AN APPLICATION BY MANITOBA HYDRO
FOR INTERIM EX PARTE APPROVAL
FOR THE WEEK OF DECEMBER 21, 2015 TO DECEMBER 27, 2015
OF THE SURPLUS ENERGY PROGRAM RATE

## Introduction

By this Order, the Public Utilities Board (Board) approves Manitoba Hydro's (MH) December 15, 2015 application for *ex parte* approval of revised and interim Surplus Energy Program (SEP) rates for the week of December 21, 2015 to December 27, 2015 attached as "Schedule SEP-1". Appendices A, B, C and D depict historical average, peak, shoulder and off-peak SEP prices.

# Background

On October 25, 1999 Manitoba Hydro (MH) applied to the Public Utilities Board (Board) for the establishment of a Surplus Energy Program (SEP) that would be made available to MH's General Service customers on an interruptible basis.

Board Order 90/00 approved MH's Application for the SEP with SEP prices set based on a forecast of the expected source of SEP energy and such prices would be submitted weekly to the Board for approval on an ex parte basis. Board Order 111/12 extended SEP to March 31, 2014.

Board Order 43/13 approved options 2 and 3 of the Surplus Energy Program as permanent rate offerings. In that same order, option 1 remains approved on an interim basis.

The pricing of the SEP energy, which is surplus to Hydro's immediate requirements, is established to approximate the price offered by MH to export sales customers on the opportunity market or, in the case where MH expects to import power, at a price reflective of MH's cost with a 10% surcharge.

The SEP program is expected to "break—even" on an annual basis. This means that the revenue raised is expected to be approximately the same as if the power had been sold on the opportunity export market.

Under SEP, participating large Manitoba customers either accept or decline the available additional electricity, as offered at the rates approved by the Board. In accepting the excess power, customers accept the risk of adverse implications if a service interruption occurs. These customers are generally expected to have back-up generation to draw on if a service interruption occurs.

## **Board Findings**

MH's latest SEP application is in accordance with the Board approved methodology and the SEP program continues to have value for a small component of MH's larger customer base (those firms able to profitably access interruptible power).

Continuing to deal with SEP applications on an interim *ex parte* basis is consistent with past practice, and the rates set through this process are interim, to be finalized at General Rate Application hearings.

Accordingly, the Board affirms revised Schedule SEP-1 and will approve the attached schedule.

# **IT IS THEREFORE ORDERED THAT:**

- 1. Manitoba Hydro's application for approval of Surplus Energy Rates from December 21, 2015 to December 27, 2015 as shown in Schedule SEP-1, as attached **BE AND IS HEREBY APPROVED** on an Interim Ex Parte basis.
- 2. This Interim Ex Parte Order shall be in full force and effect until confirmed or varied by a further Order of the Board following a public hearing.
