors and provides information that corrects them and make the certification under paragraph 22(u) with respect to the application as amended by those corrections.

Corrected transitional authorization

(2) On receipt of a notice that corrects information that — if that corrected information had been provided with the application — would have affected the information contained in the transitional authorization referred to in section 26, the authorization officer must issue a corrected transitional authorization as if the corrections together with the remaining information originally provided in the application were an application under section 22.

Revocation

28. (1) The authorization officer must revoke a transitional authorization under the following circumstances:

(a) the information referred to in section 22 contained in the application or the information provided in a progress report referred to in subsection 25(3) is false or misleading;

(b) the holder has, during the period of authorization, failed to comply with any condition referred to in subsections 24(1) and (2), and any section referred to in subsection 25(1) or (2), as the case may be; or

(c) new information indicates that a deposit authorized under section 24 has had or is likely to have an effect on fish, fish habitat or the use by man of fish that is more adverse than the worst of those effects that were anticipated when that authorization was issued.

Progress reports

(2) The authorization officer may revoke the transitional authorization if

(a) the holder has not sent a progress report in accordance with subsection 25(3); or

(b) the authorization officer, based on a progress report referred to in subsection 25(3), has reasonable grounds to believe that the proposed plan in question cannot be fully implemented before the end of the period of authorization.

Representations

(3) The authorization officer may not revoke the transitional authorization unless the authorization officer has provided the holder with

(a) written reasons for the proposed revocation; and

(b) an opportunity to be heard, by written representation, in respect of the proposed revocation.

TEMPORARY AUTHORIZATION TO DEPOSIT UN-IONIZED AMMONIA

Requirements and Duration

Requirements

29. (1) The owner or operator of a wastewater system — whose effluent deposited via its final discharge point, during a given quarter or month determined in accordance with subsection 4(2), does not meet the condition referred to in paragraph 4(1)(d) — may apply to an authorization officer for a temporary authorization to deposit effluent that contains un-ionized ammonia via its final discharge point if

- (a) any acute lethality of the effluent is due only to the presence of the un-ionized ammonia in the effluent;
- (b) the maximum concentration referred to in paragraph 4(1)(d), as determined in accordance with subsection 4(3), was greater than or equal to 1.25 mg/L, expressed as nitrogen (N) at $15^{\circ}\text{C} \pm 1^{\circ}\text{C}$, for, as the case may be, the two consecutive quarters or months immediately before the month in which the application was made; and
- (c) the concentration of un-ionized ammonia in the water at any point that is 100 m from the point of entry where effluent is deposited in that water via the final discharge point is less than or equal to 0.016 mg/L, expressed as nitrogen (N), as determined in accordance with the following formula:

$$\text{total ammonia} \times \frac{1}{1 + 10^{\text{pKa} - \text{pH}}}$$

where

total ammonia is the concentration of total ammonia in that water — namely un-ionized ammonia (NH_3) plus ionized ammonia (NH_4^+) — determined in accordance with subsection 11(2), expressed in mg/L, expressed as nitrogen (N), as if that water were effluent,

pKa is $0.09018 + 2729.92/T$, where T is ambient water temperature in kelvin (degrees in Celsius + 273), and

pH is the pH of that water determined in accordance with subsection 11(3), as if that water were effluent.

Periods for application

(2) An initial application for a temporary authorization to deposit effluent that contains un-ionized ammonia must be made by the day that is 18 months after the day on which these Regulations are registered. Successive applications to renew the temporary authorization must be made at least 90 days before the expiry of the authorization in question.

Application

Required information

30. An application for a temporary authorization to deposit effluent that contains un-ionized ammonia, or for a renewal of that temporary authorization, must contain the following information:

- (a) the owner's name, civic and postal addresses, telephone number and, if any, email address and fax number;
- (b) the operator's name, civic and postal addresses, telephone number and, if any, email address and fax number;
- (c) the name, title, civic and postal addresses, telephone number and, if any, email address and fax number, of a contact person;
- (d) if applicable, the wastewater system's name and civic address;
- (e) the information set out in paragraph 16(1)(e) for the final discharge point;

(f) the results of the determination of acute lethality referred to in paragraph 29(1)(a), including, for each sample on which that determination was based, the information referred to in section 8.1 of the Reference Method EPS 1/RM/13 and, if the acute lethality of the effluent was determined in accordance with that method and the Procedure for pH Stabilization EPS 1/RM/50, section 3 of that procedure;

(g) the information that establishes that, at the time of the application, any acute lethality of the effluent is due only to the presence of the un-ionized ammonia in the effluent;

(h) the maximum concentration of un-ionized ammonia in the effluent deposited via the final discharge point, determined in accordance with subsection 4(3), for the two consecutive quarters or months determined in accordance with subsection 4(2), immediately before the month in which the application is made;

(i) the concentration of un-ionized ammonia determined in accordance with the formula set out in paragraph 29(1)(c) in the water in four samples taken, at the same time on or about midday during the month of August, from a depth of not more than one metre below four points on the surface of the water — each of which is 100 m from the point of entry where effluent is deposited in that water via the final discharge point — that are equidistant from each other with the maximum distance between each of those four points but, if that water is a watercourse, the four points must be downstream from that point of entry; and

(j) a statement signed and dated by the owner or operator, or their duly authorized representative, that certifies that

(i) the information provided in the application was prepared by persons with the knowledge required to determine the truthfulness, accuracy and completeness of the information, and

(ii) to the best of their information and belief, based on representations made to them by those persons in response to queries concerning that determination, the information provided is true, accurate and complete.

Conditions of Issuance

Required information

31. (1) Subject to subsection (2), the authorization officer must issue a temporary authorization to deposit effluent that contains un-ionized ammonia for a period of three years from the date of issuance if

(a) the application contains the information referred to in section 30; and

(b) the owner or operator has established under paragraph 30(g) that, at the time of the application, any acute lethality of the effluent was due only to the presence of the un-ionized ammonia in the effluent.

Refusal

(2) The authorization officer must refuse to issue the temporary authorization if the authorization officer has reasonable grounds to believe that the information contained in, or provided in support of, the application is false or misleading.

Compliance Obligations

General

32. A holder of a temporary authorization to deposit effluent that contains un-ionized ammonia must, during the period of authorization,

(a) deposit effluent that satisfies the conditions referred to in paragraphs 4(1)(a) to (c);

(b) deposit effluent that has a concentration of un-ionized ammonia in the water at any point — that is 100 m from the point of entry where effluent is deposited in that water via the final discharge point — that is less than or equal to 0.016 mg/L, expressed as nitrogen (N), determined in accordance with the formula set out in paragraph 29(1)(c); and

(c) comply with sections 5 to 7, 9 to 11, 13 to 19 and 40 to 43.

Scope of Temporary Authorization and Revocation

Period and content

33. (1) A temporary authorization to deposit effluent that contains un-ionized ammonia must contain the following information in the form set out in Schedule 6:

(a) the information referred to in paragraphs 30(a) to (d);

(b) for the final discharge point, the information referred to in paragraph 16(1)(e);

(c) the date of issuance and, if applicable, the date of renewal;

(d) the period of authorization; and

(e) a statement that the concentration of un-ionized ammonia in the water at any point — that is 100 m from the point of entry where effluent is deposited in that water via the final discharge point — must be less than or equal to 0.016 mg/L, expressed as nitrogen (N), determined in accordance with the formula set out in paragraph 29(1)(c).

Renewal

(2) The temporary authorization may, on application, be renewed for successive periods of three years.

Correction of information

34. (1) If the information provided in an application for a temporary authorization to deposit effluent that contains un-ionized ammonia contains errors, the owner or operator must, without delay, send a notice to the authorization officer that indicates the reason for the errors and provides information that corrects them and make the certification under paragraph 30(j) with respect to the application as amended by those corrections.

Corrected temporary authorization

(2) On receipt of a notice that corrects information that — if that corrected information had been provided with the application — would have affected the information contained in the temporary authorization referred to in section 33, the authorization officer must issue a corrected temporary authorization as if the corrections together with the remaining information originally provided in the application were an application under section 30.

Revocation

35. (1) The authorization officer must revoke the temporary authorization to deposit effluent that contains un-ionized ammonia under the following circumstances:

(a) the information contained in the application is false or misleading;

(b) the holder has, during the period of authorization, failed to comply with paragraph 32(a) or (b) or any section referred to in paragraph 32(c); or

(c) new information indicates that a temporary authorization under section 33 has had or is likely to have an effect on fish, fish habitat or the use by man of fish that is more adverse than the worst of those effects that were anticipated when that authorization was issued.

Representations

(2) The authorization officer may not revoke the temporary authorization unless the authorization officer has provided the holder with

- (a) written reasons for the proposed revocation; and
- (b) an opportunity to be heard, by written representation, in respect of the proposed revocation.

TEMPORARY BYPASS AUTHORIZATION

Requirements

Deposit without treatment

36. (1) The owner or operator of a wastewater system may apply to an authorization officer for a temporary authorization to bypass the normal routes for the flow of wastewater within the system to deposit in any water or place referred to in subsection 36(3) of the Act effluent that contains any deleterious substance referred to in section 3 that has not been subject to at least one of the treatment processes normally applied to wastewater in the system.

Conditions precedent

(2) An application for a temporary bypass authorization may not be made unless

(a) the requirement to bypass the normal routes for the flow of wastewater within the system arises from the construction of changes to, or the maintenance of, the system; and

(b) the bypass is designed, in light of what is technically and economically feasible, to minimize the volume of effluent deposited and the concentration of deleterious substances prescribed in section 3 in the effluent deposited.

Period for application

(3) An application for a temporary bypass authorization must be made at least 45 days before the day on which the construction or the maintenance is scheduled to begin.

Application

Required information

37. An application for a temporary bypass authorization must contain the following information:

(a) the owner's name, civic and postal addresses, telephone number and, if any, email address and fax number;

(b) the operator's name, civic and postal addresses, telephone number and, if any, email address and fax number;

(c) the name, title, civic and postal addresses, telephone number and, if any, email address and fax number, of a contact person;

(d) if applicable, the wastewater system's name and civic address;

(e) an explanation of how the bypass is designed to minimize the volume of effluent deposited and the concentration of deleterious substances prescribed in section 3 in the effluent deposited during the construction or maintenance work, including a description of, and proposed schedule for, all steps that are to be taken to achieve that minimization;

(f) the information set out

(i) in paragraph 16(1)(e), if the bypass results in the deposit of effluent via the final discharge point of the wastewater system, or

- (ii) in paragraph 16(1)(f), if the bypass takes wastewater from the wastewater system at an overflow point for deposit in any water or place referred to in subsection 36(3) of the Act;
- (g) the period for which the authorization is required in order to allow for the completion of the construction or maintenance referred to in paragraph 36(2)(a);
- (h) the duration, expressed in hours, of the deposits referred to in paragraph (f);
- (f) the estimated volume, expressed in m³, of those deposits; and
- (j) a statement signed and dated by the owner or operator, or their duly authorized representative, that certifies that
 - (i) the information provided in the application was prepared by persons with the knowledge required to determine the truthfulness, accuracy and completeness of the information, and
 - (ii) to the best of their information and belief, based on representations made to them by those persons in response to queries concerning that determination, the information provided is true, accurate and complete.

Issuance

Content of authorization

38. A temporary bypass authorization must be issued for a period that is sufficient to allow for the completion of the construction or maintenance referred to in paragraph 36(2)(a) and the authorization must contain the following information in the form set out in Schedule 7:

- (a) the information referred to in paragraphs 37(a) to (d) and (f);
- (b) the date of issuance; and
- (c) the period of authorization.

Correction of information

39. (1) If the information provided in an application for a temporary bypass authorization contains errors, the owner or operator must, without delay, send a notice to the authorization officer that indicates the reason for the errors and provides information that corrects them and make the certification under paragraph 37(j) with respect to the application as amended by those corrections.

Corrected authorization

(2) On receipt of a notice that corrects information that — if that corrected information had been provided with the application — would have affected the information contained in the temporary authorization referred to in section 38, the authorization officer must issue a corrected temporary authorization as if the corrections together with the remaining information originally provided in the application were an application under section 37.

GENERAL

Electronic applications

40. (1) An application for a transitional authorization or a temporary authorization must be sent electronically in the format specified by the Minister and must bear the electronic signature of the owner or operator, or their duly authorized representative.

Paper

(2) If the Minister has not specified an electronic format or if it is not feasible to send the application electronically in accordance with subsection (1) because of circumstances beyond the control of the owner or

operator, or their duly authorized representative, the application must be sent on paper, signed by the owner or operator, or their duly authorized representative, and in the format specified by the Minister. However, if no format has been so specified, it may be in any format.

Registry of authorizations

41. The Minister must maintain a registry, for examination by the public, that contains a copy of each transitional authorization, each temporary authorization to deposit effluent that contains un-ionized ammonia and each temporary bypass authorization that has been issued under this Part, as they may be modified from time to time, and that has not been revoked.

PART 3

DEPOSIT OUT OF THE NORMAL COURSE OF EVENTS

Response plan

42. (1) The owner or operator of a wastewater system must prepare a response plan that describes the measures to be taken to prevent any deposit out of the normal course of events of effluent that contains a deleterious substance from the wastewater system into any water or place referred to in subsection 36(3) of the Act, and to mitigate or remedy the effects of any such deposit that may occur.

Required information

(2) The plan must contain the following information:

(a) the identification of any deposit out of the normal course of events that may reasonably be expected to occur from the wastewater system and that may reasonably be expected to result in damage or danger to fish habitat or fish or the use by man of fish, and the identification of the damage or danger;

(b) a description of the measures to be used to prevent, prepare for and respond to a deposit identified under paragraph (a);

(c) a list of the individuals who are to implement the plan in the event of a deposit out of the normal course of events and a description of their roles and responsibilities;

(d) the identification of the response training required for, and received by, each of those individuals;

(e) a list of the response equipment included as part of the plan and the equipment's location; and

(f) a description of alerting and notification procedures including the measures to be taken to notify members of the public who may be adversely affected by a deposit identified under paragraph (a) and to inform them of those measures and of what to do in the event of such a deposit.

Completion and availability for inspection

(3) The owner or operator of a wastewater system must complete the response plan within 45 days after the day on which the wastewater system becomes subject to this section and make it available for inspection as of the day on which it is completed.

Availability

(4) The owner or operator must, as of the day on which it is completed, make the response plan readily available on site to persons who are to implement the plan.

Updating and testing

(5) The response plan must be updated and tested at least once each year.

Notice and report

43. (1) Any person required by subsection 38(4) of the Act to report the occurrence of a deposit out of the normal course of events of effluent that contains a deleterious substance, or a serious and imminent danger of the occurrence of such a deposit, must

(a) immediately notify an inspector — or a person providing 24-hour emergency telephone service provided by the office set out in column 2 of Schedule 8 for the province, set out in column 1, where the wastewater system is located at the telephone number set out in column 3 — that the deposit has occurred or that there is a serious and imminent danger of its occurrence;

(b) include in that notification a statement, if they have reason to believe it is true, that that deposit, or that serious and imminent danger of that deposit, is — or would be, if it occurred — acutely lethal; and

(c) send a report — as soon as is feasible but not later than 45 days after notifying the inspector or the person referred to in paragraph (a) — that contains the information set out in subsection (2) to the inspector, or the person holding the position referred to in column 2 of Schedule 9 for the province, set out in column 1, where the wastewater system is located.

Required information

(2) The report must contain the following information:

(a) an indication of whether the notification referred to in paragraph (1)(a) was made and, if so, whether the statement referred to in paragraph (1)(b) was made and, if so, the basis upon which the deposit was believed to be acutely lethal;

(b) the circumstances of the deposit or serious and imminent danger of the deposit, the measures that were taken to prevent, mitigate or remedy, as the case may be, its effects and, if the response plan was implemented, details concerning its implementation; and

(c) if the deposit out of the normal course of events occurred, if possible,

(i) the name of any deleterious substance that was deposited and the concentration, in mg/L, of each such deleterious substance in the effluent by which it was deposited,

(ii) an estimate of the volume, in m³, of the effluent and an indication of how the estimate was made,

(iii) the identification of all points of the wastewater system from which wastewater was discharged from the wastewater system before that deposit occurred,

(iv) the identification of all points of entry at which effluent containing that deleterious substance was deposited in any water or place referred to in subsection 36(3) of the Act, and

(v) a description of each location of those waters or places where effluent is deposited and the name, if any, of those waters or places.

Electronic report

(3) The report referred to in paragraph (1)(c) must be sent electronically in the format specified by the Minister and must bear the electronic signature of the owner or operator, or their duly authorized representative.

Paper

(4) If the Minister has not specified an electronic format or if it is not feasible to send the report electronically in accordance with subsection (3) because of circumstances beyond the control of the owner or operator, or their duly authorized representative, the report must be sent on paper, signed by the owner or operator, or their duly authorized representative, and in the format specified by the Minister. However, if no format has been so specified, it may be in any format.

COMING INTO FORCE

On registration

44. (1) Subject to subsections (2) and (3), these Regulations come into force on the day on which they are registered.

24 months after registration

(2) Sections 4, 14, 24, 25, 32 and 36 to 43 come into force 24 months after the day on which these Regulations are registered.

January 1, 2014 — paragraph 4(1)(c) in relation to certain owners or operators

(3) Despite subsection (2), paragraph 4(1)(c) comes into force on January 1, 2014 in relation to an owner or operator of a wastewater system that during a given quarter or month determined in accordance with subsection 4(2) had an annual average daily volume of effluent deposited via its final discharge point that was less than 5 000 m³ during the year that ended before that quarter or month.

SCHEDULE 1

(Section 1)

AUTHORIZATION OFFICERS

Column 1	Column 2
Item Province	Position
1. Ontario	Director, Environmental Protection Operations Directorate — Ontario Environment Canada
2. Quebec	Director, Environmental Protection Operations Directorate — Quebec Environment Canada
3. Nova Scotia	Director, Environmental Protection Operations Directorate — Atlantic Environment Canada
4. New Brunswick	Director, Environmental Protection Operations Directorate — Atlantic Environment Canada
5. Manitoba	Director, Environmental Protection Operations Directorate — Prairie and Northern Environment Canada
6. British Columbia	Director, Environmental Protection Operations Directorate — Pacific and Yukon Environment Canada
7. Prince Edward Island	Director, Environmental Protection Operations Directorate — Atlantic Environment Canada
8. Saskatchewan	Director, Environmental Protection Operations Directorate — Prairie and Northern Environment Canada
9. Alberta	Director, Environmental Protection Operations Directorate — Prairie and Northern Environment Canada
10. Newfoundland and Labrador	Director, Environmental Protection Operations Directorate — Atlantic Environment Canada
11. Yukon	Director, Environmental Protection Operations Directorate — Pacific and Yukon Environment Canada

SCHEDULE 2

(Section 1 and subsections 14(4) and (6))

ENVIRONMENTAL EFFECTS MONITORING

INTERPRETATION

1. The following definitions apply in this Schedule.

“effect of concern on the benthic invertebrate community” means a statistically significant difference between data for indicators referred to in clause 5(a)(i)(A) from a study comparing benthic invertebrate communities conducted in

(a) an exposure area and a reference area where the absolute value of that difference between the means for each of those indicators for the exposure area and for the reference area is greater than or equal to two standard deviations of the data for that indicator for the reference area; or

(b) sampling areas within an exposure area that have gradually decreasing effluent concentrations. (*effet préoccupant sur la communauté d'invertébrés benthiques*)

“effect of concern on the fish population” means a statistically significant difference between data for indicators referred to in subparagraph 5(a)(ii) from a study comparing fish populations conducted in

(a) an exposure area and a reference area where the absolute value for the difference between the exposure area mean and the reference area mean

(i) for the indicator of condition mentioned in that subparagraph is greater than or equal to 10% of the reference area mean for that indicator, and

(ii) for each other indicator mentioned in that subparagraph is greater than or equal to 25% of the reference area mean for that other indicator; or

(b) sampling areas within an exposure area that have gradually decreasing effluent concentrations. (*effet préoccupant sur la population de poissons*)

“exposure area” means fish habitat and water frequented by fish that are exposed to effluent. (*zone exposée*)

“fish” has the same meaning as in section 2 of the Act but does not include parts of fish, parts of shellfish, parts of crustaceans or parts of marine animals. (*poisson*)

“reference area” means water frequented by fish that is not exposed to effluent but that has fish habitat that is, insofar as possible, most similar to that of the exposure area. (*zone de référence*)

“sampling area” means the area within a reference or exposure area where representative samples are collected. (*zone d'échantillonnage*)

PART 1

WATER QUALITY MONITORING

STUDIES

2. (1) Water quality monitoring studies are conducted by

(a) collecting samples of water from

(i) the exposure area surrounding the point of entry where effluent is deposited in water via the final discharge point of a wastewater system in water and from the related reference areas, and

(ii) the sampling areas that are selected under paragraph 8(a) and subsubclause 12(d)(i)(B)(III)2;

(b) recording — for the exposure area, and for the reference area, where the samples are collected — the temperature, pH and dissolved oxygen concentration of the water and, for fresh water, its conductivity;

(c) recording the concentration of the following substances:

(i) total ammonia,

- (ii) nitrate,
- (iii) nitrite,
- (iv) total phosphorus,
- (v) alkylphenol ethoxylates,
- (vi) ethinylestradiol,
- (vii) 17 β -estradiol, and
- (viii) estrone; and

(d) implementing quality assurance and quality control measures that will ensure the accuracy of water quality monitoring data.

(2) Water quality monitoring studies must — after December 31 of the calendar year during which it has been determined that subsection 14(1) of the Regulations applies — be conducted

(a) two times per calendar year but at least one month after any previous study on the samples of water collected from the areas referred to in subparagraph (1)(a)(i); and

(b) when the biological monitoring studies are conducted under Part 2, on samples of water collected in the areas referred to in subparagraph (1)(a)(ii).

REPORTS

3. A report on the water quality monitoring studies conducted during a calendar year must be sent to the authorization officer not later than March 31 of the following year and must contain the following information:

(a) the date on which each sample was collected for water quality monitoring;

(b) the latitude and longitude of the sampling areas used for water quality monitoring, in degrees, minutes and seconds, and a description that is sufficiently precise to identify the location of those areas;

(c) the results of the water quality monitoring; and

(d) the laboratory method detection limits.

PART 2

BIOLOGICAL MONITORING

STUDIES

4. Biological monitoring studies consist of

(a) a study respecting the benthic invertebrate community; and

(b) a study respecting the fish population, if the results of a previous study indicate an effect of concern on the benthic invertebrate community.

STRUCTURE OF STUDIES

5. Biological monitoring studies are conducted by

(a) collecting data to calculate the mean, the median, the standard deviation, the standard error and the

minimum and maximum values in the sampling areas for the following indicators:

- (i) in the case of a study respecting the benthic invertebrate community,
 - (A) the total benthic invertebrate density, the evenness index, taxa richness, and the similarity index, and
 - (B) if it is possible to sample sediment where the study was conducted, the total organic carbon content of sediment and the particle size distribution of sediment,
- (ii) in the case of a study respecting the fish population, indicators of growth, of reproduction, of condition and of survival that include, insofar as possible, the length, total body weight and age of the fish, the weight of the liver or hepatopancreas and, if the fish are sexually mature, the egg size, fecundity and gonad weight of the fish;
- (b) in the case of a study of effects on the fish population, collecting data to determine the sex of the fish sampled and whether they have any lesions, tumours, parasites or other abnormalities;
- (c) analyzing whether the results of the calculations made under clause (a)(i)(A) and subparagraph (a)(ii) indicate, as between the sampling areas, an effect of concern on, respectively,
 - (i) the benthic invertebrate community, and
 - (ii) the fish population; and
- (d) making a statistical analysis of the results of the calculations made under clause (a)(i)(A) and subparagraph (a)(ii) to estimate the probability of the correct detection of an effect of a pre-defined size and the degree of confidence that can be placed in the calculations.

DIVISION 1

THE FIRST BIOLOGICAL MONITORING STUDY

Study Design

6. Before the first biological monitoring study is conducted, a study design must be sent in accordance with section 9 and must contain

- (a) a site characterization that includes the information required by section 7;
- (b) a description of how the study respecting the benthic invertebrate community will be conducted that includes
 - (i) the information referred to in paragraphs 8(a) to (d), and
 - (ii) a description of how the study will provide the information necessary to determine if the effluent has an effect of concern on the benthic invertebrate community;
- (c) the dates on which the samples will be collected;
- (d) a description of the quality assurance and quality control measures that will be implemented to ensure the validity of the data that are collected; and
- (e) a summary of the results of any previous biological monitoring studies that were conducted respecting the benthic invertebrate community.

7. A site characterization must include the following information:

- (a) a description of the manner in which the effluent mixes with the water within the exposure area, including an estimate of the percentage of effluent in the water referred to in subsection 14(1) of the Regulations;

(b) a description of the reference and exposure areas where the biological monitoring studies will be conducted, including information on the geological, hydrological, chemical and biological — and, as the case may be, the oceanographical or the limnological — features of those areas;

(c) a description of any anthropogenic, natural or other factors that are not related to the effluent under study and that may reasonably be expected to contribute to any observed effect;

(d) a description of the types of treatment processes used by the wastewater system; and

(e) any additional information relevant to the site characterization.

8. A study respecting the benthic invertebrate community must include a description of and the scientific rationale for

(a) the sampling areas selected, taking into account the benthic invertebrate diversity and the area most exposed to effluent;

(b) the sample size selected;

(c) the sampling period selected; and

(d) the field and laboratory methodologies selected.

Sending

9. The first study design must be sent to the authorization officer by December 31, 2014.

Conduct of Study

10. (1) Subject to subsection (2), the first biological monitoring study must not begin before the day that is six months after the day on which the study design was sent and must be conducted in accordance with that study design.

(2) If it is not feasible to conduct the first biological monitoring study in accordance with the study design because of circumstances beyond the owner's or operator's control, the owner or operator may deviate from the study design but must inform the authorization officer without delay of those circumstances and of how the study was or is to be conducted.

First Interpretive Report

11. Within 24 months after the day referred to in section 9, the owner or operator must send to the authorization officer an interpretive report on the first biological monitoring study that contains the following information:

(a) a description of any deviation from the study design that occurred while the biological monitoring study was being conducted and any impact that the deviation had on the study;

(b) the latitude and longitude of the sampling areas, in degrees, minutes and seconds, and a description of the sampling areas that is sufficiently precise to identify the location of those areas;

(c) the dates on which samples were collected;

(d) the sample sizes;

(e) the results obtained under section 5 and any supporting raw data;

(f) based on those results, the identification of any effect of concern on the benthic invertebrate community;

(g) the conclusions of the biological monitoring study, taking into account

- (i) the presence of anthropogenic, natural or other factors that are not related to the effluent under study and that may reasonably be expected to contribute to any observed effect,
 - (ii) the results of the analyses conducted under paragraphs 5(c) and (d), and
 - (iii) a description of the quality assurance or quality control measures that were implemented and the data related to the implementation of those measures;
- (h) a description of how the results of the first biological monitoring study will affect the study design for the second biological monitoring study; and
- (i) the date on which the second biological monitoring study will be conducted.

DIVISION 2

SECOND AND SUBSEQUENT BIOLOGICAL MONITORING STUDIES

Study Designs

12. The study design for a second or any subsequent biological monitoring study must be sent to the authorization officer at least six months before the second or subsequent biological monitoring study is conducted and it must contain the following information:

- (a) a summary of the information referred to in paragraph 6(a) and a detailed description of any changes to that information since the most recent study design was sent;
- (b) the information described in paragraphs 6(b) to (e) in relation to the second or subsequent biological monitoring study in question;
- (c) a summary of the results of any biological monitoring studies that were conducted under section 14 of the Regulations respecting the benthic invertebrate community and the fish population; and
- (d) in respect of the previous biological monitoring study,
 - (i) if the results of that previous study indicate an effect of concern on the benthic invertebrate community,
 - (A) a description of a subsequent study that is to be conducted to confirm that effect, and
 - (B) a description of a fish population study that is to be conducted to determine whether the effluent has an effect of concern on the fish population, including
 - (I) an explanation of how the information described in paragraphs 11(a) to (i) in relation to the fish population study of that previous biological monitoring study affects that description,
 - (II) a description of how the study will provide the information necessary to determine if the effluent has an effect of concern on the fish population, and
 - (III) a description of and the scientific rationale for
 - 1. the fish species selected, taking into account the abundance of the species most exposed to effluent,
 - 2. the sampling areas selected,
 - 3. the dates on which samples will be collected,
 - 4. the sample size selected, and
 - 5. the field and laboratory methodologies selected; or

(ii) if the results of that previous study do not indicate an effect of concern on the benthic invertebrate community, a description of a subsequent study to confirm the absence of such an effect.

Conduct of Studies

13. (1) Subject to subsection (2), the second or any subsequent biological monitoring study must be conducted in accordance with the study design for it.

(2) If it is not feasible to conduct a second or subsequent biological monitoring study in accordance with the study design because of circumstances beyond the owner's or operator's control, the owner or operator may deviate from the study design but must inform the authorization officer without delay of those circumstances and of how the study was or is to be conducted.

Second or Subsequent Interpretive Report

14. (1) Within 36 months after the day on which the interpretive report on the previous biological monitoring study was sent, the owner or operator must send to the authorization officer an interpretive report on the second or subsequent biological monitoring study, as the case may be, and it must contain the information described in paragraphs 11(a) to (f) in relation to that second or subsequent study, including the identification of any effect of concern on

(a) the benthic invertebrate community; and

(b) the fish population.

(2) For the purpose of subsection (1) in relation to

(a) that second study, a reference in paragraphs 11(a) to (f) to the "first biological monitoring study" is to be read as a reference to the "second biological monitoring study" and a reference in those paragraphs to the "second biological monitoring study" is to be read as the "subsequent (third) biological monitoring study"; and

(b) that subsequent (third) study, a reference in those paragraphs to the "first biological monitoring study" is to be read as a reference to the "third biological monitoring study" and a reference in those paragraphs to the "second biological monitoring study" is to be read as the "subsequent (fourth) biological monitoring study".

PART 3

GENERAL

15. (1) Despite paragraph 2(2)(a), if there is no effect of concern on the benthic invertebrate community and no effect of concern on the fish population reported in two successive interpretive reports under sections 11 and 14 or under section 14, as the case may be, no subsequent water quality monitoring study and no subsequent biological monitoring study need be conducted.

(2) For the purpose of subsection (1), if the owner or operator is not required to conduct a study respecting the fish population under paragraph 4(b), the effluent is considered to have no effect of concern on the fish population.

SCHEDULE 3

(Subsection 21(5), section 22 and subsection 23(2))

SYSTEM OF POINTS — FINAL DISCHARGE POINT

INTERPRETATION

Definitions

1. The following definitions apply in this Schedule.

"bulk flow ratio" means the ratio of the average annual rate of flow of a watercourse to the average annual flow

of effluent that is deposited in that river. (*coefficient de débit brut*)

“enclosed bay” includes fjords and, if there is limited water exchange from a strait to the open ocean, that strait. (*baie fermée*)

“marine port waters” means the waters of a well-flushing sea port. (*eaux d’un port maritime*)

“open marine waters”, in relation to a final discharge point, means salt waters in an area defined by an arc of 135° extending 20 km from the final discharge point, if there is no land within that area. (*eaux marines libres*)

TABLE

Item	Column 1 Averages and Water	Column 2 Characteristics	Column 3 Points
1.	Annual average daily volume of effluent, expressed in m ³ , deposited during the year in question	(a) > 10 and ≤ 500	5 points
		(b) > 500 and ≤ 2 500	10 points
		(c) > 2 500 and ≤ 17 500	15 points
		(d) > 17 500 and ≤ 50 000	25 points
		(e) > 50 000	35 points
2.	Average carbonaceous biochemical oxygen demand (CBOD) due to the quantity of biochemical oxygen demanding matter in the effluent, and average concentration of suspended solids (SS) in the effluent, both expressed in mg/L, deposited during the year in question	(CBOD + SS)/5	points as per formula in column 2
3.	Average concentration of total residual chlorine, expressed in mg/L, deposited during the year in question	> 0.02	10 points
4.	Average annual concentration of un-ionized ammonia, expressed in mg/L as nitrogen (N), deposited during the year in question	≥ 1.25 at 15°C ± 1°C	20 points
5.	Water where effluent is deposited via the final discharge point (highest value of any that apply)	(a) open marine waters	5 points
		(b) marine port waters	10 points
		(c) lake, reservoir	20 points
		(d) enclosed bay, marine estuary	20 points
		(e) watercourse with bulk flow ratio >100	15 points
		(f) watercourse with bulk flow ratio ≥10 and ≤100	20 points
		(g) watercourse with bulk flow ratio <10	25 points
		(h) shellfish harvesting area within 500 m of the point of entry where effluent is deposited in the water via the final discharge point	20 points

SCHEDULE 4
(Subsection 21(5), section 22 and subsection 23(2))

SYSTEM OF POINTS — COMBINED SEWER OVERFLOW POINTS

Item	Column 1 Factors	Column 2 Criteria	Column 3 Points
1.	The percentage of the cross-sectional area of the combined sewer at the overflow point that has wastewater during dry weather	(a) $\geq 50\%$	30 points
		(b) $\geq 25\%$ and $< 50\%$	20 points
		(c) $\geq 10\%$ and $< 25\%$	10 points
		(d) $< 10\%$	5 points
2.	The number of deposits via the overflow point during the year in question	(a) > 25 deposits	30 points
		(b) > 15 deposits and ≤ 25 deposits	20 points
		(c) > 5 deposits and ≤ 15 deposits	10 points
		(d) 5 deposits or less	0 points
3.	Water where effluent is deposited via each overflow point (the sum of points for all that apply)	(a) shellfish harvesting area within 500 m of any point of entry where effluent is deposited in the water via the overflow point	20 points
		(b) endangered species or fish spawning area within 500 m downstream from any point of entry where effluent is deposited in the water via the overflow point	10 points
		(c) lake, reservoir, marine estuary, or enclosed bay as defined in section 1 to Schedule 3	10 points

SCHEDULE 5

Fisheries Act, R.S., c. F-14, s. 1

[Footnote 8](#)

Combined sewers collect both sanitary sewage and storm water in the same pipe. Modern practice is to separate these two collection systems since the volume of wastewater can exceed the capacity of treatment systems during significant wet weather events, resulting in overflows.

[Footnote 9](#)

The term "municipal wastewater effluent" is often used in reference to effluent from Canadian wastewater (sewage) systems since the majority are owned and operated by municipalities. For the purpose of this document the term "wastewater effluent" is used.

MANITOBA HEALTH COMMUNITY WATER FLUORIDATION PROGRAM- MONITORING PROGRAM

OVERVIEW

Water fluoridation is the controlled addition of fluoride into a community water supply. The purpose of adding a controlled level of fluoride is for the prevention of dental decay. The purpose of this program is to ensure that the recommended level for fluoride concentration is maintained in Manitoba's drinking water. Approval is issued by the Minister of Health to communities operating fluoridation systems in accordance with the regulations under the Manitoba Drinking Water Safety Act.

All fluoride operating systems participate in the monitoring program. The City of Winnipeg performs their own testing and submits monthly fluoride monitoring data to Manitoba Health and to ALS lab for the annual report.

1) Operating Parameters

Manitoba Health identifies an optimum level and operating range for fluoride concentration in drinking water. For 2011/2012 the optimum level recommended is 0.7 mg/L or parts per million (ppm), with an operating range of 0.5 mg/L as a minimum and 0.9 mg/L as a maximum. The maximum acceptable concentration is 1.5 mg/L.

Water treatment plant operators are encouraged to maintain fluoride concentrations within the specified range.

Manitoba Health provides a schedule for bi-weekly monitoring periods. The sampling year consisted of 26 periods this year.

2) Supplies

Manitoba Health provides Fluoridation Control Record forms to the plants, to be submitted with the samples. Manitoba Health also provides sampling bottles, fluoride standard solution, SPADNS (reagent) and shipping containers to the plants, through ALS Environmental. All are necessary for daily testing and bi-weekly sample submission.

3) Sample Submission

Samples are collected on a daily basis, tested on-site and results are recorded by the water treatment plant operator. A 14 day composite sample is tested by the operator then submitted to the laboratory for confirmatory analysis. A record of chemical feed data (Fluoridation Control Record) is submitted with the sample.

4) Analysis

ALS Environmental, located in Winnipeg, receives the samples and conducts the analysis. The results are reported to the individual water treatment plant operators and to Manitoba Health.

5) Monitoring

Manitoba Health monitors the fluoride levels, makes recommendations, and may provide technical assistance.

6) Reporting

Communities receive an annual report of their plant's operating record. On a periodic and/or as required basis, reports may be provided during the operating year. Manitoba Health also annually presents certificates to recognize water treatment plant operators who have maintained a high standard of operating efficiency for a fluoridation system.

Introduction

The *Guidelines for Canadian Drinking Water Quality* are published by Health Canada on behalf of the Federal-Provincial-Territorial Committee on Drinking Water (CDW). This summary table is updated regularly and published on Health Canada's website (www.healthcanada.gc.ca/waterquality). It supersedes all previous versions, as well as the published booklet of the *Sixth Edition of the Guidelines for Canadian Drinking Water Quality*.

These guidelines are based on current, published scientific research related to health effects, aesthetic effects, and operational considerations. Health-based guidelines are established on the basis of comprehensive review of the known health effects associated with each contaminant, on exposure levels and on the availability of treatment and analytical technologies. Aesthetic effects (e.g., taste, odour) are taken into account when these play a role in determining whether consumers will consider the water drinkable. Operational considerations are factored in when the presence of a substance may interfere with or impair a treatment process or technology (e.g., turbidity interfering with chlorination or UV disinfection) or adversely affect drinking water infrastructure (e.g., corrosion of pipes).

The Federal-Provincial-Territorial Committee on Drinking Water establishes the Guidelines for Canadian Drinking Water Quality specifically for contaminants that meet all of the following criteria:

1. exposure to the contaminant could lead to adverse health effects;
2. the contaminant is frequently detected or could be expected to be found in a large number of drinking water supplies throughout Canada; and
3. the contaminant is detected, or could be expected to be detected, at a level that is of possible health significance.

If a contaminant of interest does not meet all these criteria, the Federal-Provincial-Territorial Committee on Drinking Water may choose not to establish a numerical guideline or develop a Guideline Technical Document. In that case, a Guidance Document may be developed.

Guidance Documents undergo a process similar to Guideline Technical Documents, including public consultations through the Health Canada website. They are offered as information for drinking water authorities, and help provide guidance relating to contaminants, drinking water management issues or emergency situations. Consultation documents, Guideline Technical Documents and Guidance documents are available from the Health Canada website (www.healthcanada.gc.ca/waterquality).

In general, the highest priority guidelines are those dealing with microbiological contaminants, such as bacteria, protozoa and viruses. Any measure taken to reduce concentrations of chemical contaminants should not compromise the effectiveness of disinfection.

Inquiries can be directed to: water_eau@hc-sc.gc.ca

New, revised, reaffirmed and upcoming guidelines

Guidelines for several chemical, physical and microbiological parameters are new or have been revised since the publication of the *Sixth Edition of the Guidelines for Canadian Drinking Water Quality* in 1996. These new and revised guidelines are presented in Table 1.

Table 1. New and revised guidelines

Parameter	Guideline (mg/L)	Previous guideline (mg/L)	CHE approval
<i>Microbiological parameters</i>^a			
Bacteriological		0 coliforms/100 mL	
<i>E. coli</i>	0 per 100 mL		2006
Total coliforms	0 per 100 mL		2006
Heterotrophic plate count	No numerical guideline required		2006
Emerging pathogens	No numerical guideline required		2006
Protozoa	No numerical guideline required	None	2004
Enteric viruses	No numerical guideline required	None	2004
Turbidity	0.3/1.0/0.1 NTU ^b	1.0 NTU	2004
<i>Chemical and physical parameters</i>			
Aluminum	0.1/0.2 ^c	None	1999
Antimony	0.006	None	1997
Arsenic	0.01	0.025	2006
Benzene	0.005	0.005	2009
Bromate	0.01	None	1999
Chlorate	1	None	2008
Chlorine	No numerical guideline required	None	2009
Chlorite	1	None	2008
Cyanobacterial toxins—microcystin-LR	0.0015	None	2002
Fluoride	1.5	1.5	1996
Formaldehyde	No numerical guideline required	None	1998
Haloacetic Acids—Total (HAAs)	0.08	None	2008
2-Methyl-4-chlorophenoxyacetic acid (MCPA)	0.1	None	2010
Methyl <i>tertiary</i> -butyl ether (MTBE)	0.015	None	2006
Trichloroethylene (TCE)	0.005	0.05	2005
Trihalomethanes—Total (THMs) ^d	0.1	0.1	2006

Guidelines for Canadian Drinking Water Quality—Summary Table

Parameter	Guideline (mg/L)	Previous guideline (mg/L)	CHE approval
Uranium	0.02	0.1	2000
<i>Radiological parameters</i>			
Cesium-137 (¹³⁷ Cs)	10 Bq/L	10 Bq/L	2009
Iodine-131 (¹³¹ I)	6 Bq/L	6 Bq/L	2009
Lead-210 (²¹⁰ Pb)	0.2 Bq/L	0.1 Bq/L	2009
Radium-226 (²²⁶ Ra)	0.5 Bq/L	0.6 Bq/L	2009
Strontium-90 (⁹⁰ Sr)	5 Bq/L	5 Bq/L	2009
Tritium (³ H)	7000 Bq/L	7000 Bq/L	2009

^aRefer to section on Guidelines for microbiological parameters.

^bBased on conventional treatment/slow sand or diatomaceous earth filtration/membrane filtration.

^cThis is an operational guidance value, designed to apply only to drinking water treatment plants using aluminum-based coagulants. The operational guidance values of 0.1 mg/L applies to conventional treatment plants, and 0.2 mg/L applies to other types of treatment systems.

^dThe separate guideline for BDCM was rescinded based on new science. See addendum to the THM document.

In certain situations, the Federal-Provincial-Territorial Committee on Drinking Water may choose to develop guidance documents: for contaminants that do not meet the criteria for guideline development, and for specific issues for which operational or management guidance is warranted.

Table 2. Guidance documents

Parameter or issue	CHE approval
Boil water advisories	2009
Chloral hydrate	2008
Corrosion Control	2009
Drinking water avoidance advisories	2009
Potassium from water softeners	2008

The Federal-Provincial-Territorial Committee on Drinking Water has established a science-based process to systematically review older guidelines to assess the need to update them. Table 3 provides the list of parameters whose guidelines remain appropriate and have been reaffirmed as a result of this review. Health Canada and the FPT Committee on Drinking Water will continue to monitor research on these parameters and recommend any revision(s) to the guidelines that is deemed necessary.

Table 3. Reaffirmed guidelines (2005)

Asbestos	Chloride	Diuron	Odour	2,3,4,6-
Azinphos-methyl	Colour	Ethylbenzene	Paraquat	Tetrachlorophenol
Bendiocarb	Cyanazine	Gasoline	Pentachlorophenol	Toluene
Benzo(a)pyrene	Diazinon	Glyphosate	Phorate	2,4,6-Trichlorophenol
Bromoxynil	Dicamba	Iron	Picloram	Trifluralin
Cadmium	2,4-Dichlorophenol	Magnesium	Silver	Xylenes
Calcium	Diclofop-methyl	Malathion	Taste	Zinc
Carbaryl	Dimethoate	Methoxychlor	Temperature	
Carbofuran	Diquat	Metribuzin	Terbufos	

Table 4 outlines documents which are being or have been developed and are awaiting approval through the Federal-Provincial-Territorial process.

Table 4. Upcoming documents (not yet finalized/approved)

Parameter or subject	Document type (GTD or guidance)	Current status
Ammonia	GTD	In preparation ^b
Carbon tetrachloride	GTD	In preparation ^a
Chromium	GTD	In preparation ^b
Dichloroethane, 1,2-	GTD	In preparation ^b
Dichloromethane	GTD	In preparation ^a
<i>E.coli</i>	GTD	In preparation ^b
Enteric viruses	GTD	In preparation ^a
Fluoride	GTD	In preparation ^a

Turbidity	GTD	In preparation ^b
Vinyl chloride	GTD	In preparation ^b

^aFinal guideline technical document or guidance document in preparation for final approval/posting.

^bGuideline technical document or guidance document being prepared for public consultation.

Guidelines for microbiological parameters

Currently available detection methods do not allow for the routine analysis of all microorganisms that could be present in inadequately treated drinking water. Instead, microbiological quality is determined by testing drinking water for *Escherichia coli*, a bacterium that is always present in the intestines of humans and other animals and whose presence in drinking water would indicate faecal contamination of the water.

Bacteriological guidelines

Escherichia coli

The maximum acceptable concentration (MAC) of *Escherichia coli* in public, semi-public, and private drinking water systems is none detectable per 100 mL.

Testing for *E. coli* should be carried out in all drinking water systems. The number, frequency, and location of samples for *E. coli* testing will vary according to the type and size of the system and jurisdictional requirements.

Total coliforms

The MAC of total coliforms in water leaving a treatment plant in a public system and throughout semi-public and private supply systems is none detectable per 100 mL.

For distribution systems in public supplies where fewer than 10 samples are collected in a given sampling period, no sample should contain total coliform bacteria. In distribution systems where greater than 10 samples are collected in a given sampling period, no consecutive samples from the same site or not more than 10% of samples should show the presence of total coliform bacteria.

Testing for total coliforms should be carried out in all drinking water systems. The number, frequency, and location of samples for total coliform testing will vary according to the type and size of the system and jurisdictional requirements.

Heterotrophic plate count

No MAC is specified for heterotrophic plate count (HPC) bacteria in water supplied by public, semi-public, or private drinking water systems. Instead, increases in HPC concentrations above baseline levels are considered undesirable.

Emerging pathogens

No MAC for current or emerging bacterial waterborne pathogens has been established. Current bacterial waterborne pathogens include those that have been previously linked to gastrointestinal illness in human populations. Emerging bacterial waterborne pathogens include, but are not limited to, *Legionella*, *Mycobacterium avium* complex, *Aeromonas hydrophila*, and *Helicobacter pylori*.

Protozoa

Although *Giardia* and *Cryptosporidium* can be responsible for severe and, in some cases, fatal gastrointestinal illness, it is not possible to establish MACs for these protozoa in drinking water at this time. Routine methods available for the detection of cysts and oocysts suffer from low recovery rates and do not provide any information on their viability or human infectivity. Nevertheless, until better monitoring data and information on the viability and infectivity of cysts and oocysts present in drinking water are available, measures should be implemented to reduce the risk of illness as much as possible. If the presence of viable, human-infectious cysts or oocysts is known or suspected in source waters, or if

Giardia or *Cryptosporidium* has been responsible for past waterborne outbreaks in a community, a treatment and distribution regime and a watershed or wellhead protection plan (where feasible) or other measures known to reduce the risk of illness should be implemented. Treatment technologies in place should achieve at least a 3-log reduction in and/or inactivation of cysts and oocysts, unless source water quality requires a greater log reduction and/or inactivation.

Viruses

Although enteric viruses can be responsible for severe and, in some cases, fatal illnesses, it is not possible to establish MACs for enteric viruses in drinking water at this time. Treatment technologies and watershed or wellhead protection measures known to reduce the risk of waterborne outbreaks should be implemented and maintained if source water is subject to faecal contamination or if enteric viruses have been responsible for past waterborne outbreaks. Where treatment is required, treatment technologies should achieve at least a 4-log reduction and/or inactivation of viruses.

Turbidity

Waterworks systems that use a surface water source or a groundwater source under the direct influence of surface water should filter the source water to meet the following health-based turbidity limits, as defined for specific treatment technologies. Where possible, filtration systems should be designed and operated to reduce turbidity levels as low as possible, with a treated water turbidity target of less than 0.1 NTU at all times. Where this is not achievable, the treated water turbidity levels from individual filters:

1. For **chemically assisted filtration**, shall be less than or equal to **0.3 NTU** in at least 95% of the measurements made, or at least 95% of the time each calendar month, and shall not exceed 1.0 NTU at any time.
2. For **slow sand or diatomaceous earth filtration**, shall be less than or equal to **1.0 NTU** in at least 95% of the measurements made, or at least 95% of the time each calendar month, and shall not exceed 3.0 NTU at any time.
3. For **membrane filtration**, shall be less than or equal to **0.1 NTU** in at least 99% of the measurements made, or at least 99% of the time each calendar month, and shall not exceed 0.3 NTU at any time. If membrane filtration is the sole treatment technology employed, some form of virus inactivation* should follow the filtration process.

Guidelines for chemical and physical parameters

Table 5 provides the complete list of all current numerical Guidelines for chemical and physical parameters. Guidelines are either health-based and listed as Maximum Acceptable Concentrations (MAC), based on aesthetic considerations and listed as aesthetic objectives (AO) or established based on operational considerations and listed as Operational Guidance Values (OG). Parameters for which the health-based guideline was developed as an interim maximum acceptable concentration (IMAC) are identified with an asterisk (*) in the table below. The use of these 'interim' MACs was discontinued by the Federal-Provincial-Territorial Committee on Drinking Water in 2003. For more information on specific guidelines, please refer to the guideline technical document for the parameter of concern.

*Some form of virus inactivation is required for all technologies. The difference is that chemically assisted, slow sand and diatomaceous earth filters are credited with log virus reductions and membrane filters receive no credit.

Guidelines for Canadian Drinking Water Quality—Summary Table

Table 5. Health-based and aesthetic guidelines for chemical/physical parameters

Parameter	MAC (mg/L)	AO [or OG] (mg/L)	Year of approval (or reaffirmation)
Aldicarb	0.009		1994

Zinc ^b		≤5.0	1979 (2005)

^aThis is an operational guidance value, designed to apply only to drinking water treatment plants using aluminum-based coagulants. The operational guidance values of 0.1 mg/L applies to conventional treatment plants, and 0.2 mg/L applies to other types of treatment systems.

^bFaucets should be thoroughly flushed before water is taken for consumption or analysis.

^cThe guideline is considered protective of human health against exposure to all microcystins that may be present.

^dTCU = true colour unit.

^eIn cases where total dichlorobenzenes are measured and concentrations exceed the most stringent value (0.005 mg/L), the concentrations of the individual isomers should be established.

^fEquivalent to 10 mg/L as nitrate–nitrogen. Where nitrate and nitrite are determined separately, levels of nitrite should not exceed 3.2 mg/L.

^gEquivalent to 0.007 mg/L for paraquat ion.

^hNo units.

ⁱIt is recommended that sodium be included in routine monitoring programmes, as levels may be of interest to authorities who wish to prescribe sodium-restricted diets for their patients.

^jThere may be a laxative effect in some individuals when sulphate levels exceed 500 mg/L.

^kExpressed as a running annual average. The guideline is based on the risk associated with chloroform, the trihalomethane most often present and in greatest concentration in drinking water.

^lRefer to section on Guidelines for microbiological parameters for information related to various treatment processes.

Parameters without guidelines

Some chemical and physical parameters for which a Guideline Technical Document is available have been identified as not requiring a numerical guideline, because currently available data indicate that it poses no health risk or aesthetic problem at the levels generally found in drinking water in Canada.

Table 6. Parameters without numerical guidelines

Ammonia	Asbestos
Calcium	Chlorine
Formaldehyde	Gasoline
Hardness ^a	Magnesium
Radon	Silver

^aPublic acceptance of hardness varies considerably. Generally, hardness levels between 80 and 100 mg/L (as CaCO₃) are considered acceptable; levels greater than 200 mg/L are considered poor but can be tolerated; those in excess of 500 mg/L are normally considered unacceptable. Where water is softened by sodium ion exchange, it is recommended that a separate, unsoftened supply be retained for culinary and drinking purposes.

Archived parameters

The Federal-Provincial-Territorial Committee on Drinking Water has established a science-based process to systematically review older guidelines and archive older guidelines which are no longer required. Guidelines are archived for parameters which are no longer found in Canadian drinking water supplies at levels that could pose a risk to human health, including pesticides which are no longer registered for use in Canada, and for mixtures of contaminants that are addressed individually. Table 7 provides the list of parameters whose guidelines have been archived as a result of this review.

Table 7. Parameters that have been archived^a

Chlordane (total isomers) ^b	Polychlorinated biphenyls (PCBs)
Dichlorodiphenyltrichloroethane (DDT) + metabolites ^b	Polycyclic aromatic hydrocarbons (PAH) ^c
Endrin ^b	Resin acids
Heptachlor + heptachlor epoxide ^b	Tannin
Lignin ^b	Temephos ^d
Lindane ^b	Total organic carbon (TOC)
Methyl-parathion ^b	Toxaphene ^b
Mirex	Triallate ^d
Pesticides (total)	2,4,5-Trichlorophenoxyacetic acid (2,4,5-T) ^d
Phenols (total)	2,4,5-Trichlorophenoxypropionic acid (2,4,5-TP) ^b
Phthalic acid esters (PAE)	

^aPublished in the 1978 version of the *Supporting Documentation* for these parameters (available upon request).

^bIn 1978 'Pesticides' Supporting Documentation.

^cOther than benzo[a]pyrene.

^dNo documentation available.

Guidelines for radiological parameters

Natural sources of radiation are responsible for the large majority of radiation exposure (>98%), excluding medical exposure. Guidelines for radiological parameters focus on routine operational conditions of existing and new water supplies and does not apply in the event of contamination during an emergency involving a large release of radionuclides into the environment. They have been developed taking into account new studies and approaches, including dosimetric information released by the International Commission on Radiological Protection (ICRP) in 1996 (ICRP, 1996). Maximum acceptable concentrations (MACs) in drinking water have been established for the natural and artificial radionuclides that are most commonly detected in Canadian water supplies, using internationally accepted equations and principles and based solely on health considerations. They are calculated using a reference dose level of 0.1 mSv for 1 year's consumption of drinking water, assuming a consumption of 2 L/day at the MAC.

To facilitate the monitoring of radionuclides in drinking water, the reference level of dose is expressed as an activity concentration, which can be derived for each radionuclide from published radiological data. The National Radiological Protection Board has calculated dose conversion factors (DCFs) for radionuclides based on metabolic and dosimetric models for adults and children. Each DCF provides an estimate of the 50-year committed effective dose resulting from a single intake of 1 Bq[†] of a given radionuclide.

The MACs of radionuclides in public water supplies are derived from adult DCFs, assuming a daily water intake of 2 L, or 730 L/year, and a maximum committed effective dose of 0.1 mSv, or 10% of the International Commission on Radiological Protection limit on public exposure:

$$\text{MAC (Bq/L)} = \frac{1 \times 10^{-4} \text{ (Sv/year)}}{730 \text{ (L/year)} \times \text{DCF (Sv/Bq)}}$$

The radiological effects of two or more radionuclides in the same drinking water source are assumed to be additive. Thus, the following summation formula should be satisfied in order to demonstrate compliance with the guidelines:

$$\sum_i \frac{C_i}{\text{MAC}_i} \leq 1$$

where C_i and MAC_i are the observed and maximum acceptable concentrations, respectively, for each contributing radionuclide. Only those radionuclides that are detected with at least 95% confidence should be included in the summation. Detection limits of undetected radionuclides should not be substituted for the concentrations C_i . Otherwise, a situation could arise where a sample fails the summation criterion even though no radionuclides are present.

Water samples may be initially analysed for the presence of radioactivity using techniques for gross alpha and gross beta determinations rather than measurements of individual radionuclides. Compliance with the guidelines may be inferred if the measurements are less than 0.5 Bq/L for gross alpha

[†]Becquerel (Bq) is the unit of activity of a radioactive substance, or the rate at which transformations occur in the substance. One becquerel is equal to one transformation per second and approximately equal to 27 picocuries (pCi).

activity and less than 1 Bq/L for gross beta activity. Alpha emissions are generally associated with naturally occurring radionuclides, whereas beta emissions are generally associated with artificial radionuclides. Although facilitating routine examination of large numbers of samples, these procedures do not allow for confirmation of the identities of the contributing radionuclides. These measurements are generally suitable either as a preliminary screening procedure to determine if further radioisotope-specific analysis is necessary or, if radionuclide analyses have been carried out previously, for detecting changes in the radiological characteristics of the drinking water source. The sampling and analyses for individual radionuclides should be carried out often enough to accurately characterize the annual exposure. If the source of the radioactivity is known or expected to be changing rapidly with time, then the sampling frequency should reflect this factor. If there is no reason to expect concentrations to vary with time, then sampling may be carried out seasonally, semi-annually or annually. If measured concentrations are consistent and well below the MACs, this would be an argument for reducing the sampling frequency. In contrast, the sampling frequency should be maintained, or even increased, if concentrations are approaching individual MACs or if the sum of ratios of the observed concentration to the MAC for each contributing radionuclide approaches 1.

Table 8. Health based guidelines for radiological parameters

<i>Radiological parameters</i>	
Cesium-137 (¹³⁷ Cs)	10 Bq/L
Iodine-131 (¹³¹ I)	6 Bq/L
Lead-210 (²¹⁰ Pb)	0.2 Bq/L
Radium-226 (²²⁶ Ra)	0.5 Bq/L
Strontium-90 (⁹⁰ Sr)	5 Bq/L
Tritium (³ H)	7000 Bq/L

Dear Dr. Hai-Santiago:

RE: CITY OF WINNIPEG FLUORIDE MONITORING DATA

As a participant in the Provincial Water Fluoridation Program, the City of Winnipeg Water and Waste Department hereby submits the following fluoride monitoring data on analyses conducted by the Environmental Standards Division.

<u>LOCATION</u>	<u>SAMPLE NUMBER</u>	<u>DATE</u>	<u>RESULT(mg/L F)</u>
Distribution System (Composite – 39 Locations)	277795	December 6, 2010	0.86
	278399	December 13, 2010	0.81
	278966	December 20, 2010	0.81
	279747	December 29, 2010	0.81

If you have any questions on the foregoing, please call Mrs. Renée Grosselle, Supervisor of Compliance Reporting, at 986-8359.

Yours truly,

C.C.S.M. c. E125

The Environment Act

(Assented to July 17, 1987)

HER MAJESTY, by and with the advice and consent of the Legislative Assembly of Manitoba, enacts as follows:

Intent and purposes

1(1) The intent of this Act is to develop and maintain an environmental protection and management system in Manitoba which will ensure that the environment is protected and maintained in such a manner as to sustain a high quality of life, including social and economic development, recreation and leisure for this and future generations, and in this regard, this Act

- (a) is complementary to, and support for, existing and future provincial planning and policy mechanisms;
- (b) provides for the environmental assessment of projects which are likely to have significant effects on the environment;
- (c) provides for the recognition and utilization of existing effective review processes that adequately address environmental issues;
- (d) provides for public consultation in environmental decision making while recognizing the responsibility of elected government including municipal governments as decision makers; and
- (e) prohibits the unauthorized release of pollutants having a significant adverse effect on the environment.

Definitions

1(2) In this Act,

"**abatement project**" means a project for the abatement of an undesirable environmental condition affecting premises by

- (a) the removal and relocation of the development causing the condition; or
- (b) the removal and relocation of the premises affected by the condition; (« opération de dépollution »)

"**adverse effect**" means impairment of or damage to the environment, including a negative effect on human health or safety; (« effet nocif »)

"**air**" means the atmosphere, but does not include the atmosphere within a mine or within a building other than any building designated by the minister; (« air »)

"**alter**" means to change a development or a proposal or to close, shut down or terminate a development where the alteration causes or is likely to cause a significant change in the effects of the development on the environment; (« changer »)

"**analyst**" means a government employee so appointed by the minister; (« analyste »)

"**assessment**" means an evaluation of a proposal to ensure that appropriate environmental management practices are incorporated into all components of the life cycle of a development; (« évaluation »)

"**class 1 development**" means any development that is consistent with the examples or the criteria or both set out in the regulations for class 1 developments, and the effects of which are primarily the release of pollutants; (« exploitation de catégorie 1 »)

"**class 2 development**" means any development that is consistent with the examples or the criteria or both set out in the regulations for class 2 developments and the effects of which are primarily unrelated to pollution or are in addition to pollution; (« exploitation de catégorie 2 »)

"**class 3 development**" means any development that is consistent with the examples or the criteria or both set out in the regulations for class 3 developments and the effects of which are of such a magnitude or which generate such a number of environment issues that it is as an exceptional project; (« exploitation de catégorie 3 »)

"**commission**" means the Clean Environment Commission established under this Act; (« Commission »)

"**corporation**" means a body corporate heretofore or hereafter incorporated and carrying on business or operating within Manitoba; (« corporation »)

- "department"** means the department of government over which the minister presides and through which this Act is administered; (« ministère »)
- "development"** means any project, industry, operation or activity, or any alteration or expansion of any project, industry, operation or activity which causes or is likely to cause
- (a) the release of any pollutant into the environment, or
 - (b) an effect on any unique, rare, or endangered feature of the environment, or
 - (c) the creation of by-products, residual or waste products not regulated by *The Dangerous Goods Handling and Transportation Act*, or
 - (d) a substantial utilization or alteration of any natural resource in such a way as to pre-empt or interfere with the use or potential use of that resource for any other purpose, or
 - (e) a substantial utilization or alteration of any natural resource in such a way as to have an adverse impact on another resource, or
 - (f) the utilization of a technology that is concerned with resource utilization and that may induce environmental damage, or
 - (g) a significant effect on the environment or will likely lead to a further development which is likely to have a significant effect on the environment, or
 - (h) a significant effect on the social, economic, environmental health and cultural conditions that influence the lives of people or a community in so far as they are caused by environmental effects; (« exploitation »)
- "director"** means except where the context otherwise requires, an employee of the department appointed as such by the minister; (« directeur »)
- "documents"** means data and information, whether maintained and stored as printed material or in computer files or discs; (« documents »)
- "environment"** means
- (a) air, land, and water, or
 - (b) plant and animal life, including humans; (« environnement »)
- "environment officer"** means a person or a member of a class of persons appointed under subsection 3(2); (« agent de l'environnement »)
- "environmental health"** means those aspects of human health that are or can be affected by pollutants or changes in the environment; (« salubrité de l'environnement »)
- "greenhouse gas"** means any of the following gases:
- (a) carbon dioxide,
 - (b) methane,
 - (c) nitrous oxide,
 - (d) hydrofluorocarbons,
 - (e) perfluorocarbons,
 - (f) sulphur hexafluoride,
 - (g) any other gas prescribed by regulation; (« gaz à effet de serre »)
- "Interdepartmental Planning Board"** means the board appointed pursuant to *The Planning Act*; (« Conseil interministériel d'aménagement »)
- "land"** includes soil, earth and terrain; (« bien-fonds »)
- "medical officer of health"** means a person so appointed pursuant to *The Public Health Act*; (« médecin hygiéniste »)
- "minister"** means the member of the Executive Council charged by the Lieutenant Governor in Council with the administration of this Act; (« ministre »)
- "municipality"** means any locality, the inhabitants of which are incorporated and continued under the authority of *The Municipal Act*, *The Local Governments District Act* or any other Act of the Legislature and includes the City of Winnipeg, a rural municipality, an incorporated city, town or village, and a local government district; (« municipalité »)
- "person responsible for a pollutant"** means
- (a) the owner of the pollutant, and
 - (b) any other person having charge, management or control of the pollutant; (« responsable d'un polluant »)
- "pollutant"** means any solid, liquid, gas, smoke, waste, odour, heat, sound, vibration, radiation, or a combination of any of them that is foreign to or in excess of the natural constituents of the environment, and
- (a) affects the natural, physical, chemical, or biological quality of the environment, or

(b) is or is likely to be injurious to the health or safety of persons, or injurious or damaging to property or to plant or animal life, or

(c) interferes with or is likely to interfere with the comfort, well being, livelihood or enjoyment of life by a person; (« pollutant »)

"proponent" means a person who is undertaking, or proposes to undertake a development, or who has been designated by a person or group of persons to undertake a development in Manitoba on behalf of that person or group of persons; (« promoteur »)

"proprietary information" means information or data provided to the department on a confidential basis, the criteria for which is outlined in the regulations or any Act of the Legislature, or is negotiated between the department and the provider of the information; (« renseignements privés »)

"public registry" means the registry established under section 17; (« registre public »)

"release" includes to spill, discharge, dispose of, spray, inject, inoculate, abandon, deposit, pour, empty, throw, dump, place and exhaust, and to cause or allow to leak, seep or emit; (« émission »)

"waste" includes rubbish, litter, junk, or junked obsolete or derelict motor vehicles, or obsolete or derelict equipment, appliances or machinery; slimes, tailings, fumes, waste of domestic, municipal, mining, factory or industrial origin; effluent or sewage; human or animal wastes; solid or liquid manure; or waste products of any kind whatsoever or the run-off from such wastes; (« déchets »)

"water" includes flowing or standing water on or below the surface of the earth, and ice formed thereon. (« eaux »)

S.M. 1989-90, c. 60, s. 26; S.M. 1993, c. 26, s. 2; S.M. 1993, c. 48, s. 13 and 61; S.M. 1997, c. 61, s. 21; S.M. 2000, c. 35, s. 38; S.M. 2000, c. 44, s. 4; S.M. 2009, c. 25, s. 2.

Department

2(1) The aims and objectives of the department are to protect the quality of the environment and environmental health of present and future generations of Manitobans and to provide the opportunity for all citizens to exercise influence over the quality of their living environment.

Functions of the department

2(2) Without limiting the generality of subsection (1), departmental functions include

- (a) the administration and enforcement of this Act, the regulations, licences and orders made hereunder;
- (b) the administration and enforcement of any other Acts and regulations as determined by the Lieutenant Governor in Council;
- (c) the development and implementation of standards and objectives for environmental quality of Manitoba in consultation with other government departments and the public;
- (d) the establishment and maintenance of an effective method of public involvement in environmental decision making;
- (e) research, monitoring, studies and investigations related to the acquisition of knowledge, data or technological understanding necessary to perform its mandate;
- (f) the provision of technical, analytical services; and
- (g) the development of environmental management strategies and policies for the protection, maintenance, enhancement and restoration of environmental quality in Manitoba.

Environmental awareness programs

2(3) For the purposes of increasing environmental awareness in Manitoba, the minister may

- (a) cause the preparation and production of informational material respecting the environment of the province and make the material available to the public;
- (b) undertake, or by means of grants or other assistance, support and encourage the development of educational programs or courses in the public education system, or educational programs for the public at large, respecting environmental management.

Appointment of director

3(1) The minister shall appoint a director for the purposes of this Act and the regulations.

Environment officer

3(2) The minister may appoint a person or the members of a class of persons as environment officers for the purpose of this Act and the regulations, any provision of this Act or a regulation or any provision of a regulation.

Appointment of environmental mediator

3(3) The minister may, where the minister deems it advisable, and where the conflicting parties concur, appoint an environmental mediator acceptable to the parties to mediate between persons involved in an environmental conflict, and the mediator so appointed shall, within six weeks after completion of the mediation, report to the minister the results of

the mediation.

S.M. 1993, c. 26, s. 3.

4 Repealed.

S.M. 1997, c. 61, s. 21.

Advisory committees

5 The minister may establish and appoint members of such advisory committees as the minister considers desirable for the purpose of providing advice and assistance in carrying out the objects and purposes of this Act.

Clean Environment Commission

6(1) There shall be a Clean Environment Commission with a minimum of 10 members appointed by the Lieutenant Governor in Council for such terms and remuneration as may be specified by the Lieutenant Governor in Council, for the purposes of

- (a) providing advice and recommendations to the minister;
- (b) developing and maintaining public participation in environmental matters; and
- (c) carrying out functions that it is required or permitted to carry out under *The Contaminated Sites Remediation Act* and *The Drinking Water Safety Act*.

Chairperson

6(2) In addition to the members appointed pursuant to subsection (1), the Lieutenant Governor in Council shall appoint, and fix the remuneration of a full time chairperson of the commission who shall report to the minister.

Investigation into environmental matters

6(3) The commission may on its own volition conduct an investigation into any environmental matter, except a matter involving the gathering of evidence to determine whether or not a specific proponent is complying with the provisions of this Act and the regulations, and advise and make recommendations thereon to the minister.

Public meetings and hearings

6(4) The commission may hold public meetings or public hearings for the purposes of its functions of gathering or disseminating information, or gathering evidence or information from the public.

Specific duties of Commission

6(5) When requested by the minister, the commission must do one or more of the following in accordance with any terms of reference specified by the minister:

- (a) provide advice and recommendations to the minister;
- (b) conduct public meetings or hearings and provide advice and recommendations to the minister;
- (c) conduct investigations into specific environmental concerns and report back to the minister;
- (d) act as a mediator between two or more parties to an environmental dispute and report back to the minister.

Terms of reference

6(5.1) When requesting the commission to do anything mentioned in subsection (5), the minister may specify the terms of reference that the commission is to follow in carrying out its duties.

Power of Commission under Evidence Act

6(6) Subject to subsection (7) for the purposes of carrying out its duties and functions, the commission has the like protection and powers and is subject to the like requirements, as are conferred on, or required of commissioners appointed under Part V of *The Manitoba Evidence Act*.

Non-application of section 86 of Evidence Act

6(7) Section 86 of *The Manitoba Evidence Act* does not apply to the commission.

Rules of procedure

6(8) The commission may make rules governing its procedure.

Quorum

6(9) Three members constitute a quorum at all meetings of the commission.

Annual reports

6(10) The commission shall prepare and submit an annual report to the minister on matters dealt with by the

commission during the immediately preceding year, including

- (a) the investigations conducted;
- (b) the policy, legislation and regulations reviewed;
- (c) participation in public meetings and hearings;
- (d) activities related to environmental mediation;
- (e) a description of activities undertaken jointly by the commission and the council;
- (f) functions carried out by the commission under the authority of *The Contaminated Sites Remediation Act* and *The Drinking Water Safety Act*; and
- (g) any other information that the minister requests.

Tabling of report

6(11) Upon receipt of the report pursuant to subsection (10), the minister shall, if the Legislature is then in session, lay it before the Legislature forthwith, and if the Legislature is not then in session release the report to the members of the Legislature and to the public within six weeks of the minister's receipt of it.

S.M. 1989-90, c. 90, s. 15; S.M. 1992, c. 23, s. 2; S.M. 1993, c. 48, s. 13; S.M. 1996, c. 40, s. 67; S.M. 2002, c. 36, s. 40; S.M. 2009, c. 25, s. 3.

Notice to hold public hearings

7(1) Upon receipt of a proposal and a request from the minister to hold public meetings or hearings respecting a proposed development, the commission shall notify the proponent and shall by advertisement in such newspaper or other media as the commission deems fit, give notice of the proposal, its intentions to hold meetings or hearings, and the dates, times and location of such meeting or hearings, and the date for receipt of notice for presentation of a submission.

Representations to Commission

7(2) Any person who wishes to make representation to the commission at a hearing shall, not later than the date set out in the notice, in writing so notify the commission.

Commission to submit recommendations to minister

7(3) Unless otherwise specified by the minister, not later than 90 days from the date of completion of meetings or hearings requested by the minister, the chairperson shall forward a report to the minister outlining the terms of reference, the process, the dates and locations of the meetings or hearings that were held, a summary of the public response and opinions, and the advice and recommendations of the commission.

Commission may add members

7(4) Notwithstanding subsection 6(1), for the purpose of conducting certain specific hearings, meetings or investigations, the commission, with the approval of the minister, may add qualified persons to the commission to assist and advise the commission in conducting the hearings, meetings or investigations; and the members so added have all the powers of the commissioners with respect to those hearings, meetings or investigations.

Three regular members required for hearings

7(5) Notwithstanding subsection (4), the commission shall not hold a hearing unless a hearing panel of at least three members are present, two of whom are members of the commission.

Transcript required

7(6) Where a hearing is held by the commission, the commission shall transcribe the evidence and maintain a copy of the transcript for a period of not less than 10 years.

7(7) Repealed, S.M. 1992, c. 23, s. 3.

Application of this section

7(8) Except as provided in subsection 16(5) of *The Contaminated Sites Remediation Act*, this section does not apply to proceedings under that Act.

S.M. 1992, c. 23, s. 3; S.M. 1996, c. 40, s. 67; S.M. 2000, c. 44, s. 4.

8 Repealed.

S.M. 2000, c. 44, s. 4.

9 Repealed.

S.M. 2000, c. 44, s. 4.

CLASS 1 DEVELOPMENTS

Licence required for development

- 10(1) No person shall construct, alter, operate or set into operation any Class 1 development unless
- (a) the person first files a proposal in writing with the department and obtains a valid and subsisting licence from the director for the development; or
 - (b) the person is exempted under the Act or the regulations from the requirements of clause (a).

Existing development

- 10(2) Notwithstanding subsection (1)
- (a) where in the opinion of the director, new evidence warrants a change in the existing limits, terms or conditions; or
 - (b) where no existing limits, terms or conditions exist, by licence or regulation;
- the director may require any person operating an existing Class 1 development to file a proposal with the department for consideration under this section.

Form of Class 1 proposal

- 10(3) The proponent shall submit the proposal required under subsection (1) or (2) in a form prescribed by the director, and include matters required by the regulations.

Action by director on Class 1 proposals

- 10(4) Upon receipt of a proposal for a Class 1 development under this section, the director shall within such time as may be specified by the regulations
- (a) subject to section 47, file a summary of the proposal in the public registry and notify the public through advertisements in the local newspaper or radio that a proposal has been received, providing opportunity for comments and objections;
 - (b) file a copy of the proposal with the Interdepartmental Planning Board and circulate a copy of the proposal, or notice thereof, to such other departments as may be affected by the development;
 - (c) determine the form of the assessment required for the proposal;
 - (d) notify the proponent of the assessment process and schedule for that proposal; and
 - (e) provide the proponent with the name of a contact person to coordinate the process.

Proposal may be considered as Class 2 development

- 10(5) Upon reviewing the documents provided pursuant to subsection (4), the Interdepartmental Planning Board or other departments may within such time as may be fixed in the regulations request the Director to consider the proposal as a Class 2 development in which case the Director may consider the proposal in accordance with section 11.

Assessment of Class 1 development

- 10(6) For the purposes of assessing a proposed class 1 development, the director may do any or all of the following things:
- (a) require from the proponent such additional information as the director deems necessary;
 - (b) issue guidelines and instructions for the proponent to conduct further studies;
 - (c) require from the proponent detailed plans for environmental protection and management;
 - (d) request the minister to direct the chairperson of the commission to conduct public meetings or hearings;
 - (e) elevate the proposal to a Class 2 development, and consider the proposal in accordance with section 11.

Public hearings

- 10(7) Notwithstanding subsection (6), where the director receives objections, and reasons for the objections with respect to a proposed development, the director may, within such time as set out in the regulations recommend that the minister cause the commission to hold a public hearing but where the director decides not to recommend a public hearing be held, the director shall provide written reasons to the objector, and advise the objector that the decision can be appealed to the minister.

Notice of decision

- 10(7.1) If the minister decides not to request a public hearing on a proposal after receiving a recommendation from the director under subsection (7), the minister must give written notice of his or her decision to the objector. The notice must advise the objector that the decision can be appealed under section 28.

Director to issue or refuse licence

- 10(8) Upon receipt of a proposal for a class 1 development under subsection (1) or (2), the director shall consider

the proposal and deal with the proposal in accordance with subsections (4), (6) and (7), and

- (a) issue a licence to the proponent with such specifications, limits, terms and conditions or with a requirement for such modifications as the director deems necessary to ensure effective environmental management; or
- (b) refuse to issue the licence and thereby prohibit the construction, alteration, operation or implementation of the development.

Written reasons for refusal of licence

10(9) Where, the director refuses to issue a licence pursuant to subsection (8), the director shall provide written reasons for the decision to the proponent, the minister, and the public registry within such time as may be specified in the regulations.

Reasons for not adopting commission advice

10(10) Where the minister has requested a public hearing regarding a proposal, and subsequently advice and recommendations are presented to the minister, and the recommendations of the commission are not included in the environmental licence, or refusal, the director shall provide written reasons for the decision to the proponent, the minister, the commission and the public registry at the time of notifying the proponent of the decision.

S.M. 2009, c. 25, s. 4.

CLASS 2 DEVELOPMENTS

Licence required for development

11(1) No person shall, construct, alter, operate or set into operation any Class 2 development unless:

- (a) the person first files a proposal in writing with the department and obtains a valid and subsisting licence from the director for the development; or
- (b) the person is exempted under subsection (2) or the regulations from the requirements of clause (a).

Ministerial agreement

11(2) Notwithstanding subsection (1) where a development or type of development is subject to an existing approval process that, to the satisfaction of the minister

- (a) involves interested government departments and agencies;
- (b) includes public consultation; and
- (c) addresses environmental issues;

the minister may, by agreement with the minister responsible for the reviewing department, exempt that development or type of development from this section.

Cancellation of agreement by minister

11(3) Notwithstanding subsection (2) where in the opinion of the minister, the agreement or terms therein have not been adhered to, the minister may cancel the agreement or the approval issued under the agreement and require the proponent to file a proposal pursuant to subsection (1).

Status of approval

11(4) Any approval issued under a process subject to an agreement entered into pursuant to subsection (2) has the status of a licence issued under this section and is subject to the appeal process provided under this Act, and the limits, terms and conditions of the approval shall be complied with by the recipient of the approval.

Enforcement of approval provisions

11(5) Where a development approved by agreement pursuant to subsection (2) is not in compliance with the limits, terms or conditions of the approval, enforcement will normally be carried out by the department issuing the approval.

Existing developments

11(6) Notwithstanding subsections (1) and (2),

- (a) where in the opinion of the minister new evidence warrants a change in the existing limits, terms or conditions; or
- (b) where no existing limits, terms or conditions exist by licence or regulation;

the minister may require any person operating an existing Class 2 development to file a proposal with the department, to be considered under this section.

Form of Class 2 proposal

11(7) The proponent shall submit the proposal required under subsection (1) or (6) in a form prescribed by the director, and include matters required by the regulations.

Action by director in Class 2 developments

11(8) Upon receipt of a proposal for a Class 2 development under this section, the director shall within such time as may be specified by the regulation

- (a) subject to section 47, file a summary of the proposal in the public registry and notify the public through advertisements in the local newspaper or radio that a proposal has been received, providing opportunity for comments and objections;
- (b) file a copy of the proposal with the Interdepartmental Planning Board and other departments as may be affected by the development, for their review and comment;
- (c) on the advice of the Interdepartmental Planning Board and other departments so consulted, determine the form of assessment required for the proposal, which may include forwarding the proposal to the minister for consideration as a Class 3 development pursuant to section 12 or consideration as a Class 1 proposal under section 10;
- (d) notify the proponent of the assessment options and tentative schedule for the options; and
- (e) provide the proponent with the name of a contact person to coordinate the process.

Assessment of Class 2 development

11(9) For the purposes of assessing the environmental impacts of a proposed Class 2 development, the director may do any or all of the following things:

- (a) require from the proponent additional information;
- (b) issue guidelines and instructions for the assessment and require the proponent to carry out public consultation;
- (c) require the proponent to prepare and submit to the director an assessment report to include such studies, research, data gathering and analysis or monitoring, alternatives to the proposed development processes and locations, and the details of proposed environmental management practices to deal with the issues;
- (d) conduct or cause to be conducted a review of the assessment report;
- (e) request the minister to direct the chairperson of the commission to conduct a public hearing.

Public hearings

11(10) Notwithstanding subsection (9), where the director receives objections and reasons for the objections with respect to a proposed development, the director may, within such time as set out in the regulations recommend that the minister cause the commission to hold a public hearing; but where the director decides not to recommend a public hearing be held, the director shall provide written reasons to the objector, and advise the objector that the decision can be appealed to the minister.

Notice of decision

11(10.1) If the minister decides not to request a public hearing on a proposal after receiving a recommendation from the director under subsection (10), the minister must give written notice of his or her decision to the objector. The notice must advise the objector that the decision can be appealed under section 28.

Director to issue or refuse a licence

11(11) Upon receipt of a proposal for a class 2 development under subsection (1) or (6), the director shall deal with the proposal in accordance with subsections (8), (9) and (10), and shall

- (a) issue a licence to the proponent with such specifications, limits, terms and conditions or with a requirement for such modifications as the director deems necessary to ensure effective environmental management; or
- (b) refuse to issue the licence and thereby prohibit the construction, alteration, operation or implementation of the development.

Written reasons for refusal of licence

11(12) Where, the director refuses to issue a licence pursuant to subsection (11) the director shall provide written reasons for the decision to the proponent, the minister, and to the files in the public registry within such time as may be specified in the regulations.

Reasons for not adopting commission advice

11(13) Where the minister has requested a public hearing on a proposal and subsequently advice and recommendations are presented to the minister, and the recommendations of the commission are not included in the environmental licence, or refusal, the director shall provide written documentation of the reasons for the decision to the proponent, the minister, the commission and the files of the public registry at the time of notifying the proponent of the decision.

S.M. 2009, c. 25, s. 5; S.M. 2010, c. 33, s. 17.

MINISTER MAY CONSIDER CLASS 1 OR 2 PROPOSALS

Minister may consider Class 1 or 2 proposals

11.1 If a public hearing has been held or is to be held by the commission in respect of a proposal for a Class 1 or 2 development, the minister may, after giving written notice to the director and the proponent,

- (a) in the case of a Class 1 development, exercise the director's powers to issue a licence or refuse to issue a licence under clause 10(8)(a) or (b) and perform the director's duties under subsections 10(9) and (10);
- (b) in the case of a Class 2 development, exercise the director's powers to issue a licence or refuse to issue a licence under subsection 11(11)(a) or (b) and perform the director's duties under subsections 11(12) and 11(13).

The references to "the director" in those provisions are to be read as "the minister", with necessary changes.

S.M. 2009, c. 25, s. 6.

CLASS 3 DEVELOPMENTS**Licence required for Class 3 development**

12(1) No person shall construct, alter, operate or set into operation any Class 3 development unless

- (a) the person first files a proposal in writing with the department and obtains a valid and subsisting licence from the minister for the development; or
- (b) the person is exempted under the Act or the regulations from the requirements of clause (a).

Existing developments

12(2) Notwithstanding subsection (1),

- (a) where in the opinion of the minister new evidence warrants a change in the existing limits, terms or conditions; or
- (b) where no existing limits, terms or conditions exist by licence or regulation;

the minister may require any person operating an existing Class 3 development to file a proposal with the department, to be considered under this section.

Form of Class 3 proposal

12(3) The proponent shall submit the proposal required under subsection (1) or (2) in a form prescribed by the minister, and include matters as required by the regulations.

Action by minister in Class 3 developments

12(4) Upon receipt of a proposal under this section, the minister shall within such time as may be specified in the regulations

- (a) subject to section 47, file a summary of the proposal in the public registry and notify the public through advertisements in the local newspaper or radio of the proposal and provide opportunity for comments and objections;
- (b) file a copy of the proposal with the Interdepartmental Planning Board and other departments as may be affected by the development, for their review and comment;
- (c) submit a summary of the proposal to the chairperson of the commission;
- (d) notify the proponent of the assessment options and tentative schedule for the options; and
- (e) provide the proponent with the name of a contact person to coordinate the process.

Assessment of Class 3 developments

12(5) For the purpose of assessing a proposed Class 3 development, the minister, in consultation with the Interdepartmental Planning Board and other departments may do any or all of the following things:

- (a) require from the proponent additional relevant information;
- (b) issue guidelines and instructions for the assessment and require the proponent to carry out public consultation;
- (c) require the proponent to prepare and submit an assessment report to include such studies, research, data gathering and analysis or monitoring, alternatives to the proposed development processes and locations, and the details of proposed environmental management practices to deal with the issues as the minister deems necessary;
- (d) review the assessment report;
- (e) cause to be conducted a public hearing by the commission.

Public hearings

12(6) Notwithstanding subsection (5), where the minister receives objections with respect to a proposed development and reasons for the objections, the minister may, within such time as may be set out in the regulations, cause the commission to hold public hearings thereon; but if the minister decides not to hold public hearings the minister shall provide the objectors with written reasons therefor and shall cause a copy of those reasons to be filed in the public

registry.

Minister to issue or refuse licence

12(7) Upon receipt of proposal under this section the minister shall deal with the proposal in accordance with subsections (4) and (5) and consider the proposal, and shall

- (a) issue a licence to the proponent, with such specifications, limits, terms and conditions or with a requirement for such modifications as the minister deems necessary to ensure effective environmental management; or
- (b) on the approval of the Lieutenant Governor in Council, refuse to issue a licence.

Reasons for not adopting commission advice

12(8) Where the minister has requested a public hearing regarding a proposal and subsequently advice and recommendations are presented to the minister, and the minister does not incorporate the recommendations of the commission in the environmental licence, the minister shall provide written documentation of the reason for the decision to the proponent, the commission and the files of the public registry at the time of notifying the proponent of the decision.

S.M. 2009, c. 25, s. 7; S.M. 2010, c. 33, s. 17.

MISCELLANEOUS PROVISIONS RESPECTING PROPOSALS

Public consultations by proponent to be considered

12.0.1(1) When considering a proposal, the director and the minister may take into account any public consultations on the proposed development conducted by the proponent.

Consultation results to commission

12.0.1(2) If the commission holds public hearings on a proposal, the director or the minister may require the proponent to forward the results of any public consultations conducted by the proponent to the commission.

S.M. 2009, c. 25, s. 8.

Climate change considerations

12.0.2 When considering a proposal, the director or minister must take into account — in addition to other potential environmental impacts of the proposed development — the amount of greenhouse gases to be generated by the proposed development and the energy efficiency of the proposed development.

S.M. 2009, c. 25, s. 8.

Water quality standards, objectives and guidelines

12.1 A licence, or an alteration to a licence, issued under section 10, 11 or 12 after the date that this section comes into force, in respect of a development that affects or may affect water, must, in circumstances specified in *The Water Protection Act* or regulations made under it, include specifications, terms, limits or conditions as necessary to ensure compliance or consistency with a water quality standard, objective or guideline set or adopted under that Act.

S.M. 2005, c. 26, s. 43.

Issue of licence in stages

13(1) The director or minister, as the case may be, may issue a licence referred to in subsection 10(1), 11(1) or 12(1) as one of a series of licences, each of which is issued in respect of a specified stage in the construction, alteration or operation of a development and, notwithstanding subsections 10(1), 11(1) and 12(1), a licence so issued authorizes only the stage in the construction, alteration or operation specified in the licence.

Licensing of preliminary steps

13(2) Notwithstanding anything to the contrary in this Act, the minister or director may, in advance of approval of any stage in the construction, alteration, operation or setting into operation of the development, issue the first of a series of licences referred to in subsection 10(1), 11(1) or 12(1) authorizing such preliminary steps to be taken with respect to the construction or alteration of the development as are specified in the licence, if

- (a) in the opinion of the director or minister, the environmental impact of those preliminary steps is known and is either insignificant or capable of being mitigated with known technology; and
- (b) the director or minister has complied with clause 10(4)(a), 11(8)(a) or 12(4)(a), as the case may be.

Effect of issue of licences in series

13(3) Where the minister or director issues a licence as one of a series, the minister or director is not thereby obliged to issue any subsequent licence in the series.

S.M. 1992, c. 23, s. 4.

Agreements with other jurisdictions

13.1(1) If a proposed development that requires an environmental licence under this Act may have an environmental impact of concern to a jurisdiction other than Manitoba, the minister may, with the approval of the Lieutenant Governor in Council and subject to the regulations, enter into an agreement with that jurisdiction

- (a) to establish a joint assessment process; or
- (b) to provide for the use of that jurisdiction's assessment process;

for the purpose of gathering the information necessary to make a decision to issue or refuse to issue a licence under section 10, 11 or 12.

Equivalent assessment

13.1(2) The minister shall not enter into an agreement under subsection (1) unless

- (a) the minister is satisfied that the agreement provides for an assessment that is at least equivalent to the assessment that would otherwise be required under this Act; and
- (b) the agreement provides for
 - (i) notification of the public in Manitoba about the filing of the proposal through the use of the public registry and by way of advertisements in the media;
 - (ii) comments and objections from members of the public related, at a minimum, to the proposal, the guidelines for the assessment of the proposal, the assessment and the review of the assessment;
 - (iii) public hearings in Manitoba about the proposal by a panel established for the purposes of the assessment process;
 - (iv) the appointment jointly by the ministers who are parties to the agreement of the members of the panel when a joint assessment process is established under clause (1)(a);
 - (v) a requirement that the minister be satisfied that each proposed member of the panel is unbiased and free of any conflict of interest relative to the proposal and has special knowledge or experience relevant to the anticipated environmental effects of the proposal;
 - (vi) a program relating to the provision of financial assistance to members of the public participating in the assessment process when in the opinion of the minister such a program is desirable;
 - (vii) opportunity for the minister or the director, as the case may be, to require further information before making a decision regarding licensing if, in the opinion of the minister or the director, the assessment process has not produced sufficient information on which to base such a decision.

S.M. 1990-91, c. 15, s. 2; S.M. 1991-92, c. 41, s. 9.

Participant funding by proponents

13.2 The minister may, in accordance with the regulations, require a proponent of a development that is subject to an assessment under section 10, 11, 12 or 13.1 to provide financial or other assistance to any person or group participating in the assessment process.

S.M. 1990-91, c. 15, s. 2.

Proponent to notify director or minister of alteration in development

14(1) Where a proponent

- (a) has submitted a proposal for a development in accordance with sections 10, 11 or 12, but is not yet in receipt of an environmental licence; or
- (b) has received an environmental licence for a development;

and the proponent intends to alter that proposal or the development as licensed that does not conform to the limits, terms and conditions or that is likely to change the environmental effect, the proponent shall notify the director or the minister, as the case may be, of the proposed alteration before proceeding with it.

Dealing with minor proposed alterations

14(2) Where

- (a) the director or the minister has received notice of a proposed alteration in accordance with subsection (1);
- (b) the potential environmental effects resulting from the alteration are insignificant or will be accommodated by the ongoing assessment process; and
- (c) in the case of a proposed alteration to the development as licensed, the proposed alteration is not an alteration to any limit, term or condition that was amended as a result of an appeal under section 27 or 28;

the director or the minister may in writing, and with such limits, terms and conditions as he or she consider advisable, give approval to the proponent to implement the alteration.

Record of minor alteration decision

- 14(2.1) If the director or minister approves a proposed alteration, he or she must file in the public registry
- (a) a copy of the approval under subsection (2); and
 - (b) the name of a contact person in the department who can give information to the public about the proposed alteration.

Dealing with major proposed alterations

14(3) Where the director or the minister has received notice of a proposed alteration in accordance with subsection (1), and the proposal is other than as described in clauses 2(b) and (c), the director or minister shall direct the proponent to seek approval for the proposed alteration as a proposal in accordance with section 10, 11 or 12, as the case may be.

Decision on proposed alterations

14(4) The decision of the director or minister with respect to the disposition of the alteration in accordance with subsection (2) or (3) shall be communicated to the proponent within 21 days from the receipt of the request for the change.

Prior approval of alteration required

14(5) No person shall proceed with an alteration in a development until the person has received approval therefor from the director or minister.

S.M. 1992, c. 23, s. 5; S.M. 2009, c. 25, s. 9.

Compliance with limits, etc.

15(1) No person shall proceed with a development for which that person has received a licence from the director or the minister, as the case may be, except in accordance with the specifications, limits, terms and conditions set out in the licence.

Development not to proceed

15(2) No person shall proceed with a development for which a licence has been refused by the director or by the minister, as the case may be.

Previous order deemed to be a licence

15(3) Where prior to the coming into force of this Act, a person obtained an order pursuant to *The Clean Environment Act* being Chapter C130 of the *Continuing Consolidation of the Statutes of Manitoba*, it shall be deemed to be a licence issued under this Act.

Licence binding on purchase

15(4) An order, licence, or permit issued pursuant to this Act or the regulations and with respect to a person who owns or operates a development is binding on a person who purchases or otherwise acquires custody or control over the development.

Deemed development

16 Where there is a disagreement as to whether any project, industry, operation or activity, or any alteration or expansion thereof is a development, the matter shall be determined by the minister.

Public registry

17 Subject to section 47, the director shall maintain or cause to be maintained a public registry, containing for each proposal received

- (a) a summary, prepared by the proponent in form and detail approved by the department;
- (b) the disposition and status of each proposal;
- (c) a copy of the environmental licence, where applicable;
- (d) a copy of the assessment report;
- (e) justification for not accepting the advice and recommendations of the commission, where applicable; and
- (f) justification for refusing to issue an environmental licence, where applicable; and
- (g) such other information as the minister or director may from time to time direct.

Suspension or variation in extra-ordinary circumstances

18(1) Where a person is in possession of a licence issued under this Act, and where extraordinary circumstances warrant, that person may request the minister to suspend or vary all or any part of the licence; and the minister may comply with the request subject to such limits, terms and conditions as the minister deems necessary and suspend or

vary any or all of the licence for a period not exceeding 14 days, as specified by the minister.

Suspension to be recorded

18(2) A suspension or variation granted pursuant to subsection (1) shall be recorded in the public registry and in the department's annual report.

Suspension, etc. of licence

19(1) The minister may suspend, withdraw or cancel a licence issued in accordance with sections 10, 11 or 12 where any provision of the licence, this Act or regulation is found to have been violated.

Restoration of licence

19(2) Where the minister is satisfied that adequate steps have been taken by a licensee whose licence was suspended or withdrawn or cancelled pursuant to subsection (1), to remedy the situation, the minister shall restore the licence.

[S.M. 2009, c. 25, s. 10.](#)

Powers of environment officers

20 An environment officer may at any reasonable time and where requested, upon presentation of an identification card issued by the minister, for the purpose of enforcing this Act or the regulations or any order or licence made under this Act or the regulations

- (a) without a warrant, enter any place or premises other than a dwelling that is the subject of this Act and make such inspections of the place or premises as may be reasonably required to determine compliance with this Act, the regulations, licence or order issued under this act; or
- (b) without a warrant, enter any place or premises, other than a dwelling, in which there is reasonable and probable grounds to believe that a pollutant is or will be produced, stored, or used or from which a pollutant is being released, and conduct such inspections of the place or premises as are reasonably required or necessary; or
- (c) without a warrant, enter any place or premises, other than a dwelling, in which there is reasonable and probable grounds to believe that environmental damage is occurring within those premises or as a result of any development located within the premises, and conduct such inspections of the place or premises as are reasonably required; or
- (d) for the purposes of clauses (a), (b) or (c), inspect any installation, plant, machinery and vehicle, and inspect and test any process of production or manufacture and any raw or manufactured substance or material used therein or relating thereto for which the environment officer has reasonable or probable grounds to believe may be producing or releasing pollutants and take and retain samples of same for purposes of analysis; or
- (e) examine and make copies of any document required to be kept by this Act, the regulations, orders or licences.

[S.M. 2009, c. 25, s. 11.](#)

Entry with warrant

21(1) Where an environment officer has reasonable and probable grounds to suspect that an offence under this Act, the regulations, an order or a licence, has been or is being committed, the environment officer may with a warrant, issued for that purpose, or with the permission of the owner or operator of the premises or development enter the premises or development and secure, seize and take such evidence as may be required including samples of raw or manufactured products and documents related to the suspected offence.

Where officer may act without warrant

21(2) Notwithstanding subsection (1), where an environment officer, acting in the course and scope of the officer's duty discovers an offence in progress, the environment officer may, without a warrant, do those things mentioned in that subsection.

Disposition of seized goods

22(1) Where a product or container is seized under section 21 and the environment officer making the seizure reasonably believes that the product will spoil or perish before the conclusion of the proceedings in respect of the alleged offence, the environment officer shall cause the product to be sold if the product has any market value, or otherwise be disposed of if the product has no market value; and any proceeds from the sale shall be held, with interest to be paid thereon at a rate fixed from time to time by the Lieutenant Governor in Council, pending the outcome of the proceedings.

Forfeiture of seized product

22(2) Where proceedings under this Act or the regulations in respect of a product or container seized under section 21 have been finally resolved, and if the accused

- (a) is convicted, the product or container, or the proceeds of sale and accumulated interest referred to in subsection (1) are forfeited to the Crown; or
- (b) is acquitted or the charge against the person is stayed, the product or container, or the proceeds of sale and

accumulated interest referred to in subsection (1), shall be turned over or paid to the person who is lawfully entitled to possess it or them.

Disposal of seized goods

22(3) Where material is forfeited to the Crown in accordance with clause (2)(a), and the material is of a nature or value that in the opinion of the director, it should be disposed of, the director may cause its disposal and the costs incurred by the Crown in disposing of the material is a debt due the Crown in a court of competent jurisdiction from the person from whom the material was forfeited.

Information to be provided by accused person

23 For the purposes of commencing proceedings under this Act, an environment officer may require the person being charged to provide his or her name, address and date of birth.

Environmental protection order

24(1) If the director believes that

- (a) a pollutant may be released, is being released, or has been released; and
- (b) the release may cause, is causing or has caused an adverse effect on the environment;

the director may issue an environmental protection order against a person responsible for the pollutant.

Contents of environmental protection order

24(2) An environmental protection order may require the person named in the order — by a deadline set out in the order — to take any steps that the director considers necessary to protect the environment, including one or more of the following:

- (a) investigate the situation;
- (b) measure the rate of release or the ambient concentration, or both, of the pollutant;
- (c) take any action specified by the director to prevent or reduce the release of the pollutant;
- (d) minimize or remedy the effects of the pollutant on the environment;
- (e) restore the area affected by the release of the pollutant to a condition satisfactory to the director;
- (f) monitor, measure, contain, remove, store, destroy or otherwise dispose of the pollutant, or reduce or prevent further releases of the pollutant;
- (g) install, replace or alter any equipment or thing in order to control or eliminate the release of the pollutant;
- (h) report on any matter ordered to be done, in accordance with directions set out in the order.

Consequences of failing to comply with order

24(3) If a person fails to comply with an environmental protection order, the director or an environment officer may, without further notice to the person,

- (a) carry out the measures specified in the order, or cause them to be carried out; and
- (b) be accompanied by any other persons, and use any equipment, required to carry out the measures specified in the order.

[S.M. 2009, c. 25, s. 12.](#)

Emergency action to protect environment

24.1 The director or an environment officer may take, or cause to be taken, any emergency action that he or she considers necessary to protect the environment if he or she believes that

- (a) a pollutant may be released, is being released, or has been released; and
- (b) the release may cause, is causing or has caused a significant adverse effect on the environment.

[S.M. 2009, c. 25, s. 13.](#)

Order to pay costs

24.2(1) The director may, by order, require

- (a) a person who failed to comply with an environmental protection order to pay the costs of any action taken under subsection 24(3); or
- (b) the person responsible for the pollutant in question to pay the costs of any emergency action taken under section 24.1.

Enforcement of order

24.2(2) An order to pay costs under subsection (1) may be filed in the Court of Queen's Bench and enforced as if it

were an order of that court.

S.M. 2009, c. 25, s. 13.

Action by minister to minimize danger

25(1) Notwithstanding anything in this Act, where the Lieutenant Governor in Council considers it in the public interest to take emergency action to alleviate an environmental emergency or where a health emergency as declared by the Minister of Health exists, the minister may authorize the taking of such action as is deemed necessary by the Lieutenant Governor in Council or the Minister of Health to mitigate the emergency or alleviate the threat to health without reference to the normal approval or licencing processes pursuant to this Act.

No injunction against minister

25(2) No injunction lies against the minister to restrain or prevent the minister or any person acting under the authority of the minister from taking action under subsection (1).

Order by minister to municipality re health emergency

25.1(1) Notwithstanding anything in this Act, where the Minister of Health declares that a health emergency exists, or that one appears imminent, because of mosquitoes capable of transmitting diseases, the minister responsible for this Act may, by order, require a municipality to take measures specified in the order to prevent, minimize or alleviate the threat to health, on the terms and conditions and in the manner set out in the order.

Variation, etc. of order

25.1(2) The minister may, by order, vary, extend, suspend or terminate an order made under subsection (1).

Communication of minister's order

25.1(3) Immediately after making an order, the minister shall cause details of the order to be communicated by the most appropriate means to the residents of the affected municipality.

No injunction

25.1(4) No injunction lies against the minister, a municipality or any person acting under the authority of an order, to restrain or prevent the minister, municipality, or person from taking measures under this section.

Normal processes not applicable if health emergency exists

25.1(5) Where the minister's order is made after a declaration that a health emergency exists,

- (a) the municipality may take the measures specified in the order without reference to the normal approval or licensing processes pursuant to this Act; and
- (b) the minister may vary, suspend or terminate any approval given or licence issued pursuant to this Act that may affect the implementation of the order.

Regulations Act not applicable

25.1(6) *The Regulations Act* does not apply to an order made under this section.

Municipality's power of entry

25.1(7) Where the minister makes an order, a person authorized by the municipality may, without a warrant, enter on or pass over or through any lands in the municipality to implement the measures set out in the order.

Action by minister if municipality fails to comply

25.1(8) If the municipality fails to comply with the minister's order, the minister may, without reference to the normal approval or licensing processes pursuant to this Act,

- (a) cause anything to be done that is required by the order; and
- (b) take any other measures that the minister considers necessary to prevent, minimize or alleviate the threat to health.

Subsection (7) applies

25.1(9) Subsection (7) (power of entry) applies to an action taken by the minister under subsection (8), with necessary changes.

Recovery of expenditures

25.1(10) If the minister takes action under subsection (8), the municipality that failed to comply with the minister's order may be required to pay the amount of any expenditures made by the government, or a portion of that amount, on such terms as may be specified by the Lieutenant Governor in Council.

Reimbursement to municipality for expenditures

25.1(11) The government may reimburse a municipality for the amount of any expenditures made by the municipality in implementing an order, or a portion of that amount, on such terms as may be specified by the Lieutenant Governor in Council.

Compensation for loss

25.1(12) Notwithstanding section 46, where as a result of any action taken or done under this section a person suffers any loss of any real or personal property, the government may compensate the person for the loss in accordance with such guidelines as may be approved by the Lieutenant Governor in Council.

S.M. 2002, c. 6, s. 2.

Appeals from environment officer

26(1) Except as may be otherwise provided in this Act, any person who is affected by any order, instruction or permit of an environment officer may, within 14 days from the date of issuance of the order, instruction or permit, in writing appeal therefrom to the director.

Action by director on appeal

26(2) Where an appeal is made to the director under subsection (1), the director shall within 15 days after the receipt of the appeal affirm, rescind or amend the decision appealed and shall notify the appellant of the disposition of the appeal within seven days from the date of the decision of the director.

S.M. 2009, c. 25, s. 14.

Appeal to minister

27(1) Except as may be otherwise provided in this Act, any person who is affected by

- (a) the issuance of a licence or a permit by the director; or
- (b) the refusal by the director to issue a licence or permit; or
- (c) any decision, order, instruction, or directive of the director; or
- (d) the imposition of limits, terms and conditions in a licence or permit issued by the director; or
- (e) the disposition of an appeal under section 26;

may file an appeal in writing with the minister that includes the reasons for the appeal and any facts relative thereto, within the following periods:

- (f) in the case of a decision, issuance, refusal, order, instruction or directive or the imposition of limits, terms and conditions or the disposition of the appeal, within 30 days of the date thereof; and
- (g) in the case of a licence that sets out a limit, term or condition that is to take effect on or be imposed at a future date and specifies that an appeal is to be taken within a specified period, within the period so specified.

Disposition of appeal by minister

27(2) Where an appeal is made to the minister pursuant to subsection (1), the minister may, on such considerations as the minister deems advisable,

- (a) in the case of an appeal of the director's decision not to recommend a public meeting or hearing on a proposal, request the commission to hold a public meeting or hearing on the proposal;
- (b) refer the matter back to the director for reconsideration;
- (c) make any decision that in his or her opinion ought to have been made by the director; or
- (d) quash or vary the decision under appeal, or dismiss the appeal.

L.G. in C. approval

27(3) Before making a decision on an appeal in respect of the following matters, the minister must refer the proposed disposition to the Lieutenant Governor in Council for approval:

- (a) the issuance of a licence by the director under clause 10(8)(a) or 11(11)(a);
- (b) the refusal by the director to issue a licence under 10(8)(b) or 11(11)(b);
- (c) the imposition of specifications, limits, terms and conditions on a licence issued by the director under clause 10(8)(a) or 11(11)(a).

Notice

27(4) The minister must notify the appellant about his or her decision in the prescribed manner within the following time periods:

- (a) in the case of a proposed disposition that requires approval by the Lieutenant Governor in Council under subsection (3), within 30 days after the approval is given;

(b) in the case of any other decision in respect of a matter referred to in subsection (1), within seven days after the date of the minister's decision.

S.M. 1992, c. 23, s. 6; S.M. 2009, c. 25, s. 15.

Appeal of minister's decision

28(1) A person who is affected by a decision of the minister made under section 10, 11 or 12 in relation to a proposal or a decision made under subsection 14(2) may file an appeal in writing with the minister. The appeal must set out the reasons for the appeal and must be filed within 30 days after the date of the decision.

Appeal to Lieutenant Governor in Council

28(1.1) The minister must refer the appeal to the Lieutenant Governor in Council.

Disposition of appeal

28(2) When an appeal is referred to the Lieutenant Governor in Council, it may, on such considerations as it deems advisable,

- (a) in the case of an appeal of the minister's decision not to request a public meeting or hearing on a proposal, request the commission to hold a public meeting or hearing on the proposal;
- (b) refer the matter back to the minister for reconsideration;
- (c) make any decision that in its opinion ought to have been made by the minister; or
- (d) quash or vary the decision under appeal, or dismiss the appeal.

S.M. 2009, c. 25, s. 16.

Actions in case of new evidence

29 In the event that the appellant has new evidence that was not previously considered, the minister may reopen the appeal process and consider the new evidence with respect to the disposition of the appeal pursuant to section 27 or 28.

Appeal does not act as stay of decision

30 An appeal filed under sections 26, 27 or 28 does not suspend the decision appealed against; but the minister may suspend the operation of the decision, in whole or in part, until the appeal is disposed of.

No unauthorized release of pollutants

30.1(1) No person shall release or allow the release of a pollutant in an amount or concentration, or at a level or rate of release, that causes or may cause a significant adverse effect, unless expressly authorized or permitted to do so

- (a) under this Act or the regulations;
- (b) under another Act of the Legislature or an Act of Parliament, or a regulation made under one of those Acts; or
- (c) by a licence, permit, order, instruction, directive or other approval or authorization issued or made under this Act, another Act of the Legislature or an Act of Parliament.

Exception re agricultural operations

30.1(2) A person involved in an agricultural operation does not contravene subsection (1) if

- (a) the release occurred through the use of normal farm practices; and
- (b) the release itself and the conduct that led to the release does not contravene another provision of this Act, another Act of the Legislature or an Act of Parliament, or a regulation made under one of those Acts.

Duty to report release

30.1(3) A person who releases or causes or allows the release of a pollutant that may cause, is causing or has caused an adverse effect must report the release, in accordance with the regulations, to

- (a) the director;
- (b) the person responsible for the pollutant, if the person reporting is not the person responsible for the pollutant but he or she knows or is readily able to determine the identity of that person; and
- (c) any other person who the person reporting knows or ought to know may be directly affected by the release.

Reporting by person responsible for pollutant

30.1(4) A person responsible for a pollutant that is released into the environment that may cause, is causing or has caused an adverse effect must report the release, in accordance with the regulations, to the persons referred to in subsection (3), unless he or she has reasonable grounds to believe that those persons are already aware of the release.

Definitions

30.1(5) In this section, "agricultural operation" and "normal farm practice" have the same meanings as in *The Farm Practices Protection Act*.

S.M. 2009, c. 25, s. 17.

No release of pollutants in excess of limits

30.2 No person shall release or allow the release of a pollutant in an amount or concentration, or at a level or rate of release, that exceeds the limit that is expressly provided under this Act, another Act of the Legislature, or an Act of Parliament, or in a regulation, licence, permit, order, instruction, directive or other approval or authorization issued or made under one of those Acts.

S.M. 2009, c. 25, s. 17.

Offence

31 Any person who contravenes or violates any provision of this Act or the regulations or fails to comply with any provision of any order, licence or permit issued by the minister, director, or environment officer made pursuant to this Act or the regulations, or an order of a judge made pursuant to section 36 is guilty of an offence.

S.M. 1989-90, c. 36, s. 2.

Continuing offence

32 Where a contravention or violation of any provision of this Act or the regulations, or a failure to comply with an order, licence, permit, approval or instruction of the minister, director or environment officer, or any terms or conditions therein, or an order of a judge made pursuant to section 36 continues for more than one day, the offender is guilty of a separate offence for each day that the contravention, violation or failure continues.

S.M. 1989-90, c. 36, s. 3.

Penalties on individuals

33(1) Subject to subsection (2), any person found guilty of an offence under this Act is liable

(a) for a first offence, to a fine of not more than \$50,000. or to imprisonment for not more than six months, or to both; and

(b) for each subsequent offence, to a fine of not more than \$100,000. or to imprisonment for not more than one year, or to both;

and in addition, where in the opinion of the judge the individual is unwilling or unable to remedy the situation or condition giving rise to the offence, the judge may suspend, or revoke all or part of the environmental licences, or permits under which the individual operates, for such time as the judge deems fit; and the individual shall not thereafter continue to carry on any operation affected thereby until the licences, approvals or permits, as the case may be, are restored by the judge or by the minister.

Penalties on corporations

33(2) Any corporation found guilty of an offence under this Act is liable

(a) for a first offence, to a fine of not more than \$500,000; and

(b) for each subsequent offence, to a fine of not more than \$1,000,000;

and in addition, where in the opinion of the judge the corporation is unwilling or unable to remedy the situation or condition giving rise to the offence, the judge may suspend or revoke all or part of the environmental licences, or permits under which the corporation operates, for such time as the judge deems fit; and the corporation shall not thereafter continue to carry on any operation affected thereby until the licences, or permits, as the case may be, are restored by the judge or by the minister.

S.M. 1989-90, c. 36, s. 4.

Judge may restore licence

34 Where a judge suspends or revokes a licence, or permit in accordance with section 33, the judge or the minister shall restore the licence, or permit upon receipt of satisfactory evidence that the condition or situation giving rise to the offence has been rectified.

Offence by director of corporation

35 Any officer, director or agent of the corporation who directed, authorized, assented to, acquiesced in or participated in the commission of an offence is a party to and guilty of the offence and is liable on conviction to the punishment set out in subsection 33(1).

Other penalties

36 A judge may, in addition to a fine or other penalty, require the convicted person to do any or all of the following things

- (a) take such action as may be necessary to refrain from committing any further offence under this Act, or from causing further environmental damage;
- (b) take such action as may be necessary to clean or restore the environment from damage caused by the offence;
- (c) pay such damages or make restitution to any person who suffered damages by the offence as the judge may deem appropriate;
- (d) pay such additional fine in an amount no greater than the monetary benefit acquired by or that accrued to the person as a result of the commission of the offence, notwithstanding any maximum fine elsewhere provided.

Obstruction in performance of duties prohibited

37 No person shall obstruct or attempt to obstruct an environment officer, director or any other person in the performance of their duties or the exercise of their authority under this Act.

S.M. 2002, c. 6, s. 3.

Who may lay information

38 Any person may lay an information in respect of any offence against this Act or the regulations.

Limitation on prosecution

39 An information in respect of an offence under this Act may be laid within one year from the time when the subject matter of the proceedings arose or within one year from the day on which evidence, sufficient to justify a prosecution for the offence, came to the knowledge of the environment officer and the certificate of the environment officer as to the day in which such evidence came to his or her knowledge is prima facie proof of the date of the receipt of the evidence.

Admissibility of certificate in evidence

40(1) A certificate or report purporting to have been signed by an analyst stating that the analyst has analyzed or examined a pollutant, product, substance, or organism and stating the results of the analysis or examination, is admissible in evidence in any prosecution for an offence under this Act without proof of the signature or official character of the analyst who signed the certificate or report, and in the absence of any evidence to the contrary, is proof of the statements contained in the certificate or report, as the case may be.

Service of certificate on party

40(2) No certificate or report or any copy or extract of a certificate or report referred to in subsection (1) shall be received in evidence unless the party intending to produce it has served on the party against whom it is intended to be produced, at least seven days prior to the date fixed for the hearing a notice of the intention together with a duplicate of the certificate or report.

Prohibition — confined livestock areas and manure storage facilities for pigs

40.1(1) Except as authorized by a permit issued under this section, no person shall construct, expand or modify a confined livestock area for pigs or a pig manure storage facility on land that is within

- (a) an area listed in the Schedule; or
- (b) any other area of Manitoba.

Permit for manure storage facility

40.1(2) The director may, in accordance with the regulations, issue a permit in respect of a pig manure storage facility if

- (a) the permit authorizes the construction, expansion or modification of the storage facility to allow the manure to be subjected to
 - (i) anaerobic digestion in a manner acceptable to the director, or
 - (ii) another environmentally sound treatment that is similar to or better than anaerobic digestion and is acceptable to the director;
- (b) the permit authorizes modifications to the storage facility to make the manner of handling manure more environmentally sound in the director's opinion;
- (c) the permit authorizes modifications to the storage facility to repair or upgrade it, and the director has directed the operator to apply for the permit; or
- (d) the permit authorizes modifications to correct something that the director considers to be a deficiency in a storage facility that is not registered under the regulations, and the director has required the operator to obtain the permit.

Permit for confined livestock area

40.1(3) The director may, in accordance with the regulations, issue a permit authorizing modifications to a confined livestock area for pigs to make the manner of handling manure more environmentally sound in the director's opinion.

Permit to construct replacement facility or area

40.1(4) The director may, in accordance with the regulations, issue a permit authorizing the construction of a pig manure storage facility or a confined livestock area for pigs that will replace an existing facility or area if the director is satisfied that the existing one

- (a) has been significantly damaged and its repair is not feasible; or
- (b) is of an age or condition where it is more appropriate to stop using it.

No increase in animal units allowed

40.1(5) The director must not issue a permit under clause (2)(b), (c) or (d) or subsection (3) or (4) authorizing modifications or construction that results in an increase in the number of animal units capable of being handled by the livestock operation.

Director may impose conditions on permit

40.1(6) The director may impose limits, terms and conditions on a permit issued under this section.

Definitions

40.1(7) In this section, "animal unit", "confined livestock area", "manure" and "manure storage facility" have the meanings prescribed in the regulations.

S.M. 2008, c. 39, s. 2; S.M. 2011, c. 36, s. 4.

Prohibition — winter spreading

40.2(1) No person shall apply livestock manure to land between November 10 of one year and April 10 of the following year.

Exception — fewer than 300 units

40.2(2) Until November 10, 2013, subsection (1) does not apply to the operator of, or a person employed in, an agricultural operation with fewer than 300 animal units if the operation was in existence on March 30, 2004, and had fewer than 300 animal units on that date.

Regulations

40.2(3) Subsections (1) and (2) are subject to the regulations.

Definitions

40.2(4) In this section, "agricultural operation", "animal unit", "livestock" and "manure" have the meanings prescribed in the regulations.

S.M. 2011, c. 36, s. 5.

Prohibition — disposal fields in capital region

40.3(1) No person shall construct, install, site, locate, replace, expand or modify a disposal field on any parcel of land resulting from a subdivision of land approved after this section comes into force, if

- (a) the parcel of land is within the City of Winnipeg and is less than 0.8 ha (2 acres); or
- (b) the parcel of land is within a municipality named in clauses 3(1)(a) to (o) of *The Capital Region Partnership Act*, and is either
 - (i) within the Red River corridor, or
 - (ii) outside the Red River corridor and less than 0.8 ha (2 acres).

Exception — existing disposal fields

40.3(2) Subsection (1) does not apply to the replacement, expansion or modification, as permitted under the regulations, of a disposal field that existed before the subdivision was approved.

Definition of "Red River corridor"

40.3(3) In this section, "Red River corridor" means the Red River Corridor Designated Area as described in Plan No. 8303-2009, which is filed at the head office of Environmental Services of the Department of Conservation in Winnipeg.

S.M. 2011, c. 36, s. 5.

Regulations

41(1) For the purpose of carrying out the provisions of this Act according to their intent, the Lieutenant Governor in Council may make such regulations and orders as are ancillary thereto and are not inconsistent therewith and every regulation or order made under and in accordance with the authority granted by, this section has the force of law; and, without restricting the generality of the foregoing, the Lieutenant Governor in Council may make regulations and orders,

- (a) respecting the classification of development in class 1, class 2 or class 3 developments, and the setting out of assessment process for each class of development;
- (a.1) prescribing gases as greenhouse gases for the purpose of clause (g) of the definition "greenhouse gas" in subsection 1(2);
- (b) respecting the classification of certain geographic areas of the province by pollution assimilative capacity and the setting of ambient loading standards for those areas;
- (c) setting out the policies for environmental management as they relate to economic development, conflicting land or resource use, and industrial density;
- (d) restricting or limiting the number and types of developments that may cause adverse cumulative effects that may be permitted to be constructed or operated in the province, or any part thereof;
- (d.1) governing or prohibiting any use, activity or thing that may cause adverse effects, including governing or prohibiting the construction, alteration, modification or expansion of developments or classes of developments;
- (e) respecting the setting of environmental quality objectives for part or all of Manitoba, the process for setting of those objectives, and the use of objectives;
- (f) exempting developments or classes of developments from the requirements of section 10, 11 or 12 of the Act;
- (g) setting out the procedures to be followed with regard to applications for licences or permits required under the Act or the regulations and the issuance, refusal, withdrawal, revocation or suspension of the licences or permits;
- (h) respecting fees payable for service, licence or permit and the disposition or administration of same;
- (i) respecting the requirement of evidence of financial responsibility in the form of insurance or an indemnity bond, or other form as may be satisfactory to the director, for persons owning or operating developments that will or may cause environmental damage;
- (j) respecting the design, location, configuration, construction, adaptation, alteration, operation, maintenance and installation of developments to mitigate their adverse effects;
- (k) respecting the design, construction, adaptation, alteration, operation, maintenance and installation of systems, processes or works to abate or control pollution or other environmental damage including but not limited to waste disposal grounds, landfills, sewage collection and treatment, sewage or industrial sludge handling and disposal, incinerators, and recycling systems;
- (l) prescribing, setting standards or conditions for, or prohibiting the methods of collection, treatment, distribution and disposal of pollutants;
- (m) respecting the location of waste disposal grounds and landfills, and regulating, prohibiting and requiring approvals for the construction and placing of structures of any kind on land located within such distance of waste disposal grounds and landfills as is specified in the regulation, whether or not the waste disposal grounds and landfills are abandoned or not;
- (n) prescribing limits, terms and conditions on the release of pollutants, or the prohibition of release of pollutants or in the type, quantity, or conditions respecting resource utilization from any development;
- (n.1) respecting the burning of vegetation or the remains of vegetation in connection with agricultural activities and the release of pollutants resulting from that burning;
- (o) respecting the use restriction, or prohibition of use of any product or substance that may pollute or damage the environment;
- (p) respecting the disposal, reuse or recycling of any product or residual flow or packaging offered for sale in the province which may become a component of a wastestream;
- (p.1) respecting the reporting of releases of pollutants under section 30.1, including exempting releases or classes of releases from the reporting requirements of section 30.1;
- (q) requiring certain developments or certain classes of developments to register with the department;
- (r) requiring a permit for the construction or operation of certain developments, and the issuance or withdrawal of the permits by the director or environment officer and the limits, terms and conditions to be included in the permits issued by the director or the environment officer;
- (s) respecting the methods of testing samples and prescribing the equipment or apparatus or structures to be used for taking samples;
- (t) respecting livestock production operations;
- (u) respecting the declaration of equivalent standards or status by the minister;
- (v) prohibiting litter and regulating the disposal of litter;

- (w) setting out environmental management practices to be incorporated into the design, construction, operation, closure or rehabilitation of a development;
- (x) respecting the use, storage, handling, disposal, or prohibitions of the use, storage, handling or disposal of pesticides and containers;
- (y) prescribing forms for use under this Act;
- (y.1) prescribing the manner of giving notice of any decision or matter under this Act;
- (z) respecting applications for grants under section 45.2 and the amount and the terms and conditions of grants;
- (aa) respecting agreements and assessment processes under section 13.1 and, without limiting the generality of the foregoing, respecting the criteria and procedures for entering into agreements with other jurisdictions regarding the use of the assessment process of the other jurisdiction to gather the information necessary for decisions required under section 10, 11 or 12;
- (bb) respecting the financial and other assistance to be provided under section 13.2 to persons and groups participating in the assessment process by proponents of a development including
 - (i) the mechanism for receiving and approving requests for such assistance,
 - (ii) eligibility requirements for such assistance,
 - (iii) expenditures that may be included in a request for such assistance,
 - (iv) information to be provided with a request for such assistance,
 - (v) the allocation of such assistance among participants;
- (cc) respecting costs that are payable by the proponent associated with hearings held with respect to joint assessment processes referred to in section 13.1 or with respect to Class 1, Class 2 or Class 3 developments;
- (dd) respecting costs that are payable by a person with respect to the monitoring of, or the review of that person's obligation to monitor, pollutants, effluent quality, environmental quality or other similar matters in accordance with the limits, terms and conditions of a licence, order or regulation;
- (ee) in addition to orders for which provision is made in this Act, providing for the making of an order for enforcing a regulation made under clause (n.1) against a person responsible for the burning of vegetation or the remains of vegetation in connection with agricultural activities and the release of pollutants resulting from that burning, including providing for
 - (i) the power to direct any other person to do the acts ordered in place of the person responsible and to recover the costs of doing those acts from the person responsible, and
 - (ii) the right of a person responsible to recover his or her costs against other persons responsible;
- (ff) respecting the admission of evidence by certificate and providing that, in the absence of evidence to the contrary, the certificate is conclusive proof of the statements contained in it;
- (gg) defining any word or phrase used but not defined in this Act.

Regulation development

41(2) Except in circumstances considered by the minister to be of an emergency nature, in the formulation or substantive review of regulations incorporating environmental standards, limits, terms or conditions on developments under this Act, the minister shall provide opportunity for public consultation and seek advice and recommendations regarding the proposed regulations or amendments.

Adoption of standards by reference

41(3) A regulation made under subsection (1) may adopt by reference in whole or in part, with such changes as may be necessary, any code or standard, or any regulation made by any other government in Canada or recognized technical or professional organization, and may require compliance with any code, standard or regulation so adopted.

Varying of requirements by minister

41(4) The minister may, where authorized by a regulation, vary certain requirements of the regulation or grant equivalent status to standards in the regulation for the purposes of that regulation, and the variation as decided by the minister shall be complied with as a part of the regulation so varied.

Reasons for certain ministerial actions

41(5) Where the minister acts in accordance with subsection (4), the minister shall provide written reasons therefor, and shall make those reasons available to interested persons upon request.

Order re costs filed in court

41(6) An order issued to a person to pay costs as required by a regulation made under clause (1)(bb), (cc) or (dd) may be filed in the Court of Queen's Bench and on being filed may be enforced as if it were an order of that court.

Delegation of power under clause (1)(n.1)

41(7) Where

- (a) in the exercise of the power conferred under clause (1)(n.1), the Lieutenant Governor in Council considers it advisable that a period or periods be established when, or that an area be designated in which, or any similar thing be done having as an effect that, the burning of vegetation or the remains of vegetation in connection with agricultural activities and the release of pollutants resulting from that burning is permitted or prohibited; and
- (b) the exercise of the power contemplates the existence of circumstances, such as weather conditions, that are not ordinarily known in sufficient time to permit notice of the establishment or designation or other thing to be given by way of a regulation published in *The Manitoba Gazette* under *The Regulations Act*;

the Lieutenant Governor in Council may in a regulation made under clause (1)(n.1) provide that

- (c) the period or periods be established or area be designated for a specified time or other thing be done, by order of the minister or a delegate of the minister;
- (d) *The Regulations Act* not apply to an order under clause (c);
- (e) an order under clause (c) be published by a means such as a recorded message accessible by telephone, by broadcast on radio or television or by publication in a newspaper or by any combination of those or other means, that in the opinion of the Lieutenant Governor in Council is likely to give notice of the order to affected persons; and
- (f) an order comes into force on or after first publication by a specified means and that that publication is notice to all persons.

S.M. 1989-90, c. 60, s. 26; S.M. 1990-91, c. 15, s. 3; S.M. 1991-92, c. 41, s. 9; S.M. 1992, c. 23, s. 7; S.M. 1993, c. 26, s. 4; S.M. 1995, c. 33, s. 7; S.M. 2006, c. 24, s. 8; S.M. 2008, c. 39, s. 3; S.M. 2009, c. 25, s. 18.

Regulation may apply to part or all of province

42 A regulation, or any provision thereof, may apply to all or a part of the province only, and may apply specifically to one or more particular developments.

Regulations re sensitive areas

43 The minister may make regulations declaring or designating certain areas of the province as sensitive or critical areas and prescribing standards or controls respecting environmental matters in those areas.

Conflict between licence and regulation

44 Where a licence is issued by the director or minister as the case may be, in respect of the construction, alteration, operation or implementation of a development and after the date on which the licence was made a regulation is made prescribing standards, limits, terms or conditions which apply to that operation that are different to those set out in the licence, the standards, limits, terms or conditions of the regulations prevail.

Sale of marketable emission rights

45 The Lieutenant Governor in Council may, where it is consistent with established environmental quality objectives, market units of allowable emission of specific pollutants, in accordance with the regulations, and the revenue so generated may be held in trust by the Minister of Finance as an environmental contingency fund, to be used at the request of the minister in the event of an environmental emergency.

45.1 and 45.2 Repealed.

S.M. 1989-90, c. 60, s. 26; S.M. 1993, c. 48, s. 13; S.M. 1997, c. 61, s. 21.

Exemption from civil liability

46 No action lies or shall be instituted against any person acting under the authority of this Act, any employee or person acting as an agent for the Crown, including members of the board, commission, any advisory committee or panel appointed by the minister or Lieutenant Governor in Council or any person operating under an agreement with the minister, to recover any loss or damage alleged to have been suffered by any person as a consequence of any act or omission of the person, employee, agent or member in connection with the carrying out of the powers and duties given under this Act or the regulations to the person, employee, agent or member unless the act or omission resulted from negligence or malice of the person, employee, agent or member.

S.M. 2002, c. 6, s. 4.

Information confidential

47 Where proprietary information is provided to any official of the department under this Act, that official shall not without the consent in writing of the person by whom the information was provided

- (a) communicate or allow to be communicated to any person; or
- (b) allow any other person to inspect or have access to;

the information except for the purposes of administration and enforcement of this Act, or as otherwise required by law.

Abatement project

48(1) The council of a municipality may, by resolution, approve a proposal for an abatement project within the municipality.

Contents of proposal for abatement project

48(2) A proposal for an abatement project shall outline the details of the project and shall include

- (a) a description of the development or premises to be removed and relocated;
- (b) a description or a plan of any land to be acquired for the purposes of relocation of the development or premises;
- (c) a description of the methods planned by the municipality for the direction and control of the use of the land in the area affected by the abatement project, including zoning controls, building controls and standards of occupancy of buildings;
- (d) a description of any changes in any planning scheme, building controls or development plan affecting a municipality that are required in conjunction with the carrying out of the proposed abatement project;
- (e) the estimated cost of the abatement project; and
- (f) a proposal for the planning and use of the lands that are to be acquired.

Reference of proposal to commission

48(3) Upon approving a proposal for an abatement project, the municipality shall submit the proposal to the minister who shall refer the proposal to the commission for its advice and recommendations.

Public hearing by commission

48(4) Upon receiving a proposal for an abatement project from the minister, the commission shall fix a suitable time and place for public hearings with respect thereto and cause reasonable notice thereof to be given by publication in at least one issue of a newspaper having a general circulation in the municipality in which the abatement project is proposed and by sending a notice thereof to the municipality and to every occupant of and every owner of an estate or interest in the lands, developments or premises that are intended to be removed and relocated or that are intended to be acquired to carry out the proposed abatement project.

Parties to hearing

48(5) The parties to a hearing before the commission include the municipality, each person who has been served with a notice in accordance with subsection (4) and such other persons or groups of persons whose lands the commission may consider to be adversely or injuriously affected by the undesirable environmental conditions sought to be abated by the abatement project.

Report to minister after hearing

49(1) After conducting a hearing with respect to a proposed abatement project, the commission shall submit a written report to the minister setting out its recommendations with respect to the abatement project or any part of the proposal with respect thereto.

Action by minister respecting proposal

49(2) Upon receiving the report from the commission with respect to an abatement project under subsection (1), the minister may approve the abatement project in whole or in part or with such variations and subject to such terms and conditions as the minister deems advisable in the public interest or may refuse to approve the abatement project.

By-law for carrying out project

49(3) Where the minister approves an abatement project, the municipality may, by by-law, authorize the abatement project to be carried out within the municipality in accordance with the terms and conditions, variation, or other provisions of the approval of the minister.

Municipality may acquire lands for project

50(1) Where a municipality authorizes an abatement project to be carried out, if the approval of the minister included an approval for the acquisition of lands by the municipality for the purposes of relocation of a development or premises as part of the abatement project, the municipality may proceed to acquire the lands by purchase, expropriation or otherwise.

Application of Expropriation Act

50(2) Where a municipality takes proceedings to acquire lands for the purposes of an abatement project by expropriation, *The Expropriation Act* applies thereto; but notwithstanding any provision of that Act

- (a) the provisions of Schedule A of that Act pertaining to a hearing by an inquiry officer do not apply in respect of the expropriation; and
- (b) the owner of the land expropriated, intending in good faith to relocate in some other place, may elect to have due compensation payable by the municipality assessed on the basis of the reasonable cost of equivalent

reinstatement as provided by subsection 26(3) of that Act, and the due compensation shall be assessed accordingly, notwithstanding that the land may not be devoted to a purpose of such a nature that there is not general demand or market for land for that purpose.

Agreement by minister for abatement projects

51(1) With the approval of the Lieutenant Governor in Council, the minister may enter into an agreement with any municipality that intends to proceed with an abatement project.

Contents of agreement

51(2) An agreement entered into pursuant to subsection (1)

- (a) may set out the approved capital cost for the abatement project which may include the cost of acquiring the land and any interest on moneys advanced by any party as progress payments;
- (b) shall provide for the proportions in which the parties will contribute to the approved capital cost, which in the case of the province shall not exceed 50%;
- (c) shall provide that
 - (i) any moneys received from the sale, lease or other disposition of lands or buildings in the abatement project shall be shared between the parties to the agreement in the same proportions as the parties thereto share in the approved capital cost, and
 - (ii) where land acquired by the municipality pursuant to the abatement project is retained by the municipality the land shall be valued in the manner prescribed in the agreement and the retention of the land shall be deemed a sale of the land at a price equal to the value thereof and the deemed proceeds thereof shall be paid by the municipality and be shared in accordance with subclause (i);
- (d) may include as a condition precedent to any payment by the province that the municipality shall
 - (i) adopt such controls of the use of the land in the municipality, including zoning, building controls and standards of occupancy of buildings, and
 - (ii) have enacted such changes in any planning scheme, building controls or development plan affecting the municipality.

S.M. 2004, c. 42, s. 27.

Agreement between municipality and government

52 A municipality, if authorized to do so by a by-law passed by the council of the municipality, may enter into an agreement with the Government of Manitoba respecting any abatement project.

Borrowing by-law

53 Where a municipality enters into an agreement authorized under this Act, it may, by by-law

- (a) borrow moneys necessary to enable it to carry out the agreement;
- (b) issue debentures to secure money so borrowed;
- (c) assume as a debt of the municipality, and pay, in accordance with the terms of the agreement, any principal or interest payments which the municipality is obligated to pay under the agreement;

or do all or any of those things, and may impose special levies required to pay principal and interest payable on any debt incurred or debentures issued in accordance with this section.

Crown bound

54 The Crown and agents of the Crown are bound by this Act.

Water Resources Conservation Act takes precedence

54.1 This Act is subject to the provisions of *The Water Resources Conservation Act*.

S.M. 2000, c. 11, s. 7; S.M. 2005, c. 26, s. 43.

Reference in C.C.S.M.

55 This Act may be referred to as Chapter E125 in the *Continuing Consolidation of the Statutes of Manitoba*.

Repeal

56 *The Clean Environment Act*, being Chapter C130 in the *Continuing Consolidation of the Statutes of Manitoba* is repealed.

S.M. 1988-89, c. 13, s. 10.

Commencement of Act

57 This Act comes into force on a day fixed by proclamation.

NOTE: S.M. 1987-88, c. 26 was proclaimed in force March 31, 1988.

SCHEDULE (Section 40.1)

The Red River Valley Special Management Area, which is the land described in Plan No. 4298-2006, filed at the head office of Environmental Services of the Department of Conservation in Winnipeg

The Rural Municipality of Armstrong

The Rural Municipality of Bifrost and the Town of Arborg and the Village of Riverton

The Rural Municipality of Coldwell

The Rural Municipality of De Salaberry and the Village of St. Pierre-Jolys

The Rural Municipality of Eriksdale

The Rural Municipality of Fisher

The Rural Municipality of Gimli and the Town of Winnipeg Beach

The Rural Municipality of Grahamdale

The Rural Municipality of Hanover, the City of Steinbach and the Town of Niverville

The Rural Municipality of La Broquerie

The Rural Municipality of Rockwood and the Town of Teulon

The Rural Municipality of Rosser

The Rural Municipality of Siglunes

The Rural Municipality of Springfield

The Rural Municipality of St. Andrews and the Village of Dunnottar

The Rural Municipality of St. Clements

The Rural Municipality of St. Laurent

The Rural Municipality of Ste. Anne and the Town of Ste. Anne

The Rural Municipality of Tache

The Rural Municipality of Woodlands

The area legally described as follows:

All those portions of Townships 27, 28 and 29, Range 1 East of the Principal Meridian in Manitoba, Townships 28 and 29, Range 1 West of the Principal Meridian in Manitoba and Townships 26, 27, 28 and 29, Range 2 West of the Principal Meridian in Manitoba that are contained within the limits shown bordered hatched on Plan No. 4298-2008, filed at the head office of Environmental Services of the Department of Conservation in Winnipeg

S.M. 2008, c. 39, s. 4.

COMITÉ CONSULTATIF D'ACCREDITATION

11 Comité consultatif d'accréditation

All persons making use of this consolidation are reminded that it has no legislative sanction. Amendments have been inserted into the base regulation for convenience of reference only. The original regulation should be consulted for purposes of interpreting and applying the law. Only amending regulations which have come into force are consolidated. This regulation consolidates the following amendments: 162/2005; 52/2007.

Veillez noter que la présente codification n'a pas été sanctionnée par le législateur. Les modifications ont été apportées au règlement de base dans le seul but d'en faciliter la consultation. Le lecteur est prié de se reporter au règlement original pour toute question d'interprétation ou d'application de la loi. La codification ne contient que les règlements modificatifs qui sont entrés en vigueur. Le présent règlement regroupe les modifications suivantes : 162/2005; 52/2007.

CERTIFICATION OF OPERATORS

- 12 Classes of certificates
- 13 Certification process
- 14 Prior certification under voluntary program
- 15 Conditional certificate based on employment
- 16 Issuance of new certificate after examination
- 17 Fee for examination
- 18 When exams may be written
- 19 Other conditional operators' certificates
- 20 Renewal of certificates
- 21 Suspension or cancellation of certificates
- 22 Reciprocity with other jurisdictions

OPERATING REQUIREMENTS

- 23 Operators must be certified
- 24 Facility owner must file table of organization
- 25 Operators' certificates to be prominently displayed
- 26 Operator-in-charge
- 27 Supervising operator of field crew
- 28 Exemption re strike
- 29 Access to emergency response plan, etc.
- 30 In-service training
- 31 Record of operator-in-charge
- 32 Responsibilities of operator-in-charge
- 33 Operating records
- 34 Inspections

TRANSITIONAL PROVISIONS AND COMING INTO FORCE

- 35 Repealed
- 35.1 Transitional period re certain contraventions
- 36 Coming into force

SCHEDULES

ACCREDITATION DES EXPLOITANTS

- 12 Classes de certificats
- 13 Marche à suivre — accréditation
- 14 Accréditation antérieure
- 15 Certificat d'exploitant conditionnel
- 16 Délivrance d'un nouveau certificat
- 17 Droit d'examen
- 18 Examen d'accréditation — échec
- 19 Autres certificats conditionnels
- 20 Renouvellement d'un certificat
- 21 Suspension ou annulation
- 22 Accords de réciprocité

NORMES D'EXPLOITATION

- 23 Accréditation obligatoire
- 24 Dépôt d'un organigramme
- 25 Affichage des certificats d'exploitants
- 26 Exploitant en chef
- 27 Exploitant surveillant
- 28 Exemption en cas de grève
- 29 Plan d'action en cas d'urgence
- 30 Formation en cours d'emploi
- 31 Dossiers sur l'exploitant en chef

DISPOSITION TRANSITOIRE ET ENTRÉE EN VIGUEUR

- 35 Abrogé
- 35.1 Période de transition
- 36 Entrée en vigueur

ANNEXES

DEFINITIONS

Definitions

1 In this regulation,

"**Act**" means *The Environment Act*; (« *Loi* »)

"**Bachelor of Science graduate**" means a graduate of a science program from an accredited university; (« bachelier ès sciences »)

"**certified engineering technologist**" means a certified engineering technologist as defined in *The Certified Applied Science Technologists Act*; (« technologue agréé en ingénierie »)

"**commercial premises**" means premises that are not private residences, but does not include

- (a) schools and day care centres,
- (b) hospitals, personal care homes and residential care facilities,
- (c) trailer and mobile home parks,
- (d) recreational camps and campgrounds,
- (e) recreational centres and arenas,
- (f) hotels, resorts, lodges, hostels, and bed and breakfasts,
- (g) apartment buildings,
- (h) restaurants and other food handling establishments,
- (i) community drinking water loading stations, and
- (j) any premises that the director designates as being excluded from commercial premises; (« établissement commercial »)

"**director**" means the director to whom the minister assigns responsibility for this regulation; (« directeur »)

DÉFINITIONS

Définitions

1 Les définitions qui suivent s'appliquent au présent règlement.

« **agent du Service de l'eau potable** » Personne nommée à ce titre en vertu de la *Loi sur la qualité de l'eau potable*. ("drinking water officer")

« **apprenti exploitant** » Personne qui n'est pas titulaire d'un certificat d'exploitant parce qu'elle ne possède pas l'expérience voulue, n'a pas la formation scolaire demandée ou n'a pas réussi à l'examen exigé. ("operator-in-training")

« **bachelier ès sciences** » Titulaire d'un baccalauréat ès sciences d'une université reconnue. ("Bachelor of Science graduate")

« **directeur** » Le directeur chargé par le ministre de l'application du présent règlement. ("director")

« **dispositif privé d'évacuation des eaux** »

a) Dispositif d'évacuation des eaux usées qui recueille les eaux usées domestiques d'une seule résidence privée;

b) installation que le directeur désigne, en vertu du paragraphe 2(4), à titre de dispositif privé d'évacuation des eaux bien qu'elle recueille les eaux usées domestiques d'un établissement commercial ou de plus d'une résidence privée. ("private wastewater system")

« **établissement commercial** » Établissement qui n'est pas une résidence privée. Sont également exclus de la présente définition :

a) les écoles et les garderies;

b) les hopitaux, les foyers de soins personnels et les établissements de soins en résidence;

c) les parcs pour remorques et maisons mobiles;

d) les camps de loisirs et les terrains de camping;

"**domestic purposes**", in relation to water, means the use of water for drinking, washing dishes or food handling, or the supply of water to drinking fountains, kitchen sinks, washbasins, baths or showers; (« fins domestiques »)

"**drinking water officer**" means a drinking water officer appointed under *The Drinking Water Safety Act*; (« agent du Service de l'eau potable »)

"**facility**" means a wastewater collection facility, wastewater treatment facility, water distribution facility or water treatment facility; (« installation »)

"**operator**" means a person

(a) who adjusts, inspects or evaluates a process that controls the effectiveness or efficiency of a water treatment or wastewater treatment facility,

(b) who adjusts or directs the flow, pressure or quality of the water within a water distribution facility, or

(c) who adjusts or directs the flow, pressure or quality of the wastewater within a wastewater collection facility; (« exploitant »)

"**operator-in-charge**" means an operator who

(a) has responsibility for the overall operation of a facility,

(b) sets operational parameters for a facility or for a process that controls the effectiveness or efficiency of a facility, or

(c) directs or supervises operators in a facility; (« exploitant en chef »)

"**operator-in-training**" means an operator who has not acquired the necessary experience, attained the required academic achievement or passed the required examination to qualify for an operator's certificate; (« apprenti exploitant »)

"**private wastewater system**" means

(a) a wastewater system that receives domestic wastewater from only one private residence, and

e) les centres récréatifs et les arénas;

f) les hôtels, les centres de villégiature, les hôtels à pavillons, les auberges et les gîtes touristiques;

g) les immeubles d'habitation;

h) les restaurants et les autres établissements de manutention des aliments;

i) les stations communautaires de chargement de l'eau potable;

j) les établissements que le directeur exclut des établissements commerciaux. ("commercial premises")

« **exploitant** » Personne qui, selon le cas :

a) règle, surveille ou évalue les procédés permettant de contrôler l'efficacité d'une installation de traitement d'eau ou des eaux usées;

b) règle le débit, la pression ou la qualité de l'eau d'une installation de distribution d'eau;

c) règle le débit, la pression ou la qualité des eaux usées d'une installation de collecte des eaux usées. ("operator")

« **exploitant en chef** » Exploitant qui, selon le cas :

a) est chargé de l'exploitation globale d'une installation;

b) établit les paramètres de fonctionnement d'une installation ou d'un procédé permettant de contrôler l'efficacité d'une installation;

c) dirige ou supervise les autres exploitants d'une installation. ("operator-in-charge")

« **fins domestiques** » Utilisation de l'eau pour la boire, pour laver la vaisselle, pour manipuler les aliments ou pour alimenter les fontaines à boire, les évier de cuisine, les lavabos, les lave-mains, les baignoires et les douches. ("domestic purposes")

(b) a facility that, despite receiving domestic wastewater from a commercial premises or from more than one private residence, the director designates as a private wastewater system under subsection 2(4); (« dispositif privé d'évacuation des eaux »)

"**private water system**" means

(a) a water system that supplies potable water for domestic purposes to only one private residence, and

(b) a facility that, despite supplying potable water for domestic purposes to a commercial premises or to more than one private residence, the director designates as a private water system under subsection 2(3); (« réseau privé d'alimentation en eau »)

"**professional engineer**" means a professional engineer as defined in *The Engineering and Geoscientific Professions Act*; (« ingénieur »)

"**public health inspector**" means a public health inspector appointed under *The Public Health Act*; (« inspecteur d'hygiène publique »)

"**wastewater collection facility**" means a sewer and pumping system used for the collection and conveyance of domestic, commercial or industrial wastewater, but does not include

(a) the wastewater treatment facility to which the collection facility conveys wastewater for treatment, or

(b) a private wastewater system; (« installation de collecte des eaux usées »)

"**wastewater treatment facility**" means a facility for the treatment or disposal of domestic, commercial or industrial wastewater or of sludge, and includes the land on which the facility is located and the structures, systems, devices and equipment comprising the facility, but does not include a wastewater collection facility or private wastewater system; (« installation de traitement des eaux usées »)

« **ingénieur** » Ingénieur au sens de la *Loi sur les ingénieurs et les géoscientifiques*. ("professional engineer")

« **inspecteur d'hygiène publique** » Personne nommée à ce titre en vertu de la *Loi sur la santé publique*. ("public health inspector")

« **installation** » Installation de collecte des eaux usées, de traitement des eaux usées, de distribution d'eau ou de traitement d'eau. ("facility")

« **installation de collecte des eaux usées** » Réseau d'égouts et poste de pompage utilisé pour la collecte et l'acheminement des eaux usées domestiques, commerciales et industrielles. La présente définition exclut :

a) l'installation de traitement des eaux usées vers laquelle sont acheminées les eaux usées;

b) les dispositifs privés d'évacuation des eaux. ("wastewater collection facility")

« **installation de distribution d'eau** » Partie des ouvrages d'adduction d'eau qui fournit ou distribue de l'eau potable. Sont exclus de la présente définition :

a) la partie des ouvrages qui produit de l'eau potable ou qui recueille ou traite de l'eau pour la rendre potable;

b) les réseaux privés d'alimentation en eau. ("water distribution facility")

« **installation de traitement d'eau** » Partie des ouvrages d'adduction d'eau qui produit de l'eau potable ou qui recueille ou traite de l'eau pour la rendre potable. Sont exclus de la présente définition :

a) la partie des ouvrages qui fournit ou distribue de l'eau potable;

b) les réseaux privés d'alimentation en eau. ("water treatment facility")

"water distribution facility" means the part of a water works that supplies or distributes potable water, but does not include

(a) the part of the water works that produces potable water or collects or treats water to make it potable, or

(b) a private water system; (« installation de distribution d'eau »)

"water treatment facility" means the part of a water works that produces potable water or collects or treats water to make it potable, but does not include

(a) the part of the water works that supplies or distributes potable water, or

(b) a private water system; (« installation de traitement d'eau »)

"water works" means equipment or devices used for the production and supply of potable water, or the collection of water to make it potable, and includes a structure in which they are located or from which they are operated or controlled. (« ouvrages d'adduction d'eau »)

M.R. 162/2005

« installation de traitement des eaux usées »
Installation de traitement ou d'élimination des boues ainsi que des eaux usées domestiques, commerciales ou industrielles, y compris le bien-fonds où se trouve l'installation de même que les constructions, les systèmes, les appareils et le matériel qui la composent. La présente définition exclut les installations de collecte des eaux usées et les dispositifs privés d'évacuation des eaux. ("wastewater treatment facility")

« Loi » La Loi sur l'environnement. ("Act")

« ouvrages d'adduction d'eau » Matériel ou appareils servant à la production d'eau potable et à l'alimentation en eau potable ou à la collecte d'eau en vue de la rendre potable. La présente définition inclut la construction qui abrite le matériel ou les appareils ou à partir de laquelle ils sont exploités. ("water works")

« réseau privé d'alimentation en eau »

a) Réseau d'alimentation en eau qui fournit de l'eau potable, à des fins domestiques, à une seule résidence privée;

b) installation que le directeur désigne, en vertu du paragraphe 2(3), à titre de réseau privé bien qu'elle fournisse de l'eau potable, à des fins domestiques, à un établissement commercial ou à plus d'une résidence privée. ("private water system")

« technologue agréé en ingénierie »
Technologue agréé en ingénierie au sens de la *Loi sur les technologues agréés en sciences appliquées*. ("certified engineering technologist")

R.M. 162/2005

CLASSIFICATION OF FACILITIES

Classification of facilities

2(1) For the purposes of this regulation, water and wastewater facilities are categorized into the following categories:

(a) water distribution facilities;

(b) water treatment facilities;

CLASSIFICATION DES INSTALLATIONS

Classification des installations

2(1) Pour l'application du présent règlement, les installations de traitement d'eau et des eaux usées font partie des catégories suivantes :

a) installations de distribution d'eau;

b) installations de traitement d'eau;

(c) wastewater collection facilities;

(d) wastewater treatment facilities.

2(2) Within each category set out in subsection (1), facilities are classified into the following classes on the basis of the criteria set out in Schedule A:

(a) small system;

(b) class 1;

(c) class 2;

(d) class 3;

(e) class 4.

2(3) After a request from the owner of a facility that supplies potable water for domestic purposes to a commercial premises or to more than one private residence, the director may designate the system as a private water system.

2(4) After a request from the owner of a facility that receives domestic wastewater from a commercial premises or from more than one private residence, the director may designate the system as a private wastewater system.

2(5) The director may make a designation under subsection (3) or (4) if

(a) the facility's designed maximum daily capacity is less than 10,000 L; and

(b) the director considers that the circumstances in which the designation is requested are of such a special and unusual character that it is not in the public interest to refuse to make the designation.

2(6) For the purposes of the definition "commercial premises" in section 1, the director may designate a premises or class of premises as being excluded from the definition.

c) installations de collecte des eaux usées;

d) installations de traitement des eaux usées.

2(2) Les catégories énoncées au paragraphe (1) sont subdivisées en classes établies en fonction des critères figurant à l'annexe A. Ces classes sont les suivantes :

a) petit réseau;

b) classe 1;

c) classe 2;

d) classe 3;

e) classe 4.

2(3) À la suite d'une demande en ce sens de la part du propriétaire d'une installation qui fournit, à des fins domestiques, de l'eau potable à un établissement commercial ou à plus d'une résidence privée, le directeur peut désigner l'installation à titre de réseau privé d'alimentation en eau.

2(4) À la suite d'une demande en ce sens de la part du propriétaire d'une installation qui recueille les eaux usées domestiques d'un établissement commercial ou de plus d'une résidence privée, le directeur peut désigner l'installation à titre de dispositif privé d'évacuation des eaux.

2(5) Le directeur peut faire la désignation prévue au paragraphe (3) ou (4) :

a) si l'installation a une capacité maximale de moins de 10 000 l par jour;

b) s'il est d'avis que les circonstances de la demande sont particulières et inhabituelles à un point tel qu'il est dans l'intérêt du public d'accéder à cette demande.

2(6) Le directeur commercial peut exclure de la définition d'« établissement commercial » énoncée à l'article 1 un établissement ou une catégorie d'établissements.

Definitions of "existing facility" and "new facility"

3 In this section and in sections 4 and 5,

"**existing facility**" means a facility that starts operating before September 1, 2003 and is in continuous regular operation until its owner applies for classification under this section or is required to apply under clause 5(1)(a), whichever occurs earlier; (« installation existante »)

"**new facility**" means a facility that is not an existing facility. (« nouvelle installation »)

Prohibition on operating unclassified facility

4(1) Subject to section 6, no person shall operate, or allow the operation of, a facility which does not have a current classification certificate issued under section 5.

4(2) No person shall be charged under section 31 of the Act for contravening subsection (1) in respect of an existing facility unless the contravention is committed more than 90 days after the day on which the person is required by subsection 5(1) to apply for classification of the facility.

Classification process

5(1) Subject to section 6, the owner of a facility who wishes to have the facility classified shall

(a) if the facility is in operation on or before December 31, 2005, make an application to the director on or before January 3, 2006; or

(b) if the facility is in operation on or after January 1, 2006, make an application to the director before the facility starts operating.

M.R. 162/2005

5(2) The application must be in a form acceptable to the director and include or be accompanied by the information the director requires.

5(3) The director may require the owner to provide any further information that the director considers to be necessary.

Définitions

3 Les définitions qui suivent s'appliquent au présent article ainsi qu'aux articles 4 et 5.

« **installation existante** » Installation dont l'exploitation commence avant le 1^{er} septembre 2003 et se poursuit de façon normale et continue jusqu'à ce que le propriétaire présente une demande de classification en vertu du présent article ou soit tenu d'en présenter une en vertu de l'alinéa 5(1)a), selon la première éventualité. ("existing facility")

« **nouvelle installation** » Installation qui n'est pas une installation existante. ("new facility")

Interdiction

4(1) Sous réserve de l'article 6, il est interdit d'exploiter ou d'autoriser l'exploitation d'une installation qui n'est pas visée par un certificat de classification valide délivré en vertu de l'article 5.

4(2) Aucune accusation relative à une infraction prévue à l'article 31 de la Loi ne peut être portée contre une personne qui enfreint le paragraphe (1) à l'égard d'une installation existante à moins que l'infraction n'ait lieu plus de 90 jours après la date où cette personne est tenue de présenter une demande de classification conformément au paragraphe 5(1).

Marche à suivre — classification

5(1) Sous réserve de l'article 6, le propriétaire qui désire faire classer une installation :

a) présente une demande au directeur au plus tard le 3 janvier 2006 si elle est en exploitation le 31 décembre 2005 ou avant cette date;

b) présente une demande au directeur avant le début de l'exploitation si celle-ci a lieu le 1^{er} janvier 2006 ou après cette date.

R.M. 162/2005

5(2) La demande est présentée en la forme que le directeur juge acceptable et comprend les renseignements dont il a besoin ou est accompagnée de ces renseignements.

5(3) Le directeur peut exiger du propriétaire les renseignements supplémentaires qu'il estime nécessaires.

5(4) Once he or she has received a satisfactory application and all the required information, the director shall categorize and classify the facility, and issue a classification certificate to the owner.

5(5) The director may refuse to issue a classification certificate if the application does not meet the requirements of this section or if the owner fails to provide the director with information that he or she requires.

5(6) A classification certificate expires five years after it is issued.

Deemed classification of certain facilities

6(1) A facility that was classified before May 1, 2004 under the Manitoba Water and Wastewater Association Voluntary Certification Program will be deemed to have been categorized and classified in the corresponding facility category and class under this regulation for a three-year period after that date. This is subject to the facility's owner providing the director with copies of the original completed classification application form and the certificate of classification on or before that date.

M.R. 162/2005

6(2) The owner of such a facility does not have to file an application under section 5 if he or she complies with subsection (1). In such a case, the facility will be deemed to have a current classification certificate for the purposes of subsection 4(1) for the three-year period mentioned in subsection (1).

6(3) Subsection (1) does not apply to a facility unless its owner requested that the facility be certified under the Manitoba Water and Wastewater Association Voluntary Certification Program before June 13, 2003.

M.R. 162/2005

Classification certificate to be displayed

7 The owner of a facility shall ensure that the facility's classification certificate is conspicuously displayed at the facility or, if that is not practicable, at the premises from which the facility's operations are managed.

5(4) Une fois qu'il a reçu une demande satisfaisante ainsi que les renseignements dont il a besoin, le directeur établit la catégorie et la classe de l'installation et délivre au propriétaire un certificat de classification.

5(5) Le directeur peut refuser de délivrer un certificat de classification si la demande n'est pas conforme aux exigences du présent article ou si le propriétaire ne lui fournit pas les renseignements dont il a besoin.

5(6) Le certificat de classification expire cinq années après sa délivrance.

Classification réputée

6(1) Une installation classifiée avant le 1^{er} mai 2004 conformément au programme d'accréditation volontaire de la Manitoba Water and Wastewater Association est réputée faire partie, pendant une période de trois ans après cette date, de la catégorie et de la classe d'installation correspondantes établies en vertu du présent règlement. Ce qui précède ne s'applique toutefois que si le propriétaire de l'installation fournit au directeur, au plus tard à cette date, des copies de la demande originale de classification dûment remplie et du certificat de classification.

R.M. 162/2005

6(2) Le propriétaire qui se conforme au paragraphe (1) n'est pas tenu de déposer une demande en vertu du paragraphe (5). Pour l'application du paragraphe 4(1), l'installation est réputée être visée par un certificat valide pendant la période de trois ans mentionnée au paragraphe (1).

6(3) Le paragraphe (1) s'applique uniquement aux installations dont les propriétaires ont demandé l'accréditation en vertu du programme d'accréditation volontaire de la Manitoba Water and Wastewater Association avant le 13 juin 2003.

R.M. 162/2005

Affichage du certificat

7 Le propriétaire d'une installation fait en sorte que le certificat de classification soit affiché dans un endroit bien en vue de cette installation ou, si cela est peu pratique, des locaux où l'on gère l'exploitation de l'installation.

Renewal of classification

8(1) If the owner of a facility that has been categorized and classified under this regulation wishes to continue to operate it after the expiration of its classification certificate, he or she must apply to the director for a renewal of the certificate.

8(2) The application must be in a form acceptable to the director and include or be accompanied by the information the director requires.

8(3) The director may require the owner to provide any further information that the director considers to be necessary.

8(4) An application for renewal must be filed 90 days before the expiration of the certificate that the owner is seeking to renew.

8(5) If the application is filed by that time, the certificate that the owner is seeking to renew shall be deemed to continue until the director issues a new classification certificate.

8(6) Once he or she has received a satisfactory renewal application and all the required information, the director shall issue a new classification certificate to the owner.

8(7) The director may refuse to issue a new classification certificate if the renewal application does not meet the requirements of this section or if the applicant fails to provide the director with information that he or she requires.

8(8) A classification certificate issued under this section expires five years after it is issued.

8(9) This section applies with necessary changes to the renewal of

(a) the categorization and classification of a facility which is deemed to have a classification certificate by section 6; and

(b) a renewed classification certificate that is issued under this section.

Renouvellement — certificat de classification

8(1) Le propriétaire d'une installation faisant partie d'une catégorie et d'une classe établies en vertu du présent règlement qui désire poursuivre l'exploitation de l'installation après l'expiration du certificat de classification présente une demande de renouvellement au directeur.

8(2) La demande est déposée en la forme que le directeur juge acceptable et comprend les renseignements dont il a besoin ou est accompagnée de ces renseignements.

8(3) Le directeur peut exiger du propriétaire les renseignements supplémentaires qu'il estime nécessaires.

8(4) Les demandes de renouvellement sont déposées dans les 90 jours précédant l'expiration du certificat.

8(5) Dans la mesure où une demande est déposée dans le délai imparti, le certificat du propriétaire est réputé demeurer en vigueur jusqu'à la délivrance d'un nouveau certificat de classification.

8(6) Une fois qu'il a reçu une demande de renouvellement satisfaisante ainsi que les renseignements dont il a besoin, le directeur délivre un nouveau certificat de classification au propriétaire.

8(7) Le directeur peut refuser de délivrer un nouveau certificat de classification si la demande n'est pas conforme aux exigences du présent article ou si le propriétaire ne lui fournit pas les renseignements dont il a besoin.

8(8) Le certificat de classification délivré en vertu du présent article expire cinq années après sa délivrance.

8(9) Le présent article s'applique, avec les adaptations nécessaires, au renouvellement :

a) de la catégorie et de la classe d'une installation qui est réputée être visée par un certificat de classification en vertu de l'article 6;

b) d'un certificat de classification renouvelé délivré en vertu du présent article.

Reclassification on renewal or otherwise

9(1) The director may recategorize or reclassify a facility if he or she believes that the facility's existing categorization or classification is incorrect

(a) on the basis of the information that he or she receives in connection with an application for renewal of a classification certificate; or

(b) on the basis of information that he or she becomes aware of at any time.

9(2) The director may recategorize or reclassify a facility if this regulation is amended in such a manner that the facility's categorization or classification at the time no longer complies with this regulation's requirements.

9(3) If the director recategorizes or reclassifies a facility in connection with an application to renew its classification certificate, he or she may issue a new classification certificate that reflects the facility's new category or class. Such a classification certificate expires five years after it is issued.

9(4) If the director recategorizes or reclassifies a facility at any other time, he or she may issue an amended classification certificate that reflects the facility's new category or class. Such a classification certificate expires at the same time as the certificate that it amends.

Alterations, expansions, etc.

10(1) If the owner of a facility that has been categorized and classified under this regulation, or that has been deemed to have been categorized and classified, intends to alter or expand it and the alteration or expansion will or may affect any of the items in Schedule A by which the facility may be rated, the owner must apply for a recategorization or reclassification of the facility before proceeding with the alteration or expansion.

10(2) Subsections 5(2) to (6) apply with necessary changes to applications for recategorization or reclassification under this section.

Reclassification

9(1) Le directeur peut changer une installation de catégorie ou de classe s'il est d'avis que l'une ou l'autre sont inexactes :

a) à la lumière de renseignements reçus à l'égard d'une demande de renouvellement de certificat de classification;

b) à la lumière de renseignements dont il prend connaissance à n'importe quel moment.

9(2) Le directeur peut changer une installation de catégorie ou de classe si le présent règlement est modifié et que la catégorie ou la classe n'est alors plus conforme aux exigences du présent règlement.

9(3) S'il change la catégorie ou la classe d'une installation à la suite de la présentation d'une demande de renouvellement de certificat de classification, le directeur peut délivrer un nouveau certificat faisant état de la modification apportée à la catégorie ou à la classe. Ce certificat expire cinq années après sa délivrance.

9(4) S'il change la catégorie ou la classe d'une installation à un autre moment, le directeur peut délivrer un certificat de classification modifié faisant état du changement. Ce certificat expire en même temps que celui qu'il modifie.

Modifications et agrandissement

10(1) Le propriétaire d'une installation faisant partie d'une catégorie ou d'une classe en vertu du présent règlement ou réputée en faire partie qui a l'intention de modifier ou d'agrandir son installation d'une manière qui aura ou pourrait avoir une incidence sur les critères d'évaluation énoncés à l'annexe A demande que le directeur procède de nouveau à l'établissement d'une catégorie ou d'une classe avant le début des travaux.

10(2) Les paragraphes 5(2) à (6) s'appliquent, avec les adaptations nécessaires, aux demandes d'établissement de nouvelles catégories ou classes présentées en vertu du présent article.

CERTIFICATION ADVISORY COMMITTEE

COMITÉ CONSULTATIF D'ACCREDITATION

Certification advisory committee

11(1) Where the minister appoints a certification advisory committee under section 5 of the Act,

- (a) the committee shall
 - (i) consist of at least three but not more than seven persons who, in the minister's opinion, have experience with the regulation, management or operation of water or wastewater facilities, and
 - (ii) among those persons, have representation from operators, owners and regulatory agencies;
- (b) the minister shall appoint a committee chair from among the committee's members;
- (c) the members of the committee shall be appointed for three-year terms, and the terms shall be staggered; and
- (d) the committee shall meet quarterly and at the call of the chair, to provide the minister with its advice and assistance on the following items:
 - (i) applications for certification,
 - (ii) applications for certification renewal,
 - (iii) evaluation of specific training or education programs or courses with respect to the certification of operators,
 - (iv) administration of this regulation as it relates to the certification of operators.

11(2) The minister may direct the committee to provide the advice and assistance referred to in clause (1)(d) to the director.

Comité consultatif d'accréditation

11(1) Les dispositions qui suivent s'appliquent au Comité consultatif d'accréditation que nomme, le cas échéant, le ministre en vertu de l'article 5 de la *Loi*.

- a) Le Comité :
 - (i) est composé d'un minimum de trois membres et d'un maximum de sept qui, de l'avis du ministre, s'y connaissent en matière de réglementation, de gestion ou d'exploitation d'installations de traitement d'eau ou des eaux usées,
 - (ii) regroupe des représentants des exploitants, des propriétaires et des organismes de réglementation;
- b) le ministre nomme un président parmi les membres du Comité;
- c) les mandats des membres du Comité sont de trois ans et sont échelonnés;
- d) le Comité tient des réunions trimestrielles et sur convocation du président, et donne des conseils et offre de l'aide au ministre en ce qui concerne :
 - (i) les demandes d'accréditation,
 - (ii) les demandes de renouvellement d'accréditation,
 - (iii) l'évaluation de programmes de formation ou d'éducation et de cours précis en vue de l'accréditation des exploitants,
 - (iv) l'application du présent règlement en matière d'accréditation des exploitants.

11(2) Le ministre peut ordonner au Comité de donner au directeur l'aide et les conseils prévus à l'alinéa (1)d).

CERTIFICATION OF OPERATORS

ACCREDITATION DES EXPLOITANTS

Classes of certificates

12 For each category of facility, there shall be six classes of operator's certificate:

- (a) operator-in-training;
- (b) small system;
- (c) class 1;
- (d) class 2;
- (e) class 3;
- (f) class 4.

Certification process

13(1) A person who wishes to obtain an operator's certificate must

- (a) make an application to the director in a form acceptable to the director, including or accompanied by the information the director requires; and
- (b) pay the applicable fee set out in Schedule C when the application is made.

13(2) The director may require the person to provide any further information that the director considers to be necessary.

13(3) Once he or she has received a satisfactory application and all the required information, the director may issue an operator's certificate if he or she is satisfied

- (a) that the applicant meets the criteria for that category and class of certificate, if any, set out in Schedule B; and
- (b) that the applicant is otherwise qualified to receive the certificate applied for.

13(4) The director may refuse to issue an operator's certificate.

Classes de certificats

12 Pour chaque catégorie d'installations, il existe six classes de certificats d'exploitants :

- a) apprentis exploitants;
- b) petits réseaux;
- c) classe 1;
- d) classe 2;
- e) classe 3;
- f) classe 4.

Marche à suivre — accréditation

13(1) La personne qui désire obtenir un certificat d'exploitant :

- a) présente une demande au directeur en la forme que ce dernier juge acceptable et y inclut ou y joint les renseignements dont ce dernier a besoin;
- b) paie le droit que prévoit l'annexe C au moment de la présentation de la demande.

13(2) Le directeur peut exiger de l'auteur de la demande les renseignements supplémentaires qu'il estime nécessaires.

13(3) Une fois qu'il a reçu une demande satisfaisante ainsi que les renseignements dont il a besoin, le directeur peut délivrer un certificat d'exploitant s'il est convaincu :

- a) que l'auteur de la demande satisfait aux critères fixés pour la catégorie et la classe de certificat qui figurent, le cas échéant, à l'annexe B;
- b) que l'auteur de la demande possède par ailleurs les compétences voulues pour être titulaire du certificat.

13(4) Le directeur peut refuser de délivrer un certificat d'exploitant.

13(5) Without limiting the generality of subsection (4), the director may refuse to issue an operator's certificate to a person

- (a) who previously held an operator's certificate that was cancelled; or
- (b) who holds a certificate for which grounds for suspension or cancellation exist.

13(6) An operator's certificate expires five years after it is issued. Operators' certificates issued under subsection (3) may be renewed in accordance with section 20, other than operator-in-training certificates. Operator-in-training certificates are not renewable.

Prior certification under voluntary program

14(1) Despite subsection 13(1) and clause 13(3)(a), a person who was certified as an operator before May 1, 2004 under the Manitoba Water and Wastewater Association Voluntary Certification Program, based on an operators' examination acceptable to the director, and who wishes to obtain an operator's certificate on the basis of that voluntary certification must, on or before January 3, 2006,

- (a) make an application to the director in a form acceptable to the director, including or accompanied by the information that the director requires; and
- (b) provide the director with
 - (i) copies of the original completed classification application form and classification certificate for the facility in respect of which he or she was certified, and
 - (ii) a certified mark statement and his or her voluntary certification program operator's certificate.

M.R. 162/2005

13(5) Sans préjudice de la portée générale du paragraphe (4), le directeur peut refuser de délivrer un certificat d'exploitant à une personne :

- a) qui était titulaire d'un certificat d'exploitant qui a été annulé;
- b) s'il existe des motifs d'annulation ou de suspension du certificat qu'elle détient.

13(6) Le certificat d'exploitant expire cinq années après sa délivrance. Le certificat délivré en application du paragraphe (3) peut être renouvelé conformément à l'article 20. Le certificat d'apprenti exploitant n'est toutefois pas renouvelable.

Accréditation antérieure

14(1) Malgré le paragraphe 13(1) et l'alinéa 13(3)a), les personnes accréditées à titre d'exploitants avant le 1^{er} mai 2004, conformément au programme d'accréditation volontaire de la Manitoba Water and Wastewater Association, à la suite d'un examen que le directeur jugeait acceptable et qui, compte tenu de leur accréditation volontaire, désirent obtenir un certificat d'exploitant se conforment aux conditions qui suivent au plus tard le 3 janvier 2006 :

- a) présenter une demande au directeur en la forme que ce dernier juge acceptable et y inclure ou y joindre les renseignements dont ce dernier a besoin;
- b) fournir au directeur :
 - (i) des copies de la demande originale de classification dûment remplie et du certificat de classification de l'installation à l'égard de laquelle elles ont obtenu une accréditation,
 - (ii) un relevé de notes certifié conforme et le certificat d'exploitant obtenu dans le cadre du programme d'accréditation volontaire.

R.M. 162/2005

14(2) Despite subsection 13(1) and clause 13(3)(a), a person who was certified as an operator before May 1, 2004 under the Manitoba Water and Wastewater Association Voluntary Certification Program, based on academic achievement and experience only, and who wishes to obtain a conditional operator's certificate on the basis of that voluntary certification must, on or before January 3, 2006,

(a) make an application to the director in a form acceptable to the director, including or accompanied by the information that the director requires; and

(b) provide the director with

(i) copies of the original completed classification application form and classification certificate for the facility in respect of which he or she was certified, and

(ii) his or her voluntary certification program operator's certificate.

M.R. 162/2005

14(3) The director may require a person who applies under subsection (1) or (2) to provide any further information that the director considers to be necessary.

14(4) Once the director has received a satisfactory application and all the required information and if he or she is satisfied that the applicant is qualified to receive the certificate applied for, the director may

(a) if the application is under subsection (1), issue an operator's certificate to the applicant;

(b) if the application is under subsection (2), issue a conditional operator's certificate to the applicant that is subject to the following conditions:

(i) that it only authorizes the holder to operate the facility in respect of which it is issued,

(ii) that it is not transferable to another facility, and

(iii) that it is not renewable.

14(2) Malgré le paragraphe 13(1) et l'alinéa 13(3)a), les personnes accréditées à titre d'exploitants avant le 1^{er} mai 2004, conformément au programme d'accréditation volontaire de la Manitoba Water and Wastewater Association, en raison uniquement de leur formation scolaire et de leur expérience, et qui, compte tenu de leur accréditation volontaire, désirent obtenir un certificat d'exploitant conditionnel se conforment aux conditions qui suivent au plus tard le 3 janvier 2006 :

a) présenter une demande au directeur en la forme que ce dernier juge acceptable et y inclure ou y joindre les renseignements dont il a besoin;

b) fournir au directeur :

(i) des copies de la demande originale de classification dûment remplie et du certificat de classification de l'installation à l'égard de laquelle elles ont obtenu une accréditation,

(ii) le certificat d'exploitant obtenu dans le cadre du programme d'accréditation volontaire.

R.M. 162/2005

14(3) Le directeur peut exiger des personnes qui présentent une demande en vertu du paragraphe (1) ou (2) les renseignements supplémentaires qu'il estime nécessaires.

14(4) Une fois qu'il a reçu une demande satisfaisante ainsi que les renseignements dont il a besoin et qu'il est convaincu que l'auteur de la demande a les compétences nécessaires pour obtenir le certificat, le directeur peut :

a) si la demande est présentée en vertu du paragraphe (1), délivrer un certificat d'exploitant;

b) si la demande est présentée en vertu du paragraphe (2), délivrer un certificat d'exploitant conditionnel assorti des conditions suivantes :

(i) le titulaire n'est autorisé à exploiter que l'installation que vise le certificat,

(ii) le certificat ne peut être transféré afin de viser une autre installation,

(iii) le certificat ne peut être renouvelé.

14(5) The director may refuse to issue an operator's certificate or a conditional operator's certificate under this section.

14(6) An operator's certificate issued under clause (4)(a) expires five years after it is issued and may be renewed in accordance with section 20.

14(7) A conditional operator's certificate issued under clause (4)(b) expires on the expiry date set out in the certificate, which shall not be later than five years after the certificate is issued.

M.R. 162/2005

Conditional certificate based on employment

15(1) Despite subsection 13(1) and clause 13(3)(a), a person who is employed at a facility as an operator on January 1, 2006 and who wishes to obtain a conditional operator's certificate on the basis of that employment must

- (a) make an application to the director in a form acceptable to the director, including or accompanied by the information that the director requires;
- (b) pay the applicable fee set out in Schedule C when the application is made; and
- (c) provide the director with evidence of the employment acceptable to the director.

M.R. 162/2005

15(2) The director may require a person who applies under subsection (1) to provide any further information that the director considers to be necessary.

15(3) Once the director has received a satisfactory application and all the required information and if he or she is satisfied that the applicant meets the employment requirements of this section, the director may issue a conditional operator's certificate that is subject to the following conditions:

- (a) that it only authorizes the holder to operate the facility in respect of which it is issued;
- (b) that it is not transferable to another facility; and
- (c) that it is not renewable.

14(5) Le directeur peut refuser de délivrer un certificat d'exploitant ou d'exploitant conditionnel en vertu du présent article.

14(6) Le certificat d'exploitant délivré en vertu de l'alinéa (4)a) expire cinq années après sa délivrance et peut être renouvelé conformément à l'article 20.

14(7) Le certificat d'exploitant conditionnel délivré en vertu de l'alinéa (4)b) expire à la date qui y est précisée. Cette date tombe au plus tard cinq ans après celle de la délivrance.

R.M. 162/2005

Certificat d'exploitant conditionnel

15(1) Malgré le paragraphe 13(1) et l'alinéa 13(3)a), la personne qui travaille à titre d'exploitant d'une installation le 1^{er} janvier 2006 et qui désire obtenir un certificat d'exploitant conditionnel compte tenu de son emploi :

- a) présente une demande au directeur en la forme que ce dernier juge acceptable et y inclut ou y joint les renseignements dont il a besoin;
- b) paie le droit que prévoit l'annexe C au moment de la présentation de la demande;
- c) prouve au directeur, d'une manière que ce dernier juge acceptable, qu'il travaille à titre d'exploitant.

R.M. 162/2005

15(2) Le directeur peut exiger de la personne qui présente une demande en vertu du paragraphe (1) les renseignements supplémentaires qu'il estime nécessaires.

15(3) Une fois qu'il a reçu une demande satisfaisante ainsi que les renseignements dont il a besoin et qu'il est convaincu que l'auteur de la demande satisfait aux critères d'emploi du présent article, le directeur peut délivrer un certificat d'exploitant conditionnel assorti des conditions suivantes :

- a) le titulaire n'est autorisé à exploiter que l'installation que vise le certificat;
- b) le certificat ne peut être transféré afin de viser une autre installation;
- c) le certificat ne peut être renouvelé.

15(4) The director may refuse to issue an operator's certificate or a conditional operator's certificate under this section.

15(5) A conditional operator's certificate issued under this section expires three years after it is issued.

Issuance of new certificate after examination

16(1) If before the expiration of a conditional operator's certificate issued under clause 14(4)(b) or subsection 15(3) the operator who holds the certificate obtains the mark required by Schedule B in an examination acceptable to the director for that category and class of certificate, the director may, upon payment of the applicable fee set out in Schedule C, issue the operator a new operator's certificate.

16(2) An operator's certificate issued under subsection (1) expires five years after it is issued, and in all respects has the same status and is subject to the same conditions as a certificate issued under section 13.

Fee for examination

17 A person who wishes to take an examination referred to in Schedule B or otherwise required under this regulation shall pay the fee set out in Schedule C.

When exams may be written

18 A person who takes a certification exam, within the meaning of Schedule B, and fails to obtain the mark required by that schedule is not entitled to take the certification exam again until 12 months have passed.

M.R. 162/2005

Other conditional operators' certificates

19(1) Despite clause 13(3)(a), the director may, in exceptional circumstances, issue a conditional operator's certificate to a person whose qualifications do not meet the requirements of Schedule B if the director is satisfied that the circumstances in which the person will be working under the certificate are of such a character that it is not in the public interest to refuse to issue the certificate.

19(2) The director may issue a conditional certificate under this section subject to any conditions that he or she considers to be appropriate.

15(4) Le directeur peut refuser de délivrer un certificat d'exploitant ou d'exploitant conditionnel en vertu du présent article.

15(5) Le certificat d'exploitant conditionnel délivré en vertu du présent article expire trois années après sa délivrance.

Délivrance d'un nouveau certificat

16(1) Le titulaire d'un certificat d'exploitant conditionnel et en vigueur, délivré en vertu de l'alinéa 14(4)b) ou du paragraphe 15(3), qui obtient la note prévue à l'annexe B à la suite d'un examen que le directeur juge acceptable pour la catégorie et la classe du certificat en question peut obtenir du directeur un nouveau certificat d'exploitant s'il paye le droit exigible énoncé à l'annexe C.

16(2) Le certificat d'exploitant délivré en vertu du paragraphe (1) expire cinq années après sa délivrance. Il est comparable à tous les points de vue à un certificat délivré en vertu de l'article 13.

Droit d'examen

17 La personne qui désire subir un examen prévu à l'annexe B ou par ailleurs imposé en vertu du présent règlement paie le droit énoncé à l'annexe C.

Examen d'accréditation — échec

18 Quiconque subit un examen d'accréditation, au sens de l'annexe B, et n'obtient pas la note prévue à cette annexe ne peut subir l'examen de nouveau que 12 mois plus tard.

R.M. 162/2005

Autres certificats conditionnels

19(1) Malgré l'alinéa 13(3)a), le directeur peut, dans des circonstances exceptionnelles, délivrer un certificat d'exploitant conditionnel à une personne dont les compétences ne correspondent pas aux exigences de l'annexe B s'il est convaincu que cette personne travaillera dans des conditions telles qu'il n'est pas dans l'intérêt public de refuser la délivrance du certificat.

19(2) Le directeur peut assortir le certificat d'exploitant conditionnel qu'il délivre en vertu du présent article des conditions qu'il juge utiles.

19(3) The director may only issue a conditional operator's certificate under subsection (1) if the owner of the facility in respect of which the certificate is to be issued requests it to be issued.

19(4) A conditional certificate issued under subsection (1)

- (a) only authorizes the holder to operate the facility in respect of which it is issued; and
- (b) is not transferable to another facility.

19(5) A conditional operator's certificate issued under subsection (1) expires five years after it is issued but may be renewed in accordance with section 20 if the director is satisfied that the requirements of subsection (1) continue to be met at the time of the renewal application.

19(6) Subsections 13(1), (2), (4) and (5) apply with necessary changes to applications for conditional operators' certificates.

Renewal of certificates

20(1) An operator who holds an operator's certificate issued under subsection 13(3) or clause 14(4)(a), or a conditional operator's certificate issued under subsection 19(1), and wishes to renew it must

- (a) before the certificate expires, make an application to the director in a form acceptable to the director, including or accompanied by the information the director requires; and
- (b) pay the applicable fee set out in Schedule C when the application is made.

20(2) The director may require the operator to provide any further information that the director considers to be necessary.

20(3) If the certificate is a conditional operator's certificate that was issued under subsection 19(1), the director may only renew it if the owner of the facility in respect of which of the certificate was issued requests the renewal.

19(3) Le directeur ne peut délivrer le certificat d'exploitant conditionnel en vertu du paragraphe (1) que si le propriétaire de l'installation que visera le certificat présente une demande.

19(4) Un certificat d'exploitant conditionnel délivré en vertu du paragraphe (1) est assorti des conditions suivantes :

- a) le titulaire n'est autorisé à exploiter que l'installation que vise le certificat;
- b) le certificat ne peut être transféré afin de viser une autre installation.

19(5) Le certificat d'exploitant conditionnel délivré en vertu du paragraphe (1) expire cinq années après sa délivrance. Il peut être renouvelé en application de l'article 20 si le directeur est convaincu que les exigences du paragraphe (1) sont toujours respectées au moment de la présentation de la demande de renouvellement.

19(6) Les paragraphes 13(1), (2), (4) et (5) s'appliquent, avec les adaptations nécessaires, aux demandes de certificats d'exploitants conditionnels.

Renouvellement d'un certificat

20(1) Le titulaire d'un certificat d'exploitant délivré en vertu du paragraphe 13(3) ou de l'alinéa 14(4)a) ou d'un certificat d'exploitant conditionnel délivré en vertu du paragraphe 19(1) qui veut le faire renouveler :

- a) présente au directeur, avant l'expiration du certificat, une demande en la forme que ce dernier juge acceptable et y inclut ou y joint les renseignements dont il a besoin;
- b) paie le droit que prévoit l'annexe C au moment de la présentation de la demande.

20(2) Le directeur peut exiger de l'exploitant les renseignements supplémentaires qu'il estime nécessaires.

20(3) Le directeur ne peut renouveler le certificat d'exploitant conditionnel délivré en vertu du paragraphe 19(1) que si le propriétaire de l'installation que vise le certificat présente une demande en ce sens.

20(4) Once he or she has received a satisfactory renewal application and all the required information, the director may issue a new operator's certificate or conditional operator's certificate if he or she is satisfied that the applicant is not otherwise disqualified from holding the certificate.

20(5) The director may refuse to issue a new operator's certificate or conditional operator's certificate.

20(6) Without limiting the generality of subsection (5), the director may refuse to issue a new operator's certificate or conditional operator's certificate to an operator who holds a certificate for which grounds for suspension or cancellation exist.

20(7) An operator's certificate or conditional operator's certificate that is issued under subsection (4) expires five years after it is issued and may be renewed.

Suspension or cancellation of certificates

21(1) The director may suspend a person's operator's certificate or conditional operator's certificate, or without first suspending the certificate may cancel it, for any of the following reasons:

- (a) the certificate was obtained by fraud or deceit or on the basis of an application containing or accompanied by inaccurate information;
- (b) the person has not worked as an operator during the five previous years;
- (c) the person has been discharged from employment in a facility for gross negligence or for incompetence in the performance of the duties of his or her position, unless the person has not exhausted any rights of appeal available under a collective agreement;
- (d) the person has
 - (i) failed to follow specific instructions given by the operator-in-charge, or
 - (ii) contravened section 32 or subsection 33(2), (3), (4), (5) or (7) and the contravention has

20(4) Une fois qu'il a reçu une demande de renouvellement satisfaisante et tous les renseignements dont il a besoin, le directeur peut délivrer un nouveau certificat d'exploitant ou d'exploitant conditionnel s'il est convaincu que l'auteur de la demande peut être titulaire d'un certificat.

20(5) Le directeur peut refuser de délivrer un nouveau certificat d'exploitant ou d'exploitant conditionnel.

20(6) Sans préjudice de la portée générale du paragraphe (5), le directeur peut refuser de délivrer un nouveau certificat d'exploitant ou d'exploitant conditionnel s'il existe des motifs de suspension ou d'annulation du certificat actuel.

20(7) Le certificat d'exploitant ou d'exploitant conditionnel délivré en vertu du paragraphe (4) expire cinq années après sa délivrance et peut être renouvelé.

Suspension ou annulation

21(1) Le directeur peut suspendre ou annuler sans suspension préalable un certificat d'exploitant ou d'exploitant conditionnel pour l'une des raisons suivantes :

- a) le certificat a été obtenu à la suite d'une fraude ou d'une supercherie ou au moyen d'une demande qui contenait des renseignements inexacts ou était accompagnée de tels renseignements;
- b) le titulaire n'a pas travaillé à titre d'exploitant pendant les cinq années précédentes;
- c) le titulaire a été congédié parce qu'il a commis une faute grave ou a fait preuve d'incompétence dans l'exercice de ses fonctions dans une installation, à moins qu'il n'ait pas épuisé tous les droits d'appel que prévoit une convention collective;
- d) le titulaire, selon le cas :
 - (i) n'a pas suivi les directives précises de l'exploitant en chef,
 - (ii) a contrevenu à l'article 32 ou au paragraphe 33(2), (3), (4), (5) ou (7) et la contravention :

(A) resulted in the discharge of a pollutant into the environment that is not authorized under the facility's environmental licence, if any,

(B) had a potential adverse effect on the health or safety of an individual, or

(C) had an adverse effect on a process in the facility;

(e) the person has contravened another provision of this regulation or failed to comply with another requirement of it.

21(2) Without limiting the generality of subsection (1), the director may suspend a certificate for a period of up to six months and may impose any conditions on the suspension that he or she considers to be appropriate.

21(3) If the holder of an operator's certificate or conditional operator's certificate that is suspended with conditions fails to comply with the conditions, the director may cancel the certificate.

21(4) The director must provide written notice of a suspension or cancellation and details of the reasons for it.

21(5) The holder of an operator's certificate or conditional operator's certificate that is suspended or cancelled shall without delay after being notified about the suspension or cancellation return the certificate to the director.

21(6) If a person's operator's certificate or conditional operator's certificate is suspended or cancelled under subsection (1), the director may issue a certificate of another category or class to the person if the person meets the qualifications set out in Schedule B for that category and class of certificate.

(A) soit a entraîné le déversement de polluants dans l'environnement contrairement aux dispositions de la licence environnementale de l'installation, le cas échéant,

(B) soit a eu un effet nocif sur la santé ou la sécurité d'un particulier,

(C) soit a eu un effet nocif sur un procédé à l'installation;

e) le titulaire a contrevenu à une autre disposition du présent règlement ou n'a pas respecté une autre de ses exigences.

21(2) Sans préjudice de la portée générale du paragraphe (1), le directeur peut suspendre un certificat pour une période maximale de six mois et peut assortir la suspension des conditions qu'il juge utiles.

21(3) Le directeur peut annuler un certificat d'exploitant ou d'exploitant conditionnel qui a été suspendu sous réserve de conditions si le titulaire ne se conforme pas aux conditions imposées.

21(4) Le directeur donne, par écrit, un avis motivé de la suspension ou de l'annulation.

21(5) Le titulaire d'un certificat d'exploitant ou d'exploitant conditionnel qui est annulé ou suspendu renvoie sans tarder le certificat au directeur après avoir reçu l'avis.

21(6) Si le certificat d'exploitant ou d'exploitant conditionnel d'un titulaire est suspendu ou annulé en vertu du paragraphe (1), le directeur peut lui délivrer un certificat d'une autre catégorie ou classe dans la mesure où il possède les compétences énoncées à l'annexe B pour la catégorie et la classe en question.

Reciprocity with other jurisdictions

22(1) If the Government of Manitoba has entered into a reciprocal agreement or arrangement with the Government of Canada or of another province to provide for the mutual recognition of operator certifications, the director may, upon payment of the applicable fee set out in Schedule C, issue an operator's certificate or conditional operator's certificate to a person who holds an operator's certificate or similar certificate issued by the other party to the agreement or arrangement.

22(2) Section 13, except clause 13(3)(a), and sections 20 and 21 apply, with necessary changes, to the issuance of a certificate under this section.

Accords de réciprocité

22(1) Si le gouvernement du Manitoba a conclu un accord de réciprocité avec le gouvernement du Canada ou une autre province prévoyant la reconnaissance mutuelle de l'accréditation des exploitants, le directeur peut, sur paiement du droit exigible énoncé à l'annexe C, délivrer un certificat d'exploitant ou d'exploitant conditionnel au titulaire d'un certificat d'exploitant ou d'un certificat comparable émanant de l'autre partie à l'accord.

22(2) L'article 13, à l'exception de l'alinéa 13(3)a), et les articles 20 et 21 s'appliquent, avec les adaptations nécessaires, à la délivrance d'un certificat en vertu du présent article.

OPERATING REQUIREMENTS

Operators must be certified

23(1) Subject to subsection (2), the owner of a facility shall ensure that every operator employed in the facility, or under contract to operate it in whole or in part, holds an operator's certificate issued under this regulation or is deemed to hold an operator's certificate.

23(2) Subsection (1) does not apply in respect of an operator

(a) who is a professional engineer, a Bachelor of Science graduate or a certified engineering technologist;

(b) who has taken academic courses approved by the director relating to his or her function at a facility; and

(c) who is employed in the facility, or under contract in respect of it, for not more than six months in any 12-month period.

23(3) Despite clause (2)(c), the director may, on the request of the owner of a facility, increase the number of months in a 12-month period that an operator referred to in subsection (2) may be employed in or under contract in respect a facility.

NORMES D'EXPLOITATION

Accréditation obligatoire

23(1) Sous réserve du paragraphe (2), le propriétaire d'une installation fait en sorte que tous les exploitants qui y travaillent ou qui sont liés par un contrat pour exploiter une partie ou l'ensemble de l'installation soient titulaires d'un certificat d'exploitant délivré en vertu du présent règlement ou soient réputés l'être.

23(2) Le paragraphe (1) ne s'applique pas aux exploitants :

a) qui sont ingénieurs, bacheliers ès sciences ou technologues agréés en ingénierie;

b) qui ont suivi des cours théoriques que le directeur a approuvés et qui portent sur l'exercice de leurs fonctions à l'installation;

c) qui travaillent à l'installation à titre d'employé ou d'employé contractuel pendant un maximum de 6 mois sur 12.

23(3) Malgré l'alinéa (2)c), le directeur peut, à la suite d'un demande en ce sens de la part du propriétaire d'une installation, augmenter le nombre de mois dans une période de 12 mois pendant lesquels un exploitant visé au paragraphe (2) peut travailler à titre d'employé ou d'employé contractuel.

Facility owner must file table of organization

24(1) Before commencing operations at a facility, the owner of the facility must prepare a table of organization that is acceptable to the director and file it with the director for approval.

24(2) If a facility is in operation on or before January 3, 2006, the owner must file the table of organization within 90 days of that day.

M.R. 162/2005

24(3) The director may approve the table of organization or refuse to approve it until it is acceptable.

24(4) The owner must, without delay, notify the director of any change in the table of organization and file an acceptable updated table of organization with the director for his or her approval. Subsection (3) applies, with necessary changes, to an updated table of organization.

Operators' certificates to be prominently displayed

25(1) The owner of a facility shall ensure that a copy of the operator's certificate of every operator who is employed in or under contract in respect of the facility is prominently displayed at the facility or at the premises from which the facility's operations are managed.

M.R. 162/2005

25(2) The director may issue a personal identification card to an operator of any category or class, which may display the operator's image and any other information about the operator that the director considers necessary. On request from the director, an operator must provide the director with a digital image of the operator to be displayed on the card.

M.R. 162/2005

25(3) When the director has issued a personal identification card to an operator, the operator must

- (a) carry the card whenever he or she is working or on duty away from the facility at which his or her operator's certificate is displayed; and

Dépôt d'un organigramme

24(1) Avant qu'une installation commence à être exploitée, le propriétaire dresse un organigramme que le directeur juge acceptable et le dépose auprès de ce dernier pour approbation.

24(2) Si une installation est en exploitation le 3 janvier 2006 ou avant cette date, le propriétaire dépose l'organigramme dans les 90 jours qui suivent.

R.M. 162/2005

24(3) Le directeur peut approuver l'organigramme ou refuser de l'approuver tant qu'il ne le juge pas acceptable.

24(4) Le propriétaire avise sans tarder le directeur de tout changement apporté à l'organigramme et dépose auprès de ce dernier un organigramme acceptable et à jour pour approbation. Le paragraphe (3) s'applique, avec les adaptations nécessaires, aux organigrammes mis à jour.

Affichage des certificats d'exploitants

25(1) Le propriétaire d'une installation fait en sorte qu'une copie du certificat d'exploitant de chaque employé ou employé contractuel de l'installation soit affichée dans un endroit bien en vue de cette installation ou des locaux où l'on gère l'exploitation de l'installation.

R.M. 162/2005

25(2) Le directeur peut délivrer une carte d'identité personnelle à un exploitant de toute catégorie ou classe sur laquelle peut figurer une photographie de l'exploitant ou d'autres renseignements qu'il juge nécessaires. À la demande du directeur, l'exploitant lui fournit une photographie numérique afin qu'elle figure sur la carte.

R.M. 162/2005

25(3) L'exploitant qui s'est vu délivrer une carte d'identité personnelle par le directeur :

- a) la porte lorsqu'il travaille ou qu'il est en fonction ailleurs qu'à l'installation où est affiché son certificat d'exploitant;

(b) produce the card for inspection at the request of an environment officer, public health inspector or drinking water officer.

M.R. 162/2005

Operator-in-charge

26(1) The owner of a facility shall ensure that an operator-in-charge is responsible for the overall operation of the facility at all times.

26(2) For the purposes of subsection (1), the owner of a facility must designate the operator-in-charge for each shift of the facility's daily operation. A written record of the designated operators-in-charge must be available for inspection at the facility at all times while it is in operation.

26(3) An operator-in-charge may not be an operator-in-training and must

- (a) hold an operator's certificate that is
 - (i) for the category of facility,
 - (ii) of the same class as, or higher than, the class of the facility, and
 - (iii) not suspended; or
- (b) be an operator referred to in subsection 23(2).

26(4) If no operator with the qualifications required by clause (3)(a) or (b) is available or able to assume responsibility for the overall operation of the facility, it may be operated, on an interim basis, by an operator who

- (a) is not an operator-in-training; and
- (b) holds an operator's certificate that is
 - (i) for the category of facility,
 - (ii) not more than one class lower than the class of facility, and
 - (iii) not suspended.

b) la produit à des fins d'inspection à la demande d'un agent de l'environnement, d'un inspecteur d'hygiène publique ou d'un agent du Service de l'eau potable.

R.M. 162/2005

Exploitant en chef

26(1) Le propriétaire d'une installation fait en sorte qu'un exploitant en chef soit chargé en tout temps de l'exploitation globale de l'installation.

26(2) Pour l'application du paragraphe (1), le propriétaire d'une installation désigne un exploitant en chef pour chaque poste de travail. Un registre des exploitants en chef désignés doit pouvoir être consulté en tout temps pendant que l'installation est en exploitation.

26(3) L'exploitant en chef ne peut être un apprenti et est tenu de satisfaire à l'une ou l'autre des conditions suivantes :

- a) il est titulaire d'un certificat d'exploitant non suspendu pour la catégorie de l'installation et pour une classe égale ou supérieure à celle de l'installation;
- b) il est visé au paragraphe 23(2).

26(4) Dans les cas où aucun exploitant ayant les compétences prévues à l'alinéa (3)a) ou b) n'est disponible ou ne peut être chargé de l'exploitation globale de l'installation, l'exploitation peut temporairement être confiée à un exploitant :

- a) qui n'est pas un apprenti;
- b) qui est titulaire d'un certificat d'exploitant qui n'est pas suspendu, qui vise la catégorie de l'installation et qui n'est pas inférieur de plus d'une classe à celle de l'installation.

26(5) The owner of a facility shall not rely on subsection (4) for more than 45 consecutive days or 150 days in any 12-month period.

M.R. 52/2007

26(6) The owner of the facility shall notify the director without delay if he or she relies on subsection (4) for a period of more than 35 consecutive days.

M.R. 52/2007

Supervising operator of field crew

27 The owner of a water distribution or wastewater collection facility, classified as a class 2 facility or higher, shall ensure that all field crews have a supervising operator, who holds a class 2 or higher operator's certificate for the category of facility, at all times at an active work site.

Exemption re strike

28 In the event of a strike involving operators employed in a facility, the minister may, at the request of the facility's owner, exempt the owner from the operation of any of sections 23, 26 and 27 for the duration of the strike if the minister is satisfied that the facility will be operated without significant risk to human health or the natural environment.

Access to emergency response plan, etc.

29(1) The owner of a facility shall ensure that the facility

(a) has a documented emergency response plan acceptable to the director; and

(b) has comprehensive operations and maintenance manuals for the facility and all of its systems and equipment that contain plans, drawings and process descriptions that the director considers to be adequate for the safe and efficient operation of the facility.

26(5) Le propriétaire d'une installation ne peut se prévaloir des dispositions du paragraphe (4) pendant plus de 45 jours consécutifs ou pendant plus de 150 jours au cours d'une période de 12 mois.

R.M. 52/2007

26(6) Le propriétaire d'une installation avise sans tarder le directeur s'il se prévaut des dispositions du paragraphe (4) pendant plus de 35 jours consécutifs.

R.M. 52/2007

Exploitant surveillant

27 Le propriétaire d'une installation de distribution d'eau ou de collecte des eaux usées de classe 2 ou d'une classe supérieure fait en sorte qu'un exploitant surveillant, titulaire d'un certificat d'exploitant de classe 2 ou d'une classe supérieure pour la catégorie d'installation visée, supervise en tout temps les équipes qui se trouvent sur un lieu de travail exploité activement.

Exemption en cas de grève

28 En cas de grève touchant les exploitants d'une installation, le ministre peut dispenser le propriétaire qui présente une demande en ce sens de l'obligation de se conformer aux articles 23, 26 et 27 pendant la durée de la grève si le ministre est d'avis que l'exploitation de l'installation ne posera aucun risque grave pour la santé ou pour l'environnement.

Plan d'action en cas d'urgence

29(1) Le propriétaire d'une installation fait en sorte qu'elle :

a) ait par écrit un plan d'action en cas d'urgence que le directeur juge acceptable;

b) dispose de manuels d'exploitation et d'entretien complets pour l'installation, ses systèmes et son matériel, lesquels manuels contiennent des plans et des descriptions des procédés qui permettront, de l'avis du directeur, une exploitation sûre et efficace.

29(2) The owner shall also ensure

(a) that the plan and manuals are reviewed and updated at least once every two years and at any other time that the director may require; and

(b) that all the facility's operators and maintenance personnel have ready access to the plan and manuals at all times.

In-service training

30(1) The director may establish requirements for in-service training for operators, including but not limited to, the number of hours of training that an operator must take in a given period, the subject areas that the training must cover, and the nature and extent of the training.

30(2) Before exercising the powers set out in subsection (1), the director must consult with the certification advisory committee, if one has been appointed.

30(3) In exercising the powers set out in subsection (1), the director may designate training courses offered by third parties as acceptable in-service training.

30(4) The owner of a facility must ensure that each of the facility's operators receives in-service training that meets the requirements established by the director.

30(5) An operator must take in-service training that meets the requirements established by the director.

30(6) The owner of a facility must ensure that records, acceptable to the director, are maintained of the in-service training received by operators under this section, including but not limited to, the names and positions of operators who attend in-service training sessions, the duration of each in-service training session and the subjects considered at each in-service training session.

30(7) The owner of a facility shall submit copies or summaries of the records to the director annually.

29(2) Le propriétaire fait en sorte :

a) que le plan et les manuels soient revus et mis à jour au moins une fois tous les deux ans et au moment où le directeur impose une mise à jour;

b) que les exploitants et le personnel d'entretien de l'installation aient en tout temps facilement accès au plan et aux manuels.

Formation en cours d'emploi

30(1) Le directeur peut établir des critères de formation en cours d'emploi à l'intention des exploitants. Ces critères portent notamment sur le nombre d'heures de formation imposées au cours d'une période donnée, la matière abordée ainsi que la nature et l'ampleur de la formation.

30(2) Avant d'exercer les pouvoirs prévus au paragraphe (1), le directeur consulte, le cas échéant, le Comité consultatif d'accréditation.

30(3) Dans l'exercice des pouvoirs prévus au paragraphe (1), le directeur peut désigner des cours de formation offerts par des tiers à titre de formation en cours d'emploi acceptable.

30(4) Le propriétaire d'une installation fait en sorte que chacun des exploitants reçoive une formation en cours d'emploi conforme aux critères du directeur.

30(5) Les exploitants suivent une formation en cours d'emploi conforme aux normes du directeur.

30(6) Le propriétaire d'une installation fait en sorte que soient tenus des dossiers, que le directeur juge acceptables, sur la formation en cours d'emploi offerte en vertu du présent article. Ces dossiers comprennent les noms et les postes des participants, la durée de chaque séance de formation et des précisions sur la matière abordée.

30(7) Le propriétaire d'une installation présente tous les ans au directeur des copies ou des résumés des dossiers.

Record of operator-in-charge

31 The owner of a facility shall ensure that records, acceptable to the director, are maintained of the operators in charge of the facility at all times and the amount of time each operator works as an operator-in-charge.

Responsibilities of operator-in-charge

32 An operator-in-charge shall

(a) take all steps reasonably necessary to operate the facility within his or her responsibility in a safe and efficient manner in accordance with the relevant operations manuals;

(b) ensure that the processes within his or her responsibility are measured, monitored, sampled and tested in a manner that permits them to be adjusted when necessary;

(c) ensure that records, acceptable to the director, are maintained of all adjustments made to the processes within his or her responsibility; and

(d) ensure that all equipment used in the processes within his or her responsibility is properly monitored, inspected and evaluated and that records, acceptable to the director, of equipment operating status are prepared and available at the end of every operating shift.

Operating records

33(1) The owner of a facility shall ensure that logs or other record-keeping mechanisms, acceptable to the director, are provided to record information concerning the operation of the facility.

33(2) No person shall make an entry in a log or other record-keeping mechanism unless the person is an operator-in-charge or is authorized to make the entry by the owner or an operator-in-charge.

33(3) A person who makes an entry in a log or other record-keeping mechanism shall make the entry in chronological order in relation to the other entries in it.

33(4) A person who makes an entry in a log or other record-keeping mechanism shall do so in a manner that unambiguously identifies the person as the maker of the entry.

Dossiers sur l'exploitant en chef

31 Le propriétaire d'une installation fait en sorte que soient tenus des dossiers, que le directeur juge acceptables, sur les personnes qui exercent en tout temps les fonctions d'exploitant en chef ainsi que sur la période de temps pendant laquelle elles exercent ces fonctions.

Responsabilités de l'exploitant en chef

32 Il incombe à l'exploitant en chef :

a) de prendre les mesures qui s'imposent afin d'exploiter l'installation dont il est responsable de manière sûre et efficace, conformément aux manuels d'exploitation pertinents;

b) de faire en sorte que les procédés dont il est responsable soient évalués, surveillés et vérifiés d'une manière qui permette leur correction au besoin;

c) de faire en sorte que des dossiers, que le directeur juge acceptables, soient tenus au sujet des corrections apportées aux procédés dont il est responsable;

d) de faire en sorte que le matériel nécessaire à l'application des procédés dont il est responsable soit correctement surveillé, inspecté et évalué et que des dossiers, que le directeur juge acceptables, sur l'état du matériel soient dressés et accessibles à la fin de chaque poste de travail.

Dossiers d'exploitation

33(1) Le propriétaire d'une installation fait en sorte que des données sur l'exploitation puissent être consignées dans des registres ou d'une autre manière que le directeur juge acceptables.

33(2) Seuls les exploitants en chef ou les personnes autorisées par le propriétaire ou un exploitant en chef peuvent consigner des données dans des registres ou d'une autre manière.

33(3) Les données sont consignées de manière chronologique.

33(4) Les personnes qui consignent des données dans des registres ou d'une autre manière doivent pouvoir être clairement identifiées.

33(5) An operator-in-charge or a person authorized by an operator-in-charge shall record the following information in the logs or other record-keeping mechanisms in respect of each operating shift:

- (a) the date, time period and number or designation of the shift;
- (b) the names of all operators on duty during the shift;
- (c) details of any departures from normal operating procedures that occurred during the shift and the time they occurred;
- (d) any special instructions that were given during the shift to depart from normal operating procedures and the name of the person who gave the instructions;
- (e) any unusual or abnormal conditions that were observed in the facility during the shift, any action that was taken and any conclusions drawn from the observations;
- (f) details of any equipment that was taken out of service or ceased to operate during the shift and any action taken to maintain or repair equipment during the shift.

33(6) The owner shall ensure that logs and other record-keeping mechanisms are accessible in the facility for at least two years after the last entry.

33(7) No person shall remove an entry or a portion of an entry from a log or other record-keeping mechanism.

Inspections

34(1) To determine compliance with the Act and regulations under the Act, the director, an environment officer, a public health inspector or a drinking water officer may, at any reasonable time, enter and inspect a facility and its equipment and the owner's records relating to its operation.

M.R. 162/2005

33(5) L'exploitant en chef ou la personne qu'il autorise consigne dans des registres ou d'une autre manière, à l'égard de chaque poste de travail, les renseignements suivants :

- a) la date du poste de travail, le moment où il débute et il prend fin et son numéro ou sa cote;
- b) le nom des exploitants en fonction;
- c) des précisions sur les dérogations à la marche à suivre normale et l'heure où elles sont survenues;
- d) les directives spéciales qui ont permis les dérogations et le nom de la personne qui les a données;
- e) les conditions inhabituelles ou anormales qui ont été constatées, les mesures prises et les conclusions tirées;
- f) les détails sur le matériel qui a été mis hors d'usage ou qui a cessé de fonctionner et les mesures prises pour l'entretenir ou le réparer.

33(6) Le propriétaire fait en sorte que les données consignées dans les registres ou autrement puissent être consultées à l'installation pendant au moins deux ans après la dernière inscription.

33(7) Il est interdit de supprimer des données complètes ou partielles consignées dans un registre ou autrement.

Visite

34(1) Pour s'assurer du respect de la *Loi* et de ses règlements, le directeur, un agent de l'environnement, un inspecteur d'hygiène publique ou un agent du Service de l'eau potable peut, à toute heure convenable, visiter une installation, inspecter son matériel et consulter les registres du propriétaire ayant trait à l'exploitation.

R.M. 162/2005

34(2) For the purposes of subsection (1), the owner of the facility must allow the director, environment officer, public health inspector or drinking water officer entry into the facility and access to all parts of it, to its equipment and to the records.

M.R. 162/2005

34(2) Pour l'application du paragraphe (1), le propriétaire de l'installation permet au directeur, à l'agent de l'environnement, à l'inspecteur d'hygiène publique ou à l'agent du Service de l'eau potable d'avoir accès à toutes les parties de l'installation, à son matériel et à ses registres.

R.M. 162/2005

TRANSITIONAL PROVISIONS AND COMING INTO FORCE

35 Repealed.

M.R. 162/2005; 52/2007

Transitional period re certain contraventions

35.1 Despite subsection 23(1) and sections 25 to 27, a person who contravenes any of those provisions does not commit an offence and shall not be charged with committing an offence unless the contravention occurs on or after May 1, 2007.

M.R. 52/2007

Coming into force — certain provisions on June 1, 2003

36(1) This regulation, except sections 4, 5, 13 to 16, 19, 23 to 27, 29 and 31 to 34, comes into force on June 1, 2003.

Coming into force — certain provisions on September 1, 2003

36(2) Sections 4, 5, 13 to 16, 19, 23 to 27, 29 and 31 to 34 come into force on September 1, 2003.

DISPOSITION TRANSITOIRE ET ENTRÉE EN VIGUEUR

35 Abrogé.

R.M. 162/2005; 52/2007

Période de transition

35.1 Malgré le paragraphe 23(1) et les articles 25 à 27, les personnes qui contreviennent à ces dispositions avant le 1^{er} mai 2007 ne commettent pas une infraction et ne seront pas accusées d'avoir commis une infraction.

R.M. 52/2007

Entrée en vigueur — le 1^{er} juin 2003

36(1) Le présent règlement, à l'exception des articles 4, 5, 13 à 16, 19, 23 à 27, 29 ainsi que 31 à 34, entre en vigueur le 1^{er} juin 2003.

Entrée en vigueur — le 1^{er} septembre 2003

36(2) Les articles 4, 5, 13 à 16, 19, 23 à 27, 29 ainsi que 31 à 34 entrent en vigueur le 1^{er} septembre 2003.

SCHEDULE A
(Section 2)

FACILITY CLASSIFICATION CRITERIA

PART 1

WATER DISTRIBUTION FACILITIES

Small system class

1 A water distribution facility that distributes water to a population of no more than 500 shall be classified in the small system class.

Classes 1 to 4

2 Water distribution facilities shall be classified in classes 1 to 4 in accordance with the following table, on the basis of the size of population to which they distribute water:

POPULATION SERVED	CLASSIFICATION
501 to 1,500	class 1
1,501 to 15,000	class 2
15,001 to 50,000	class 3
50,001 or more	class 4

PART 2

WATER TREATMENT FACILITIES

Definitions

3 In this Part,

"**aeration**" means the process of adding air to water either by passing air through the water or passing the water through air; (« aération »)

"**direct filtration**" means filtration performed directly after the flocculation stage of treatment, with or without the prior addition of filter aid, omitting the sedimentation stage of conventional filtration; (« filtration directe »)

"**dissolved air flotation**" means a solids-removal process in which dissolved air is added to a clarifier from the bottom of its basin, and the air floats suspended particles to the top of the water where they are removed by skimming; (« flottation à l'air dissous »)

"**electrodialysis**" means a process in which brackish water flows between alternating cation-permeable and anion-permeable membranes, and direct electronic current provides the motive force to cause ions to migrate through the membranes and either to react to create a gas or remain in a separate solution as brine wastewater; (« électrolyse »)

"**horizontal flow**", in relation to water, means the flow of water in a horizontal direction through a sedimentation/clarification basin; (« flux horizontal »)

"**injection mixer**" means a perforated tube or nozzle that disperses coagulant into the water being treated and that is intended, when used in appropriate numbers, to provide uniform distribution of the coagulant over the entire treatment basin; (« mélangeur à injection »)

"**in-line blender mixer**" means a diffuser within a pipe that is used to add coagulant directly to water in the pipe, providing rapid dispersion of the coagulant without significant head loss; (« mélangeur en ligne »)

"**mechanical dewatering**" means the forced separation of solids from water during treatment using mechanical devices; (« déshydratation mécanique »)

"**mechanical mixer**" means a paddle, propeller or turbine used to disperse coagulant into water that is being treated; (« agitateur mécanique »)

"**pH adjustment**" means alteration of the pH of raw water or prefinished water by mechanical or chemical procedures to enhance the performance of the treatment process; (« correction d'acidité »)

"**reverse osmosis**" means a process of removing impurities or unwanted substances from water by forcing it under pressure through a semi-permeable membrane through which the impurities or unwanted substances cannot pass; (« osmose inversée »)

"**SCADA**" means Supervisory Control And Data Acquisition; (« SCADA »)

"**SCADA instrumentation**" means a computer-based system that monitors and controls remote facilities, in which

(a) a SCADA master control is typically located in a dedicated control centre or facility control room, and

(b) remote facilities are equipped with remote terminal units to gather information and issue controls from the master station; (« système SCADA »)

"**solids composting**" means mixing sludge with decaying organic material for eventual use as fertilizer; (« compostage des matières solides »)

"**stability or corrosion control**" means

(a) the adjustment of the physical or chemical properties of water to make it non-corrosive; and

(b) the addition of chemicals to water to build protective coatings inside the water pipes of a water distribution facility; (« contrôle de la stabilité ou de la corrosion »)

"**tube sedimentation**" means the removal of suspended solids from water using tube settlers that are placed inclined in a basin, with each tube settler acting as a shallow settling basin in which particles collect on the inside surface of the tube or settle to the bottom of the larger basin; (« décantation tubulaire »)

"**up-flow solid-contact sedimentation**" means a combined coagulation, flocculation and sedimentation process in a single basin, in which the water being treated is directed upward through a sludge blanket or slurry of flocculated suspended solids; (« décantation par capture des matières solides lors de leur ascension vers la surface »)

"urban runoff" means water that drains into local receiving water from storm drains and may contribute to water quality complaints about treated water because the runoff contains one or more of the following:

- (a) oil, grease, gasoline and other residues that accumulate on paved surfaces,
- (b) animal droppings from pets,
- (c) fertilizers used for landscaping. (« écoulements urbains »)

M.R. 162/2005

Small system class

4 A water treatment facility that otherwise meets the criteria of a class 1 water treatment facility shall be classified in the small system class if

- (a) it supplies water to a population of not more than 500;
- (b) its only source of untreated water is groundwater not under the influence of surface water; and
- (c) the only treatment applied to the water is disinfection.

Classes 1 to 4

5(1) Water treatment facilities shall be classified in classes 1 to 4 in accordance with the following table, on the basis of the number of classification points assessed under the classification point system set out in subsection (2):

RANGE OF CLASSIFICATION POINTS	CLASSIFICATION
0 to 30	class 1
31 to 55	class 2
56 to 75	class 3
76 or more	class 4

5(2) The classification criteria set out in the first column of the following table and the classification points set out opposite those criteria shall be used to determine the classification of water treatment facilities. Each unit process — signified by italicized text in the first column of the table and an asterisk after the point value in the second column — should have points assigned only once.

CLASSIFICATION CRITERIA	CLASSIFICATION POINTS
Size (2 point minimum to 20 point maximum): <ul style="list-style-type: none"> • maximum population or part served, peak day (1 point minimum to 10 points maximum) • design flow average day or peak month's flow average day, whichever is larger (1 point minimum to 10 point maximum) 	1 point per 10,000 or part 1 point per 4.5 megalitres per day or part
Water supply source: <ul style="list-style-type: none"> • groundwater • groundwater under the influence of surface water • surface water 	3 5 5

CLASSIFICATION CRITERIA	CLASSIFICATION POINTS
Average raw water quality varies enough to require treatment changes 10% of the time or more: (range of 0 to 10 points with the following guidelines: little or no variation = 0 points; high variation [raw water quality subject to periodic serious industrial waste pollution] = 10 points)	0 to 10
Chemical treatment or addition processes: <ul style="list-style-type: none"> • <i>chlorine dioxide (for disinfection or otherwise)</i> • <i>chlorine, gaseous (for disinfection or otherwise)</i> • <i>chlorine, liquid or powdered (for disinfection or otherwise)</i> • <i>chloramination</i> • <i>fluoridation</i> • <i>ozonization (on-site generation)</i> • <i>pH adjustment (calcium carbonate, carbon dioxide, hydrochloric acid, calcium oxide, calcium hydroxide, sodium hydroxide, sulphuric acid, other)</i> • <i>stability or corrosion control (calcium oxide, calcium hydroxide, sodium carbonate, sodium hexametaphosphate, other)</i> • <i>pre-oxidation</i> 	10* 8* 5* 8* 5* 10* 4* 4* 2*
Coagulation processes: <ul style="list-style-type: none"> • <i>coagulation</i> • <i>flocculation</i> 	5* 5*
Clarification and sedimentation processes: <ul style="list-style-type: none"> • <i>horizontal-flow (rectangular basins)</i> • <i>horizontal-flow (round basins)</i> • <i>up-flow solid-contact sedimentation</i> • <i>inclined-plate sedimentation or tube sedimentation, or both</i> • <i>sedimentation (other)</i> • <i>dissolved air flotation</i> 	5* 7* 15* 7* 5* 30*
Filtration processes: <ul style="list-style-type: none"> • <i>rapid gravity filtration</i> • <i>canister, bag or cartridge filtration</i> • <i>granular activated charcoal filtration</i> • <i>slow sand filtration</i> • <i>membrane filtration</i> • <i>pressure or greensand filtration</i> 	10* 5* 5* 10* 12* 10*

CLASSIFICATION CRITERIA	CLASSIFICATION POINTS
Other treatment processes: <ul style="list-style-type: none"> • <i>aeration</i> • <i>packed tower aeration</i> • <i>ion-exchange softening</i> • <i>lime-soda ash softening</i> • <i>chemical algae control</i> • <i>powdered activated carbon</i> • <i>disinfection by ultraviolet irradiation</i> • <i>special processes (electrodialysis or other)</i> 	2* 5* 5* 20* 2* 2* 7* 15*
Residuals disposal: <ul style="list-style-type: none"> • <i>discharge to sludge ponds</i> • <i>mechanical dewatering</i> • <i>land application</i> • <i>solids composting</i> 	2* 5* 5* 5*
Facility characteristics: <ul style="list-style-type: none"> • instrumentation (0 point minimum to 6 point maximum): <ul style="list-style-type: none"> • SCADA or similar instrumentation systems are used to provide data with no process operation • SCADA or similar instrumentation systems are used to provide data with limited process operation • SCADA or similar instrumentation systems are used to provide data with extensive or total process operation • clearwell size less than average day design flow 	0 2 6 5
Laboratory control ¹ (0 point minimum to 13 point maximum): <ul style="list-style-type: none"> • bacteriological (0 point minimum to 3 point maximum): <ul style="list-style-type: none"> • lab work done outside the facility • coliform determination • chemical/physical (0 point minimum to 10 point maximum): <ul style="list-style-type: none"> • lab work done outside the facility • push button or colorimetric tests such as chlorine or pH • additional procedures such as titration, alkalinity or hardness • more advanced determinations such as numerous inorganics • highly sophisticated instrumentation such as atomic absorption or gas chromatograph 	0 3 0 1 to 3 1 to 5 1 to 7 10

¹ The key concept is to credit laboratory analyses done on-site by facility personnel under the direction of an operator-in-charge with points from 0 to 13.

M.R. 162/2005; 52/2007

PART 3

WASTEWATER COLLECTION FACILITIES

Small system class

6 A wastewater collection facility that collects wastewater from a population of no more than 500 shall be classified in the small system class.

Classes 1 to 4

7 Wastewater collection facilities shall be classified in classes 1 to 4 in accordance with the following table, on the basis of the size of population from which they collect wastewater:

POPULATION SERVED	CLASSIFICATION
501 to 1,500	class 1
1,501 to 15,000	class 2
15,001 to 50,000	class 3
50,001 or more	class 4

PART 4

WASTEWATER TREATMENT FACILITIES

Definitions

8 In this Part,

"**activated sludge**" means wastewater treatment by aeration of suspended organisms followed by clarification, including

- (a) extended aeration,
- (b) intermittent cycle extended aeration systems, and
- (c) other similar processes, including sequencing batch reactors; (« boues activées »)

"**anaerobic treatment**" means wastewater treatment brought about through the action of micro-organisms in the absence of air or elemental oxygen, including low-rate and high-rate anaerobic processes, and combination processes such as clarigesters; (« digestion anaérobie »)

"**biological or chemical/biological advanced waste treatment**" means the advanced treatment of wastewater for nutrient removal including nitrification, denitrification, or phosphorus removal utilizing biological or chemical processes or a combination of them; (« traitement tertiaire biologique ou chimique/biologique des déchets »)

"**chemical addition**" means the addition of a chemical to wastewater at an application point for the purposes of adjusting pH or alkalinity, improving solids removal, dechlorinating, removing odours, providing nutrients, or otherwise enhancing treatment, but does not include chlorination for disinfection of effluent, the addition of enzymes or any process set out under the heading "Tertiary treatment" in the table in section 10 of this Schedule; (« adjonction d'un produit chimique »)

"**chemical/physical advanced treatment following secondary treatment**" means the use of a chemical or physical advanced treatment process — such as carbon adsorption, air stripping, chemical coagulation or precipitation — following or in conjunction with a secondary treatment process; (« traitement tertiaire chimique/physique suivant un traitement secondaire »)

"**chemical/physical advanced treatment without secondary treatment**" means the use of chemical or physical advanced treatment process — such as carbon adsorption, air stripping, chemical coagulation or precipitation — without any secondary treatment process; (« traitement tertiaire chimique/physique sans traitement secondaire »)

"**fixed-film reactor**" means biofiltration by trickling filters or rotating biological contactors followed by secondary clarification; (« réacteur à biomasse fixée »)

"**land application of biosolids by contractor**" means the application of biosolids to land or their beneficial reuse by a contractor outside of the control of the operator of a wastewater treatment facility; (« épandage au sol de biosolides par un entrepreneur »)

"**land treatment and surface or subsurface disposal**" means treatment of effluent by disposing of it

- (a) onto the surface of the ground by rapid infiltration, rotary distributor or spray irrigation, or
- (b) below the surface of the ground by infiltration gallery, injection, or gravity or pressurized drain field; (« traitement par épandage et élimination en surface ou souterraine »)

"**mechanical dewatering**" means the removal of water from sludge by any of the following processes, with or without the addition of polymers:

- (a) vacuum filtration,
- (b) frame-, belt- or plate-filter press,
- (c) centrifuge, or
- (d) dissolved air flotation; (« déshydratation mécanique »)

"**mechanical post-aeration**" means the introduction of air into effluent by mechanical means such as diffused or mechanical aeration, but does not include cascade aeration; (« post-aération mécanique »)

"**media filtration**" means the removal of solids from wastewater using a sand filter or other media or mixed-media filter; (« filtration dans la masse »)

"**SCADA**" and "**SCADA instrumentation**" have the same meaning as in Part 2; (« SCADA » et « système SCADA »)

"**solids composting**" means a biological decomposition process that produces carbon dioxide, water and heat and includes windrow, forced air-static pile, and mechanical composting; (« compostage des matières solides »)

"**solids stabilization**" means processes — including lime or similar treatment, thermal conditioning, aerobic or anaerobic digestion, and solids composting — applied to sludge to

- (a) oxidize or reduce the organic matter in it to a more stable form,
- (b) reduce pathogens, and
- (c) reduce the volatile organic chemicals in it and, accordingly, the potential for odour. (« stabilisation des matières solides »)

Small system class

9 A wastewater treatment facility that otherwise meets the criteria of a class 1 wastewater treatment facility shall be classified in the small system class if

- (a) it treats wastewater from a population of no more than 500; and
- (b) no mechanical treatment processes are employed at the facility.

Classes 1 to 4

10(1) Wastewater treatment facilities shall be classified in classes 1 to 4 in accordance with the following table, on the basis of the number of classification points assessed under the classification point system set out in subsection (2):

RANGE OF CLASSIFICATION POINTS	CLASSIFICATION
0 to 30	class 1
31 to 55	class 2
56 to 75	class 3
76 or more	class 4

10(2) The classification criteria set out in the first column of the following table and the classification points set out opposite those criteria shall be used to determine the classification of wastewater treatment facilities. Each unit process — signified by italicized text in the first column of the table and an asterisk after the point value in the second column — should have points assigned only once.

CLASSIFICATION CRITERIA	CLASSIFICATION POINTS
Size (2 point minimum to 20 point maximum): <ul style="list-style-type: none"> • maximum population or part served, peak day (1 point minimum to 10 points maximum) • design flow average day or peak month's flow average day, whichever is larger (1 point minimum to 10 point maximum) 	1 point per 10,000 or part 1 point per 4.5 megalitres per day or part
Variation in raw waste ¹ (0 point minimum to 6 point maximum): <ul style="list-style-type: none"> • variations do not exceed those normally or typically expected • recurring deviations or excessive variations of 100–200% in strength or flow, or both • recurring deviations or excessive variations of more than 200% in strength or flow, or both • raw wastes subject to toxic waste discharges • impact of septage or truck-hauled waste (0 point minimum to 4 point maximum) 	0 2 4 6 0 to 4

CLASSIFICATION CRITERIA	CLASSIFICATION POINTS
Preliminary treatment: <ul style="list-style-type: none"> • <i>facility pumping of main flow</i> • <i>screening or comminution</i> • <i>grit removal</i> • <i>equalization</i> 	3* 3* 3* 1*
Primary treatment: <ul style="list-style-type: none"> • <i>clarifiers</i> • <i>anaerobic treatment with biogas flare</i> • <i>anaerobic treatment with biogas utilization facility</i> 	5* 10* 15*
Secondary treatment: <ul style="list-style-type: none"> • <i>fixed-film reactor</i> • <i>activated sludge</i> • <i>stabilization ponds without aeration</i> • <i>stabilization ponds with aeration</i> 	10* 15* 5* 8*
Tertiary treatment: <ul style="list-style-type: none"> • <i>polishing ponds for advanced waste treatment</i> • <i>chemical/physical advanced waste treatment without secondary treatment</i> • <i>chemical/physical advanced waste treatment following secondary treatment</i> • <i>biological or chemical/biological advanced waste treatment</i> • <i>nitrification by designed extended aeration only</i> • <i>ion exchange for advanced waste treatment</i> • <i>reverse osmosis, electrodialysis and other membrane filtration techniques</i> • <i>advanced waste treatment chemical recovery, carbon regeneration</i> • <i>media filtration</i> 	2* 15* 10* 12* 5* 10* 10* 4* 5*
Additional treatment processes: <ul style="list-style-type: none"> • <i>chemical addition (2 points for each added chemical for a maximum of 6 points)</i> • <i>dissolved air flotation (other than for sludge thickening)</i> • <i>intermittent sand filter</i> • <i>recirculating intermittent sand filter</i> • <i>microscreens</i> • <i>generation of oxygen</i> 	0 to 6* 8* 2* 3* 5* 5*

CLASSIFICATION CRITERIA	CLASSIFICATION POINTS
<p>Solids handling:</p> <ul style="list-style-type: none"> • <i>storage (other than for stabilization)</i> 2* • <i>stabilization by storage (including any storage afterwards)</i> 4* • <i>gravity thickening</i> 2* • <i>mechanical dewatering</i> 8* • <i>anaerobic digestion of solids</i> 10* • <i>utilization of digester gas for heating or cogeneration</i> 5* • <i>aerobic digestion of solids</i> 6* • <i>air-drying of sludge</i> 2* • <i>solids reduction (including incineration and wet oxidation)</i> 12* • <i>disposal in landfill</i> 2* • <i>solids composting</i> 10* • <i>land application of biosolids by contractor</i> 2* • <i>land application of biosolids by facility personnel</i> 10* 	
<p>Disinfection (0 point minimum to 10 point maximum):</p> <ul style="list-style-type: none"> • <i>chlorination or ultraviolet irradiation</i> 5* • <i>ozonization</i> 10* 	
<p>Effluent discharge (0 point minimum to 10 point maximum):</p> <ul style="list-style-type: none"> • <i>mechanical post-aeration</i> 2* • <i>direct recycling and reuse</i> 6* • <i>land treatment and surface or subsurface disposal</i> 4* 	
<p>Instrumentation (0 point minimum to 6 point maximum):</p> <ul style="list-style-type: none"> • SCADA or similar instrumentation systems are used to provide data with no process operation 0 • SCADA or similar instrumentation systems are used to provide data with limited process operation 2 • SCADA or similar instrumentation systems are used to provide data with moderate process operation 4 • SCADA or similar instrumentation systems are used to provide data with extensive or total process operation 6 	

CLASSIFICATION CRITERIA	CLASSIFICATION POINTS
<p>Laboratory control² (0 point minimum to 15 point maximum):</p> <ul style="list-style-type: none"> • bacteriological/biological (0 point minimum to 5 point maximum): <ul style="list-style-type: none"> • lab work done outside the facility 0 • membrane filter procedures 3 • use of fermentation tubes or any dilution method of fecal coliform determination 5 • chemical/physical (0 point minimum to 10 point maximum): <ul style="list-style-type: none"> • lab work done outside the facility 0 • push button or visual methods for simple tests such as pH or settleable solids 3 • additional procedures such as DO, COD, BOD, gas analysis, titration, solids content or volatile content 5 • more advanced determinations such as specific constituents, nutrients, total oils or phenols 7 • highly sophisticated instrumentation such as atomic absorption or gas chromatograph 10 	

¹ The key concepts are frequency or intensity of deviation, or excessive variation from normal or typical fluctuations. The deviations can be deviations in strength, toxicity, ratio of infiltration to inflow, or shock loads.

² The key concept is to credit laboratory analyses done on-site by facility personnel under the direction of an operator-in-charge with points from 0 to 15.

M.R. 162/2005

ANNEXE A
(article 2)

CRITÈRES DE CLASSIFICATION DES INSTALLATIONS

PARTIE 1

INSTALLATIONS DE DISTRIBUTION D'EAU

Classe des petits réseaux

1 Toute installation de distribution d'eau qui distribue l'eau à une population d'au plus 500 personnes s'inscrit dans la classe des petits réseaux.

Classes 1 à 4

2 Les installations de distribution d'eau s'inscrivent dans les classes 1 à 4 selon le tableau prévu ci-dessous, en fonction de l'importance de la population à laquelle elles distribuent de l'eau :

POPULATION DESSERVIE	CLASSIFICATION
de 501 à 1 500	classe 1
de 1 501 à 15 000	classe 2
de 15 001 à 50 000	classe 3
50 001 et plus	classe 4

PARTIE 2

INSTALLATIONS DE TRAITEMENT D'EAU

Définitions

3 Les définitions qui suivent s'appliquent à la présente partie.

« **aération** » Procédé qui consiste à ajouter de l'air à l'eau en introduisant de l'air dans l'eau ou en introduisant de l'eau dans l'air. ("aeration")

« **agitateur mécanique** » Palette, hélice ou turbine qui sert à disperser le coagulant dans l'eau qui subit le traitement. ("mechanical mixer")

« **compostage des matières solides** » Mélange de boues avec des matières organiques en décomposition pour les utiliser en fin de compte comme engrais. ("solids composting")

« **contrôle de la stabilité ou de la corrosion** »

a) ajustement des propriétés physiques ou chimiques de l'eau pour la rendre non corrosive;

b) ajout de produits chimiques dans l'eau pour former des couches protectrices à l'intérieur des canalisations d'eau d'une installation de distribution d'eau. ("stability or corrosion control")

« **correction d'acidité** » Modification du pH de l'eau non traitée ou préfinie par des méthodes mécaniques ou chimiques afin d'améliorer le rendement du traitement. ("pH adjustment")

« **décantation par capture des matières solides lors de leur ascension vers la surface** » Procédé qui combine coagulation, floculation et décantation dans un seul bassin, dans lequel l'eau qui est en cours de traitement est dirigée vers le haut, à travers un lit de boues ou un coulis de matières solides floculées suspendues. ("up-flow solid-contact sedimentation")

« **décantation tubulaire** » Élimination des matières en suspension dans l'eau à l'aide de tubes décanteurs qui sont placés en inclinaison dans un bassin, chaque tube décanteur servant de bassin de décantation peu profond dans lequel les particules s'accumulent sur la paroi interne du tube ou décantent au fond du bassin plus grand. ("tube sedimentation")

« **déshydratation mécanique** » Séparation forcée entre les solides et l'eau au cours du traitement à l'aide de procédés mécaniques. ("mechanical dewatering")

« **écoulements urbains** » Eau qui s'écoule dans l'eau de l'agglomération qui reçoit les eaux pluviales et qui risque de donner lieu à des plaintes concernant la qualité de l'eau traitée parce que les eaux de ruissellement contiennent un ou plusieurs des éléments suivants :

- a) huile, graisse, essence et autres résidus qui s'accumulent sur les surfaces revêtues;
- b) déjections d'animaux domestiques;
- c) engrais servant à l'aménagement paysager. ("urban runoff")

« **électrodialyse** » Procédé selon lequel de l'eau saumâtre circule entre des membranes perméables aux cations et aux anions, et où un courant électrique direct fournit la force motrice nécessaire pour faire sortir les ions à travers les membranes et pour soit réagir afin de créer un gaz, soit demeurer dans une solution séparée sous forme d'eau usée saumâtre. ("electrodialysis").

« **filtration directe** » Filtration effectuée immédiatement après l'étape de floculation du traitement, avec ou sans l'ajout préalable de l'adjuvant de filtration, en omettant l'étape de décantation de la filtration traditionnelle. ("direct filtration")

« **flottation à l'air dissous** » Procédé d'élimination des matières solides selon lequel l'air dissous est ajouté au clarificateur par le fond du bassin et l'air fait remonter les particules suspendues à la surface de l'eau où les particules sont ensuite enlevées par écrémage. ("dissolved air flotation")

« **flux horizontal** » En ce qui concerne l'eau, flux d'eau dans une direction horizontale à travers un bassin de décantation ou un clarificateur. ("horizontal flow")

« **mélangeur à injection** » Tube perforé ou gicleur qui disperse du coagulant dans l'eau traitée et qui a pour but, quand il est utilisé dans de bonnes proportions, d'assurer une répartition uniforme du coagulant sur l'ensemble du bassin de traitement. ("injection mixer")

« **mélangeur en ligne** » Diffuseur à l'intérieur d'un tuyau qui sert à ajouter du coagulant directement dans l'eau du tuyau, ce qui permet une dispersion rapide du coagulant sans perte de charge importante. ("in-line blender mixer")

« **osmose inversée** » Processus qui consiste à éliminer les impuretés ou les substances indésirables dans l'eau en les soumettant à une pression à travers une membrane semi-perméable que les impuretés ou les substances indésirables ne peuvent pas traverser. ("reverse osmosis")

« **SCADA** » Sigle anglais qui signifie système d'acquisition et de contrôle de données. ("SCADA")

« **système SCADA** » Système informatisé qui surveille et contrôle des installations à distance dans lesquelles :

a) un ordinateur central SCADA se trouve généralement dans un centre de contrôle exclusif ou dans une salle de contrôle de l'installation;

b) les installations à distance sont dotées de stations terminales à distance pour recueillir l'information et pour effectuer les contrôles à partir de la station de contrôle. ("SCADA instrumentation")

R.M. 162/2005

Classe des petits réseaux

4 Une installation de traitement d'eau qui respecte, par ailleurs, les critères d'une installation de traitement d'eau de la classe 1 s'inscrit dans la classe des petits réseaux :

- a) si elle alimente en eau une population d'au plus 500 personnes;
- b) si sa seule source d'eau non traitée est de l'eau souterraine qui n'est pas soumise à l'influence des eaux de surface;
- c) si le seul traitement appliqué à l'eau est la désinfection.

Classes 1 à 4

5(1) Les installations de traitement d'eau s'inscrivent dans les classes 1 à 4 selon le tableau suivant, d'après le nombre de points de classification évalués en vertu du système de points de classification prévu au paragraphe (2) :

FOURCHETTE DES POINTS DE CLASSIFICATION	CLASSIFICATION
de 0 à 30	classe 1
de 31 à 55	classe 2
de 56 à 75	classe 3
76 ou plus	classe 4

5(2) Les critères de classification énoncés dans la première colonne du tableau prévu ci-dessous et les points de classification figurant en regard de ces critères servent à déterminer la classe des installations de traitement d'eau. Chaque procédé unitaire — indiqué en italique dans la première colonne du tableau et par un astérisque après le chiffre correspondant de la deuxième colonne — ne devrait se voir attribuer des points qu'une seule fois.

CRITÈRES DE CLASSIFICATION	POINTS DE CLASSIFICATION
Taille (d'au moins 2 points à au plus 20 points) :	
<ul style="list-style-type: none"> • tranche partielle ou complète de population maximale desservie, jour de pointe (d'au moins 1 point à au plus 10 points) 	1 point par tranche partielle ou complète de 10 000
<ul style="list-style-type: none"> • le plus élevé des deux éléments suivants : débit prévu par jour moyen ou débit par jour moyen d'un mois de pointe (d'au moins 1 point à au plus 10 points) 	1 point par tranche partielle ou complète de 4,5 mégalitres par jour
Source d'approvisionnement en eau :	
<ul style="list-style-type: none"> • eau souterraine 	3
<ul style="list-style-type: none"> • eau souterraine sous l'influence de l'eau de surface 	5
<ul style="list-style-type: none"> • eau de surface 	5

CRITÈRES DE CLASSIFICATION	POINTS DE CLASSIFICATION
La qualité moyenne de l'eau non traitée varie suffisamment pour exiger des changements de traitement pendant 10 % du temps ou plus : (fourchette de 0 à 10 points selon les directives suivantes : variation pratiquement nulle = 0 point; forte variation [la qualité de l'eau non traitée est soumise à une grave pollution périodique par les déchets industriels] = 10 points)	de 0 à 10
Traitement chimique ou procédés d'adjonction :	
• <i>dioxyde de chlore (à des fins de désinfection ou autrement)</i>	10*
• <i>chlore, gazeux (à des fins de désinfection ou autrement)</i>	8*
• <i>chlore, liquide ou en poudre (à des fins de désinfection ou autrement)</i>	5*
• <i>chloramination</i>	8*
• <i>fluoration</i>	5*
• <i>ozonisation (production sur place)</i>	10*
• <i>correction de l'acidité (carbonate de calcium, dioxyde de carbone, acide chlorhydrique, oxyde de calcium, hydroxyde de calcium, soude caustique, acide sulfurique, etc.)</i>	4*
• <i>contrôle de la stabilité ou de la corrosion (oxyde de calcium, hydroxyde de calcium, carbonate de sodium, hexamétaphosphate de sodium, etc.)</i>	4*
• <i>pré-oxidation</i>	2*
Procédé de coagulation :	
• <i>coagulation</i>	5*
• <i>floculation</i>	5*
Procédés de clarification et de décantation :	
• <i>circulation horizontale (bassins rectangulaires)</i>	5*
• <i>circulation horizontale (bassins circulaires)</i>	7*
• <i>décantation par capture des matières solides lors de leur ascension vers la surface</i>	15*
• <i>décantation tubulaire ou lamellaire à l'aide de plaques, ou les deux</i>	7*
• <i>décantation (autre)</i>	5*
• <i>flottation à l'air dissous</i>	30*
Procédés de filtration :	
• <i>filtre rapide ouvert</i>	10*
• <i>filtres à boîtes, à sacs ou à cartouches</i>	5*
• <i>filtres à charbon actif en grain</i>	5*
• <i>filtre à sable lent</i>	10*
• <i>filtration sur membrane</i>	12*
• <i>filtration sous pression ou sur sables verts</i>	10*
Autres traitements :	
• <i>aération</i>	2*
• <i>aération par tours à garnissage</i>	5*
• <i>adoucissement par échange ionique</i>	5*
• <i>adoucissement chaux-cendre de soude</i>	20*
• <i>contrôle d'algues par traitement chimique</i>	2*

CRITÈRES DE CLASSIFICATION	POINTS DE CLASSIFICATION
• <i>charbon actif en poudre</i>	2*
• <i>désinfection par exposition aux rayons ultraviolets</i>	7*
• <i>traitements spéciaux (électrodialyse ou autre)</i>	15*
Élimination des résidus :	
• <i>évacuation dans les étangs de décantation</i>	2*
• <i>déshydratation mécanique</i>	5*
• <i>épandage des boues sur le sol</i>	5*
• <i>compostage des matières solides</i>	5*
Caractéristiques des installations :	
• instrumentation (d'au moins 0 point à au plus 6 points)	
• le système SCADA ou des systèmes similaires servent à fournir des données sans opération de traitement	0
• le système SCADA ou des systèmes similaires servent à fournir des données avec une opération de traitement limitée	2
• le système SCADA ou des systèmes similaires servent à fournir des données avec une opération de traitement vaste ou complète	6
• taille du puits de décantation inférieure au débit prévu d'une journée moyenne	5
Analyse en laboratoire ¹ (d'au moins 0 point à au plus 13 points) :	
• bactériologique (d'au moins 0 point à au plus 3 points) :	
• effectuée à l'extérieur de l'installation	0
• colimétrie	3
• chimique ou physique (d'au moins 0 point à au plus 10 points) :	
• effectuée à l'extérieur de l'installation	0
• bouton-poussoir ou colorimétrie (essai de chlore, analyse du pH, etc.)	de 1 à 3
• méthodes supplémentaires tels le titrage, le contrôle de l'alkalinité ou de la dureté	de 1 à 5
• analyses plus approfondies (produits inorganiques, etc.)	de 1 à 7
• à l'aide d'instruments hautement sophistiqués (absorption atomique, chromatographe en phase gazeuse, etc.)	10

¹ La notion essentielle consiste à créditer les analyses en laboratoire faites sur place par le personnel de l'installation sous la direction d'un exploitant en chef, avec des points de 0 à 13.

PARTIE 3

INSTALLATIONS DE COLLECTE DES EAUX USÉES

Classe des petits réseaux

6 Une installation de collecte des eaux usées qui collecte des eaux usées auprès d'une population d'au plus 500 personnes s'inscrit dans la classe des petits réseaux.

Classes 1 à 4

7 Les installations de collecte des eaux usées s'inscrivent dans les classes 1 à 4 selon le tableau prévu ci-dessous, d'après la taille de la population auprès de laquelle elles collectent les eaux usées :

<u>POPULATION DESSERVIE</u>	<u>CLASSIFICATION</u>
de 501 à 1 500	classe 1
de 1 501 à 15 000	classe 2
de 15 001 à 50 000	classe 3
50 001 et plus	classe 4

PARTIE 4

INSTALLATIONS DE TRAITEMENT DES EAUX USÉES

Définitions

8 Les définitions qui suivent s'appliquent à la présente partie.

« **adjonction d'un produit chimique** » Ajout d'une substance chimique dans les eaux usées à un point d'application afin de corriger l'acidité ou l'alcalinité, d'améliorer l'élimination des matières solides, de déchlorer, d'éliminer les odeurs, de fournir des éléments nutritifs, ou d'améliorer autrement le traitement. Ce procédé ne comprend pas la chloration à des fins de désinfection des effluents, ni l'ajout d'enzymes, ni tout procédé prévu à la rubrique de « traitement tertiaire » au tableau de l'article 10 de la présente annexe. ("chemical addition")

« **boues activées** » Traitement des eaux usées par aération d'organismes en suspension, suivie de clarification, notamment :

- a) aération prolongée;
- b) systèmes d'aération prolongée à cycle intermittent;
- c) autres procédés similaires, y compris les réacteurs discontinus en séquence. ("activated sludge")

« **compostage des matières solides** » Procédé de décomposition biologique qui produit du dioxyde de carbone, de l'eau et de la chaleur, et qui comporte le dépôt en andains, le tas en fermentation à air pulsé et le compostage mécanique. ("solids composting")

« **déshydratation mécanique** » Élimination de l'eau des boues par l'un ou l'autre des procédés mentionnés ci-après, avec ou sans ajout de polymères :

- a) filtration sous vide;
- b) filtre-pressé à cadre, sur bande ou à plateaux;
- c) centrifuge;
- d) flottation à l'air dissous. ("mechanical dewatering")

« **digestion anaérobie** » Traitement des eaux usées effectué par l'action de microorganismes en l'absence d'air ou d'oxygène moléculaire, qui comprend entre autres les traitements anaérobie à faible charge et à forte charge, et les traitements combinés tels que les clarigesters. ("anaerobic treatment")

« **épandage au sol de biosolides par un entrepreneur** » Épandage de biosolides sur le sol ou réutilisation bénéfique par un entrepreneur sans la surveillance de l'exploitant d'une installation de traitement des eaux usées. ("land application of biosolids by contractor")

« **filtration dans la masse** » Élimination de matières solides des eaux usées à l'aide d'un filtre à gravier ou de tout autre moyen, ou d'un filtre multicouche. ("media filtration")

« **post-aération mécanique** » Introduction d'air dans un effluent par des moyens mécaniques tels que l'aération par diffusion d'air ou par voie mécanique, mais excluant l'aération à cascades. ("mechanical post-aeration")

« **réacteur à biomasse fixée** » Biofiltration sur lit bactérien ou par disques biologiques, suivie d'une clarification secondaire. ("fixed-film reactor")

« **SCADA** » et « **système SCADA** » S'entendent au sens de la partie 2. ("SCADA" and "SCADA instrumentation")

« **stabilisation des matières solides** » Traitements — y compris traitement à la chaux ou autre, conditionnement thermique, digestion aérobie ou anaérobie et compostage des matières solides — appliqués aux boues aux fins suivantes :

- a) oxyder ou réduire la matière organique des boues pour en faire une forme plus stable;
- b) réduire les agents pathogènes;
- c) réduire les substances chimiques organiques volatiles et, en conséquence, le risque d'odeur. ("solids stabilization")

« **traitement par épandage et élimination en surface ou souterraine** » Traitement des effluents par élimination :

- a) à la surface du sol par infiltration rapide, par distributeur rotatif ou par irrigation par aspersion;
- b) sous la surface du sol par galerie d'infiltration, par injection, par gravité ou par champ de drainage pressurisé. ("land treatment and surface or subsurface disposal")

« **traitement tertiaire biologique ou chimique/biologique des déchets** » Traitement tertiaire des eaux usées pour éliminer les éléments nutritifs, qui comprend la nitrification, la dénitrification ou l'élimination du phosphore à l'aide de procédés biologiques ou chimiques ou d'une combinaison des deux. ("biological or chemical/biological advanced waste treatment")

« **traitement tertiaire chimique/physique sans traitement secondaire** » Recours à un traitement tertiaire chimique ou physique — tel que l'adsorption sur charbon actif, l'extraction à l'air, la précipitation ou la coagulation chimique — sans traitement secondaire. ("chemical/physical advanced treatment without secondary treatment")

« **traitement tertiaire chimique/physique suivant un traitement secondaire** » Recours à un traitement tertiaire chimique ou physique — tel que l'adsorption sur charbon actif, l'extraction à l'air, la précipitation ou la coagulation chimique — après un traitement secondaire ou parallèlement à ce dernier. ("chemical/physical advanced treatment following secondary treatment")

Classe de petits réseaux

9 Une installation de traitement des eaux usées qui respecte, par ailleurs, les critères d'une installation de traitement des eaux usées de la classe 1 s'inscrit dans la classe des petits réseaux :

- a) si elle traite les eaux usées d'une population d'au plus 500 personnes;
- b) si l'installation ne recourt à aucun traitement mécanique.

Classes 1 à 4

10(1) Les installations de traitement des eaux usées s'inscrivent dans les classes 1 à 4 selon le tableau prévu ci-dessous, d'après le nombre de points de classification évalués en vertu du système de points de classification exposé au paragraphe (2) :

FOURCHETTE DES POINTS DE CLASSIFICATION	CLASSIFICATION
de 0 à 30	classe 1
de 31 à 55	classe 2
de 56 à 75	classe 3
76 ou plus	classe 4

10(2) Les critères de classification énoncés dans la première colonne du tableau ci-dessous et les points de classification figurant en regard de ces critères servent à déterminer la classe des installations de traitement des eaux usées. Chaque procédé unitaire — indiqué en italique dans la première colonne du tableau et par un astérisque après le chiffre correspondant de la deuxième colonne — ne devrait se voir attribuer des points qu'une seule fois.

CRITÈRES DE CLASSIFICATION	POINTS DE CLASSIFICATION
Taille (d'au moins 2 points à au plus 20 points) :	
<ul style="list-style-type: none"> • <i>tranche partielle ou complète de population maximale desservie, jour de pointe (d'au moins 1 point à au plus 10 points)</i> 	1 point par tranche partielle ou complète de 10 000
<ul style="list-style-type: none"> • <i>le plus élevé des deux éléments suivants : le débit prévu par jour moyen ou le débit par jour moyen d'un mois de pointe (d'au moins 1 point à au plus 10 points)</i> 	1 point par tranche partielle ou complète de 4,5 mégalitres par jour

CRITÈRES DE CLASSIFICATION	POINTS DE CLASSIFICATION
Variation dans l'eau non traitée ¹ (d'au moins 0 point à au plus 6 points) :	
• les variations ne dépassent pas celles auxquelles on s'attend normalement ou généralement	0
• les écarts récurrents ou les variations excessives de 100 à 200 % quant à la force ou au débit, ou les deux	2
• les écarts récurrents ou les variations excessives de plus de 200 % quant à la force ou au débit, ou les deux	4
• les déchets à traiter sont sujets à des déversements de déchets toxiques	6
• incidence des boues ou des déchets transportés par camion (d'au moins 0 point à au plus 4 points)	de 0 à 4
Traitement préliminaire :	
• <i>pompage à l'installation du flux principal</i>	3*
• <i>dégrillage ou broyage</i>	3*
• <i>dessablage</i>	3*
• <i>égalisation</i>	1*
Traitement primaire :	
• <i>clarificateurs</i>	5*
• <i>traitement anaérobie avec torche au biogaz</i>	10*
• <i>traitement anaérobie dans une usine de récupération des biogaz</i>	15*
Traitement secondaire :	
• <i>réacteur à biomasse fixée</i>	10*
• <i>boues activées</i>	15*
• <i>bassins de stabilisation sans aération</i>	5*
• <i>bassins de stabilisation avec aération</i>	8*
Traitement tertiaire :	
• <i>lagunes tertiaires pour traitement tertiaire des déchets</i>	2*
• <i>traitement tertiaire physique/chimique des déchets sans traitement secondaire</i>	15*
• <i>traitement tertiaire physique/chimique des déchets après le traitement secondaire</i>	10*
• <i>traitement tertiaire biologique ou chimique/biologique des déchets</i>	12*
• <i>nitrification par aération prolongée et aménagée uniquement</i>	5*
• <i>échange d'ions pour le traitement tertiaire des déchets</i>	10*
• <i>osmose inversée, électrodialyse et autres techniques de filtration sur membrane</i>	10*
• <i>récupération chimique par traitement tertiaire des déchets, régénération du carbone</i>	4*
• <i>filtration dans la masse</i>	5*

CRITÈRES DE CLASSIFICATION	POINTS DE CLASSIFICATION
Traitements supplémentaires :	
• adjonction de produits chimiques (2 points pour chaque produit chimique ajouté, jusqu'à concurrence de 6 points)	de 0 à 6*
• flottation à l'air dissous (autre que pour l'épaississement des boues)	8*
• filtre intermittent à sable	2*
• filtre intermittent à sable pour recirculation	3*
• microtamis	5*
• régénération d'oxygène	5*
Manutention des solides:	
• stockage (dont le but n'est pas la stabilisation)	2*
• stabilisation par le stockage (y compris le stockage qui s'ensuit)	4*
• épauissement par gravité	2*
• déshydratation mécanique	8*
• digestion anaérobie des solides	10*
• utilisation des gaz de digestion pour le chauffage ou la cogénération	5*
• digestion aérobie des solides	6*
• séchage à l'air des boues	2*
• réduction des solides (y compris l'incinération et l'oxydation en milieu humide)	12*
• décharge	2*
• compostage des solides	10*
• épandage des biosolides sur le sol par un entrepreneur	2*
• épandage de biosolides par le personnel de l'installation	10*
Désinfection (d'au moins 0 point à au plus 10 points) :	
• chloration ou irradiation aux ultraviolets	5*
• ozonisation	10*
Déversement d'effluents (d'au moins 0 point à au plus 10 points) :	
• post-aération mécanique	2*
• recyclage direct et réutilisation	6*
• traitement par épandage et évacuation (en surface et souterraine)	4*
Instrumentation (d'au moins 0 point à au plus 6 points) :	
• le système SCADA ou des systèmes similaires servent à fournir des données sans opération de traitement	0
• le système SCADA ou des systèmes similaires servent à fournir des données avec une opération de traitement limitée	2
• le système SCADA ou des systèmes similaires servent à fournir des données avec une opération de traitement modérée	4
• le système SCADA ou des systèmes similaires servent à fournir des données avec une opération de traitement vaste ou complète	6

CRITÈRES DE CLASSIFICATION	POINTS DE CLASSIFICATION
Contrôle en laboratoire ² (d'au moins 0 point à au plus 15 points) :	
• bactériologique/biologique (d'au moins 0 point à au plus 5 points) :	
• travaux de laboratoire exécutés en dehors de l'installation	0
• colimétries sur membrane filtrante	3
• utilisation de tubes de fermentation ou de toute autre méthode de dilution pour faire la colimétrie des coliformes fécaux	5
• chimique/physique (d'au moins 0 point à au plus 10 points) :	
• travaux de laboratoire exécutés en dehors de l'installation	0
• bouton-poussoir ou méthodes visuelles pour des tests simples tels que le pH ou les solides décantables	3
• méthodes supplémentaires telles que O.D., D.C.O., D.B.O., analyse des gaz, titration, teneur en solides ou teneur en substances volatiles	5
• dosages plus poussés tels que pour certains composants, éléments nutritifs, total de pétrole ou phénol	7
• instrumentation très complexe telle que l'absorption atomique ou le chromatographe en phase gazeuse	10

¹ Les notions essentielles sont la fréquence ou l'intensité de l'écart ou une variation excessive par rapport aux fluctuations normales ou typiques. Ces écarts peuvent avoir trait à la force, à la toxicité, au ratio d'infiltration par rapport au flux entrant ou aux surcharges.

² La notion essentielle consiste à créditer les analyses en laboratoire faites sur place par le personnel de l'installation sous la direction d'un exploitant en chef, avec des points de 0 à 15.

SCHEDULE B
(Sections 13, 16, 18, 19 and 21)

WATER AND WASTEWATER FACILITY
OPERATOR CERTIFICATION REQUIREMENTS

Definitions and interpretation

1(1) In this Schedule,

"**certification exam**" means an examination acceptable to the director; (« examen d'accréditation »)

"**contact-hour**" means one hour of two-way communication and interaction between a learner and instructor in order for the learner to gain knowledge and to receive feedback; (« heure-contact »)

"**direct responsible charge**", in relation to operating experience, means experience gained by the holder of a class 2, 3 or 4 operator's certificate, through responsibility for the performance or supervision of daily on-site operational duties for a class 2, class 3 or class 4 facility, or an operating shift in such a facility; (« poste comportant des responsabilités »)

"**DRC**" means direct responsible charge;

"**GED**" means an adult education diploma issued by the Manitoba Department of Education, Training and Youth; (« formation générale »)

"**operating experience**" means the time spent working at a facility in satisfactory performance of operating duties as approved by the director. (« expérience d'exploitation »)

1(2) For the purposes of the operator certification criteria set out in this Schedule, one continuing education unit represents 10 contact-hours of participation in an organized continuing education experience

(a) under responsible sponsorship, capable direction, and qualified instructors; or

(b) presented in a manner approved by the director.

ANNEXE B
(articles 13, 16, 18, 19 et 21)

NORMES D'ACCRÉDITATION
DES EXPLOITANTS D'INSTALLATIONS
DE TRAITEMENT D'EAU

Définitions et champ d'application

1(1) Les définitions qui suivent s'appliquent à la présente annexe.

« **DRC** » Version anglaise seulement

« **examen d'accréditation** » Examen que le directeur juge acceptable. ("certification exam")

« **expérience d'exploitation** » Expérience acquise dans une installation au cours de l'exécution, de manière satisfaisante, de tâches liées à l'exploitation qu'approuve le directeur. ("operating experience")

« **formation générale** » Diplôme d'éducation des adultes que décerne le ministère de l'Éducation, de la Formation professionnelle et de la Jeunesse du Manitoba. ("GED")

« **heure-contact** » Une heure de communication et d'échange entre un instructeur et un apprenant permettant à ce dernier d'acquérir des connaissances et d'obtenir une rétroaction. ("contact-hour")

« **poste comportant des responsabilités** » Poste qu'occupe le titulaire d'un certificat d'exploitant de classe 2, 3 ou 4 et grâce auquel il acquiert de l'expérience d'exploitation en exécutant ou en supervisant quotidiennement ou au cours d'un poste de travail des tâches liées à l'exploitation d'une installation de classe 2, 3 ou 4. ("direct responsible charge")

1(2) Pour l'application des normes d'accréditation des exploitants énoncées dans la présente annexe, une unité d'éducation permanente correspond, selon le cas, à 10 heures-contact de participation à une activité structurée d'éducation permanente :

a) bien encadrée, dirigée et offerte par des instructeurs compétents;

b) offerte d'une manière qu'approuve le directeur.

Facility owner must designate direct responsible charge positions

2 An operator will only receive credit for DRC experience after the facility owner has designated the operator's position as a DRC position. An owner may designate any number of DRC positions for the facility.

Operator-in-training class

3(1) An applicant who applies for an operator-in-training class certificate for a category of facility must

- (a) be employed in a facility of that category; and
- (b) have attained the level of academic achievement that is required for the class of operator's certificate corresponding to the class of facility in which he or she is employed.

3(2) Despite clause (1)(b), an applicant for a class 3 or 4 operator-in-training certificate must only have attained the level of academic achievement that is required for a class 2 operator's certificate.

Small system class

4(1) For small system class facilities only two categories of operator's certificate are available:

- (a) a combined water works certificate for water treatment and water distribution facilities;
- (b) a combined wastewater works certificate for wastewater treatment and wastewater collection facilities.

4(2) An applicant who applies for a small system class operator's certificate must

- (a) have completed grade 10 in Manitoba or have a GED-10, or have comparable academic qualifications from another jurisdiction, or have completed a course of study approved by the director;

Désignation de postes comportant des responsabilités

2 L'expérience qu'un exploitant acquiert dans un poste comportant des responsabilités n'est reconnue que si le propriétaire de l'installation a désigné le poste à ce titre. Il n'y a aucune restriction quant au nombre de postes qu'un propriétaire peut ainsi désigner dans son installation.

Classe des apprentis exploitants

3(1) L'auteur d'une demande de certificat d'apprenti exploitant pour une catégorie d'installation est tenu de satisfaire aux exigences suivantes :

- a) il travaille dans une installation de cette catégorie;
- b) il a obtenu la formation scolaire exigée pour la classe de certificat d'exploitant correspondant à la classe d'installation où il travaille.

3(2) Malgré l'alinéa (1)b), l'auteur d'une demande de certificat d'apprenti exploitant de classe 3 ou 4 ne doit avoir obtenu que la formation scolaire exigée des titulaires de certificats d'exploitants de classe 2.

Classe des petits réseaux

4(1) Il n'existe que deux catégories de certificats d'exploitants visant les installations de la classe des petits réseaux :

- a) un certificat combiné d'ouvrages d'adduction d'eau visant les installations de traitement et de distribution d'eau;
- b) un certificat combiné d'ouvrages d'évacuation des eaux usées visant les installations de traitement et de collecte des eaux usées.

4(2) L'auteur d'une demande de certificat d'exploitant de la classe des petits réseaux est tenu de satisfaire aux exigences suivantes :

- a) il a terminé la dixième année au Manitoba, possède une formation générale de dixième année, a obtenu une formation scolaire équivalente auprès d'un autre ressort ou a terminé un programme d'études approuvé par le directeur;

(b) have six months of operating experience in

(i) a water treatment facility or water distribution facility, if he or she is applying for an operator's certificate for water works, or

(ii) a wastewater treatment facility or wastewater collection facility, if he or she is applying for an operator's certificate for wastewater works;

(c) have obtained a mark of at least 70% on

(i) a small system class water works certification exam, if he or she is applying for an operator's certificate for water works,

(ii) a small system class wastewater works certification exam, if he or she is applying for an operator's certificate for wastewater works, or

(iii) both small system class water works and wastewater works certification exams, if he or she is applying for an operator's certificate for both water works and wastewater works.

4(3) Despite clause (2)(a), an applicant may, without limitation, substitute operating experience or continuing education for any portion of the academic achievement required by that clause, based on the following standards:

(a) one year of operating experience for two grades of grade school level achievement;

(b) one year of operating experience for one grade of high school level achievement;

(c) forty-five continuing education units of training in water or wastewater works operations, engineering, science, or a related field for one grade of high school level achievement.

b) il possède six mois d'expérience d'exploitation :

(i) dans une installation de traitement ou de distribution d'eau si son certificat d'exploitant vise des ouvrages d'adduction d'eau,

(ii) dans une installation de traitement ou de collecte des eaux usées si son certificat d'exploitant vise des ouvrages d'évacuation des eaux usées;

c) il a obtenu une note d'au moins 70 % :

(i) à l'examen d'accréditation visant les ouvrages d'adduction d'eau de la classe des petits réseaux si sa demande concerne un certificat d'exploitant de tels ouvrages,

(ii) à l'examen d'accréditation visant les ouvrages d'évacuation des eaux usées de la classe des petits réseaux si sa demande concerne un certificat d'exploitant de tels ouvrages,

(iii) à l'examen d'accréditation visant les ouvrages d'adduction d'eau et d'évacuation des eaux usées de la classe des petits réseaux si sa demande concerne ces deux types d'ouvrages.

4(3) Malgré l'alinéa (2)a), l'auteur de la demande peut remplacer selon les critères indiqués ci-dessous, sans qu'aucune restriction ne lui soit imposée, la formation scolaire que prévoit cet alinéa par de l'expérience d'exploitation ou de l'éducation permanente :

a) une année d'expérience d'exploitation équivaut à deux années de formation scolaire de niveau primaire;

b) une année d'expérience d'exploitation équivaut à une année de formation scolaire de niveau secondaire;

c) 45 unités d'éducation permanente dans le domaine de l'exploitation des ouvrages d'adduction d'eau ou d'évacuation des eaux usées, du génie, des sciences ou dans un domaine connexe équivalent à une année de formation scolaire de niveau secondaire.

4(4) Despite clause (2)(b), an applicant may substitute 22.5 continuing education units of relevant training for the operating experience required by that clause.

4(5) Despite clause (2)(c), an applicant who is applying for

(a) a small system class water distribution facility operator's certificate and a class 1 water treatment facility operator's certificate must, in relation to the water distribution operator's certificate, take and obtain the required mark on the class 1 water distribution certification exam; and

(b) a small system class wastewater collection facility operator's certificate and a class 1 wastewater treatment facility operator's certificate must, in relation to the wastewater collection operator's certificate, take and obtain the required mark on the class 1 wastewater collection certification exam.

Class 1

5(1) An applicant who applies for a class 1 operator's certificate for any category of facility must

(a) have a Manitoba high school diploma, a GED-12 or comparable academic qualifications from another jurisdiction, or have completed a course of study approved by the director;

(b) have one year of operating experience in a class 1 or higher facility of the category applied for; and

(c) have obtained a mark of at least 70% on

(i) a class 1 water treatment certification exam, if he or she is applying for an operator's certificate for water treatment facilities,

4(4) Malgré l'alinéa (2)b), l'auteur de la demande peut remplacer l'expérience d'exploitation qu'exige cette disposition par 22,5 unités d'éducation permanente.

4(5) Malgré l'alinéa (2)c), l'auteur d'une demande :

a) de certificat d'exploitant de la classe des petits réseaux pour une installation de distribution d'eau et de certificat d'exploitant pour une installation de traitement d'eau de classe 1 est tenu d'obtenir, en ce qui concerne la distribution d'eau, la note exigée à l'examen d'accréditation visant les installations de distribution d'eau de classe 1;

b) de certificat d'exploitant de la classe des petits réseaux pour une installation de collecte des eaux usées et de certificat d'exploitant pour une installation de traitement des eaux usées de classe 1 est tenu d'obtenir, en ce qui concerne la collecte des eaux usées, la note exigée à l'examen d'accréditation visant les installations de collecte des eaux usées de classe 1.

Classe 1

5(1) L'auteur d'une demande de certificat d'exploitant de classe 1 pour n'importe quelle catégorie d'installation est tenu de satisfaire aux exigences suivantes :

a) il est titulaire d'un diplôme d'études secondaires du Manitoba, possède une formation générale de douzième année, a obtenu une formation scolaire équivalente auprès d'un autre ressort ou a terminé un programme d'études approuvé par le directeur;

b) il possède une année d'expérience d'exploitation dans une installation de classe 1 ou d'une classe supérieure de la même catégorie que celle que vise sa demande;

c) il a obtenu une note d'au moins 70 % :

(i) à l'examen d'accréditation visant les installations de traitement d'eau de classe 1 si sa demande concerne de telles installations,

(ii) a class 1 water distribution certification exam, if he or she is applying for an operator's certificate for water distribution facilities,

(iii) a class 1 wastewater treatment certification exam, if he or she is applying for an operator's certificate for wastewater treatment facilities, or

(iv) a class 1 wastewater collection certification exam, if he or she is applying for an operator's certificate for wastewater collection facilities.

5(2) An applicant may apply for a class 1 operator's certificate for more than one category of facility. In that case, he or she must meet the requirements of clauses (1)(b) and (c) for each of the categories of facility for which he or she is applying.

5(3) Despite clause (1)(a), an applicant may, without limitation, substitute operating experience or continuing education for any portion of the academic achievement required by that clause, based on the following standards:

(a) one year of operating experience for two grades of grade school level achievement;

(b) one year of operating experience for one grade of high school level achievement;

(c) forty-five continuing education units of training in water or wastewater works operations, engineering, science, or any related field for one grade of high school level achievement.

(ii) à l'examen d'accréditation visant les installations de distribution d'eau de classe 1 si sa demande concerne de telles installations,

(iii) à l'examen d'accréditation visant les installations de traitement des eaux usées de classe 1 si sa demande concerne de telles installations,

(iv) à l'examen d'accréditation visant les installations de collecte des eaux usées de classe 1 si sa demande concerne de telles installations.

5(2) Il est possible de présenter une demande de certificat d'exploitant de classe 1 pour plusieurs catégories d'installations. L'auteur de la demande satisfait alors aux exigences des alinéas (1)b) et c) pour chacune des catégories qui l'intéressent.

5(3) Malgré l'alinéa (1)a), l'auteur de la demande peut remplacer selon les critères indiqués ci-dessous, sans qu'aucune restriction ne lui soit imposée, la formation scolaire que prévoit cet alinéa par de l'expérience d'exploitation ou de l'éducation permanente :

a) une année d'expérience d'exploitation équivaut à deux années de formation scolaire de niveau primaire;

b) une année d'expérience d'exploitation équivaut à une année de formation scolaire de niveau secondaire;

c) 45 unités d'éducation permanente dans le domaine de l'exploitation d'ouvrages d'adduction d'eau ou d'évacuation des eaux usées, du génie, des sciences ou dans un domaine connexe équivalent à une année de formation scolaire de niveau secondaire.

Class 2

6(1) An applicant who applies for a class 2 operator's certificate for any category of facility must

(a) have a Manitoba high school diploma, a GED-12 or comparable academic qualifications from another jurisdiction, or have completed a course of study approved by the director;

(b) have three years of operating experience in a class 1 or higher facility of the category applied for; and

(c) have obtained a mark of at least 70% on

(i) a class 2 water treatment certification exam, if he or she is applying for an operator's certificate for water treatment facilities,

(ii) a class 2 water distribution certification exam, if he or she is applying for an operator's certificate for water distribution facilities,

(iii) a class 2 wastewater treatment certification exam, if he or she is applying for an operator's certificate for wastewater treatment facilities, or

(iv) a class 2 wastewater collection certification exam, if he or she is applying for an operator's certificate for wastewater collection facilities.

6(2) An applicant may apply for a class 2 operator's certificate for more than one category of facility. In that case, he or she must meet the requirements of clauses (1)(b) and (c) for each of the categories of facility for which he or she is applying.

Classe 2

6(1) L'auteur d'une demande de certificat d'exploitant de classe 2 pour n'importe quelle catégorie d'installation est tenu de satisfaire aux exigences suivantes :

a) il est titulaire d'un diplôme d'études secondaires du Manitoba, possède une formation générale de douzième année, a obtenu une formation scolaire équivalente auprès d'un autre ressort ou a terminé un programme d'études approuvé par le directeur;

b) il possède trois années d'expérience d'exploitation dans une installation de classe 1 ou d'une classe supérieure de la même catégorie que celle que vise sa demande;

c) il a obtenu une note d'au moins 70 % :

(i) à l'examen d'accréditation visant les installations de traitement d'eau de classe 2 si sa demande concerne de telles installations,

(ii) à l'examen d'accréditation visant les installations de distribution d'eau de classe 2 si sa demande concerne de telles installations,

(iii) à l'examen d'accréditation visant les installations de traitement des eaux usées de classe 2 si sa demande concerne de telles installations,

(iv) à l'examen d'accréditation visant les installations de collecte des eaux usées de classe 2 si sa demande concerne de telles installations.

6(2) Il est possible de présenter une demande de certificat d'exploitant de classe 2 pour plusieurs catégories d'installations. L'auteur de la demande satisfait alors aux exigences des alinéas (1)b) et c) pour chacune des catégories qui l'intéressent.

6(3) Despite clause (1)(a), an applicant may, without limitation, substitute operating experience or continuing education for any portion of the academic achievement required by that clause, based on the following standards:

- (a) one year of operating experience for two grades of grade school level achievement;
- (b) one year of operating experience for one grade of high school level achievement;
- (c) forty-five continuing education units of training in water or wastewater works operations, engineering, science, or a related field for one grade of high school level achievement.

6(4) Despite clause (1)(b), an applicant may substitute 45 further continuing education units of training, or one year of post-high school education, in water or wastewater works operations, engineering, science, or a related field for one year of the operating experience required by that clause. A maximum of 1.5 years of operating experience may be replaced under this subsection by such continuing education units and post-high school education.

Class 3

7(1) An applicant who applies for a class 3 operator's certificate for any category of facility must

- (a) have a Manitoba high school diploma, a GED-12 or comparable academic qualifications from another jurisdiction, or have completed a course of study approved by the director;

6(3) Malgré l'alinéa (1)a), l'auteur de la demande peut remplacer selon les critères indiqués ci-dessous, sans qu'aucune restriction ne lui soit imposée, la formation scolaire que prévoit cet alinéa par de l'expérience d'exploitation ou de l'éducation permanente :

- a) une année d'expérience d'exploitation équivaut à deux années de formation scolaire de niveau primaire;
- b) une année d'expérience d'exploitation équivaut à une année de formation scolaire de niveau secondaire;
- c) 45 unités d'éducation permanente dans le domaine de l'exploitation d'ouvrages d'adduction d'eau ou d'évacuation des eaux usées, du génie, des sciences ou dans un domaine connexe équivalent à une année de formation scolaire de niveau secondaire.

6(4) Malgré l'alinéa (1)b), l'auteur de la demande peut remplacer une des années d'expérience d'exploitation qu'exige cette disposition par 45 unités d'éducation permanente supplémentaires ou par une année d'études postsecondaires dans le domaine de l'exploitation des ouvrages d'adduction d'eau ou d'évacuation des eaux usées, du génie, des sciences ou dans un domaine connexe. En vertu du présent paragraphe, un maximum de 1,5 année d'expérience d'exploitation peut être remplacée par les unités d'éducation permanente et les études postsecondaires.

Classe 3

7(1) L'auteur d'une demande de certificat d'exploitant de classe 3 pour n'importe quelle catégorie d'installation est tenu de satisfaire aux exigences suivantes :

- a) il est titulaire d'un diplôme d'études secondaires du Manitoba, possède une formation générale de douzième année, a obtenu une formation scolaire équivalente auprès d'un autre ressort ou a terminé un programme d'études approuvé par le directeur;

(b) have two years of post-high school education in water or wastewater works operations, engineering, science, or a related field;

(c) have four years of operating experience in a class 2 or higher facility of the category applied for; and

(d) subject to subsection (3), have obtained a mark of at least 70% on

(i) a class 3 water treatment certification exam, if he or she is applying for an operator's certificate for water treatment facilities,

(ii) a class 3 water distribution certification exam, if he or she is applying for an operator's certificate for water distribution facilities,

(iii) a class 3 wastewater treatment certification exam, if he or she is applying for an operator's certificate for wastewater treatment facilities, or

(iv) a class 3 wastewater collection certification exam, if he or she is applying for an operator's certificate for wastewater collection facilities.

7(2) An applicant may apply for a class 3 operator's certificate for more than one category of facility. In that case, he or she must meet the requirements of clauses (1)(c) and (d) for each of the categories of facility for which he or she is applying.

7(3) For applicants who are applying for class 3 operators' certificates for water treatment or wastewater treatment facilities, two of the four years of operating experience required by clause (1)(c) must be DRC experience at a class 2 or higher facility of the applicable category. The DRC requirements shall not apply to those operators working in class 4 facilities nor to those seeking certification in water distribution and/or wastewater collection.

b) il a fait deux années d'études postsecondaires dans le domaine de l'exploitation des ouvrages d'adduction d'eau ou d'évacuation des eaux usées, du génie, des sciences ou dans un domaine connexe;

c) il possède quatre années d'expérience d'exploitation dans une installation de classe 2 ou d'une classe supérieure de la même catégorie que celle que vise sa demande;

d) sous réserve du paragraphe (3), il a obtenu une note d'au moins 70 % :

(i) à l'examen d'accréditation visant les installations de traitement d'eau de classe 3 si sa demande concerne de telles installations,

(ii) à l'examen d'accréditation visant les installations de distribution d'eau de classe 3 si sa demande concerne de telles installations,

(iii) à l'examen d'accréditation visant les installations de traitement des eaux usées de classe 3 si sa demande concerne de telles installations,

(iv) à l'examen d'accréditation visant les installations de collecte des eaux usées de classe 3 si sa demande concerne de telles installations.

7(2) Il est possible de présenter une demande de certificat d'exploitant de classe 3 pour plusieurs catégories d'installations. L'auteur de la demande satisfait alors aux exigences des alinéas (1)c) et d) pour chacune des catégories qui l'intéressent.

7(3) L'auteur d'une demande de certificat d'exploitant de classe 3 pour une installation de traitement d'eau ou des eaux usées acquiert deux des quatre années d'expérience d'exploitation exigées à l'alinéa (1)c) dans un poste comportant des responsabilités occupé dans une installation de classe 2 ou supérieure de la catégorie pertinente. Cette restriction ne s'applique pas aux exploitants qui travaillent dans une installation de classe 4 ni à ceux qui désirent être accrédités dans le domaine de la distribution de l'eau ou de la collecte des eaux usées.

7(4) Despite clauses (1)(a) and (b), an applicant may

(a) without limitation, substitute operating experience or continuing education for any portion of the academic achievement required by that clause, based on the following standards:

(i) one year of operating experience for two grades of grade school level achievement,

(ii) one year of operating experience for one grade of high school level achievement,

(iii) forty-five continuing education units of training in water or wastewater works operations, engineering, science, or a related field for one grade of high school level achievement;

(b) substitute a maximum of one year of DRC experience in a class 2 or higher facility for one year of post-high school education; and

(c) if he or she is applying for an operator's certificate for a water treatment or wastewater treatment facility, substitute five further years of DRC experience in a class 2 or higher facility for a maximum of one additional year of post-high school education.

7(5) Despite clause (1)(c), an applicant may substitute 45 further continuing education units of training, or one year of post-high school education, in water or wastewater works operations, engineering, science, or a related field for one year of the non-DRC operating experience required by that clause. A maximum of two years of non-DRC operating experience may be replaced under this subsection by such continuing education units and post-high school education.

7(4) Malgré les alinéas (1)a) et b), l'auteur de la demande peut :

a) remplacer selon les critères indiqués ci-dessous, sans qu'aucune restriction ne lui soit imposée, la formation scolaire que prévoient ces alinéas par de l'expérience d'exploitation ou de l'éducation permanente :

(i) une année d'expérience d'exploitation équivaut à deux années de formation scolaire de niveau primaire,

(ii) une année d'expérience d'exploitation équivaut à une année de formation scolaire de niveau secondaire,

(iii) 45 unités d'éducation permanente dans le domaine de l'exploitation d'ouvrages d'adduction d'eau ou d'évacuation des eaux usées, du génie, des sciences ou dans un domaine connexe équivalent à une année de formation scolaire de niveau secondaire;

b) remplacer une année d'études postsecondaires par au plus une année d'expérience acquise dans un poste comportant des responsabilités occupé dans une installation de classe 2 ou supérieure;

c) s'il veut obtenir un certificat d'exploitant pour une installation de traitement d'eau ou des eaux usées, remplacer au plus une autre année d'études postsecondaires par cinq autres années d'expérience acquise dans un poste comportant des responsabilités occupé dans une installation de classe 2 ou supérieure.

7(5) Malgré l'alinéa (1)c), l'auteur de la demande peut remplacer une des années d'expérience d'exploitation, qu'exige cette disposition, acquise dans un poste autre qu'un poste comportant des responsabilités par 45 unités d'éducation permanente supplémentaires ou par une année d'études postsecondaires dans le domaine de l'exploitation des ouvrages d'adduction d'eau ou d'évacuation des eaux usées, du génie, des sciences ou dans un domaine connexe. En vertu du présent paragraphe, un maximum de deux années d'expérience d'exploitation, acquise dans un poste autre qu'un poste comportant des responsabilités, peuvent être remplacées par les unités d'éducation permanente et les études postsecondaires.

7(6) Despite subsection (3), an applicant may substitute 45 further continuing education units of training, or one year of post-high school education, in water or wastewater works operations, engineering, science, or a related field for a maximum of one year of the DRC experience required by that subsection.

Class 4

8(1) An applicant who applies for a class 4 operator's certificate for any category of facility must

(a) have a Manitoba high school diploma, a GED-12 or comparable academic qualifications from another jurisdiction, or have completed a course of study approved by the director;

(b) have four years of post-high school education in water or wastewater works operations, engineering, science, or a related field;

(c) have four years of operating experience in a class 3 or higher facility of the category applied for; and

(d) have obtained a mark of at least 70% on

(i) a class 4 water treatment certification exam, if he or she is applying for an operator's certificate for water treatment facilities,

(ii) a class 4 water distribution certification exam, if he or she is applying for an operator's certificate for water distribution facilities,

(iii) a class 4 wastewater treatment certification exam, if he or she is applying for an operator's certificate for wastewater treatment facilities, or

7(6) Malgré le paragraphe (3), l'auteur de la demande peut remplacer une des années d'expérience acquise dans un poste comportant des responsabilités qu'exige cette disposition par 45 unités d'éducation permanente supplémentaires ou par une année d'études postsecondaires dans le domaine de l'exploitation des ouvrages d'adduction d'eau ou d'évacuation des eaux usées, du génie, des sciences ou dans un domaine connexe.

Classe 4

8(1) L'auteur d'une demande de certificat d'exploitant de classe 4 pour n'importe quelle catégorie d'installation est tenu de satisfaire aux exigences suivantes :

a) il est titulaire d'un diplôme d'études secondaires du Manitoba, possède une formation générale de douzième année, a obtenu une formation scolaire équivalente auprès d'un autre ressort ou a terminé un programme d'études approuvé par le directeur;

b) il a fait quatre années d'études postsecondaires dans le domaine de l'exploitation des ouvrages d'adduction d'eau ou d'évacuation des eaux usées, du génie, des sciences ou dans un domaine connexe;

c) il possède quatre années d'expérience d'exploitation dans une installation de classe 3 ou d'une classe supérieure de la même catégorie que celle que vise sa demande;

d) il a obtenu une note d'au moins 70 % :

(i) à l'examen d'accréditation visant les installations de traitement d'eau de classe 4 si sa demande concerne de telles installations,

(ii) à l'examen d'accréditation visant les installations de distribution d'eau de classe 4 si sa demande concerne de telles installations,

(iii) à l'examen d'accréditation visant les installations de traitement des eaux usées de classe 4 si sa demande concerne de telles installations,

(iv) a class 4 wastewater collection certification exam, if he or she is applying for an operator's certificate for wastewater collection facilities.

8(2) An applicant may apply for a class 4 operator's certificate for more than one category of facility. In that case, he or she must meet the requirements of clauses (1)(c) and (d) for each of the categories of facility for which he or she is applying.

8(3) For applicants who are applying for class 4 operators' certificates for water treatment or wastewater treatment facilities, two of the four years of operating experience required by clause (1)(c) must be DRC experience at a class 3 or higher facility of the applicable category.

8(4) Despite clauses (1)(a) and (b), an applicant may

(a) without limitation, substitute operating experience or continuing education for any portion of the academic achievement required by that clause, based on the following standards:

(i) one year of operating experience for two grades of grade school level achievement,

(ii) one year of operating experience for one grade of high school level achievement,

(iii) forty-five continuing education units of training in water or wastewater works operations, engineering, science, or a related field for one grade of high school level achievement; and

(b) substitute one year of DRC experience in a class 3 or higher facility for one year of post-high school education, to a maximum of two years of post-high school education.

(iv) à l'examen d'accréditation visant les installations de collecte des eaux usées de classe 4 si sa demande concerne de telles installations.

8(2) Il est possible de présenter une demande de certificat d'exploitant de classe 4 pour plusieurs catégories d'installations. L'auteur de la demande satisfait alors aux exigences des alinéas (1)c) et d) pour chacune des catégories qui l'intéressent.

8(3) L'auteur d'une demande de certificat d'exploitant de classe 4 pour une installation de traitement d'eau ou des eaux usées acquiert deux des quatre années d'expérience d'exploitation prévues à l'alinéa (1)c) dans un poste comportant des responsabilités occupé dans une installation de classe 3 ou supérieure de la catégorie pertinente.

8(4) Malgré les alinéas (1)a) et b), l'auteur de la demande peut :

a) remplacer selon les critères indiqués ci-dessous, sans qu'aucune restriction ne lui soit imposée, la formation scolaire que prévoient ces alinéas par de l'expérience d'exploitation ou de l'éducation permanente :

(i) une année d'expérience d'exploitation équivaut à deux années de formation scolaire de niveau primaire,

(ii) une année d'expérience d'exploitation équivaut à une année de formation scolaire de niveau secondaire,

(iii) 45 unités d'éducation permanente dans le domaine de l'exploitation d'ouvrages d'adduction d'eau ou d'évacuation des eaux usées, du génie, des sciences ou dans un domaine connexe équivalent à une année de formation scolaire de niveau secondaire;

b) remplacer une année d'études postsecondaires par une année d'expérience acquise dans un poste comportant des responsabilités occupé dans une installation de classe 3 ou supérieure, l'équivalence ne pouvant toutefois s'appliquer à plus de deux années d'études postsecondaires.

8(4.1) Despite clause (1)(b), an applicant for a class 4 water distribution, wastewater collection or wastewater treatment facility operator's certificate may satisfy the post-high school requirements of that clause by substituting 45 continuing education units of training in water distribution works operations, wastewater works operations, engineering, science or a related field for each year of required post-high school education. This is subject to subsection (4.2).

M.R. 162/2005

8(4.2) The application of subsection (4.1) is subject to the following conditions:

- (a) the continuing education units substituted must be acceptable to the director;
- (b) the continuing education units must be completed and the application for the certificate made before December 31, 2010;
- (c) on the day this subsection comes into force, the applicant must be employed in a class 4 facility of the category of the certificate applied for and, except as the director may permit, must continue that employment until he or she qualifies for the certificate;
- (d) if the certificate applied for is for wastewater treatment facilities, the certificate only authorizes its holder to operate a facility that is in operation on the day this subsection comes into force.

M.R. 162/2005

8(4.1) Malgré l'alinéa (1)b), l'auteur d'une demande de certificat d'exploitant pour une installation de distribution d'eau, de collecte des eaux usées ou de traitement des eaux usées de classe 4 peut satisfaire aux exigences en matière d'études postsecondaires énoncées à cet alinéa en remplaçant 45 unités d'éducation permanente dans le domaine de l'exploitation des ouvrages d'évacuation des eaux usées ou de distribution d'eau, du génie, des sciences ou dans un domaine connexe pour chacune des années d'études postsecondaires exigées. Le présent paragraphe est assujéti aux conditions établies au paragraphe (4.2).

R.M. 162/2005

8(4.2) L'application du paragraphe (4.1) est assujéti aux conditions suivantes :

- a) les unités d'éducation permanente utilisées en guise de remplacement doivent être jugées acceptables par le directeur;
- b) les unités d'éducation permanente doivent être terminées et la demande de certificat doit être faite au plus tard le 31 décembre 2010;
- c) le jour de l'entrée en vigueur du présent paragraphe, l'auteur d'une demande doit être employé dans une installation de classe 4 et d'une catégorie visée par la demande de certificat et, sauf permission du directeur, doit garder cet emploi jusqu'à ce qu'il soit admissible au certificat;
- d) si la demande de certificat vise les installations de traitement des eaux usées, le certificat autorise uniquement son titulaire à exploiter les installations en activité le jour de l'entrée en vigueur du présent paragraphe.

R.M. 162/2005

8(5) Despite clause (1)(c), an applicant may substitute 45 further continuing education units of training, or one year of post-high school education, in water or wastewater works operations, engineering, science, or any related field for one year of the operating experience required by that clause. A maximum of two years of operating experience may be replaced under this subsection by such continuing education units and post-high school education.

8(6) Despite subsection (3), an applicant may substitute 45 further continuing education units of training, or one year of post-high school education, in water or wastewater works operations, engineering, science, or a related field for a maximum of one year of the DRC experience required by that subsection.

8(5) Malgré l'alinéa (1)c), l'auteur de la demande peut remplacer une des années d'expérience d'exploitation qu'exige cette disposition par 45 unités d'éducation permanente supplémentaires ou par une année d'études postsecondaires dans le domaine de l'exploitation des ouvrages d'adduction d'eau ou d'évacuation des eaux usées, du génie, des sciences ou dans un domaine connexe. En vertu du présent paragraphe, un maximum de deux années d'expérience d'exploitation peuvent être remplacées par les unités d'éducation permanente et les études postsecondaires.

8(6) Malgré le paragraphe (3), l'auteur de la demande peut remplacer au plus une des années d'expérience acquise dans un poste comportant des responsabilités qu'exige cette disposition par 45 unités d'éducation permanente supplémentaires ou par une année d'études postsecondaires dans le domaine de l'exploitation des ouvrages d'adduction d'eau ou d'évacuation des eaux usées, du génie, des sciences ou dans un domaine connexe.

SCHEDULE C
(Sections 13, 15, 16, 17, 20 and 22)

ANNEXE C
(articles 13, 15, 16, 17, 20 et 22)

FEES

DROITS

Fees for operators' certificates

1 The fee for an application for an operator's certificate of any category and class is \$100.

Examination fee

2 The fee for an operator's certification examination of any category and class is \$150.

Fee for operator's certificate under section 22

3 The fee for an application under section 22 for an operator's certificate under a reciprocal agreement or arrangement is \$75.

Renewal fee

4 The fee for renewing an operator's certificate of any category and class is \$75.

Replacement fee

5 The fee for replacing an operator's certificate or personal identification card of any category and class is \$50.

M.R. 162/2005

Same fees apply for conditional certificates

6 The fees in this Schedule apply in respect of both unconditional and conditional operators' certificates.

Certificat d'exploitant

1 Les droits exigibles à l'égard d'une demande de certificat d'exploitant de n'importe quelle catégorie ou classe sont de 100 \$.

Examen d'accréditation

2 Les droits exigibles à l'égard d'un examen d'accréditation visant n'importe quelle catégorie ou classe sont de 150 \$.

Certificat d'exploitant prévu à l'article 22

3 Les droits exigibles à l'égard d'une demande de certificat d'exploitant prévue à l'article 22 et présentée conformément à un accord de réciprocité sont de 75 \$.

Renouvellement

4 Les droits exigibles à l'égard du renouvellement d'un certificat d'exploitant de n'importe quelle catégorie ou classe sont de 75 \$.

Remplacement

5 Les droits exigibles à l'égard du remplacement d'un certificat d'exploitant ou d'une carte d'identité personnelle de n'importe quelle catégorie ou classe sont de 50 \$.

R.M. 162/2005

Certificats conditionnels

6 Les droits exigibles énoncés à la présente annexe s'appliquent à tous les certificats d'exploitants, qu'ils soient conditionnels ou non.

SUMMARY

In 2008, the City of Winnipeg Water and Waste Department completed a six-year water main cleaning program to clean its water distribution system in preparation for the commissioning of the drinking water treatment plant in the fall of 2009. To effectively clean the water main system, a unidirectional cleaning method was used that involved the operation of selected valves within the distribution system to target a specific main for cleaning. In 2009, a spot-check program throughout the City of Winnipeg was undertaken. The entire neighborhood of Whyte Ridge was also cleaned in 2009 because it was identified as an area having significant water main sediment accumulation.

In 2010, the City of Winnipeg continued a maintenance cleaning program to revisit previously cleaned areas east of the Red River which were considered to be prone to sediment deposition. However, due to an unexpected high number of dirty water complaints outside of the notified flushing areas, the scheduled program for 2010 was only partially completed.

This report summarizes the data and observations for 2010 obtained by Environmental Standards Division staff. The water quality monitoring carried out as part of the Water Main Cleaning Program included Local Monitoring to determine the impact on water quality in the neighborhood being cleaned, and Environmental Monitoring in response to concerns respecting discharges to the environment. Regional Monitoring was not conducted this year. Instead, routine water quality monitoring results were reviewed to measure the long-term impact on the water quality of the area being cleaned. Sensitive Users Monitoring was also not conducted this year, as there were no sensitive users identified in the areas where flushing was taking place. Appendix A illustrates the original area planned for the 2010 program, as well as the areas where flushing was completed. The data generated from the program was entered into the Laboratory Information Management System and is included in the Appendices.

Local Monitoring

Local monitoring was conducted in some of the neighbourhoods being cleaned to determine the impact on local customers by the cleaning program. Monitoring locations, parameters and frequency for flushing operations are provided in the table below.

Table 1. Local Area Monitoring

LOCAL MONITORING		
Locations	Parameters	Frequency
<ul style="list-style-type: none"> • Households/businesses (specific location determined in field) <p>Normally 2 households/businesses for 2 sequences per weekday.</p>	<ul style="list-style-type: none"> • Free Chlorine • Total Chlorine • Heterotrophic Plate Count • Total Coliform • E. coli • Colour, Apparent • Turbidity 	<ul style="list-style-type: none"> • Once (Pre Flush) • Once (Post Flush) • Once (One Day Post Flush)*
<p>*- SAMPLES ONE-DAY POST FLUSH WILL ONLY BE TAKEN IF WATER QUALITY HAS NOT IMPROVED ON POST FLUSH SAMPLE. Additional post flush samples will be taken if required.</p>		

The Local Monitoring results (Appendix B) were used to tabulate the short-term impact of water main flushing on the quality of water delivered to customers. Homes and businesses were chosen randomly to be representative of the neighborhoods being flushed. Comparing the pre-flush sample results with the post-flush sample results allowed the short-term impact of the flushing to be observed. Post-flush samples were usually collected the same day or the day following the flushing in the area. Occasionally, a post-flush sample was obtained several days after flushing, usually due to the customer not being home or the business being closed for the initial post-flush sample. A household or business was resampled if the post-flush sample contained a positive total coliform or E. coli, high heterotrophic plate count of >500 cfu/mL, a free chlorine of <0.10 mg/L, and/or a turbidity of >1.0 NTU.

Chlorine Levels

The levels of free chlorine and total chlorine in the post-flush samples both showed a mean increase of 0.05 mg/L from the pre-flush samples. In most cases, a few days after flushing chlorine levels remained higher than the original pre-flush levels. The mean value of the post-flush samples for free chlorine was 0.44 mg/L and for total chlorine was 0.61 mg/L.

Total Coliform, E. coli and HPC

For the 2010 program, the bacterial analysis was completed by Maxxam. Of the 179 pre-flush samples analyzed, there were no positive E. coli results. There were 8 positive total coliform results and 1 HPC count >500 cfu/mL, but the post-flush results for these samples were all negative. For the post-flush samples, there were 3 positive total coliform results and one HPC count >500 cfu/mL. These locations were resampled and the results were all reported to be negative.

Apparent Colour and Turbidity

At most locations the sample obtained post-flush displayed a short-term increase in colour and turbidity. A subsequent sample (a few days post-flush) normally showed a reduction in colour and turbidity. The pre-flush samples had a mean value of 3.0 Apparent Colour Units (ACU). Post-flush samples had a mean value of 4.5 ACU.

The mean pre-flush turbidity value was 0.35 NTU and the mean post-flush value was 0.59 NTU. All post-flush locations with results above 1.0 NTU were resampled and were shown to have a turbidity of <1.0 NTU. Samples collected a few days post-flush had a mean turbidity value of 0.33 NTU. On average, the turbidity values measured this year were significantly lower than all previous years of the flushing program.

Early Termination of the Program

The program was originally postponed in early August for two reasons. First, there were a large number of “dirty water” (this is a 311 Service Request Type) complaints being received within the areas being flushed as well as outside of the notified areas, and second, due to heavy rainfall, some of the streets where flushing was scheduled to occur were flooded. On August 19, the program was resumed for a one day mini flushing program in the Victoria Crescent area to investigate the “dirty water” issue. The mini flushing program was completed successfully, so on September 8, the regular program was resumed in Canterbury Park in Transcona. Once again, there were multiple dirty water complaints after this flushing, therefore the decision was made to cancel the program for the remainder of the year.

Regional Monitoring

Regional monitoring was not conducted this year because the specific cleaning areas were distributed across the east half of the city. Instead, the results from our routine distribution system water quality monitoring program were reviewed on a weekly basis to ensure that there were no negative impacts on the water quality due to the water main flushing program. Appendix C provides a summary of the regional monitoring results.

Chlorine Levels

Chlorine dosages at Maclean, Hurst and McPhillips Pumping Stations were increased from 0.8 mg/L to 1.2 mg/L from mid-May to mid-August to maintain target levels of disinfectant in the distribution system. The mean level of free chlorine in the distribution system during the flushing program was 0.46 mg/L, and the mean level of total chlorine was 0.62 mg/L. There were two locations (NE09 Kildare Ave. and McMeans St. and SW13 South Dr. - St. John's Ravenscourt School) where the free chlorine levels dropped below 0.10 mg/L on several occasions. It was determined that the low chlorines at NE09 were caused by several incorrectly positioned valves which were corrected. It was found that the low chlorines at SW13 were caused by low water usage at the location. This sampling point was terminated from the monitoring program with the approval of the Office of Drinking Water and was replaced with a more representative point.

Total Coliform, E. coli and HPC

Throughout the course of the cleaning program, 787 regional samples were collected for bacterial analysis in the distribution system. None of these samples showed positive E. coli results or HPC results >500 cfu/mL. Six of the samples had positive total coliform results. These locations were resampled and the results were all reported to be negative.

Apparent Colour and Turbidity

The apparent colour for the distribution system was measured from a weekly composite sample and had an average value of 2.7 ACU. Of the 13 composite samples taken, 12 had an apparent colour result of 2.5 ACU, and one had an apparent colour result of 5.0 ACU.

Of the 506 distribution system samples taken for turbidity, 1 sample had a turbidity value >1.0 NTU. This location was resampled and an acceptable result (0.19 NTU) was obtained. The turbidity results had an average value of 0.27 NTU.

Temperature

The temperature ranged from 6.5 to 23.0 degrees Celsius. The average temperature of the 506 samples taken was 14.4 degrees Celsius. The water temperature steadily increased as the ambient temperature increased.

Environmental Monitoring

A baseline Environmental Monitoring Program was conducted as part of the operation. The program consisted of collecting grab samples from hydrant discharges from selected flushing sequences to determine background quality of the water being discharged to the land drainage sewers and combined sewers. Samples were collected randomly throughout the program. Parameters included free and total chlorine, apparent colour, total suspended solids and five day BOD. The parameters monitored and frequency of monitoring are provided in Table 2. Appendix D provides a summary of the Environmental Monitoring results.

Table 2. Environmental Monitoring

<i>Environmental Monitoring</i>		
Locations	Parameters	Frequency
<ul style="list-style-type: none"> • Fire Hydrants (specific location(s) determined in field coinciding with sequence of household samples). <p>Minimum 1 sample per week.</p>	<ul style="list-style-type: none"> • Free Chlorine • Total Chlorine • Colour, Apparent • Total Suspended Solids • BOD 	<ul style="list-style-type: none"> • Once (During Flush)

The composite samples contained mainly the “dirty” water expelled during flushing resulting in relatively high turbidities and colour. The hydrant discharge was flushed until Water Services measured a turbidity of less than 5 NTU before entering the combined and storm sewers.

A dechlorination system was employed to remove chlorine from the discharged water prior to the water entering storm sewers and consequently retention ponds or combined sewers. Environmental Standards field staff conducted random chlorine spot checks on the water being discharged to the sewers to ensure that the dechlorination system was functioning properly.

Chlorine Levels

The average chlorine levels for the hydrant discharge samples were 0.06 mg/L for free chlorine and 0.09 mg/L for total chlorine. Of the 89 chlorine results measured, 35 free chlorine results measured >0.02 mg/L and 48 total chlorine results measured >0.02 mg/L. These results indicate that there were problems with the dechlorination system. The flushing crews often had difficulties adjusting the necessary dosage to dechlorinate the discharge. This may have been due in part to the fact that the potency of the dechlorinating agent would diminish if not used immediately once exposed to the air.

Apparent Colour and Turbidity

Apparent colour from hydrant composite samples ranged from 2.5 ACU to 130 ACU throughout the Water Main Cleaning Program. The average apparent colour was 30 ACU. Turbidity was only measured by Environmental Standards on the samples collected August 19, 2010, and was measured on samples collected 1, 4, 8 and 12 minutes after flushing. The turbidity ranged from 1.27 NTU to 86.0 NTU with an average turbidity of 18.2 NTU, and generally decreased as flushing time increased. Turbidity was not measured on any other environmental samples this year due to a laboratory error.

BOD₅ and Total Suspended Solids

BOD₅ results ranged from <1 to 4 mg/L for the hydrant composite samples with a mean value of 1.9 mg/L. Total suspended solids results ranged from <4 to 105 mg/L with a mean value of 14 mg/L. According to the Manitoba Conservation Report, *Manitoba Water Quality Standards, Objectives, and Guidelines* (2002), the guidelines for municipal wastewater effluents are 30 mg/L BOD₅ and 30 mg/L total suspended solids. The mean results for BOD₅ and total suspended solids were below the guideline.

CONCLUSIONS

The following conclusions were determined from the Water Quality Monitoring Program:

- § Local Monitoring generally showed small improvements in chlorine levels following the completion of water main cleaning in the area, particularly in samples collected a few days post flush.
- § Local Monitoring generally did not show improvements in colour and turbidity levels. The data collected suggested that the flushing had the effect of temporarily increasing the colour and turbidity of the water. This would also suggest that the length of time allowed for each flushing sequence may be inadequate.
- § Regional Monitoring locations within the cleaning program area showed no difference in water quality from the water quality at the Regional Monitoring locations outside of the cleaning area.
- § Environmental Monitoring was successful in determining when the dechlorination system was not functioning properly.
- § The BOD₅ and total suspended solids average results from the Environmental Monitoring hydrant discharge composite samples were below the guideline limits.

RECOMMENDATIONS

The following recommendations are provided to help ensure a successful program in the future:

- § Local Monitoring samples should continue to be obtained from businesses in the area where possible, since it was sometimes difficult to obtain samples from households, especially the initial post-flush sample.
- § Pre-flush samples should be collected at least 2 sequences ahead of the flushing crew to prevent artificially high turbidity and color results caused by disturbances from flushing nearby.
- § Samples should continue to be obtained from households with water quality complaints or concerns. Any water complaints or concerns that occur during the weekend should be noted by Water Services staff and followed up by Environmental Standards staff the following workday.
- § The high turbidity and colour results obtained from the local monitoring post flush samples suggest the length of time for each flushing sequence should be maintained to provide post flush results comparative to background distribution system levels.
- § Environmental Monitoring should be continued to monitor the quality of the water being discharged to the land drainage sewers. This monitoring should continue to include composite samples analyzed for chlorine, color, total suspended solids, and BOD₅. Although turbidity was not generally monitored on the composite samples this year, it had been analyzed in previous years, and should be added again in the future.
- § The dechlorination system currently used should be reviewed, and a more reliable method for dechlorinating the discharges may be considered in the future. This may include the use of a new product for dechlorination, or simply adjusting the current method. This could involve ensuring that the dechlorinating agent is only exposed to open air when it is in use, or using a larger quantity of the product in order to guarantee complete dechlorination of the water.

§ In order to ensure effective monitoring for the duration of the flushing program conducted each year, the watermain cleaning program should be scheduled to run from the beginning of May to the end of August each year. This will ensure that there is sufficient temporary staff available to perform the work.

APPENDIX C - TABLE OF ORGANIZATION	
APPENDIX D - OPERATORS CERTIFICATION STATUS	

EXECUTIVE SUMMARY

This is an audit of the *Water and Wastewater Facility Operators Regulation 77/2003* for the City of Winnipeg, Water and Waste Department. The Compliance Reporting Branch of the Environmental Standards Division has been tasked with the responsibility to conduct an audit of the status of the Water and Waste Department's compliance with *Regulation 77/2003* under the Environment Act.

The construction, operation, and monitoring of water systems and wastewater systems remains the responsibility of the system owner. Under the Drinking Water Safety Act public water systems are required to meet certain operational and monitoring requirements. Likewise, licences have been issued under the Environment Act for the operation of the wastewater treatment plants. A mandatory certification program has been established for operators of water and wastewater systems to ensure they have the training they need to operate public water and wastewater systems.

Through this audit process, the Environmental Standards Division has requested information from the Water Services, the Wastewater Services and the Engineering Divisions. This information was required in order to assess the status of employee certification within each respective area.

The information respecting conformance has been collected and an audit report has been prepared. This report includes the level of compliance and identifies any deficiencies that need to be addressed. The report has been shared with the Water and Waste Department Management Team.

BACKGROUND

The operating requirements of the regulation came into effect on September 1, 2006. There has been no documented follow-up on the Water and Waste Department's compliance with the regulation until this audit was conducted.

The *Water and Wastewater Facility Operators Regulation 77/2003* has been developed to set requirements for education and experience for operators of water and wastewater facilities. This is done through a facility classification and an operator certification system. The regulation came into force on September 1, 2003 and is administered by staff of Manitoba Conservation. All operating staff require certification and facilities require classification in accordance with the provisions of the regulation.

The Water and Waste Department's compliance with *Regulation 77/2003* as of November 2009 has been reviewed in this audit. This includes what the Water and Waste Department is currently doing to achieve compliance and what plans are in place to ensure future compliance.

AUDIT OBJECTIVE

The objective of the audit is to provide an assessment of the current Water and Waste Department's compliance with the *Water and Wastewater Facility Operators Regulation 77/2003*. The audit was conducted from April to November 2009.

Particular sections from the *Water and Wastewater Facility Operators Regulation 77/2003* have been identified to fall within the scope of this audit. These sections have been listed in Appendix A.

VERIFICATION PROCESS

The Environmental Standards Division followed an established process for the audit. The managers of the Water Services, the Wastewater Services, and the Engineering Divisions were advised respecting the audit before it was undertaken.

The Compliance Reporting Branch developed a plan and a reporting form. The plan and the forms were distributed to the Managers of Water Services, Wastewater Services and Engineering Divisions for completion by a certain date. The forms identified the persons responsible and specific processes used to achieve compliance for every section of the audit. The completed reporting forms were reviewed and follow-up site visits were conducted to verify that the information submitted by the divisions was accurate. The audit was conducted by visiting the site and reviewing each section included in the scope of the audit. The site review list is found in Table 1 below. In addition to Table 1, photos were also taken which can be found in Appendix C. Relevant documentation like Operator in Charge (OIC) records were also collected and have been filed for reference.

The Managers of Water Services, Wastewater Services and Engineering Divisions were given the opportunity to review a draft of the audit and provide comments on the audit findings. The management responses are included in the audit findings section.

The information was gathered to support the recommendations and conclusions reached and contained in this report.

Table 1. Site Visit Review– All facilities

Review of the following sections was included in the scope of the audit.

Section	How Completed
7	Check that classification certificates are displayed.
8 (1)	Check the expiry dates of the certificates.
24(2)	Review the table of organization.
24(4)	Review any changes made to the tables.
12	No site review required.
13(6)	Check the expiry dates of the operators' certificates.
14(4)	Review the conditional certificates.
15(1)	Review the plan for dealing with expired conditional certificates.
23(1)	Review records of proof of certification.
25(1)	Check that operators' certificates are displayed and ID cards are available for inspection.
26(1)	No site review required.
26(2)	Review records of operator in charge.
26(6)	No site review required.
27	No site review required.
29(1)	Review the emergency response plan.
29(2)	Review operations and maintenance manuals.
31	Check operator in charge records.
33(1)	Review logs and record keeping mechanisms.
33(6)	Check stored records.
Schedule B	
2	DRC positions, review DRC records.
4(4.1)	Review Qualification/ CEU's .

AUDIT FINDINGS

The details of the findings resulting from the audit reporting forms and site visits are discussed below for Water Distribution and Treatment, Wastewater Treatment and Collection, and Engineering.

<i>City of Winnipeg Water Distribution System Class IV Water Distribution Facility</i>	
Section	Audit Review
7 - classification certificate	<p>Tammy Kauk is the Superintendent of this facility and is responsible for ensuring that the classification certificate is displayed. The classification certificate is displayed at 552 Plinguet Street on the reception area wall. It has been displayed since June 2, 2006.</p> <p>Classification certificate was displayed on the wall at the entrance to 552 Plinguet Street. Certificate #2006-231. See Appendix B.</p>
8 (1) - renewal of classification certificate	<p>Tammy Kauk will reapply for the classification certificate in March 2011 as the current certificate expires June 2, 2011.</p> <p>New certificate should be applied for in March 2011.</p>
24(2) - table of organization	<p>Terry Josephson is the Field Service Operations Engineer and is responsible for filing the table of organization. The table was completed by Diane Sacher and submitted in December 2005. The table is currently on file with the operators' certificates.</p> <p>A copy of the table of organization was reviewed and provided, dated April 1, 2006. See Appendix C.</p>
24(4)- changes to table of organization	<p>The table of organization is updated by Terry Josephson.</p> <p>There have been no changes made to the table thus far. The table will need to be updated and submitted to the Province.</p>
12, 13(6)- operator's certificate expiry	<p>Kim Kauk is the Training Coordinator of this facility and is responsible of reviewing the operators' certificates. Kim monitors the expiration dates of the certificates to ensure they are current.</p> <p>A copy of all the certificates were provided and reviewed.</p>
14(4), 15(1) - receipt of certificate	<p>Kim Kauk is responsible for reviewing and monitoring the expiration dates of all certificates, including conditional certificates. Sixteen employees currently have conditional certificates. They expire as early as March 23, 2010.</p> <p>There is a plan to address the expiration of certificates. The employees that have a certificate expiring within the next 12 months are notified in writing. With the assistance of their supervisors and the training co-ordinators the employees have the opportunity to get additional training or write exams. If the employee does not receive their certification before the expiry they are re-assigned duties.</p>

**City of Winnipeg Water Distribution System
Class IV Water Distribution Facility**

Section	Audit Review
<p>23(1) - operator's certification information</p> <p>25(1) - copy of operator's certificates</p> <p>26(1) - OIC at all times</p> <p>26(2) - records of OIC</p>	<p>There is no formal written plan. A detailed written plan to address the expiration of certificates should be developed.</p> <p>Kim Kauk is responsible for updating and maintaining operators' information. Those responsible for hiring operators are the maintenance supervisors Herb Smith, Kevin Gibson, Kevin Jones, Bruce Hill, Paul McLeod, and Rusty Dobriansky. New hires are not certified, they are hired as operators in training. They become certified during their employment. Kim maintains the records of proof.</p> <p>Kim Kauk is responsible for obtaining a copy of the operators' certificates. Tammy Kauk is responsible for displaying them.</p> <p>The certificates are currently in a binder in the superintendant's office.</p> <p>ID cards have been issued to the operators. It is the operators' responsibility to ensure they have their card while at work as well as the responsibility of the maintenance supervisors Herb Smith, Kevin Gibson, Kevin Jones, Bruce Hill, Paul McLeod, and Rusty Dobriansky.</p> <p>There is no current process to monitor compliance. The province has not undertaken any enforcement of these provisions.</p> <p>The certificates are in a binder due to the quantity of them. They are not displayed but are easily accessible. Written confirmation by the Province was given to keep the certificates in a binder. A wall notice of advisory should be posted indicating that the certificates are available in a binder and the location of the binder.</p> <p>ID cards were verified with several staff members and they all had their card with them.</p> <p>A spreadsheet of the operator's certification status was provided. See Appendix D.</p> <p>Diane Sacher is the Manager of Water Services and is responsible for ensuring that there is an operator in charge (OIC) at all times. The OIC is determined by organization structure and certificate classification. There is a record of the OIC at any given time.</p> <p>A yearly OIC list was provided. The list is also updated on a weekly basis by Jennifer Lamb.</p> <p>Tammy Kauk is responsible for maintaining a record of the OIC. This is done by way of daily sheets which are kept in the Superintendant's office. The records are to be kept on site for two years after the last entry.</p> <p>Daily sheets are kept in the Superintendent's office.</p>

**City of Winnipeg Water Distribution System
Class IV Water Distribution Facility**

Section	Audit Review
26(6) - no qualified operators	Diane Sacher is responsible for notifying the director if there are no qualified operators to operate the facility.
27 - requirements for field crews	<p>At this time, there have been no instances of this occurring. Herb Smith, Kevin Gibson, Kevin Jones, Bruce Hill, Paul McLeod, and Rusty Dobriansky are responsible for ensuring that all field crews have a supervising operator. This is ensured by scheduling.</p> <p>At this time, there have been no instances of this requirement not being met.</p>
29(1) - ERP and O & M manuals	<p>Diane Sacher is responsible for the emergency response plan. Terry Josephson maintains and updates the plan. Responsibility for the operations and maintenance manuals and their upkeep is distributed. The manuals are kept in various locations.</p> <p>The director (Province) has not reviewed and accepted the emergency response plan. Emergency response plan is not completed. Consultants are in the process of finalizing plans.</p> <p>Operations and maintenance manuals were reviewed and they were accessible in various locations.</p>
29(2) - updating and review of manuals	<p>Terry Josephson is responsible for the review and update of the operations and maintenance manuals. Manuals are accessible at all times.</p> <p>There is no formal process in place.</p> <p>A detailed plan to address the review and update of the operations and maintenance manuals should be developed.</p>
30(1) - in-service training	<p>In service training has not been enforced, there is no advisory committee.</p> <p>CEU's are recorded in a spreadsheet and updated and maintained by Kim Kauk. Spreadsheet was reviewed.</p>
31- OIC records reviewed	<p>Tammy Kauk is responsible for maintaining the OIC records. The required information includes name, date, and facility.</p> <p>A copy of the OIC records was provided. The list is also updated on a weekly basis by Jennifer Lamb.</p>
33(1) - logs and record-keeping	<p>Tammy Kauk is responsible for maintaining logs and other record keeping mechanisms. These records are kept in the superintendent's office and Synergen.</p> <p>The records are not required to be submitted to the Province. The format for the records has not been submitted to the Province to confirm acceptance.</p> <p>A copy of the OIC records and logs were kept in the superintendent's office and other areas.</p>
33(6) - logs and records accessible	<p>Tammy Kauk is responsible for storage of logs and other record keeping mechanisms. These records are kept in the superintendent's office and Synergen. The records are kept on site for seven years.</p> <p>Other record keeping mechanisms were stored in various locked storerooms with other historical data.</p>

***City of Winnipeg Water Distribution System
Class IV Water Distribution Facility***

Section	Audit Review
<p>Schedule B 2 - DRC experience</p> <p>4(4.1) - CEU training</p>	<p>Diane Sacher is responsible for designating Direct Responsible Charge Positions (DRC). DRC positions: Skilled Maintenance Worker –Level B2, Level C1, Level C2 Waterworks Foreman Maintenance Supervisor Emergency Services Supervisor Tammy Kauk maintains records for all of these positions.</p> <p>Records are maintained through People Soft. The operator is responsible for CEU training and supplying proof for the purpose of substitution of post secondary. The director of MB Conservation determines if CEU's are acceptable. When the CEU's are obtained, the courses are entered into People Soft and divisional records (spreadsheets). Operators' qualifications are kept on file.</p> <p>There isn't any qualification list published by MB Conservation at this time. A program by MB Conservation has yet to be developed. CEU's are recorded in a spreadsheet and updated and maintained by Kim Kauk. Spreadsheet was reviewed.</p>

To summarize the above findings the deficiencies identified for Water Services Distribution are:

1. Section 24(4) – The table of organization is outdated and must be reviewed and submitted to the Province in accordance with the regulation.
2. Section 14(4), 15(1) – Kim Kauk is responsible for reviewing and monitoring the expiration dates of all certificates, including conditional certificates. A written plan to address the expiration of certificates should be developed.

Management Response:

- *There is no requirement in the legislation to have a "formal procedure" or any procedure at all.*
- *Wastewater Services, Water Services, Human Resources and CUPE have a procedure in place and it has been working well for 2 years now.*

3. Section 25 (1) –Certificates are not prominently displayed therefore a wall notice of advisory should be posted indicating that the certificates are available in a binder and the location of the binder.
4. Section 29(1) – Emergency response plan is not completed. Consultants are in the process of finalizing plans.

Management Response:

There is an existing emergency response plan and a draft revised emergency response plan has now been completed,

5. Section 29(2) –A written plan to address the review and update of the operations and maintenance manuals should be developed. There is no formal process in place.

**City of Winnipeg Water Treatment System
Class III Water Treatment Facility**

Section	Audit Review
7 - classification certificate	<p>Doug Sulymka is the Supervisor of Water Treatment Operations of this facility and is responsible for ensuring that the classification certificate is displayed. The classification certificate is displayed at 360 McPhillips Street on the reception area wall. It has been displayed since June 2, 2006.</p> <p>Classification certificate was displayed on the wall at the entrance of 360 McPhillips Street. Certificate #2006-231. See Appendix B.</p>
8 (1) - renewal of classification certificate	<p>Doug Sulymka will review the certificate for reclassification from class III to class IV.</p> <p>A review of the facility classification is required. This will likely be done once the Water Treatment Plant is fully operational.</p>
24(2) - table of organization	<p>Andrew Weremy is the Water Treatment Systems Engineer and is responsible for filing the table of organization. The table was completed by Diane Sacher and submitted December 2005.</p> <p>A copy of the table of organization was reviewed and provided, dated April 1, 2006. See Appendix C.</p>
24(4)- changes to table of organization	<p>The table of organization is updated by Andrew Weremy.</p> <p>There have been no changes made to the table thus far. The table will need to be updated and submitted to the Province.</p>
12, 13(6)- operator's certificate expiry	<p>Kim Kauk is the Training Coordinator of this facility and is responsible of reviewing the operators' certificates. Kim monitors the expiration dates of the certificates to ensure they are current.</p> <p>A copy of all the certificates were provided and reviewed.</p>
14(4), 15(1) - receipt of certificate	<p>Kim Kauk is responsible for reviewing and monitoring the expiration dates of all certificates, including conditional certificates. Two employees currently have conditional certificates.</p> <p>There is a plan to address the expiration of certificates. The employees that have a certificate expiring within the next 12 months are notified in writing. With the assistance of their supervisors and the training co-ordinators the employees have the opportunity to get additional training or write exams. If the employee does not receive their certification before the expiry they are re-assigned duties. There is no formal written plan. A detailed written plan to address the expiration of certificates should be developed.</p>
23(1) - operator's certification information	<p>Kim Kauk is responsible for updating and maintaining operators' information. Doug Sulymka is responsible for hiring operators. New hires are not certified, they are hired as operators in training. They become certified during their employment. Kim maintains the records of proof.</p>

**City of Winnipeg Water Treatment System
Class III Water Treatment Facility**

Section	Audit Review
25(1) - copy of operators' certificates	<p>Kim Kauk is responsible for obtaining a copy of the operators' certificates. Doug Sulymka is responsible for displaying them. The certificates are currently in a binder on the operator's desk. ID cards have been issued to the operators with Water Distribution certification. It is the operators' responsibility to ensure they have their card while at work as well as the responsibility of Doug Sulymka.</p> <p>The certificates are in a binder due to the quantity of them. They are not displayed but are easily accessible. Written confirmation by the Province was given to keep the certificates in a binder. A wall notice of advisory should be posted indicating that the certificates are available in a binder and the location of the binder.</p> <p>There is no current process to monitor compliance with respect to the ID cards. The province has not undertaken any enforcement of these provisions.</p> <p>The certificates are in a binder. They are not displayed but are easily accessible. They are kept on the McPhillips Control Operator's desk in a binder.</p> <p>Water Treatment Operators are not issued ID cards. A spreadsheet of the operator's certification status was provided. See Appendix D.</p>
26(1) - OIC at all times	<p>Diane Sacher is the Manager of Water Services and is responsible for ensuring that there is an operator in charge (OIC) at all times. The OIC is determined by organization structure and certificate classification. There is a record of the OIC at any given time.</p> <p>A yearly OIC list was provided. A stand-by list was also provided. The list is also updated on a weekly basis by Jennifer Lamb. A weekly e-mail is sent to indicate any changes.</p>
26(2) - records of OIC	<p>Doug Sulymka is responsible for maintaining a record of the OIC. This is done by way of the schedule which is kept on the operator's desk.</p> <p>A list was kept on the operator's desk. In addition to this list the operator maintains a daily log sheet indicating the current OIC and daily activities.</p>
26(6) - no qualified operators	<p>Diane Sacher is responsible for notifying the director if there are no qualified operators to operate the facility.</p> <p>At this time, there have been no instances of this occurring.</p>
27 - requirements for field crews	<p>Doug Sulymka is responsible for ensuring that all field crews have a supervising operator. This is ensured by scheduling.</p> <p>At this time, there have been no instances of this requirement not being met.</p>

**City of Winnipeg Water Treatment System
Class III Water Treatment Facility**

Section	Audit Review
<p>29(1) - ERP and O & M manuals</p>	<p>Diane Sacher is responsible for the emergency response plan. Andrew Weremy maintains and updates the plan. Emergency Response Plan is kept at 360 McPhillips Street. Responsibility of the operations and maintenance manuals and their upkeep is distributed. The manuals are kept at 360 McPhillips Street. The director (Province) has not reviewed and accepted the emergency response plan. Emergency response plan is not completed. Consultants are in the process of finalizing plans. Existing Emergency Response Plans were reviewed and they were kept by the operator's control desk.</p>
<p>29(2) - updating and review of manuals</p>	<p>Andrew Weremy is responsible for the review and update of the operations and maintenance manuals. Manuals are accessible at all times. Operations and maintenance manuals were reviewed and they were kept by the operator's control desk. They are also located in other areas, i.e. Pumping Stations. There is no formal process in place to update the manuals. Manuals will be updated as needed. A detailed plan to address the review and update of the operations and maintenance manuals should be developed.</p>
<p>30(1) - in-service training</p>	<p>In service training has not been enforced, there is no advisory committee.</p>
<p>31- OIC records reviewed</p>	<p>A copy of the OIC records was provided.</p>
<p>33(1) - logs and record-keeping</p>	<p>Doug Sulymka is responsible for maintaining logs and other record keeping mechanisms. These records are kept on the operator's desk and SCADA. The records are not required to be submitted to the Province. The format for the records has not been submitted to the Province to confirm acceptance. A copy of the OIC records and daily logs were kept on the Control Desk. They are stored and archived by the clerical staff.</p>
<p>33(6) - logs and records accessible</p>	<p>Doug Sulymka is responsible for storage of logs and other record keeping mechanisms. These records are kept at 360 McPhillips Street and on SCADA. The records are kept on site for fifteen years. Other record keeping mechanisms were stored in various locked storerooms with other historical data. Due to the move to Deacon most of these records were being transferred to the Water Treatment Plant for future storage.</p>
<p>Schedule B 2 - DRC experience</p>	<p>Diane Sacher is responsible for designating Direct Responsible Charge Positions (DRC). Doug Sulymka maintains records for all of these positions. Records are maintained through People Soft.</p>

**City of Winnipeg Water Treatment System

Section	Audit Review
8(4.1) - CEU training	<p>The operator is responsible for CEU training and supplying proof for the purpose of substitution of post secondary. The director of MB Conservation determines if CEU's are acceptable. When the CEU's are obtained, the courses are entered into People Soft and divisional records (spreadsheets). Operators' qualifications are kept on file.</p> <p>There isn't any qualification list published by MB Conservation at this time.</p>

To summarize the above findings the deficiencies identified for Water Services Treatment are:

1. Section 8(1) – A review of the facility classification is required. This will likely be done once the Water Treatment Plant is fully operational.
2. Section 24(4) - The table of organization is outdated and must be reviewed and submitted to the Province in accordance with the regulation.

Management Response:

- *Since the completion of the audit, the Water Treatment classification application and the table of organization have been revised and submitted to the Province.*
3. Section 14(4), 15(1) – A written plan to address the expiration of all certificates, including conditional certificates should be developed.

Management Response:

- *There is no requirement in the legislation to have a "formal procedure" or any procedure at all.*
 - *Wastewater Services, Water Services, Human Resources and CUPE have a procedure in place and it has been working well for 2 years now.*
4. Section 25 (1) – Certificates are not prominently displayed therefore a wall notice of advisory should be posted indicating that the certificates are available in a binder and the location of the binder.
 5. Section 29(1) – Emergency response plan is not completed. Consultants are in the process of finalizing plans.

Management Response:

- *There is an existing emergency response plan and a draft revised emergency response plan has now been completed,*
6. Section 29(2) –A written plan to address the review and update of the operations and maintenance manuals should be developed. There is no formal process in place.

7 - classification certificate	<p>John Amos, Ron Hahlweg, and Colin Allingham are the Supervisors of the NEWPCC, SEWPCC, and WEWPCC respectively and are responsible for ensuring that their classification certificates are displayed. The classification certificates are displayed in the front lobby of the corresponding treatment plant. They have been displayed since issued.</p> <p>All certificates are prominently displayed at all three treatment plants. See Appendix B. Certificate # 2006-0083, 2006-0084, 2008-0074.</p>
8 (1) - renewal of classification certificate	<p>Ken Smyrski is the Superintendent of the Wastewater Treatment Plants and will reapply for the classification certificates when the current ones expire. NEWPCC and SEWPCC April 11, 2011. WEWPCC December 02, 2013.</p> <p>Renewal reminders have been set up in Synergen, 90 days ahead of time to notify the Superintendent of the plants. This process was being developed during the audit verification process.</p> <p>This process has already taken place for a renewal of the WEWPCC certificate.</p>
24(2) - table of organization	<p>Bill Borlase is the Manager of Wastewater Services and is responsible for filing the table of organization. The table was completed by Bill and submitted March 2006. Bill Borlase currently has these tables.</p> <p>A copy of the tables of organization was reviewed and provided, dated April 1, 2006. See Appendix C.</p>
24(4)- changes to table of organization	<p>The table of organization is updated by Bill Borlase</p> <p>There have been no changes made to the table thus far. The table will need to be updated and submitted to the Province.</p>
12, 13(6)- operator's certificate expiry	<p>Bohdan Sywak is the Supervisor of Training and is responsible for reviewing the operators' certificates. Bohdan monitors the expiration dates of the certificates to ensure they are current.</p> <p>A copy of all the certificates were provided and reviewed.</p>
14(4), 15(1) - receipt of certificate	<p>Bohdan Sywak is responsible for reviewing and monitoring the expiration dates of all certificates, including conditional certificates. Five staff currently have conditional certificates.</p> <p>There is a plan to address the expiration of certificates. The employees that have a certificate expiring within the next 12 months are notified in writing. With the assistance of their supervisors and the training co-ordinators the employees have the opportunity to get additional training or write exams. If the employee does not receive their certification before the expiry they are re-assigned duties.</p> <p>There is no formal written plan. A detailed written plan to address the expiration of certificates should be developed.</p>

23(1) - operator's certification information	Bohdan Sywak is responsible for updating and maintaining operators' information. John Amos, Ron Hahlweg, and Colin Allingham are responsible for hiring operators at their plants. New hires are not certified, they are hired as operators in training. They become certified during their employment. Bohdan maintains the records of proof.
25(1) - copy of operator's certificates	Bohdan Sywak is responsible for obtaining a copy of the operators' certificates. John Amos, Ron Hahlweg, and Colin Allingham are responsible for displaying them. The certificates are currently displayed at the treatment plants. The Province does not issues ID cards to the operators of Wastewater Treatment Plants. The certificates are displayed at all three treatment plants. See Appendix B. A spreadsheet of the operator's certification status was provided. See Appendix D.
26(1) - OIC at all times	Bill Borlase is responsible for ensuring that there is an operator in charge (OIC) at all times. The OIC is determined by rotating schedule. There is a record of the OIC at any given time. A copy of the yearly OIC schedule has been provided.
26(2) - records of OIC	A record of the OIC is maintained in the logbooks, central control, and the manager's secretary. This is done by way of a logbook or spreadsheet which is kept at central control, N Drive, and with the manager's secretary. A copy of the OIC schedule was displayed in all three control rooms at the treatment plants. Every Wednesday an e-mail is sent out with the weekly updated OIC schedule. Jennifer Bean maintains these records.
26(6) - no qualified operators	Bill Borlase is responsible for notifying the director if there are no qualified operators to operate the facility. At this time, there have been no instances of this occurring.
27 - requirements for field crews 29(1) - ERP and O & M manuals	Not applicable. Graham Fuga is the Process Improvement Coordinator and is responsible for the emergency response plan. Graham maintains and updates the plan. The Emergency Response Plan is kept in the central control room and on the N Drive. John Amos, Ron Hahlweg, and Colin Allingham are responsible for the operations and maintenance manuals and their upkeep. The manuals are kept on the N Drive and at various control rooms within the plants. Emergency Response Plan has been submitted to the Provincial director, Tracy Braun. The Province has acknowledged receipt of the plan in writing but no formal acceptance of the plan in writing was given. Emergency Response plans were kept in all the control rooms at the three treatment plants.

<p>29(2) - updating and review of manuals</p> <p>30(1) - in-service training</p> <p>31- OIC records reviewed</p> <p>33(1) - logs and record-keeping</p> <p>33(6) - logs and records accessible</p> <p>Schedule B</p> <p>2 - DRC experience</p> <p>8(4.1) - CEU training</p>	<p>The operations and maintenance manuals were kept in various locations in the plants. Most recent ones are kept in the control rooms or near the locations of the equipment. An electronic copy of most manuals is kept on the N drive. They are updated as needed.</p> <p>John Amos, Ron Hahlweg, Colin Allingham, Bohdan Sywak, and Mike Hargreaves are responsible for the review and update of the operations and maintenance manuals. The manuals are reviewed during the training of OITs. Manuals are accessible at all times.</p> <p>In service training has not been enforced, there is no advisory committee.</p> <p>The manager's secretary and payroll are responsible for maintaining the OIC records. The required information includes name, date, and facility.</p> <p>A copy of the OIC records was provided.</p> <p>John Amos, Ron Hahlweg, and Colin Allingham are responsible for maintaining logs and other record keeping mechanisms. These records are kept in DCS, Synergen, and in logbooks in the control room.</p> <p>Records were reviewed in the control rooms and on Synergen.</p> <p>The records are not required to be submitted to the Province. The format for the records has not been submitted to the Province to confirm acceptance.</p> <p>John Amos, Ron Hahlweg, and Colin Allingham are responsible for storage of logs and other record keeping mechanisms. These records are given to Bohdan Sywak to transfer to the NEWPCC vault. The records are kept in the vault indefinitely.</p> <p>Records at all three plants were reviewed and the NEWPCC vault and other storerooms were visited.</p> <p>John Amos, Ron Hahlweg, and Colin Allingham are responsible for designating Direct Responsible Charge Positions (DRC). All level 2 – 4 operators have DRC.</p> <p>Records are maintained through HR.</p> <p>Bohdan Sywak is responsible for CEU training and supplying proof for the purpose of substitution of post secondary. The director of MB Conservation determines if CEU's are acceptable. The CEU's are monitored in the training module, vacation planner, and PeopleSoft. Operators' qualifications are listed on file.</p> <p>There isn't any qualification list published by MB Conservation at this time. A program by MB Conservation has yet to be developed.</p>

To summarize the above findings the deficiencies identified for Wastewater Treatment are:

1. Section 24(4) - The table of organizations are outdated and must be reviewed and submitted to the Province in accordance with the regulation.
2. Section 14(4), 15(1) – A written plan to address the expiration of all certificates, including conditional certificates should be developed.

Management Response:

- *There is no requirement in the legislation to have a “formal procedure” or any procedure at all.*
- *Wastewater Services, Water Services, Human Resources and CUPE have a procedure in place and it has been working well for 2 years now.*
- *The bulk of all remaining conditional licences will expire in 2011.*
- *As for the licences by examination, Wastewater Services are still attempting to have the Province define what the process and requirements will be. To date we do not know explicitly. Renewals of this nature do not start until 2011 at the earliest.*

Section	Audit Review
33(6) - logs and records accessible Schedule B 2 - DRC experience 8(4.1) - CEU training	<p>The Supervisors are responsible for storage of logs and other record keeping mechanisms. These records are kept at 552 Plinguet Street, and 360 McPhillips Street. The records are kept indefinitely.</p> <p>Record is maintained through HR. Perry Illchuk is responsible for CEU training and supplying proof for the purpose of substitution of post secondary education. The director of MB Conservation determines if CEU's are acceptable. The CEU's are monitored in the training module, vacation planner, and PeopleSoft. Operators' qualifications are listed on file.</p>

To summarize the above findings the deficiencies identified for Wastewater Collection are:

1. Section 8(1) – A review of the facility classification will be required in 2011.
2. Section 24(4) - The table of organizations are outdated and must be reviewed and submitted to the Province in accordance with the regulation.
3. Section 25 (1) – Certificates are not prominently displayed therefore a wall notice of advisory should be posted indicating that the certificates are available in a binder and the location of the binder.
4. Section 14(4), 15(1) – A written plan to address the expiration of all certificates, including conditional certificates should be developed.

Management Response:

- *There is no requirement in the legislation to have a “formal procedure” or any procedure at all.*
- *Wastewater Services, Water Services, Human Resources and CUPE have a procedure in place and it has been working well for 2 years now.*
- *The bulk of all remaining conditional licences will expire in 2011.*
- *As for the licences by examination, Wastewater Services are still attempting to have the Province define what the process and requirements will be. To date we do not know explicitly. Renewals of this nature do not start until 2011 at the earliest.*

5. Section 29(2) –A detailed plan to address the review and update of the operations and maintenance manuals should be developed. There is no formal process in place.

**City of Winnipeg Water and Waste
Engineering Division**

On January 12, 2006, representatives of the Engineering Division met with Mike Van Den Bosch and Cory Graham of Manitoba Conservation to review the Operator Certification requirements and how the regulation would relate to placing a system back into service after renewal or rehabilitation or placing new systems into service. Inspections of sewer and water piping (and related appurtenances) on the water distribution and wastewater collection system are routinely conducted by staff of the Engineering Division. Manitoba Conservation determined that PR 77/2003 would apply and the operation of systems or control of flow should only be done when it has been determined that any new installations or modifications had been properly constructed and inspected. In that the Water Services and Wastewater Services operating personnel rely on Engineering Division inspectors it was determined that those persons performing inspections of this type would require a minimum of Level 2 Water Distribution and Level 2 Wastewater Collection certification.

Beginning in March 2006, the Engineering Division arranged for staff members to obtain their Operator's Certificates. All staff members were offered the opportunity to obtain their Operator's Certificates, notwithstanding that for some staff members, their current duties and responsibilities did not directly involve the act of performing sewer and water inspections. The intent being that as staff members changed positions or were promoted, they would then already be certified and able to meet the requirements under the regulation immediately.

Beginning in 2008, job bulletins for new Technologist and Technician hires, within the Engineering Division, have been amended to include the requirement for "Operator-in-training" to be applied for within 90 days and obtained within 18 months of start date.

Section	Audit Review
12, 13(6)- operator's certificate expiry	Mike Shkolny, the Manager of Engineering has designated David Shaw, (Customer Technical Services Supervisor) the responsibility for ensuring applications are submitted and maintained. This would also include reviewing the operators' certificates and monitoring the expiration dates of the certificates to ensure they are current.
14(4), 15(1) - receipt of certificate	As designate, David Shaw, is responsible for monitoring the expiration dates of all certificates, including conditional certificates. Two employees currently have Water Distribution Class 2 conditional certificates which will expire in April 2010. Those staff will be required to arrange for additional training, re-write the exam and re-apply for certification prior to April 2010. Failing re-certification, these staff will be assigned alternate duties.
23(1) (2)- operator's certification information	<p>A detailed written plan to address the expiration of certificates should be developed.</p> <p>David Shaw is responsible for updating and maintaining operators' information and ensuring that new hires meet the qualifications of job bulletins as amended. David maintains the records of proof. David, as designate for the Engineering Division, is also responsible for updating and maintaining a list of licensed sewer and water contractor's information in accordance with the Sewer and Waterworks By-laws.</p> <p>Contractors themselves are currently not required to obtain Operator Certification.</p>

City of Winnipeg Water and Waste Engineering Division	
Section	Audit Review
25(1) - copy of operator's certificates	<p>As designate, David Shaw is responsible for obtaining a copy of the operators' certificates and to ensure that the certificates are displayed by each Certified Operator in a conspicuous location. The employee is responsible to display their certificate at their desk. ID cards have been issued to the operators. It is the Certified Operators responsibility to ensure they have their card while operating outside the facility. There is a process to monitor compliance.</p> <p>Certificates were verified with most employees. Most had their certificates prominently displayed at their desk. ID cards were also verified. See Appendix B.</p> <p>A spreadsheet of the operator's certification status was provided. See Appendix D.</p> <p>The province has not undertaken any enforcement of these provisions</p>
27 - requirements for field crews	<p>Mike Shkolny is responsible for ensuring that all field crews have a supervising operator. At this time, there have been no instances of this requirement not being met.</p>

With the applicable section identified above the deficiencies identified for the Engineering Division are:

1. Section 14(4), 15(1) – A detailed plan to address the expiration of all certificates, including conditional certificates should be developed.

Management Response:

- *There is no known requirement in the legislation to have a formal procedure in place to monitor expiration of certificates (including conditional certificates), other than the requirement to renew certificates in advance.*
- *The Engineering Division has two conditional certificates that will expire in April 2010 and are currently working on plans for those staff members to re-write the exam or re-assign to alternate duties.*

2. Section 25 (1) – Not all certificates were prominently displayed. Some certificates and ID cards were not available.

Management Response:

- *While it is acknowledged that not all certificates were prominently displayed, it is noted in the preface of this section that for some of those staff members, their current duties and responsibilities do not directly involve the act of performing sewer and water inspections.*

RECOMMENDATIONS

Wastewater Services, Water Services and Engineering Divisions are generally in agreement with our recommendations and will be taking steps to comply with most of the recommendations.

Renewal of classification certificate - Section 8(1) – Classification certificates will expire as early as 2011. Water Treatment will have to re-apply from a Class III to a Class IV facility once the Water Treatment Plant is operational. Expiry dates for the other classification certificates are being monitored. Wastewater Services has recently included a 90 day reminder in Synergen to remind the Superintendent to re-apply for their classification certificates. The classification certificate for the WEWPCC has already been re-issued. It is recommended that a process be in place to address the expiration of the classification certificates for the Water Services Division.

Operators' certificates - Section 14(4), 15(1). There is no formal written process in place to address the expiration of all certificates, including conditional certificates. It is recommended that a written detailed plan to address the expiration of certificates be developed. There are no procedures in place to re-apply for certification. Most operators holding conditional certificates at this time are awaiting examination therefore they will be addressed by their expiry date. Employees with expired certificates have been and are to be re-assigned. Persons identified in this audit as responsible to monitor the expiration of certificates are as follows:

- Water Distribution and Treatment: Kim Kauk
- Wastewater Treatment: Bohdan Sywak
- Wastewater Collection: Dave Guse and Perry Illchuk
- Engineering Division: David Shaw

These individuals have indicated that they are monitoring the certification expiry dates. They have indicated that operators should re-apply for certification a few months before the expiry of the certificates. Although, it is ultimately the responsibility of the employee to maintain and apply for their certificates, the individuals listed above will remind and assist staff before their certificates expire.

Tables of organization - Section 24(4) – There have been significant changes in each division with respect to staffing. The tables of organization do not reflect what is happening in the divisions. It is recommended that the tables of organization be updated and re-submitted to the Province in accordance with the regulation.

Copy of operator's certificates and ID cards– Section 25(1) – Certificates were available in a binder for Water Distribution, Water Treatment and Wastewater Collection. Written confirmation by the Province was given to keep the certificates in a binder due to the quantity of them. A wall notice of advisory should be posted indicating that the certificates are available in a binder and the location of the binder. ID cards were also verified with only a few staff members. It is recommended that Supervisors remind and occasionally spot check staff to verify that they are carrying their cards.

Emergency Response Plans and operations and maintenance manuals - Section 29(1) – The Emergency Response Plan for Water Services is not completed. Consultants are in the process of finalizing the plan. Training has been provided on the ERP. It is recommended that a review process be implemented when the plans are completed.

Updating and reviewing emergency response plans, operations and maintenance manuals - Section 29(2) –Operations and maintenance manuals are not being reviewed and updated on a regular basis for Water Services and Wastewater Collection. Wastewater Treatment reviews their operations and maintenance manual during OIT training. It is recommended that a review process be developed to update the operations and maintenance manuals on a regular basis. There is no formal process in place.

In-service training - Section 30(1) - At this time there is no indication of whether or not the Province will require in-service training for re-certification. There has been no progress to establish a Certification Advisory Committee. If the Province implements in-service training to obtain re-certification, a plan will have to be developed by each division to implement additional training for their employees to obtain re-certification. It is recommended that the Divisions take a pro-active approach to establish acceptable requirements for in-service training to maintain certification. The Province will be implementing this in the future therefore training courses should be identified and developed to meet this requirement.

CONCLUSIONS

In conclusion, the Water and Waste Department has been found to be in compliance with most of the essential terms and conditions within the scope of this audit at this point in time. The sections identified as deficiencies are areas that need a plan in place to maintain certification at a later date. Planning ahead should be done to prevent any unforeseen circumstances that could affect further compliance with the regulation.

While the audit has helped to identify areas that can be strengthened, the Manager of each division is responsible for ensuring that their staff are aware of the deficiencies and work towards addressing them. Managers should incorporate the changes recommended in this report and with the assistance of the staff identified in this audit they can develop plans to respond to the recommendations of the audit.

Although much of the work has been completed to comply with the regulation, the demands of our organization are changing and future requirements could be implemented. Even though the Province has issued the regulation it has not enforced it and the Water and Waste Department must continue to comply with the regulation and take action to best fulfill the present and future demands.

There is no question that competent water and wastewater operators are an essential element of a safe drinking water system and a safe environment. The best-designed water and wastewater treatment, delivery and collection facilities are of little benefit if the people running the systems are not properly trained and certified. The operator is the first line of defence to protect public health and enhance environmental quality. The Water and Waste Department recognizes the value of their operators and utilizes the certification system to ensure that all operators are educated, trained and experienced.

S.M. 2005, c. 26
Bill 22, 3rd Session, 38th Legislature

The Water Protection Act

(Assented to June 16, 2005)

WHEREAS an abundant supply of high quality water is essential to sustain all ecological processes, life-support systems and food production, and is paramount to the environmental, economic and social well-being of Manitoba now and in the future;

AND WHEREAS access to sufficient, safe, acceptable, and affordable water for personal and domestic uses is internationally recognized as a fundamental right of citizens;

AND WHEREAS the Government of Manitoba recognizes the importance of the Canada-United States Boundary Waters Treaty and other inter-jurisdictional agreements protecting water, and the shared right and responsibility of all jurisdictions in the Hudson Bay drainage basin to protect water resources within the basin;

AND WHEREAS to most effectively ensure that drinking water is kept clean, safe and reliable, it is necessary to complement the provisions of *The Drinking Water Safety Act* with additional measures to protect drinking water sources;

AND WHEREAS Manitobans recognize that many human activities, including the use and consumption of water for all purposes, the production of waste and wastewater effluent, and industrial, agricultural and recreational activities, may impair the quality and quantity of our water resources, and that stewardship of these invaluable resources is a responsibility shared by all;

AND WHEREAS the Government of Manitoba is committed to watershed planning as an effective means to address risks to water resources and aquatic ecosystems, and believes that residents of watersheds should be consulted when watershed plans are developed;

HER MAJESTY, by and with the advice and consent of the Legislative Assembly of Manitoba, enacts as follows:

PART 1

INTRODUCTORY PROVISIONS

Definitions

1(1) The following definitions apply in this Act.

"**approved watershed management plan**" means a watershed management plan approved under Part 3. (« plan de gestion d'un bassin hydrographique approuvé »)

"**aquatic ecosystem**" means the components of the earth related to, living in or located in or on water or the beds or shores of a water body, including but not limited to

(a) all organic and inorganic matter, and

(b) all living organisms and their habitat,

and their interacting natural systems. (« écosystème aquatique »)

"**conservation district**" means a district as defined in *The Conservation Districts Act*. (« district de conservation »)

"**development plan**" means a development plan as defined in *The Planning Act*. (« plan directeur »)

"**director**" means a person designated under section 3 as a director of water protection. (« directeur »)

"**groundwater**" means all water under the surface of the ground, whether in solid or liquid form. (« eaux souterraines »)

"**invasive species**" means an organism designated in the regulations as an invasive species. (« espèce envahissante »)

"**minister**" means the minister appointed by the Lieutenant Governor in Council to administer this Act. (« ministre »)

"**municipality**" includes a community as defined in *The Northern Affairs Act*. (« municipalité »)

"**nutrient**" means any substance that provides nourishment and promotes growth of aquatic organisms when transmitted to water. (« nutriment »)

"**person**" includes a municipality, partnership, limited partnership, limited liability partnership, syndicate, trustee and joint venture, and an association of persons. (« personne »)

"**planning district**" means a planning district as defined in *The Planning Act*. (« district d'aménagement »)

"**prescribed**" means prescribed by regulation.

"**riparian area**" means an area of land on the banks or in the vicinity of a water body, which due to the presence of water supports, or in the absence of human intervention would naturally support, an ecosystem that is distinctly

different from that of adjacent upland areas. (« zone riveraine »)

"**water**" means all surface water and groundwater, whether in solid or liquid form. (« eaux »)

"**water body**" means any body of flowing or standing water, whether naturally or artificially created, and whether the flow or presence of water is continuous, intermittent or occurs only during a flood, including but not limited to a lake, river, creek, stream, slough, marsh, swamp and wetland, including ice on any of them. (« plan d'eau »)

"**water council**" means the Manitoba Water Council established in section 24. (« Conseil des eaux »)

"**water planning authority**" means a water planning authority designated for a watershed under section 14. (« organisme de planification des eaux »)

"**watershed**" means an area designated as a watershed under section 14. (« bassin hydrographique »)

Reference to "Act" includes regulations

1(2) A reference to "this Act" includes the regulations made under this Act.

Purpose of the Act

2 The purpose of this Act is to provide for the protection and stewardship of Manitoba's water resources and aquatic ecosystems, recognizing

- (a) that Manitoba's social and economic well-being is dependent upon the sustained existence of a sufficient supply of high quality water;
- (b) the importance of comprehensive planning for watersheds, with respect to water, land and ecosystems, on a basis that acknowledges and considers their interdependence;
- (c) that water resources and aquatic ecosystems require protection to ensure the high quality of drinking water sources;
- (d) the importance of applying scientific information in decision-making processes about water, including the establishment of standards, objectives and guidelines;
- (e) the need to protect riparian areas and wetlands; and
- (f) the benefits of providing financial incentives for activities that protect or enhance water, aquatic ecosystems or drinking water sources.

Director of water protection

3 The minister may designate one or more persons as directors of water protection.

PART 2

WATER PROTECTION

WATER QUALITY STANDARDS, OBJECTIVES AND GUIDELINES

Water quality standards, objectives and guidelines

4(1) The Lieutenant Governor in Council may make regulations setting or adopting water quality standards, objectives or guidelines.

Standards, etc. for use in approvals under other Acts

4(2) A regulation under subsection (1) may provide that a person issuing an approval or making a decision under *The Environment Act* or any other specified Act or regulation must

- (a) consider the standard, objective or guideline; or
- (b) in circumstances specified in the regulation, refuse to issue an approval or make a decision unless its effect will ensure compliance or consistency with the standard, objective or guideline.

WATER QUALITY MANAGEMENT ZONES

Water quality management zones

5(1) On the recommendation of the minister, the Lieutenant Governor in Council may make regulations

- (a) designating any area of the province as a water quality management zone for the purpose of protecting water, aquatic ecosystems or drinking water sources;
- (b) governing, regulating or prohibiting any use, activity or thing in a water quality management zone or any part of a zone.

Considerations in recommending regulations re zone

5(2) Before recommending that a regulation be made under subsection (1), the minister may consider scientific and other information relating to

- (a) the physical characteristics of land in the area, including its topography and soil types;
- (b) the ability of the soil or water in the area, or water downstream of the area, to assimilate nutrients and other pollutants;
- (c) water bodies or groundwater in the area, including information relating to
 - (i) the water quality characteristics of the water,
 - (ii) the susceptibility of the water to contamination or adverse changes in level or in-stream flow, and
 - (iii) the extent to which the water is pristine or relatively undisturbed by human activity;
- (d) the area's aquatic ecosystems;
- (e) whether the area contains a source, or a potential source, of drinking water;
- (f) whether the area supports species that are sensitive to alterations in water quality or quantity resulting from human activity;
- (g) whether the area provides habitat for endangered species; and
- (h) any other matter that the minister considers relevant.

Additional considerations

5(3) Before recommending that a regulation be made under subsection (1), the minister must also consider

- (a) water quality standards, objectives and guidelines that apply to the area;
- (b) approved watershed management plans that apply to the area; and
- (c) the proximity of the area to a national park, provincial park, ecological reserve or other protected area.

Maps of zones

5(4) A regulation made under subsection (1) may contain a map showing

- (a) the boundaries of a zone; and
- (b) areas within a zone where a use, activity or thing is governed, regulated or prohibited.

Consultation with water planning authority

6 Before a regulation is made under subsection 5(1), the minister may consult with any water planning authority that has been designated in respect of an area proposed to form all or part of the water quality management zone. This consultation does not affect any requirement for other consultation under this Act.

Advertising proposed regulations

7(1) At least 90 days before a regulation is made under subsection 5(1), the minister must, in a newspaper of general circulation in the affected area, advertise the fact that a draft of the proposed regulation has been filed in the public registry.

Written objections

7(2) Within 60 days after an advertisement is published under subsection (1), and subject to subsection (3), any person may refer a written objection to the proposed regulation to a director, in a form approved by the minister.

Scientific or technical information

7(3) An objection under subsection (2) must be based on written scientific or technical information relating to an area proposed to form all or part of the water quality management zone. This information must be provided to the director at the time the objection is referred.

Director's actions

- 7(4) Upon receiving an objection under subsection (2), the director must
- (a) notify the minister that an objection has been received; and
 - (b) consider the objection, and the supporting scientific or technical information.

Advice to the minister

7(5) Within 60 days after notifying the minister of the objection, the director must give advice to the minister as to whether the proposed regulation should be varied or revised.

Expert advice re scientific or technical issues

7(6) Before providing advice under subsection (5), if the director determines that there is an unresolved scientific or technical issue, he or she must obtain expert advice in such a manner as may be set out in the regulations.

Review of regulation

8 The minister must, not later than five years after the date on which a regulation under section 5 comes into force, require the water council to

- (a) review the effectiveness of the regulation and, in the course of that review, consult with any persons affected by the regulation that the council considers appropriate; and
- (b) recommend, if it considers it advisable, that the regulation be amended or repealed.

The minister may, in addition, require the council to undertake such a review at any other time.

INVASIVE SPECIES**Invasive species**

9 The Lieutenant Governor in Council may make regulations governing, regulating or prohibiting the importation, possession, transfer or release of invasive species.

WATER CONSERVATION**Regulations re water conservation**

10 The Lieutenant Governor in Council may make regulations

- (a) establishing water conservation programs;
- (b) generally respecting the reduction of water usage in Manitoba.

SERIOUS WATER SHORTAGE**Declaration of serious water shortage**

11(1) If the minister considers that extraordinary measures are necessary to ensure a reasonable water supply, the minister may declare a serious water shortage in respect of all or part of Manitoba.

Actions by minister during serious water shortage

11(2) If a serious water shortage is declared, the minister may take any action, make any regulation or issue any order that in his or her opinion is necessary to prevent, minimize or alleviate the water shortage.

Communication of serious water shortage

11(3) Immediately after

- (a) a serious water shortage is declared under subsection (1); or
- (b) a regulation is made or an order is issued under subsection (2);

the minister must ensure that the details of the declaration, regulation or order are communicated by the most appropriate means to persons affected by it.

Declaration that shortage has ended

11(4) The minister may declare that a serious water shortage has ended.

Regulations Act does not apply

11(5) *The Regulations Act* does not apply to

- (a) a declaration of a serious water shortage made under subsection (1) or a declaration that a serious water shortage has ended made under subsection (4); or
- (b) a regulation made or an order issued under subsection (2).

Order prevails over *The Water Rights Act*

11(6) Unless otherwise stated in the regulation or order, a regulation or order under this section prevails over a permit or licence issued under *The Water Rights Act*.

No injunction

11(7) No injunction lies against the minister, or any person acting under the authority of a regulation or order, to restrain or prevent a person from taking measures under this section.

Action by minister if order not complied with

12(1) If a person fails to comply with an order issued by the minister, the minister may

- (a) cause anything to be done that is required by the order; and

(b) take any other measures that the minister considers necessary to prevent, minimize or alleviate the water shortage.

Order to pay costs

12(2) Upon taking any action under clause (1)(a), the minister may order the person to whom the order was directed to pay the costs of taking that action.

Enforcing cost-recovery order

12(3) An order to pay costs made under subsection (2) may be filed in the Court of Queen's Bench and enforced as if it were an order of the Court.

Compensation where allocation cancelled or reduced

13(1) Where the effect of any action taken or regulation or order made under subsection 11(2) is to

(a) cancel or reduce the allocation of water at any point or place to a person holding a licence under *The Water Rights Act*; and

(b) allocate or increase the allocation of water at that point or place to another person who does not hold a licence, or whose licence is, relative to the licence referred to in clause (a), lower in precedence under section 8 (precedence of licences) of *The Water Rights Act*;

the person whose allocation is cancelled or reduced is entitled to receive from, and shall be paid by the other person, compensation for any loss or damage resulting from the cancellation or reduction.

No compensation in certain circumstances

13(2) Despite subsection (1), no compensation is payable where the action is taken, or the regulation or order is made, for a purpose relating to public health or the provision of drinking water. The determination of the purpose of the action, regulation or order is to be made by the minister.

Agreement respecting compensation

13(3) Within 60 days after action is taken or an order or regulation is made that has the effect described in subsection (1), the persons described in that subsection may make an agreement setting out

(a) the amount of compensation payable and the terms of payment; and

(b) the undertaking of one person to pay that compensation, on those terms, to the other person.

Arbitration

13(4) Where an agreement under subsection (3) is not made, the amount of compensation and the terms of payment must be determined in accordance with *The Arbitration Act*.

PART 3

WATERSHED MANAGEMENT

WATERSHED MANAGEMENT PLANS

Designation of watersheds and authorities

14 The Lieutenant Governor in Council may by regulation

(a) designate a watershed for the purposes of this Act, and specify its boundaries;

(b) designate a water planning authority for a watershed, which may be

(i) the board of a conservation district,

(ii) the board of a planning district,

(iii) the council of a municipality,

(iv) any other person or entity, or

(v) a joint authority consisting of two or more entities or persons described in subclauses (i) to (iv);

(c) prescribe the date by which the authority must submit a watershed management plan for approval, terms of reference for the preparation of the plan, and any other terms or conditions that the Lieutenant Governor in Council considers necessary.

Considerations in preparing a plan

15 In preparing a watershed management plan, a water planning authority must consider the following:

(a) water quality standards, objectives and guidelines that apply to the watershed;

- (b) whether a water quality management zone is included within any part of the watershed, and if so, any regulations made under section 5 respecting the zone;
- (c) studies that the authority considers relevant relating to water, land use, demographics, the capacity of the environment to accommodate development, and any other matter related to present or future physical, social or economic factors;
- (d) comments received through public consultation or public meetings held under section 17;
- (e) prescribed water management principles;
- (f) relevant provincial land use policies, development plans, and zoning by-laws;
- (g) any other information that the authority considers relevant.

Content of a watershed management plan

16(1) A watershed management plan must

- (a) identify issues relating to the protection, conservation or restoration of water, aquatic ecosystems and drinking water sources in the watershed;
- (b) contain objectives, policies and recommendations respecting some or all of the following:
 - (i) the protection, conservation or restoration of water, aquatic ecosystems and drinking water sources,
 - (ii) the prevention, control and abatement of water pollution, including wastewater and other point-source discharges, and non-point sources of pollution,
 - (iii) land drainage and flood control, including the maintenance of land drainage and flood control infrastructure,
 - (iv) activities in water quality management zones, riparian areas, wetlands, flood areas, flood plains and reservoir areas,
 - (v) water demand management, water use practises and priorities, the conservation of water supplies, and the reduction of water use and consumption during droughts and other periods of water shortage,
 - (vi) the supply, distribution, storage and retention of water, including measures to ensure persons in the watershed have access to clean potable water,
 - (vii) emergency preparedness to address spills, accidents and other emergencies that may affect water, an aquatic ecosystem or a drinking water source;
- (c) specify linkages between water management and land use planning so as to facilitate the adoption, in a development plan or other planning instrument, of some or all of the provisions of the watershed management plan; and
- (d) identify ways in which the plan can be implemented, monitored and evaluated, recognizing the need to implement the plan with the assistance of individuals, groups, and organizations.

Additional content

16(2) A watershed management plan may also

- (a) contain maps to assist in its interpretation; and
- (b) specify a date by which the plan must be reviewed.

Consultation

17(1) In preparing a watershed management plan, the water planning authority must consult with the following:

- (a) if land within the watershed is in a conservation district or planning district, the board of that district;
- (b) the council of any municipality located wholly or partly within the watershed;
- (c) any band, as defined in the *Indian Act* (Canada), that has reserve land within the watershed; and
- (d) any other person or entity specified by the minister.

Public meetings

17(2) The water planning authority must hold one or more public meetings to consult with residents of the watershed on the preparation of the plan.

Plan to be submitted to minister for approval

18 A water planning authority must submit its watershed management plan to the minister for approval.

Referral of plan to the water council

19(1) After receiving a proposed plan, the minister may refer it to the Manitoba Water Council for its review and advice.

Approval of the minister

19(2) If the proposed plan is satisfactory to the minister, the minister may approve it in the form in which the water planning authority submitted it.

Referral of plan back to authority

19(3) If the proposed plan is not satisfactory to the minister, the minister may refer it back to the water planning authority to be revised in accordance with any directions that the minister makes.

Revision of plan

19(4) The water planning authority must revise a proposed plan that is referred back to it in accordance with the minister's directions, and re-submit it to the minister for approval within the time required by the minister.

Amending a plan after approval

20(1) If a water planning authority proposes to make any amendments to an approved plan, it must submit them to the minister for approval.

Minister may require amendments

20(2) In addition, the minister may require a water planning authority to make amendments to an approved plan about any matter the minister specifies, and the authority must prepare the amendments and submit them to the minister for approval.

Section 19 applies

20(3) Section 19 applies to amendments under this section.

Notice of an approved plan

21 The minister must provide notice of the approval or amendment of a watershed management plan in accordance with any requirements specified in the regulations.

Periodic review

22 A water planning authority must review its approved watershed management plan, in accordance with the regulations,

- (a) when directed to do so by the minister; and
- (b) on or before any review date specified in the plan.

Sections 15 to 21 apply to the review of a plan, and its approval, with the necessary changes.

Plan to be considered in decision-making

23 The Lieutenant Governor in Council may, by regulation, require that an approved watershed management plan be considered before a prescribed decision is made or a prescribed approval is issued under this or any other specified Act or regulation.

MANITOBA WATER COUNCIL**Manitoba Water Council**

24 The "Manitoba Water Council" is established.

Responsibilities of the water council

25 The water council has, subject to the direction of the minister, the following responsibilities:

- (a) to monitor the development and implementation of watershed management plans in the province;
- (b) to review regulations respecting water quality management zones, and provide advice to the minister;
- (c) to advise the minister about matters relating to water generally;
- (d) to coordinate the activities of advisory boards and similar entities that perform functions relating to water, including advisory boards and other entities specified by regulation;
- (e) to assist in reporting sustainability indicators relating to water.

The water council must also perform any other duties assigned to it by an Act or regulation.

Members

26(1) The water council is to consist of at least five members appointed by the Lieutenant Governor in Council, who in the opinion of the Lieutenant Governor in Council are representative of the regional diversity of Manitoba and of local government, agricultural and environmental perspectives.

Term of office

26(2) The term of a member is as specified by the Lieutenant Governor in Council in the appointment, and a member continues to hold office until he or she is reappointed, a successor is appointed or the appointment is revoked.

Chair and vice-chair

26(3) The Lieutenant Governor in Council must designate one of the members of the water council as chair and may designate another member as vice-chair.

Expenses

27 Each member of the water council may be reimbursed for such reasonable expenses as may be approved by the minister.

Minister may refer matter to water council

28 The minister may refer any matter within the water council's responsibilities to the water council. The water council must, in accordance with the terms of reference, consider the matter and give the minister a written report of its findings and recommendations.

WATER STEWARDSHIP FUND**Water Stewardship Fund**

29(1) The "Water Stewardship Fund" is established, consisting of

- (a) amounts appropriated by an Act of the Legislature for the fund;
- (b) contributions received from any source by way of grant, gift, donation or bequest;
- (c) interest or other income earned from the investment of money in the fund;
- (d) amounts received under a Federal-Provincial agreement or any other agreement; and
- (e) any other money received by the fund.

Fund to be held in separate trust account

29(2) The fund is to be under the control and supervision of the Minister of Finance and must be held in trust for the purposes specified in subsection (3), in a separate account in the Consolidated Fund.

Purposes of the fund

29(3) The purposes of the fund are

- (a) to provide grants in support of research, projects and activities that further the purpose of this Act;
- (b) to provide grants to assist in the implementation of watershed management plans or water conservation programs; and
- (c) to support any other water management or water quality purpose that the Lieutenant Governor in Council considers advisable.

Payments out of fund

29(4) Subject to the regulations, payments may be made out of the fund for

- (a) the amount of any grant made by the minister that is consistent with the purpose of the fund, on any terms and conditions he or she considers appropriate;
- (b) the cost of marketing and promoting the fund or a funded project; and
- (c) administrative and reporting costs associated with the fund, including salaries and contract expenses.

Fund not public money

29(5) The money contained within the fund, other than amounts credited to the fund under clause (1)(a), is not public money within the meaning of *The Financial Administration Act*.

Regulations respecting the fund

29(6) The Lieutenant Governor in Council may make regulations

- (a) respecting grants, including the terms and conditions on which grants may be made by the minister; and
- (b) respecting the fund and any payments authorized by subsection (4) to be made from the fund.

PART 4**COMPLIANCE AND GENERAL PROVISIONS**

Designation of officers

30 The minister may designate any persons, or the members of any class of persons, as officers for the purposes of this Act.

Inspection authority of officers

31(1) When reasonably required to administer or determine compliance with this Act, an officer may enter and inspect any place or premises, other than a dwelling, at any reasonable time.

Entry into dwelling with consent

31(2) Despite subsection (1), an officer may enter and inspect a dwelling with the consent of the owner or occupant.

Warrant for entry into dwelling

31(3) On application by an officer, a justice may at any time issue a warrant authorizing the officer and any other person named in the warrant to enter and inspect a dwelling, if the justice is satisfied there are reasonable grounds to believe that

- (a) entry to the dwelling is necessary for the purpose of administering or determining compliance with this Act; and
- (b) in respect of the dwelling,
 - (i) entry has been refused or there are reasonable grounds to believe that entry will be refused,
 - (ii) the occupant is temporarily absent, or
 - (iii) the dwelling is unoccupied.

Conditions

31(4) A warrant may be made subject to any conditions specified in it.

Assistance to officials

31(5) In exercising a power under this section, an officer may use such force or obtain such assistance from a peace officer or other person as he or she considers necessary.

Additional inspection powers

32(1) In addition to the powers referred to in section 31, when reasonably required to administer or determine compliance with this Act, an officer may

- (a) make any inspection, investigation, examination, test, analysis or inquiry that he or she considers necessary;
- (b) require any substance, thing, solid, liquid, gas, plant, animal or other organism to be produced for inspection, examination, testing or analysis;
- (c) take samples of or seize any substance, thing, solid, liquid, gas, plant, animal or other organism; and
- (d) take photographs or other images of a place or premises, or any condition, process, substance, thing, solid, liquid, gas, plant, animal or other organism located at or in it.

Use of data processing system and copying equipment

32(2) In carrying out an inspection under this Act, an officer may

- (a) use a data processing system at the place where the records, documents or things are kept to examine any data contained in or available to the system;
- (b) reproduce, in the form of a printout or other intelligible output, any record from the data contained in or available to a data processing system at the place; and
- (c) use any copying equipment at the place to make copies of any record or document.

Assistance to officials

32(3) A person who has custody or control of a record, document or thing referred to in subsection (1) or (2) must give the officer

- (a) all reasonable assistance to enable the officer to carry out his or her duties; and
- (b) any information that the officer may reasonably require.

OFFENCES AND PENALTIES**Offences**

33(1) A person is guilty of an offence who

- (a) contravenes a provision of this Act, or fails to comply with a provision of an order issued under this Act;
- (b) makes a false statement to an officer or any other person acting under the authority of this Act;

- (c) provides a false statement in an application, record or other document given or required under this Act; or
- (d) hinders, obstructs or interferes with or attempts to hinder, obstruct or interfere with an officer or any other person acting under the authority of this Act.

Continuing offence

33(2) When a contravention of this Act or a failure to comply with an order issued under this Act continues for more than one day, the person is guilty of a separate offence for each day the contravention or non-compliance continues.

Directors and officers of corporations

33(3) If a corporation commits an offence under this Act, a director or officer of the corporation who authorized, permitted or acquiesced in the commission of the offence is also guilty of the offence.

Penalties for individuals

33(4) Except as provided in subsection (5), a person who is guilty of an offence under this Act is liable on summary conviction,

- (a) for a first offence, to a fine of not more than \$50,000. or imprisonment for a term of not more than six months, or both; and
- (b) for each subsequent offence, to a fine of not more than \$100,000. or imprisonment for a term of not more than one year, or both.

Penalties for corporations

33(5) A corporation that is guilty of an offence under this Act is liable on summary conviction,

- (a) for a first offence, to a fine of not more than \$500,000.; and
- (b) for each subsequent offence, to a fine of not more than \$1,000,000.

Limitation period

33(6) A prosecution for an offence under this Act may not be commenced later than one year after the day on which evidence sufficient to justify a prosecution for the offence came to the knowledge of an officer; and the certificate of an officer as to the day on which the evidence came to his or her knowledge is evidence of that date.

Certificate of analyst admissible

34(1) A certificate appearing to be signed by an analyst — or a copy or extract of the certificate certified by the analyst as a true copy or extract — stating that the analyst has analyzed a sample of water or other substance, and giving the results, is admissible in evidence in any proceeding as proof of the facts stated, unless the contrary is shown. Proof of the analysts's appointment or signature is not required.

Serving certificate on other parties

34(2) A party intending to produce a certificate in a proceeding must give notice of that intention and a copy of the certificate to each other party at least seven days before the date fixed for the hearing.

REPORTING VIOLATIONS

Persons may report suspected violation

35(1) Any person who reasonably believes that a violation of this Act has occurred, or may occur, may report the circumstances leading to that belief to an officer.

Protection from liability

35(2) No action or other proceeding may be brought against a person for providing information in good faith under this section.

Adverse employment action prohibited

35(3) No employer shall take adverse employment action against an employee because that person provided information in good faith under this section.

No interference or harassment

35(4) No person shall interfere with or harass a person who provides information under this section.

GENERAL PROVISIONS

Protection from liability

36 No action or proceeding may be brought against the minister, an officer or any other person acting under the

authority of this Act for anything done or not done, or for any neglect

- (a) in the performance or intended performance of a duty under this Act; or
- (b) in the exercise or intended exercise of a power under this Act;

unless the person was acting in bad faith.

Act binds the Crown

37 This Act binds the Crown.

PUBLIC REGISTRY

Public registry

38 The minister must maintain a public registry, which may be in electronic form, containing a copy of each of the following:

- (a) a draft of each proposed regulation or amendment to a regulation under this Act;
- (b) every declaration, order or regulation made under section 11 (serious water shortages);
- (c) every order respecting a commercial or agricultural operation made under a regulation described in section 40;
- (d) each watershed management plan approved by the minister under Part 3;
- (e) such other information as the minister may from time to time direct.

REGULATIONS

Regulations

39(1) The Lieutenant Governor in Council may make regulations

- (a) designating as an invasive species any non-indigenous organism that places or may place an aquatic ecosystem at risk of harm if it is introduced into or otherwise enters that ecosystem;
- (b) governing, regulating or prohibiting the discharge or other release of a pollutant into water;
- (c) respecting the siting, construction or operation of onsite wastewater management systems;
- (d) governing, regulating or prohibiting the access of livestock to water bodies or areas adjacent to water bodies;
- (e) respecting the providing of notice of an approval of, or amendment to, a watershed management plan under section 21;
- (f) respecting the review of an approved watershed management plan under section 22;
- (g) specifying advisory boards and other entities that perform functions relating to water for the purpose of the water council's coordinating role under clause 25(d);
- (h) prescribing water management principles that are consistent with the purposes of this Act;
- (i) respecting the establishment of programs to provide financial incentives to protect or enhance water, aquatic ecosystems or drinking water sources;
- (j) respecting the manner in which the director must obtain expert advice for the purpose of section 7;
- (k) defining any word or phrase used but not defined in this Act;
- (l) respecting any other matter that the Lieutenant Governor in Council considers necessary or advisable to carry out the purposes of this Act.

Regulation may apply to all or any part of province

39(2) A regulation made under this Act may apply to the whole province or part of it, and may apply to one or more water bodies.

Public consultation in regulation development

39(3) Except in circumstances that the minister considers to be of an emergency nature, in the formation or substantive review of regulations made under Part 2 other than section 11, or under any of clauses 39(1)(a) to (d), the minister must provide an opportunity for public consultation regarding the proposed regulation or amendment.

Transitional orders re existing operations

40(1) A regulation made under Part 2 other than section 11, or under any of clauses 39(1)(a) to (d), may provide that an owner or operator of a commercial or agricultural operation affected by the regulation may apply to a director for an order

- (a) specifying a transitional plan by which the applicant may, over a specified period, come into compliance with the regulation; and

(b) exempting the applicant from the application of all or part of the regulation for that period, or any part of it.

Requirements of regulation

40(2) Where a regulation provides the right to apply for an order as described in subsection (1), the regulation must also provide

- (a) that a director may issue an order only if he or she is satisfied that
 - (i) the applicant will suffer serious economic hardship unless an order is issued, and
 - (ii) issuing an order will not result in activities that
 - (A) present or may present an unacceptable risk of significant harm to water or an aquatic ecosystem, or
 - (B) place a drinking water source or public health at risk;
- (b) that an order may be subject to terms and conditions;
- (c) a process for appealing, to the minister,
 - (i) a director's decision whether to issue an order; and
 - (ii) a provision, term or condition of an order; and
- (d) a process for varying an order, on the application of the government or the person subject to the order, if there has been a change in circumstances. **PART 5**

AMENDMENTS TO OTHER ACTS

C.C.S.M. c. G110 amended

41(1) *The Ground Water and Water Well Act is amended by this section.*

41(2) *Subsection 2(2) is amended by striking out "except sections 9 and 10" and substituting the following:*
"except

- (a) sections 7 to 11; and
- (b) regulations made under section 12, other than regulations respecting certification or licensing;"

41(3) *Subsection 10(2) and section 13 are amended by striking out "The Clean Environment Act" and substituting "The Environment Act".*

41(4) *The following is added after subsection 10(2):*

Order re well abandonment or improper seal or cap

10(3) If the director is satisfied that, due to a well having been abandoned or not properly sealed or capped,

- (a) water in the well; or
- (b) ground water in the area of the well;

is or may become polluted, contaminated or diminished in purity, the director may order the owner of the well to rehabilitate, seal or cap the well in a manner satisfactory to the director.

41(5) *Section 11 is amended by striking out everything after "summary conviction," and substituting the following:*

- (a) in the case of an individual, to a fine of not more than \$10,000. or imprisonment for a term of not more than three months, or both; and
- (b) in the case of a corporation, to a fine of not more than \$25,000.

41(6) *The following is added after clause 12(d):*

(d.1) respecting the certification of well drillers and of installers of equipment related to wells, including prohibitions against uncertified persons drilling a well or installing equipment;

C.C.S.M. c. W80 amended

42(1) *The Water Rights Act is amended by this section.*

42(2) *Section 1 is amended by adding the following definition:*

"aquatic ecosystem" means the components of the earth related to, living in or located in or on water or the beds or shores of a water body, including but not limited to

- (i) all organic and inorganic matter, and
- (ii) all living organisms and their habitat,

and their interacting natural systems; (« écosystème aquatique »)

42(3) *Subsection 4(6) is repealed.*

42(4) *Subsection 4(7) is amended by striking out "subsection (6)" and substituting "subsection 24(2)".*

42(5) *The following is added after section 9:*

Protecting and maintaining aquatic ecosystems

9.1(1) In considering an application for a licence

(a) to use or divert water; or

(b) to construct, establish, operate or maintain works, other than works relating to the drainage of water;

the minister shall consider scientific and other information relating to the groundwater and water body levels, and the in-stream flows, that are necessary to ensure that aquatic ecosystems are protected and maintained.

Licence may be denied

9.1(2) The minister may refuse to issue a licence if, in the opinion of the minister, the action authorized by the licence would negatively affect an aquatic ecosystem.

Suspending licence for aquatic ecosystem purposes

9.2 The minister may suspend or restrict the rights under a licence for a specified period if

(a) in the minister's opinion,

(i) a groundwater level,

(ii) a water body level, or

(iii) an in-stream flow,

is insufficient to ensure that aquatic ecosystems are protected and maintained; and

(b) the minister's opinion is based on scientific information about protecting and maintaining an aquatic ecosystem of the type under consideration.

42(6) *Subsection 14(1) is amended by adding "or in the opinion of the minister further allocation would negatively affect an aquatic ecosystem " after "allocated to other licensees".*

42(7) *The following is added after section 14:*

Investigations re levels and in-stream flows

14.1 Using scientific methods, the minister may undertake investigations into groundwater or water body levels, or in-stream flows, anywhere in Manitoba, to determine whether aquatic ecosystems are being negatively affected by insufficient levels or flows.

42(8) *Section 24 is renumbered as subsection 24(1), and the following is added as subsection 24(2):*

Appeal does not act as a stay

24(2) An appeal of an order or decision does not stay the order or decision, or affect the power of the minister to take authorized steps pending the appeal. But if the appeal is successful the minister may enter into an agreement with the appellant to compensate him or her for any loss or damage that the appellant incurred as a result of the order or decision.

42(9) *Section 25.1 is amended*

(a) *in the section heading, by striking out "and Protection"; and*

(b) *in the section, by striking out "and Protection".*

PART 6

CONSEQUENTIAL AMENDMENTS, REPEAL AND COMING INTO FORCE

Consequential amendments, C.C.S.M. c. E125

43(1) *The Environment Act is amended by this section.*

43(2) *The following is added after section 12:*

Water quality standards, objectives and guidelines

12.1 A licence, or an alteration to a licence, issued under section 10, 11 or 12 after the date that this section comes into force, in respect of a development that affects or may affect water, must, in circumstances specified in *The Water Protection Act* or regulations made under it, include specifications, terms, limits or conditions as necessary to ensure compliance or consistency with a water quality standard, objective or guideline set or adopted under that Act.

43(3) *Section 54.1 is amended*

(a) *in the section heading, by striking out "and Protection"; and*

(b) in the section, by striking out "and Protection".

Consequential amendments, C.C.S.M. c. P80

44(1) *The Planning Act is amended by this section.*

44(2) *Section 1 is amended by adding the following definitions:*

"**approved watershed management plan**" means a watershed management plan approved under *The Water Protection Act*; (« plan de gestion d'un bassin hydrographique approuvé »)

"**water quality management zone**" means an area designated as a water quality management zone under *The Water Protection Act*; (« zone de gestion de la qualité de l'eau »)

44(3) *The following is added after clause 25(1)(c):*

(c.1) to serve as a framework for the implementation of an approved watershed management plan that relates to land within the district or municipality;

44(4) *The following is added after subsection 25(3):*

Water quality zones and watershed plans

25(3.1) In the preparation or amendment of a development plan, the board or council must also consider any of the following that relate to land within the district or municipality:

(a) any regulations made under section 5 of *The Water Protection Act* governing, regulating or prohibiting any use, activity or thing in a water quality management zone or any part of a zone; and

(b) any approved watershed management plans.

44(5) *The following is added after subclause 25(4)(a)(iii):*

(iii.1) the implementation of any approved watershed management plans described in subsection 25(3.1),

Consequential amendments, C.C.S.M. c. W72

45(1) *The Water Resources Conservation and Protection Act is amended by this section.*

45(2) *The title is replaced with "THE WATER RESOURCES CONSERVATION ACT".*

45(3) *Section 9 is amended by striking out "and Protection".*

Repeal

46 *The Water Commission Act, R.S.M. 1987, c. W50, is repealed.*

C.C.S.M. reference

47 This Act may be referred to as Chapter W65 of the *Continuing Consolidation of the Statutes of Manitoba*.

Coming into force

48 This Act comes into force on a day to be fixed by proclamation.

FAXED

CLIENT FILE NO.: 1069.10

June 19, 2009

Mr. Barry MacBride
Director
Water and Waste Department
City of Winnipeg
101 – 1155 Pacific Avenue
Winnipeg, Manitoba R3E 3P1

Dear Mr. MacBride:

Enclosed is revised Environment Act Licence No. **2716 R** dated June 16, 2009 issued in accordance with The Environment Act to the **City of Winnipeg**. This Licence has been revised with new ammonia limits which incorporate new information from the City of Winnipeg and Manitoba Water Stewardship. This Licence supersedes Licence No. 2716 for the alteration and operation of the Development commonly referred to as the South End Water Pollution Control Centre, in the City of Winnipeg.

In addition to the enclosed Licence requirements, please be informed that all other applicable federal, provincial and municipal regulations and by-laws must be complied with.

For further information on the administration and application of the Licence, please feel free to contact Siobhan Burland Ross, P.Eng. at (204) 945-7015.

Yours truly,

Tracey Braun, M. Sc.
Director
Environment Act

Enc.

c: Don Labossiere, Director, Environmental Operations
Public Registries

NOTE: Confirmation of Receipt of this Licence No. 2716 R (*by the Licensee only*) is required by the Director of Environmental Assessment and Licensing. Please acknowledge receipt by signing in the space provided below and faxing a copy (letter only) to the Department by July 2, 2009.

On behalf of the City of Winnipeg

Date

****A COPY OF THE LICENCE MUST BE KEPT ON SITE AT THE DEVELOPMENT AT ALL TIMES****

LICENCE

Licence No. / Licence n° 2716 R

Issue Date / Date de délivrance March 3, 2006

Revised: **June 19, 2009**

**IN ACCORDANCE WITH THE MANITOBA ENVIRONMENT ACT (C.C.S.M. c. E125)
THIS LICENCE IS ISSUED PURSUANT TO SECTIONS 11(1) AND 14(2) TO:**

CITY OF WINNIPEG; "the Licencee";

for the expansion and alteration and operation of the Development being a wastewater collection system and a wastewater treatment plant commonly referred to as the South End Water Pollution Control Centre, located at 100 Ed Spencer Drive in the City of Winnipeg, with discharge of treated effluent being directed to the Red River, in accordance with the Proposal filed under The Environment Act on March 2, 1990, in consideration of the Manitoba Clean Environment Commission August 2003 Report on Public Hearings and in accordance with the Notice of Alteration filed under The Environment Act on July 17, 1998 and subject to the following specifications, limits, terms and conditions:

DEFINITIONS

In this Licence,

"accredited laboratory" means an analytical facility accredited by the Standard Council of Canada (SCC), or accredited by another accrediting agency recognized by Manitoba Conservation to be equivalent to the SCC, or be able to demonstrate, upon request, that it has the quality assurance/quality control (QA/QC) procedures in place equivalent to accreditation based on the international standard ISO/IEC 17025, or otherwise approved by the Director;

"acute lethality" means a toxic effect resulting in death produced in an organism by a substance or mixture of substances within a short exposure period (usually 96 hours or less);

"affected area" means a geographical area, excluding the property of the Development;

"approved" means approved by the Director in writing;

“affected area” means a geographical area, excluding the property of the Development;

“approved” means approved by the Director in writing;

****A COPY OF THE LICENCE MUST BE KEPT ON SITE AT THE DEVELOPMENT AT ALL TIMES****

"as constructed drawings" means engineering drawings complete with all dimensions which indicate all features of the Development as it has actually been built;

"calibrate" means to determine, check or rectify the graduation of any instrument giving quantitative measurement;

“combined sewer overflow (CSO)” means the sewage overflow to the river that occurs during high flow conditions from a pipe system that collects both municipal sewage and surface runoff from a service area;

"Director" means an employee so designated pursuant to The Environment Act;

“dry weather flow” means the flow of wastewater in a combined sewer during dry weather such that flow consists mainly of wastewater with no storm water included;

"effluent" means treated or untreated wastewater flowing or pumped out of the wastewater treatment facility or any component of the facility;

“Environmental Management System (EMS)” means the part of the overall management system that includes organizational structure, planning activities, responsibilities, practices, procedures, processes, and resources for developing, implementing, achieving, reviewing and maintaining the environmental policy;

"Environment Officer" means an employee so appointed pursuant to The Environment Act;

“Escherichia coli (E. coli)” means the species of bacteria in the fecal coliform group found in large numbers in the gastrointestinal tract and feces of warm-blooded animals and man, whose presence is considered indicative of fresh fecal contamination, and is used as an indicator organism for the presence of less easily detected pathogenic bacteria;

"fecal coliform" means aerobic and facultative, Gram-negative, nonspore-forming, rod-shaped bacteria capable of growth at 44.5°C, and associated with fecal matter of warm-blooded animals;

"five-day biochemical oxygen demand (BOD₅)" means that part of the oxygen demand usually associated with biochemical oxidation of organic matter within five days at a temperature of 20°C;

"five-day carbonaceous biochemical oxygen demand (CBOD₅)" means that part of the oxygen demand usually associated with biochemical oxidation of carbonaceous organic matter within 5 days at a temperature of 20°C, excluding the oxygen demand usually associated with the biochemical oxidation of nitrogenous organic matter;

"flow proportional composite sample" means a combination of not less than ten individual samples of equal volumes of wastewater taken at equal increments of wastewater flow over a specified period of time;

"grab sample" means a quantity of undiluted effluent collected at any given time;

"inflow and infiltration" means the extraneous flow entering a sewer system or portion thereof, excluding sanitary sewage, due to factors including but not limited to, poor construction, corrosion of the pipe from the inside or outside, ground movement, structural overload, roof leaders, basement drains, land drains and manhole covers;

"influent" means water, wastewater or other liquid flowing into the wastewater treatment facility or any component of the facility;

"leachate" means liquid that has percolated through solid waste, and that contains dissolved and suspended materials from the solid waste;

"mixing zone" means an area adjacent to a discharge where a receiving water may not meet all water quality objectives included in the most recent version of the "Manitoba Water Quality Standards, Objectives, and Guidelines";

"MPN index" means the most probable number of coliform organisms in a given volume of wastewater which, in accordance with statistical theory, would yield the observed test result with the greatest frequency;

"noise nuisance" means a continuous or repeated noise in an affected area, which is offensive, obnoxious, troublesome, annoying, unpleasant, or disagreeable to a person:

- a) residing in an affected area;
- b) working in an affected area; or

- c) present at a location in an affected area which is normally open to the members of the public;
- if the noise
- d) is the subject of at least 5 written complaints, received by the Director in a form satisfactory to the Director, and within a 90 day period, from 5 different persons falling within clauses a), b), or c), who do not live in the same household; or
 - e) is the subject of at least one written complaint, received by the Director in a form satisfactory to the Director, from a person falling within clauses a), b) or c), and the Director is of the opinion that if the noise had occurred in a more densely populated area there would have been at least 5 written complaints received within a 90-day period, from 5 different persons who do not live in the same household;

"odour nuisance" means a continuous or repeated odour, smell or aroma in an affected area which is offensive, obnoxious, troublesome, annoying, unpleasant or disagreeable to a person:

- a) residing in an affected area;
 - b) working in an affected area; or
 - c) present at a location in an affected area which is normally open to members of the public;
- if the odour, smell or aroma
- d) is the subject of at least 5 written complaints received by the Director in a form satisfactory to the Director and within a 90 day period, and from 5 different persons falling within clauses a), b) or c) who do not live in the same household; or
 - e) is the subject of at least one written complaint, received by the Director in a form satisfactory to the Director, from a person falling within clauses a), b) or c) and the Director is of the opinion that if the odour, smell or aroma had occurred in a more densely populated area there would have been at least 5 written complaints received within a 90 day period from 5 different persons who do not live in the same household;

"sludge" means accumulated solid material containing large amounts of entrained water which has separated from wastewater during processing;

"Standard Methods for the Examination of Water and Wastewater" means the most recent edition of Standard Methods for the Examination of Water and Wastewater published jointly by the American Public Health Association, the American Waterworks Association and the Water Environment Federation;

“storm water” means surface water from rain, snow, or ice melting and running off from the surface of a drainage area;

“thirty-day rolling average” means the arithmetic average of any daily reported data plus the preceding 29 consecutive days of reported data;

“truck dumping station” means a facility used to receive, store and meter wastewater, including septage, which has been hauled to the wastewater treatment plant with a truck;

“UV disinfection” means a disinfection process for treating wastewater using ultraviolet radiation;

“UV dose” means the units of intensity of ultra violet light that is required to kill bacteria and viruses present in the wastewater effluent;

“wastewater” means the spent or used water of a community or industry that contains dissolved and suspended matter; and

“wastewater treatment plant” means the central facility of wastewater treatment facilities which contains all treatment processes exclusive of the collection system.

GENERAL REQUIREMENTS

This Section of the Licence contains requirements intended to provide guidance to the Licencee in implementing practices to ensure that the environment is maintained in such a manner as to sustain a high quality of life, including social and economic development, recreation and leisure for present and future Manitobans.

1. With the exception of the combined sewer overflow (CSO) wastewater, the Licencee shall direct all wastewater from the wastewater collection system area to the South End Water Pollution Control Centre or other facility approved by the Director.
2. In addition to any of the following specifications, limits, terms and conditions specified in this Licence, the Licencee shall, upon the request of the Director:
 - a) sample, monitor, analyze or investigate specific areas of concern regarding any segment, component or aspect of pollutant storage, containment, treatment, handling, disposal or emission systems, for such pollutants, ambient quality, aquatic toxicity, leachate characteristics and discharge or emission rates, and for such duration and at such frequencies as may be specified;

- b) determine the environmental impact associated with the release of any pollutant from the Development; or
- c) provide the Director, within such time as may be specified, with such reports, drawings, specifications, analytical data, descriptions of sampling and analytical procedures being used, bioassay data, flow rate measurements and such other information as may from time to time be requested.

3. The Licencee shall, unless otherwise specified in this Licence:
 - a) carry out all preservations and analyses on liquid samples in accordance with the methods prescribed in the most current edition of "Standard Methods for the Examination of Water and Wastewater", or in accordance with an equivalent analytical methodology approved by the Director;
 - b) ensure that all analytical determinations are undertaken by an accredited laboratory or a laboratory approved by the Director; and
 - c) report the results of all monitoring and testing to the Director, in writing and in an electronic format acceptable to the Director, within 60 days of the samples being taken.
4. The Licencee shall submit all information required to be provided to the Director under this Licence, in writing, and in electronic format, in such form (including number of copies), and such content as may be required by the Director.
5. The Licencee shall, in an event where a physical or mechanical breakdown of the wastewater collection system or the wastewater treatment plant results in or may result in the discharge of raw or partly treated wastewater or in non-compliance with any specification, limit, term or condition of this Licence:
 - a) notify the Director by facsimile or any other notification procedure approved by the Director, stating the nature of the event, the time and estimated duration of the event and the reason for the event as follows:
 - i) as soon as possible but no later than within 12 hours of the event; or
 - ii) before noon of the first business day following an event on a weekend or statutory holiday;
 - b) identify the repairs required to the wastewater collection system or the wastewater treatment plant; and
 - c) complete the repairs in accordance with any written instructions of the Director.
6. The Licencee shall carry out, as deemed necessary by the Director, any remedial measures or modifications in respect to matters authorized under this Licence.
7. The Licencee shall actively participate in any future watershed based management study, plan or environmental research or monitoring programs approved by the Director, for the Red River, the Assiniboine River, Lake Winnipeg and associated waterways and watersheds.
8. The Licencee shall not cause or permit an odour nuisance to be created as a result of the construction, operation or alteration of the wastewater treatment plant and shall take such steps as the Director may require to eliminate or mitigate an odour nuisance.

9. The Licencee shall not cause or permit a noise nuisance to be created as a result of the construction, operation or alteration of the wastewater treatment plant and shall take such steps as the Director may require to eliminate or mitigate a noise nuisance.
10. The Licencee shall:
 - a) develop an Emergency Response Plan (ERP) for the Development, in accordance with the "Manitoba Industrial Accidents Council (MIAC) Industrial Emergency Response Planning Guide";
 - b) submit the ERP for approval of the Director, in written and electronic format, on or before September 1st, 2007;
 - c) implement the ERP in accordance with the approval of the Director, on or before September 1st, 2009;
 - d) update and maintain the ERP to reflect the current state of operation of the wastewater treatment plant.
11. The Licencee shall:
 - a) develop an Environmental Management System (EMS) for the Development;
 - b) submit the EMS plan for approval of the Director, in written and electronic format, on or before September 1st 2007; and
 - c) implement the EMS plan in accordance with the approval of the Director, on or before September 1st, 2009.
12. The Licencee shall:
 - a) complete an inflow and infiltration study for the collection area of the Development; and
 - b) submit an engineering report detailing the results of the inflow and infiltration study to the Director, in written and electronic format, on or before September 1st, 2008.
13. The Licencee shall:
 - a) develop alternative leachate treatment plans for the Development;
 - b) submit an engineering report detailing the alternative leachate treatment facility plans, for approval of the Director, in written and electronic format, on or before December 31st, 2007; and
 - c) complete the construction and commissioning of the alternative leachate treatment facility in accordance with the approval of the Director.

DESIGN AND CONSTRUCTION REQUIREMENTS

14. The Licencee shall:
- a) submit an engineering report detailing the engineering plans for the expansion and alteration of the wastewater treatment plant to meet effluent limits of this Licence, including nutrient removal (both nitrogen and phosphorous) and microbiological parameters as outlined in Clause 27, of this Licence, on or before December 31st, 2009;
 - b) indicate to the Director, on or before December 31st, 2009:
 - i) the maximum design hydraulic loading capacity of the upgraded wastewater treatment plant and components thereof, in cubic meters over any 24 hour period; and
 - ii) the maximum design organic loading capacity of the upgraded wastewater treatment plant and components thereof, in kilograms over any 24 hour period;
 - c) obtain approval by the Director for the engineering plans submitted pursuant to Clause 14(a) of this Licence; and
 - d) complete the construction and commissioning of the upgraded wastewater treatment plant on or before December 31st, 2012.
15. The Licencee shall notify the assigned Environment Officer prior to beginning construction of the wastewater treatment plant expansion. The notification shall include the intended starting date of construction and the name of the Licencee's contact person at the construction site.
16. The Licencee shall ensure that fuel storage and equipment servicing areas established for the construction of the alteration to the wastewater treatment plant are located a minimum distance of 100 metres from any waterbody, and shall comply with the requirements of Manitoba Regulation 188/2001 respecting Storage and Handling of Gasoline and Associated Products.
17. The Licencee shall, from the date of issuance of this Licence, pressure test the integrity of the connections of any underground piping, which is intended to transport wastewater under pressure, before such pipe connections are backfilled with earth and make repairs as required, in accordance with Clause 5 of this Licence.
18. The Licencee shall:
- a) install or utilize existing security fencing, acceptable to the Director, to enclose the wastewater treatment plant or components thereof, that are not enclosed in a building with a security system acceptable to the Director; and
 - b) maintain the security system in a manner acceptable to the Director.

19. The Licencee shall:
- a) submit a proposal for a leak detection program, on or before December 31st, 2006, for existing pipes which transport wastewater via river crossings, to the Director, including leak detection technologies and monitoring practices to be implemented;
 - b) implement the leak detection program, as approved by the Director;
 - c) continuously measure and record the data gathered by the leak detection program; and
 - d) repair and replace all portions of the existing piping where leaks are detected in accordance with Clause 5 of this Licence.
20. The Licencee shall, from the date of issuance of this Licence, construct and maintain new pipes which transport wastewater via river crossings by taking the following actions:
- a) submit a proposal for a leak detection program, for the approval of the Director, including leak detection technologies and monitoring practices to be applied;
 - b) construct and maintain a sleeve encasement around the piping;
 - c) implement the leak detection program, as approved by the Director;
 - d) continuously measure and record the data gathered by the leak detection program; and
 - e) repair and replace all portions of the piping where leaks are detected in accordance with Clause 5 of this Licence.
21. The Licencee shall:
- a) prepare "as constructed drawings" for the upgraded wastewater treatment plant and shall label the drawings "As Constructed"; and
 - b) provide to the Director, on or before December 31st, 2013, two copies of the "as constructed drawings" of the upgraded wastewater treatment plant including effluent discharge pipeline.

SPECIFICATIONS, LIMITS, TERMS AND CONDITIONS

22. The Licencee shall, from the date of issuance of this Licence until and including December 30th, 2012, limit the influent wastewater loading to the wastewater treatment plant, such that:
- a) the hydraulic loading does not exceed 98,600 cubic meters over any 24 hour period during dry weather flow; and
 - b) the organic loading does not exceed 28,600 kilograms BOD₅ over any 24 hour period during dry weather flow.

23. The Licencee shall ensure that adequate instrumentation is installed to provide constant monitoring of the UV disinfection treatment process to ensure compliance with the disinfection requirements. Such instrumentation shall include but not be limited to the following:
- a) a UV sensor to monitor lamp intensity;
 - b) an appropriate alarm and shutdown systems;
 - c) a lamp monitoring system to identify the location of individual lamp failures;
 - d) an hour meter which cannot be reset to display actual hours of UV lamp operation; and
 - e) protective circuits for overcurrent and ground current leakage detection.
24. The Licencee shall:
- a) construct and make available for use by an Environment Officer, a secured and heated influent monitoring station with direct access to the wastewater treatment plant influent wastewater pipelines;
 - b) ensure that the monitoring stations are accessible to an Environment Officer at all times;
 - c) install and maintain a flow measuring device at each monitoring station or at a location acceptable to the Director which is capable of measuring the volume of influent with an accuracy of ± 2 percent;
 - d) have the flow measuring devices re-calibrated every two years or on the request of an Environment Officer;
 - e) submit to the Director a certificate of calibration, signed by a person qualified to calibrate the flow measuring device, for each flow measuring device within two weeks of the completion of each calibration, identifying the plus or minus percent error associated with each calibrated flow measuring device; and
 - f) ensure that the monitoring stations are each equipped with a flow-proportional sampling device equipped to function with the flow measuring device and have the sampling device available on request for use by an Environment Officer.
25. The Licencee shall:
- a) construct and make available for use by an Environment Officer, a secured and heated effluent monitoring station, with direct access to the effluent discharge pipeline at a location acceptable to the Director;
 - b) ensure that the monitoring station is accessible to an Environment Officer at all times;
 - c) install and maintain a continuous flow measuring device, equipped with an interface compatible with departmentally owned ISCO sampler, at the monitoring station or at a location acceptable to the Director which is capable of measuring the volume of effluent with an accuracy of ± 2 percent;

- d) have the flow measuring device re-calibrated every two years or on the request of an Environment Officer;
 - e) submit to the Director a certificate of calibration, signed by a person qualified to calibrate the flow measuring device, for each flow measuring device within two weeks of the completion of each calibration, identifying the plus or minus percent error associated with each calibrated flow measuring device; and
 - f) ensure that the monitoring station is equipped with a flow-proportional sampling device equipped to function with the flow measuring device and have the sampling device available on request for use by an Environment Officer.
26. The Licencee shall, from the date of issuance of this Licence until and including December 30th, 2012, during periods when the wastewater influent flow is less than 98,600 cubic meters per day, not discharge effluent from the wastewater treatment plant, as sampled at the effluent monitoring station, referred to in Clause 25 of this Licence, located prior to the effluent discharge pipeline leading to the Red River where:
- a) the organic content of the effluent, as indicated by the five-day biochemical oxygen demand (BOD₅), is in excess of 30 milligrams per litre;
 - b) the total suspended solids content of the effluent is in excess of 30 milligrams per litre;
 - c) the fecal coliform content of the effluent, as indicated by the MPN index, is in excess of 200 per 100 millilitres of sample, as determined by the monthly geometric mean of 1 grab sample collected at equal time intervals on each of a minimum of 3 consecutive days per week; and
 - d) the E. coli content of the effluent, as indicated by the MPN index, is in excess of 200 per 100 millilitres of sample, as determined by the monthly geometric mean of 1 grab sample collected at equal time intervals on each of a minimum of 3 consecutive days per week.
27. Notwithstanding Clause 26 of this Licence, when the level of the Red River exceeds a geodetic elevation of 229.0 meters, as measured at a location acceptable to the Director, the Licencee shall from the date of issuance of this Licence, until and including December 30th, 2012, not discharge effluent from the wastewater treatment plant, as sampled at the effluent monitoring station, referred to in Clause 25 of this Licence located prior to the effluent discharge pipeline leading to the Red River where:
- a) the organic content of the effluent, as indicated by the five-day biochemical oxygen demand (BOD₅), is in excess of 30 milligrams per litre; and
 - b) the total suspended solids content of the effluent is in excess of 30 milligrams per litre.

28. The Licencee shall, on and after December 31st, 2012, not discharge effluent from the wastewater treatment plant, as sampled in the effluent monitoring station, referred to in Clause 25 of this Licence, where:
- a) the organic content of the effluent, as indicated by the five-day carbonaceous biochemical oxygen demand (CBOD₅), is in excess of 25 milligrams per litre;
 - b) the total suspended solids content of the effluent is in excess of 30 milligrams per litre;
 - c) the fecal coliform content of the effluent, as indicated by the MPN index, is in excess of 200 per 100 millilitres of sample, as determined by the monthly geometric mean of 1 grab sample collected at equal time intervals on each of a minimum of 3 consecutive days per week;
 - d) the E. coli content of the effluent, as indicated by the MPN index, is in excess of 200 per 100 millilitres of sample, as determined by the monthly geometric mean of 1 grab sample collected at equal time intervals on each of a minimum of 3 consecutive days per week;
 - e) the concentration of total phosphorus of the effluent is in excess of 1 milligram per litre as determined by the thirty-day rolling average;
 - f) the concentration of total nitrogen of the effluent is in excess of 15 milligrams per litre as determined by the thirty-day rolling average; and
 - g) the ammonia nitrogen content (as N) of the effluent is in excess of the following limits:

<u>Period</u>	Ammonia Nitrogen (as N) (kilograms/any 24 hour period)
January	1975
February	2403
March	4196
April	12926
May	5311
June	3103
July	1517
August	607
September	713
October	811
November	1152
December	1550

29. The Licencee shall not release a quality of effluent from the wastewater treatment plant which:
- a) on any day, causes, or contributes to, the mixing zone for the effluent in the Red River being acutely lethal to aquatic life passing through the mixing zone; or
 - b) on or after December 31st, 2012, can be demonstrated to be acutely lethal to fish within the mixing zone for the effluent in the Red River by using a 96-hour static acute lethality test which results in mortality to more than 50 percent of the test fish exposed to 100 percent concentration of effluent, with the test carried out in accordance with the protocol outlined in Environment Canada's "Biological Test Method: Reference Method for Determining Acute Lethality of Effluents to Rainbow Trout: EPS 1/RM/13 Second Edition – December 2000" or any future amendment thereof.

MONITORING REQUIREMENTS

30. The Licencee shall:
- a) continuously measure and record the volume of the wastewater discharged from the wastewater treatment plant every day;
 - b) take one flow proportional composite sample of effluent over a 24 hour period from the wastewater treatment plant every day;
 - c) have the samples analyzed for CBOD₅, BOD₅, total suspended solids, total nitrogen, total phosphorus, ortho phosphorus and ammonia nitrogen content;
 - d) calculate the daily ammonia nitrogen load (kilograms per day), and the thirty-day rolling average values for total nitrogen and total phosphorus for the day during which samples were collected;
 - e) prepare a monthly report on:
 - i) the daily, average, peak, minimum and total monthly volume of wastewater discharged from the wastewater treatment plant; and
 - ii) the CBOD₅, BOD₅, total suspended solids, ortho phosphorus, thirty-day rolling average total nitrogen, thirty-day rolling average total phosphorus and ammonia nitrogen loads; and
 - f) file a copy of the report with the Director within 30 days of the end of each month during which the concentrations and loads were determined.
31. The Licencee shall:
- a) once each day, when flows exceed the 75th percentile of the thirty-day rolling average maximum daily flow, collect a grab sample of effluent from the effluent monitoring station referred to in Clause 25 of this Licence;
 - b) have the grab sample analyzed for pH and temperature, fecal coliform content, and E. coli content;

- c) determine and record the monthly geometric mean for each of the fecal coliform and E. coli counts based on all the data collected during each month, from a minimum of 12 grab samples; and
 - d) report the results to the Director within 30 days of the end of the month during which the samples were taken.
32. The Licencee shall:
- a) once every 3 months, collect a grab sample of the influent, at each influent monitoring station, and a grab sample of the effluent, at the effluent monitoring station at the wastewater treatment plant;
 - b) have both the influent and effluent samples analyzed for the concentration of the parameters identified in Schedule A of this Licence; and
 - c) report the results to the Director in an annual report within 60 days of the end of the 12 month sampling period.
33. The Licencee shall:
- a) maintain a record of all wastewater hauled to the wastewater treatment plant, including the number of loads on a daily and weekly basis, the volume of each load, the name of the hauler, and the source of the contents of each load according to the type of waste and the name and location of each property serviced;
 - b) make all records available to an Environment Officer upon request; and
 - c) submit an annual report of all the waste hauling information to the Director within 30 days of the end of the 12 month period.
34. The Licencee shall:
- a) once every 3 months in accordance with the protocol outlined in Environment Canada's "Biological Test Method: Reference Method for Determining Acute Lethality of Effluents to Rainbow Trout: EPS 1/RM/13 Second Edition – December 2000", or any future amendment thereof, collect a bioassay sample of the effluent from the effluent monitoring station at the wastewater treatment plant, and test the sample at 100 percent concentration for acute lethality; and
 - b) report the results to the Director in an annual report within 60 days of the end of the 12 month sampling period.
35. The Licencee shall:
- a) submit a plan, on or before December 31st, 2008 for a phased sewer upgrade management program to the Director for approval; and
 - b) implement the phased sewer upgrade management program in accordance with the approval of the Director, on or before December 31, 2012.

REVIEW OR REVOCATION

- A. This Licence replaces Licence No. 2716 which are hereby rescinded.
- B. If, in the opinion of the Director, the Licencee has failed or is failing to comply with any of the specification, limits, terms or conditions set out herein, the Director may, temporarily or permanently, revoke this Licence.
- C. This Licence shall be reviewed and revised by the Director, within two (2) years of the date of issuance of this Licence and subsequently reviewed every three (3) years thereafter or at a time as determined by the Director.
- D. If, in the opinion of the Director, new evidence warrants a change in the specifications, limits, terms or conditions of this Licence, the Director may require the filing of a new proposal pursuant to Section 11 of The Environment Act.

APPLICATION OF NUTRIENTS

- 6 Application
- 7 Nitrogen application limits — zones N1 to N3
- 8 Phosphorus application limits — zones N1 to N3

LOI SUR LA PROTECTION DES EAUX
(c. W65 de la C.P.L.M.)

Règlement sur la gestion des nutriments

Règlement 62/2008
Date d'enregistrement : le 18 mars 2008

TABLE DES MATIÈRES

Article

PARTIE 1
DÉFINITIONS, INTERPRÉTATION
ET OBJET

- 1 Définitions et interprétation
- 2 Objet

PARTIE 2
DÉSIGNATION DE ZONES DE GESTION
DE LA QUALITÉ DE L'EAU EN VUE DE LA
GESTION DES NUTRIANTS

- 3 Zones de gestion de la qualité de l'eau
- 4 Renseignements concernant le zonage
- 5 Opposition au zonage

PARTIE 3
ÉPANDAGE DE NUTRIANTS

- 6 Application
- 7 Épandage d'azote dans les zones N1 à N3
- 8 Limites applicables à l'épandage de phosphore — zones N1 à N3

All persons making use of this consolidation are reminded that it has no legislative sanction. Amendments have been inserted into the base regulation for convenience of reference only. The original regulation should be consulted for purposes of interpreting and applying the law. Only amending regulations which have come into force are consolidated. This regulation consolidates the following amendments: 106/2008.

Veillez noter que la présente codification n'a pas été sanctionnée par le législateur. Les modifications ont été apportées au règlement de base dans le seul but d'en faciliter la consultation. Le lecteur est prié de se reporter au règlement original pour toute question d'interprétation ou d'application de la loi. La codification ne contient que les règlements modificatifs qui sont entrés en vigueur. Le présent règlement regroupe les modifications suivantes : 106/2008.

- 9-10 Nutrient application restrictions — other zones
- 10.1 Phosphorous restrictions for zone N5
- 10.2 Escape or other release of nutrients to impervious surfaces in zone N5
 - 11 No application of nutrient to water
 - 12 Restriction re winter application
 - 13 Restriction re golf course or driving range

PART 4
ACTIVITIES IN ZONE N4,
ZONE N4 LAND CONVERTED TO ZONE N5,
AND THE NUTRIENT BUFFER ZONE

- 14 Prohibition re activities in certain zones
- 15 Regional sustainability assessment

PART 5
NUTRIENT MANAGEMENT PLANS

- 16-17 Submitting plan for registration
- 18 Order to submit a plan
- 19 Registration of plan
- 20 Objection by owner or occupier
- 21 Plan amendment
- 22 Effect of change in owner or occupier
- 23 Nutrient management plan prepared for an owner or occupier

PART 6
TRANSITIONAL ORDERS
RE EXISTING OPERATIONS

- 24 Transitional order
- 25 Variation order

PART 7
APPEALS TO MINISTER

- 26 Appeals to minister

SCHEDULE Vulnerable Water Bodies

- 9-10 Restrictions applicables aux nutriants — autres zones
- 10.1 Restrictions applicables à l'épandage de phosphore dans la zone N5
- 10.2 Interdiction de répandre des nutriants sur les surfaces étanches
 - 11 Déversement de nutriants dans l'eau
 - 12 Épandage en hiver
 - 13 Terrains de golf ou d'exercice

PARTIE 4
ACTIVITÉS DANS LA ZONE N4,
LA ZONE N4 DEVENUE LA ZONE N5
ET LA ZONE-TAMPON

- 14 Prohibition re activities in certain zones
- 15 Évaluation de la durabilité régionale

PARTIE 5
PLAN DE GESTION DES NUTRIANTS

- 16-17 Présentation d'un plan de gestion des nutriants
- 18 Ordre visant le dépôt d'un plan de gestion des nutriants
- 19 Enregistrement du plan
- 20 Opposition du propriétaire ou de l'occupant
- 21 Modification d'un plan
- 22 Nouveau propriétaire ou nouvel occupant
- 23 Plan de gestion des nutriants établi pour un propriétaire ou un occupant

PARTIE 6
ORDRES TRANSITOIRES CONCERNANT
LES EXPLOITATIONS EXISTANTES

- 24 Demande d'ordre
- 25 Modification de l'ordre

PARTIE 7
APPEL

- 26 Appel

ANNEXE Plans d'eau sensibles

PART 1

DEFINITIONS, INTERPRETATION
AND PURPOSE**Definitions**

1(1) The following definitions apply in this regulation.

"**Act**" means *The Water Protection Act*. (« *Loi* »)

"**drain**" means a drain designated as an Order 1, 2, 3, 4, 5 or 6 drain on a Manitoba Water Stewardship plan that shows the designation of drains. (« drain »)

"**drinking water source**" means a source of drinking water for a public or semi-public water system as defined in *The Drinking Water Safety Act*. (« source d'eau potable »)

"**groundwater feature**" means a sinkhole, a spring or a well other than a monitoring well. (« caractéristique d'eaux souterraines »)

"**high water mark**" means a point on land that would be at the water's edge when the water reaches the following level:

(a) in the case of a reservoir, the full supply level;

(b) in the case of a drain, the bank-full level;

(c) in the case of any other water body, the highest level to which the water usually rises each year and at which it remains long enough to change the characteristics of the land or the vegetation on the land. (« laisse des hautes eaux »)

PARTIE 1

DÉFINITIONS, INTERPRÉTATION
ET OBJET**Définitions**

1(1) Les définitions qui suivent s'appliquent au présent règlement.

« **caractéristique d'eaux souterraines** » Doline, source ou puits autre qu'un puits de surveillance. ("groundwater feature")

« **classe de sol** » Classe de sol établie à l'aide de la méthode mentionnée sous la rubrique concernant la classification des sols selon leurs aptitudes à la production agricole dans *l'Inventaire des terres du Canada, rapport n° 2*, publié en 1972 par le ministère de l'Environnement du gouvernement du Canada. ("soil class")
