Manitoba Conservation
Suite 160 – 123 Main Street
Winnipeg, Manitoba
R3C 1A5

Attention: Ms. Burland-Ross

Dear Ms. Braun:

**RE: 2010 SCHEDULE A MONITORING REPORTS FOR THE WEST END WATER
POLLUTION CONTROL CENTRE LICENCE NO. 2669 E RR, THE NORTH END
WATER POLLUTION CONTROL CENTRE LICENCE NO. 2684 RRR AND THE
SOUTH END WATER POLLUTION CONTROL CENTRE LICENCE NO. 2716 R**

Enclosed please find the 2010 Schedule "A" Monitoring Reports for Licence No. 2669 E RR issued for the City of Winnipeg West End Water Pollution Control Centre (WEWPCC), License No. 2684 RRR issued for the City of Winnipeg North End Water Pollution Control Centre (NEWPCC) and Licence No. 2617 R issued for the City of Winnipeg South End Water Pollution Control Centre (SEWPCC). Enclosed you will find one hard copy and five CD copies in Excel format.

The reports cover the complete four quarters of 2010 for WEWPCC, NEWPCC and SEWPCC. The WEWPCC report includes the Schedule "A" monitoring results referred to in Clause #31 of Licence #2669 E RR as well as the results of the bioassay monitoring conducted under Clause #32. The NEWPCC report includes the Schedule "A" monitoring results referred to in Clause #33 of Licence #2684 RRR as well as the results of the bioassay monitoring conducted under Clause #35. The SEWPCC report includes the Schedule "A" monitoring results referred to in Clause #32 of Licence #2716 R as well as the results of the bioassay monitoring conducted under Clause #34.

For your information, at the request of Ms. Cathy Johnson, we are also providing a copy of the reports to the Clean Environment Commission.

Embrace the spirit • Vivez l'esprit

Please let me know of any concerns or questions respecting this submission. I may be reached at the below address, by telephone at 986-4807 or by email at kkjartanson@winnipeg.ca.

Thanks for your ongoing cooperation and understanding in this matter.

Yours sincerely,

Licence No./Licence n° 1089 E RR

Issue Date/Date de délivrance February 21, 1989

Revised: **April 28, 2000**
June 14, 2000

**IN ACCORDANCE WITH THE MANITOBA ENVIRONMENT ACT (C.C.S.M. c. E125)
THIS LICENCE IS ISSUED PURSUANT TO SECTION 11(1) TO:**

CITY OF WINNIPEG; "the Licencee"

for the operation of the Development being the operation of a sludge dewatering system, a facility for the temporary storage of biosolids in the Rural Municipality of West St. Paul (legal description of land as specified in Appendix "A" attached), the transportation of biosolids, and the disposal of biosolids on agricultural land and subject to the following specifications, limits, terms and conditions:

DEFINITIONS

In this Licence,

"**accredited laboratory**" means a laboratory accredited by the Standard Council of Canada (SCC), another accrediting agency recognized by Manitoba Conservation to be equivalent to the SCC, or at a laboratory which can demonstrate to Manitoba Conservation that it has the quality assurance/quality control (QA/QC) procedures in place equivalent to accreditation based on the Canadian Standard Can/CSA-Z753, extension of the international standard ISO 9000, Guide 25;

"**affected area**" means a geographical area excluding the property of the Development;

"**aquifer**" means a water saturated geologic unit that will yield water to wells or springs at a sufficient rate so that the wells or springs can serve as a practical source of water supply;

"**biosolids**" means accumulated organic solids and sludge, resulting from wastewater treatment processes, that have received adequate treatment to permit the material to be recycled;

"**digestion**" means the degradation of organic matter brought about through the action of microorganisms in the absence of elemental oxygen and having a minimum mean cell residence time as indicated below for the appropriate operating temperature:

<u>Operating Temperature</u> <u>Degrees Celsius</u>	<u>Mean Cell Residence Time</u> <u>Days</u>
18	22
24	16
30	11
35	8
40	8

"**Director**" means an employee so designated pursuant to The Environment Act;

"**effluent**" means treated wastewater flowing or pumped out of the wastewater treatment facility;

"**first order waterway**" means a drain or watercourse serving a watershed with a drainage area of up to one square mile;

"**flooding**" means the flowing of water onto lands, other than waterways, due to the overtopping of a waterway or waterways;

"**fourth order waterway**" means a drain or watercourse formed at the point of confluence of at least two third order waterways and may have tributaries of the third order and lower;

"**mean cell residence time**" means the average time that a given unit of cell mass stays in an anaerobic digester and shall be determined by the following equation:

$$\frac{\text{Volume of the Reactor} \times \text{Cell Concentration}}{\text{Flow Rate} \times \text{Cell Concentration}}$$

"**odour nuisance**" means a continuous or repeated odour, smell or aroma, in an affected area, which is offensive, obnoxious, troublesome, annoying, unpleasant, or disagreeable to a person:

- a) residing in the affected area;
- b) working in the affected area; or
- c) present at a location in the affected area which is normally open to the members of the public;

if the odour, smell or aroma

- d) is the subject of at least 5 written complaints in a form satisfactory to the Director and from 5 different persons falling within clauses a), b) or c), and who do not live in the same household, received by the Director within a 90 day period; or
- e) is the subject of at least one written complaint in a form satisfactory to the Director from a person falling within clauses a), b) or c) and the Director is of the opinion that if the odour, smell or aroma had occurred in a more densely populated area there would have been at least 5 written complaints from 5 different persons who do not live in the same household within a 90 day period;

"second order waterway" means a drain or watercourse servicing a watershed with a drainage area greater than one square mile or having a tributary or tributaries which are first order waterways;

"sludge" means accumulated solid material containing large amounts of entrained water, which has separated from wastewater during processing;

"Standard Methods for the Examination of Water and Wastewater" means the most recent edition of Standard Methods for the Examination of Water and Wastewater published jointly by the American Public Health Association, the American Waterworks Association and the Water Environment Association;

"temporary storage facility" means the facility for the temporary storage of digested and mechanically dewatered sewage sludge (biosolids) located at a site with the legal description as specified in Appendix "A" attached to this Licence, in the Rural Municipality of West St. Paul;

"third order waterway" means a drain or watercourse formed at the point of confluence of at least two second order waterways and may have tributaries of the second order and lower;

"waste disposal ground" means an area of land designated by a person, municipality, provincial government agency, or crown corporation for the disposal of waste and approved for use in accordance with Manitoba Regulation 150/91; and

"water table" means the upper surface of the zone of saturation of a water bearing geologic unit.

GENERAL TERMS AND CONDITIONS

This Section of the Licence contains requirements intended to provide guidance to the Licencee in implementing practices to ensure that the environment is maintained in such a manner as to sustain a high quality of life, including social and economic development, recreation and leisure for present and future Manitobans.

1. In addition to any of the limits, terms and conditions specified in this Licence, the Licencee shall, upon the request of the Director:
 - a) sample, monitor, analyze and/or investigate specific areas of concern regarding any segment, component or aspect of pollutant storage, containment, treatment, handling, disposal or emission systems, for such pollutants or ambient quality, aquatic toxicity, leachate characteristics and discharge or emission rates, for such duration and at such frequencies as may be specified;
 - b) determine the environmental impact associated with the release of any pollutant(s) from the Development; or
 - c) provide the Director, within such time as may be specified, with such reports, drawings, specifications, analytical data, descriptions of sampling and analytical procedures being used, bioassay data, flow rate measurements and such other information as may from time to time be requested.

2. The Licencee shall, unless otherwise approved by the Director:
 - a) carry out all preservations and analyses of samples in accordance with the methods prescribed in the Standard Methods for the Examination of Water and Wastewater or in accordance with equivalent preservation and analytical methodologies approved by the Director;
 - b) ensure that all analytical determinations are undertaken by an accredited laboratory; and
 - c) report the results to the Director, in writing and in an electronic format acceptable to the Director, within 60 days of the samples being taken.

3. The Licencee shall, in the case of physical or mechanical breakdown of the sludge treatment system and the biosolids handling and disposal systems that could affect compliance with this Licence:
 - a) notify the Director immediately;
 - b) identify the repairs required; and
 - c) complete the repairs in accordance with the written instructions of the Director.

4. The Licencee shall not cause or permit an odour nuisance to be created as a result of the construction, operation or alteration of the Development, and shall take such steps as the Director may require to eliminate or to mitigate an odour nuisance.

SPECIFICATION, LIMITS, TERMS AND CONDITIONS

5. The Licencee shall operate and maintain the mechanical dewatering equipment to achieve a level of at least 20 percent total solids, by weight after the dewatering process.
6. The Licencee shall only store biosolids at the temporary storage facility in circumstances when agricultural land is not accessible for direct biosolids disposal.
7. The Licencee shall ensure that the biosolids are removed from the temporary storage facility for application to agricultural land as soon as the agricultural land is available.
8. The Licencee shall ensure that any leachate at the temporary storage facility is collected and conveyed back to the treatment plant.
9. With the exception of the use of the temporary storage facility in accordance with Clause 6 of this Licence, the Licencee shall not stockpile sewage sludge or biosolids in the Rural Municipality of West St. Paul, without the prior written approval of the Municipality.
10. The Licencee shall, prior to disposing of biosolids on agricultural land, subject the biosolids to digestion and mechanical dewatering.
11. The Licencee shall ensure that trucks used for the transportation of biosolids are constructed to prevent leakage of leachate and are covered, to the satisfaction of an Environment Officer, to prevent spillage and blow-off of material.
12. The Licencee shall not permit the application of biosolids to land where, prior to such application:
 - a) soil tests show the concentration of sodium bicarbonate extractable phosphorus, as P, exceeds 60 micrograms per gram in the upper 15.0 centimetres;
 - b) soil tests show the level of nitrate-nitrogen exceeds 67 kilograms per hectare in the upper 60 centimetres;
 - c) soil tests show the soil pH to be lower than pH 6.0; and
 - d) the surface slope of the land is greater than 3%.
13. The Licencee shall not permit the deposit of biosolids:
 - a) less than 300 metres from any occupied residence (other than the residences associated with the farms on which biosolids are applied);
 - b) less than 15 metres from a First Order Waterway; and
 - c) less than 30 metres from a Second, Third, or Fourth Order Waterway, and less than 90 metres from any other waterway.

14. The Licencee shall not permit the deposit of biosolids in excess of 56 tonnes per hectare dry weight on any parcel of land except on designated test plots in accordance with the approval of the Technical Advisory Committee, pursuant to Clause 18 of this Licence. Multiple applications of biosolids are permissible provided the total loading limit of 56 tonnes per hectare dry weight is not exceeded.
15. The Licencee shall not permit the application of biosolids to lands subject to flooding.
16. The Licencee shall ensure that biosolids applied to agricultural land are incorporated into the soil as soon as is practicable.
17. The Licencee shall ensure that, on all agricultural lands onto which the biosolids are applied, a crop other than a fruit or vegetable crop is planted at the commencement of the next growing season following such application.
18. The Licencee shall cooperate with a Technical Advisory Committee formed for the purpose of examining and considering research, development, planning and operating data concerning the Development, and to report on the following matters on review of this Licence:
 - a) the appropriateness of the current biosolid spreading rate or other rates in terms of environmental, economic, agronomic, and community considerations;
 - b) the fate of biosolid constituents such as nitrogen, phosphorus, heavy metals and microbiological pathogens in terms of atmospheric losses, crop losses, and losses to surface water runoff;
 - c) aesthetic considerations, especially those of odours from the temporary storage facility and biosolid spreading operations;
 - d) the sampling and testing programs for biosolids, soils, and surface water for nutrients, heavy metals, and microbiological pathogens; and
 - e) the appropriateness of establishing a permit system for each land application of biosolids, which permit system might include soil testing and typing, and the specification of individual biosolid application rates related to soil type, existing nutrients, and proposed crop.

The terms of reference of the Committee shall not be limited to the foregoing. The Committee may also investigate other relevant matters such as alternative uses of biosolids for improvement of saline soils or for fertilization and conditioning of tree plantations.

19. The composition of the Technical Advisory Committee shall be as follows:
 - a) two representatives from Manitoba Conservation (Environment) with one acting as Chairman;
 - b) two representatives from the City of Winnipeg named by the City; and
 - c) a representative from each of Manitoba Health (Environmental Health), Manitoba Conservation (Hydrology), Manitoba Agriculture (Soils and Crops), the University of Manitoba Faculty of Agriculture (Soils and Crops) and the Rural Municipality of West St. Paul.

20. The Licencee shall form and chair a Committee consisting of a representative from the Rural Municipality of West St. Paul, other municipalities in which biosolids are applied and Manitoba Conservation (Environment). This Committee shall address matters relating to Clause 18 c) of this Licence and report to the Technical Advisory Committee.

21. The Licencee shall conduct a monitoring program, in accordance with Appendix "B" to this Licence, to determine:
 - a) the effect of biosolid application on runoff water quality;
 - b) the effect of biosolid application on soil quality; and
 - c) the composition of the biosolids.

22. The Licencee shall, on or before the 31st day of January of each year, submit to the Director, with a copy to the Rural Municipality of West St. Paul and to each Municipality in which biosolids have been disposed of, a report which will include the following:
 - a) details of the biosolids distribution program carried out during the previous calendar year, including a description of the location of the land on which the biosolids were applied and the dry weight of biosolids distributed per hectare;
 - b) details of the biosolids application program proposed to be carried out during the one-year period following the issuance of the report, including a description of the location of the land on which application will be carried out, the proposed dates of application, and the proposed dry weight of biosolids per hectare of agricultural land;
 - c) the results of analysis of biosolids, soil, and surface water runoff, where the biosolids are applied as well as odour complaint investigations concerning biosolids storage and application; and
 - d) a description of any changes in the procedures normally used for the operation of the temporary storage facility.

REVIEW AND REVOCATION

- A. This Licence replaces Licence No. 1089 E R which is hereby rescinded.
- B. This Licence shall be reviewed on or before November 1, 2001.
- C. If, in the opinion of the Director, the Licencee has exceeded or is exceeding or has or is failing to meet the specifications, limits, terms, or conditions set out in this Licence, the Director may, temporarily or permanently, revoke this Licence.
- D. If, in the opinion of the Director, new evidence warrants a change in the specifications, limits, terms or conditions of this Licence, the Director may require the filing of a new proposal pursuant to Section 11 of The Environment Act.

Appendix A to Licence No. 1089 E RR

**CITY OF WINNIPEG
TEMPORARY STORAGE FACILITY
LEGAL DESCRIPTION OF LAND**

PARCEL ONE:

All that portion of Lot Seventeen in the Outer Two Miles according to the Dominion Government Survey of the Parish of Saint Paul in Manitoba taken for Boyle (now Oliver) Avenue, as shewn coloured pink on a Plan registered in the Winnipeg Land Titles Office as No. 1665, now closed, excepting thereout, Firstly: all that portion thereof contained within the straight productions of the Northwestern and Southeastern limits of the land taken for the Right-of-Way of a power transmission line as shewn bordered red on a Plan registered in the said Office as No. 8195, Secondly: all that portion taken for a Public Road as shewn bordered pink on a Plan deposited in the said Office as No. 10671, and, Thirdly: all mines and minerals.

PARCEL TWO:

All those portions of Lot One, and Three to Six, both inclusive, and all Lots Seven to Twenty-Three, both inclusive, in Block Two, which Lots are shewn on a Plan of Survey of Part of Lots Sixteen and Seventeen in the Outer Two Miles of said Parish, registered in the said Office as No. 1665, taken for Sludge Drying Beds, as the same is shewn as Parcels Eleven and Twelve and outlined in pink on a Plan filed in the said Office as No. 9777, excepting out of said Parcel Eleven all that portion taken for the said Public Road on said Plan 10671.

PARCEL THREE:

All those portions of Lots Nine to Seventeen, both inclusive, and of Lot lettered "D" in the Outer Two Miles of said Parish, taken for said Sludge Drying Beds, as the same is shewn as Parcels One, Two, Four, Five, Six, Eight and Ten on said Plan No. 9777, excepting out of said Parcels Eight and Ten all those portions taken for said Public Road on said Plan No. 10671.

PARCEL FOUR:

All that portion of the Government Road Allowance South of and adjacent to said Lot Twelve and said Lot lettered "D", now closed, taken for said Sludge Drying Beds as the same is shewn as Parcels Three and Nine on the said Plan No. 9777, excepting out of said Parcel Nine all that portion taken for said Public Road on said Plan 10671.

PARCEL FIVE:

All that portion of Lot Seventeen in the Outer Two Miles of said Parish taken for said Sludge Drying Beds as the same is shewn as Parcel Seven on said Plan No. 9777.

Appendix B To Licence No. 1089 E RR

CITY OF WINNIPEG
TEMPORARY STORAGE FACILITY AND BIOSOLID SPREADING
MONITORING PROGRAM

- SLUDGE:**
1. A composite sample of biosolids deposited on land shall be collected biweekly.
 2. The sample of biosolids shall be analyzed for the following:
 - a. percent moisture;
 - b. ammonia nitrogen;
 - c. total Kjeldahl nitrogen;
 - d. total phosphorus;
 - e. conductivity;
 - f. cadmium;
 - g. copper;
 - h. chromium;
 - i. nickel;
 - j. lead;
 - k. zinc; and
 - l. pH.
- SOIL:**
3. Composite samples from each field, that will receive biosolids, shall be taken prior to sludge application. Each field of twenty-four hectares or less shall be sampled from a minimum of twelve representative sites or a minimum of one sample site per two hectares for larger fields. Each sample site shall be sampled from 0 centimetres to 15.0 centimetres. The entire core extracted for each sample shall be collected. All samples within a field shall be bulked in one container for thorough mixing prior to analysis yielding one sample per field.
 4. Each soil sample shall be analyzed for the following:
 - a. percent moisture;
 - b. nitrate-nitrogen;
 - c. copper;
 - d. lead;
 - e. zinc;
 - f. pH;
 - g. cadmium;
 - h. nickel;
 - i. chromium;
 - j. conductivity;
 - k. sodium carbonate extractable phosphorus; and
 - l. cation exchange capacity.
- CROP:**
5. Any voluntary sampling, as conducted by the Licencee, of crops grown on land on which biosolids were applied shall include analysis of the grain portion of the crop for the six metals previously mentioned. The stems and leaves should be analyzed periodically for nitrate-nitrogen if this material is being used for animal feed.

- RUNOFF:** 6. Ditch water samples shall be collected upstream and downstream of the fields on which biosolids were applied. At least two locations upstream in the main collector ditches shall be so sampled. The sampling shall be initiated at the first sign of snow-melt and carried out frequently until the runoff period is over.
7. Collected ditch water samples shall be analyzed for the following:
- | | |
|-----------------------------|-----------------------------|
| a. total coliform bacteria; | b. fecal coliform bacteria; |
| c. ammonia; | d. total Kjeldahl nitrogen; |
| e. nitrate-nitrogen; | f. total phosphorus; and |
| g. conductivity. | |

Mr. Randy Webber
Regional Supervisor
Manitoba Conservation
Suite 160 – 123 Main Street
Winnipeg, Manitoba
R3C 1A5

Dear Mr. Webber:

RE: ANNUAL COMPLIANCE REPORT FOR ENVIRONMENT ACT LICENCE 1089E RR

Enclosed you will find our annual compliance report which details the City of Winnipeg's Biosolids Dewatering and Disposal Program for 2010. Included in this report are:

- a) details of the 2010 biosolids distribution and monitoring programs
- b) details of the proposed 2011 biosolids distribution programs.

You will note that we did not fully meet the requirements of Clause 5, " *The Licencee shall operate and maintain the mechanical dewatering equipment to achieve a level of at least 20 percent solids, by weight after the dewatering process.*" Although the total solids in the biosolids averaged 23.7 percent in 2010, the dewatering equipment failed to achieve a total solids content in the biosolids of 20 percent by weight on 10 occasions. This was caused by a foaming issue that is experienced yearly over the winter months in the digesters which affected the quality of the biosolids. Several strategies are currently being implemented to minimize the impact of foaming and we hope to have it resolved in the near future.

As required under Clause 22 of the Licence, copies of this report are being sent to the Rural Municipalities of West St. Paul and Rosser.

If you have any questions concerning the annual report, I may be reached by telephone at 986-4807 or by e-mail at kkjartanson@winnipeg.ca.

Yours sincerely,

EXECUTIVE SUMMARY

Amended Environment Act Licence #1089E RR, issued on June 14, 2000, requires that the City of Winnipeg monitor its biosolids dewatering and disposal operations and submit an annual report to the regulating authority and various municipalities on or before the 31ST of January of each year.

This report summarizes the results of the City's 2010 Biosolids Application Program (WINGRO) and also outlines the proposed plan for the 2011 calendar year.

In 2010, the City produced 12,572 dry-tonnes of anaerobically digested, mechanically dewatered biosolids at its North End Water Pollution Control Centre (NEWPCC). The total solids concentration in the dewatered biosolids averaged 23.7%. The WINGRO program applied 48.3% of the annual biosolids production to farmland and deposited 51.7% at the Brady Road Landfill. The interim storage pad was not used in 2010.

The WINGRO biosolids application rate for the two fields completed in 2010 was 55.0 dry-tonnes per hectare on the 161.5 hectares to which biosolids were applied.

COMPLIANCE REPORT

Environment Act Licence #1089E was issued to the City of Winnipeg on February 21, 1989 and amended on April 28, 2000 (#1089E R) and on June 14, 2000 (#1089E RR). Licence #1089E RR sets limits, terms and conditions with which the City of Winnipeg must comply in the operation of its mechanical dewatering equipment, the temporary storage of biosolids, and with its disposal onto agricultural land. One of these conditions is that "**The applicant shall, on or before the 31st day of January of each year, submit to the Director, with a copy to the Rural Municipality of West St. Paul and to each Municipality in which biosolids have been disposed of, a report...**". In keeping with this requirement, the City of Winnipeg hereby submits this compliance report which contains information on its 2010 Biosolids Land Application Program.

Licence #1089E RR contains several clauses. This report presents results and/or comments for each of the clauses under which the City has generated pertinent information during the course of conducting its 2010 Biosolids Land Application Program. The report also provides information on its proposed Biosolids Program for the twelve months starting January 1, 2011.

The specific requirements of each clause are presented in **bold-faced type** followed by the City's comments.

2010 BIOSOLIDS APPLICATION PROGRAMS

(a) Dewatering

"The Licencee shall operate and maintain the mechanical dewatering equipment to achieve a level of at least 20 percent solids, by weight after the dewatering process." (Clause 5)

From January 1, 2010 to December 31, 2010 the City produced 12,572 dry-tonnes of mechanically-dewatered biosolids at its NEWPCC facility. Appendix I contains the mechanical dewatering operating records for 2010. In 2010, the total solids in the biosolids averaged $23.7 \pm 2.5\%$ ($n = 250$). However, the dewatering equipment failed to achieve a total solids content in the biosolids of 20 percent by weight on 10 occasions – 9 times in January and once in October. The occurrence in October was likely caused by a failure of one of the polymer feed pumps causing an interruption in the polymer being fed to one of the centrifuges for several hours. In January, the required 20 percent solids was not achieved due to a foaming issue that is experienced yearly over the winter months in the digesters. The foaming issue lead to erratic changes in density in the feed sludge going into the centrifuges, which in turn caused erratic variations in the quality of the biosolids. Several strategies are currently being implemented to minimize the impact of the foaming, including careful day to day monitoring of the digesters, sending skimmed grease from the primary clarifiers to landfill rather than to the digesters, and varying polymer dosage rates and mix concentrations, as well as experimenting with several different polymer types.

(b) Storage

"The Licencee shall only store biosolids at the temporary storage facility in circumstances when agricultural land is not accessible for direct biosolids disposal (Clause 6)" and "the Licencee shall ensure that the biosolids are removed from the temporary storage facility for application to agricultural land as soon as the agricultural land is available (Clause 7)."

In 2010, the storage pad was not used to provide interim storage for any mechanically-

dewatered biosolids. When agricultural land was not accessible the biosolids were disposed at the Brady Road Landfill. The WINGRO program deposited 51.7% of the annual biosolids production at the Brady Road Landfill. The large quantity of biosolids disposed at the landfill rather than applied to agricultural land was due to wet weather.

(c) Monitoring Results

“The Licencee shall conduct a monitoring program in accordance with Appendix “B” to this licence” (Clause 21) and present “the results of analysis of biosolids, soil, and surface water runoff, where the biosolids are applied as well as odour complaint investigations concerning biosolids storage and application” (Clause 22 (c)).

The following pages and Appendix I contain the results of analyses conducted on samples of biosolids, ditchwater and soils collected in fulfilment of the monitoring requirements stipulated in Licence #1089E RR.

These results include the following:

- | | |
|--|-------------------|
| - Biosolids Quality | Table 1 |
| - Ditchwater | Table 2, Figure 1 |
| - Background Soils Results for Applied Fields | Table 3 |
| - % Solids in Mechanically Dewatered Biosolids | Appendix I |

No formal odour complaints associated with the WINGRO Program were received in 2010.

Regulated Parameter:

Licence requirements:

NO₃-N = <67 kg/ha

SOD PHOS = <60 mg/kg

pH = >6.0 units

* Based on Soil Density = 1200 Dry kg/m³

** Sodium Bicarbonate Extractable Phosphorus

NOTES: (1) Soil sample depth is 0 to 15 cm for all parameters except NO₃N where sample depth is 0 to 60 cm.

(2) Fields #60 and #61 were completed in 2010.

(d) Distribution Program

“details of the biosolids distribution program carried out during the previous calendar year, including the description of the location of the land on which the biosolids were applied and the dry weight of biosolids distributed per hectare.”

(Clause 22 (a))

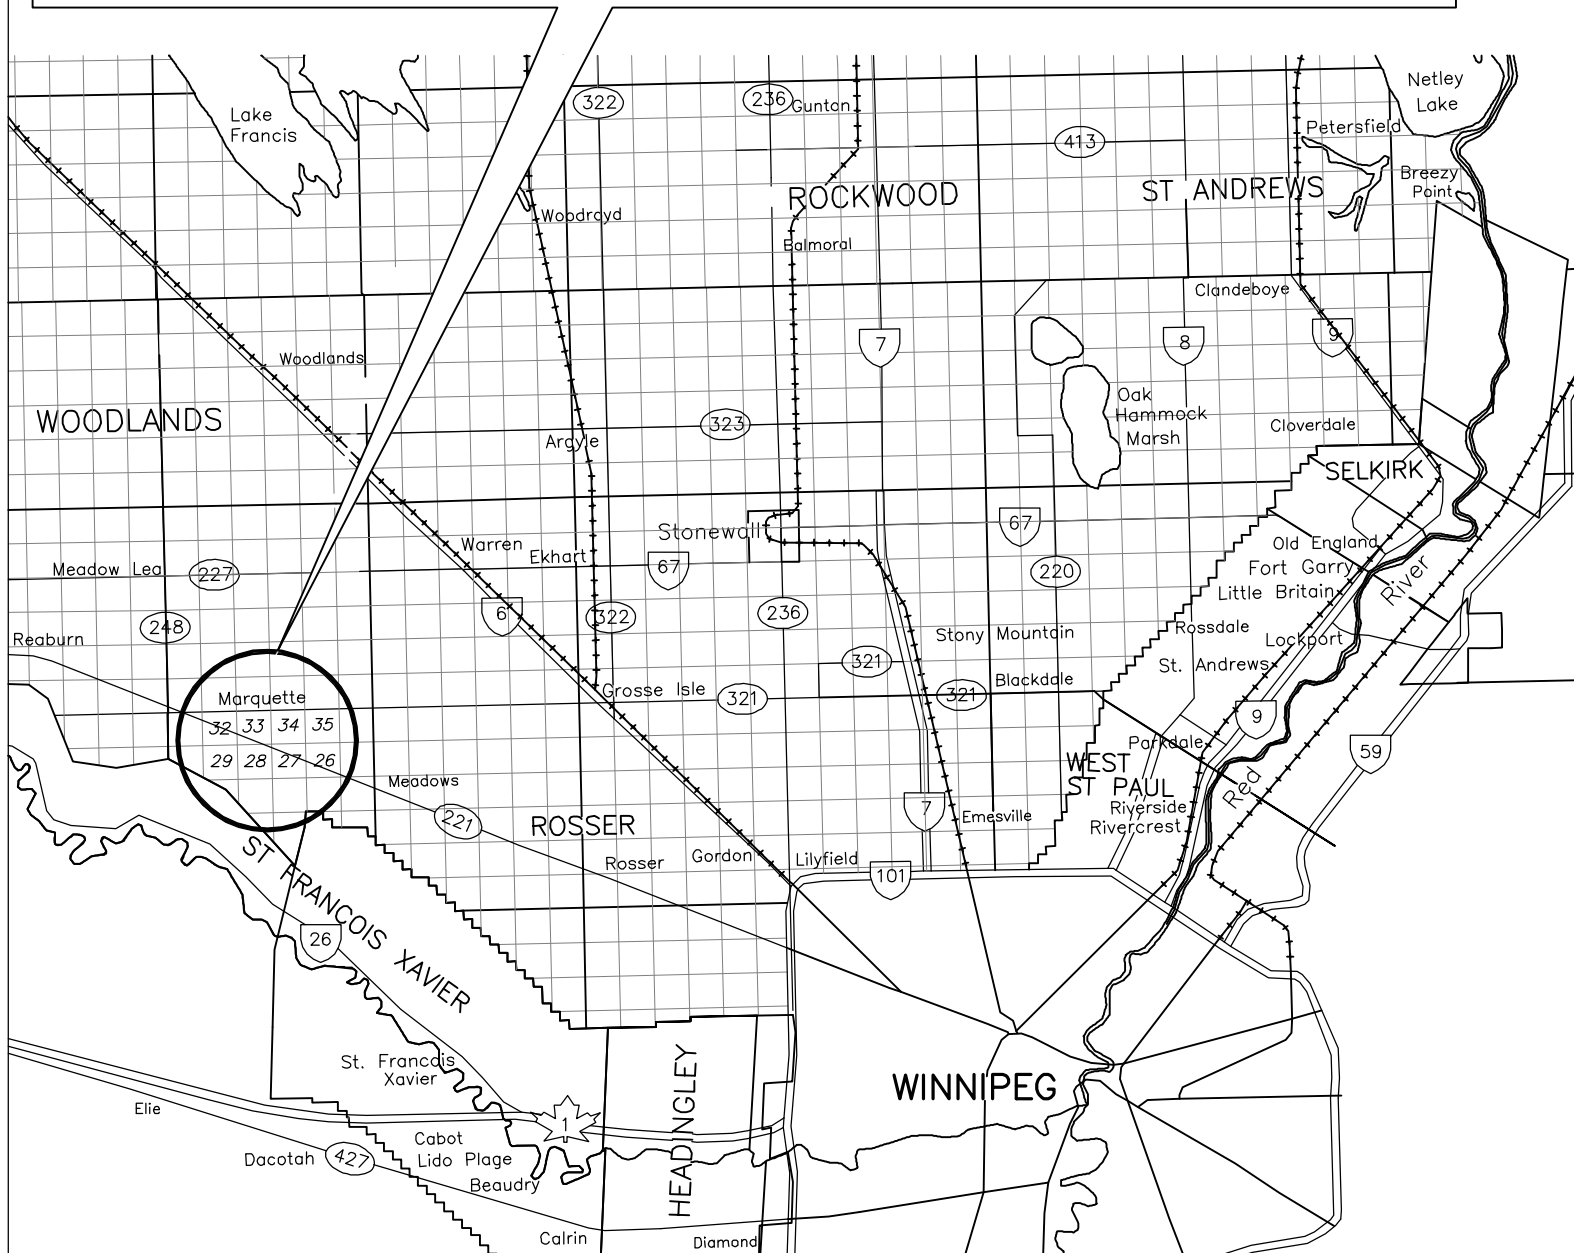

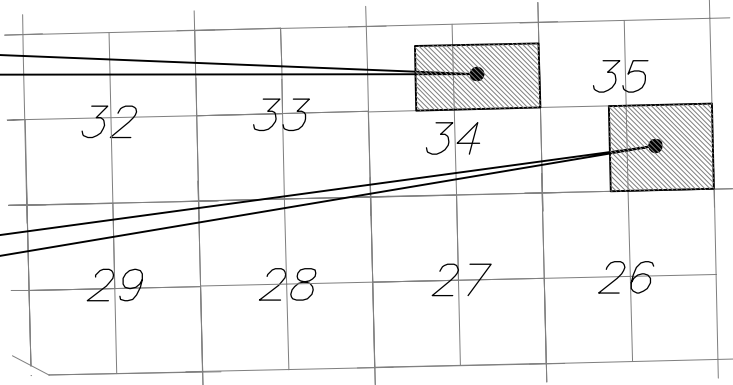

Of the 12,572 dry-tonnes of mechanically-dewatered biosolids produced at the NEWPCC from January 1, 2010 to December 31, 2010, 48.3% were re-cycled onto farmland through the WINGRO program, while 51.7% were disposed at the Brady Road Landfill. The large quantity of biosolids disposed at the landfill was due to wet weather. The City of Winnipeg's 2010 Biosolids Land Application Program (WINGRO) spread and incorporated digested, dewatered biosolids onto 2 parcels of land. A total of 6,075 dry-tonnes of dewatered biosolids were distributed on the two fields completed in 2010 at an average application rate of 55.0 dry-tonnes per hectare on the 161.5 hectares of land utilized. Table 4 provides a detailed summary of the results and Figure 2 shows the locations where biosolids applications were completed in 2010.

2011 PROPOSED BIOSOLIDS APPLICATION PROGRAMS

“details of the biosolids application program proposed to be carried out during the one-year period following the issuance of the report, including a description of the locations of the land on which application will be carried out, the proposed dates of application, and the proposed dry weight of biosolids per hectare of agricultural land”. (Clause 22 (b))

In the 2011 WINGRO application year, which runs from January 1, 2011 to December 31, 2011, the City plans no land application at the present time. The City plans to dispose of biosolids at the Brady Road Landfill.

S.M. 2002, c. 36
Bill 36, 3rd Session, 37th Legislature

THE DRINKING WATER SAFETY ACT

Table of Contents

(Assented to August 9, 2002)

HER MAJESTY, by and with the advice and consent of the Legislative Assembly of Manitoba, enacts as follows:

INTERPRETATION

Definitions

1(1) In this Act,

"**director**" means a director designated under subsection 6(1); (« directeur »)

"**domestic purposes**" means the use of water for

(a) personal hygiene, drinking, preparing food or washing dishes or other items that come into contact with food, or

(b) other purposes prescribed by regulation; (« fins domestiques »)

"**drinking water officer**" means a person appointed as a drinking water officer under subsection 6(2); (« agent du Service de l'eau potable »)

"**laboratory**" means

(a) a laboratory accredited in accordance with the regulations, or

(b) a testing facility approved by the director and operated in accordance with the regulations; (« laboratoire »)

"**medical officer**" means a medical officer of health appointed under *The Public Health Act*; (« médecin hygiéniste »)

"**minister**" means the minister appointed by the Lieutenant Governor in Council to administer this Act; (« ministre »)

"**non-potable system**" means a well, or a device or structure or an assemblage of devices and structures, used or intended to be used for the production or delivery of non-potable water; (« réseau d'eau non potable »)

"**owner**", in relation to a water system, includes a person who is

(a) responsible for the ongoing operation of the water system, or

(b) in charge of managing that operation,

and if the water system or part of it is owned by more than one person or is jointly owned, includes all of those owners; (« propriétaire »)

"**person**" includes a corporation, partnership, limited partnership, syndicate, trustee, joint venture, and an association of persons; (« personne »)

"**personal health information**" and "**personal information**" mean personal health information and personal information as defined in *The Freedom of Information and Protection of Privacy Act*; (« renseignements médicaux personnels » ou « renseignements personnels »)

"**prescribed**" means prescribed by the regulations;

"**private water supplier**" means an owner of a private water system; (« fournisseur d'un service d'eau privé »)

"**private water system**" means a water system that

(a) supplies water only to one private residence, or

(b) despite supplying water to commercial premises or to more than one private residence, is

designated under clause 2(a) as a private water system; (« réseau privé d'alimentation en eau »)

"public water supplier" means an owner of a public water system; (« fournisseur d'un service d'eau public »)

"public water system" means a water system that

(a) has 15 or more service connections, or

(b) has fewer than 15 service connections, but is designated under clause 2(b) as a public water system; (« réseau public d'alimentation en eau »)

"semi-public water supplier" means an owner of a semi-public water system; (« fournisseur d'un service d'eau semi-public »)

"semi-public water system" means a water system that is not a public water system or a private water system; (« réseau semi-public d'alimentation en eau »)

"water supplier" means a person who is an owner of a water system; (« fournisseur d'un service d'eau »)

"water system" means a well, or a device or structure or an assemblage of devices and structures, used or intended to be used for the production, treatment, storage or delivery of potable water for domestic purposes. (« réseau d'alimentation en eau »)

Reference to "Act" includes regulations

1(2) A reference to "this Act" includes the regulations made under this Act.

Director may designate system as private or public

- 2 After consulting with a medical officer about the potential risk to public health, the director may
- (a) designate a water system that provides water to commercial premises or to more than one private residence as a private water system; or
 - (b) designate a water system that has fewer than 15 service connections as a public water system.

DRINKING WATER QUALITY STANDARDS

Drinking water quality standards

3 Every public water supplier and semi-public water supplier must comply with the drinking water quality standards specified in the regulations.

OFFICE OF DRINKING WATER

Office of Drinking Water established

4(1) The Office of Drinking Water is hereby established.

Purpose

- 4(2) The purpose of the Office of Drinking Water is to
- (a) administer and enforce this Act and the regulations, licences, permits, advisories and orders made under it;
 - (b) provide guidance, technical expertise and up-to-date information and educational materials about drinking water safety to water suppliers and the public; and
 - (c) communicate with government departments and agencies, including federal, provincial and local governments, and with other persons, to share expertise and to facilitate co-operative efforts in drinking water programs and policies.

Annual report

5 Within six months after the end of the government's fiscal year, the director must prepare and submit to the minister a report about the Office's activities during that fiscal year. The minister must lay a copy of the report before the Legislative Assembly within 15 days after receiving it if the Assembly is sitting or, if it is not, within 15 days after the next sitting begins.

Designation of director

6(1) The minister may designate one or more persons as a director for the purpose of this Act.

Appointment of drinking water officers

6(2) The minister may appoint any person, or a class of persons, as a drinking water officer.

CONSTRUCTION AND ALTERATION OF WATER SYSTEMS**Construction or alteration of public or semi-public water systems**

7(1) No person shall

- (a) construct or begin construction of; or
- (b) alter;

a public water system or a semi-public water system except under the authority of a permit to do so issued by the director in accordance with the regulations.

Minor alterations may not require permit

7(2) Despite subsection (1), if the director receives an application for a permit to alter a water system and is satisfied that the proposed alteration is minor and will not adversely affect the safety of water obtained from the water system, the director may by written notice to the applicant waive the requirement to obtain a permit for the alteration.

Permit may be subject to terms and conditions

7(3) A permit under subsection (1) may be issued subject to terms and conditions that the director considers necessary to provide for

- (a) the safety of water obtained from a water system; and
- (b) effective environmental management.

Permit may contain expiry date

7(4) A permit may state that it expires unless construction is begun or completed by a specified date.

Permit binding on subsequent owner

7(5) A permit is binding on a person who purchases or otherwise becomes an owner of the water system.

OPERATING LICENCES FOR WATER SYSTEMS**Operating licence required for public water systems**

8(1) No person shall operate a public water system unless the person holds a current operating licence for the water system issued by the director in accordance with the regulations.

Operating licence required for semi-public water systems

8(2) No person shall operate a semi-public water system unless the person holds a current operating licence for the water system issued by the director in accordance with the regulations.

Licence may be subject to terms and conditions

8(3) An operating licence may be issued subject to terms and conditions that the director considers necessary to provide for

- (a) the safety of water obtained from a water system; and
- (b) effective environmental management.

Expiry of licence

8(4) An operating licence must contain an expiry date.

Licence binding on subsequent owner

8(5) An operating licence is binding on a person who purchases or otherwise becomes an owner of the water system.

ASSESSMENTS OF WATER SYSTEM INFRASTRUCTURE AND WATER SUPPLY SOURCES

Assessment to be conducted

9(1) Within five years after the coming into force of this section, and at least once in every five-year period afterwards, every public water supplier and semi-public water supplier must

- (a) conduct, or cause to be conducted, an assessment of the water system's infrastructure and its water supply source, in accordance with the regulations; and
- (b) provide the director with a written report of the assessment in a form satisfactory to the director.

Additional assessments may be required

9(2) In addition to the assessments under subsection (1), the director may require a water supplier to conduct, or cause to be conducted, an assessment of the water system's infrastructure or its water supply source at any time, in the manner required by the director, if

- (a) the director reasonably believes that the infrastructure of the water system or its water supply source presents or may present a risk to the safety of water obtained from the water system; or
- (b) the water system has been altered.

Director may order repairs or upgrades

10 On receiving a written report of an assessment under section 9, the director may order the water supplier to perform any further investigation and any repair, upgrade, or other work that the director reasonably considers necessary to address any matters that, in the director's opinion, present or may present a risk to the safety of water obtained from the water system.

DRINKING WATER SAFETY ORDERS

Drinking water safety orders

11(1) Subject to subsection (4), the director, a medical officer or a drinking water officer may make a drinking water safety order under this section if he or she reasonably believes that

- (a) water obtained from a water system is, may be or may become a risk to the health of persons; and
- (b) an order is necessary to investigate, prevent, remedy, mitigate or otherwise deal with the risk.

Order may be directed to any person

11(2) A drinking water safety order may be directed to any person.

Requirements of an order

11(3) A drinking water safety order may require the person to whom it is directed to do anything, or refrain from doing anything, that the person issuing the order considers necessary to investigate, prevent, remedy, mitigate or otherwise deal with the risk, including one or more of the following:

- (a) investigate the situation, or undertake tests, examinations, analyses, monitoring or recording, and provide the person issuing the order with any information that he or she requires;
- (b) construct, alter, install, replace, remove, reconstruct, repair or do any other work
 - (i) in relation to a water system or to any other thing, or
 - (ii) in an area of the environment;
- (c) cleanse, disinfect or destroy any thing specified in the order;
- (d) stop delivery of water from the water system;
- (e) provide users of the water system with an alternate supply of water for domestic purposes;
- (f) stop any activity, or remove or remediate any contaminant or other material that is adversely affecting or may adversely affect the source of water for a water system.

Approval of medical officer required

11(4) The director or a drinking water officer must obtain the approval of a medical officer before making a drinking water safety order that

- (a) affects the availability of potable water to users of a water system;
- (b) requires the water supplier to provide an alternate supply of potable water; or
- (c) addresses an issue relating to the safety of water currently being obtained from the water system.

Immediate issuance of order

11(5) Despite subsection (4), if in the time necessary for the director or a drinking water officer to obtain the approval of a medical officer the health risk to users of the water system could increase, the director or drinking water officer may make an order described in that subsection without obtaining that approval. But a person who makes an order in this manner must notify a medical officer of the circumstances of the order as soon as is practicable.

Medical officer may revoke or amend order

11(6) Upon receiving notice under subsection (5), a medical officer may revoke or amend the order.

Order may require standards to be exceeded

11(7) An order may be made under this section or under section 12 or 13 even if it imposes requirements on a water supplier that are more stringent than the drinking water quality standards specified in the regulations.

Director may revoke or amend order

12 The director may, by order, revoke or amend an order made under section 11 by a drinking water officer.

Order to water supplier to hire interim operator

13(1) If the prerequisites for an order under subsection 11(1) are met, the minister may, in addition to any order that may have been made under section 11 or 12, order a water supplier to enter into an agreement or arrangement with another person to take control of, operate and manage a water system or any part of a water system for a specified period, at the water supplier's expense and in accordance with the terms and conditions of the order.

Interim operator to comply with licence and Act

13(2) A person who takes control of all or part of a water system under an agreement or arrangement described in subsection (1) is bound by the operating licence for that water system, and, except as specified in an order under subsection (1), is for all other purposes of this Act deemed to be a water supplier for that water system.

Financial terms and conditions

13(3) In addition to any other terms and conditions that may be included, an order under subsection (1) may contain terms and conditions respecting

- (a) the indemnification by a person of another person in relation to costs incurred as a result of an agreement or arrangement described in that subsection;
- (b) the requirement of a person to provide financial security to another person in the form of insurance, a letter of credit, a bond or other form of security satisfactory to the minister.

GENERAL PROVISIONS ABOUT ORDERS

Order may contain terms and conditions

14(1) An order issued under this Act may include terms and conditions if the person issuing the order considers that they are necessary to provide for

- (a) the safety of water obtained from a water system; or
- (b) effective environmental management.

Order may specify deadline

14(2) An order issued under this Act may specify the time within which or the date by which the

person to whom it is directed must comply with the order.

Action if order not complied with

15(1) If a person to whom an order has been directed under section 10, 11, 12 or 13 fails to comply with it, unless a stay of the order has been granted under subsection 16(3),

(a) the director may, with the approval of a medical officer, suspend, cancel or refuse to renew the operating licence for the water system; or

(b) the director or a medical officer may take, or cause to be taken, any action that he or she considers necessary to carry out the order.

Order to pay costs

15(2) If action is taken under clause (1)(b), the director or a medical officer may order the person to whom the order was directed to pay the costs of taking that action.

APPEALS TO THE MINISTER

Appeal of director's decision or order

16(1) A person directly affected by

(a) a decision of the director under section 2;

(b) a decision of the director under section 7 or 8, or under the regulations, resulting in the issuance, renewal or refusal to issue or renew a permit or licence, the terms and conditions of a permit or licence, or the amendment, suspension or cancellation of a permit or licence; or

(c) an order made under section 10, 11 or 12;

may, by written notice to the minister within 14 days after the decision or the making of the order, or such further time as the minister allows, appeal the decision or order to the minister.

Content of notice of appeal

16(2) A notice of appeal must state the reasons for the appeal and the facts relied upon.

Stay of decision or order

16(3) An appeal of a decision or order does not stay the decision or order pending the appeal, unless the minister orders a stay.

Minister's power on appeal

16(4) As soon as is reasonably practicable after receiving a notice of appeal, the minister must consider the appeal and

(a) confirm, vary or rescind the decision or order being appealed;

(b) make any decision or order that could have been made;

(c) refer the matter back to the director for reconsideration in accordance with directions given by the minister; or

(d) refer the matter to the Clean Environment Commission established under *The Environment Act* for its advice and recommendations, before making a decision or order under clause (a), (b) or (c).

Notice of decision or order

16(5) Within seven days after making a decision or order under subsection (4), the minister must give notice of it to the appellant.

BOIL WATER ADVISORIES

Boil water advisory

17(1) A boil water advisory may be issued by

(a) a medical officer; or

(b) with the approval of a medical officer, by the director or a drinking water officer;

if the person issuing the advisory reasonably believes that water from a water system is or may be unsafe for domestic purposes unless it is boiled or otherwise disinfected.

Approval not needed

17(2) Despite subsection (1), if in the time necessary for the director or a drinking water officer to obtain the approval of a medical officer the health risk to users of the water system could increase, the director or drinking water officer may issue an advisory without obtaining that approval. But a person who issues an advisory in this manner must notify a medical officer of the circumstances of the advisory as soon as is practicable.

Content of advisory

17(3) A boil water advisory must advise users of the water system that, until further notice, the water is or may be unsafe and must be boiled or otherwise disinfected before it is used for any domestic purpose. The advisory may contain any other information or specify any other action to be taken by users or water suppliers that the person issuing the advisory considers appropriate.

Notice of advisory

17(4) The person who issues a boil water advisory may give notice of the advisory, or require the water supplier to give notice of the advisory, to users of the water system by any method the person issuing the advisory considers appropriate, which may include one or more of the following:

- (a) delivering copies of the advisory to users;
- (b) publishing the advisory in a newspaper distributed in the user area;
- (c) broadcasting the advisory on a radio or television station received in the user area;
- (d) posting copies of the advisory in publicly accessible locations in the user area;
- (e) a method prescribed by regulation.

Termination of advisory

17(5) When a medical officer believes that water from the water system is safe for domestic purposes without being boiled or otherwise disinfected he or she must terminate the boil water advisory and give notice of the termination to the water supplier.

Water not to be provided contrary to advisory

18(1) No person who knows or ought reasonably to know of the existence of a boil water advisory shall provide to any other person

- (a) water for domestic purposes; or
- (b) a food or beverage containing or prepared with water;

if the water was obtained from a water system that is subject to the boil water advisory, unless the person providing the water, food or beverage has taken the action specified in the advisory.

Exemption for private residences

18(2) Subsection (1) does not apply to a person who provides water, food or a beverage in the person's residence to a member of his or her family or to a guest.

Recovery of costs re boil water advisory

19(1) The director or a medical officer may require the water supplier in relation to a water system for which a boil water advisory has been issued to pay the costs incurred by the government in

- (a) giving notice under subsection 17(4); or
- (b) sampling, testing or analyzing water from the water system to determine whether a boil water advisory should be issued or terminated.

Order for cost recovery

19(2) If a water supplier does not pay the costs as required under subsection (1), the director may issue an order to the water supplier to pay the costs.

DISINFECTING WATER

Disinfection requirements

20(1) Every

- (a) public water supplier; and
- (b) semi-public water supplier in relation to a water system for which disinfection is required by the regulations;

must disinfect the water system's water supply in accordance with the regulations.

Testing for disinfectant residuals

20(2) A water supplier required to disinfect under this section must test the disinfected water supply for disinfectant residuals

- (a) before the disinfected water leaves the treatment plant; and
- (b) after the disinfected water has left the treatment plant, at prescribed time intervals and at representative points in the distribution system

in accordance with the regulations.

Records of disinfectant testing

20(3) A water supplier required to disinfect under this section must

- (a) make a record in the prescribed manner of all tests performed under this section; and
- (b) retain each record in the prescribed manner for at least 24 months after the test date.

SAMPLING, ANALYSIS AND REPORTING**Routine sampling and analysis**

21(1) Every public water supplier and semi-public water supplier must sample and submit water samples from the water system to a laboratory for bacteriological and other prescribed analyses, in accordance with the regulations.

Private system sampling and analysis

21(2) If required by the regulations, a private water supplier must sample and submit water samples from the water system to a laboratory for bacteriological and other prescribed analyses, in accordance with the regulations.

Reporting of results

22(1) A laboratory that conducts an analysis of a sample from a water system must submit the results of the analysis to the director, in accordance with the regulations.

Emergency reporting of results

22(2) If a laboratory conducts an analysis of a sample from a public water system or a semi-public water system, and the results indicate

- (a) that a serious health risk to users of the system exists or may exist; or
- (b) non-compliance with a drinking water quality standard specified in the regulations;

the laboratory must immediately notify the director, a medical officer or a drinking water officer, and provide the information that he or she requires.

Form of emergency notification

22(3) A laboratory must give notice under subsection (2) in person to, or by live telephone conversation with, the person to whom notice is being given. For greater certainty, the leaving of a recorded message on a voice-mail system or other form of telephone answering service or device is not a "live telephone conversation" for the purposes of this subsection.

Personal or confidential information may be disclosed

22(4) The analysis results and any other information provided by a laboratory under this section may include personal information and proprietary or confidential information.

Follow-up and remedial action

23(1) On receiving notice from a laboratory under subsection 22(2), the director, medical officer or drinking water officer must, as soon as is practicable and in addition to any other action he or she may take, notify the water supplier of receipt of the laboratory notice. The water supplier must then take follow-up measures and remedial action, in the manner and within the time required by the director, medical officer or drinking water officer.

Order

23(2) When or after a water supplier is notified under subsection (1), the director, a medical officer or a drinking water officer may issue an order to the water supplier, and section 11 applies to the order, with the necessary changes.

Emergency reporting for private water system

24 If a laboratory conducts an analysis in relation to a private water system and the results indicate that a serious health risk to users of the system exists or may exist, the laboratory must notify the private water supplier as soon as is practicable, in accordance with the regulations, and advise him or her of the circumstances of the analysis and of the existence of the risk or possible risk.

RECORDS**Mandatory record-keeping**

25 Every public water supplier and semi-public water supplier must make and retain written records relating to the operation of the water system, sampling and other prescribed matters, and provide periodic reports to the director or a drinking water officer, in accordance with the regulations.

DRINKING WATER QUALITY DATABASE**Director may establish and maintain database**

26(1) The director may establish and maintain a provincial drinking water quality database to assist in monitoring and tracking drinking water analyses, and in identifying drinking water quality trends and risks.

Information may be entered in database

26(2) The director may enter any information received under this Act, and any other relevant information, in the database. This information may include personal information and proprietary or confidential information.

Sharing information with other bodies

26(3) For the purpose of preventing, controlling or dealing with risks to public health, the director may provide information from the database to any of the following:

- (a) a medical officer or a drinking water officer;
- (b) a government department or government agency;
- (c) a municipality, local government district, school division or school district established under *The Public Schools Act*, regional health authority or other local authority established by or under an enactment;
- (d) a band as defined in the *Indian Act* (Canada);
- (e) a department or agency of the government of Canada or of another province or territory of Canada, or the government or an agency of the government of a foreign country or of a state, province or territory of a foreign country.

Personal, proprietary and confidential information

26(4) The information referred to in subsection (3) may include personal information, and proprietary or confidential information.

Public reports

26(5) The director may, on a periodic basis, issue public reports summarizing information contained in the database.

ENTRY AND INSPECTION

Inspection authority—director and medical officer

27(1) When reasonably required to administer or determine compliance with this Act, the director or a medical officer may enter and inspect any place or premises, other than a dwelling, at any reasonable time.

Entry into dwelling with consent

27(2) Despite subsection (1), the director or a medical officer may enter and inspect a dwelling with the consent of the owner or occupant.

Warrant for entry into dwelling

27(3) On application by the director or a medical officer, a justice may at any time issue a warrant authorizing the director, a medical officer and any other person named in the warrant to enter and inspect a dwelling, if the justice is satisfied there are reasonable grounds to believe that

- (a) entry to the dwelling is necessary for the purpose of administering or determining compliance with this Act; and
- (b) in respect of the dwelling,
 - (i) entry has been refused or there are reasonable grounds to believe that entry will be refused,
 - (ii) the occupant is temporarily absent, or
 - (iii) the dwelling is unoccupied.

Conditions

27(4) A warrant may be made subject to any conditions that may be specified in it.

Entry into dwelling in exigent circumstances

27(5) The director or a medical officer may enter and inspect a dwelling without a warrant if the conditions for obtaining a warrant under subsection (3) exist but, because of exigent circumstances, it would not be practical to obtain a warrant.

Entry into premises in public health emergency

27(6) Where the director or a medical officer reasonably believes there is an immediate risk to the health of persons, he or she may

- (a) enter and inspect any place or premises, including a dwelling, at any time and without a warrant; and
- (b) exercise any of his or her powers under this Act for the purpose of preventing, controlling or dealing with the risk.

Inspection authority—drinking water officer

27(7) A drinking water officer

- (a) has the same powers as the director and a medical officer under subsections (1), (2) and (3); and
- (b) has the same powers as the director and a medical officer under subsections (5) and (6) if
 - (i) the director or a medical officer has authorized the drinking water officer to exercise the powers, or
 - (ii) the drinking water officer reasonably believes that immediate action is necessary and there is no time to locate the director or a medical officer.

Assistance to officials

27(8) In exercising a power under this section, the director, a medical officer or a drinking water officer may use such force or obtain such assistance from a peace officer or other person as he or she considers necessary.

Additional inspection powers

28(1) In addition to the powers referred to in section 27, when reasonably required to administer or

determine compliance with this Act, the director, a medical officer or a drinking water officer may

- (a) make any inspection, investigation, examination, test, analysis or inquiry that he or she considers necessary;
- (b) detain or cause to be detained any vehicle or container that is used as a bulk water hauler;
- (c) require any substance, thing, solid, liquid, gas, plant, animal or other organism to be produced for inspection, examination, testing or analysis;
- (d) seize or take samples of any substance, thing, solid, liquid, gas, plant, animal or other organism;
- (e) subject to subsection (2), require any person to
 - (i) provide information, including personal information, personal health information or proprietary or confidential information, or
 - (ii) produce any document or record, including a document or record containing personal information, personal health information or proprietary or confidential information, for examination or copying, or to retain as evidence; or
- (f) take photographs or videotapes of a place or premises, or any condition, process, substance, thing, solid, liquid, gas, plant, animal or other organism located at or in it.

Personal health information

28(2) Despite subsection (1), only a medical officer or a person authorized by a medical officer may require the production of personal health information or a document or record containing personal health information.

Use of data processing system and copying equipment

28(3) In carrying out an inspection under this Act, the director, a medical officer or a drinking water officer may

- (a) use a data processing system at the place where the records, documents or things are kept to examine any data contained in or available to the system;
- (b) reproduce, in the form of a printout or other intelligible output, any record from the data contained in or available to a data processing system in the place; and
- (c) use any copying equipment at the place to make copies of any record or document.

Assistance to officials

28(4) A person who has custody or control of a record, document or thing referred to in subsection (1) must give the director, medical officer or drinking water officer

- (a) all reasonable assistance to enable the director, medical officer or drinking water officer to carry out his or her duties; and
- (b) any information he or she may reasonably require.

Cost recovery

29(1) The director, medical officer or drinking water officer may require a public water supplier or a semi-public water supplier to pay the costs of testing, sampling or analysis under subsection 28(1).

Order for cost recovery

29(2) If a water supplier does not pay the costs as required under subsection (1), the director may issue an order to the water supplier to pay the costs.

NON-POTABLE SYSTEMS

Non-potable systems

30 No person shall begin construction of, construct, alter or operate a non-potable system except in accordance with the regulations.

OFFENCES AND PENALTIES

Offences

31(1) A person is guilty of an offence who

- (a) contravenes a provision of this Act, or fails to comply with a provision of any order, licence or permit issued under this Act;
- (b) makes a false statement to the director, a medical officer, a drinking water officer or any other person acting under the authority of this Act;
- (c) provides a false statement in an application, record or any other document given or required under this Act; or
- (d) hinders, obstructs or interferes with or attempts to hinder, obstruct or interfere with the director, a medical officer, a drinking water officer or any other person acting under the authority of this Act.

Continuing offence

31(2) When a contravention of this Act or an order, licence or permit issued under this Act continues for more than one day, the person is guilty of a separate offence for each day the contravention continues.

Directors and officers of corporations

31(3) If a corporation commits an offence under this Act, a director or officer of the corporation who authorized, permitted or acquiesced in the commission of the offence is also guilty of the offence.

Penalties for individuals

31(4) Except as provided in subsection (5), a person who is guilty of an offence under this Act is liable on summary conviction,

- (a) for a first offence, to a fine of not more than \$50,000. or imprisonment for a term of not more than six months, or both; and
- (b) for each subsequent offence, to a fine of not more than \$100,000. or imprisonment for a term of not more than one year, or both.

Penalties for corporations

31(5) A corporation that is guilty of an offence under this Act is liable on summary conviction,

- (a) for a first offence, to a fine of not more than \$500,000.; and
- (b) for each subsequent offence, to a fine of not more than \$1,000,000.

Limitation period

31(6) A prosecution for an offence under this Act may be commenced not more than one year after the day on which evidence sufficient to justify a prosecution for the offence came to the knowledge of the director, a medical officer or a drinking water officer; and the certificate of the director, medical officer or drinking water officer as to the day on which the evidence came to his or her knowledge is evidence of that date.

Admissibility of certificate in evidence

32(1) A certificate or report purporting to have been signed by a laboratory analyst stating that he or she has analyzed a sample of water or other substance and stating the results of the analysis is admissible in evidence in any prosecution for an offence under this Act without proof of the signature or official character of the analyst who signed the certificate or report, and in the absence of any evidence to the contrary, is proof of the statements contained in the certificate or report, as the case may be.

Service of certificate on party

32(2) No certificate or report or any copy or extract of a certificate or report referred to in subsection (1) shall be received in evidence unless the party intending to produce it has served on the party against whom it is intended to be produced, at least seven days prior to the date fixed for the hearing, a notice of the intention together with a duplicate of the certificate or report.

REPORTING OF VIOLATIONS

Persons may report suspected violation

33(1) Any person who reasonably believes that a violation of this Act has occurred or may occur,

may report the circumstances leading to that belief to a medical officer, the director or a drinking water officer.

If information personal or confidential

- 33(2)** A person may make a report under subsection (1) even if
- (a) it requires the disclosure of personal information or personal health information; or
 - (b) the information on which the person's belief is based is proprietary or confidential information.

Protection from liability

33(3) No action or other proceeding may be brought against a person for providing information in good faith under this section.

Adverse employment action prohibited

33(4) No employer shall take adverse employment action against an employee because that person provided information in good faith under this section.

No interference or harassment

33(5) No person shall interfere with or harass a person who provides information under this section.

GENERAL PROVISIONS

Appealing amount of costs

34 A person to whom an order under subsection 15(2), 19(2) or 29(2) is directed may appeal the amount of the costs, and section 16 applies to the appeal, with the necessary changes.

Enforcing cost-recovery order

35 An order to pay costs under subsection 15(2), 19(2) or 29(2) may be filed in the Court of Queen's Bench and enforced as if it were an order of the Court.

Serving documents

- 36** Any document required to be served or given under this Act is validly served or given
- (a) when it is given personally to the person it is required to be served upon or given to or, in the case of a corporation, to an agent, director, officer or employee of the corporation; or
 - (b) if giving it to a person as described in clause (a) is not reasonable or possible in the circumstances,
 - (i) when it is sent to the person's address as shown in the records of the director, by registered mail, fax, electronic mail or any other type of mail or communication that provides confirmation of delivery, or
 - (ii) alternatively, in the case of an order that relates to a place or premises, when it is posted in a visible location on or at the place or premises.

Protection from liability

- 37** No action for damages or other proceeding lies or may be brought personally against any person acting under the authority of, or engaged in the administration or enforcement of, this Act
- (a) for anything done or omitted in good faith in the performance or exercise, or intended performance or exercise, of a duty or power under this Act; or
 - (b) for any neglect or default in the performance or exercise, or intended performance or exercise, in good faith of a duty or power under this Act.

Act binds the Crown

38 This Act binds the Crown.

REGULATIONS

Regulations

- 39(1) The Lieutenant Governor in Council may make regulations
- (a) respecting the accreditation of laboratories;
 - (b) respecting the approval of testing facilities by the director, and their operation;
 - (c) prescribing uses of water for the purpose of the definition of "domestic purposes" in section 1;
 - (d) specifying drinking water quality standards;
 - (e) respecting the adoption, development, application, implementation and revision of drinking water quality guidelines and objectives;
 - (f) respecting the issuance, amendment, renewal, suspension and cancellation of permits to construct or alter water systems, including design and construction requirements to be met by applicants;
 - (g) respecting the issuance, amendment, renewal, suspension or cancellation of operating licences for water systems;
 - (h) respecting the manner in which assessments of water system infrastructure and water supply sources are to be conducted;
 - (i) prescribing methods of giving notice of boil water advisories;
 - (j) respecting disinfection requirements for water systems;
 - (k) respecting testing for disinfection residuals, including the prescribing of time intervals for the performing of such tests;
 - (l) prescribing requirements respecting records of tests for disinfection residuals, including the manner in which they are to be made and retained;
 - (m) respecting tests and analyses to be performed on water systems, including prescribing the types of tests and analyses to be performed;
 - (n) respecting the manner in which prescribed tests and analyses in relation to water systems are to be performed, and when they are to be performed;
 - (o) respecting the form in which and time by which laboratories are to submit results of analyses to the director;
 - (p) respecting the manner in which laboratories are to notify water suppliers of analyses that indicate a risk or possible risk to users of the water system;
 - (q) prescribing matters about which public water suppliers and semi-public water suppliers must make and retain records;
 - (r) respecting obligations on water suppliers to make and maintain written records, and to provide periodic reports to the director or a drinking water officer;
 - (s) respecting information that water suppliers are required to make publicly available and the manner in which information is to be made available, including requirements for the posting of permits, licenses, orders and advisories issued under this Act;
 - (t) respecting the siting, construction, maintenance, decommissioning, sealing, abandonment and use of water from wells constructed for domestic purposes;
 - (u) respecting sources of water used in the production of pre-packaged water for consumptive purposes, including the approval of sources by the director and the monitoring of sources;
 - (v) respecting water used for bulk distribution for consumptive purposes;
 - (w) respecting the protection of drinking water sources, groundwater recharge zones and areas adjacent to drinking water sources;
 - (x) respecting fees payable for permits and operating licences applied for, issued, amended or renewed under this Act or the regulations;
 - (y) respecting the costs of bacteriological and other prescribed analyses, including cost-sharing programs;
 - (z) respecting costs that are payable by a person with respect to the monitoring of, or the review of a person's obligation to monitor, the quality of water in relation to water provided for domestic purposes;
 - (aa) respecting costs that are payable by a person in respect of the review of a report on an assessment conducted under section 9;
 - (bb) respecting the construction, alteration and operation of non-potable systems;

- (cc) respecting vehicles and containers used as bulk water haulers;
- (dd) defining any word or phrase used but not defined in this Act;
- (ee) respecting any other matter the Lieutenant Governor in Council considers necessary or advisable to carry out the purposes of this Act.

Regulation may apply to all or part of province

39(2) A regulation, or any provision of a regulation, may apply to all or a part of the province only, and may apply specifically to one or more particular water systems.

CONSEQUENTIAL AMENDMENTS AND COMING INTO FORCE*Consequential amendment, C.C.S.M. c. E125*

40 Clauses 6(1)(c) and 6(10)(f) of **The Environment Act** are amended by adding "and *The Drinking Water Safety Act*" after "*The Contaminated Sites Remediation Act*".

Consequential amendment, C.C.S.M. c. G110

41 Section 13 of **The Ground Water and Water Well Act** is amended by adding "*The Drinking Water Safety Act*," after "*The Water Rights Act*,".

Consequential amendment, C.C.S.M. c. L160

42 Clause 67(1)(a) of **The Liquor Control Act** is replaced with the following:

- (a) the dining room, kitchen and related areas comply with *The Public Health Act* and *The Drinking Water Safety Act*, and the regulations under those Acts; and

C.C.S.M. reference

43 This Act may be referred to as Chapter D101 of the *Continuing Consolidation of the Statutes of Manitoba*.

Coming into force

44 This Act comes into force on a day fixed by proclamation.

ANNEXE B – Fréquence des prélèvements d'échantillons pour le respect des normes chimiques, radiologiques, physiques et microbiennes

DEFINITIONS

Definitions

1 The following definitions apply in this regulation.

"**Act**" means *The Drinking Water Safety Act*. (« *Loi* »)

"**alter**", in relation to a water system, means to significantly change the equipment, system components or configuration of piping, such that the operation of the water system is modified, but does not include routine maintenance or repair. For the purpose of this definition, "routine maintenance or repair" includes, without limitation, the maintenance, repair or replacement of a watermain, hydrant, pump or process equipment. (« modifier »)

"**chloramine**" means monochloramine that is formed when chlorine and ammonia are combined in water. (« chloramine »)

"**contact time**" means the time between the application of disinfectant to water during the treatment process, and the discharge of the finished water from the treatment plant or water storage facility into the water distribution system. (« durée de contact »)

"**disinfectant residual**" means the concentration of disinfectant within a water distribution system after a contact time sufficient to inactivate bacteria and viruses. (« désinfectant résiduel »)

DÉFINITIONS

Définitions

1 Les définitions qui suivent s'appliquent au présent règlement.

« **charge de pointe** » La demande maximale d'eau, exprimée en unités de volume sur une durée donnée, à laquelle doit répondre un poste de pompage, une station de traitement ou un système de distribution. ("peak demand conditions")

« **chloramine** » Monochloramine qui résulte de la combinaison de chlore et d'ammoniac dans l'eau. ("chloramine")

« **chlore libre** » Chlore, à l'exclusion du chlore combiné, qui demeure dans l'eau après la désinfection. ("free chlorine")

« **désinfectant résiduel** » Concentration de désinfectant présente à l'intérieur d'un système de distribution d'eau après une durée de contact suffisante pour inactiver les bactéries et les virus. ("disinfectant residual")

« **durée de contact** » Période qui s'écoule entre le moment où des désinfectants sont versés dans l'eau, pour en effectuer le traitement, et le déversement de l'eau prête au débit dans le système de distribution d'eau à partir de la station de traitement ou de l'installation de stockage. ("contact time")

"**free chlorine**" means chlorine, excluding combined chlorine, that remains in water after disinfection has occurred. (« chlore libre »)

"**groundwater under the direct influence of surface water**" or "**GUDI**" means groundwater that has a hydraulic connection to surface water, or that is deemed or determined to be GUDI under section 2. (« eau souterraine sous l'influence directe de l'eau de surface » ou « ESSID »)

"**microbial standards**" includes drinking water quality standards for viruses, *Cryptosporidium parvum*, *Giardia lamblia* and other protozoa, but does not include bacteriological standards. (« normes microbiennes »)

"**peak demand conditions**" means the maximum demand for water placed on a pumping station, treatment plant or distribution system, expressed as a unit of volume over time. (« charge de pointe »)

"**physical standards**" includes drinking water quality standards for water turbidity. (« normes physiques »)

"**water distribution system**" means the part of a water system that is designed for or used in the storage, distribution or delivery of potable water for domestic purposes, and that is,

(a) in the case of a water system that treats or disinfects water but does not have a re-disinfection facility, downstream of the last location where water is treated or disinfected;

(b) in the case of a water system that treats or disinfects water and has a re-disinfection facility, downstream of the last location where water is disinfected or re-disinfected before it is delivered to the first user of the system; and

« **eau souterraine sous l'influence directe de l'eau de surface** » ou « **ESSID** » Eau souterraine qui est en liaison hydraulique avec l'eau de surface ou qui est de l'ESSID en vertu de l'article 2. ("groundwater under the direct influence of surface water" or "GUDI")

« **Loi** » La Loi sur la qualité de l'eau potable. ("Act")

« **modifier** » Apporter au matériel, aux composantes ou à la configuration de la tuyauterie d'un réseau d'alimentation en eau des changements suffisamment importants pour modifier son fonctionnement. Sont exclus les travaux courants d'entretien et de réparation. Pour l'application de la présente définition, les travaux courants d'entretien et de réparation comprennent notamment l'entretien, la réparation ou le remplacement d'une conduite principale, d'une borne-fontaine, d'une pompe ou du matériel de traitement. ("alter")

« **normes microbiennes** » Sont assimilées aux normes microbiennes les normes de qualité de l'eau potable relatives aux virus, au *Cryptosporidium parvum*, à la *Giardia lamblia* et à d'autres protozoaires, à l'exclusion des normes bactériologiques. ("microbial standards")

« **normes physiques** » Sont assimilées aux normes physiques les normes de qualité de l'eau potable en rapport avec la turbidité de l'eau. ("physical standards")

« **système de distribution d'eau** » Partie du réseau d'alimentation en eau qui est conçue ou utilisée pour le stockage ou la distribution d'eau potable à des fins domestiques et qui :

a) dans le cas d'un réseau d'alimentation en eau qui traite ou désinfecte l'eau mais ne comporte pas d'installations de redésinfection, est située en aval du dernier endroit où l'eau est traitée ou désinfectée;

b) dans le cas d'un réseau d'alimentation en eau qui traite ou désinfecte l'eau et qui comporte des installations de redésinfection, est située en aval du dernier endroit où l'eau est désinfectée ou redésinfectée avant qu'elle parvienne au premier utilisateur du réseau;

(c) in the case of a semi-public water system that does not treat or disinfect water, downstream of the well that serves as the source or entry point of the water supply for the system. (« système de distribution d'eau »)

c) dans le cas d'un réseau semi-public d'alimentation en eau qui ne traite ni ne désinfecte l'eau, est située en aval du puits constituant la source ou le point d'entrée de l'eau qui alimente le réseau. ("water distribution system")

INTERPRETATION

Water supply deemed to be GUDI

2(1) A water system's water supply source is deemed to be GUDI if the water supply

(a) is groundwater that has

(i) a significant occurrence of insects or other macro-organisms, algae, organic debris or large-diameter protozoa or pathogens such as *Giardia lamblia*, or

(ii) significant and relatively rapid shifts in water characteristics such as turbidity, temperature, conductivity or pH which closely relate to climatological or surface water conditions; or

(b) is obtained from

(i) a spring,

(ii) an infiltration gallery, or

(iii) a well that

(A) has a predominantly sand or gravel overburden,

(B) is within 200 m of a body of surface water, unless known well design and aquifer conditions indicate there is not a reasonable possibility that the well could be influenced by surface water,

INTERPRÉTATION

Source d'approvisionnement considérée comme de l'ESSID

2(1) La source d'approvisionnement d'un réseau d'alimentation en eau est réputée être de l'ESSID si, selon le cas :

a) il s'agit d'eau souterraine qui :

(i) soit contient une concentration considérable d'insectes ou d'autres macroorganismes, algues ou débris organiques ou encore de protozoaires ou agents pathogènes de grand diamètre tels que la *Giardia lamblia*,

(ii) soit subit des changements importants et relativement rapides de ses caractéristiques, comme la turbidité, la température, la conductivité ou le pH, qui ont un lien étroit avec les conditions météorologiques ou les conditions de l'eau de surface;

b) la provenance est :

(i) soit une source,

(ii) soit une galerie d'infiltration,

(iii) soit un puits qui, selon le cas :

(A) a un terrain de recouvrement principalement constitué de sable ou de gravier,

(B) est situé à moins de 200 m d'une masse d'eau de surface, à moins que la conception du puits et les conditions de l'aquifère ne soient connues et n'indiquent qu'il n'est pas raisonnablement possible que l'eau de surface ait une incidence sur le puits,

(C) is in a karst aquifer,

(D) is in an unconfined aquifer,

(E) is part of an enhanced recharge and infiltration project, or

(F) is a horizontal collection well.

(C) est dans un aquifère karstique,

(D) est dans un aquifère non captif,

(E) est dans une zone visée par un projet d'amélioration de la réalimentation et de l'infiltration,

(F) est un puits de captage horizontal.

Officer may determine water supply to be GUDI 2(2) Even if a water supply source is not deemed to be GUDI under subsection (1), a drinking water officer may, after considering any factor relating to a water system that he or she considers relevant, including

(a) the location of any well, and its type, method of construction and condition;

(b) local topography, including surface drainage and the location and other characteristics of bodies of surface water;

(c) a chronological record of data or analyses relating to the chemical, bacteriological or physical characteristics of its water supply source; or

(d) a hydrogeological assessment of its water supply source;

determine that a water system's water supply source is GUDI.

Determination to be in writing

2(3) A drinking water officer who makes a determination under subsection (2) must give written notice of the determination to the water supplier.

Assessment or chronological record may assist determination

2(4) Despite subsections (1) to (3), a drinking water officer may determine that a water supply source is not GUDI if he or she is of the opinion, based on evidence provided by a water supplier of

(a) a hydrogeological assessment of the source; or

Décision d'un agent du Service de l'eau potable 2(2) Même si une source d'approvisionnement n'est pas réputée être de l'ESSID, un agent du Service de l'eau potable peut déterminer qu'elle en est en se fondant sur les facteurs qu'il juge utiles, notamment :

a) le type de puits, son emplacement, la façon dont il a été construit et son état;

b) la topographie du terrain, y compris le drainage superficiel ainsi que l'emplacement et les autres caractéristiques des masses d'eau de surface;

c) un registre chronologique des données ou des analyses relatives aux caractéristiques chimiques, bactériologiques ou physiques de la source d'approvisionnement;

d) une évaluation hydrogéologique de la source d'approvisionnement.

Décision écrite de l'agent

2(3) L'agent du Service de l'eau potable qui prend la décision visée au paragraphe (2) remet un avis écrit au fournisseur d'un service d'eau.

Décision fondée sur une évaluation ou un registre chronologique

2(4) Malgré les paragraphes (1) à (3), l'agent du Service de l'eau potable peut déterminer qu'une source d'approvisionnement n'est pas de l'ESSID s'il est d'avis que tel est le cas en fonction de l'un ou l'autre des éléments de preuve suivants présentés par le fournisseur du service d'eau :

a) une évaluation hydrogéologique de la source;

(b) a chronological record of data or analyses relating to the chemical, bacteriological or physical characteristics of the source;

that the water supply source is not GUDI. The drinking water officer must give written notice of the determination to the water supplier.

Geoscientist or engineer to conduct assessment 2(5) A hydrogeological assessment under subsection (2) or (4) shall be done by a professional geoscientist or engineer within the meaning of *The Engineering and Geoscientific Professions Act*.

Appeal to director

2(6) A water supplier may appeal a determination made by a drinking water officer under subsection (2) to the director, and the director's decision is final and binding.

b) un registre chronologique des données ou des analyses relatives aux caractéristiques chimiques, bactériologiques ou physiques de la source d'approvisionnement.

Il remet un avis écrit de sa décision au fournisseur du service d'eau.

Évaluation effectuée par un géoscientifique ou un ingénieur 2(5)

L'évaluation hydrogéologique visée au paragraphe (2) ou (4) est effectuée par un géoscientifique ou un ingénieur au sens de la *Loi sur les ingénieurs et les géoscientifiques*.

Appel au directeur 2(6)

Le fournisseur du service d'eau peut interjeter appel de la décision visée au paragraphe (2) devant le directeur, auquel cas la décision de celui-ci est définitive et exécutoire.

CONSTRUCTION AND ALTERATION PERMITS

Application for permit 3(1)

A person applying for a permit to construct or alter a water system must provide the following to the director:

(a) a completed application in a form satisfactory to the director;

(b) in the case of a public water system, unless otherwise specified by the director, a design brief, project specifications and a copy of the engineering design plans;

(c) in the case of a semi-public water system, if required by the director, a design brief and a copy of the engineering design plans or schematic drawings.

Engineering design plans 3(2)

The engineering design plans for a water system must be completed by an engineer authorized to practise as a professional engineer under *The Engineering and Geoscientific Professions Act*.

PERMIS DE CONSTRUCTION ET DE MODIFICATION

Demande de permis 3(1)

La personne qui demande un permis de construction ou de modification d'un réseau d'alimentation en eau fournit ce qui suit au directeur :

a) une demande remplie en la forme que le directeur estime acceptable;

b) dans le cas d'un réseau public d'alimentation en eau, l'énoncé de projet, le cahier des charges et une copie des plans d'ingénierie, à moins d'indication contraire du directeur;

c) dans le cas d'un réseau semi-public d'alimentation en eau, l'énoncé de projet et une copie des plans d'ingénierie ou des schémas, s'ils sont exigés par le directeur.

Plans d'ingénierie 3(2)

Les plans d'ingénierie d'un réseau d'alimentation en eau sont établis par une personne autorisée à exercer la profession d'ingénieur en vertu de la *Loi sur les ingénieurs et les géoscientifiques*.

Director's action on receipt of application

4 Upon receiving an application for a permit under subsection 3(1), the director may do one or more of the following:

- (a) require the applicant to provide additional information;
- (b) require the applicant to conduct bacteriological, chemical, radiological, physical or microbial tests of the water from the proposed water supply source or sources, and provide the director with analyses in a form satisfactory to the director;
- (c) require confirmation that a proposal has been filed under section 11 of *The Environment Act*;
- (d) if the application proposes a minor alteration and the director is satisfied that the requirements of subsection 7(2) of the Act are met, by written notice waive the requirement to obtain a permit;
- (e) approve the application and issue a permit, subject to any terms and conditions that the director considers necessary under subsection 7(3) of the Act;
- (f) refuse the application, if the director reasonably believes that the proposed work cannot be done in a manner that provides for both
 - (i) the safety of water obtained from the water system, and
 - (ii) effective environmental management.

Amendment of permit

5(1) The director may amend a permit, or a term or condition of a permit, issued under section 4,

- (a) if the permit holder requests the amendment; or
- (b) if the director considers it appropriate.

Suivi des demandes

4 Lorsqu'il reçoit une demande d'obtention d'un permis visé au paragraphe 3(1), le directeur peut :

- a) demander au requérant de fournir des renseignements supplémentaires;
- b) exiger que le requérant effectue des analyses bactériologiques, chimiques, radiologiques, physiques ou microbiennes de l'eau provenant de la source d'approvisionnement ou des sources d'approvisionnement proposées et lui communique les résultats en la forme qu'il estime acceptable;
- c) demander la confirmation qu'un projet a été déposé en vertu de l'article 11 de la *Loi sur l'environnement*;
- d) si la demande porte sur une modification mineure et que le directeur est convaincu que les exigences du paragraphe 7(2) de la *Loi* sont remplies, exempter le requérant de l'obligation d'obtenir un permis en lui faisant parvenir un avis écrit;
- e) approuver la demande et délivrer un permis assorti des conditions qu'il estime nécessaires conformément au paragraphe 7(3) de la *Loi*;
- f) rejeter la demande s'il a des motifs raisonnables de croire que les travaux proposés ne peuvent être effectués de manière à assurer :
 - (i) la qualité de l'eau du réseau d'alimentation,
 - (ii) l'efficacité des mesures de gestion de l'environnement.

Modification du permis

5(1) Le directeur peut modifier le permis délivré en vertu de l'article 4 ou une condition dont il est assorti si, selon le cas :

- a) le titulaire du permis demande la modification;
- b) le directeur juge qu'il convient de le faire.

Basis for amendment

5(2) The director may amend a permit only if he or she is satisfied that the amendment will not adversely affect

- (a) the safety of water obtained from the water system; or
- (b) ongoing effective environmental management.

Suspension or cancellation of permit

6 The director may suspend or cancel a permit issued under section 4 if the director reasonably believes that

- (a) the permit was obtained by fraud or deceit, or by submitting an application containing incorrect information;
- (b) the permit holder is in violation of the Act, this regulation, or any term or condition of the permit;
- (c) the permit holder has been convicted of an offence under the Act;
- (d) there has been non-compliance with an order issued to the permit holder under the Act; or
- (e) the work being performed presents, or upon completion may present, a threat to the health of any person.

New permit following cancellation

7(1) A person whose permit has been cancelled may apply for a new permit, and the director may issue a new permit to that person on any terms and conditions that the director considers reasonable.

Application process

7(2) Sections 3 and 4 apply, with the necessary changes, to an application under subsection (1).

Motif de la modification

5(2) Le directeur ne peut modifier le permis que s'il est convaincu que la modification n'aura aucun effet négatif :

- a) soit sur la qualité de l'eau du réseau d'alimentation;
- b) soit sur l'efficacité de la gestion continue de l'environnement.

Suspension ou annulation du permis

6 Le directeur peut suspendre ou annuler le permis délivré en vertu de l'article 4 s'il a des motifs raisonnables de croire que, selon le cas :

- a) le permis a été obtenu de façon frauduleuse ou trompeuse ou au moyen d'une demande contenant des renseignements erronés;
- b) le titulaire du permis enfreint la *Loi*, le présent règlement ou une condition du permis;
- c) le titulaire du permis a été déclaré coupable d'une infraction à la *Loi*;
- d) le titulaire du permis ne s'est pas conformé à un ordre donné en vertu de la *Loi*;
- e) les travaux effectués présentent ou pourraient présenter une fois terminés un risque pour la santé des personnes.

Délivrance d'un nouveau permis après une annulation

7(1) La personne dont le permis a été annulé peut présenter une nouvelle demande, et le directeur peut lui délivrer un nouveau permis assorti des conditions qu'il estime raisonnables.

Marche à suivre

7(2) Les articles 3 et 4 s'appliquent, avec les adaptations nécessaires, à la demande visée au paragraphe (1).

OPERATING LICENCES

LICENCES D'EXPLOITATION

Application for operating licence

8 A person applying for an operating licence for a water system must provide, to the director, a completed application in a form satisfactory to the director.

Director's action on receipt of application

9 If the director receives an application for an operating licence under section 8, the director may take any of the following actions:

- (a) require the applicant to provide additional information;
- (b) inspect the water system to which the application relates;
- (c) approve the application and issue an operating licence, subject to any terms and conditions that the director considers necessary under subsection 8(3) of the Act;
- (d) refuse the application, if the director reasonably believes that the applicant will be unable to operate the water system in such a manner so as to provide for both
 - (i) the safety of water obtained from the water system, and
 - (ii) effective environmental management.

Amendment of operating licence

10(1) The director may,

- (a) on the request of the licence holder; or
- (b) on the director's own initiative;

amend an operating licence, or a term or condition of an operating licence, issued under section 9.

Demande de licence d'exploitation

8 La personne qui demande une licence d'exploitation d'un réseau d'alimentation en eau fournit au directeur une demande remplie en la forme que celui-ci estime acceptable.

Suivi des demandes

9 Lorsqu'il reçoit une demande d'obtention d'une licence d'exploitation visée à l'article 8, le directeur peut, selon le cas :

- a) demander au requérant de fournir des renseignements supplémentaires;
- b) inspecter le réseau d'alimentation en eau visé par la demande;
- c) approuver la demande et délivrer une licence d'exploitation assortie des conditions qu'il estime nécessaires conformément au paragraphe 8(3) de la Loi;
- d) rejeter la demande s'il a des motifs raisonnables de croire que le titulaire sera incapable d'exploiter le réseau d'alimentation en eau de manière à assurer :
 - (i) la qualité de l'eau qui en provient,
 - (ii) l'efficacité des mesures de gestion de l'environnement.

Modification de la licence d'exploitation

10(1) Le directeur peut modifier la licence d'exploitation délivrée en vertu de l'article 9 ou une condition dont elle est assortie :

- a) soit à la demande du titulaire de la licence;
- b) soit de son propre chef.

Basis for amendment

10(2) The director may only amend an operating licence if the director is satisfied that the amendment will not negatively impact

- (a) the safety of water obtained from the water system; or
- (b) effective environmental management.

Suspension or cancellation of operating licence

11 The director may suspend or cancel an operating licence issued under section 9 if the director reasonably believes that

- (a) the operating licence was obtained by fraud, deceit or the submission of an application containing incorrect information;
- (b) the licence holder is in violation of the Act, this regulation, the operating licence, or any term or condition of the licence;
- (c) the licence holder has been convicted of an offence under the Act;
- (d) there has been non-compliance with an order issued to the licence holder under the Act; or
- (e) the water system presents a threat to the health of users, or to other persons.

Licence reinstatement

12(1) A person whose licence is suspended may apply, before the suspension ends, for reinstatement.

Application process

12(2) Sections 8 and 9 apply, with the necessary changes, to an application under this section.

New licence following cancellation

13(1) A person whose licence has been cancelled may apply for a new licence.

Motif de la modification

10(2) Le directeur ne peut modifier la licence d'exploitation que s'il est convaincu que la modification n'aura pas d'effet négatif :

- a) soit sur la qualité de l'eau du réseau d'alimentation;
- b) soit sur l'efficacité des mesures de gestion de l'environnement.

Suspension ou annulation de la licence d'exploitation

11 Le directeur peut suspendre ou annuler la licence d'exploitation délivrée en vertu de l'article 9 s'il a des motifs raisonnables de croire que, selon le cas :

- a) la licence a été obtenue de façon frauduleuse ou trompeuse ou au moyen d'une demande contenant des renseignements erronés;
- b) le titulaire de la licence enfreint la *Loi*, le présent règlement ou encore la licence d'exploitation ou l'une de ses conditions;
- c) le titulaire de la licence a été déclaré coupable d'une infraction à la *Loi*;
- d) le titulaire de la licence ne s'est pas conformé à un ordre donné en vertu de la *Loi*;
- e) le réseau d'alimentation en eau présente un risque pour la santé des utilisateurs ou d'autres personnes.

Rétablissement de la licence

12(1) La personne dont la licence a été suspendue peut demander son rétablissement avant la fin de la suspension.

Marche à suivre

12(2) Les articles 8 et 9 s'appliquent, avec les adaptations nécessaires, aux demandes présentées en vertu du présent article.

Délivrance d'une nouvelle licence après une annulation

13(1) La personne dont la licence a été annulée peut présenter une nouvelle demande.

Application process

13(2) Sections 8 and 9 apply, with the necessary changes, to an application under this section.

Marche à suivre

13(2) Les articles 8 et 9 s'appliquent, avec les adaptations nécessaires, aux demandes présentées en vertu du présent article.

RENEWAL OF
OPERATING LICENCES

RENOUVELLEMENT
DES LICENCES D'EXPLOITATION

Renewal of operating licence

14(1) Within 60 days before the expiry of an operating licence, the licence holder may apply for renewal of an operating licence, by providing, to the director, a completed application in a form satisfactory to the director.

Renouvellement de la licence d'exploitation

14(1) Dans les 60 jours précédant l'expiration d'une licence d'exploitation, le titulaire de la licence peut demander un renouvellement en fournissant au directeur une demande remplie en la forme que celui-ci estime acceptable.

Deemed continuation of licence

14(2) If an application is made within the period described in subsection (1) but the director's decision whether to renew the licence is not made before its expiry date, the licence is deemed to continue past its expiry date, until the date the decision is made.

Maintien en vigueur de la licence

14(2) Si une demande est faite dans le délai prévu au paragraphe (1) mais que la décision du directeur concernant le renouvellement de la licence n'est pas prise avant la date d'expiration, la licence est réputée demeurer en vigueur jusqu'à ce qu'une décision soit prise.

Director's action on receipt of application

15 Upon receiving an application to renew an operating licence under section 14, the director must conduct or cause to be conducted a review of the operation of the water system, and may take any of the following additional actions:

Suivi des demandes

15 Lorsqu'il reçoit une demande de renouvellement d'une licence visée à l'article 14, le directeur vérifie ou fait vérifier la façon dont le réseau d'alimentation en eau est exploité et peut, selon le cas :

(a) require the applicant to provide additional information;

a) demander au requérant de fournir des renseignements supplémentaires;

(b) inspect the water system to which the application relates;

b) inspecter le réseau d'alimentation en eau visé par la demande;

(c) approve the application and renew the operating licence, subject to any terms and conditions that the director considers necessary under subsection 8(3) of the Act;

c) approuver la demande et renouveler la licence d'exploitation, sous réserve des conditions qu'il estime nécessaires conformément au paragraphe 8(3) de la Loi;

(d) refuse the application, if the director reasonably believes that the applicant will be unable to operate the water system in such a manner so as to provide for both

d) rejeter la demande s'il a des motifs raisonnables de croire que le titulaire sera incapable d'exploiter le réseau d'alimentation en eau de manière à assurer :

(i) the safety of water obtained from the water system, and

(i) la qualité de l'eau qui en provient,

(ii) effective environmental management.

(ii) l'efficacité des mesures de gestion de l'environnement.

Late renewal

16(1) Despite section 14, a person may apply to renew his or her operating licence after it expires if the application is made within 30 days after the expiry. Section 15 applies, with the necessary changes, to an application under this subsection.

Licence deemed to be continuous

16(2) If the director renews an operating licence on an application made under this section, the renewal of the operating licence is retroactive and is deemed to have taken effect immediately after the expiry of the previous operating licence.

Renouvellement tardif

16(1) Malgré l'article 14, une personne peut demander le renouvellement de sa licence d'exploitation une fois celle-ci expirée si la demande est présentée dans les 30 jours suivant l'expiration. L'article 15 s'applique, avec les adaptations nécessaires, aux demandes présentées en vertu du présent paragraphe.

Effet rétroactif du renouvellement

16(2) Le renouvellement d'une licence d'exploitation par le directeur à la suite d'une demande présentée conformément au présent article est rétroactif et est réputé avoir pris effet dès l'expiration de la licence d'exploitation précédente.

DISINFECTION REQUIREMENTS

EXIGENCES RELATIVES À
LA DÉSINFECTION**Methods of disinfection and minimum contact time**

17(1) Every public water supplier, and every semi-public water supplier required to disinfect under section 18, must disinfect for the purpose of meeting the bacteriological and microbial standards for the water system as determined under the *Drinking Water Quality Standards Regulation*, and must use one of the following methods of disinfection:

- (a) chlorine disinfection, with a minimum contact time of 20 minutes under peak demand conditions;
- (b) a method or combination of methods of disinfection approved by the director.

Alternative methods of disinfection

17(2) A water supplier who uses a method or combination of methods of disinfection approved under clause (1)(b) must comply with the disinfection requirements stated in the operating licence for the water system.

Méthodes de désinfection et durée de contact minimale

17(1) Le fournisseur d'un service d'eau public ainsi que le fournisseur d'un service d'eau semi-public qui est tenu de désinfecter l'eau en vertu de l'article 18 le font afin de répondre aux normes bactériologiques et microbiennes applicables au réseau d'alimentation en eau et déterminées sous le régime du *Règlement sur les normes de qualité de l'eau potable*. Ils utilisent alors, selon le cas :

- a) du chlore, une durée de contact minimale de 20 minutes pendant une période de charge de pointe étant obligatoire;
- b) une ou plusieurs méthodes de désinfection approuvées par le directeur.

Autres méthodes de désinfection

17(2) Le fournisseur d'un service d'eau qui utilise une ou plusieurs méthodes de désinfection approuvées conformément à l'alinéa (1)b est tenu de remplir les exigences en matière de désinfection que précise la licence d'exploitation du réseau d'alimentation en eau.

Semi-public systems using or influenced by surface water must disinfect

18(1) A semi-public water supplier must disinfect its water system's water supply if the source of that supply is

- (a) surface water; or
- (b) groundwater under the direct influence of surface water.

Semi-public systems using groundwater that must disinfect

18(2) A semi-public water supplier must disinfect its water system's water supply if the source of that supply is groundwater and the water system provides water to one or more of the following:

- (a) a hospital as defined in *The Health Services Insurance Act*;
- (b) a personal care home as defined in *The Health Services Insurance Act*;
- (c) a residential care facility as defined in *The Social Services Administration Act*;
- (d) a public school or a private school, as those terms are defined in *The Education Administration Act*;
- (e) a child care facility as defined in *The Child and Family Services Act*;
- (f) a day care centre or a day care home, as those terms are defined in *The Community Child Day Care Standards Act*;
- (g) a children's camp, or a recreational or athletic camp;
- (h) a restaurant, cafeteria, food court, or other food handling establishment that requires a licence, permit or other approval under *The Public Health Act* or its regulations;
- (i) a business, institution or other facility that is designated by a drinking water officer after consulting with a medical officer of health.

Service d'eau semi-public — eau de surface ou eau influencée par l'eau de surface

18(1) Le fournisseur d'un service d'eau semi-public est tenu de désinfecter la source d'approvisionnement de son réseau d'alimentation en eau s'il s'agit :

- a) soit d'eau de surface;
- b) soit d'eau souterraine sous l'influence directe de l'eau de surface.

Service d'eau semi-public — eau souterraine

18(2) Le fournisseur d'un service d'eau semi-public est tenu de désinfecter la source d'approvisionnement de son réseau d'alimentation en eau s'il s'agit d'eau souterraine et que le réseau alimente au moins un utilisateur faisant partie des catégories suivantes :

- a) un hôpital au sens de la *Loi sur l'assurance-maladie*;
- b) un foyer de soins personnels au sens de la *Loi sur l'assurance-maladie*;
- c) un établissement de soins en résidence au sens de la *Loi sur les services sociaux*;
- d) une école publique ou une école privée au sens de la *Loi sur l'administration scolaire*;
- e) un établissement d'aide à l'enfant au sens de la *Loi sur les services à l'enfant et à la famille*;
- f) une garderie ou une garderie familiale au sens de la *Loi sur la garde d'enfants*;
- g) un camp pour enfants, un camp de loisirs ou un camp sportif;
- h) un restaurant, une cafétéria, une aire de restauration ou un autre établissement de manutention des aliments tenu d'avoir une licence, un permis ou une autre autorisation en vertu de la *Loi sur la santé publique* ou de ses règlements;
- i) une entreprise, une institution ou une autre installation qu'un agent du Service de l'eau potable a désignée après avoir consulté un médecin hygiéniste.

Licence may waive disinfection requirement

18(3) Despite subsection (2), a semi-public water supplier described in that subsection need not disinfect its water supply if the operating licence for the system states that disinfection is not required.

Water safety to be considered before waiving

18(4) The director may state in an operating licence that disinfection is not required only on being satisfied that there is

- (a) no history or evidence of bacteriological contamination in the water system;
- (b) no evidence that the water system has been improperly constructed or maintained; and
- (c) no distribution system to convey water to users that is external to the main building or premises served by the water system.

In gathering information for the purpose of this subsection, the director may consult with a medical officer about the safety of water obtained from the system.

Equipment maintenance and spare parts

19 A water supplier required to disinfect shall ensure that

- (a) all equipment and machinery used for disinfection is maintained in effective working order; and
- (b) spare parts as may be necessary to ensure continuous disinfection in case of equipment or machinery failure are kept available for immediate use, including, if necessary, a spare chlorinator or disinfection unit.

Application of sections 21 to 25

20 Sections 21 to 25 apply to a water supplier who uses chlorine or chloramine as the residual disinfectant.

Dispense de l'obligation de désinfecter

18(3) Malgré le paragraphe (2), le fournisseur d'un service d'eau semi-public visé à ce paragraphe n'est pas tenu de désinfecter sa source d'approvisionnement en eau si la licence d'exploitation du réseau d'alimentation en eau indique que la désinfection n'est pas exigée.

Dispense conditionnelle à la qualité de l'eau

18(4) Le directeur peut indiquer dans une licence d'exploitation que la désinfection n'est pas obligatoire pourvu qu'il soit convaincu :

- a) que le réseau d'alimentation en eau n'a jamais fait l'objet d'une contamination bactériologique par le passé et qu'aucun signe n'indique une contamination;
- b) que rien n'indique que le réseau d'alimentation en eau a été mal construit ou mal entretenu;
- c) qu'il n'y a pas de système de distribution acheminant l'eau aux utilisateurs situé en dehors de l'immeuble ou des lieux principaux alimentés par le réseau d'alimentation en eau.

Pour l'application du présent paragraphe, le directeur peut demander l'avis d'un médecin hygiéniste au sujet de la qualité de l'eau du réseau d'alimentation.

Entretien du matériel et pièces de rechange

19 Le fournisseur d'un service d'eau tenu de désinfecter l'eau veille à ce que :

- a) tout le matériel et l'équipement utilisés pour la désinfection soient conservés en bon état de marche;
- b) les pièces de rechange nécessaires pour éviter une interruption de la désinfection en cas de panne du matériel ou de l'équipement, y compris un chlorateur ou une unité de désinfection de rechange au besoin, soient immédiatement accessibles.

Application des articles 21 à 25

20 Les articles 21 à 25 s'appliquent aux fournisseurs d'un service d'eau qui utilisent du chlore ou de la chloramine comme désinfectant résiduel.

Disinfectant levels after treatment and disinfection

21(1) Subject to subsection (2), a water supplier required to disinfect must ensure that a disinfectant residual of

- (a) at least 0.5 mg of free chlorine per litre of water; or
- (b) at least 1.0 mg of chloramine per litre of water, measured as monochloramine;

is detectable at the point where water enters the water distribution system, after the minimum contact time specified or determined under section 17.

Director may waive if potable groundwater or alternative method of disinfection

21(2) Despite subsection (1), the director may in writing waive any of the requirements of that subsection if

- (a) the water supply for the water system is extracted from an aquifer and is free of bacteria at the point of extraction; or
- (b) an alternative method of disinfection has been approved under clause 17(1)(b);

and the director is satisfied that waiving the requirements will not result in the delivery of bacteriologically unsafe water from the water system.

Disinfection requirements in distribution system

22 Every public water supplier and every semi-public water supplier required to disinfect must ensure that a disinfectant residual of

- (a) at least 0.1 mg of free chlorine per litre of water; or
- (b) at least 0.3 mg of chloramine per litre of water;

is detectable at all times at any point in the water distribution system, unless otherwise stated in the operating licence for the system.

Niveaux de désinfectant après un traitement et une désinfection

21(1) Sous réserve du paragraphe (2), le fournisseur d'un service d'eau qui est tenu de désinfecter l'eau veille à ce que du désinfectant résiduel soit détectable au point d'entrée de l'eau dans le système de distribution d'eau à un niveau minimal de 0,5 mg de chlore libre par litre d'eau ou de 1,0 mg de chloramine sous forme de monochloramine par litre d'eau après la durée de contact minimale précisée ou déterminée en vertu de l'article 17.

Dispense pour l'eau souterraine potable ou autre méthode de désinfection

21(2) Malgré le paragraphe (1), le directeur peut donner au fournisseur un avis écrit pour le dispenser de se conformer aux exigences de ce paragraphe s'il est convaincu que la dispense ne nuira pas à la qualité bactériologique de l'eau du réseau d'alimentation et si, selon le cas :

- a) l'eau du réseau d'alimentation provient d'un aquifère et ne contient pas de bactéries au point d'extraction;
- b) une autre méthode de désinfection a été approuvée en vertu de l'alinéa 17(1)b).

Exigences s'appliquant à la désinfection du système de distribution

22 Sauf indication contraire de la licence d'exploitation, le fournisseur d'un service d'eau public ou semi-public qui est tenu de désinfecter l'eau veille à ce que du désinfectant résiduel soit détectable en tout temps n'importe où dans le système de distribution à un niveau minimal de 0,1 mg de chlore libre par litre d'eau ou de 0,3 mg de chloramine par litre d'eau.

TESTING AND RECORDKEEPING
REQUIREMENTS
FOR DISINFECTION

EXIGENCES RELATIVES
AUX CONTRÔLES
ET À LA TENUE DE REGISTRES
POUR LA DÉSINFECTION

Testing frequency and locations

23(1) Subject to subsections (2) and (3), or to the terms and conditions of an operating licence, a water supplier required to disinfect must ensure that the disinfected water supply is tested for disinfectant residuals at the following times and locations:

- (a) at least once per day before the water enters the water distribution system;
- (b) periodically, in the frequency specified in Schedule A, at representative points in the water distribution system selected in accordance with guidelines approved by the director.

Officer may require more frequent testing or different locations

23(2) A drinking water officer may, if satisfied that it is necessary to ensure the safety of water obtained from a water system, require the water supplier to test more frequently than required under subsection (1) or Schedule A, or to test at different points than, or in addition to, those selected by the supplier under clause (1)(b).

Officer may allow less frequent testing or different locations

23(3) A drinking water officer may allow the water supplier to test less frequently than required under subsection (1) or Schedule A, or to test at representative points that are not in accord with the guidelines referred to in clause (1)(b), if

- (a) the officer is satisfied that it would be impractical or an undue hardship to require a water supplier to comply with subsection (1) or Schedule A; and

Fréquence et points de contrôle

23(1) Sous réserve des paragraphes (2) et (3) ou des conditions dont une licence d'exploitation est assortie, le fournisseur d'un service d'eau qui est tenu de désinfecter l'eau veille à ce que des contrôles soient effectués pour vérifier la présence de désinfectant résiduel dans l'eau à la fréquence et aux points suivants :

- a) au moins une fois par jour à un point situé avant l'entrée dans le système de distribution;
- b) à une fréquence régulière précisée à l'annexe A à des points représentatifs du système de distribution d'eau choisis d'une manière conforme aux lignes directrices approuvées par le directeur.

Fréquence accrue ou points de contrôle différents

23(2) Un agent du Service de l'eau potable peut, s'il est convaincu que cela est nécessaire pour assurer la qualité de l'eau provenant d'un réseau d'alimentation, exiger que le fournisseur d'un service d'eau fasse des contrôles plus fréquents que ce qui est prévu au paragraphe (1) ou à l'annexe A ou à des points différents de ceux choisis par celui-ci conformément à l'alinéa (1)b) ou à des points supplémentaires.

Fréquence réduite ou points de contrôle différents

23(3) Un agent du Service de l'eau potable peut autoriser le fournisseur d'un service d'eau à faire des contrôles moins fréquents que ce qui est prévu au paragraphe (1) ou à l'annexe A ou à des points représentatifs qui ne sont pas conformes aux lignes directrices mentionnées à l'alinéa (1)b) dans le cas suivant :

- a) il est convaincu que l'observation du paragraphe (1) ou de l'annexe A serait impossible pour le fournisseur d'un service d'eau ou lui causerait un préjudice injustifié;

(b) in the opinion of a medical officer, variance of the testing frequency or locations will not present a health risk to users of the system.

Licence may require continuous monitoring

23(4) If specified in the operating licence for a water system, a water supplier must install and operate continuous disinfectant monitoring equipment, in accordance with the terms and conditions of the licence.

Method of testing for disinfectant residuals

24 A water supplier must test for disinfectant residuals in accordance with a method specified in the latest edition of *Standard Methods for the Examination of Waste and Wastewater*, published jointly by the American Public Health Association, the American Water Works Association and the Water Environment Federation, or a method approved as being equivalent in effect by the director.

Records of testing for disinfectant residuals

25(1) A water supplier must make a record of all tests performed under section 23 in a form approved by the director.

Distribution of records

25(2) A water supplier must make two copies of the original record required under this section, and

(a) give the original and one copy to a drinking water officer assigned to the region, within seven days after the end of the calendar month during which the test was taken; and

(b) retain one copy for at least 24 months after the date of the test.

b) d'après l'avis du médecin hygiéniste, la modification de la fréquence ou des points de contrôle n'entraînera pas de risque pour la santé des utilisateurs du réseau.

Contrôle continu

23(4) La licence d'exploitation du fournisseur d'un service d'eau peut exiger qu'il installe du matériel de contrôle continu des désinfectants et assure son fonctionnement conformément aux conditions dont elle est assortie.

Méthode de contrôle de la présence de désinfectant résiduel

24 Le fournisseur d'un service d'eau est tenu de contrôler la présence de désinfectant résiduel conformément à la méthode précisée dans la plus récente version du document intitulé *Standard Methods for the Examination of Waste and Wastewater*, publié conjointement par l'American Public Health Association, l'American Water Works Association et la Water Environment Federation, ou à une méthode équivalente approuvée par le directeur.

Registre des contrôles

25(1) Le fournisseur d'un service d'eau tient un registre des contrôles effectués en application de l'article 23 en la forme approuvée par le directeur.

Distribution du registre

25(2) Le fournisseur d'un service d'eau fait deux copies de l'original du registre exigé par le présent article et :

a) remet l'original ainsi qu'une copie à un agent du Service de l'eau potable affecté à la région dans les sept jours suivant la fin du mois civil durant lequel les contrôles ont été effectués;

b) conserve une copie pendant au moins 24 mois après que les contrôles ont été effectués.

SAMPLING AND ANALYSIS
FOR BACTERIOLOGICAL, CHEMICAL,
RADIOLOGICAL, PHYSICAL AND
MICROBIAL STANDARDS

ÉCHANTILLONNAGE ET ANALYSE
POUR LE RESPECT DES NORMES
BACTÉRIOLOGIQUES, CHIMIQUES,
RADIOLOGIQUES, PHYSIQUES
ET MICROBIENNES

Submitting samples to a laboratory

26(1) Every public water supplier and semi-public water supplier must collect samples of water from its water system and submit them to a laboratory to be analyzed for compliance with the drinking water quality standards specified in the *Drinking Water Quality Standards Regulation* that are applicable to the water system.

Frequency of sampling

26(2) Subject to subsection (4), a water supplier must collect samples and submit them to a laboratory for analysis in the frequency specified in

- (a) Schedule A or B; or
- (b) if the parameter is not specified in Schedule A or B, in the frequency specified in the operating licence for the water system.

Locations of sampling

26(3) Each time that samples are required to be collected, the water supplier must collect the samples required by this regulation from the water supply

- (a) at the source before any treatment or disinfection occurs ("raw sample"); and
- (b) immediately after any required treatment, disinfection and contact time sufficient to inactivate bacteria and viruses occurs,
 - (i) prior to the water entering the water distribution system, or
 - (ii) at the location otherwise recommended for the parameter being sampled in the latest edition of the *Guidelines for Canadian Drinking Water Quality*, published by Health Canada ("treated sample").

Remise d'échantillons à un laboratoire

26(1) Le fournisseur d'un service d'eau public ou semi-public prélève des échantillons d'eau provenant de son réseau d'alimentation et les remet à un laboratoire chargé de les analyser pour vérifier l'observation des normes de qualité de l'eau potable applicables qui sont énoncées dans le *Règlement sur les normes de qualité de l'eau potable*.

Fréquence des prélèvements d'échantillons

26(2) Sous réserve du paragraphe (4), le fournisseur d'un service d'eau prélève des échantillons et les remet à un laboratoire chargé de les analyser :

- a) soit à la fréquence précisée à l'annexe A ou B;
- b) soit à la fréquence indiquée dans la licence d'exploitation du réseau d'alimentation, si le paramètre n'est pas précisé à l'annexe A ou B.

Points de prélèvement

26(3) Chaque fois qu'il est tenu de le faire, le fournisseur d'un service d'eau prélève les échantillons exigés par le présent règlement dans son réseau d'alimentation :

- a) à la source avant que l'eau soit traitée ou désinfectée (« échantillon non traité »);
- b) tout de suite après le traitement, la désinfection et la durée de contact suffisante pour inactiver les bactéries et les virus qui sont exigés :
 - (i) soit avant que l'eau entre dans le système de distribution,
 - (ii) soit à l'endroit recommandé à l'égard du paramètre visé par le prélèvement des échantillons dans la plus récente version du document intitulé *Recommandations pour la qualité de l'eau potable au Canada*, publié par Santé Canada (« échantillon traité »).

Licence may require more frequent sampling

26(4) If specified in its operating licence for the water system, a water supplier must collect and submit samples for analysis of one or more parameters

- (a) at a greater frequency than specified in Schedule A or B; or
- (b) at different or additional locations than those specified in subsection (3);

in accordance with the terms and conditions of the licence.

Water turbidity monitoring for large public systems

27(1) Despite section 26, and beginning on the day that is five years after the day this regulation comes into force, a public water supplier in relation to a public water system serving more than 5,000 persons must

- (a) conduct continuous monitoring for water turbidity using equipment that allows each filter to be monitored continuously; and
- (b) periodically report the continuous monitoring results to a drinking water officer, in the manner and frequency specified in the operating licence for the system.

Filter-to-waste feature for public systems

27(2) If a public water supplier in relation to a public water system serving 1,000 or more persons installs new water filtration equipment, or alters existing water filtration equipment, the water supplier must ensure that

- (a) the new or altered equipment has a filter-to-waste feature, or other method of disposal acceptable to the director, that operates automatically on filter start-up or after filter backwash; and
- (b) at start-up and after a filter backwash cycle, water is wasted and not discharged into a treated water storage reservoir or any other part of a water distribution system, until water turbidity levels have stabilized at an acceptable level.

Fréquence accrue des prélèvements

26(4) Si la licence d'exploitation de son réseau d'alimentation en eau l'exige, le fournisseur d'un service d'eau prélève des échantillons et les remet pour faire analyser au moins un paramètre :

- a) à une fréquence plus grande que celle précisée à l'annexe A ou B;
- b) à des points différents de ceux indiqués au paragraphe (3) ou à des points supplémentaires.

Contrôle de la turbidité de l'eau pour les grands réseaux publics

27(1) Malgré l'article 26, cinq ans après la date d'entrée en vigueur du présent règlement, le fournisseur d'un service d'eau public approvisionnant en eau plus de 5000 personnes prend les mesures suivantes :

- a) il contrôle continuellement la turbidité de l'eau à l'aide de matériel permettant d'exercer une surveillance continue sur chaque filtre;
- b) il communique périodiquement les résultats du contrôle continu à un agent du Service de l'eau potable de la manière et à la fréquence précisées dans la licence d'exploitation du réseau d'alimentation.

Renvoi de l'eau du filtre pour les réseaux publics

27(2) Le fournisseur d'un service d'eau public approvisionnant en eau au moins 1000 personnes qui installe du nouveau matériel de filtration d'eau ou qui modifie le matériel de filtration existant fait en sorte :

- a) que le matériel en question soit doté d'un dispositif de renvoi de l'eau du filtre, ou d'un autre dispositif d'évacuation jugé acceptable par le directeur, qui se déclenche automatiquement au démarrage du filtre ou après le lavage à contre-courant de celui-ci;
- b) qu'au moment du démarrage et après le cycle de lavage à contre-courant, l'eau soit éliminée et non déversée dans un réservoir d'eau traitée ni dans une autre partie du système de distribution d'eau jusqu'à ce que sa turbidité se soit stabilisée à un niveau acceptable.

Filter-to-waste feature for small public systems

27(3) If a public water supplier in relation to a public water system serving less than 1,000 persons installs new water filtration equipment, or alters existing water filtration equipment, the water supplier must ensure that

(a) the new or altered equipment has a filter-to-waste feature, or other method of disposal acceptable to the director, that operates manually or automatically on start-up; and

(b) at start-up and after a filter backwash cycle, water is wasted and not discharged into a treated water storage reservoir or any other part of a water distribution system, until water turbidity levels have stabilized at an acceptable level.

Filtration equipment not needing stabilization

27(4) Subsections (2) and (3) do not apply in relation to a system using physical filtration equipment that does not require time to stabilize upon start-up, including cartridge filters, membrane filters, or similar equipment.

Collecting and handling of samples

28 A water supplier must collect, handle and submit a sample in a manner that is satisfactory to

(a) the laboratory, if it is submitted to a laboratory described under section 35; or

(b) the director, if it is submitted to a testing facility approved under subsection 36(1).

Renvoi de l'eau du filtre pour les petits réseaux publics

27(3) Le fournisseur d'un service d'eau public approvisionnant en eau moins de 1000 personnes qui installe du nouveau matériel de filtration d'eau ou qui modifie le matériel de filtration existant fait en sorte :

a) que le matériel en question soit doté d'un dispositif de renvoi de l'eau du filtre, ou d'un autre dispositif d'évacuation jugé acceptable par le directeur, qui se déclenche manuellement ou automatiquement au démarrage;

b) qu'au moment du démarrage et après le cycle de lavage à contre-courant, l'eau soit éliminée et non déversée dans un réservoir d'eau traitée ni dans une autre partie du système de distribution d'eau jusqu'à ce que sa turbidité se soit stabilisée à un niveau acceptable.

Matériel de filtration ne nécessitant pas de stabilisation

27(4) Les paragraphes (2) et (3) ne s'appliquent pas aux systèmes qui utilisent du matériel de filtration tel que des cartouches ou des membranes filtrantes ou d'autre matériel semblable ne nécessitant pas de période de stabilisation au démarrage.

Prélèvement et manipulation des échantillons

28 Le fournisseur d'un service d'eau prélève, manipule et remet chaque échantillon d'une manière jugée acceptable, selon le cas :

a) par le laboratoire, si l'échantillon est remis à un laboratoire visé à l'article 35;

b) par le directeur, si l'échantillon est remis à un centre d'analyse autorisé en vertu du paragraphe 36(1).

REPORTING OF
LABORATORY ANALYSESCOMMUNICATION DES RÉSULTATS
DES ANALYSES EFFECTUÉES
PAR LES LABORATOIRES**Routine reporting by laboratory for bacteriological standards**

29(1) A laboratory that conducts an analysis of a sample collected from a public or semi-public water system under section 26 for a bacteriological standard must submit the results to the director, in a form satisfactory to the director.

Reporting by laboratory for other standards

29(2) If specified in the operating licence for a public or semi-public water system, a laboratory that conducts an analysis of a sample collected from the system under section 26 for a chemical, radiological, physical or microbial standard must submit the results to the director, in a form satisfactory to the director.

When analysis results must be submitted

29(3) Subject to subsection (4), the results must be submitted to the director within the following times:

(a) results of an analysis for a bacteriological standard must be submitted not later than seven days after the date that the sample was received by the laboratory;

(b) results of an analysis for a chemical, radiological, physical or microbial standard must be submitted not later than 30 days after the date that the sample was received by the laboratory.

Non-application if emergency reporting required

29(4) Subsection (3) does not apply when the laboratory is required to notify the director of results immediately under subsection 22(2) of the Act (emergency reporting of results).

Communication courante des résultats des analyses — respect des normes bactériologiques

29(1) Le laboratoire qui effectue l'analyse d'un échantillon prélevé dans un réseau public ou semi-public d'alimentation en eau en application de l'article 26 pour le respect d'une norme bactériologique communique les résultats au directeur en la forme que celui-ci estime acceptable.

Communication des résultats des analyses — respect d'autres normes

29(2) Si la licence d'exploitation d'un réseau public ou semi-public d'alimentation en eau le prévoit, le laboratoire qui effectue l'analyse d'un échantillon prélevé dans le réseau en application de l'article 26 pour le respect d'une norme chimique, radiologique, physique ou microbienne communique les résultats au directeur en la forme que celui-ci estime acceptable.

Délai de communication des résultats

29(3) Sous réserve du paragraphe (4), les résultats sont communiqués au directeur dans le délai indiqué ci-dessous :

a) si l'analyse porte sur les normes bactériologiques, dans les sept jours suivant la réception de l'échantillon par le laboratoire;

b) si l'analyse porte sur les normes chimiques, radiologiques, physiques ou microbiennes, dans les 30 jours suivant la réception de l'échantillon par le laboratoire.

Non-application du délai en cas d'urgence

29(4) Le paragraphe (3) ne s'applique pas lorsque le laboratoire est tenu de communiquer les résultats sans tarder au directeur en application du paragraphe 22(2) de la *Loi* (communication d'urgence).

NOTIFICATION OF PRIVATE WATER SUPPLIER
WHERE ANALYSIS INDICATES RISK

COMMUNICATION DES RISQUES
AU FOURNISSEUR
D'UN SERVICE D'EAU PRIVÉ

Laboratory to notify private water supplier by telephone

30(1) If a laboratory conducts an analysis in relation to a private water system and the results indicate that a serious health risk to users of the system exists or may exist, for the purposes of notification under section 24 of the Act the laboratory must immediately attempt to contact the private water supplier by live telephone conversation.

Action if unable to notify by telephone

30(2) If the laboratory is unable to contact the water supplier immediately under subsection (1), the laboratory must

(a) immediately leave a recorded message on a voice-mail system or other form of telephone answering service or device, if the supplier's telephone is so connected;

(b) continue attempts to contact the supplier by live telephone conversation at reasonable intervals until 48 hours after the first telephone contact was attempted under subsection (1); and

(c) send a written copy of the results by regular mail to the supplier, at the latest address shown in the laboratory's records.

Laboratory to contact drinking water officer

30(3) If the laboratory is unable to contact the water supplier within 48 hours under clause (2)(b), the laboratory must, as soon as practicable after the expiry of the 48-hour period, contact a drinking water officer and advise him or her of

(a) the results of the analysis; and

(b) the laboratory's unsuccessful efforts to contact the water supplier;

and provide any other information that the drinking water officer may request.

Communication par téléphone

30(1) S'il effectue une analyse se rapportant à un réseau privé d'alimentation en eau et que les résultats indiquent qu'il existe ou peut exister un risque sérieux pour la santé des utilisateurs du réseau, le laboratoire tente sans tarder de communiquer de vive voix par téléphone avec le fournisseur du service d'eau pour l'aviser comme l'exige l'article 24 de la *Loi*.

Marche à suivre en cas d'impossibilité de communiquer par téléphone

30(2) S'il est incapable de joindre sans tarder le fournisseur du service d'eau, le laboratoire prend les mesures suivantes :

a) il enregistre sans tarder un message dans la boîte vocale ou à l'aide d'un autre dispositif de réponse téléphonique dont est doté le téléphone du fournisseur;

b) il poursuit ses tentatives pour communiquer de vive voix par téléphone avec le fournisseur à des intervalles raisonnables dans les 48 heures suivant le premier appel prévu au paragraphe (1);

c) il transmet par le courrier ordinaire une copie des résultats au fournisseur à la dernière adresse figurant dans ses dossiers.

Communication avec l'agent du Service de l'eau potable

30(3) S'il est incapable de joindre le fournisseur dans le délai de 48 heures mentionné à l'alinéa (2)b), le laboratoire avise, dès que possible après ce délai, un agent du Service de l'eau potable :

a) d'une part, des résultats de l'analyse;

b) d'autre part, de ses tentatives infructueuses pour communiquer avec le fournisseur.

Le laboratoire fournit également les autres renseignements demandés par l'agent du Service de l'eau potable.

Form of notification

30(4) For greater certainty, the leaving of a recorded message on a voice-mail system or other form of telephone answering service or device is not a "live telephone conversation" for the purposes of this section.

Requirements apply

30(5) This section applies whether or not the private water supplier was required by law to submit the sample to a laboratory.

Drinking water officer may take action

30(6) On being contacted under subsection (3), a drinking water officer may take any action in accordance with the Act that he or she considers necessary to provide for

- (a) the safety of water obtained from the water system or a nearby water system; or
- (b) effective environmental management.

RECORDKEEPING REQUIREMENTS FOR
PUBLIC AND SEMI-PUBLIC WATER SUPPLIERS

Additional records required

31(1) Every public water supplier and semi-public water supplier must make a record of any matter specified in the operating licence for the water system, in a form satisfactory to the director.

Distribution of records

31(2) A water supplier must make two copies of an original record required under this section, and

- (a) provide the original and one copy to a drinking water officer within seven days after the end of the calendar month in which the event to which the record relates occurred; and
- (b) retain one copy at the water treatment plant, for at least 24 months after the date on which the event to which the record relates occurred.

Forme de la communication

30(4) Pour l'application du présent article, l'enregistrement d'un message dans une boîte vocale ou à l'aide d'un autre dispositif de réponse téléphonique ne constitue pas une conversation téléphonique de vive voix.

Application des exigences

30(5) Le présent article s'applique, que le fournisseur d'un service d'eau privé ait été ou non tenu en vertu de la loi de remettre l'échantillon à un laboratoire.

Mesures que peut prendre l'agent

30(6) L'agent du Service de l'eau potable qui reçoit un appel en application du paragraphe (3) peut prendre, conformément à la *Loi*, les mesures qu'il estime nécessaires pour assurer :

- a) soit la qualité de l'eau provenant du réseau d'alimentation ou d'un réseau situé à proximité;
- b) soit l'efficacité des mesures de gestion de l'environnement.

EXIGENCES RELATIVES AUX REGISTRES
POUR LES FOURNISSEURS
D'UN SERVICE D'EAU PUBLIC OU SEMI-PUBLIC

Registres supplémentaires exigés

31(1) Le fournisseur d'un service d'eau public ou semi-public tient un registre sur toute question que précise la licence d'exploitation du réseau d'alimentation en eau, en la forme que le directeur estime acceptable.

Distribution des registres

31(2) Le fournisseur d'un service d'eau fait deux copies de l'original du registre exigé par le présent article et :

- a) remet l'original ainsi qu'une copie à un agent du Service de l'eau potable dans les sept jours suivant la fin du mois civil durant lequel s'est produit l'événement auquel le registre a trait;
- b) conserve une copie à la station de traitement pendant au moins 24 mois après la date à laquelle s'est produit l'événement auquel le registre a trait.

ANNUAL REPORTS

RAPPORTS ANNUELS

Annual reports

32(1) Beginning in 2008, a public water supplier in relation to a public water system that serves 1,000 or more persons must provide a report to the director, by not later than March 31 of each year, about the operation of the water system in the immediately preceding calendar year.

Contents of annual report

32(2) The report must be in a form satisfactory to the director, and must include

- (a) a brief description of the drinking water system, including its water supply source;
- (b) a description of the disinfection methods used, and a summary of disinfectant residual test results;
- (c) a list of all bacteriological, chemical, radiological, physical and microbial drinking water quality standards that apply to the water system, and a summary of analysis results for each parameter before and after treatment;
- (d) a summary of any incidents of failure to meet a drinking water quality standard, and a description of corrective action or other remedial measures taken in each case;
- (e) a summary of the information contained in the records made under section 31;
- (f) a description of any drinking water safety orders issued in relation to the system, and of action taken in response to each one;
- (g) a description of any boil water advisories issued in relation to the system, and of action taken in response to each one;
- (h) a summary of any charges laid, pending or disposed of for an offence under section 31 of the Act;

Rapport annuel

32(1) À compter de 2008, le fournisseur d'un service d'eau public qui approvisionne en eau au moins 1000 personnes présente au directeur au plus tard le 31 mars de chaque année un rapport concernant l'exploitation du réseau d'alimentation en eau au cours de l'année civile précédente.

Contenu du rapport annuel

32(2) Le rapport est présenté en la forme que le directeur estime acceptable et contient ce qui suit :

- a) une brève description du réseau d'alimentation en eau potable indiquant notamment sa source d'approvisionnement;
- b) une mention des méthodes de désinfection utilisées ainsi qu'un résumé des résultats des contrôles de la présence de désinfectant résiduel;
- c) la liste de toutes les normes bactériologiques, chimiques, radiologiques, physiques et microbiennes relatives à la qualité de l'eau potable qui s'appliquent au réseau d'alimentation ainsi qu'un résumé des résultats des analyses pour chaque paramètre avant et après le traitement;
- d) un résumé des incidents où des normes de qualité de l'eau potable n'ont pas été respectées ainsi qu'une mention des mesures correctives prises dans chaque cas;
- e) un résumé des renseignements contenus dans les registres prévus à l'article 31;
- f) une mention des ordres visant la qualité de l'eau potable donnés en relation avec le réseau d'alimentation et des mesures prises dans chaque cas;
- g) une mention des recommandations de faire bouillir l'eau qui ont été communiquées en relation avec le réseau d'alimentation et des mesures correctives prises dans chaque cas;
- h) un résumé des accusations portées, en instance ou réglées pour des infractions à l'article 31 de la *Loi*;

(i) a description of any major expenses incurred to repair, replace or install equipment; and

(j) any other information or a description of any other activities that the supplier believes should be communicated.

Free copies to be made available to users

32(3) A public water supplier must ensure that, whenever an annual report is prepared, effective steps are taken to advise users of the water system that free copies of the report are available, and how a copy may be obtained.

Annual reports to be posted on Internet

32(4) A public water supplier required to provide an annual report must ensure that a copy of each annual report is available as soon as practicable to the public at no charge on an Internet website.

PUBLIC INFORMATION REQUIREMENTS FOR WATER SUPPLIERS

Posting of permits, licences and orders

33 A permit, licence or order issued under the Act may contain requirements respecting the posting of the permit, licence or order.

Water suppliers to make information available

34(1) A water supplier must ensure that the information listed in subsections (2) and (3) is available for inspection by any member of the public during normal business hours without charge at

- (a) the office of the water supplier; or
- (b) if the water supplier does not have an office, at a location convenient to users of the system.

i) une mention des dépenses importantes engagées pour réparer, remplacer ou installer du matériel;

j) les autres renseignements ou une mention des autres activités qui, selon le fournisseur du service d'eau, devraient être communiqués.

Exemplaires gratuits pour les utilisateurs

32(3) Chaque fois qu'un rapport annuel est établi, le fournisseur d'un service d'eau public veille à ce que des moyens efficaces soient pris pour informer les utilisateurs du réseau d'alimentation en eau qu'ils peuvent se procurer gratuitement le rapport et leur indiquer comment s'y prendre.

Affichage des rapports annuels dans Internet

32(4) Le fournisseur d'un service d'eau public qui est tenu de présenter un rapport annuel voit à ce que chaque rapport soit affiché dès que possible dans un site Internet où le public y aura accès gratuitement.

OBLIGATIONS D'INFORMATION DU PUBLIC POUR LES FOURNISSEURS D'UN SERVICE D'EAU

Affichage des licences, des permis et des ordres

33 Les licences et permis délivrés et les ordres donnés en vertu de la *Loi* peuvent comporter des exigences concernant leur affichage.

Obligation de donner accès aux renseignements

34(1) Le fournisseur d'un service d'eau donne gratuitement au public accès aux renseignements indiqués aux paragraphes (2) et (3) durant les heures normales d'ouverture à l'un ou l'autre des endroits suivants :

- a) à son bureau;
- b) s'il n'a pas de bureau, à un endroit qui convient aux utilisateurs du réseau.

Information to be available — public systems

34(2) A public water supplier must ensure that the following information in relation to its water system is available for inspection:

- (a) a copy of every analysis result required in the past 24 months under the Act, this regulation, an order or a licence;
- (b) a copy of every order, permit, advisory and licence that is still in effect;
- (c) a copy of every record or report made under section 31 or 32.

Information to be available — semi-public systems

34(3) A semi-public water supplier must ensure that the following information in relation to its system is available for inspection:

- (a) a copy of every analysis result required in the past 24 months under the Act, this regulation, an order or a licence;
- (b) a copy of every order, permit, advisory and licence that is still in effect.

Renseignements à rendre accessibles — réseaux publics

34(2) Le fournisseur d'un service d'eau public fait le nécessaire pour donner accès aux renseignements ci-dessous relatifs à son réseau d'alimentation en eau :

- a) une copie des résultats de toutes les analyses exigées au cours des 24 mois précédents en vertu de la *Loi*, du présent règlement, d'un ordre ou d'une licence;
- b) une copie de tous les ordres, les permis, les recommandations et les licences toujours en vigueur;
- c) une copie de tous les registres tenus ou de tous les rapports établis en application de l'article 31 ou 32.

Renseignements à rendre accessibles — réseaux semi-publics

34(3) Le fournisseur d'un service d'eau semi-public fait le nécessaire pour donner accès aux renseignements ci-dessous relatifs à son réseau d'alimentation en eau :

- a) une copie des résultats de toutes les analyses exigées au cours des 24 mois précédents en vertu de la *Loi*, du présent règlement, d'un ordre ou d'une licence;
- b) une copie de tous les ordres, les permis, les recommandations et les licences toujours en vigueur.

ACCREDITATION OF LABORATORIES

ACCREDITATION DES LABORATOIRES

Accredited laboratory

35 For the purpose of clause (a) of the definition of "laboratory" in section 1 of the Act, a laboratory is an accredited laboratory for a parameter if

- (a) the laboratory is accredited for analysis of that parameter by the Standards Council of Canada; or

Laboratoires accrédités

35 Pour l'application de l'alinéa a) de la définition de « laboratoire » figurant à l'article 1 de la *Loi*, est accrédité pour l'analyse d'un paramètre le laboratoire qui, selon le cas :

- a) a reçu une accréditation du Conseil canadien des normes pour effectuer le contrôle du paramètre en question;

(b) the laboratory has another accreditation for analysis of that parameter that, in the director's opinion, is equivalent to accreditation by the Standards Council of Canada.

Testing facility

36(1) For the purpose of clause (b) of the definition of "laboratory" in section 1 of the Act, the director may approve a testing facility for the analysis of a parameter if he or she is satisfied that if the facility is operated in accordance with the terms of its approval, the facility's analysis of a water sample in relation to that parameter will be accurate.

Procedures for operating a testing facility

36(2) The operator of a testing facility must ensure that it is operated in accordance with the terms of operation approved by the director for the facility.

b) a reçu pour effectuer le contrôle du paramètre en question une autre accréditation que le directeur estime équivalente à celle accordée par le Conseil canadien des normes.

Centres d'analyse

36(1) Pour l'application de l'alinéa b) de la définition de « laboratoire » figurant à l'article 1 de la *Loi*, le directeur peut autoriser un centre d'analyse à contrôler un paramètre s'il est convaincu que l'analyse des échantillons d'eau en relation avec le paramètre en question sera exacte si le centre respecte les conditions dont est assortie l'autorisation.

Exploitation d'un centre d'analyse

36(2) L'exploitant d'un centre d'analyse se conforme aux conditions d'exploitation approuvées par le directeur.

INFRASTRUCTURE ASSESSMENTS

Conducting an infrastructure assessment

37(1) Every public water supplier and semi-public water supplier must ensure that each assessment and written report required by subsection 9(1) of the Act is done by a professional engineer who is experienced in sanitary engineering relating to drinking water systems and who is not an employee of the water supplier.

Assessment of a semi-public system

37(2) Despite subsection (1), in relation to a semi-public water system, a person who is not a professional engineer may conduct the assessment and prepare and provide the report, if the person is not an employee of the water supplier and the director is of the opinion that he or she is suitably qualified.

Requirements of an assessment

37(3) An assessment under section 9 of the Act must be conducted in accordance with guidelines approved by the director.

ÉVALUATIONS DE L'INFRASTRUCTURE

Évaluation de l'infrastructure

37(1) Le fournisseur d'un service d'eau public ou semi-public voit à ce que ce soit un ingénieur qui a de l'expérience en génie sanitaire dans le domaine des réseaux d'alimentation en eau potable et qui n'est pas un de ses employés se charge d'effectuer l'évaluation et d'établir le rapport écrit exigé par le paragraphe 9(1) de la *Loi*.

Évaluation d'un réseau semi-public d'alimentation en eau

37(2) Malgré les dispositions du paragraphe (1) concernant les réseaux semi-publics d'alimentation en eau, une personne autre qu'un ingénieur peut effectuer l'évaluation et établir et présenter le rapport à condition qu'elle ne soit pas un employé du fournisseur du service d'eau et que le directeur estime qu'elle possède les compétences nécessaires.

Exigences relatives à l'évaluation

37(3) L'évaluation visée à l'article 9 de la *Loi* est effectuée conformément aux lignes directrices approuvées par le directeur.

NON-POTABLE SYSTEMS

Non-potable systems: interpretation

38 The following definitions apply in sections 39 to 43.

"**all season non-potable system**" means a non-potable system that provides water to two or more residences or other dwellings in each season of the year. (« réseau d'eau non potable toutes saisons »)

"**non-potable system serving seasonal dwellings**" means a non-potable system that provides water to two or more seasonal dwellings, cottages or other recreational dwellings for not more than 180 days per year. (« réseau d'eau non potable approvisionnant des habitations saisonnières »)

Prohibition re new non-potable systems for multiple dwellings

39(1) No person shall construct, or begin construction of, a non-potable system that is intended to serve more than one residence, cottage, seasonal, recreational or other dwelling without obtaining the prior written approval of the director.

Prohibition re conversion or re-designation of potable systems

39(2) No person shall convert or re-designate an existing water system to a non-potable system without obtaining the prior written approval of the director.

Registration of non-potable systems

40(1) A person who operates an all season non-potable system or a non-potable system serving seasonal dwellings must register the system with the director

(a) within six months after the day this subsection comes into force, in the case of an existing system; or

(b) before operating the system, in the case of a new system.

RÉSEAUX D'EAU NON POTABLE

Définitions pour les réseaux d'eau non potable

38 Les définitions qui suivent s'appliquent aux articles 39 à 43.

« **réseau d'eau non potable approvisionnant des habitations saisonnières** » Réseau d'eau non potable qui approvisionne au moins deux habitations saisonnières, chalets ou autres habitations de plaisance pendant au plus 180 jours par année. ("non-potable system serving seasonal dwellings")

« **réseau d'eau non potable toutes saisons** » Réseau d'eau non potable qui approvisionne au moins deux résidences ou autres habitations durant chaque saison de l'année. ("all season non-potable system")

Interdiction concernant les nouveaux réseaux d'eau non potable pour des habitations multiples

39(1) Il est interdit de construire ou de commencer à construire un réseau d'eau non potable destiné à approvisionner plus d'une résidence, d'un chalet ou d'une habitation saisonnière, de plaisance ou d'un autre type à moins d'avoir obtenu l'autorisation écrite du directeur au préalable.

Interdiction concernant la transformation ou la désignation de réseaux d'eau potable

39(2) Il est interdit de transformer un réseau d'alimentation en eau existant en réseau d'eau non potable ou de le désigner comme tel à moins d'avoir obtenu l'autorisation écrite du directeur au préalable.

Enregistrement d'un réseau d'eau non potable

40(1) La personne qui exploite un réseau d'eau non potable toutes saisons ou un réseau d'eau non potable approvisionnant des habitations saisonnières est tenue de l'enregistrer auprès du directeur :

a) soit dans les six mois suivant l'entrée en vigueur du présent paragraphe, s'il s'agit d'un réseau existant;

b) soit avant de commencer l'exploitation, s'il s'agit d'un nouveau réseau.

Registration to be maintained

40(2) A person who operates an all season non-potable system or a non-potable system serving seasonal dwellings must, subject to clause (1)(a), ensure that the system is registered under this section at all times.

Procedure for registration and renewal

40(3) A person may register, or renew the registration of, a system described in subsection (1) by providing, to the director, a completed registration or renewal form in a form satisfactory to the director.

Term of registration or renewal

40(4) The term of a registration or a renewal of a registration is five years from the date of the registration or renewal, as the case may be.

All season non-potable system: notice to users

41(1) A person who operates an all season non-potable system must, before May 1 of each year,

(a) give written notice to each owner of a residence or other dwelling served by the system

(i) that water from the system is non-potable, and must not be used for drinking, preparing food or brushing teeth, and

(ii) of any other matter that a drinking water officer, having consulted with a medical officer, may require; and

(b) give to a drinking water officer a copy of the written notice and a list of owners to whom it was given.

Maintien de l'enregistrement

40(2) La personne qui exploite un réseau d'eau non potable toutes saisons ou un réseau d'eau non potable approvisionnant des habitations saisonnières est tenue, sous réserve de l'alinéa (1)a), de faire en sorte que le réseau demeure en tout temps enregistré conformément au présent article.

Formalités liées à l'enregistrement et à son renouvellement

40(3) Pour enregistrer un réseau d'eau visé au paragraphe (1) ou en renouveler l'enregistrement, il faut fournir au directeur un formulaire d'enregistrement ou de renouvellement rempli en la forme que celui-ci estime acceptable.

Période de validité de l'enregistrement ou du renouvellement

40(4) La période de validité d'un enregistrement ou d'un renouvellement d'enregistrement est de cinq ans à partir de la date de l'événement en question.

Réseau d'eau non potable toutes saisons — avis aux utilisateurs

41(1) La personne qui exploite un réseau d'eau non potable toutes saisons prend les mesures suivantes avant le 1^{er} mai de chaque année :

a) elle envoie au propriétaire de chaque résidence ou autre habitation approvisionnée par le réseau un avis écrit l'informant :

(i) que l'eau provenant du réseau est non potable et ne doit pas être utilisée pour boire, préparer des aliments ou se brosser les dents,

(ii) de toute autre chose que peut exiger un agent du Service de l'eau potable après avoir consulté un médecin hygiéniste;

b) elle remet à un agent du Service de l'eau potable une copie de l'avis écrit et la liste des propriétaires à qui cet avis a été envoyé.

Non-potable system serving seasonal dwellings: notice to users

41(2) A person who operates a non-potable system serving seasonal dwellings must, before May 1 of each year,

(a) give written notice to each owner of a cottage or other recreational or seasonal dwelling served by the system

(i) that water from the system is non-potable, and must not be used for personal hygiene, drinking, preparing food or washing dishes or other items that come into contact with food, and

(ii) of any other matter that a drinking water officer, having consulted with a medical officer, may require; and

(b) give to a drinking water officer a copy of the written notice and a list of owners to whom it was given.

Order re non-potable system

42(1) An order under this section respecting a non-potable system may be made

(a) by a medical officer; or

(b) with the approval of a medical officer, by the director or a drinking water officer;

and may be directed to any person.

Circumstances in which order may be made

42(2) An order under this section may be made if the person issuing the order is satisfied that a serious health risk exists or may exist in relation to the use of a non-potable system, due to

(a) the number of service connections to the system;

(b) the ages or other characteristics of the persons using or having access to the system;

Réseau d'eau non potable approvisionnant des habitations saisonnières — avis aux utilisateurs

41(2) La personne qui exploite un réseau d'eau non potable approvisionnant des habitations saisonnières prend les mesures suivantes avant le 1^{er} mai de chaque année :

a) elle envoie au propriétaire de chaque habitation saisonnière, chalet ou autre habitation de plaisance approvisionné par le réseau un avis écrit l'informant :

(i) que l'eau provenant du réseau est non potable et ne doit pas être utilisée à des fins d'hygiène personnelle ou pour boire, préparer des aliments ou laver de la vaisselle ou d'autres articles qui entrent en contact avec la nourriture,

(ii) de toute autre chose que peut exiger un agent du Service de l'eau potable après avoir consulté un médecin hygiéniste;

b) elle remet à un agent du Service de l'eau potable une copie de l'avis écrit et la liste des propriétaires à qui cet avis a été envoyé.

Ordre concernant les réseaux d'eau non potable

42(1) Un ordre concernant un réseau d'eau non potable peut être donné en vertu du présent article à quiconque par l'une des personnes suivantes :

a) un médecin hygiéniste;

b) le directeur ou un agent du Service de l'eau potable, avec l'approbation d'un médecin hygiéniste.

Situations justifiant un ordre

42(2) Un ordre est justifié si la personne qui le donne est convaincue que l'utilisation du réseau d'eau non potable présente ou pourrait présenter un risque sérieux pour la santé pour les raisons suivantes :

a) le nombre de conduites de branchement que compte le réseau;

b) l'âge ou d'autres caractéristiques des personnes utilisant le réseau ou y ayant accès;

- (c) the purposes for which users of the system
 - (i) are using,
 - (ii) appear, in the opinion of the person issuing the order, to be using, or
 - (iii) may use,
- water obtained from the system;
- (d) the quality of the water obtained from the system; or
- (e) any other reason that, in the opinion of a medical officer, has resulted or could result in the existence of a serious health risk.

Requirements of an order

42(3) An order under this section may require the person to whom it is directed to do anything, or refrain from doing anything, that the person issuing the order considers necessary to investigate, prevent, remedy, mitigate or otherwise deal with the risk, including one or more of the following:

- (a) disconnect one or more service connections to the system;
- (b) stop delivery of water from the system;
- (c) dismantle, modify or remove the system, or any part of the system.

Non-potable water not to be offered or provided

43(1) No person shall offer, deliver, sell or otherwise provide water from a non-potable system to another person

- (a) for a domestic purpose; or
- (b) for any other purpose, if that person does not possess a service connection to the system.

Exception for agricultural non-potable systems

43(2) Clause (1)(b) does not apply in respect of water used for agricultural purposes, if the water is provided from a non-potable system designed specifically for the provision of non-potable water for agricultural purposes.

- c) les fins auxquelles l'eau provenant du réseau :
 - (i) est utilisée,
 - (ii) semble être utilisée, d'après la personne qui donne l'ordre,
 - (iii) peut être utilisée;
- d) la qualité de l'eau provenant du réseau;
- e) toute autre raison qui donne à penser à un médecin hygiéniste qu'il existe ou pourrait exister un risque sérieux pour la santé.

Exigences des ordres

42(3) Un ordre peut enjoindre à la personne à qui il est donné de prendre ou de s'abstenir de prendre, à l'égard du risque, les mesures que l'auteur de l'ordre estime nécessaires, notamment pour prévenir, éliminer ou atténuer le risque. Cette personne peut en outre être enjointe :

- a) de couper une ou plusieurs conduites de branchement;
- b) de cesser toute distribution d'eau provenant du réseau d'alimentation;
- c) de détruire, de modifier ou d'enlever le réseau en totalité ou en partie.

Interdiction de fournir de l'eau non potable

43(1) Il est interdit d'offrir, de distribuer, de vendre ou de fournir d'une autre façon à quelqu'un d'autre de l'eau provenant d'un réseau d'eau non potable :

- a) soit à des fins domestiques;
- b) soit à d'autres fins, si la personne ne possède pas une conduite de branchement au réseau.

Exemption pour les réseaux d'eau non potable utilisés à des fins agricoles

43(2) L'alinéa (1)b) ne s'applique pas à l'eau provenant d'un réseau d'eau non potable spécialement conçu pour la distribution d'eau non potable à des fins agricoles.

TRANSITIONAL

Transitional — public water system "certificates" 44(1)

A certificate for the operation of a public water system issued under the *Water Works, Sewerage and Sewage Disposal Regulation*, Manitoba Regulation 331/88 R, before the coming into force of this regulation is deemed to be a valid operating licence for the public water system named in the certificate, and expires on the earlier of

- (a) two years after the date this regulation comes into force; and
- (b) the date that an operating licence under this Act is issued for the public water system.

Transitional — applications under M.R. 331/88 R 44(2)

An application for a certificate in relation to the construction, alteration or operation of a public water system commenced under the *Water Works, Sewerage and Sewage Disposal Regulation*, Manitoba Regulation 331/88 R, before the coming into force of this regulation must be continued under this regulation, in conformity with this regulation as much as possible.

COMING INTO FORCE

Coming into force

45 This regulation comes into force on the same day that subsections 8(1), (3), (4) and (5) and sections 3, 7, 9, 10, 20 to 25 and 30 of *The Drinking Water Safety Act*, S.M. 2002, c. 36, come into force.

DISPOSITIONS TRANSITOIRES

Certificat pour un réseau public d'alimentation en eau 44(1)

Le certificat d'exploitation d'un réseau public d'alimentation en eau délivré en vertu du *Règlement sur les ouvrages de purification de l'eau, les systèmes d'égouts et l'évacuation des eaux usées*, R.M. 331/88 R, avant l'entrée en vigueur du présent règlement est réputé être une licence d'exploitation valide pour le réseau public d'alimentation en eau qui y est mentionné et expire à la plus rapprochée des dates suivantes :

- a) la date qui arrive deux ans après l'entrée en vigueur du présent règlement;
- b) la date de délivrance d'une licence d'exploitation en vertu de la *Loi* pour le réseau public d'alimentation en eau.

Demandes présentées en vertu du R.M. 331/88 R 44(2)

Les demandes de certificat pour la construction, l'exploitation ou la transformation d'un réseau public d'alimentation en eau qui ont été présentées en vertu du *Règlement sur les ouvrages de purification de l'eau, les systèmes d'égouts et l'évacuation des eaux usées*, R.M. 331/88 R, avant l'entrée en vigueur du présent règlement se poursuivent en vertu du présent règlement et en conformité avec celui-ci dans la mesure du possible.

ENTRÉE EN VIGUEUR

Entrée en vigueur

45 Le présent règlement entre en vigueur en même temps que les paragraphes 8(1), (3), (4) et (5) ainsi que les articles 3, 7, 9, 10, 20 à 25 et 30 de la *Loi sur la qualité de l'eau potable*, c. 36 des L.M. 2002.

SCHEDULE A

(Sections 23 and 26)

FREQUENCY OF TESTING FOR DISINFECTANT RESIDUALS AND SAMPLING FOR BACTERIOLOGICAL STANDARDS

CLASSIFICATION OF SYSTEM	MINIMUM FREQUENCY OF TESTING FOR DISINFECTANT RESIDUALS IN TREATED WATER (unless otherwise specified by a drinking water officer or in the operating licence)	MINIMUM NUMBER OF SAMPLES TO BE COLLECTED AND SUBMITTED RE BACTERIOLOGICAL STANDARDS Note: "raw sample" means a sample as described in clause 26(3)(a). "treated sample" means a sample as described in clause 26(3)(b).
SEMI-PUBLIC WATER SYSTEM:		
using surface water or GUDI	daily	2 sample sets (consisting of 1 raw and 1 treated sample) each month, provided that the sample sets are taken at an interval of not less than 12 days
using groundwater	If disinfection is required, 3 times per week, provided that no tests are done on consecutive days	1 raw sample and 1 treated sample, once every 3 months
PUBLIC WATER SYSTEM SERVING:		
fewer than 5,000 persons	daily (though continuous monitoring is recommended)	2 sample sets (consisting of 1 raw plus 2 treated samples) each month, provided that the sample sets are taken at an interval of not less than 12 days

<p>CLASSIFICATION OF SYSTEM</p>	<p>MINIMUM FREQUENCY OF TESTING FOR DISINFECTANT RESIDUALS IN TREATED WATER</p> <p>(unless otherwise specified by a drinking water officer or in the operating licence)</p>	<p>MINIMUM NUMBER OF SAMPLES TO BE COLLECTED AND SUBMITTED RE BACTERIOLOGICAL STANDARDS</p> <p>Note:</p> <p>"raw sample" means a sample as described in clause 26(3)(a).</p> <p>"treated sample" means a sample as described in clause 26(3)(b).</p>
<p>5,000 to 10,000 persons</p>	<p>continuous monitoring</p>	<p>2 sample sets (consisting of 1 raw sample, plus 1 treated sample per each 1,000 persons equally distributed between the 2 sampling periods in the month) each month, provided that the sample sets are taken at an interval of not less than 12 days</p>
<p>10,001 to 90,000 persons</p>	<p>continuous monitoring</p>	<p>4 sample sets (consisting of 1 raw sample, plus 1 treated sample per each 1,000 persons equally distributed among the 4 sampling periods in the month) each month, provided that the sample sets are taken at intervals of not less than 5 days</p>
<p>more than 90,000 persons</p>	<p>continuous monitoring</p>	<p>4 sample sets (consisting of 1 raw sample, and 90 plus 1 treated sample per each 10,000 persons equally distributed among the 4 sampling periods in the month) each month, provided that the sample sets are taken at intervals of not less than 5 days</p>

ANNEXE A

(articles 23 et 26)

FRÉQUENCE DES CONTRÔLES POUR LA VÉRIFICATION DE LA PRÉSENCE
DE DÉSINFECTANT RÉSIDUEL ET FRÉQUENCE DES PRÉLÈVEMENTS
D'ÉCHANTILLONS POUR LE RESPECT DES NORMES BACTÉRIOLOGIQUES

CLASSIFICATION DU RÉSEAU	FRÉQUENCE MINIMALE DES CONTRÔLES POUR LA VÉRIFICATION DE LA PRÉSENCE DE DÉSINFECTANT RÉSIDUEL DANS L'EAU TRAITÉE (sauf indication contraire d'un agent du Service de l'eau potable ou de la licence d'exploitation)	NOMBRE MINIMUM D'ÉCHANTILLONS À PRÉLEVER ET À REMETTRE POUR LE RESPECT DES NORMES BACTÉRIOLOGIQUES Note : « échantillon non traité » S'entend d'un échantillon visé à l'alinéa 26(3)a). « échantillon traité » S'entend d'un échantillon visé à l'alinéa 26(3)b).
RÉSEAU SEMI-PUBLIC D'ALIMENTATION EN EAU		
réseau utilisant de l'eau de surface ou de l'ESSID	contrôle quotidien	2 séries d'échantillons (comprenant 1 échantillon non traité et 1 échantillon traité) prélevés chaque mois à au moins 12 jours d'intervalle
réseau utilisant de l'eau souterraine	si une désinfection est nécessaire, 3 contrôles par semaine, les contrôles ne pouvant toutefois pas être effectués au cours de jours consécutifs	1 échantillon non traité et 1 échantillon traité prélevés tous les trois mois
RÉSEAU PUBLIC D'ALIMENTATION EN EAU		
moins de 5 000 personnes	contrôle quotidien (la surveillance continue est toutefois recommandée)	2 séries d'échantillons (comprenant 1 échantillon non traité et 2 échantillons traités) prélevés chaque mois à au moins 12 jours d'intervalle

CLASSIFICATION DU RÉSEAU	FRÉQUENCE MINIMALE DES CONTRÔLES POUR LA VÉRIFICATION DE LA PRÉSENCE DE DÉSINFECTANT RÉSIDUEL DANS L'EAU TRAITÉE (sauf indication contraire d'un agent du Service de l'eau potable ou de la licence d'exploitation)	NOMBRE MINIMUM D'ÉCHANTILLONS À PRÉLEVER ET À REMETTRE POUR LE RESPECT DES NORMES BACTÉRIOLOGIQUES Note : « échantillon non traité » S'entend d'un échantillon visé à l'alinéa 26(3)a). « échantillon traité » S'entend d'un échantillon visé à l'alinéa 26(3)b).
de 5 000 à 10 000 personnes	surveillance continue	2 séries d'échantillons (comprenant 1 échantillon non traité et 1 échantillon traité par tranche de 1 000 personnes distribués également entre les deux périodes de prélèvement) prélevés chaque mois à au moins 12 jours d'intervalle
de 10 001 à 90 000 personnes	surveillance continue	4 séries d'échantillons (comprenant 1 échantillon non traité et 1 échantillon traité par tranche de 1 000 personnes distribués également entre les quatre périodes de prélèvement) prélevés chaque mois à au moins 5 jours d'intervalle
plus de 90 000 personnes	surveillance continue	4 séries d'échantillons (comprenant 1 échantillon non traité et 90 échantillons traités plus 1 par tranche de 10 000 personnes distribués également entre les quatre périodes de prélèvement) prélevés chaque mois à au moins 5 jours d'intervalle

SCHEDULE B

(Section 26)

FREQUENCY OF SAMPLING FOR
CHEMICAL, RADIOLOGICAL, PHYSICAL AND MICROBIAL STANDARDS

CLASSIFICATION OF SYSTEM	Minimum frequency of sampling for all chemical and radiological parameters applicable to the system, unless different frequency specified in the operating licence	Minimum frequency of sampling for trihalomethanes, unless different frequency specified in the operating licence	Minimum frequency of sampling for physical parameters	Minimum frequency of sampling for microbial parameters
SEMI-PUBLIC WATER SYSTEM:				
using surface water or GUDI	on a quarterly basis, every 3 rd year	on a quarterly basis, every 3 rd year	as specified in the operating licence	as specified in the operating licence
using groundwater	once every 5 th year			
PUBLIC WATER SYSTEM SERVING:				
fewer than 5,000 persons (system using groundwater)	once every 3 rd year		as specified in the operating licence	
fewer than 5,000 persons (system using surface water or GUDI)	once each year	on a quarterly basis, every 2 nd year	as specified in the operating licence	as specified in the operating licence
5,000 to 10,000 persons (system using groundwater)	once each year			

CLASSIFICATION OF SYSTEM	Minimum frequency of sampling for all chemical and radiological parameters applicable to the system, unless different frequency specified in the operating licence	Minimum frequency of sampling for trihalomethanes, unless different frequency specified in the operating licence	Minimum frequency of sampling for physical parameters	Minimum frequency of sampling for microbial parameters
5,000 to 10,000 persons (system using surface water or GUDI)	once each year	on a quarterly basis, each year	as specified in the operating licence	as specified in the operating licence
10,001 to 90,000 persons (system using groundwater)	once each year			
10,001 to 90,000 persons (system using surface water or GUDI)	once every six months	on a quarterly basis, each year	as specified in the operating licence	as specified in the operating licence
more than 90,000 persons	once every three months	on a quarterly basis, each year	as specified in the operating licence	as specified in the operating licence

ANNEXE B

(article 26)

FRÉQUENCE DES PRÉLÈVEMENTS D'ÉCHANTILLONS
POUR LE RESPECT DES NORMES CHIMIQUES, RADIOLOGIQUES,
PHYSIQUES ET MICROBIENNES

CLASSIFICATION DU RÉSEAU	Fréquence minimale des prélèvements pour le contrôle de tous les paramètres chimiques et radiologiques qui s'appliquent au réseau, à moins d'indication contraire de la licence d'exploitation	Fréquence minimale des prélèvements pour le contrôle des trihalométhanes, à moins d'indication contraire de la licence d'exploitation	Fréquence minimale des prélèvements pour le contrôle des paramètres physiques	Fréquence minimale des prélèvements pour le contrôle des paramètres microbiens
RÉSEAU SEMI-PUBLIC D'ALIMENTATION EN EAU				
réseau utilisant de l'eau de surface ou de l'ESSID	1 échantillon par trimestre tous les trois ans	1 échantillon par trimestre tous les trois ans	selon les indications de la licence d'exploitation	selon les indications de la licence d'exploitation
réseau utilisant de l'eau souterraine	1 échantillon tous les cinq ans			
RÉSEAU PUBLIC D'ALIMENTATION EN EAU				
moins de 5 000 personnes (réseau utilisant de l'eau souterraine)	1 échantillon tous les trois ans		selon les indications de la licence d'exploitation	
moins de 5 000 personnes (réseau utilisant de l'eau de surface ou de l'ESSID)	1 échantillon par année	1 échantillon par trimestre tous les deux ans	selon les indications de la licence d'exploitation	selon les indications de la licence d'exploitation
de 5 000 à 10 000 personnes (réseau utilisant de l'eau souterraine)	1 échantillon par année			

CLASSIFICATION DU RÉSEAU	Fréquence minimale des prélèvements pour le contrôle de tous les paramètres chimiques et radiologiques qui s'appliquent au réseau, à moins d'indication contraire de la licence d'exploitation	Fréquence minimale des prélèvements pour le contrôle des trihalométhanes, à moins d'indication contraire de la licence d'exploitation	Fréquence minimale des prélèvements pour le contrôle des paramètres physiques	Fréquence minimale des prélèvements pour le contrôle des paramètres microbiens
de 5 000 à 10 000 personnes (réseau utilisant de l'eau de surface ou de l'ESSID)	1 échantillon par année	1 échantillon par trimestre chaque année	selon les indications de la licence d'exploitation	selon les indications de la licence d'exploitation
de 10 001 à 90 000 personnes (réseau utilisant de l'eau souterraine)	1 échantillon par année			
de 10 001 à 90 000 personnes (réseau utilisant de l'eau de surface ou de l'ESSID)	1 échantillon tous les six mois	1 échantillon par trimestre chaque année	selon les indications de la licence d'exploitation	selon les indications de la licence d'exploitation
plus de 90 000 personnes	1 échantillon tous les trois mois	1 échantillon par trimestre chaque année	selon les indications de la licence d'exploitation	selon les indications de la licence d'exploitation

DEFINITIONS

DÉFINITIONS

Definitions

1 The following definitions apply in this regulation.

"**Act**" means *The Drinking Water Safety Act*. (« *Loi* »)

"**background bacteria**" means bacterial colonies formed by heterotrophic bacteria, other than those sought to test the bacteriological safety of water. (« bactéries de fond »)

"**E. coli**" means *Escherichia coli*. (« bactérie *E. coli* »)

"**groundwater under the direct influence of surface water**" or "**GUDI**" means groundwater under the direct influence of surface water within the meaning of sections 1 and 2 of the *Drinking Water Safety Regulation*. (« eau souterraine sous l'influence directe de l'eau de surface » ou « ESSID »)

"**heterotrophic bacteria**" means bacteria that must consume carbon-based compounds to survive. (« bactéries hétérotrophes »)

Définitions

1 Les définitions qui suivent s'appliquent au présent règlement.

« **analyse par filtration sur membrane** » Méthode utilisée pour déterminer le nombre de bactéries présentes dans un échantillon d'eau et qui consiste à faire passer l'échantillon au travers d'une membrane filtrante ou d'un filtre de porosité suffisamment faible pour retenir les organismes recherchés, à placer le filtre sur une plaque de filtration sur membrane pour permettre l'incubation et la croissance et à compter le nombre de colonies formées. ("membrane filtration analysis")

« **bactérie E. coli** » La bactérie *Escherichia coli*. ("E. coli")

« **bactéries de fond** » Colonies de bactéries hétérotrophes qui diffèrent de celles recherchées dans les analyses de la qualité bactériologique de l'eau. ("background bacteria")

« **bactéries hétérotrophes** » Bactéries qui ont besoin de consommer des composés à base de carbone pour survivre. ("heterotrophic bacteria")

"**heterotrophic plate count**" or "**HPC**" means the method of determining the general bacterial content in a water sample by determining the number of visible bacterial colonies that arise when the sample is added to a growth medium and incubated under standardized temperature, time and atmospheric conditions. (« dénombrement sur plaque des bactéries hétérotrophes » ou « DBH »)

"**inactivate**" means to render an organism incapable of reproducing. (« inactiver »)

"**membrane filtration analysis**" means the method of determining the number of bacteria in a water sample by filtering the sample through a membrane filter of sufficiently small pore size to retain the organisms sought, placing the filter in a membrane filtration plate for incubation and growth, and then counting the number of colony forming units. (« analyse par filtration sur membrane »)

"**membrane filtration plate**" means a sterile petri dish into which a membrane filter is placed and an appropriate growth medium is added. (« plaque de filtration sur membrane »)

"**microbial standards**" includes drinking water quality standards for viruses, *Cryptosporidium parvum*, *Giardia lamblia* and other protozoa, but does not include bacteriological standards. (« normes microbiennes »)

"**NTU**" means Nephelometric Turbidity Units. (« UTN »)

"**operating licence**" means a licence to operate a water system issued under the *Drinking Water Safety Regulation*. (« licence d'exploitation »)

"**total coliform**" means "total coliform bacteria" as defined in the latest edition of *Standard Methods for the Examination of Water and Wastewater*, published jointly by the American Public Health Association, the American Water Works Association and the Water Environment Federation. (« coliformes totaux »)

« **coliformes totaux** » S'entend au sens que confère au terme « total coliform bacteria » la version la plus récente du document intitulé *Standard Methods for the Examination of Water and Wastewater*, publié conjointement par l'American Public Health Association, l'American Water Works Association et la Water Environment Federation. ("total coliform")

« **dénombrement sur plaque des bactéries hétérotrophes** » ou « **DBH** » Méthode qui est utilisée pour déterminer la teneur générale en bactéries d'un échantillon d'eau et qui consiste à compter les colonies de bactéries qui sont visibles lorsque l'échantillon est ajouté à un milieu de croissance et incubé en respectant des normes relatives à la température, à la durée et aux conditions atmosphériques. ("heterotrophic plate count" or "HPC")

« **eau souterraine sous l'influence directe de l'eau de surface** » ou « **ESSID** » Eau souterraine sous l'influence directe de l'eau de surface au sens des articles 1 et 2 du *Règlement sur la qualité de l'eau potable*. ("groundwater under the direct influence of surface water" or "GUDI")

« **inactiver** » Rendre un organisme incapable de se reproduire. ("inactivate")

« **licence d'exploitation** » Licence d'exploitation d'un réseau d'alimentation en eau délivrée en vertu du *Règlement sur la qualité de l'eau potable*. ("operating licence")

« **Loi** » La *Loi sur la qualité de l'eau potable*. ("Act")

« **normes microbiennes** » Sont assimilées aux normes microbiennes les normes de qualité de l'eau potable relatives aux virus, au *Cryptosporidium parvum*, à la *Giardia lamblia* et à d'autres protozoaires, à l'exclusion des normes bactériologiques. ("microbial standards")

« **plaque de filtration sur membrane** » Boîte de Pétri stérile qui contient une membrane filtrante et dans laquelle un milieu de croissance est ajouté. ("membrane filtration plate")

"**water distribution system**" means the part of a water system that is designed for or used in the storage, distribution or delivery of potable water for domestic purposes, and that is,

(a) in the case of a water system that treats or disinfects water but does not have a re-disinfection facility, downstream of the last location where water is treated or disinfected;

(b) in the case of a water system that treats or disinfects water and has a re-disinfection facility, downstream of the last location where water is disinfected or re-disinfected before it is delivered to the first user of the system; and

(c) in the case of a semi-public water system that does not treat or disinfect water, downstream of the well that serves as the source or entry point of the water supply for the system. (« système de distribution d'eau »)

« **système de distribution d'eau** » Partie du réseau d'alimentation en eau qui est conçue ou utilisée pour le stockage ou la distribution d'eau potable à des fins domestiques et qui :

a) dans le cas d'un réseau d'alimentation en eau qui traite ou désinfecte l'eau mais qui ne comporte pas d'installations de redésinfection, est située en aval du dernier endroit où l'eau est traitée ou désinfectée;

b) dans le cas d'un réseau d'alimentation en eau qui traite ou désinfecte l'eau et qui comporte des installations de redésinfection, est située en aval du dernier endroit où l'eau est désinfectée ou redésinfectée avant qu'elle parvienne au premier utilisateur du réseau;

c) dans le cas d'un réseau semi-public d'alimentation en eau qui ne traite ni ne désinfecte l'eau, est située en aval du puits constituant la source ou le point d'entrée de l'eau qui alimente le réseau. ("water distribution system")

« **UTN** » Unité de turbidité néphélométrique. ("NTU")

DRINKING WATER
QUALITY STANDARDS

Drinking water quality standards

2 The standards specified in sections 3 to 6 are drinking water quality standards for the purposes of the Act.

BACTERIOLOGICAL STANDARDS

Bacteriological standards

3(1) Every public water supplier and semi-public water supplier must ensure that all water in the water distribution system meets the following bacteriological standards:

(a) less than one *E. coli* detectable per 100 ml;

NORMES DE QUALITÉ
DE L'EAU POTABLE

Normes de qualité de l'eau potable

2 Les normes énoncées aux articles 3 à 6 constituent les normes de qualité de l'eau potable pour l'application de la *Loi*.

NORMES BACTÉRIOLOGIQUES

Normes bactériologiques

3(1) Le fournisseur d'un service d'eau public ou semi-public voit à ce que toute l'eau du système de distribution respecte les normes bactériologiques suivantes :

a) la concentration de bactéries *E. coli* détectables est inférieure à une par 100 ml d'eau;

(b) less than one total coliform detectable per 100 ml;

(c) where membrane filtration analysis is the primary method to test the bacteriological safety of the water,

(i) background bacteria concentrations on a total coliform membrane filtration plate of less than 200 organisms per 100 ml, and

(ii) heterotrophic plate counts of less than 500 HPC colonies per ml.

Deemed compliance

3(2) If water in a water distribution system does not meet a standard specified in clause (1)(b) or (c), the water supplier is deemed to have complied with the standard if the water supplier takes the corrective action described in Schedule A for that standard.

Laboratory must give immediate notification

3(3) For greater certainty, nothing in subsection (2) affects the obligation under clause 22(2)(b) of the Act for a laboratory to give immediate notification where an analysis indicates that a sample does not meet a drinking water quality standard.

Multiple positive samples or high readings

3(4) Subsection (2) does not apply

(a) if any sample has a concentration of total coliform greater than 10 total coliform per 100 ml;

(b) if consecutive samples taken from the same point in the water distribution system test positive for total coliform; or

(c) if the number of samples taken in a four-week period or in a month

(i) is 10 or more, and analyses show that more than 10% of the samples test positive for total coliform, or

b) la concentration de coliformes totaux détectables est inférieure à un par 100 ml d'eau;

c) si l'analyse par filtration sur membrane constitue la principale méthode de vérification de la qualité bactériologique de l'eau :

(i) la concentration de bactéries de fond présentes sur une plaque de filtration sur membrane de coliformes totaux est inférieure à 200 organismes par 100 ml d'eau,

(ii) le dénombrement sur plaque des bactéries hétérotrophes donne moins de 500 colonies par ml d'eau.

Présomption de respect d'une norme

3(2) Même si l'eau d'un système de distribution n'est pas conforme à une norme précisée à l'alinéa (1)b) ou c), le fournisseur d'un service d'eau est réputé respecter la norme en question s'il prend les mesures correctives applicables indiquées à l'annexe A.

Communication immédiate par le laboratoire

3(3) Il est entendu que le paragraphe (2) n'a aucun effet sur l'obligation qu'a un laboratoire en vertu de l'alinéa 22(2)b) de la *Loi* de transmettre sans tarder un avis si une analyse révèle qu'un échantillon ne respecte pas une norme de qualité de l'eau potable.

Plusieurs échantillons positifs ou concentrations élevées

3(4) Le paragraphe (2) ne s'applique pas si, selon le cas :

a) un échantillon a une concentration de coliformes totaux supérieure à 10 par 100 ml d'eau;

b) des échantillons consécutifs prélevés au même point dans le système de distribution d'eau contiennent des coliformes totaux;

c) le nombre d'échantillons prélevés au cours d'une période de quatre semaines ou d'un mois :

(i) soit est d'au moins 10 et plus de 10 % de ceux-ci contiennent des coliformes totaux,

(ii) is fewer than 10, and analyses show that two or more samples test positive for total coliform.

Corrective action sampling not to be considered 3(5) Samples taken during corrective action pursuant to Schedule A that test positive for total coliform are not to be considered samples for the purpose of clauses (4)(b) and (c).

(ii) soit est inférieur à 10 et au moins d'eux d'entre eux contiennent des coliformes totaux.

Échantillons prélevés pendant les mesures correctives

3(5) Les échantillons qui sont prélevés pendant l'application de mesures correctives conformes à l'annexe A et qui contiennent des coliformes totaux ne sont pas considérés comme des échantillons au sens des alinéas (4)b) et c).

MICROBIAL STANDARDS

Public water systems: microbial standards

4(1) A public water supplier in relation to a water system that uses surface water or GUDI as its water supply source must ensure that it has in place, and maintains in effective working order, filtration and disinfection equipment and controls designed to ensure that all water entering the water distribution system meets the following microbial standards:

(a) reduction or inactivation of 99.9% of *Cryptosporidium* oocysts and *Giardia lamblia* cysts;

(b) reduction or inactivation of 99.99% of viruses.

Variation of *Cryptosporidium* standard: high quality water

4(2) Despite clause (1)(a), if the director is of the opinion that the chance of *Cryptosporidium* oocysts entering a water distribution system is remote due to the high quality of the water supply, the director may vary the standard in clause (1)(a) for a water system to a 99% reduction or inactivation of *Cryptosporidium* oocysts.

NORMES MICROBIENNES

Normes microbiennes pour les réseaux publics d'alimentation en eau

4(1) Le fournisseur d'un service d'eau public dont la source d'approvisionnement est de l'eau de surface ou de l'ESSID installé et conserve en bon état de marche de l'équipement de filtration et de désinfection ainsi que des dispositifs de contrôle conçus de telle sorte que toute l'eau qui entre dans le système de distribution respecte les normes microbiennes suivantes :

a) réduction ou inactivation de 99,9 % des oocystes de *Cryptosporidium* et des kystes de *Giardia lamblia*;

b) réduction ou inactivation de 99,99 % des virus.

Modification de la norme relative aux oocystes de *Cryptosporidium* — grande qualité de l'eau

4(2) Malgré l'alinéa (1)a), s'il estime qu'il y a très peu de risques que des oocystes de *Cryptosporidium* entrent dans un système de distribution d'eau en raison de la grande qualité de la source d'approvisionnement, le directeur peut, à l'égard d'un réseau d'alimentation en eau, fixer à 99 % la norme prévue à cet alinéa concernant la réduction ou l'inactivation des oocystes de *Cryptosporidium*.

Variation of *Cryptosporidium* standard: low quality water

4(3) Despite clause (1)(a), if the director is of the opinion, based on source water quality monitoring data, that elevated concentrations of *Cryptosporidium* oocysts exist in the water supply source, the director may vary the standard in clause (1)(a) for a water system, in relation to *Cryptosporidium*, to a higher percentage.

Variation must be in operating licence

4(4) A variation under subsection (2) or (3) is not valid unless it is included in the operating licence for the water system.

Deemed compliance

4(5) If water entering a water distribution system does not meet a standard referred to in subsections (1) to (3), the water supplier is deemed to have complied with the standard if the water supplier takes the corrective action described in Schedule C for that standard.

Laboratory must give immediate notification

4(6) For greater certainty, nothing in subsection (5) affects the obligation under clause 22(2)(b) of the Act for a laboratory to give immediate notification where an analysis indicates that a sample does not meet a drinking water quality standard.

Semi-public water systems: microbial standards

4(7) A semi-public water supplier must ensure that all water in the water system meets every microbial standard that may be specified in the operating licence for the water system.

Modification de la norme relative aux oocystes de *Cryptosporidium* — faible qualité de l'eau

4(3) Malgré l'alinéa (1)a), s'il estime, en fonction de données de contrôle de la qualité de l'eau, qu'il existe des concentrations élevées d'oocystes de *Cryptosporidium* dans la source d'approvisionnement, le directeur peut, à l'égard d'un réseau d'alimentation en eau, rendre plus rigoureuse la norme prévue à cet alinéa concernant les oocystes de *Cryptosporidium*.

Modification incluse dans la licence d'exploitation

4(4) La modification visée au paragraphe (2) ou (3) n'est valide que si elle est incluse dans la licence d'exploitation du réseau d'alimentation en eau.

Présomption de respect d'une norme

4(5) Même si l'eau d'un système de distribution n'est pas conforme à une norme mentionnée aux paragraphes (1) à (3), le fournisseur d'un service d'eau est réputé respecter la norme en question s'il prend les mesures correctives applicables indiquées à l'annexe C.

Communication immédiate par le laboratoire

4(6) Il est entendu que le paragraphe (5) n'a aucun effet sur l'obligation qu'a un laboratoire en vertu de l'alinéa 22(2)b) de la *Loi* de transmettre sans tarder un avis si une analyse révèle qu'un échantillon ne respecte pas une norme de qualité de l'eau potable.

Normes microbiennes pour les réseaux semi-publics d'alimentation en eau

4(7) Le fournisseur d'un service d'eau semi-public veille à ce que toute l'eau du réseau d'alimentation respecte chacune des normes microbiennes précisées dans la licence d'exploitation du réseau.

CHEMICAL AND
RADIOLOGICAL STANDARDS

Public water systems: chemical and radiological standards

5(1) A public water supplier must ensure that all water in the water distribution system meets

(a) each chemical standard specified in Schedule B that applies to the water system; and

(b) the additional chemical standards, or radiological standards, if any, specified in the operating licence for the water system.

Deemed compliance

5(2) Despite subsection (1), if water in a water distribution system does not meet a standard referred to in that subsection, the water supplier is deemed to have complied with the standard if the water supplier takes the corrective action described in Schedule C for that standard.

Laboratory must give immediate notification

5(3) For greater certainty, nothing in subsection (2) affects the obligation under clause 22(2)(b) of the Act for a laboratory to give immediate notification where an analysis indicates that a sample does not meet a drinking water quality standard.

Semi-public water systems: chemical and radiological standards

5(4) A semi-public water supplier must ensure that all water in the water system meets every chemical and radiological standard that may be specified in the operating licence for the water system.

NORMES CHIMIQUES ET RADIOLOGIQUES

Normes chimiques et radiologiques pour les réseaux publics d'alimentation en eau

5(1) Le fournisseur d'un service d'eau public veille à ce que toute l'eau du système de distribution respecte :

a) chacune des normes chimiques applicables indiquées à l'annexe B;

b) les autres normes chimiques ou, le cas échéant, les normes radiologiques précisées dans la licence d'exploitation du réseau d'alimentation en eau.

Présomption de respect d'une norme

5(2) Malgré le paragraphe (1), même si l'eau d'un système de distribution n'est pas conforme à une norme mentionnée dans ce paragraphe, le fournisseur d'un service d'eau est réputé respecter la norme en question s'il prend les mesures correctives applicables indiquées à l'annexe C.

Communication immédiate par le laboratoire

5(3) Il est entendu que le paragraphe (2) n'a aucun effet sur l'obligation qu'a un laboratoire en vertu de l'alinéa 22(2)(b) de la *Loi* de transmettre sans tarder un avis si une analyse révèle qu'un échantillon ne respecte pas une norme de qualité de l'eau potable.

Normes chimiques et radiologiques pour les réseaux semi-publics d'alimentation en eau

5(4) Le fournisseur d'un service d'eau semi-public veille à ce que toute l'eau du réseau d'alimentation respecte chacune des normes chimiques ou radiologiques précisées dans la licence d'exploitation du réseau.

PHYSICAL STANDARDS

NORMES PHYSIQUES

Public water systems: physical standards

6(1) A public water supplier in relation to a water system that uses surface water or GUDI as its water supply source must ensure that all water entering the treated water reservoir, and at each other location in the water system as may be specified in the operating licence for the system, meets the following physical standards:

(a) in the case of a water treatment plant employing chemically assisted filtration, water turbidity levels must

(i) be less than or equal to 0.3 NTU in at least 95% of the measurements made in a month,

(ii) be less than or equal to 0.3 NTU at least 95% of the time in a month,

(iii) not exceed 0.3 NTU for more than 12 consecutive hours, and

(iv) not exceed 1.0 NTU at any time;

(b) in the case of a water treatment plant employing membrane filtration, water turbidity levels must

(i) be less than or equal to 0.1 NTU in at least 99% of the measurements made in a month,

(ii) be less than or equal to 0.1 NTU at least 99% of the time in a month, and

(iii) not exceed 0.3 NTU at any time;

(c) in the case of slow sand filtration or diatomaceous earth filtration, water turbidity levels must

(i) be less than or equal to 1.0 NTU in at least 95% of the measurements made in a month,

(ii) be less than or equal to 1.0 NTU at least 95% of the time in a month,

(iii) not exceed 1.0 NTU for more than 12 consecutive hours, and

Normes physiques pour les réseaux publics d'alimentation en eau

6(1) Le fournisseur d'un service d'eau public dont la source d'approvisionnement est de l'eau de surface ou de l'ESSID veille à ce que toute l'eau qui entre dans le réservoir d'eau traité et à tout autre endroit du réseau d'alimentation en eau que précise la licence d'exploitation du réseau respecte les normes physiques suivantes :

a) dans le cas d'une station de traitement qui utilise la filtration chimique, le niveau de turbidité de l'eau :

(i) est d'au plus 0,3 UTN dans au moins 95 % des analyses effectuées au cours d'un mois,

(ii) est d'au plus 0,3 UTN au moins 95 % du temps au cours d'un mois,

(iii) ne dépasse pas 0,3 UTN pendant plus de 12 heures consécutives,

(iv) ne dépasse jamais 1,0 UTN;

b) dans le cas d'une station de traitement qui utilise la filtration sur membrane, le niveau de turbidité de l'eau :

(i) est d'au plus 0,1 UTN dans au moins 99 % des analyses effectuées au cours d'un mois,

(ii) est d'au plus 0,1 UTN au moins 99 % du temps au cours d'un mois,

(iii) ne dépasse jamais 0,3 UTN;

c) dans le cas d'une station qui utilise la filtration lente sur sable ou la filtration sur diatomées, le niveau de turbidité de l'eau :

(i) est d'au plus 1,0 UTN dans au moins 95 % des analyses effectuées au cours d'un mois,

(ii) est d'au plus 1,0 UTN au moins 95 % du temps au cours d'un mois,

(iii) ne dépasse pas 1,0 UTN pendant plus de 12 heures consécutives,

(iv) not exceed 3.0 NTU at any time;

(d) in the case of a filtration technology other than one mentioned in clause (a), (b) or (c), pilot studies, or equivalent studies from other jurisdictions, must demonstrate to the satisfaction of the director that, when used in combination with disinfection, the filtration technology is able to meet the physical standards specified by the director and the microbial standards referred to in subsections 4(1) to (3).

Deemed compliance

6(2) Despite subsection (1), if water in a water system does not meet a standard referred to in that subsection, the water supplier is deemed to have complied with the standard if the water supplier takes the corrective action described in Schedule C for that standard.

Alternative requirements for systems with a high quality water source

6(3) Despite subsection (1), a public water supplier in relation to a water system that uses surface water or GUDI as its water supply source is not subject to the standards specified in that subsection, if the following are satisfied:

(a) subject to clause (c), microbial reduction or inactivation is met by the use of two or more disinfection methods, which reliably achieve the following reduction or inactivation rates in the water supply:

(i) 99% reduction or inactivation of *Cryptosporidium* oocysts,

(ii) 99.9% reduction or inactivation of *Giardia lamblia* cysts,

(iii) 99.99% reduction or inactivation of viruses;

(iv) ne dépasse jamais 3,0 UTN;

d) dans le cas d'une station qui utilise une technique de filtration autre que celles indiquées aux alinéas a), b) et c), des études pilotes ou équivalentes employées dans le territoire d'autres autorités législatives montrent d'une manière jugée satisfaisante par le directeur que, lorsqu'elle est combinée à la désinfection, la technique en question permet de respecter les normes physiques précisées par le directeur et les normes microbiennes indiquées aux paragraphes 4(1) à (3).

Présomption de respect d'une norme

6(2) Malgré le paragraphe (1), même si l'eau d'un réseau d'alimentation en eau n'est pas conforme à une norme indiquée dans ce paragraphe, le fournisseur d'un service d'eau est réputé respecter la norme en question s'il prend les mesures correctives applicables indiquées à l'annexe C.

Exigences applicables aux réseaux ayant une source d'approvisionnement en eau de grande qualité

6(3) Malgré le paragraphe (1), le fournisseur d'un service d'eau public dont la source d'approvisionnement est de l'eau de surface ou de l'ESSID n'est pas tenu de respecter les normes indiquées à ce paragraphe si les conditions suivantes sont remplies :

a) sous réserve de l'alinéa c), la réduction ou l'inactivation des microbes est effectuée à l'aide d'au moins deux méthodes de désinfection qui permettent d'obtenir de façon constante les taux de réduction ou d'inactivation suivants dans la source d'approvisionnement :

(i) réduction ou inactivation de 99 % des oocystes de *Cryptosporidium*,

(ii) réduction ou inactivation de 99,9 % des kystes de *Giardia lamblia*,

(iii) réduction ou inactivation de 99,99 % des virus;

(b) background levels of *Cryptosporidium* oocysts and *Giardia lamblia* cysts in the water supply source are established by monitoring at least once every three months, and more frequently during periods of high water levels due to spring runoff, heavy precipitation events or flooding;

(c) monitoring under clause (b) indicates that mean water supply source concentrations of combined oocysts and cysts are not greater than 1 oocyst or cyst per 100 L of water, and disinfection reliably exceeds the reduction or inactivation rates in the water supply specified in clause (a);

(d) before the point where disinfectant is applied,

(i) the concentration of *E. coli* in the water supply does not exceed 20 organisms per 100 ml of water, or

(ii) if data on the concentration of *E. coli* is unavailable, the total coliform concentration does not exceed 100 organisms per 100 ml of water,

in at least 90% of the weekly samples from the previous six-month period;

(e) before the point where disinfectant is applied, average daily turbidity levels in the water supply, measured at equal intervals at least once every four hours, are less than 1.0 NTU, and do not exceed 5.0 NTU for more than two days in a 12-month period;

(f) to minimize the potential for fecal contamination of the water supply source, a watershed control program acceptable to the director is maintained, that controls discharges of pollutants in the watershed, and includes other measures to protect the watershed.

b) la teneur de fond des oocystes de *Cryptosporidium* et des kystes de *Giardia lamblia* dans la source d'approvisionnement en eau est établie par des contrôles effectués au moins une fois tous les trois mois ou plus fréquemment durant les périodes de crue des eaux à la fonte des neiges du printemps et à la suite de fortes averses ou d'inondations;

c) le contrôle visé à l'alinéa b) indique que la concentration moyenne combinée d'oocystes et de kystes dans la source d'approvisionnement en eau n'est pas supérieure à 1 oocyste ou kyste par 100 L d'eau et la désinfection excède de façon constante les taux de réduction ou d'inactivation indiqués à l'alinéa a);

d) dans au moins 90 % des échantillons prélevés chaque semaine depuis six mois avant le point de désinfection :

(i) soit la concentration de bactéries *E. coli* dans la source d'approvisionnement n'a pas dépassé 20 organismes par 100 ml d'eau,

(ii) soit, s'il est impossible d'obtenir des données sur la concentration de bactéries *E. coli*, la concentration de coliformes totaux n'a pas dépassé 100 organismes par 100 ml d'eau;

e) le niveau de turbidité quotidien moyen de la source d'approvisionnement, mesuré avant le point de désinfection à des intervalles réguliers n'excédant pas quatre heures, est inférieur à 1,0 UTN et n'a pas dépassé 5,0 UTN pendant plus de deux jours depuis douze mois;

f) afin de réduire au minimum les risques de contamination fécale de la source d'approvisionnement en eau, un programme de contrôle du bassin-versant jugé acceptable par le directeur qui vise à empêcher le déversement de polluants et qui comprend d'autres mesures de protection est en vigueur.

Alternative requirements — GUDI

6(4) Despite subsection (1), a public water supplier in relation to a water system that uses GUDI as its water supply source is not subject to the standards specified in that subsection if

- (a) the director is of the opinion that the turbidity of the water supply is primarily due to inorganic materials and does not present a health risk to users of the water system; and
- (b) the operating licence specifies the varied drinking water quality standards for water turbidity for the water system.

Semi-public water systems: physical standards

6(5) A semi-public water supplier must ensure that water entering the water system meets any drinking water quality standards for water turbidity that may be specified in the operating licence for the water system.

Guidelines for Canadian Drinking Water Quality

7(1) Subject to subsection (2), a standard specified in an operating licence and referred to in

- (a) subsection 4(7);
- (b) clause 5(1)(b);
- (c) subsection 5(4); or
- (d) subsection 6(5);

must be consistent with the guideline, if any, for that parameter contained in the latest edition of the *Guidelines for Canadian Drinking Water Quality*, published by Health Canada.

Medical officer may recommend varied standard

7(2) A standard that is inconsistent with the guidelines referred to in subsection (1) may be specified in an operating licence only if it is recommended by a medical officer.

Autres exigences — Essid

6(4) Malgré le paragraphe (1), le fournisseur d'un service d'eau public dont la source d'approvisionnement est de l'ESSID n'est pas tenu de respecter les normes indiquées à ce paragraphe si les conditions suivantes sont remplies :

- a) le directeur est d'avis que la turbidité de la source d'approvisionnement est principalement attribuable à des matières inorganiques et ne présente pas un risque pour la santé des utilisateurs du réseau d'alimentation en eau;
- b) la licence d'exploitation précise les normes de qualité de l'eau potable modifiées concernant la turbidité et applicables au réseau d'alimentation en eau.

Normes physiques pour les réseaux semi-publics d'alimentation en eau

6(5) Le fournisseur d'un service d'eau semi-public veille à ce que l'eau qui entre dans le réseau d'alimentation respecte les normes de qualité de l'eau potable concernant la turbidité qui peuvent être précisées dans la licence d'exploitation du réseau.

Recommandations pour la qualité de l'eau potable au Canada

7(1) Sous réserve du paragraphe (2), les normes précisées dans la licence d'exploitation et mentionnées dans les dispositions indiquées ci-dessous doivent être compatibles avec la recommandation relative aux mêmes paramètres et figurant dans la plus récente version du document intitulé *Recommandations pour la qualité de l'eau potable au Canada*, publié par Santé Canada :

- a) le paragraphe 4(7);
- b) l'alinéa 5(1)b);
- c) le paragraphe 5(4);
- d) le paragraphe 6(5).

Recommandation de normes différentes

7(2) Des normes incompatibles avec les recommandations visées au paragraphe (1) peuvent faire partie d'une licence d'exploitation seulement sur la recommandation d'un médecin hygiéniste.

TRANSITIONAL,
TIME TO COMPLY AND
COMING INTO FORCE

Compliance date for microbial, chemical, radiological and physical standards

8(1) Despite sections 4 to 6, and unless otherwise specified in the

- (a) operating licence; or
- (b) certificate for the operation of a public water system issued under the *Water Works, Sewerage and Sewage Disposal Regulation*, Manitoba Regulation 331/88 R;

for a water system, a water supplier need not comply with the drinking water quality standards referred to in those sections until the day that is five years after the day this regulation comes into force.

Sampling requirements not affected

8(2) Nothing in this section affects any requirement that a water supplier has under the *Drinking Water Safety Regulation* to collect water samples and submit them to a laboratory to be analyzed for compliance with the standards referred to in subsection (1), beginning immediately on the coming into force of that regulation.

Compliance plans: public water supplier

9(1) A public water supplier must submit to the director, for his or her approval, a plan that details how the water supplier will, on and after the compliance date, comply with

- (a) the microbial standards referred to in subsections 4(1) to (3), if they apply to the water system;
- (b) each chemical standard specified in Schedule B that applies to the water system;
- (c) each additional chemical standard, or each radiological standard, if any, specified in the operating licence for the water system; and
- (d) each physical standard referred to in subsection 6(1) or (4) that applies to the water system.

DISPOSITIONS TRANSITOIRES,
DÉLAI ACCORDÉ POUR LE RESPECT
DES NORMES ET ENTRÉE EN VIGUEUR

Date limite pour le respect des normes microbiennes, chimiques, radiologiques et physiques

8(1) Malgré les articles 4 à 6 et sauf indication contraire de la licence d'exploitation d'un réseau d'alimentation en eau ou du certificat d'exploitation d'un réseau public d'approvisionnement en eau délivré en vertu du *Règlement sur les ouvrages de purification de l'eau, les systèmes d'égouts et l'évacuation des eaux usées*, le fournisseur d'un service d'eau n'est tenu de respecter les normes de qualité de l'eau potable mentionnées dans ces articles qu'après un délai de cinq ans suivant la date d'entrée en vigueur du présent règlement.

Application de l'obligation de prélever des échantillons

8(2) Le présent article n'a aucun effet sur l'obligation qu'a le fournisseur d'un service d'eau, en vertu du *Règlement sur la qualité de l'eau potable*, de prélever des échantillons d'eau et de les remettre à un laboratoire chargé de les analyser pour vérifier le respect des normes visées au paragraphe (1) dès l'entrée en vigueur de ce règlement.

Plans relatifs au respect des normes — fournisseur d'un service d'eau public

9(1) Le fournisseur d'un service d'eau public soumet à l'approbation du directeur un plan détaillé de ce qu'il compte faire, à partir de la date limite, pour respecter :

- a) les normes microbiennes visées aux paragraphes 4(1) à (3), si elles s'appliquent au réseau d'alimentation en eau;
- b) chacune des normes chimiques applicables précisées à l'annexe B;
- c) chacune des autres normes chimiques ou, le cas échéant, des normes radiologiques précisées dans la licence d'exploitation du réseau d'alimentation en eau;
- d) chacune des normes physiques applicables visées au paragraphe 6(1) ou (4).

Date compliance plans required

9(2) The plan must be submitted to the director, in a form satisfactory to him or her,

(a) if the water system serves no more than 5,000 individuals, within 18 months after the day on which the operating licence for the water system is issued;

(b) if the water system serves 5,001 to 10,000 individuals, within 12 months after the day on which the operating licence for the water system is issued; or

(c) if the water system serves more than 10,000 individuals, within six months after the day on which the operating licence for the water system is issued.

Compliance plans: semi-public water supplier

10 If the operating licence for a semi-public water system requires the water supplier to submit to the director, for the director's approval, a plan that details how the supplier will comply with the drinking water quality standards that apply to the system, the water supplier must do so, in the manner and by the date required in the licence.

Coming into force

11 This regulation comes into force on the same day that subsections 8(1), (3), (4) and (5) and sections 3, 7, 9, 10, 20 to 25 and 30 of *The Drinking Water Safety Act*, S.M. 2002, c. 36, come into force.

Délai pour la présentation des plans

9(2) Le plan est soumis au directeur, en la forme que celui-ci estime acceptable :

a) dans les 18 mois suivant la date de délivrance de la licence d'exploitation, si le réseau d'alimentation en eau approvisionne 5 000 personnes ou moins;

b) dans les 12 mois suivant la date de délivrance de la licence d'exploitation, si le réseau d'alimentation en eau approvisionne de 5 001 à 10 000 personnes;

c) dans les six mois suivant la date de délivrance de la licence d'exploitation, si le réseau d'alimentation en eau approvisionne plus de 10 000 personnes.

Plans relatifs au respect des normes — fournisseur d'un service d'eau semi-public

10 Si la licence d'exploitation d'un réseau semi-public d'alimentation en eau exige que le fournisseur d'un service d'eau soumette à l'approbation du directeur un plan détaillé de ce qu'il compte faire pour respecter les normes de qualité de l'eau potable applicables au réseau, le fournisseur le fait en observant les modalités de temps et autres que précise la licence.

Entrée en vigueur

11 Le présent règlement entre en vigueur en même temps que les paragraphes 8(1), (3), (4) et (5) ainsi que les articles 3, 7, 9, 10, 20 à 25 et 30 de la *Loi sur la qualité de l'eau potable*, c. 36 des *L.M. 2002*.

SCHEDULE A
(Subsection 3(2))

CORRECTIVE ACTION
FOR FAILURE TO COMPLY WITH A
BACTERIOLOGICAL STANDARD

DEFINITIONS

Definitions

1 The following definitions apply in this Schedule.

"**background bacteria standard**" means the standard specified in subclause 3(1)(c)(i) of the regulation. (« norme relative aux bactéries de fond »)

"**high reading**" means a sample described in clause 3(4)(a) of the regulation. (« concentration élevée »)

"**HPC standard**" means the standard specified in subclause 3(1)(c)(ii) of the regulation. (« norme relative au DBH »)

"**multiple positive samples**" means samples described in clause 3(4)(b) or (c) of the regulation. (« plusieurs échantillons positifs »)

"**sanitary survey**" means an on-site review of the following in relation to a water system:

- (a) its water supply source;
- (b) possible sources of contamination of its water supply;
- (c) its facilities and equipment;
- (d) policies and procedures relating to its operation, monitoring and maintenance;

for the purpose of evaluating the adequacy of the water supply source, the water system and its operation. (« inspection sanitaire »)

"**total coliform standard**" means the standard specified in clause 3(1)(b) of the regulation. (« norme relative aux coliformes totaux »)

TOTAL COLIFORM

Corrective action for total coliform levels

2 If total coliform levels do not meet the total coliform standard, but no E. coli, high readings or multiple positive samples have been detected, the corrective action that a water supplier must take under subsection 3(2) of the regulation is as described in sections 3 to 5.

Disinfected public or semi-public water system with a water distribution system

3(1) The corrective action that a water supplier must take for a disinfected public or semi-public water system with a water distribution system is as follows:

(a) verify that the required disinfectant residual is present throughout the water distribution system and if not present, increase disinfectant level as necessary;

(b) retest at each sampling site where total coliform levels did not meet the standard, as soon as possible after confirming acceptable levels of disinfectant residuals and, where appropriate, turbidity;

(c) continue testing at each site that did not meet the standard until samples taken on two consecutive days (or as close thereto as possible in a remote area given the available transportation for shipping samples) are negative; depending on the results of the continued testing, consideration must also be given, by the operator, to taking samples during the same time period from test sites adjacent to each of the non-compliant sites; at a minimum, this includes at least one site upstream and one site downstream of each non-compliant site, and the finished water from the treatment plant as it enters the water distribution system;

(d) if the total coliform levels found in any sample taken under clause (b) or (c) do not meet the total coliform standard, but no *E. coli*, high readings or multiple positive samples have been detected, notify a drinking water officer of the result as soon as possible after the positive result is received; then, unless otherwise directed by a drinking water officer or medical officer, do at least one of the following, as the water supplier considers appropriate for the water system:

(i) flush the impacted water lines using unidirectional flushing methods,

(ii) clean impacted reservoirs and tanks,

(iii) evaluate the water treatment process and water distribution system to identify problem areas,

(iv) implement improvements and changes to correct the problem, based on the evaluation of the source water, water treatment process and water distribution system,

then, continue testing in accordance with clause (c);

(e) if, after taking action under clause (d), total coliform levels in any sample do not meet the total coliform standard, but no *E. coli*, high readings or multiple positive samples have been detected, notify a drinking water officer of the result as soon as possible after it is received. Take such further corrective action as a drinking water officer or medical officer may direct.

Action if *E. coli*, a high reading or multiple positive samples detected

3(2) If, during a test under subsection (1), *E. coli*, a high reading or multiple positive samples are detected, the water supplier must immediately notify a drinking water officer and take such action as a drinking water officer or medical officer may direct.

Non-compliant site not to be eliminated from future sampling

3(3) Unless otherwise approved by a drinking water officer, a water supplier must not eliminate from future sampling a site from which a sample has been taken that does not meet the standard, until negative samples have been obtained in at least two consecutive regularly scheduled samplings.

Disinfected semi-public water system with no water distribution system

4(1) The corrective action that a water supplier must take for a disinfected semi-public water system with no water distribution system is as follows:

(a) retest immediately; if total coliform levels in the retest do not meet the total coliform standard, but no *E. coli*, high readings or multiple positive samples have been detected,

(i) provide only boiled water or an alternative safe source of water until the water supply meets the bacteriological standards set out in this regulation, and

(ii) as soon as possible,

(A) conduct a sanitary survey and correct any identified faults,

(B) upon completion of the sanitary survey, verify that the required disinfectant residual is present throughout the plumbing system and if not present, increase disinfectant level as necessary,

(C) flush the system thoroughly and retest to confirm water safety,

(D) if the sample on retest does not contain *E. coli* and meets the total coliform standard, conduct a second retest of the water system, and

(E) if the sample in the second retest does not contain *E. coli* and meets the total coliform standard, resume normal use of the water supply and conduct a follow-up test within 4 to 6 weeks after the second retest to ensure that contamination has not recurred;

(b) if any of the retests done as required in paragraph (C), (D) or (E) of subclause (a)(ii) show a total coliform level that does not meet the total coliform standard, but no *E. coli*, high readings or multiple positive samples have been detected, notify a drinking water officer as soon as possible and take such corrective action as a drinking water officer or medical officer may direct.

Action if *E. coli*, a high reading or multiple positive samples detected

4(2) If, during a test under subsection (1), *E. coli*, a high reading or multiple positive samples are detected, the water supplier must immediately notify a drinking water officer and take such action as a drinking water officer or medical officer may direct.

Semi-public water system with a non-disinfected well:

5(1) The corrective action that a water supplier must take for a semi-public water system with a non-disinfected well is as follows:

(a) retest immediately; if total coliform levels in the retest do not meet the total coliform standard, but no *E. coli*, high readings or multiple positive samples have been detected,

(i) provide only boiled water or an alternative safe source of water until the water supply meets the bacteriological standards set out in this regulation, and

(ii) as soon as possible,

(A) conduct a sanitary survey and correct any identified faults,

(B) upon completion of the sanitary survey and correction of any identified faults, shock chlorinate the well and plumbing system,

(C) flush the system thoroughly and retest to confirm water safety, no sooner than 48 hours after confirmatory tests indicate the absence of a chlorine residual, or 5 days after the well has been shock chlorinated,

(D) if the sample on retest does not contain *E. coli* and meets the total coliform standard, conduct a second retest of the well water, and

(E) if the sample in the second retest does not contain *E. coli*, and meets the total coliform standard, resume normal use of the water supply and conduct a follow-up test within 4 to 6 weeks after the second retest to ensure that contamination has not recurred;

(b) if any of the retests done under paragraph (C), (D) or (E) of subclause (a)(ii) show a total coliform level that does not meet the total coliform standard, but no *E. coli*, high readings or multiple positive samples have been detected, notify a drinking water officer as soon as possible and take such corrective action as a drinking water officer or medical officer may direct.

Action if *E. coli*, a high reading or multiple positive samples detected

5(2) If, during a test under subsection (1), *E. coli*, a high reading or multiple positive samples are detected, the water supplier must immediately notify a drinking water officer and take such action as a drinking water officer or medical officer may direct.

**BACKGROUND BACTERIA WHERE MEMBRANE FILTRATION
IS THE PRIMARY METHOD OF TESTING**

Corrective action for background bacteria levels

6(1) If background bacteria levels do not meet the background bacteria standard, but no *E. coli*, high readings or multiple positive samples have been detected and the total coliform standard is met, the corrective action that a water supplier must take under subsection 3(2) of the regulation is as described in sections 7 to 9.

Application of sections 6 to 9

6(2) Sections 6 to 9 apply only if membrane filter analysis is the primary method to test the bacteriological safety of the water.

Disinfected public or semi-public water system with a water distribution system

7(1) The corrective action that a water supplier must take for a disinfected public or semi-public water system with a water distribution system is as follows:

(a) if no *E. coli*, high readings or multiple positive samples are detected but the background bacteria standard is not met, verify that the required disinfectant residual is present throughout the water distribution system and if not present, increase disinfectant level as necessary;

(b) retest immediately at each sampling site for bacteriological safety using a method accredited as a standard method for *E. coli* and total coliform testing, instead of membrane filtration analysis;

(c) retest at each sampling site where background bacteria levels did not meet the background bacteria standard, as soon as possible after confirming acceptable levels of disinfectant residuals and, where appropriate, turbidity;

(d) if the background bacteria level in any test done under clause (c) does not meet the background bacteria standard, but no *E. coli*, high readings or multiple positive samples have been detected and the total coliform standard is met, notify a drinking water officer of the result as soon as possible after it is received; then, unless otherwise directed by a drinking water officer or medical officer, do at least one of the following, as the water supplier considers appropriate for the water system:

- (i) flush the impacted water lines using unidirectional flushing methods,
- (ii) clean impacted reservoirs and tanks,
- (iii) evaluate the water treatment process and water distribution system to identify problem areas,
- (iv) implement improvements and changes to correct the problem, based on the evaluation of the source water, water treatment process and water distribution system,

then, continue testing in accordance with clause (c);

(e) if, after taking the action described in clause (d), the background bacteria level in any sample does not meet the background bacteria standard, but no *E. coli*, high readings or multiple positive samples are detected and the total coliform standard is met, notify a drinking water officer of the result as soon as possible after it is received; take such further corrective action as a drinking water officer or a medical officer may direct.

Action if *E. coli*, a high reading or multiple positive samples are detected

7(2) If, during a test under clause (1)(a), (c) or (d), *E. coli*, a high reading or multiple positive samples are detected, the water supplier must immediately notify a drinking water officer and take such action as a drinking water officer or medical officer may direct.

Action if total coliform standard not met

7(3) If, during a test under clause (1)(a), (c) or (d), the total coliform standard is not met but *E. coli*, a high reading or multiple positive samples are not detected, the water supplier must take the corrective action specified in section 3.

Non-compliant site not to be eliminated from future sampling

7(4) Unless otherwise approved by a drinking water officer, a water supplier must not eliminate from future sampling a site from which a sample has been taken that does not meet the background bacteria standard, until negative samples have been obtained in two consecutive regularly scheduled samplings.

Disinfected semi-public water system with no water distribution system

8(1) The corrective action that a water supplier must take for a disinfected semi-public water system with no water distribution system is as follows:

- (a) retest immediately at each sampling site for bacteriological safety using a method accredited as a standard method for *E. coli* and total coliform testing, instead of membrane filtration analysis;
- (b) if a sample does not meet the background bacteria standard, but no *E. coli*, high readings or multiple positive samples are detected and the total coliform standard is met, as soon as possible,
 - (i) conduct a sanitary survey and correct any identified faults,
 - (ii) upon completion of the sanitary survey, verify that the required disinfectant residual is present throughout the plumbing system and if not present, increase disinfectant level as necessary,
 - (iii) flush the system thoroughly and retest to confirm water safety,

(iv) if on the retest no E. coli, high readings or multiple positive samples are detected and the total coliform and background bacteria standards are met, conduct a second retest of the well water, and

(v) if on the second retest no E. coli, high readings or multiple positive samples are detected and the total coliform and background bacteria standards are met, resume normal use of the water supply and conduct a follow-up test within 4 to 6 weeks after the second retest to ensure that contamination has not recurred;

(c) if any retest under subclause (b)(iii), (iv) or (v) shows a background bacteria level that does not meet the background bacteria standard but no E. coli, high readings or multiple positive samples are detected and the total coliform standard is met, notify a drinking water officer of the result as soon as possible after it is received; take such further corrective action as a drinking water officer or a medical officer may direct.

Action if E. coli, a high reading or multiple positive samples are detected

8(2) If, during a test under clause (1)(a) or subclause (1)(b)(iii), (iv) or (v), E. coli, a high reading or multiple positive samples are detected, the water supplier must immediately notify a drinking water officer and take such action as a drinking water officer or medical officer may direct.

Action if total coliform standard not met

8(3) If, during a test under clause (1)(a) or subclause (1)(b)(iii), (iv) or (v), the total coliform standard is not met but E. coli, a high reading or multiple positive samples are not detected, the water supplier must take the corrective action specified in section 4.

Semi-public water system with a non-disinfected well

9(1) The corrective action that a water supplier must take for a semi-public water system with a non-disinfected well is as follows:

(a) retest immediately at each sampling site for bacteriological safety using a method accredited as a standard method for E. coli and total coliform testing, instead of membrane filtration analysis;

(b) if a sample does not meet the background bacteria standard, but no E. coli, high readings or multiple positive samples are detected and the total coliform standard is met, as soon as possible

(i) conduct a sanitary survey and correct any identified faults,

(ii) upon completion of the sanitary survey and correction of any identified faults, shock chlorinate the well and plumbing system,

(iii) flush the system thoroughly and retest to confirm water safety, no sooner than 48 hours after confirmatory tests indicate the absence of a chlorine residual, or 5 days after the well has been shock chlorinated,

(iv) if on retest no E. coli, high readings or multiple positive samples are detected and the total coliform and background bacteria standards are met, conduct a second retest of the well water, and

(v) if on the second retest no E. coli, high readings or multiple positive samples are detected and the total coliform and background bacteria standards are met, conduct a follow-up test within 4 to 6 weeks after the second retest to ensure that contamination has not recurred;

(c) if any retest under subclause (b)(iii), (iv) or (v) shows a background bacteria level that does not meet the background bacteria standard, but no E. coli, high readings or multiple positive samples have been detected and the total coliform standard is met, notify a drinking water officer as soon as possible and take such corrective action as a drinking water officer or medical officer may direct.

Action if E. coli, a high reading or multiple positive samples are detected

9(2) If, during a test under clause (1)(a) or subclause (1)(b)(iii), (iv) or (v), E. coli, a high reading or multiple positive samples are detected, the water supplier must immediately notify a drinking water officer and take such action as a drinking water officer or medical officer may direct.

Action if total coliform standard not met

9(3) If, during a test under clause (1)(a) or subclause (1)(b)(iii), (iv) or (v), the total coliform standard is not met but E. coli, a high reading or multiple positive samples are not detected, the water supplier must take the corrective action specified in section 5.

HETEROTROPHIC PLATE COUNTS WHERE MEMBRANE FILTRATION
IS THE PRIMARY METHOD OF TESTING

Corrective action for HPC

10(1) If a heterotrophic plate count does not meet the HPC standard, but no E. coli, high readings or multiple positive samples have been detected and the total coliform standard is met, the corrective action that a water supplier must take under subsection 3(2) of the regulation is as described in sections 11 to 13.

Application of sections 10 to 13

10(2) Sections 10 to 13 apply only if membrane filter analysis is the primary method to test the bacteriological safety of the water.

Disinfected public or semi-public water system with a water distribution system

11(1) The corrective action that a water supplier must take for a disinfected public or semi-public water system with a water distribution system is as follows:

(a) if no E. coli, high readings or multiple positive samples are detected but the HPC standard is not met, verify that the required disinfectant residual is present throughout the water distribution system and if not present, increase disinfectant level as necessary;

(b) retest immediately at each sampling site for bacteriological safety using a method accredited as a standard method for E. coli and total coliform testing, instead of membrane filtration analysis;

(c) retest at each sampling site where heterotrophic plate counts did not meet the HPC standard, as soon as possible after confirming acceptable levels of disinfectant residuals and, where appropriate, turbidity;

(d) if the heterotrophic plate count in any test done under clause (c) does not meet the HPC standard, but no E. coli, high readings or multiple positive samples have been detected and the total coliform standard is met, notify a drinking water officer of the result as soon as possible after it is received; then, unless otherwise directed by a drinking water officer or medical officer, do at least one of the following, as the water supplier considers appropriate for the water system:

(i) flush the impacted water lines using unidirectional flushing methods,

(ii) clean impacted reservoirs and tanks,

(iii) evaluate the water treatment process and water distribution system to identify problem areas,

(iv) implement improvements and changes to correct the problem, based on the evaluation of the source water, water treatment process and water distribution system,

then, continue testing in accordance with clause (c);

(e) if, after taking the action described in clause (d), the heterotrophic plate count in any sample does not meet the HPC standard, but no *E. coli*, high readings or multiple positive samples are detected and the total coliform standard is met, notify a drinking water officer of the result as soon as possible after it is received; take such further corrective action as a drinking water officer or a medical officer may direct.

Action if *E. coli*, a high reading or multiple positive samples are detected

11(2) If, during a test under clause (1)(a), (c) or (d), *E. coli*, a high reading or multiple positive samples are detected, the water supplier must immediately notify a drinking water officer and take such action as a drinking water officer or medical officer may direct.

Action if total coliform standard not met

11(3) If, during a test under clause (1)(a), (c) or (d), the total coliform standard is not met but *E. coli*, a high reading or multiple positive samples are not detected, the water supplier must take the corrective action specified in section 3.

Non-compliant site not to be eliminated from future sampling

11(4) Unless otherwise approved by a drinking water officer, a water supplier must not eliminate from future sampling a site from which a sample has been taken that does not meet the HPC standard, until negative samples have been obtained in two consecutive regularly scheduled samplings.

Disinfected semi-public water system with no water distribution system

12(1) The corrective action that a water supplier must take for a disinfected semi-public water system with no water distribution system is as follows:

(a) retest immediately at each sampling site for bacteriological safety using a method accredited as a standard method for *E. coli* and total coliform testing, instead of membrane filtration analysis;

(b) if a sample does not meet the HPC standard, but no *E. coli*, high readings or multiple positive samples are detected and the total coliform standard is met, as soon as possible,

(i) conduct a sanitary survey and correct any identified faults,

(ii) upon completion of the sanitary survey, verify that the required disinfectant residual is present throughout the plumbing system and if not present, increase disinfectant level as necessary,

(iii) flush the system thoroughly and retest,

(iv) if on retest no *E. coli*, high readings or multiple positive samples are detected and the total coliform and HPC standards are met, conduct a second retest of the well water, and

(v) if on the second retest no *E. coli*, high readings or multiple positive samples are detected and the total coliform and HPC standards are met, conduct follow-up tests as directed by a drinking water officer or a medical officer;

(c) if any retest under subclause (b)(iii), (iv) or (v) shows a heterotrophic plate count that does not meet the HPC standard but no *E. coli*, high readings or multiple positive samples are detected and the total coliform standard is met, notify a drinking water officer of the result as soon as possible after it is received; take such further corrective action as a drinking water officer or a medical officer may direct.

Action if *E. coli*, a high reading or multiple positive samples are detected

12(2) If, during a test under clause (1)(a) or subclause (1)(b)(iii), (iv) or (v), *E. coli*, a high reading or multiple positive samples are detected, the water supplier must immediately notify a drinking water officer and take such action as a drinking water officer or medical officer may direct.

Action if total coliform standard not met

12(3) If, during a test under clause (1)(a) or subclause (1)(b)(iii), (iv) or (v), the total coliform standard is not met but E. coli, a high reading or multiple positive samples are not detected, the water supplier must take the corrective action specified in section 4.

Semi-public water system with a non-disinfected well

13(1) The corrective action that a water supplier must take for a semi-public water system with a non-disinfected well is as follows:

- (a) retest immediately at each sampling site for bacteriological safety using a method accredited as a standard method for E. coli and total coliform testing, instead of membrane filtration analysis;
- (b) if a sample does not meet the HPC standard, but no E. coli, high readings or multiple positive samples are detected and the total coliform standard is met, as soon as possible,
 - (i) conduct a sanitary survey and correct any identified faults,
 - (ii) upon completion of the sanitary survey and correction of any identified faults, shock chlorinate the well and plumbing system,
 - (iii) flush the system thoroughly and retest to confirm water safety, no sooner than 48 hours after confirmatory tests indicate the absence of a chlorine residual, or 5 days after the well has been shock chlorinated,
 - (iv) if on retest no E. coli, high readings or multiple positive samples are detected and the total coliform and HPC standards are met, conduct a second retest of the well water, and
 - (v) if on the second retest no E. coli, high readings or multiple positive samples are detected and the total coliform and HPC standards are met, conduct a follow-up test within 4 to 6 weeks after the second retest to ensure that contamination has not recurred;
- (c) if any retest under subclause (b)(iii), (iv) or (v) shows a heterotrophic plate count that does not meet the HPC standard, but no E. coli, high readings or multiple positive samples have been detected and the total coliform standard is met, notify a drinking water officer as soon as possible and take such corrective action as a drinking water officer or medical officer may direct.

Action if E. coli, a high reading or multiple positive samples are detected

13(2) If, during a test under clause (1)(a) or subclause (1)(b)(iii), (iv) or (v), E. coli, a high reading or multiple positive samples are detected, the water supplier must immediately notify a drinking water officer and take such action as a drinking water officer or medical officer may direct.

Action if total coliform standard not met

13(3) If, during a test under clause (1)(a) or subclause (1)(b)(iii), (iv) or (v), the total coliform standard is not met but E. coli, a high reading or multiple positive samples are not detected, the water supplier must take the corrective action specified in section 5.

MORE THAN ONE BACTERIOLOGICAL
STANDARD NOT MET

Corrective action for total coliform supercedes other corrective action

14 If the result of any test taken under the regulation or this Schedule shows that the total coliform standard, plus one or both of the HPC standard and the background bacteria standard have not been met, the water supplier must take corrective action as specified in section 3, 4 or 5. This section does not apply if E. coli, a high reading or multiple positive samples have been detected.

Corrective action if background bacteria and HPC standards not met

15 If the result of any test taken under the regulation or this Schedule shows that both the HPC standard and the background bacteria standard have not been met, the water supplier must take corrective action as specified in section 3, 4 or 5. This section does not apply if E. coli, a high reading or multiple positive samples have been detected.

ANNEXE A
[paragraphe 3(2)]

MESURES CORRECTIVES
EN CAS DE NON-RESPECT
D'UNE NORME BACTÉRIOLOGIQUE

DÉFINITIONS

Définitions

1 Les définitions qui suivent s'appliquent à la présente annexe.

« **concentration élevée** » Échantillon visé à l'alinéa 3(4)a) du Règlement. ("high reading")

« **inspection sanitaire** » Examen de la source d'approvisionnement d'un réseau d'alimentation en eau, des sources possibles de contamination de la source d'approvisionnement, des installations et de l'équipement du réseau ainsi que des règles relatives à son exploitation, à sa surveillance et à son entretien, lequel examen est effectué sur place et permet d'évaluer si la source d'approvisionnement, le réseau et son exploitation sont appropriés. ("sanitary survey")

« **norme relative au DBH** » La norme précisée au sous-alinéa 3(1)c)(ii) du Règlement. ("HPC standard")

« **norme relative aux bactéries de fond** » La norme précisée au sous-alinéa 3(1)c)(i) du Règlement. ("background bacteria standard")

« **norme relative aux coliformes totaux** » La norme précisée à l'alinéa 3(1)b) du Règlement. ("total coliform standard")

« **plusieurs échantillons positifs** » Les échantillons visés à l'alinéa 3(4)b) ou c) du Règlement. ("multiple positive samples")

COLIFORMES TOTAUX

Mesures correctives pour les coliformes totaux

2 Si les coliformes totaux ne respectent pas la norme relative aux coliformes totaux mais que les analyses ne révèlent pas de bactérie *E. coli*, de concentration élevée ni plusieurs échantillons positifs, le fournisseur d'un service d'eau est tenu de prendre, en vertu du paragraphe 3(2) du Règlement, les mesures correctives indiquées aux articles 3 à 5.

Réseau public ou semi-public d'alimentation en eau désinfecté avec un système de distribution

3(1) Les mesures correctives que le fournisseur d'un service d'eau est tenu de prendre pour un réseau public ou semi-public d'alimentation en eau désinfecté qui est doté d'un système de distribution sont les suivantes :

a) vérifier si le désinfectant résiduel exigé est présent dans l'ensemble du système de distribution d'eau et, dans le cas contraire, ajouter la quantité de désinfectant nécessaire;

b) effectuer un nouveau contrôle à chaque point où les échantillons prélevés ne respectent pas la norme relative aux coliformes totaux dès que possible après qu'ont été confirmés les niveaux acceptables de désinfectant résiduel et, s'il y a lieu, de turbidité;

c) poursuivre les contrôles à chaque point où la norme n'est pas respectée jusqu'à l'obtention d'échantillons négatifs pendant deux jours consécutifs (ou une durée le plus semblable possible pour les régions éloignées, compte tenu des délais de transport des échantillons); selon les résultats des contrôles continus, l'exploitant doit envisager de prélever durant la même période des échantillons aux points adjacents à ceux où la norme n'est pas respectée, c'est-à-dire à au moins un point en aval et un point en amont, ainsi qu'à la sortie de la station de traitement, à savoir là où l'eau entre dans le système de distribution;

d) si les coliformes totaux détectés dans un échantillon prélevé conformément à l'alinéa b) ou c) ne respectent pas la norme mais que les analyses ne révèlent pas de bactérie *E. coli*, de concentration élevée ni plusieurs échantillons positifs, communiquer les résultats positifs à un agent du Service de l'eau potable dès que possible après les avoir reçus et, sauf indication contraire de l'agent ou d'un médecin hygiéniste, faire au moins l'une des choses suivantes, selon ce que le fournisseur estime indiqué, puis poursuivre les contrôles prévus à l'alinéa c) :

(i) purger les conduites d'eau touchées à l'aide de méthodes de vidange unidirectionnelles,

(ii) nettoyer les bassins et les réservoirs touchés,

(iii) évaluer le procédé de traitement de l'eau et le système de distribution d'eau pour déceler les problèmes,

(iv) apporter des améliorations et des changements afin de régler les problèmes en se fondant sur l'évaluation de la source d'approvisionnement, du procédé de traitement de l'eau et du système de distribution d'eau;

e) si, malgré la prise des mesures visées à l'alinéa d), les coliformes totaux d'un échantillon ne respectent pas la norme mais que les analyses ne révèlent pas de bactérie *E. coli*, de concentration élevée ni plusieurs échantillons positifs, communiquer les résultats à un agent du Service de l'eau potable dès que possible après les avoir reçus et prendre les autres mesures correctives prescrites par l'agent ou par un médecin hygiéniste.

Mesures correctives en présence de bactéries *E. coli*, d'une concentration élevée ou de plusieurs échantillons positifs

3(2) Si des analyses effectuées conformément au paragraphe (1) révèlent des bactéries *E. coli*, une concentration élevée ou plusieurs échantillons positifs, le fournisseur d'un service d'eau avise sans tarder un agent du Service de l'eau potable et prend les mesures prescrites par l'agent ou par un médecin hygiéniste.

Poursuite des prélèvements aux points de prélèvement des échantillons non conformes

3(3) Sauf approbation d'un agent du Service de l'eau potable, le fournisseur d'un service d'eau continue d'effectuer des prélèvements aux points dont proviennent des échantillons qui ne respectent pas la norme jusqu'à l'obtention de résultats négatifs pour au moins deux échantillons réguliers consécutifs.

Réseau semi-public d'alimentation en eau désinfecté sans système de distribution

4(1) Les mesures correctives que le fournisseur d'un service d'eau est tenu de prendre pour un réseau semi-public d'alimentation en eau désinfecté qui n'est pas doté d'un système de distribution sont les suivantes :

a) effectuer sans tarder un nouveau contrôle et, si les coliformes totaux ne respectent toujours pas la norme mais que les analyses ne révèlent pas de bactérie *E. coli*, de concentration élevée ni plusieurs échantillons positifs :

(i) fournir uniquement de l'eau bouillie ou utiliser une autre source d'eau sûre jusqu'à ce que les normes bactériologiques établies dans le Règlement soient respectées,

(ii) faire ce qui suit dès que possible :

(A) effectuer une inspection sanitaire et régler les problèmes repérés,

(B) une fois l'inspection sanitaire terminée, vérifier si le désinfectant résiduel exigé est présent dans l'ensemble de la plomberie et, dans le cas contraire, ajouter la quantité de désinfectant nécessaire,

(C) purger complètement le réseau et effectuer un nouveau contrôle pour confirmer que l'eau est salubre,

(D) si le nouvel échantillon ne contient pas de bactérie *E. coli* et respecte la norme relative aux coliformes totaux, effectuer un second contrôle du système d'alimentation en eau,

(E) si l'échantillon prélevé pour le second contrôle ne contient pas de bactérie *E. coli* et respecte la norme relative aux coliformes totaux, reprendre l'utilisation normale de la source d'approvisionnement et effectuer un contrôle de suivi dans les quatre à six semaines suivant le second contrôle pour s'assurer qu'il n'y a pas eu de nouvelle contamination;

b) si l'un des nouveaux contrôles prescrits par la division a)(ii)(C), (D) ou (E) indique que la norme relative aux coliformes totaux n'est pas respectée mais ne révèle pas de bactérie *E. coli*, de concentration élevée ni plusieurs échantillons positifs, aviser dès que possible un agent du Service de l'eau potable et prendre les mesures correctives prescrites par l'agent ou par un médecin hygiéniste.

Mesures correctives en présence de bactéries *E. coli*, d'une concentration élevée ou de plusieurs échantillons positifs

4(2) Si des analyses effectuées conformément au paragraphe (1) révèlent des bactéries *E. coli*, une concentration élevée ou plusieurs échantillons positifs, le fournisseur d'un service d'eau avise sans tarder un agent du Service de l'eau potable et prend les mesures prescrites par l'agent ou par un médecin hygiéniste.

Réseau semi-public d'alimentation en eau doté d'un puits non désinfecté

5(1) Les mesures correctives que le fournisseur d'un service d'eau est tenu de prendre pour un réseau semi-public d'alimentation en eau doté d'un puits non désinfecté sont les suivantes :

a) effectuer sans tarder un nouveau contrôle et, si les coliformes totaux ne respectent toujours pas la norme mais que les analyses ne révèlent pas de bactérie *E. coli*, de concentration élevée ni plusieurs échantillons positifs :

(i) fournir uniquement de l'eau bouillie ou une autre source d'eau sûre jusqu'à ce que les normes bactériologiques établies dans le Règlement soient respectées,

(ii) faire ce qui suit dès que possible :

(A) effectuer une inspection sanitaire et régler les problèmes repérés,

(B) une fois l'inspection sanitaire terminée et les problèmes réglés, soumettre le puits et la plomberie à une chloration concentrée,

(C) purger complètement le réseau et effectuer un nouveau contrôle pour confirmer que l'eau est salubre au moins 48 heures après des contrôles indiquant l'absence de chlore résiduel ou cinq jours après la chloration concentrée de l'eau du puits,

(D) si le nouvel échantillon ne contient pas de bactérie *E. coli* et respecte la norme relative aux coliformes totaux, effectuer un second contrôle de l'eau du puits,

(E) si l'échantillon prélevé pour le second contrôle ne contient pas de bactérie *E. coli* et respecte la norme relative aux coliformes totaux, reprendre l'utilisation normale de la source d'approvisionnement et effectuer un contrôle de suivi dans les quatre à six semaines suivant le second contrôle pour s'assurer qu'il n'y a pas eu de nouvelle contamination;

b) si l'un des nouveaux contrôles prescrits par la division a)(ii)(C), (D) ou (E) indique des coliformes totaux qui ne respectent pas la norme mais ne révèle pas de bactérie *E. coli*, de concentration élevée ni plusieurs échantillons positifs, aviser dès que possible un agent du Service de l'eau potable et prendre les mesures correctives prescrites par l'agent ou par un médecin hygiéniste.

Mesures correctives en présence de bactéries *E. coli*, d'une concentration élevée ou de plusieurs échantillons positifs

5(2) Si des analyses effectuées conformément au paragraphe (1) révèlent des bactéries *E. coli*, une concentration élevée ou plusieurs échantillons positifs, le fournisseur d'un service d'eau avise sans tarder un agent du Service de l'eau potable et prend les mesures prescrites par l'agent ou par un médecin hygiéniste.

BACTÉRIES DE FOND LORSQUE LA FILTRATION SUR MEMBRANE EST LA PRINCIPALE MÉTHODE DE CONTRÔLE

Mesures correctives pour la concentration de bactéries de fond

6(1) Si la concentration de bactéries de fond ne respecte pas la norme relative aux bactéries de fond mais que les analyses ne révèlent pas de bactérie *E. coli*, de concentration élevée ni plusieurs échantillons positifs et que la norme relative aux coliformes totaux est respectée, le fournisseur d'un service d'eau est tenu de prendre, en vertu du paragraphe 3(2) du Règlement, les mesures correctives indiquées aux articles 7 à 9.

Application des articles 6 à 9

6(2) Les articles 6 à 9 ne s'appliquent que si l'analyse par filtration sur membrane constitue la principale méthode de vérification de la qualité bactériologique de l'eau.

Réseau public ou semi-public d'alimentation en eau désinfecté avec un système de distribution

7(1) Les mesures correctives que le fournisseur d'un service d'eau est tenu de prendre pour un réseau public ou semi-public d'alimentation en eau désinfecté qui est doté d'un système de distribution sont les suivantes :

a) si les analyses ne révèlent pas de bactérie *E. coli*, de concentration élevée ni plusieurs échantillons positifs mais que la norme relative aux bactéries de fond ne soit pas respectée, vérifier si le désinfectant résiduel exigé est présent dans l'ensemble du système de distribution d'eau et, dans le cas contraire, ajouter la quantité de désinfectant nécessaire;

b) effectuer sans tarder un nouveau contrôle de la qualité bactériologique à chaque point de prélèvement d'échantillons en employant une méthode standard approuvée de contrôle des bactéries *E. coli* et des coliformes totaux plutôt que la technique de filtration sur membrane;

c) effectuer un nouveau contrôle à chaque point de prélèvement où la concentration de bactéries de fond ne respecte pas la norme dès que possible après qu'ont été confirmés les niveaux acceptables de désinfectant résiduel et, s'il y a lieu, de turbidité;

d) si un contrôle prescrit par l'alinéa c) indique que la norme relative aux bactéries de fond n'est pas respectée mais ne révèle pas de bactérie *E. coli*, de concentration élevée ni plusieurs échantillons positifs et que la norme relative aux coliformes totaux soit respectée, communiquer les résultats à un agent du Service de l'eau potable dès que possible après les avoir reçus et, sauf indication contraire de l'agent ou d'un médecin hygiéniste, faire au moins l'une des choses suivantes, selon ce que le fournisseur estime indiqué, puis poursuivre les contrôles prévus à l'alinéa c) :

(i) purger les conduites d'eau touchées à l'aide de méthodes de vidange unidirectionnelles,

(ii) nettoyer les bassins et les réservoirs touchés,

(iii) évaluer le procédé de traitement de l'eau et le système de distribution d'eau pour déceler les problèmes,

(iv) apporter des améliorations et des changements afin de régler les problèmes en se fondant sur l'évaluation de la source d'approvisionnement, du procédé de traitement de l'eau et du système de distribution d'eau;

e) si, malgré la prise des mesures visées à l'alinéa d), la concentration de bactéries de fond dans un échantillon ne respecte pas la norme mais que les analyses ne révèlent pas de bactérie *E. coli*, de concentration élevée ni plusieurs échantillons positifs et que la norme relative aux coliformes totaux soit respectée, communiquer les résultats à un agent du Service de l'eau potable dès que possible après les avoir reçus et prendre les autres mesures correctives prescrites par l'agent ou par un médecin hygiéniste.

Mesures correctives en présence de bactéries *E. coli*, d'une concentration élevée ou de plusieurs échantillons positifs

7(2) Si des analyses effectuées conformément à l'alinéa (1)a), c) ou d) révèlent des bactéries *E. coli*, une concentration élevée ou plusieurs échantillons positifs, le fournisseur d'un service d'eau avise sans tarder un agent du Service de l'eau potable et prend les mesures prescrites par l'agent ou par un médecin hygiéniste.

Mesures correctives si la norme relative aux coliformes totaux n'est pas respectée

7(3) Si des analyses effectuées conformément à l'alinéa (1)a), c) ou d) indiquent que la norme relative aux coliformes totaux n'est pas respectée mais ne révèlent pas de bactérie *E. coli*, de concentration élevée ni plusieurs échantillons positifs, le fournisseur d'un service d'eau prend les mesures correctives indiquées à l'article 3.

Poursuite des prélèvements aux points de prélèvement des échantillons non conformes

7(4) Sauf approbation d'un agent du Service de l'eau potable, le fournisseur d'un service d'eau continue d'effectuer des prélèvements aux points dont proviennent des échantillons qui ne respectent pas la norme relative aux bactéries de fond jusqu'à l'obtention de résultats négatifs pour au moins deux échantillons réguliers consécutifs.

Réseau semi-public d'alimentation en eau désinfecté sans système de distribution

8(1) Les mesures correctives que le fournisseur d'un service d'eau est tenu de prendre pour un réseau semi-public d'alimentation en eau désinfecté qui n'est pas doté d'un système de distribution sont les suivantes :

a) effectuer sans tarder un nouveau contrôle de la qualité bactériologique à chaque point de prélèvement d'échantillons en employant une méthode standard approuvée de contrôle des bactéries *E. coli* et des coliformes totaux plutôt que la technique de filtration sur membrane;

b) si un échantillon ne respecte pas la norme relative aux bactéries de fond mais que les analyses ne révèlent pas de bactérie *E. coli*, de concentration élevée ni plusieurs échantillons positifs et que la norme relative aux coliformes totaux soit respectée, faire ce qui suit dès que possible :

(i) effectuer une inspection sanitaire et régler les problèmes repérés,

(ii) une fois l'inspection sanitaire terminée, vérifier si le désinfectant résiduel exigé est présent dans l'ensemble de la plomberie et, dans le cas contraire, ajouter la quantité de désinfectant nécessaire,

(iii) purger complètement le réseau et effectuer un nouveau contrôle pour confirmer que l'eau est salubre,

(iv) si le contrôle ne révèle pas de bactérie *E. coli*, de concentration élevée ni plusieurs échantillons positifs et que les normes relatives aux coliformes totaux et aux bactéries de fond soient respectées, effectuer un second contrôle de l'eau du puits,

(v) si le second contrôle ne révèle pas de bactérie *E. coli*, de concentration élevée ni plusieurs échantillons positifs et que les normes relatives aux coliformes totaux et aux bactéries de fond soient respectées, reprendre l'utilisation normale de la source d'approvisionnement et effectuer un contrôle de suivi dans les quatre à six semaines suivant le second contrôle pour s'assurer qu'il n'y a pas eu de nouvelle contamination;

c) si l'un des nouveaux contrôles prescrits par le sous-alinéa b)(iii), (iv) ou (v) indique que la norme relative aux bactéries de fond n'est pas respectée mais ne révèle pas de bactérie *E. coli*, de concentration élevée ni plusieurs échantillons positifs et que la norme relative aux coliformes totaux soit respectée, communiquer les résultats à un agent du Service de l'eau potable dès que possible après les avoir reçus et prendre les autres mesures correctives prescrites par l'agent ou par un médecin hygiéniste.

Mesures correctives en présence de bactéries *E. coli*, d'une concentration élevée ou de plusieurs échantillons positifs

8(2) Si des analyses effectuées conformément à l'alinéa (1)a) ou au sous-alinéa (1)b)(iii), (iv) ou (v) révèlent des bactéries *E. coli*, une concentration élevée ou plusieurs échantillons positifs, le fournisseur d'un service d'eau avise sans tarder un agent du Service de l'eau potable et prend les mesures prescrites par l'agent ou par un médecin hygiéniste.

Mesures correctives si la norme relative aux coliformes totaux n'est pas respectée

8(3) Si des analyses effectuées conformément à l'alinéa (1)a) ou au sous-alinéa (1)b)(iii), (iv) ou (v) indiquent que la norme relative aux coliformes totaux n'est pas respectée mais ne révèlent pas de bactérie *E. coli*, de concentration élevée ni plusieurs échantillons positifs, le fournisseur d'un service d'eau prend les mesures correctives indiquées à l'article 4.

Réseau semi-public d'alimentation en eau doté d'un puits non désinfecté

9(1) Les mesures correctives que le fournisseur d'un service d'eau est tenu de prendre pour un réseau semi-public d'alimentation en eau doté d'un puits non désinfecté sont les suivantes :

a) effectuer sans tarder un nouveau contrôle de la qualité bactériologique à chaque point de prélèvement d'échantillons en employant une méthode standard approuvée de contrôle des bactéries *E. coli* et des coliformes totaux plutôt que la technique de filtration sur membrane;

b) si un échantillon ne respecte pas la norme relative aux bactéries de fond mais que les analyses ne révèlent pas de bactérie *E. coli*, de concentration élevée ni plusieurs échantillons positifs et que la norme relative aux coliformes totaux soit respectée, faire ce qui suit dès que possible :

(i) effectuer une inspection sanitaire et régler les problèmes repérés,

- (ii) une fois l'inspection sanitaire terminée et les problèmes réglés, soumettre le puits et la plomberie à une chloration concentrée,
 - (iii) purger complètement le réseau et effectuer un nouveau contrôle pour confirmer que l'eau est salubre au moins 48 heures après des contrôles indiquant l'absence de chlore résiduel ou cinq jours après la chloration concentrée de l'eau du puits,
 - (iv) si le contrôle ne révèle pas de bactérie *E. coli*, de concentration élevée ni plusieurs échantillons positifs et que les normes relatives aux coliformes totaux et aux bactéries de fond soient respectées, effectuer un second contrôle de l'eau du puits,
 - (v) si le second contrôle ne révèle pas de bactérie *E. coli*, de concentration élevée ni plusieurs échantillons positifs et que les normes relatives aux coliformes totaux et aux bactéries de fond soient respectées, effectuer un contrôle de suivi dans les quatre à six semaines suivant le second contrôle pour s'assurer qu'il n'y a pas eu de nouvelle contamination;
- c) si l'un des nouveaux contrôles prescrits par le sous-alinéa b)(iii), (iv) ou (v) indique que la norme relative aux bactéries de fond n'est pas respectée mais ne révèle pas de bactérie *E. coli*, de concentration élevée ni plusieurs échantillons positifs et que la norme relative aux coliformes totaux soit respectée, aviser dès que possible un agent du Service de l'eau potable et prendre les mesures correctives prescrites par l'agent ou par un médecin hygiéniste.

Mesures correctives en présence de bactéries *E. coli*, d'une concentration élevée ou de plusieurs échantillons positifs

9(2) Si des analyses effectuées conformément à l'alinéa (1)a) ou au sous-alinéa (1)b)(iii), (iv) ou (v) révèlent des bactéries *E. coli*, une concentration élevée ou plusieurs échantillons positifs, le fournisseur d'un service d'eau avise sans tarder un agent du Service de l'eau potable et prend les mesures prescrites par l'agent ou par un médecin hygiéniste.

Mesures correctives si la norme relative aux coliformes totaux n'est pas respectée

9(3) Si des analyses effectuées conformément à l'alinéa (1)a) ou au sous-alinéa (1)b)(iii), (iv) ou (v) indiquent que la norme relative aux coliformes totaux n'est pas respectée mais ne révèlent pas de bactérie *E. coli*, de concentration élevée ni plusieurs échantillons positifs, le fournisseur d'un service d'eau prend les mesures correctives indiquées à l'article 5.

DÉNOMBREMENT SUR PLAQUE DES
BACTÉRIES HÉTÉROTROPHES LORSQUE
LA FILTRATION SUR MEMBRANE EST LA
PRINCIPALE MÉTHODE DE CONTRÔLE

Mesures correctives pour le DBH

10(1) Si le dénombrement sur plaque des bactéries hétérotrophes ne respecte pas la norme relative au DBH mais que les analyses ne révèlent pas de bactérie *E. coli*, de concentration élevée ni plusieurs échantillons positifs et que la norme relative aux coliformes totaux soit respectée, le fournisseur d'un service d'eau est tenu de prendre, en vertu du paragraphe 3(2) du Règlement, les mesures correctives indiquées aux articles 11 à 13.

Application des articles 10 à 13

10(2) Les articles 10 à 13 ne s'appliquent que si l'analyse par filtration sur membrane constitue la principale méthode de vérification de la qualité bactériologique de l'eau.

Réseau public ou semi-public d'alimentation en eau désinfecté doté d'un système de distribution

11(1) Les mesures correctives que le fournisseur d'un service d'eau est tenu de prendre pour un réseau public ou semi-public d'alimentation en eau désinfecté doté d'un système de distribution sont les suivantes :

a) si les analyses ne révèlent pas de bactérie *E. coli*, de concentration élevée ni plusieurs échantillons positifs mais que la norme relative au DBH ne soit pas respectée, vérifier si le désinfectant résiduel exigé est présent dans l'ensemble du système de distribution d'eau et, dans le cas contraire, ajouter la quantité de désinfectant nécessaire;

b) effectuer sans tarder un nouveau contrôle de la qualité bactériologique à chaque point de prélèvement d'échantillons en employant une méthode standard approuvée de contrôle des bactéries *E. coli* et des coliformes totaux plutôt que la technique de filtration sur membrane;

c) effectuer un nouveau contrôle à chaque point de prélèvement où le DBH ne respecte pas la norme dès que possible après qu'ont été confirmés les niveaux acceptables de désinfectant résiduel et, s'il y a lieu, de turbidité;

d) si un contrôle prescrit par l'alinéa c) indique que la norme relative au DBH n'est pas respectée mais ne révèle pas de bactérie *E. coli*, de concentration élevée ni plusieurs échantillons positifs et que la norme relative aux coliformes totaux soit respectée, communiquer les résultats à un agent du Service de l'eau potable dès que possible après les avoir reçus et, sauf indication contraire de l'agent ou d'un médecin hygiéniste, faire au moins l'une des choses suivantes, selon ce que le fournisseur estime indiqué, puis poursuivre les contrôles prévus à l'alinéa c) :

(i) purger les conduites d'eau touchées à l'aide de méthodes de vidange unidirectionnelles,

(ii) nettoyer les bassins et les réservoirs touchés,

(iii) évaluer le procédé de traitement de l'eau et le système de distribution d'eau pour déceler les problèmes,

(iv) apporter des améliorations et des changements afin de régler les problèmes en se fondant sur l'évaluation de la source d'approvisionnement, du procédé de traitement de l'eau et du système de distribution d'eau;

e) si, malgré la prise des mesures visées à l'alinéa d), le DBH dans un échantillon ne respecte pas la norme mais que les analyses ne révèlent pas de bactérie *E. coli*, de concentration élevée ni plusieurs échantillons positifs et que la norme relative aux coliformes totaux soit respectée, communiquer les résultats à un agent du Service de l'eau potable dès que possible après les avoir reçus et prendre les autres mesures correctives prescrites par l'agent ou par un médecin hygiéniste.

Mesures correctives en présence de bactéries *E. coli*, d'une concentration élevée ou de plusieurs échantillons positifs

11(2) Si des analyses effectuées conformément à l'alinéa (1)a), c) ou d) révèlent des bactéries *E. coli*, une concentration élevée ou plusieurs échantillons positifs, le fournisseur d'un service d'eau avise sans tarder un agent du Service de l'eau potable et prend les mesures prescrites par l'agent ou par un médecin hygiéniste.

Mesures correctives si la norme relative aux coliformes totaux n'est pas respectée

11(3) Si des analyses effectuées conformément à l'alinéa (1)a), c) ou d) indiquent que la norme relative aux coliformes totaux n'est pas respectée mais ne révèlent pas de bactérie *E. coli*, de concentration élevée ni plusieurs échantillons positifs, le fournisseur d'un service d'eau prend les mesures correctives indiquées à l'article 3.

Poursuite des prélèvements aux points de prélèvement des échantillons non conformes

11(4) Sauf approbation d'un agent du Service de l'eau potable, le fournisseur d'un service d'eau continue d'effectuer des prélèvements aux points dont proviennent les échantillons qui ne respectent pas la norme relative au DBH jusqu'à l'obtention de résultats négatifs pour au moins deux échantillons réguliers consécutifs.

Réseau semi-public d'alimentation en eau désinfecté sans système de distribution

12(1) Les mesures correctives que le fournisseur d'un service d'eau est tenu de prendre pour un réseau semi-public d'alimentation en eau désinfecté qui n'est pas doté d'un système de distribution sont les suivantes :

a) effectuer sans tarder un nouveau contrôle de la qualité bactériologique à chaque point de prélèvement d'échantillons en employant une méthode standard approuvée de contrôle des bactéries *E. coli* et des coliformes totaux plutôt que la technique de filtration sur membrane;

b) si un échantillon ne respecte pas la norme relative au DBH mais que les analyses ne révèlent pas de bactérie *E. coli*, de concentration élevée ni plusieurs échantillons positifs et que la norme relative aux coliformes totaux soit respectée, faire ce qui suit dès que possible :

(i) effectuer une inspection sanitaire et corriger les problèmes repérés,

(ii) une fois l'inspection sanitaire terminée, vérifier si le désinfectant résiduel exigé est présent dans l'ensemble de la plomberie et, dans le cas contraire, ajouter la quantité de désinfectant nécessaire,

(iii) purger complètement le réseau et effectuer un nouveau contrôle,

(iv) si le contrôle ne révèle pas de bactérie *E. coli*, de concentration élevée ni plusieurs échantillons positifs et que les normes relatives aux coliformes totaux et au DBH soient respectées, effectuer un second contrôle de l'eau du puits,

(v) si le second contrôle ne révèle pas de bactérie *E. coli*, de concentration élevée ni plusieurs échantillons positifs et que les normes relatives aux coliformes totaux et au DBH soient respectées, effectuer les contrôles de suivi prescrits par un agent du Service de l'eau potable ou par un médecin hygiéniste;

c) si l'un des nouveaux contrôles prescrits par le sous-alinéa b)(iii), (iv) ou (v) indique que la norme relative au DBH n'est pas respectée mais ne révèle pas de bactérie *E. coli*, de concentration élevée ni plusieurs échantillons positifs et que la norme relative aux coliformes totaux soit respectée, communiquer les résultats à un agent du Service de l'eau potable dès que possible après les avoir reçus et prendre les autres mesures correctives prescrites par l'agent ou par un médecin hygiéniste.

Mesures correctives en présence de bactéries *E. coli*, d'une concentration élevée ou de plusieurs échantillons positifs

12(2) Si des analyses effectuées conformément à l'alinéa (1)a) ou au sous-alinéa (1)b)(iii), (iv) ou (v) révèlent des bactéries *E. coli*, une concentration élevée ou plusieurs échantillons positifs, le fournisseur d'un service d'eau avise sans tarder un agent du Service de l'eau potable et prend les mesures prescrites par l'agent ou par un médecin hygiéniste.

Mesures correctives si la norme relative aux coliformes totaux n'est pas respectée

12(3) Si des analyses effectuées conformément à l'alinéa (1)a) ou au sous-alinéa (1)b)(iii), (iv) ou (v) indiquent que la norme relative aux coliformes totaux n'est pas respectée mais ne révèlent pas de bactérie *E. coli*, de concentration élevée ni plusieurs échantillons positifs, le fournisseur d'un service d'eau prend les mesures correctives indiquées à l'article 4.

Réseau semi-public d'alimentation en eau doté d'un puits non désinfecté

13(1) Les mesures correctives que le fournisseur d'un service d'eau est tenu de prendre pour un réseau semi-public d'alimentation en eau doté d'un puits non désinfecté sont les suivantes :

a) effectuer sans tarder un nouveau contrôle de la qualité bactériologique à chaque point de prélèvement d'échantillons en employant une méthode standard approuvée de contrôle des bactéries *E. coli* et des coliformes totaux plutôt que la technique de filtration sur membrane;

b) si un échantillon ne respecte pas la norme relative au DBH mais que les analyses ne révèlent pas de bactérie *E. coli*, de concentration élevée ni plusieurs échantillons positifs et que la norme relative aux coliformes totaux soit respectée, faire ce qui suit dès que possible :

(i) effectuer une inspection sanitaire et régler les problèmes repérés,

(ii) une fois l'inspection sanitaire terminée et les problèmes réglés, soumettre le puits et la plomberie à une chloration concentrée,

(iii) purger complètement le réseau et effectuer un nouveau contrôle pour confirmer que l'eau est salubre au moins 48 heures après des contrôles indiquant l'absence de chlore résiduel ou cinq jours après la chloration concentrée de l'eau du puits,

(iv) si le contrôle ne révèle pas de bactérie *E. coli*, de concentration élevée ni plusieurs échantillons positifs et que les normes relatives aux coliformes totaux et au DBH soient respectées, effectuer un second contrôle de l'eau du puits,

(v) si le second contrôle ne révèle pas de bactérie *E. coli*, de concentration élevée ni plusieurs échantillons positifs et que les normes relatives aux coliformes totaux et au DBH soient respectées, effectuer un contrôle de suivi dans les quatre à six semaines suivant le second contrôle pour s'assurer qu'il n'y a pas eu de nouvelle contamination;

c) si l'un des nouveaux contrôles prescrits par le sous-alinéa b)(iii), (iv) ou (v) indique que la norme relative au DBH n'est pas respectée mais ne révèle pas de bactérie *E. coli*, de concentration élevée ni plusieurs échantillons positifs et que la norme relative aux coliformes totaux soit respectée, aviser dès que possible un agent du Service de l'eau potable et prendre les mesures correctives prescrites par l'agent ou par un médecin hygiéniste.

Mesures correctives en présence de bactéries *E. coli*, d'une concentration élevée ou de plusieurs échantillons positifs

13(2) Si des analyses effectuées conformément à l'alinéa (1)a) ou au sous-alinéa (1)b)(iii), (iv) ou (v) révèlent des bactéries *E. coli*, une concentration élevée ou plusieurs échantillons positifs, le fournisseur d'un service d'eau avise sans tarder un agent du Service de l'eau potable et prend les mesures prescrites par l'agent ou par un médecin hygiéniste.

Mesures correctives si la norme relative aux coliformes totaux n'est pas respectée

13(3) Si des analyses effectuées conformément à l'alinéa (1)a) ou au sous-alinéa (1)b)(iii), (iv) ou (v) indiquent que la norme relative aux coliformes totaux n'est pas respectée mais ne révèlent pas de bactérie *E. coli*, de concentration élevée ni plusieurs échantillons positifs, le fournisseur d'un service d'eau prend les mesures correctives indiquées à l'article 5.

NON-RESPECT DE PLUSIEURS NORMES
BACTÉRIOLOGIQUES

Priorité des mesures correctives pour les coliformes totaux

14 Si les résultats d'une analyse effectuée en application du Règlement ou de la présente annexe indiquent que la norme relative aux coliformes totaux de même que celle relative au DBH ou aux bactéries de fond ou aux deux ne sont pas respectées, le fournisseur d'un service d'eau prend les mesures correctives indiquées à l'article 3, 4 ou 5. Le présent article ne s'applique pas si les analyses ont révélé des bactéries *E. coli*, une concentration élevée ou plusieurs échantillons positifs.

Mesures correctives en cas de non-respect des normes relatives aux bactéries de fond et au DBH

15 Si les résultats d'une analyse effectuée en application du Règlement ou de la présente annexe indiquent que la norme relative au DBH et celle relative aux bactéries de fond ne sont pas respectées, le fournisseur d'un service d'eau prend les mesures correctives indiquées à l'article 3, 4 ou 5. Le présent article ne s'applique pas si les analyses ont révélé des bactéries *E. coli*, une concentration élevée ou plusieurs échantillons positifs.

SCHEDULE B
(Subsection 5(1))

CHEMICAL STANDARDS
FOR PUBLIC WATER SYSTEMS

Chemical Parameter	Maximum acceptable concentration (mg/L), if the water supply is: - surface water	Maximum acceptable concentration (mg/L), if the water supply is: - groundwater; or - groundwater under the direct influence of surface water (GUDI)
arsenic		0.010
benzene		0.005
bromo-dichloromethane	0.016 ¹	for GUDI: 0.016 ¹
fluoride		1.5
lead	0.01	0.01
nitrate		as nitrate: 45 as nitrogen: 10
tetrachloroethylene		0.03
trichloroethylene		0.005
total trihalomethanes (TTHM)	0.1 ¹	for GUDI: 0.1 ¹
uranium		0.02

¹ Based on an annual average of four quarterly samples.

Note: If a water supplier performs a number of tests for a parameter, in an amount and over a period of time acceptable to the director, and the maximum acceptable concentration is not exceeded in any test, further testing for the parameter may proceed on a reduced frequency, as specified in the operating licence.

ANNEXE B
[paragraphe 5(1)]

NORMES CHIMIQUES
POUR LES RÉSEAUX PUBLICS D'ALIMENTATION EN EAU

Paramètre chimique	Concentration maximale acceptable (mg/L) si la source d'approvisionnement est : - de l'eau de surface	Concentration maximale acceptable (mg/L) si la source d'approvisionnement est : - soit de l'eau souterraine - soit de l'eau souterraine sous l'influence directe de l'eau de surface (« ESSID »)
arsenic		0,010
benzène		0,005
bromodichlorométhane	0,016 ¹	pour l'ESSID : 0,016 ¹
fluorure		1,5
nitrate		sous forme de nitrate : 45 sous forme de nitrogène : 10
plomb	0,01	0,01
tétrachloroéthylène		0,03
trichloroéthylène		0,005
trihalométhanes totaux	0,1 ¹	pour l'ESSID : 0,1 ¹
uranium		0,02

¹ D'après une moyenne annuelle de quatre échantillons, soit un par trimestre.

Note : S'il effectue, à l'égard d'un paramètre, un nombre d'analyses suffisant pour le directeur, au cours d'une période que celui-ci juge acceptable, et que la concentration maximale acceptable ne soit excédée dans aucune des analyses, le fournisseur d'un service d'eau peut procéder à d'autres analyses à l'égard du paramètre à une fréquence réduite que précise la licence d'exploitation.

SCHEDULE C
(subsections 4(5), 5(2) and 6(2))

CORRECTIVE ACTION
FOR FAILURE TO COMPLY WITH A MICROBIAL,
CHEMICAL, RADIOLOGICAL OR PHYSICAL STANDARD

Corrective action for microbial, chemical, radiological or physical standards

1 If water in a water distribution system does not meet a microbial, chemical, radiological or physical standard specified in sections 4 to 6 or in an operating licence, the corrective action that a water supplier must take under subsection 4(5), 5(2) or 6(2) of the regulation, as the case may be, is as follows:

- (a) notify a drinking water officer of the results, and re-sample as the officer directs;
- (b) if an original sample or a sample on retest fails to meet the standard, take such other steps as the director or a drinking water officer, after having consulted with a medical officer, may direct.

ANNEXE C
[paragraphe 4(5), 5(2) et 6(2)]

MESURES CORRECTIVES
EN CAS DE NON-RESPECT
D'UNE NORME MICROBIENNE, CHIMIQUE,
RADIOLOGIQUE OU PHYSIQUE

Mesures correctives en cas de non-respect des normes microbiennes, chimiques, radiologiques ou physiques

1 Si l'eau d'un système de distribution ne respecte pas une norme microbienne, chimique, radiologique ou physique précisée aux articles 4 à 6 ou dans une licence d'exploitation, le fournisseur d'un service d'eau est tenu de prendre, en vertu du paragraphe 4(5), 5(2) ou 6(2) du Règlement, selon le cas, les mesures correctives suivantes :

- a) aviser un agent du Service de l'eau potable des résultats et effectuer les nouveaux prélèvements que celui-ci prescrit;
- b) si l'un des anciens ou des nouveaux échantillons ne respecte pas la norme, prendre les autres mesures que prescrit le directeur ou un agent du Service de l'eau potable après qu'il a consulté un médecin hygiéniste.

Barry MacBride, P. Eng.
Director, Water and Waste
City of Winnipeg
112-1199 Pacific Ave.
Winnipeg MB R3E 3S8

Dear Mr. MacBride:

Re: City of Winnipeg – Revised Public Drinking Water System Operating Licence

In accordance with section 10(1) of *The Drinking Water Safety Regulation*, please find enclosed a revised Operating Licence for the City of Winnipeg Public Water System. The licence was revised in cooperation with your staff to more accurately reflect the sampling locations associated with the updated water system. In addition, the due date for the water system assessment was revised from December 31, 2010 to February 28, 2011 so that the report could include information to the end of the 2010 calendar year.

A ceremonial copy of the licence's cover page is enclosed for display at the water treatment plant. Please feel free to contact me should you have any questions related to the Operating Licence or any other drinking water related regulatory matters.

Sincerely,

Kim Philip, P. Eng.
Director, Regulatory Services

Water Stewardship

Office of Drinking Water
1007 Century Street, Winnipeg MB R3H 0W4

**OPERATING LICENCE FOR
A PUBLIC WATER SYSTEM**

LICENCE NUMBER: PWS-09-412 RR

**THE DRINKING WATER SAFETY ACT
CHAPTER D101, C.C.S.M.**

WATER SYSTEM CODE: 252.00
OPERATION ID: 27564
EFFECTIVE DATE: JULY 1, 2010
EXPIRY DATE: JUNE 30, 2015

IN ACCORDANCE WITH *THE DRINKING WATER SAFETY ACT*, THIS OPERATING LICENCE IS ISSUED PURSUANT TO SUBSECTION 8(1) TO:

CITY OF WINNIPEG: "THE LICENSEE"

FOR THE OPERATION OF THE **WINNIPEG PUBLIC WATER SYSTEM**, WHICH INCLUDES INTAKE STRUCTURES, AQUEDUCT, TREATMENT FACILITIES, WATER STORAGE RESERVOIRS, WATER PUMPING STATIONS, AND DISTRIBUTION LINES, SUBJECT TO THE ATTACHED TERMS AND CONDITIONS.

THIS LICENCE DOES NOT AFFECT THE LICENSEE'S OBLIGATIONS WITH RESPECT TO COMPLIANCE WITH ALL APPLICABLE MUNICIPAL, PROVINCIAL, AND FEDERAL LEGISLATION. THIS LICENCE SUPERSEDES ALL PREVIOUS LICENCES AND CERTIFICATES OF APPROVAL FOR THIS PUBLIC WATER SYSTEM.

DATE: October 14, 2010

DATE: October 14, 2010

Kim Philip, P.Eng.
Director

TERMS AND CONDITIONS

1. GENERAL

- 1.1. The Licensee shall operate the public water system in accordance with all applicable requirements of *The Drinking Water Safety Act* and its regulations, and the requirements of this Licence. In the event that specific terms and conditions of this Licence imposed under the authority of subsection 8(3) of the Act exceed the general requirements of the Act and regulations, the specific requirements of this Licence shall apply.
- 1.2. The Licensee shall obtain a permit to construct from the Office of Drinking Water prior to making any significant alterations to the water source, the water treatment process, the water storage facilities or the water pumping stations. The Licensee shall also, on an annual basis, apply for a general permit to construct to address all significant alterations and extensions to the water distribution system built in accordance with standard City of Winnipeg construction specifications.
- 1.3. This Licence may be amended by the Director where, in the opinion of the Director, an amendment is necessary and the amendment will not negatively impact, a) the safety of water obtained from the water system; or b) effective environmental management.
- 1.4. The Licensee may request an amendment to this Licence by submitting an amendment application to the Office of Drinking Water.
- 1.5. This Licence may be suspended or cancelled by the Director for any of the reasons identified in Section 11 of Manitoba Regulation 40/2007, Drinking Water Safety Regulation, or due to a failure to comply with any term or condition of this Licence.
- 1.6. The Licensee shall provide written notice to the Office of Drinking Water of any change in title/ownership of the water system within 60 days of the transfer of title/ownership.
- 1.7. The Director of the Office of Drinking Water, Medical Officer of Health or Drinking Water Officer may enter any water system facility as necessary to carry out the provisions of *The Drinking Water Safety Act* and its regulations.
- 1.8. The Licensee shall post a copy of this Licence in its entirety at the Water Treatment Plant and ensure all operators are familiar with its terms and conditions.
- 1.9. The Licensee shall apply for renewal of this Licence at least 60 days prior to its expiry.

2. OPERATION - GENERAL

- 2.1. The Licensee shall operate all facilities, control systems and equipment as efficiently as possible, inspect them on a regular basis, maintain them in good working order, and ensure that the water system is protected from the risks associated with cross-contamination.
- 2.2. The Licensee shall ensure that all equipment used for disinfection is maintained in effective working order and keep available for immediate use all spare parts and chemical supplies as may be necessary to ensure continuous disinfection, including a spare disinfection unit, if necessary.

- 2.3. The Licensee shall ensure that all chemicals and components that may come into contact with potable water are certified safe for potable water use through AWWA Standards, ANSI/NSF Standard 60 or 61, Health Canada, or other standards acceptable to the Director.
- 2.4. The Licensee shall ensure that disinfection is undertaken following construction, repair or maintenance activities on the water system, in accordance with applicable AWWA standards, or other standards approved by the Director. A copy of all associated test results must be kept available for review by the Office of Drinking Water for a minimum of 24 months.
- 2.5. The Licensee shall make accessible at any time to the Director or designate, emergency response contingency plans, developed and maintained in a form acceptable to the Director that address routine and major emergencies such as equipment malfunctions, upset conditions and contamination events.
- 2.6. The Licensee shall have an assessment of the water system infrastructure and water supply sources completed and submitted by a qualified professional engineer, who is not an employee of the water system, in a form satisfactory to the Director by February 28, 2011.
- 2.7. The Licensee shall ensure that the automated filter to waste feature is operated to allow the filtered water to be wasted until turbidity levels have stabilized to an acceptable level upon filter start-up or following a backwash cycle.

3. WATER QUALITY STANDARDS

- 3.1. The Licensee shall operate the water system in a manner that achieves the following water quality standards specified in Table 1, as determined through the monitoring requirements specified in Table 2:

Table 1: Water Quality Standards

Parameter	Quality Standard
Total coliform and E. coli	Less than one E. coli and total coliform bacteria detectable per 100 mL in all treated and distributed water
Chlorine residual	<ul style="list-style-type: none"> ▪ A free chlorine residual of at least 0.5 mg/L in water entering the distribution system following a minimum contact time of 20 minutes. ▪ A free chlorine residual of at least 0.1 mg/L at all times at any point in the water distribution system
Filter effluent turbidity (measured from each operating filter)	<ul style="list-style-type: none"> ▪ Less than or equal to 0.3 NTU in 95% of the measurements in a month of the effluent from each operating particulate filter. ▪ Not exceed 0.3 NTU for more than 12 consecutive hours of filter operation. ▪ Not exceed 1.0 NTU at any time.
Total trihalomethanes (to include: bromodichloromethane, bromoform, chloroform, dibromochloromethane)	Less than or equal to 0.10 mg/L as annual average of quarterly samples
Lead (throughout the distribution system)	Less than or equal to 0.01 mg/L

- 3.2. The Licensee shall have in place and maintain in effective working order, filtration and disinfection equipment and controls designed to provide reduction or inactivation of 99.9% (3-log) of *Cryptosporidium* oocysts and 99.9% (3-log) of *Giardia lamblia* cysts.
- 3.3. The Licensee shall have in place and maintain in effective working order, filtration and/or disinfection equipment and controls designed to provide reduction or inactivation of 99.99% (4-log) of viruses.
- 3.4. The Licensee shall maintain in effective working order ultraviolet (UV) light disinfection equipment that results in greater than or equal to 95% of the volume of water produced per month undergoing UV light disinfection within conditions validated to provide a minimum of 2-log inactivation of *Cryptosporidium* oocysts and *Giardia lamblia* cysts.
 - 3.4.1. The amount of water entering the distribution system disinfected outside of validated conditions must be less than or equal to 4% of the volume of water produced per month.
 - 3.4.2. The amount of water entering the distribution system that does not undergo UV light disinfection due to a power outage or other failure must be less than or equal to 1% of the volume of water produced per month.
- 3.5. If a standard is not met, the Licensee shall immediately undertake the corrective actions as listed in Schedule A, or Schedule C of Manitoba Regulation 41/2007, Drinking Water Quality Standards Regulation, as applicable.

4. WATER QUALITY MONITORING

- 4.1. The Licensee shall immediately notify the Office of Drinking Water of any condition that may affect the ability of the water system to produce and deliver safe drinking water including treatment upsets or bypass conditions, contamination of the source water or treated water, a disinfection system failure or a distribution system failure that poses a risk to public health.
- 4.2. Unless otherwise approved by the Director, where water quality analysis associated with this licence is required to be undertaken by a laboratory, the licensee shall ensure that the analysis is conducted in accordance with the requirements of ISO 17025 (2005) as accredited by SCC or CALA.
- 4.3. The Licensee shall ensure that all water quality monitoring equipment is properly maintained and calibrated according to manufacturer recommendations and that records are maintained to that effect for a period of not less than 24 months.
- 4.4. The Licensee shall operate equipment capable of continuously monitoring and recording the free chlorine residual at no more than five-minute intervals at the water treatment plant downstream of the chlorine contact chamber (Deacon Booster Pumping Station) following a minimum of 20 minutes of chlorine contact time.
- 4.5. The Licensee shall operate equipment capable of continuously monitoring and recording the turbidity level at no more than five-minute intervals for the raw water (water treatment plant).

- 4.6. The Licensee shall operate equipment capable of continuously monitoring and recording the turbidity level at no more than five-minute intervals in the filtered effluent from each particulate filter.
- 4.7. The Licensee shall operate equipment capable of continuously monitoring and recording the UVT (UV transmittance) levels at no more than five-minute intervals at Deacon Booster Pumping Station.
- 4.8. In instances where continuous disinfectant residual monitoring equipment is offline, the Licensee shall ensure that a minimum of one sample per day is tested at the affected location using an approved portable analysis unit and that the results are recorded in a form satisfactory to the Director.
- 4.9. In instances where continuous turbidity monitoring equipment is offline, the Licensee shall ensure that a minimum of one sample per day is tested at the affected location using an approved portable analysis unit and that the results are recorded in a form satisfactory to the Director.
- 4.10. The Licensee shall submit chlorine, UV light disinfection and turbidity monitoring reports within seven days following the month during which the monitoring was conducted, in a form satisfactory to the Director.
- 4.11. The Licensee shall submit all other water quality monitoring reports associated with this licence in accordance with a schedule established by the Office of Drinking Water.
- 4.12. The Licensee shall ensure that sampling within the distribution system takes place at locations acceptable to the Office of Drinking Water.
- 4.13. The Licensee shall ensure monitoring is completed as set out in Table 2.

Table 2. Monitoring Schedule

Parameter	Monitoring Requirement
Bacteriological (total coliform and E. coli)	<ul style="list-style-type: none"> ▪ Weekly sampling program with each set of samples consisting of 1 raw (water treatment plant), 1 treated (Deacon Booster Pumping Station), 3 additional treated (leaving the three regional pumping stations) and a minimum of 39 distribution system water samples as per the City of Winnipeg, <i>Bacteriological Sampling Procedure – Routine</i> ▪ Consecutive samples to be separated by at least 5 days.
Free chlorine (treated water)	<ul style="list-style-type: none"> ▪ Continuous sampling at the water treatment plant downstream of the chlorine contact chamber (Deacon Booster Pumping Station) following a minimum of twenty minutes of contact time. ▪ A minimum of five confirmatory grab samples per week (separated by at least 24 hours) downstream of the chlorine contact chamber (Deacon Booster Pumping Station) following a minimum of 20 minutes of chlorine contact time. A minimum of four confirmatory grab samples per week at the same location is acceptable on weeks containing a statutory Holiday.
Free chlorine (distribution system)	At the same time and location(s) as the bacteriological distribution system sampling (the required minimum 39 sample sites).
Total chlorine (treated water)	A minimum of five confirmatory grab samples per week (separated by at least 24 hours) downstream of the chlorine contact chamber (Deacon Booster Pumping Station) following a minimum of 20 minutes of chlorine

Parameter	Monitoring Requirement
	contact time. A minimum of four confirmatory grab samples per week at the same location is acceptable on weeks containing a statutory holiday.
Total chlorine (distribution system)	At the same times and location(s) as bacteriological distribution system sampling.
Turbidity	<ul style="list-style-type: none"> ▪ Continuous monitoring of the raw water (water treatment plant) and a minimum of three confirmatory grab samples per week from the same location. ▪ Continuous monitoring of the effluent from each of the operating particulate filters and a minimum of three confirmatory grab samples per week from the same locations.
UVT (UV transmittance)	Continuous monitoring at Deacon Booster Pumping Station.
Flow rate	Continuous monitoring of water entering each UV disinfection unit.
UV dose	Continuous monitoring of water entering each UV disinfection unit.
UV intensity	Continuous monitoring of water passing by each operating UV lamp.
UV lamp status	Continuous monitoring of each UV lamp.
General chemistry (parameter list furnished by the Office of Drinking Water)	One raw sample (water treatment plant) and one treated sample (Deacon Booster Pumping Station) taken on a quarterly basis.
Total trihalomethanes	Six preserved distribution system samples taken on a quarterly basis during February, May, August, and November.
Lead	As per the lead loop monitoring system approved by the Director.

5. RECORD-KEEPING AND REPORTING

- 5.1. The Licensee shall record treated water disinfectant residual measurements on the monthly disinfection report form or other form satisfactory to the Director, keep one copy for records and forward the original copy to the Drinking Water Officer within seven days after the end of each calendar month.
- 5.2. The Licensee shall record distribution system disinfectant residual measurements on the chain of custody form (laboratory submission form) which accompanies the bacteriological sample bottles to the laboratory.
- 5.3. The Licensee shall record UV disinfection system measurements on a form satisfactory to the Director, keep one copy for records and forward the original copy to the Drinking Water Officer within seven days after the end of each calendar month.
- 5.4. The Licensee shall record turbidity measurements on the monthly turbidity report form or other form satisfactory to the Director, keep one copy for records and forward the original copy to the Drinking Water Officer within seven days after the end of each calendar month.
- 5.5. The Licensee shall submit a Corrective Action Report when there is non-conformance with the total coliform, E.coli, free chlorine residual, and/or turbidity standards identified in Table 1, and/or the UV disinfection standards identified in clauses 3.4, 3.4.1 and 3.4.2. The Licensee shall keep one copy of the Corrective Action Report for their records and forward the original copy to the Drinking Water Officer along with the other monthly reports required by this licence.

- 5.6. The Licensee shall retain in chronological order for a minimum of 24 months the following operational records for the water system: all water quality monitoring equipment calibration records, all laboratory analysis reports, monthly disinfection and turbidity report forms, and corrective action forms.
- 5.7. The Licensee shall maintain in a secure location all construction drawings (hard copy or electronic format) for the life of the water system components.
- 5.8. The Licensee shall retain a copy of every order, permit, and advisory and license in effect.
- 5.9. The Licensee shall ensure that all of the information identified in clauses 5.6 through 5.8 and all annual reports (hard copy or electronic format) are kept in a secure location and made available on request from the Office of Drinking Water.
- 5.10. The Licensee shall ensure the following information is available to the public for inspection: a copy of every water quality analysis result required in the past 24 months, under this licence, the Act or the Drinking Water safety Regulation as well as a copy of every permit, order, advisory and licence in effect, and a copy of every annual report required in relation to the water system.
- 5.11. The Licensee shall submit an annual report to the Director by March 31st of each year on the operation of the water system in the immediately preceding calendar year. The report shall include the information as set out in subsection 32(2) of Manitoba Regulation 40/2007, Drinking Water Safety Regulation.
- 5.12. The Licensee shall inform the public, in a form satisfactory to the Director, whenever an annual report has been prepared and how a free copy can be obtained.
- 5.13. The Licensee shall make a copy of each annual report available to the public at no charge on an Internet website within one month of the issuance of the report, unless otherwise approved by the Director.

Gilbert Bushati
Senior Regional Drinking Water Officer
Office of Drinking Water
Manitoba Water Stewardship
1007 Century Street
Winnipeg, Manitoba
R3H 0W4

Dear Mr. Bushati:

**RE: DECEMBER 2010 WATER QUALITY COMPLIANCE
SUBMISSIONS FOR THE CITY OF WINNIPEG WATER SUPPLY SYSTEM**

Please find attached on-line and grab turbidity summary reports, on-line and grab chlorine summary reports and the UV reports for the Water Treatment Plant for December 2010. There are no corrective action reports to be submitted for December 2010.

The December on-line and grab sampling turbidity reports include results obtained for the Water Treatment Plant raw water and the eight filters. Although there were several on-line results and three grab results above 0.30 NTU, the turbidity results from the filters are in compliance with the licence requirements.

The December on-line and grab sampling chlorine reports include results obtained for the Deacon Booster Pumping Station at the Water Treatment Plant.

The UV submission includes a summary report and reports for each reactor for December 2010 in accordance with Section 4.13, Table 2 of the Operating Licence. Please note that the UVT grab results are an average of Branch 1 and 2 taken at the Deacon Booster Pumping Station. We have installed an analyzer to continuously monitor the UVT and hope to submit the results in the near future. You will note that all 6 UV reactors are in compliance with the licence requirements.

Please let me know of any concerns or questions respecting this submission. I may be reached at the below address, by telephone at 986-4807 or by e-mail at kjartanson@winnipeg.ca.

Thanks for your ongoing cooperation and understanding in this matter.

Yours sincerely,

Report Created: **Tuesday, January 04, 2011**

Total [ML]: 0.16 0.00 1845.17 1845.33

Water Volume [%]:

Untreated **0.0 %**
Below Dose **0.0 %**
To Dose **100.0 %**

- Notes:**
1. UV Comparative Dose: 18.1 mJ/cm2
 2. %UVT values determined via grab sample
 3. NR - No Result
 4. NA - Not Analyzed
 5. OL - Off Line
 6. UV Transmittance values determined via grab samples (average of Branch 1 & 2).

Water System Code: **252.00**
License Number: **PWS-09-412 R**

Reactor: **UVR-400A**
Report Period: **December 2010**

Report Created: **Tuesday, January 04, 2011**

Total [ML]: **0.13 1.30 1038.05 1039.48**

Water Volume [%]:

Untreated **0.1 %**
Below Dose **0.2 %**
To Dose **99.8 %**

- Notes:**
- UV Comparative Dose: 18.1 mJ/cm2
 - %UVT values determined via grab sample
 - NR - No Result
 - NA - Not Analyzed
 - OL - Off Line
 - UV Transmittance values determined via grab samples (average of Branch 1 & 2).

Report Created: **Tuesday, January 04, 2011**

Total [ML]: **0.07 0.72 380.19 380.97**

Water Volume [%]:

Untreated **0.1 %**
Below Dose **0.1 %**
To Dose **99.9 %**

- Notes:**
- UV Comparative Dose: 18.1 mJ/cm2
 - %UVT values determined via grab sample
 - NR - No Result
 - NA - Not Analyzed
 - OL - Off Line
 - UV Transmittance values determined via grab samples (average of Branch 1 & 2).

Bacteria Sampling Only

r Maxxam Laboratory use only

Condition of samples upon receipt:

Acceptable
Not acceptable

Average temperature
