

NEEDS FOR AND ALTERNATIVES TO (NFAT)**Manitoba Hydro's response to MIPUG Exhibit 21, Question 3**

For #95 Page 130 and 134, please provide the equivalent chart with Conawapa consistently held to a 2026 in-service date, if available.

Response:

The information provided to the Manitoba Hydro-Electric Board can be found in Exhibit #101. The information in Exhibit #174 provides information on the same basis as that found in Exhibit #101 with the exception of adding information under DSM Level 3 where Conawapa is deferred rather than held at the in-service date of 2026.

Development Plan NPV's - Including Potential Cash Transfers to the Province @ 5.4% Real Discount Rate

- NFAT High capital costs for Keyask and Conawapa as proxies for 2014 estimates
- 2013 load forecast and assumptions, MP & WPS sales but no WPS investment in Interconnection.
