1.0 EXECUTIVE SUMMARY

By this Order, the Public Utilities Board (Board) approves, on an interim *ex parte* basis, a 52.3% increase in the propane commodity rate for Stittco Utilities Man Ltd. effective for propane consumed on or after November 1, 2012.

The table below compares propane commodity rates and delivery charges over the last year:

	Nov 1/11	Feb 1/12	May 1/12	Aug 1/12	Nov 1/12
Basic Monthly Charge	\$10.00/mo	\$10.00/mo	\$10.00/mo	\$10.00/mo	\$10.00/mo
	per m ³	per m ³	per m ³	per m ³	per m ³
Commodity Cost Recovery	\$1.78	\$1.47	\$1.0642	\$0.6000	\$0.9136
Delivery charge (Non-Commodity Charge)					
First 100 m3	\$1.14	\$1.14	\$1.14024	\$1.20122	\$1.20122
Next 400 m3	\$1.02	\$1.02	\$1.01691	\$1.07129	\$1.07129
Next 1000 m3	\$0.96	\$0.96	\$0.96223	\$1.01371	\$1.01371
Next 2500 m3	\$0.78	\$0.78	\$0.77963	\$0.82131	\$0.82131
Over 4000 m3	\$0.60	\$0.60	\$0.59809	\$0.63006	\$0.63006

Commodity rates are adjusted every quarter in accordance with the quarterly rate setting (QRS) process approved by the Board in Orders 141/08 and 45/09 (available for review on the Board's website). Interim commodity Orders are reviewed and finalized annually, typically when Stittco files its annual non-commodity rate application.

Commodity rates can represent approximately half of the average annual residential bill depending on propane costs; the

remainder of the costs are non-commodity costs such as distribution and administrative costs.

The 52.3% commodity rate increase is a result of a market price increase in the cost of the propane commodity (from \$125/m³ for liquid propane to \$204/m³), and a purchase price variance account balance of \$243,153 owing to customers as of July 31, 2012.

The commodity rate increase is expected to increase the average overall residential propane bill by approximately 17% when non-commodity costs are included.

2.0 INTRODUCTION

The commodity portion of Stittco's overall propane rates is amended quarterly, in accordance with the QRS process. Non-commodity costs, or delivery charges, are set annually and are designed to recover the costs incurred by Stittco for the distribution of propane to customers. Delivery charges were recently amended in Board Order No. 88/12 for propane consumed after August 1, 2012.

Commodity costs, including transportation to Thompson, are passed on to customers with no mark-up. Prices of the purchased commodity may vary because of market conditions; they may be higher or lower than price levels established by Board Order. The differences are tracked in a Purchased Price Variance Account (PPVA), and either refunded to or collected from customers in subsequent rate settings. Regular adjustments to commodity prices help to minimize balances in this account and buffer often large swings in commodity charges.

Rates established by the QRS are set on an interim *ex parte* basis, subject to satisfactory information being filed by Stittco with the Board. The quarterly interim rates are reviewed and finalized annually through a public process (either by way of a paper review or oral hearing) when Stittco files their annual non-commodity rate application.

The interim *ex parte* (without notice as Stittco is not giving notice to anyone other than the Board) rate approval process reduces regulatory costs.

3.0 APPLICATION

Stittco filed its application on October 15, 2012, seeking an increase in commodity rates from \$0.6000 to \$0.9136 per cubic meter of propane vapour. The commodity rate reflects Stittco's forecast propane commodity price of \$204.00 per cubic meter of liquid propane, plus an additional \$70 per cubic meter for delivery to Thompson. Stittco's application also included an adjustment to the propane commodity cost reflecting a PPVA balance of \$243,153 owing to the customer.

4.0 BOARD FINDINGS

The commodity recovery rate sought by Stittco fairly reflects projected commodity and transportation costs to Thompson. The Board will direct that the propane commodity rate be increased effective for propane consumed on or after November 1, 2012.

Propane remains an expensive fuel for heating purposes in comparison to other options. The Board continues to recommend that customers seek ways to upgrade the heating efficiency of their premises, so as to reduce propane consumption and resulting costs, and to consider other heating options such as converting to electric heat or geothermal. The cost of heating an average residential dwelling by propane, using a conventional propane furnace, is approximately two times the average cost of heating by electricity.

Board decisions may be appealed in accordance with the provisions of Section 58 of *The Public Utilities Board Act*, or reviewed in accordance with Section 36 of the Board's Rules of Practice and Procedure (Rules). The Board's Rules may be viewed on the Board's website at www.pub.gov.mb.ca.

5.0 IT IS THEREFORE ORDERED THAT:

Stittco Utilities Man Ltd.'s rates be amended on an interim *ex parte* basis as per the attached Schedule "A" effective for consumption on or after November 1, 2012.
