

2019/20 CENTRA GAS GENERAL RATE APPLICATION**Centra Gas #13**

Centra to advise of the date when it became responsible as the DSO (Downstream Operator) for T-Service customers in balancing its delivery areas.

Response:

Effective November 1, 1998, Centra became responsible as the DSO for all of the gas that was delivered to customers in its delivery areas. This change shifted the responsibility for daily and cumulative load balancing from individual Manitoba shippers (i.e., T-Service customers) to Centra for all quantities shipped, including those nominated by T-Service customers.
