THE MANITOBA HYDRO ACT

Order No. 21/07

March 5, 2007

Before: Graham Lane, C.A., Chairman
Robert Mayer, QC, Vice-Chairman
Len Evans, LLD (Hon.), Member

**AN ORDER
APPROVING MANITOBA HYDRO ELECTRIC RATES
PURSUANT TO BOARD ORDER 20/07**

Introduction:

By this Supplementary Order to Order 20/07, the Public Utilities Board (Board) approves the attached schedule of rates to be charged by Manitoba Hydro (MH) effective March 1, 2007.

These rates were approved on an interim basis and are subject to review and possible amendment at the next General Rate Application (GRA) hearings, anticipated for the fall of 2007.

Background:

MH applied to the Board in January 2007 for approval of a 2.25% rate increase. By Order 20/07, the Board approved the rate increase with two significant variances, those being:

- a) the rates were approved on an interim basis, effective March 1, 2007 through to December 31, 2007, unless extended or varied by a further Order of the Board; and
- b) MH's request to consolidate the declining rate block schedule for residential customers was deferred for consideration at the anticipated fall GRA.

MH was directed to file revised rate schedules to reflect the Board's decision.

In response, MH filed revised proof of revenue calculations and rate schedules; the schedules reflect the approved rate increase and the decision to maintain the residential declining rate block.

Board Findings

The Board has reviewed MH's proof of revenue and the revised schedules and is satisfied that the revised schedules comply with Order 20/07.

Accordingly, the Board will approve the attached rate schedules to be charged from March 1, 2007 to December 31, 2007, unless extended or varied by a subsequent Order of the Board.

It Is Therefore Ordered That:

The rate schedules attached as Appendix A, filed by Manitoba Hydro in accordance with Order 20/07, BE AND ARE HEREBY APPROVED for rates to be charged from March 1, 2007 to December 31, 2007, unless extended or varied by an Order of the Board.

DEFINITIONS

All Rates Schedules in the publication are applied on a MONTHLY basis except as noted.

The following expressions shall have the following meanings:

- a) "Basic Charge": a charge that helps defray those costs that do not change with the amount of electricity used. This includes the direct costs of metering, portions of the distribution system, as well as billing administration.
- b) "Billing Demand": The greatest of the following (expressed in kV.A)
 - i. measured demand; or
 - ii. 70% of the highest measured demand in the Billing Year for the months of December, January, February; or
 - iii. 25 % of contract demand; or
 - iv. 25% of the highest measured demand in the previous 12 months.
- c) "Billing Month": the period of time, generally 30 days, in which Energy and/or Demand is consumed and thereafter billed to the Customer.
- d) "Billing Year": twelve monthly billing periods commencing with the month of December and ending the following November.
- e) "Demand": the maximum use of power within a specified period of time.
- f) "Demand Charge": that portion of the charge for electric service based upon the electric capacity (kV.A) consumed and billed on the basis of the billing demand under an applicable rate schedule.
- g) "Energy": power integrated over time and measured or expressed in kilowatt-hours (kW.h).
- h) "Energy Charge": that portion of the charge for electric service based upon the electric energy (kW.h) consumed or billed.
- i) "Kilo-Volt Amperes (kV.A)": also referred to as apparent power, is the product of the volts times current of a circuit divided by 1000. It is composed of both real and reactive power.
- j) "Kilowatt Hour (kW.h)": the basic unit of electric energy equal to one kilowatt of power supplied to or taken from an electric circuit steadily for one hour.
- k) "Measured Demand": the highest demand recorded in the Billing Month.
- l) "Power Factor": is the ratio of real power (kW) to apparent power (kV.A) for any given load and time. Generally it is expressed as a percentage ratio.

- m) “Watt (W)”: the electrical unit of power or rate of doing work; the rate of energy transfer equivalent to one ampere flowing under a pressure of one volt at unity power factor.

RESIDENTIAL RATES

RESIDENTIAL - *TARIFF NO. 2007-01*

Basic Charge:	\$ 6.24
PLUS	
Energy Charge:	
First 175 kW.h	@ 5.94 ¢ / kW.h
Balance of kW.h	@ 5.79 ¢ / kW.h
Minimum Bill:	\$ 6.24

Services over 200 amps will have \$6.24 added to the Basic Charge.

Applicability:

The Residential rate is applicable for all residential purposes as follows:

- a) individually metered single family dwellings including those in multiple residential projects and single or three phase farm operations served through the same meter if:
 - i. the connected business load does NOT exceed 3 kW; or
 - ii. the combined agricultural and residential load does NOT exceed a demand of 50 kW.
- b) services for personal use outside the home, such as residential water wells, private garages, boat houses and swimming pools (use can be for household, recreational and hobby activities).
- c) single metered multiple residential projects meeting all the following criteria:
 - i. monthly demand does not exceed 50 kV.A;
 - ii. the meter serves four or less individual suites or dwelling units;
 - iii. none of the units are used for business purposes;
 - iv. individual dwelling units are:
 - self-contained rental apartments with common facilities; or
 - row housing with self-contained rental dwelling units and common facilities; or
 - buildings with condominium type dwellings incorporated under *the Condominium Act*; or
 - individual residential services within a trailer park established prior to May 1, 1969.

RESIDENTIAL RATES

Primary metering of multiple Utility-Owned transformation services has an additional 2% added to the kV.A for each transformation greater than one. There is also a 1% reduction on recorded demand and energy to account for transformer losses.

Applicability:

The General Service Small Rate is applicable to:

- a) service with Utility-Owned transformation for all non-residential purposes including churches, community clubs and other community service and recreation facilities and all commercial and general purposes wherein the conduct of business activities or operation is associated with the distribution of goods and/or services.
- b) occupied dwellings where the connected business load exceeds 3 kW to not exceeding 200 kW.
- c) single metered multiple residential projects meeting any of the following criteria:
 - i. monthly demand exceeds 50 kV.A to not exceeding 200 kV.A ; or
 - ii. the meter serves five or more individual suites or dwelling units; or
 - iii. any of the units are used for business purposes.
- d) farm services:
 - i. without an occupied dwelling being used for agricultural or commercial purposes; or
 - ii. where the connected business load exceeds 3 kW to not exceeding 200 kW; or
 - iii. where the combined agricultural and residential load exceeds a demand of 50 kV.A to not exceeding 200 kV.A.

GENERAL SERVICE

Short-Term Power Rate

The General Service Short-Term application is available throughout the Province of Manitoba except in the Diesel Zone, for customers with services exceeding 200 kV.A who, by the nature of their business, do not require service during the months of December, January, and February.

Qualifying customers will be billed at, and subject to the conditions of, the appropriate General Service Large or Medium rate.

Services must be totally disconnected from 00:00 hours, December 1 to 24:00 hours, February 28/29.

Service must be taken for a minimum of four months, normally consecutively, during the period March 1 to November 30.

General Service Short-Term is NOT available in conjunction with other services at the same point of delivery.

Unmetered Services

Billed on the General Service Small Rate Tariff No. 2007-20 or 2007-21:

The Unmetered Service rate is applicable:

- a) for non-residential customers where the load is constant and the consumption is consistent and metering is unnecessary or undesirable, specifically including traffic signals, pedestrian walkway lighting, directional traffic signs, hazard flashers, cable television power amplifiers, telephone booths, transit shelters (both heated and unheated), cathodic protection rectifiers (for oil and natural gas pipelines), water gauge wells, highway traffic counters, governmental navigational lights (both nautical and aerial), municipal sirens and Canadian Emergency Measures Organization emergency siren alarms.
- b) for existing railway crossings, sign lighting and window lighting. Customers will be required to provide metering facilities if additional load is connected.
- c) for services such as fairs, summer midways, television production and welding schools where service is required for less than 30 days.
- d) for oil field pumping services connected prior to April 1, 1980 with oil pumping motors of the counter balanced (nodding or piston) type.

**GENERAL SERVICE
SHORT-DURATION, INTERMITTENT RATE
TERMS AND CONDITIONS**

General

Manitoba Hydro will supply short-duration, intermittent power and energy to customers whose operation requires short periods of high demand combined with overall, very low energy consumption.

The Corporation may regulate timing of the customer's demand requirements so that they do not coincide with other system peak demands.

The Corporation may interrupt the supply at any time, for any length of time and for any reason.

Conditions of Service

Qualifying customers will be billed at, and subject to the conditions of, the appropriate General Service Large or Medium rate with the following provisions:

- a) Measured demand will be reduced by 50% for billing purposes.
- b) Customers will be assessed a monthly energy entitlement based on a 1% load factor (monthly demand x 0.01 x 730) to be billed at the applicable General Service rate.
- c) Energy consumption in excess of the monthly energy entitlement will be billed at a rate equal to 10 times the usual applicable General Service rate.

Customers will be required to enter into a formal contract with Manitoba Hydro. The contract will document the above conditions as well as any others considered necessary due to the nature of a specific service.

Rate Application

The General Service Short-Term, Intermittent rate is available to all customers, except those in the Diesel Rate Zone, to customers qualifying for the General Service Large and General Service Medium rates.
