## 1.0 Summary

By this Order the Public Utilities Board (Board) approves, on an interim *ex parte* basis, a decrease of 2.2% to Centra Gas Manitoba Inc.'s (Centra) Primary Gas rate as of November 1, 2011. The Primary Gas rate will decrease from \$0.1468/m³ to \$0.1436/m³.

The decrease, when combined with other bill elements, is expected to result in a decrease of \$8 per year (approximately 0.9%) for the "typical" residential customer receiving quarterly-priced Primary Gas from Centra. Larger volume customers receiving quarterly-priced Primary Gas from Centra may expect an annualized bill decrease ranging from 1.0% to 2.0% (depending on volumes consumed).

Customers purchasing Primary Gas on <u>fixed price contracts</u> (from either private marketers or Centra) will not be affected. The Primary Gas component of their bills is established by contract.

Furthermore, Supplemental gas, Transportation, and Distribution rates, which affect all customers, are also not affected by this Order.

#### Factors Driving Rates

Oil prices decreased slightly over the past quarter, while natural gas prices remain very depressed. Since the commodity collapse that began in the third quarter of 2008, oil prices have generally been climbing (oil prices today are in the range of \$80 to \$90/barrel) while natural gas prices have remained low.

One of the primary reasons for the continued low price for natural gas is the identification of new domestic natural gas supplies, particularly arising from the development and promise of economically available shale gas. Recoverable shale gas resource has been expanding due to improvements in recovery technologies, and the development of shale gas resources in North America has been classified by many as a "game changer" for the North American natural gas market. Recently, shale gas accounts for about 16% of U.S. and Canadian natural gas supply, and this segment of the overall natural gas supply continues to grow.

Another reason for continued low natural gas prices has been the slow recovery of the economy, particularly in the United States and particularly with respect to industry (which are large consumers of natural gas).

Despite the additional natural gas resources (from shale gas development) and lower than expected demand due to the slow recovery of large industry, future prices for natural gas remain subject to uncertainty.

Improved economic growth in North America and increased use of natural gas in electricity generation could result in natural gas prices rising. As well, government environmental policies may also impact prices, should such policies favour the development of a clean energy standard including a carbon cap-and-trade program or the placing of a price on carbon emissions.

Compared to coal, natural gas emits much lower emissions, and natural gas could be a preferred fuel choice under such a policy environment. (There is also uncertainty concerning possible negative environmental impacts resulting from shale gas development technologies.)

In general, most natural gas price projections, at this time are not predicting significant increases in natural gas prices in the near future. In fact, natural gas prices remain subject to downward pressure from steady if not increased production levels of natural gas (with continued development of shale gas resources), and with significant gas in storage.

The chart below reflects the 12 month futures price strip for natural gas taken on October 3, 2011 and used in the calculation of Primary Gas rates.

#### **AECO Price\$/GJ (Canadian)**

Nov/11	Dec/11	Jan/12	Feb/12	Mar/12	April/12	May/12	June/12	July/12	Aug/12	Sept/12	Oct/12
3.3275	3.5875	3.640	3.650	3.615	3.5675	3.5825	3.6125	3.6225	3.6375	3.6675	3.7325

As well, November 1, 2011 Primary Gas rates have been influenced by:

- a) Gas purchased at prices slightly lower than current market prices and stored within Centra's natural gas storage facilities; these volumes to be drawn down through the winter months (lower prices paid for gas in storage is a contributing factor to lower gas rates).
- b) Primary Gas rate riders charging consumers for past differences between actual natural gas costs and the forecasted costs reflected in prior rates -- the estimated Primary Gas rate rider as of October 31, 2011 reflects approximately \$0.7 million owing to customers.

c) The Board-approved Rate Setting Methodology (RSM), a process agreed to by interveners representing customer groups and Centra (administered by Manitoba Hydro), and approved by the Board. The process involves Purchased Gas Variance Accounts (PGVA) recording variances between projected and actual cost of natural gas, for reflection in rates at the next quarterly rate setting.

Quarterly Primary Gas rate setting does not involve a public hearing, this recognizing the "mathematically-based" process for the quarterly rate settings and furthering the objective of least-cost regulation through the deferral of a public review of rates to the Board's annual Cost of Gas hearing.

#### 2.0 Introduction

Centra is a wholly-owned subsidiary of Manitoba Hydro (MH), and is Manitoba's largest natural gas distributor. Centra's Quarterly rates are subject to the approval of the Board pursuant to provisions of *The Public Utilities Board Act*.

The five components of natural gas billings to Centra's customers are:

- Primary Gas Rates (system gas from Centra the subject of this Order, or gas purchased for fixed-price contract customers);
- Supplemental Gas Rates (applying to all Centra's customers, whether provided Primary Gas by Centra or through fixed-price contracts);
- Transportation (to Centra) Rates (applicable in varying degrees to all customers);
- Distribution (to Customer) Rates (applicable to all customers); and
- Basic Monthly Charge (BMC) (applicable to all customers).

Centra's Primary Gas rates are subject to amendment quarterly, on February 1, May 1, August 1, and November 1 of each year. These regularly scheduled quarterly Primary Gas rate reviews occur in accordance with the Board-approved RSM, which is formula-driven and relies on established accounting and rate setting conventions.

Non-Primary Gas components of Centra's rates, for all customers including those receiving natural gas from fixed-price contracts, are also periodically reviewed and approved by the Board.

These non-Primary Gas reviews occur either through the annual Cost of Gas hearing, which also provides for the finalization of past interim quarterly Primary Gas rate changes, or in the context of a General Rate Application (GRA).

Board Order 65/11 dated April 28, 2011 is the most recent Board Order arising out of Centra's Cost of Gas review. Board Order 66/11 dated May 2, 2011 approved both Centra's quarterly interim Primary Gas rate as well as rate changes to the Non-Primary Gas components of Centra's rates. Board Order 96/11, dated July 26, 2011, approved the most recent change to Centra's Primary Gas rates.

Historically, Centra hedged a percentage of its Primary Gas purchases, pursuant to a Board-approved policy implemented to reduce rate volatility. That said, the Board, by Order 170/09, directed a phase-out of hedging Primary Gas for "system gas" customers, from 75% of eligible volumes to 0% by August of 2011.

In accordance with Order 170/09, from August 1, 2011 customers purchasing quarterly-priced Primary Gas from Centra will experience rates more reflective of the actual market prices of natural gas. As such, there are no hedge impacts to include in the determination of November 1, 2011 Primary Gas sales rates. Changes in quarterly-priced Primary Gas rates will still be moderated by: a) the cost of gas in storage, and b) the quarterly pricing methodology. Customers desiring additional stability for their gas bills may elect Manitoba Hydro's equal monthly payment plan (EPP), whereby monthly bills can be fixed based on estimated consumption and rates.

The Board directed the phase-out of hedging because of the recent availability of fixed-term fixed-priced Primary Gas from Centra, as well as the continuing availability of such fixed-price contracts from private marketers.

Rate riders also affect customer bills. Rate riders recover or repay, from or to customers, balances developing through differences that arise between billed rates and actual rates, with interest. The estimated balance in the Primary Gas Variance Account is \$0.7 million owing to customers. This is included in the calculated Primary Gas billed rate.

# 3.0 Background

The following table illustrates changes in natural gas commodity prices and prospective overall bills since August 1, 2007, from the perspective of the average residential customer purchasing Primary Gas from Centra by way of quarterly Primary Gas rates:

### **Historical Primary Gas Costs and Bill Impacts**

Date	Primary Gas Commodity Cost	% change in Primary Gas Cost	Annual Bill Adjusted to Current Typical Residential Volume	% Change in Total Projected Annual Bill at Current Volumes
1-Aug-07	7.457/GJ	-7%	\$1180	(1.8%)
1-Nov-07	7.070/GJ	-5%	\$1139	(3.5%)
1-Feb-08	7.314/GJ	3%	\$1153	1.2%
1-May-08	8.308/GJ	14%	\$1238	7.4%
1-Aug-08	9.473/GJ	14%	\$1309	5.8%
1-Nov-08	7.945/GJ	-16%	\$1239	(5.4%)
1-Feb-09	7.852/GJ	-1%	\$1183	(4.5%)
1-May-09	7.041/GJ	-10%	\$1095	(7.5%)
1-Aug-09	6.628/GJ	-6%	\$1122	2.5%
1-Nov-09	5.566/GJ	-16.0%	\$1051	(6.3%)
1-Feb-10	5.500/GJ	1.2%	\$1035	(1.6%)
1-May-10	4.864/GJ	-12%	\$ 962	(6.1%)
1-Aug-10	4.740/GJ	-3%	\$ 954	(0.8%)
1-Nov-10	4.166/GJ	-12%	\$ 912	(5.3)
1-Feb-11	4.245/GJ	2%	\$ 930	2%
1-May-11	4.105/GJ	-3.3%	\$ 882	(3.1%)
1-Aug-11	3.903/GJ	-4.9%	\$ 865	(1.8%)
1-Nov-11	3.755/GJ	-3.8%	\$ 863	(0.9%)

#### Notes

- 1. The average annual bill above is based on the estimated annual consumption of a typical residential customer of 2,465 cubic metres with 97% from Primary Gas and 3% from Supplemental Gas.
- 2. Residential customers receiving Primary Gas from marketers and Centra's Fixed Price Service would not have the same cost and bill experience as Centra's Quarterly Service customers. Primary Gas costs of customers on contracts are in accordance with the contract with the supplier, generally fixed for one to five years at rates different than those charged by Centra as per the above quarterly rates.
- 3. The above table incorporates changes approved by the Board for both non-Primary Gas and Primary Gas from August 1, 2007 through to November 1, 2011.
- 4. The Board's RSM considers factors other than natural gas commodity prices including the cost of gas in storage and historical hedging results. Accordingly, the volatility in Primary Gas rates experienced by Centra's Primary Gas customers is reduced as overall rates also take into account operating, amortization, administrative and financial costs.

The following table reports the composite elements of recent Primary Gas rate amendments:

#### **Historical Primary Gas Costs and Rate Calculations**

Component	Costs and Proposed Rates Nov 1/10	Costs and Proposed Rates Feb 1/11	Costs and Proposed Rates May 1/11	Costs and Proposed Rates Aug 1/11	Costs and Proposed Rates Nov 1/11
Date of Forward Price Strip	October 15, 2010	January 4, 2011	April 1, 2011	July 1, 2011	October 3, 2011
<sup>1</sup> 12 Month Forward Price per GJ	\$3.671	\$4.294	\$4.145	\$3.919	\$3.760
<sup>2</sup> Costs (gains) resulting from Hedging	\$0.5695	\$0.0428	\$0.02	\$0.000	\$0.00
Forecast Gas Supply Price	\$4.240	\$4.337	\$4.165	\$3.919	\$3.760
<sup>3</sup> Cost of Gas drawn from Storage	\$3.851	\$3.852	\$3.852	\$3.852	\$3.735
Weighted Gas, Cost (mix of Gas Supply & Storage Gas costs)	\$4.166	\$4.245	\$4.105	\$3.903	\$3.755
Rate per Cubic Metre	\$0.1575	\$0.1604	\$0.1552	\$0.1475	\$0.1419
<sup>4</sup> Base Primary Rate, adding Fuel and Overhead cost component per cubic metre	\$0.1603	\$0.1634	\$0.1582	\$0.15014	\$0.14424
<sup>5</sup> Plus (Less) PGVA Rider per cubic metre	(\$0.0003)	\$0.0053	(\$0.0034)	\$0.0033	\$0.0006
Total Billed Rate	\$0.1600	\$0.1687	\$0.1548	\$0.1468	\$0.1436

#### Notes:

- 1. Primary Gas rate increase factors in 100% of the increase between the current 12-month forward price for Western Canadian natural gas commodity supplies for the period August 1, 2011 to July 31, 2012 from the price as of July 1, 2011.
- 2. Board Order 170/09 directed a phase-out of hedging Primary Gas by August of 2011.
- 3. The cost of gas drawn from storage for supply to Primary Gas customers is accounted for, reflecting the actual cost of gas in storage (withdrawals commence November 1), and blended in on a weighted basis to arrive at a weighted gas cost.
- 4. At November 1, 2011, compressor fuel costs are \$0.0007/m³ and overhead cost components are \$0.00164 per m³.
- 5. Rate changes by means of rate riders are established to collect or refund from customers any accumulated Primary Gas PGVA balances over the next 12 month period.

A Primary Gas rate rider of \$0.0006/m³ (reflecting an estimated balance, to October 31, 2011 of approximately \$0.7 million owing to customers), will be applied to the Primary Gas Rate. This rate rider is expected to refund \$0.7 million to customers, assuming normal volumes of gas consumed over the period November 1, 2011 to October 31, 2012. Any under-refunded or over-refunded balances will be included in the calculation of future rate riders.

Primary Gas rates also reflect the cost of gas withdrawn from storage. Lower purchased gas prices resulted in a forecast cost of \$3.735/GJ for the Primary Gas in storage as of October 31, 2011.

# 4.0 Outstanding Positions, Hedging

Commencing with the gas month of August 2011, and as directed in Board Order 170/09, there is no hedging for the quarterly-priced Primary Gas. Accordingly, there are no hedge impacts to include in the determination of November 1, 2011 Primary Gas Sales rates.

# **5.0** Customer Impact

The annualized bill impacts effective November 1, 2011 of the change in the Primary Gas rates arising out of this Application on the various customer classes are as follows:

<b>Customer Class</b>	<b>Annualized Rate Decrease</b>
SGS	0.7% - 1.0%
LGS	1.0% - 1.3%
High Volume Firm	1.3% - 1.6%
Mainline	1.4% - 1.7%
Interruptible	1.6% - 2.0%

The projected annualized net bill impact for a typical residential customer, based on average annual consumption of 2,465 m<sup>3</sup> of Primary Gas is a decrease of \$8 (or 0.9%), from August 1, 2011 rates.

# 6.0 Board Findings

**Approval** 

As Centra's October 20, 2011 Application to decrease interim Primary Gas rates properly reflects the Board-approved RSM, the Board will approve Centra's proposal for a decrease in Primary Gas rates.

Primary Gas rate changes affect only customers receiving quarterly-priced system gas (Primary Gas) from Centra. Customers on fixed-price contracts (with either gas marketers or Centra) are not affected.

The next review of Primary Gas rates will take place as of February 1, 2012.

Notification

Centra is to advise its Primary Gas customers of the change in Primary Gas rates.

Board decisions may be appealed in accordance with the provisions of Section 58 of *The Public Utilities Board Act*, or reviewed in accordance with Section 36 of the Board's Rules of Practice and Procedure (Rules). The Board's Rules may be viewed on the Board's website at <a href="https://www.pub.gov.mb.ca">www.pub.gov.mb.ca</a>.

# 7.0 It Is Therefore Ordered That:

- The Schedules of Rates attached to this Order as Appendix "A", effective for all gas consumed on and after November 1, 2011, BE AND ARE HEREBY APPROVED on an interim basis.
- 2. This Interim Order shall be in effect until confirmed or otherwise dealt with, by a further Order of the Board.
