

2015 COST OF SERVICE METHODOLOGY REVIEW**Manitoba Hydro Undertaking # 8**

Manitoba Hydro to provide hourly load profile data for exports using Manitoba Hydro's load research in the same Excel format that was provided for the domestic classes in response to PUB/MH I-53

Response:

Hourly export kW loads for each year of Load Research supporting PCOSS08 (Order 116/08) and PCOSS14-Amended are provided in the Excel attachment to this Undertaking, similar format as Manitoba Hydro's response to PUB/MH I-53c-e. Exports are total loads measured at the meter. Hourly export data is not available for 2004-2005 Load Research, therefore, seven years are provided rather than eight.
